25...d4 [25...♖xb2? simply loses to 26.♖a1+-; It would have been very principled to play 25...f6 with the idea to bring the king to f7-e6 and also to open the back rank. White must play resourcefully to maintain the advantage now. 26.♖a1 ♗d8 27.gxf6 gxf6 28.♗c5! ♔f7 Black finally leaves the back rank, therefore he is threatening with Rb7! 29.♖a7! This great move gives probably a winning advantage, because b4 is coming next. The tactical justification is really unique: 29...♖xb2 loses to

30.♖a8! ♖xc2+ 31.♔f1 ♖xc5 32.♖xd8+- and Black cannot avoid queening because after Ke7, Rc8! wins, while after 32...♖c7 33.♖f8+!+-]

26.♗d2 ♗d8 [26...♗xd2 also leads to problems after 27.♔xd2 ♖d8 28.♖e1! f6 29.gxf6 gxf6 30.f4! This is a key resource to maintain the advantage! Black is missing only one move (Kf7) to solve the problems, but it is enough for White to create problems.]

27.♔d3!? A very nice motif! Topalov liked the Re1-f4 idea in the 26...Bxd2 line and decided to use the same plan with the bishops on the board too!

27...f6 [27...♔f8 is too slow. 28.♖e1 f6 29.f4!; The critical was 27...♖xb2 28.f4 ♔f8 (28...exf4? 29.♖e1+-; 28...f6 transposes to the game.) 29.♖e1 ♔e7! 30.♖xe5+ ♔xd7 31.♖d5+ ♔c8 32.♖xd4± White should be winning, but Black has practical chances if he could create some counterplay with Rb1-h1.]

28.f4! ♖xb2 29.fxe5 fxe5 30.♖a1! Topalov starts to use his tactical skills even with limited material on board. The d7 pawn gives White many hidden resources! [30.♖e1 is less good in view of 30...♖b7! 31.♖xe5 ♖xd7]

30...♖b8 Only move! [30...♖b7? 31.♖a8 ♖xd7 32.♗a5+-; The most natural 30...♔f7 loses tactically to 31.♖a8 ♔e7

32.g6! freeing the g5 square for the bishop and on 32...h6

33. ♖xh6! gxh6 34. g7+- wins.]

31. ♖e4 [31. ♖a5!? was also strong!]

31... ♖f7 32. ♖xe5 ♖b7 A very nice defensive attempt, but it does not help this time.

33. ♖f1+! [33. ♖d6 does not lead anywhere because of 33... ♖b6+ 34. ♖d5 ♖b7 35. ♖c6 ♖b6+ and Rb7!]

33... ♖e7 [33... ♖g8 loses like in a study: 34. ♖e6 ♖b6+ 35. ♖d5 ♖b7

36. ♖f4!! What a brilliant idea! 36... ♖xd7+ 37. ♖d6! ♖e7 (37... g6 38. ♖e6+- and Rf8 next wins.) 38. ♖e6! ♖xd6+ 39. ♖xe7+- and mate or winning the rook.]

34. g6! Another tactical blow and now Black is helpless! Bg5 is the threat!

34... ♖b5+ [34... hxg6 35. ♖g5+ ♖xd7 36. ♖f7+- wins material.]

35. ♖xd4 ♖b6+ [35... hxg6 loses to 36. ♖c4! opening the d-file! When the rook moves, Bg5 check and Kxd7 Rd1 wins. Even after 36... ♖b8 37. ♖g5+ ♖xd7 38. ♖d1+ ♖e8 39. ♖xd8+ ♖xd8 40. ♖xd8 ♖xd8 41. ♖d5+- the pawn endgame is hopeless.; 35... ♖xd7 36. gxh7 ♖h5 37. ♖g5 ♖xh7 38. ♖e5 ♖xg5 39. hxg5]

36. ♖c4 ♖c5+ 37. ♖b3 ♖xd7 [37... hxg6 38. ♖b4+- Another motif. Somehow the black pieces are very unlucky in this endgame, they always stay in some kind of trick.]

38. ♖f7+ ♖e6 39. ♖xg7 Black resigned! A great game by Topalov! Objectively the 16.a3 novelty does not give an advantage, but it was a perfect idea for one game. The way of converting the advantage was also very instructive. **1-0**

**(4) Shirov, Alexei(2709)
- Markos, Jan(2602) [B29]**41st Olympiad Open 2014(11.21),
2014.08.14GM Csaba Balogh
Best rating: 2672

Markos tries a tricky sideline in the Sicilian defence, but Shirov seemed to know how to get an advantage against it. White plays a flawless game and it is also interesting from a theoretical point of view.

1.e4 c5 2.♘f3 ♘f6 I am not sure about the name of this sideline, but sometimes even strong GMs are trying to surprise their opponents with this move.

3.e5 [3.♘c3 3...d5 is the alternative.]

3...♘d5 4.♘c3 e6 This is the sharp reaction and the point of this line, but it seems to lead to White's favor after some complications. [4...♘xc3 5.dxc3 followed by Bf4, Qd2 and 0-0-0 is also considered to be better for White. The e5 pawn restricts the movements of the black pieces.]

5.♘xd5 exd5 6.d4 ♘c6 Black had a worse pawn structure and he decides to sacrifice the d5 pawn for quick development. These are all known and have been played in close to thousand games. White should accept the offer, otherwise Black plays d6 and solves the problems around his bad pawns.

7.dxc5 ♘xc5 8.♔xd5 ♔b6

9.♘c4! This is very important! White must prefer the active piece play and the initiative instead of passively protecting his extra pawn. [On 9.♔d2 9...O-O 10.♘d3 d6! and Black either wins back the pawn or forces the white king to move, but then the compensation will be more than enough.]

9...♘xf2+ 10.♔e2 O-O 11.♖f1 ♘c5

12.♘g5! This is still theory! White must choose the most direct moves and attack the weakness on f7, before Black could have opened the center with d6 on the exposed king on e2.

12...♘xe5 This seems to lead to a better endgame for White by force. [The main line continues with 12...♘d4+ 13.♔d1 ♘e6

14. ♖e4! d6! The only chance for Black to gain counterplay is to open the lines in front of the king. (14... ♗e7 could be met by 15. ♖d6! and Black is squeezed.) 15. exd6 ♖d8 16. ♗d3! ♗xd6 17. ♖h5 This has all been played before and Black seems to be in some trouble. There are threats against the h7 and f7 pawns, so he has nothing better than 17... f5 18. ♖xd6 ♖xd6 (18... g6 could be met by the intermediate move 19. ♖xc8!) 19. ♖xf5 ♖f8 (19... ♖xh2 restores the material balance, but White is dominating. 20. ♖f7+ ♖h8 21. ♗g5 Trying to make use of the weak back rank. 21... ♖g8 22. ♗e3±) 20. ♖f7+ ♖h8 21. ♖f4± with an extra pawn. The white king is safe on d1.]

13. ♖xf7! Another important detail! [13. ♖xe5 is much worse in view of 13... d5! and all black pieces are coming to the game with tempo. 14. ♗xd5 ♗g4+ 15. ♖e1

15... ♖ae8! 16. ♗xf7+ ♖h8 17. ♖xe8! Only move! (17. ♗xe8 is refuted by 17... ♖a5+! 18. c3 ♗f2+—+ and the queen falls.) 17... ♖xe8+ 18. ♗xe8 ♖a6 with a very unpleasant attack against the white king. White is a piece up, but he has serious problems with finishing the development.]

13... ♖xf7 14. ♖xf7 ♖e6+! Black had no choice, he was forced to go into a worse endgame otherwise he gets mated.

15. ♖xe6 dxe6 16. ♖xf8+ ♖xf8 [16... ♗xf8 17. ♗e3 White has a better pawn structure and Black also has problems with

developing the c8 bishop, since Bd7 runs into Rd1 and the e6 falls.]

17. ♗g5! The following couple of active moves are significant to maintain the initiative, otherwise the symbolic advantage of having an isolated pawn on e6 might evaporate.

17... ♗d7 18. ♖f1+! An unpleasant check, both king moves have their own problems.

18... ♖e8 [18... ♖g8 is even worse in view of 19. ♖d1! and the e6 pawn is lost unless the bishop returns to c8, which allows Rd8.]

19. ♗d3! White creates a huge weakness on the kingside.

19... g6 [19... h6 20. ♗g6# is pretty.]

20. ♖f4! Perfectly played by Shirov! After provoking the weakening, White transfers his rook to h4 and the pawn is lost. There is no adequate way to keep the material balance.

20... ♗e7 The best chance to get rid of one of the active bishops, but this does not save the pawn either. [20... ♗c6 21. ♖h4 ♗xg2 22. ♖xh7+—]

21. ♗xe7 ♖xe7 22. ♖h4 ♗c6 [22... ♖h8 also drops material after 23. ♗xg6+—]

23. ♖xh7+ ♖f6 White has won the pawn and now comes the

technical part of the game. Shirov does not give any chance to his opponent.

24.g4 with the idea to play h4 and g5.

24...♔g5 25.♔e3! Offering Black to choose between two very bad options. Either to trade the g-pawns and create a h-passed pawn or to allow the squeezing with Be2 followed by h4 and g5!

25...♔xg4 [25...♖g8 is even worse 26.♙e2!+- and h4, g5 is coming next.]

26.♙xg6 ♖f8 27.♙e4! White already has an extra pawn and his active rook on the 7th rank decides the outcome of the game.

27...♙xe4 28.♔xe4 ♖f4+ [28...♖f2 29.♖g7+ ♔h3 30.♔d3+- followed by capturing the queenside pawns is also totally winning.]

29.♔e5 ♖f2 30.♖g7+ ♔h3 Shirov calculated well that after the simplification the 2 vs 1 endgame will be easily winning as the black king will be too far away from the queenside...

31.♔xe6 ♖xc2 32.♖xb7 ♔xh2 33.a4 ♔g3 [33...a5 does not change much. White wins after 34.♖b5 ♔g3 35.b3 ♖c3 36.♔d5 ♔f4 37.♔d4 ♖h3 38.♔c4+- and the a5 falls.]

34.b4 a5 35.bxa5 ♖c4 36.♔d5 ♖xa4 37.♖b5 [Black resigned in view of 37.♖b5 37...♔f4 38.♔c6+- followed by Kb7 and promoting the a-pawn. A very nice victory by Shirov, which shows the way to get an advantage against the 2...Nf6 line.]
1-0

Endgame section

(15) Negi, Parimarjan(2645)
- Kasimdzanov, Rustam(2700)

Olympiad, 2014.08.14

GM Csaba Balogh
Best rating: 2672

We are studying a very instructive rook endgame, which is a theoretical draw, but Black must defend precisely to hold.

51...♔g7 The point is, White cannot use his rook because the loss of the a-pawn leads to a dead draw immediately with 2 against 1. If the white king goes to b6 to free the rook, Black gives a check, sends the king away from the a7 pawn and then he goes back to the a-file. There will only be one detail that Black must be careful about...

52.♔c4 ♖a2 Kasimdzhanov starts to defend with the right strategy. He keeps on attacking the f-pawn with the rook. We will see later why this is so important.

53.♔d5 ♖d2+ [53...♖a1 is also good.]

54.♔e4 ♖e2+ 55.♔d3 [55.♔f5 leads to a very important theoretical draw after 55...♖xf2+ 56.♔xg5 ♖a2 Despite the two extra pawns, White cannot win. Black only waits with his rook and when the king arrives to b6, he gives check from the b-file.]

57.♔f4 ♖a1 58.g5 ♖a2 59.g6 The g-pawn cannot send the black king away from its ideal position, Black continues waiting with 59...♖a1 and the game is drawn. The same theoretical draw exists if White has an h-pawn instead of the g, then Black puts his king to h7 and waits. However in case of any other pawns, White is winning, for instance with an f-pawn, he advances it to f6 and on Kf7 Rh8! is a very important motif to win the game with the idea of Rxa7 Rh7 winning the rook.]

55...♖a2 56.f3 ♖a3+ 57.♔d4 The black rook is excellently placed on a3, keeps an eye on both a7 and f3 pawns.

57...♖a1 Not a mistake, but it was more principled to wait with Kh7 and keep the rook on its ideal position.

58.♔e5 ♖a5+ 59.♔d6 ♖a6+ 60.♔c7 ♖a3!

61. ♖c6 It looks White is just moving, but he lays a deep trap, which Kasimdzanov fails to realize. The only existing winning idea is to get the king to the 6th rank and create the threat of moving the rook away (Rc8 for instance) and after Rxa7 Rc7 transposes to a winning pawn endgame. This is the only thing that Black must be careful about.

61... ♜c3+! Therefore Black sends the king away from the 6th rank.

62. ♖d5 ♜a3! And returns to the ideal square.

63. ♖c5 ♜a6 Kh7 was also possible.

64. ♖c4 ♜a3 65. ♖b5! Here we are, the critical position! Black failed to sense the danger and he went away from the ideal square with his rook.

65... ♜a1? The losing move. [The only move to hold was

65... ♖h7! or if the king was on h7, Black should have played Kg7! The point is to keep the f3 pawn under attack. If White goes 66. ♖b6 ♜b3+! 67. ♖c6 ♜c3+ 68. ♖d6 ♜d3+ 69. ♖e6 ♜e3+ 70. ♖f5 (70. ♖d5 70... ♜d3+ 71. ♖c4 ♜a3= also holds.) 70... ♜xf3+ is hanging with check and we transposed to the theoretical draw which arose in the 55.Kf5 line. 71. ♖xg5 ♜a3=]

66. ♖b6! Suddenly White is winning. Black is forced to give checks, but at the end the king arrives to f5 and the f3 pawn is not hanging anymore.

66... ♜b1+ 67. ♖c6 ♜c1+ [67... ♜a1 loses to the motif we mentioned after the 61st move. 68. ♜d8 ♜xa7 69. ♜d7+ ♜xd7 70. ♖xd7+—]

68. ♖d6 ♜d1+ [68... ♜a1 is again refuted by 69. ♜c8! ♜a6+ 70. ♜c6+— and Rc7 next.]

69. ♖e6 [Black resigned in view of 69. ♖e6 69... ♜a1 (69... ♜e1+ 70. ♖f5+—) 70. ♜d8! ♜a6+ 71. ♜d6 ♜xa7 72. ♜d7+ ♜xd7 73. ♖xd7 ♖f6 74. ♖d6+— and Ke5 next with an easily winning pawn endgame. White wins the g5 pawn automatically by squeezing the black king away... We can be sure that Kasimdzhanov was familiar with all the ideas, but still he could not focus at the end of the 5th hour and lost his concentration and the game.] **1-0**

**(16) Melkumyan, Hrant(2655)
- Neiksans, Arturs(2572)**Riga Tech Open A 2014(4.2),
2014.08.19

White has been better all game long and little by little Melkumyan improved his advantage, so we see this very interesting knight endgame. White is clearly better, but is this position winning or not, that is very hard to say. White's idea is clear, to bring his king to b5 to give the c-pawn the much needed support. The exchange of knights should also lead White into a winning endgame.

41. ♔d3 As planned, the white king is going to b5.

41... ♚g6 It is some sort of pity to get the black king away from the action, but there is simply no other move which makes sense. The black knight can't move from c6 because of Kd4 and in case Black would play something like 41...Ke6 42.Nd4 would end the game on the spot.

42. ♘d4 The white knight is taking a great position on d4.

42... ♜e5+ 43. ♔c3 ♚f7 and the black king is coming back to stop the c-pawn from moving.

GM Arkadij Naiditsch
Best rating: 2737

44. ♔b4

44... ♚e7 [A much more interesting win White would have to find after 44... ♘d3+ 45. ♔b5 ♜xf2 Now White's only hope is the c-pawn... 46. ♔b6 ♘e4 47.c6 So far things were easy to see, but now the fun is starting: 47... ♚e7 (47... ♘d6 was losing immediately since after 48.c7 Black can't stop White from playing Nb5 soon. 48... ♘c8+ 49. ♔b7 ♘d6+ 50. ♔b8 and Nb5 next will decide the game.) 48. ♔b7! A very strong move with the deep idea of putting Black into a zugzwang. (48.c7? would only draw: 48... ♔d7 49. ♔b7 ♘c5+) 48... ♘c5+

49. ♔c7! Black is in zugzwang. If the black king moves to e8, the white king goes to d6 and in case of a knight move, the white king could go to b8. 49...f5 50. ♘xf5+ ♔e6 51. ♘d4+ ♔e7 So the f-pawn is gone, but still it is not that simple to win the game, another zugzwang is needed... 52. ♔b6 ♘e4 53. ♔b7!

♞c5+ 54. ♔c7 and once again Black finds himself in a position of zugzwang, but this time there is nothing more to sacrifice. The game is over.]

45. ♖b5 ♕d7 The white domination is now much more obvious.

46. f4! A nice move. White is not only kicking out the black knight from e5, but the position of the white pawn on f5 can also become useful.

46... ♞g6 47. c6+ ♕c8 [After 47... ♔c7 48. ♔c5 ♞xf4 Black won the pawn, but can't stop the c-pawn from queening: 49. ♞b5+ ♖b8 50. ♕d6 followed by c7 and Na7, with an easy win.]

48. f5

48... ♞e7 [Here too the h-pawn can't be taken because of 48... ♞xh4 49. ♖b6 ♞g2 50. ♞b5 followed by Nd6 and c7.]

49. ♖b6 ♕b8 50. ♞b5 ♕c8 The black pieces can't move any longer, so White is finishing the game in a nice manner:

51. ♞a7+ The knight from a7 will very soon come back into the game over the c6 square.

51... ♕d8 52. c7+ ♕d7 53. ♖b7 White wants to play Nc6 next and Black can't do anything about it...

53... d4 54. ♞c6 ♞c8 Black didn't have a choice.

55. ♞b8+ ♕e7 56. ♕xc8

56... d3 and White is just faster...

57. ♕b7 We just saw great technique by Melkumyan and one more proof that knight endgames should often be evaluated like pawn endgames. A passed pawn and a better king's position are often more than enough to secure a victory. **1-0**

Editorial Preface

A lot of big and small events are going on:

Of course the main attention of the chess world is focused on the 2nd Sinquefeld Cup 2014, with 6 superstars playing a double round robin: Carlsen, Aronian, Caruana, Nakamura, Topalov and Vachier-Lagrave.

After the first 2 rounds we can already say that Caruana continues being in top shape, winning with Black against Topalov and with the white pieces against Vachier-Lagrave.

In the current week's issue, we commented the crazy game between Vachier-Lagrave and Magnus Carlsen from round 1.

In Russia a new rapid tournament was organised between the Russian European Champions of the past years and it was won easily by Nepomniachtchi with a score of 7.5/9.

The Riga Technical University Open was won by Melkumyan and Rapport, both on 7.5/9.

The 21st Abu Dhabi Masters also had 2 winners as Kuzubov and Tigran Petrosian shared the first place with 7/9.

The French Championship had a convincing winner in the person of Fressinet, who achieved a great score of 8.5/11. The second place went to Etienne Bacrot with 7.5/11 and Romain Edouard took bronze with 7/11.

The last stage of the Women's Grand Prix is under way without big surprises and it is hard to imagine somebody stopping Hou Yifan from complete domination in the women events.

As usual we wish you a lot of fun with the current issue of our newsletter and a great week.

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Vachier-Lagrave, Maxime(2768)
- Carlsen, Magnus(2877) [C45]

Sinquefield Cup 2014(1.1),
2014.08.27

GM Arkadij Naiditsch
Best rating: 2737

We will see a very high level game with a lot of interesting tactical ideas and great fighting spirit. Already after the opening things are getting very complicated and the position becomes totally unclear. At some moment when it seems a draw should be the outcome of the game, Carlsen tries to complicate things and the position becomes unclear again. As many fighting games, it all ends in a perpetual check.

1.e4 e5 2.♘f3 ♘c6 3.d4 It seems like Maxime had enough of the Berlin and decided to check Carlsen in the Scotch.

3...exd4 4.♘xd4 ♙c5 is not the main stream reply. [4...♘f6 is clearly the move that currently questions the Scotch as an opening, with chances for an advantage.]

5.♘b3 is clearly the best try for White, as all other moves lead to a comfortable position for Black.

5...♙b6 6.♘c3 ♘f6 Now the game is becoming very sharp. [6...♘ge7 is the more solid reply, followed by 0-0 and f5.]

7.♙e2 White's idea is of course mainly to play e5 next, but Bg5-0-0-0 could be another possible option.

7...a5 This is not a novelty either and it was clearly analysed by Carlsen before.

8.e5 The fun is starting now!

8...0-0 Black didn't have a choice.

9.exf6 and here comes the key of the a5 move.

9...a4! Very nice. The white knight has no other moves from b3 than to d2 and of course it doesn't work because of Re8.

10.♘d5! is clearly the most dangerous move for Black. White gives back the piece, but is preparing to get dangerous attacking possibilities on the black king because of the f6 pawn.

10...♙e8 Before taking the piece back on b3, Black includes the Re8 move because it is a very useful move for the future anyway.

11.♙e3 axb3 12.♙g4 Of course White doesn't miss the chance of playing Qg4.

12...g6 Now the question is what to play next?!

13.♙c4! Excellent play by White! Who cares about a pawn in a such a rough position. White is not only preparing to play 0-0

and finally get the king out of the center, but Qf4-Qh4 could also be a dangerous threat now. [White could go very wrong with 13.cxb3? 13...♙a5+ 14.♔d1 ♖e5 and there is no good way to hold the knight on d5. 15.♙c4 b5 Black is already winning.]

13...♗b4! What a fantastic move by Carlsen! [13...bxc2 would lead to a dangerous position for Black. 14.O-O ♙xe3 15.fxe3 Now of course Black has a couple of moves, but the idea of playing Ne7 is always very dangerous. 15...d6 16.♖h4 ♔h8 17.♖h6 ♖g8 18.♗e7 and White seems to be better.]

14.♗xb4 White had to take on b4.

14...d5 15.♖f4 dxc4 White only has one idea left, but a very powerful one, to play Qh6 at a good moment.

16.O-O This move is simply the best. White needs to play for the initiative. [16.♖d1 doesn't work since after 16...bxc2 17.♖xd8 the bishop on e3 is pinned. 17...c1=♖+]]

16...bxc2 17.♗d5 The only move for White, but a strong one! Of course Black can't take the knight because of Qh6.

17...♖e6! An excellent defensive move by Carlsen. While I was watching the game live, it reminded me very much of a game of 2 computers, as all moves of both players were just perfect, which shows how precise and accurate the calculation of the

very best players is.

18.♖xc4 is the best again as Bxb6 was already a threat. [White doesn't have any advantage after 18.♗e7+ 18...♔h8 19.♙xb6 ♖xb6 20.♖ac1 and now the most simple for Black is 20...♙f5 with an equal position.]

18...♙xe3 19.fxe3 Black's position looks very dangerous. Ne7 is a threat and the material is equal, so if Black doesn't have anything direct, things could go very well for White.

19...b5! The only move for Black!

20.♖c5 [20.♗e7+?? of course loses to 20...♖xe7]

20...♙b7 The black bishop is out on b7 now, which gives Black quite some counterplay.

21.♗e7+ Now Black has to pick between 21...Kh8 and 21...Rxe7, which leads to a pretty obvious draw.

21...♔h8 What a fighting spirit by Carlsen who clearly chooses to play for a win. [21...♖xe7 22.fxe7 and now the move which is hard to miss is 22...♖d2 White doesn't have anything better than to force a draw after 23.♖f2 (23.♖g5 is almost losing after 23...♖e8 followed by Rxe7.) 23...♖d1+ 24.♖f1 ♖d2 with a draw.]

22.♖xc2 ♖aa6 Black's idea is sort of to go "around the white knight" with all the pieces but it is of course a very dangerous

strategy with such a bad king on h8.

23. ♖ac1 What can be more logical than to attack c7. [23. ♖ad1 would lead to an unclear position. 23... ♖ad6 and for example after 24.a3 it is very hard to say who is better here, but the position should probably be around equal.]

23... ♖xf6 From now on things are forced. The pawn on f6 needs to be taken.

24. ♖xf6 ♖xf6 25. ♖xc7 What a crazy position which is not that easy to play for a human, but our both actors seem to calculate not much worse than a strong engine and just play a perfect game.

25... ♖d2?! Maybe the first mini mistake of the game. [25... ♖d3! was the move that would give Black some chances to play for a win. 26. ♖c3 (Now it is already very bad for White, because the Queen on d3 is protecting the f5 square. 26. ♖b8+ 26... ♖g7 27. ♖g8+ ♖h6 28. ♖f8+ ♖h5 29. ♖c5+ g5 30. ♖xg5+ ♖h4! First Black needs to provoke the g3 move. 31.g3+ ♖xg5 32. ♖g7+ ♖g6 33. ♖e5+ and here comes the difference to the line in the game: 33...f5! 34. ♖f4+ ♖f6 and Black is winning.) 26... ♖xc3 and because of the terrible position of the white knight on e7, Black is a bit better here.]

26. ♖b8+ Now we end up in a forced line which leads to a draw.

26... ♖g7 27. ♖g8+ ♖h6 28. ♖f8+ ♖h5 29. ♖c5+ All moves are forced.

29...g5 30. ♖xg5+ White has nothing better because of the deadly threat Qxg2.

30... ♖xg5 31. ♖g7+ ♖g6 Black can't do anything about stopping White from the perpetual check either.

32. ♖e5+

32...f5 All moves are correct.

33.h4+ White had many ways to force a draw and this is one of them.

33... ♖h5 34. ♖xf5+ ♖h6 35. ♖f8+ ♖h5 36. ♖f5+ ♖h6 37. ♖f8+ ♖h5 38. ♖f5+ We just saw a really fantastic game with a lot of great tactical motives and a very spectacular finishing part with a perpetual check. An especially high level game. **1/2-1/2**

**(2) Savchenko, Boris(2596)
- Rapport, Richard(2704) [B07]**

Riga Tech Open A 2014(9.1),
2014.08.24

GM Arkadij Naiditsch
Best rating: 2737

Both players, Savchenko and Rapport, are playing very creative chess. In many cases both of the opponents are choosing a creative move instead of a practical one, so we are going to see one of the most craziest game I have ever seen. After a total mess from move 14 until 40, the game finally ends in a perpetual check. A really fun game to watch is ahead of us!

1.e4 d6 2.d4 ♘f6 3.♘c3 e5 Another game with the Philidor by Rapport.

4.♘f3 exd4 This was a popular line, but lately it has been very rarely played on GM level.

5.♘xd4 ♙e7 6.♙f4 is one of the most sharp moved, but also one of the most central lines.

6...O-O 7.♚d2 White wants to castle queenside as quickly as possible and start the attack on the kingside.

7...d5 and here starts the crazy line!

8.♘db5 This is of course all theory, the next moves for both sides are forced.

8...♙b4 Any other move is bad for Black.

9.O-O-O c6! Of course this is all known, but it is still a nice move by Black.

10.♘c7

10...♘xe4 Now White needs to choose between 2 moves.

11.♚d4 I am not sure at all if this is the best square. [11.♚e3!? is at least an interesting option.]

11...♙xc3 12.bxc3 ♚e7 and the craziness is starting! Black can't save the rook on a8, but of course he is getting strong compensation. White's king's position is open and the knight on e4 is a monster piece.

13.♚d3 It is hard to find another defence against Qa3.

13...♙e6 A very nice move. Black is not only developing the pieces, but also preparing to play c5 next.

14.♘xa8 c5 As we can easily see, the position is very sharp and very hard to evaluate.

15.♚e3 [15.♚a4 is not good since after 15...♘xf2 White is losing material.]

15...c4 Of course, chasing the rook away from d3 and getting ready to play Qa3.

16.♚d4 ♚a3+ 17.♙d1 White didn't have anything better already.

17...♘xc3+ 18.♙d2 is also the only move for White. [18.♙e1 is just bad due to 18...♘c6! with a double attack on d4 and a8.]

18...♖b1+ 19.♔d1 Black can already force a draw after 19...Nc3, but the position is looking very promising and of course you don't need to ask Rapport twice if he wants to play for a win...

19...♖c6! The strongest move in the position. Black is using the fact that White cannot exchange the queens and wins some material back.

20.♖c7 [In case of 20.♔xa3 20...♖xa3 21.♖d2 ♖xa8 Black's position should be close to winning.]

20...♖xd4 21.♔xd4 If we take a fresh look at the position now, Black is still some material down, but he continues having a strong attack which gives him clearly more than just compensation.

21...♖c3+ Very logically played, the knight does not belong to b1.

22.♔d2 ♖e4+ 23.♔e2 ♔xa2 Black already has 3 pawn for the piece and the white king is still on the run.

24.♔f3 It seems like White doesn't have anything better.

24...♔a3+?! What a strange decision by Black. [Much more logical is 24...♔xc2 Why not take such an important pawn?! 25.♖xd5 White is trying to at least stay in the game. 25...♖xd5 26.♔xd5 and now Black has the very strong and safe 26...♖e8

Qxf2 is the threat now. 27.♔d4 b5 Black has 3 pawns for the piece, the white pieces are badly placed and the king is on f3, so I think Black's position should be close to winning.]

25.♔e3 ♔e7 and here comes the move that Rapport probably underestimated:

26.♖xc4! Very nice calculation by White and anyhow it is clear that he needed to do something with the bishop on f1.

26...dxc4 also seems to be the best for Black. [26...♔h4 doesn't bring anything since after 27.♔e2 strangely the white king is quite safe.]

27.♖xe4 Wow! What a position. The white king is in the middle of the center, but it seems like there is no mate! [27.♔xe4 was of course losing: 27...♖g4+ 28.♔e3 ♔a3+! 29.♔d4 ♖d8+ with an easily winning position for Black.]

27...g5 An interesting try but this move is too dangerous! There are soooo many interesting moves for Black that it is really hard to choose a continuation, especially during a practical game, where Rapport was definitely thinking that he just must be winning somehow. [After 27...♔f6 28.♔d4! seems to hold things together for White.; Maybe Black could have tried 27...♖g4+ 28.♔d4 ♔b4 29.♖d5 ♔a4 with a very crazy position.]

28. ♘g3 A cool and good reply by Savchenko.

28... ♖f6 [28... f5+? 29. ♔f3 and now it is already White who is winning.]

29. ♘e5?! A very human reply, but not the best. [29. ♖d4 looks very strong. 29... ♖f5+ 30. ♔e3 ♖xc2 Although White gave the pawn on c2, finally the rook is getting into the game. 31. ♖d1 and I think White is already the one that could have big ambitions here.]

29... ♖f5+ [After 29... ♘f5+ 30. ♔d4 ♖d8+ 31. ♔c3 ♖e7 32. ♖a1 White is clearly better because the king on c3 is actually feeling quite safe.]

30. ♔d4 f6 The position remains very sharp, but slowly White is taking over. The white king only needs to reach the c3 square to give White a clear advantage.

31. ♖xe6! Savchenko is playing a great game in a complicated position but actually a move like Nxe6 is very logical, as less black pieces mean smaller mating chances.

31... ♖e8 32. ♘g3? White misses a fantastic win. [32. ♘xf6! was leading to a win. 32... ♖xf6+

33. ♔d5 The king is a strong piece! **33... ♖f5+** **34. ♔d6** Black is out of checks, which means "game over". The white king on d6 holds everything together... What a funny position!]

32... ♖xe6 33. ♖f3 ♖xc2 and we are back to a very complicated position...

34. ♖xb7! In a very complex position and being short on time, Savchenko continues playing very well. White's position looks extremely dangerous again with the king on d4, but Black doesn't have anything more than just a draw...

34... ♖d2+ Black needs to give a check and the move in the game leads to a draw by force. Black doesn't seem to have anything more than that.

35. ♔c5 ♖a5+ White also needs to be very careful with the king moves. One mistake and the game could be over immediately.

36. ♖b5 and now it is White's turn to play for a win... [36. ♔d4 36... ♖d2+ with a draw.]

36... ♖a3+! The right check! Black is forcing White to take the c4 pawn to open the position of the white king even further.

37. ♖xc4 ♖e4+ Finally the useless rook on e6 is entering the game.

38. ♔d5 ♖b4 Once again the best move. Both players are handling the time pressure perfectly, playing a very high level of chess.

39. ♖e8+ ♔g7 40. ♖e7+

40... ♖g6 So the time trouble is over and the question is, does White have anything more than a perpetual check?!

41. ♖e8+ ♔g7 42. ♖d7+ Savchenko doesn't find anything and there is just nothing. It is not possible to play for a win with a totally opened king on d5-even with a piece up.

42... ♖g6 43. ♖e8+ ♔g7 44. ♖e7+ ♔g6 45. ♖e8+ What a game! 1/2-1/2

(3) **Fressinet, Laurent(2708)**
- **Dorfman, Iossif(2571)** [E60]

89th ch-FRA 2014(3.1),
2014.08.19

GM Csaba Balogh
Best rating: 2672

Fressinet dominates the French Championship with very good games. Let's check one of his wins against the experienced Dorfman.

1.d4 ♘f6 2.c4 g6 3.g3 c6 Black chooses the most solid setup against the King's Indian with g3.

4. ♖g2 d5 5. ♖a4!? A rare move with the idea to confuse the development of the black pieces. White would like to take on d5 using the fact that Black cannot recapture with the pawn.

5... ♘fd7! A perfect reaction. Unpinning the king in order to keep the strong central pawn on d5. [5... ♖g7 6.cxd5 ♘xd5 7. ♘f3 is what White was aiming for. He might hope for a longterm space advantage. Black should try to take back with the pawn on d5 if he wants to fight for equality.; 5... ♘bd7 is weaker, because after 6.cxd5 cxd5 the knight is misplaced on d7. It belongs to c6 in this structure.]

6. ♖c2 [Now on 6.cxd5 6... ♘b6 7. ♖b3 cxd5 the knights reach their optimal places, because the Nb8 can develop to c6.]

6...♘b6!? This is the novelty, in my opinion a strong one. It forces White to do something with the c4 pawn. In case of cxd5 cxd5, Black is fine again because he can develop his knight to c6 and also Bf5 will come with tempo. The only question is if White pushes c5, but then Black will be able to undermine the advanced pawns either with e5 or with b6.

7.c5 ♘6d7 8.♘f3 [The most direct move to prevent the e5 break, 8.f4? creates too many weaknesses. Black grabs the initiative with 8...b6 and later the plan of Nf6, Bf5 and occupying the e4 square becomes unpleasant.]

8...e5! This freeing break is known from the Slav defence. Black should not wait until White plays Bf4 and starts to squeeze with the space advantage.

9.♘xe5 [9.dxe5 9...♘xc5 looks promising for Black. He might develop his bishop to f5 or just play Nbd7, Bg7 and 0-0.]

9...♘xe5 10.dxe5 ♘a6 This seems to be an inaccuracy which gives the initiative to White. It was very difficult to evaluate over the board if Na6 or Nd7 should be preferable. The concrete lines show us the reasons. [10...♘d7! Perhaps Dorfman was afraid of 11.b4 This could be a reason why he put his knight to a6. (11.0-0 is probably what Fressinet wanted to play. White would like to open the center quickly with e4, trying to gain some benefits from the king in the center.

11...♘xe5 12.e4 d4! Black must try to keep the position closed to avoid a dangerous attack. At first sight, this looks very suspicious, because 13.f4 ♘g4 14.h3 ♘e3 15.♙xe3 dxe3 16.♚c3 seems to create real problems, but the computer is not afraid and simply plays 16...♖g8! 17.♚xe3 ♚e7 18.b4 a5 Black wins back the material and the game remains unclear with mutual chances.) 11...a5! (11...♘xe5 is wrong in view of 12.♙b2 and on Bg7 f4 wins a piece.) 12.♙b2 axb4 13.e6 ♘f6 14.exf7+ ♚xf7= followed by Bg7, Rf8 and Kg8- a kind of artificial castling- and Black has no problem.]

11.0-0 ♙f5 [11...♘xc5 was more natural and probably also better, although White seems to have the initiative here as well after the subtle 12.♘d2! preparing to break the strong center with e4! Black should have gone for this anyway.]

12.e4! A principled move! White undermines the strong d5 pawn and also opens the center to create some problems for the black king.

12...dxe4 13.♙e3?! This is wrong... Fressinet probably underestimated Black's intention of castling queenside. [Otherwise he would have played 13.♖d1! 13...♚e7 14.♙e3 ♘xc5 15.♘d2! White is threatening with Nc4-d6. Black has no time to finish the development with Bg7, 0-0, because the c5 knight has to be protected. 15...♚xe5 could be met

by 16.♖xe4! ♗xe4 (16...♖xe4 17.♗d4 wins the exchange.) 17.♗xe4 ♔xe4 18.♔c3 wins back the sacrificed material and the king remains in the center. The attack should be crushing.]

13...♔d3! Black would happily trade queens as the endgame could only be better for him, but White does not need to agree...

14.♔c1! Fressinet probably thought that Rd1 was coming next move and the queen might get into serious trouble. That is why he did not play 13.Rd1, however Dorfman comes up with a very strong idea.

14...O-O-O! White was always counting on castling kingside and suddenly the king goes to the other direction. [On 14...♖d8 15.♗g5! is strong.]

15.♖a3 Trying to finish the development and settling the knight to d6. [In comparison to 14...Rd8, now on 15.♗g5? Black has 15...♗xc5! 16.♗xd8 ♖xd8 with more than enough compensation. Black is threatening with e3! His pieces are completely dominating, White is doomed to passivity.; 15.♖c3 15...♗xc5 also looks fine for Black.]

15...♗e7? This is logical as Black connects his rooks, but it is wrong. [After 15...♔d5! Black seems to be better. The point is that after Bxc5 Bxc5 Nxc5, the d3 square should be free for the

knight! Of course, it is very hard to realize these subtle ideas during the game. 16.♖c4 ♗xc5=+]

16.♖c4 ♖xc5 [On 16...♗xc5 White could play 17.♗xc5 ♖xc5 18.b4! and Black cannot jump to d3, which is why he should have removed his queen to d5. White has the advantage now. 18...♖e6 19.♖e1+= and Nd6 next move. Still, this should have been preferable for Black.]

17.♖d6+! ♗xd6 [17...♖xd6 18.exd6 ♔xd6 19.♔c4+= Black is doing fine materially, but White continues attacking and many pawns are hanging (f7, e4, a7).]

18.exd6 ♖e6 19.♖d1 ♔b5 20.h3! A very useful move. White is threatening with g4, trapping the bishop, opens the back rank and also prevents the Bg4-f3 idea of Black to trade the bishops or throw the queen into the attack with Qh5!

20...h5

21.♔c3! Another excellent positional move! The point is to take under control the e5 square and suddenly the black queen gets into trouble. [On the direct 21.♗f1 21...♔e5 is possible.]

21...c5 Black opens an escape route for the queen, but this is too big a weakening in front of the king. [Other moves were not better, for instance 21...♖b8 loses to 22.a4! ♔a6 23.♗f1!

and the queen is trapped.]

22.b4 Sacrificing by feeling! Fressinet opens the b-file for his rooks to lead a successful attack against the b7 pawn. [22.♙f1 22...♚c6 23.b4+- was also good.]

22...♚xb4

23.d7+! A nice intermediate move to bring all the pieces with tempo. The pawn cannot be taken because of the h8 rook.

23...♙b8 24.♚e5+ ♙a8 25.♖ab1 ♚a4 26.♖d6 Improving all the pieces. White wants to play Qd5, which was not so good immediately because of Qc6. The pawn still cannot be taken on d7 because of the h8 rook and otherwise Black cannot organize his defence. [26.g4!? was also winning with the idea of 26...hxg4 27.hxg4 ♙xg4 28.♙xe4 and the b7 pawn is too big a problem to deal with. 28...♚xd1+ 29.♖xd1 ♙xd1 30.♚d5+-]

26...♚xa2 27.♖a1 ♚c4 28.♙f1 ♚b4 29.♖xe6! Black resigned in view of Bxc5 and Rxa7 mate or winning the queen. **1-0**

(4) Wei Yi(2638) - Miroshnichenko, Evgenij(2602) [B01]

Turkish league(5.6),
2014.08.22

GM Csaba Balogh
Best rating: 2672

China's biggest hope is the 15 years old Wei Yi, who indeed has all the chances to become a top GM, but this time he runs into a very nice defeat...

1.e4 d5 The Scandinavian defence. Wei Yi is very strong in the main lines, therefore it was a clever choice by Miroshnichenko to play something less explored.

2.exd5 ♚xd5 3.♘c3 ♚d6 4.d4 ♘f6 5.♘f3 g6 [One of the alternatives is 5...a6 where White's strongest reply is 6.g3 Probably Wei Yi mixed up these lines...]

6.g3 It looks natural to fianchetto the bishop and also to prepare for the other bishop to develop with tempo to f4, but it turns out to be an inaccuracy... [The best is 6.♘b5! followed by c4, building a very strong center. Practice already shows that Black is unable to put enough pressure on it, therefore White claims an edge in the end.]

6...♙g7 7.♙g2

7...♔a6! This is the drawback of the g3-Bg2 plan and the point of avoiding playing a6 or c6 in the 5th move. White cannot castle kingside.

8.♘f4 c6 9.♔d2 This is the ambitious continuation, keeping the queens on the board and castling queenside, but objectively I believe that it is a wrong idea because Black's attack comes too fast. [It is more solid to play 9.♔e2 9...♔xe2+ 10.♘xe2 but of course the probability for a draw has increased a lot.]

9...O-O 10.O-O-O b5! Black does not need to waste more time and he immediately launches his attack on the queenside. Even the queen is well placed now on a6.

11.a3? Another wrong decision to slow down the attack. It works with the opposite effect. [White should have played 11.♔b1 11...b4 12.♘e2 although after 12...♘f5 followed by Nbd7 and Nd5 or Ne4 seems to be completely fine for Black.]

11...b4! A perfect sacrifice, which was underestimated by the young Chinese. At first sight it does not look that dangerous indeed, but after some extremely strong energetic moves, all black pieces come into the attack.

12.axb4 ♔a1+ 13.♘b1 a5! The most natural attacking move again! Black would like to open the a- and b-files in order

to quickly attack the weakest point in White's camp, the b2 pawn! However, Black had to count with the next move beforehand:

14.b5 The critical test of the previous move. This pawn advance seems to paralyze the black pieces and White is threatening with Ne5. Accepting the pawn with cxb5 seems to drop a piece after Ne1 or g1, because White attacks the a8 rook and the b8 knight is also hanging. However, Black had something in mind...

14...cxb5! 15.♘e1 The most natural move again with the knight to open the diagonal. Of course on e5 it would have been more active, but it closes the f4 bishop and the knight is not under attack anymore on b8. On e1, it could become an important defender of the king.

15...♔a6! 16.♘xb8 ♘e6! This was the point which Black had to foresee before playing 13...a5, or maybe even before 11...b4. Black creates the double threat of Rxb8 and Ba2 and White has no adequate defence against both of them, therefore Black wins back the piece and his attack continues to roll.

17.♘e5 ♘a2 18.♔c3 Of course it is not over yet. In case of Qxb1 Kd2, the queen is trapped. Black finds a strong intermediate move before capturing the knight to send away the queen from the protection of the b2 pawn.

18...b4! 19.♔c7 [19.♔d3 also loses after 19...♖e6 20.♔d2 (20.c3 20...bxc3--+ Rc8 next, White cannot hold such an enormous attack.) 20...♖xb2! (But not 20...♙xb1? 21.♘f3 and White wins.) 21.♘f3 ♖c8--+ with a crushing attack.]

19...♖xb1+ 20.♔d2 ♖xb2 21.♘d3 ♖a3 22.♖a1 White still had realistic hopes to survive, as the black pieces are temporarily discoordinated. He intends to hide his king on the kingside with Ke2, Rhe1 and Kf1. However the next move destroys all the hopes.

22...♘e8!! A brilliant retreat! The point is to send away the queen from the c-file in order to continue the attack with Qc3 and Bc4! The queen has no good square to leave.

23.♖c5 Other moves are also losing: [23.♖b7 23...♖c3+ 24.♔e3 ♙c4--+; 23.♖xe7 23...♖c3+ 24.♔e3 Black has several wins, one of them is 24...♘d6 25.♙xd6 ♖xd4+ 26.♔e2 ♖xd6 27.♖xa2 ♖e6--+; 23.♖c8 23...♖e6--+ followed by Nd6 next with tempo and Rc8.]

23...♘d6! This great regrouping of the knight allows Black to occupy the c-file with the rook, which decides the outcome of the game.

24.♙xg7 ♖c8! Tempo!

25.♖g5 [25.♖e5 25...♘c4--+]

25...♙xg7 The easiest and most human. Black has an extra pawn and leads a crushing attack. It is over now... [However the machine shows that 25...♖xc2+ 26.♔xc2 ♘c4--+ was even stronger, but there was no need for such a sacrifice.]

26.♖hc1 ♖c3+ 27.♔e2 ♙c4 28.♔f1 b3! Black wins further material.

29.♔g1 ♙xd3 30.cxb3 Equal to resignation, as White is a piece down for nothing. [30.cxd3 does not change anything: 30...b2! 31.♖xc3 bxa1=♖+--]

30...♖xd4 31.♖xe7 ♖xc1+ A very nice win by Miroshnichenko. The game does not show the real strength of Wei Yi... **0-1**

Turkish league,
2014.08.19

GM Csaba Balogh
Best rating: 2672

White is a pawn up, but as we know in rook endgames it is often not enough to win the game, especially when the pawns are on one side. White's chances are slightly better than usual because the black pawns are disconnected. Black's main triumph is the excellent position of his rook to cut the king along the 2nd rank and he has a positional threat to get rid of one pair of pawns with e5, when the arising 2 vs 1 endgame would already be a dead draw. To prevent this, Ding Liren finds a subtle plan.

41.♖c5! White prevents e5 and intends to bring his king to d1 followed by Rc2 to escape from the back rank. Black cannot avoid this, he can only wait at this stage.

41...♖e2 42.♖e5 ♕e7 43.♕f1 ♖a2 44.♕e1 ♕f7 45.♕d1 ♕e7 46.♖c5 ♕f7 47.♖c7+ ♕f8 48.♖c2 White could not make progress without using his king.

48...♖a5! After the rook has left the 5th rank to free the king, Black could refresh his simplification idea and support the e5 push.

49.♖c6 ♕f7 50.♕c2 e5! The most natural, but Black had to foresee a very important defensive plan...

51.♖f6+! ♕g7 52.f5! White has this counterblow in mind to continue playing for the win. Allowing exf4 exf4 made no sense, the winning chance would have gone down to zero then.

52...gxf5 53.♖xf5 ♕g6

54.e4! This is the point of the f5 break! The rook stands perfectly on f5, it protects the g5 pawn and attacks the e5 weakness. Suddenly the other rook is placed poorly on a5, White needs two moves (Kc3-b4) and the e5 pawn is lost.

Black cannot parry this idea, but he can still hold the draw with a nice motif.

54...♖c5+! Asking the king to decide which direction to go.

55.♔b3 In case of Kd3, the rook is safe on c5, Black would have simply waited with Kh5 and holds the draw. Here comes the question about what Black should do against the Kb4 threat.

55...♖c1! 56.♖xe5 ♖c8! Very clever defence! The point is the same as at the beginning, that White cannot win without his king. Black cuts it along the c-file and it cannot support his own pawns. The only way to make progress is again the use of the rook, but as soon as White plays Rc5, Black attacks the e4 pawn and one of the pawns is lost...

57.♔b4 ♖c1 Black only waits along the c-file.

58.♔b5 [58.♖c5 58...♖e1= White is forced to return to e5 with the rook, but then Black also goes back to c1.]

58...♖c8 59.♔b6 ♖c4 60.♔b7 ♖c1 61.♖a5 ♖c4 62.♖e5 ♖c1
Draw agreed! An instructive endgame. **1/2-1/2**

**(16) Chabanon, Jean-Luc(2485)
- Bacrot, Etienne(2720)**

GM Arkadij Naiditsch
Best rating: 2737

White tried to make a draw from the opening and played the exchange variation in the KID. All went fine, but from around move 20 onward White started to play everything else than well, so finally after the time trouble Black already had quite some advantage. White's pawn structure is bad and the black king is clearly more active than the white one, but of course as we know, a lot of rook endgames are drawn with good defensive play.

41.♖f6+? There was no reason to panic, Black should have calculated the line where he keeps the c3 pawn more carefully. [41.♔d3 Simply protecting the c3 pawn. 41...♖d5+ 42.♔e2 ♖e5+ 43.♔d2 Now Black can't improve the position of the rook anymore, but there is still a chance to go for the h2 pawn now. 43...♔f3 44.♖f6+ ♔g2 45.♖g6 ♖e4 This position looks dangerous for White, but actually it is just a draw. 46.♖h6 Cool and safe. Black doesn't have enough resources to improve the position, so it must be a draw.]

41...♔g5 Now Black is going to be a pawn up.

42.♖b6 ♜xc3 43.♖xb5+ ♔h4 The pawn on a3 is falling, can White still save the draw?!

44.♔f2 White has to stop Black from playing Kh3.

44...♜xa3 45.♜a5 Of course the white rook belongs to a5.

45...♜f3+ [Black can't win the game after 45...♜a2+ 46.♔g1 g3 47.hxg3+ ♔xg3 48.♔f1 with an easy draw.]

46.♔g2 a3 Black wants to play Rb3-Rb2 check and a2, White needs to act.

47.♜a8 is probably White's only chance.

47...♜c3 48.♜h8+ White is playing the only moves.

48...♔g5

49.♜a8 Black's idea is clear, to run with the king to b2 and to play a2, but White will win the g4 pawn in the meantime. The position remains quite tricky.

49...♜d3 This move also leads to a winning position for Black, but Black could already have gone for a direct kill... [49...♔f5 is the most logical move. 50.♜a5+ The most simple now. (50.♜a4 was losing immediately: 50...♜c2+ 51.♔g3

a2 52.♜a5+ ♔e4 and White is never in time to win the g4 pawn without losing the h2 pawn.) 50...♔e6 (50...♔e4 only leads to a draw: 51.♜a4+ ♔d3 52.♔g3! ♔c2+ 53.♔xg4 ♔b3 54.♜xa3+ ♔xa3 55.h4 ♔b4 56.h5 and Black is not in time to come back with his king, so the position is a draw.) 51.♔f2 ♔d6 52.♔e2 ♔c6 53.♔d2 ♜f3 54.♜a4 ♔b5 with an easily winning position for Black.; 49...♜c2+ wouldn't lead to anything 50.♔g3 a2 because of 51.♜a5+ ♔f6 52.♔xg4 ♜xh2 53.♔f4 and the position is a draw because the white king is going to b3.]

50.♜a7 [50.♜a5+ was losing to 50...♔h4 followed by Rd2 and a2.]

50...♔f4 and Black decides that it is time to run with his king.

51.♜a4+ ♔f5 52.♜a5+ ♔e4 53.♜a4+ ♔d5 Black's idea is to keep the white king on g2, cut off along the 3rd rank, which will make it easier for Black to stop the white h-pawn.

54.♔f2 The position is lost, but White should have tried [54.♜xg4 as now Black needed to find a not so simple win: 54...♜d4! (54...♔c5 was also winning. 55.♜a4 ♔b5 56.♜a8 ♔b4 57.h4 and again Black would need to find

57...Rd4! a very hard move to make. (57...Kb3 58.h5 and the position is already a draw!) 58.h5 Rh4 and Black is winning.) 55.Rg8 Kc4 56.Ra8 Kb3 57.Kg3 a2 and Black is winning easily.]

54...Kc5 55.Ke2 Kb5 Now everything is very simple.

56.Ra8 Rh3 57.Kd1

57...Kb4 Rxh2 is the threat now.

58.Rg8 a2 All in all nice technique by Bacrot and of course it was a terrible mistake by White to give up the c3 pawn. **0-1**

Clash of the Titans

(17) Rubinstein, Akiba - Johner, Paul F [E38]

Karlsbad(15), 1929.08.18

[Jan-Krzysztof Duda / Kamil Miton]

1.d4 ♘f6 **2.c4** e6 **3.♗c3** ♘b4 **4.♚c2** c5 The most popular moves are 4...0-0 or 4...d5.

5.dxc5 ♗a6 **6.a3** ♘xc3+ **7.♚xc3** ♗xc5 **8.f3** Nowadays theory considers [8.b4 8...♗ce4 9.♚b2 as a the strongest. White has good chances to get an advantage. 9...d5 10.c5]

8...d5 Black is going to open the position because he has the better development. The move [8...a5 seems to be too slow. 9.e4 d6 10.b4! axb4 11.axb4 ♖xa1 12.♚xa1 ♗b3? and White has a check on a4: 13.♚a4+--]

9.cxd5 ♚xd5?! Not accurate. After this move White will develop his pieces with tempo. Black should play [9...b6 10.b4 ♗a4 11.♚b3 b5 12.e4 a6 and White should give back the pawn in the right moment because development is the most important thing. 13.♘e3 (13.♘d3 13...exd5 14.e5 ♚e7 15.♖a2 O-O 16.♖e2∞) 13...exd5 14.e5 ♗g8 15.♗e2 ♗e7 16.♗d4 O-O 17.♘d3+=]

10.e4 ♚h5 **11.♘f4** [11.♗h3 11...♗cd7 12.♗f4 ♚c5 13.♚xc5 ♗xc5 14.♘e3 thanks to the pair of bishops and his strong center, White has a promising endgame.]

11...♗a4 [11...O-O 12.♘d6 (12.g4 12...♗xg4 13.fxg4 ♚xg4 14.♚g3 e5↔) 12...♗fxe4 13.fxe4 ♗xe4 14.♚e5 ♚xe5 15.♘xe5± and Black doesn't have enough for the piece.]

12.♚b4 ♘d7

13.b3 ♗b6 [13...♗c5 Of course the knight is placed more actively here, but to play this move Black had to calculate a slightly complex and forced variation: 14.g4 ♚h4+ 15.♘g3 ♚g5↔With counterplay. 16.f4? ♚g6 17.♚xc5 (17.f5 17...♚xg4--+) 17...♚xe4+ 18.♘e2 ♖c8! 19.♚f2 ♖c2 20.♚f3 ♖xe2+!]

14.♘d3 ♘c6 **15.♗e2** We should note that the structure f3-e4-b3 limits the black pieces.

15...♗fd7 **16.♗d4** [16.♖c1 with the idea to prevent Qc5.]

16...♚h4+ **17.♘g3** ♚f6 **18.♖c1** [18.O-O 18...a5 19.♚c3 (19.♚d6 19...♗c8!) 19...♖c8 20.♗e2 ♚xc3 21.♗xc3 ♗c5 22.♘c2+= The question is whether 22...a4 works now with the idea to get useful squares for the black knights.]

18...a5 **19.♚c3** ♖c8 **20.♗xc6** ♖xc6 **21.♚xf6** gxf6 [21...♖xc1+ 22.♗d2 ♖c2+ is an important move which doesn't allow White

to get control over the d-file. 23.♔xc2 gxf6 24.♟b5 ♔e7 25.♖d1+= with a clear advantage for White.]

22.♖xc6 bxc6 23.♟d6 I suppose that the idea of this move is not to allow Ke7. [23.♔d2 23...♘c5 24.♟f2 ♘bd7 25.♟c4 ♔e7 26.♔c3+= Two bishops are much stronger than knights. 26...♖g8 with the idea to provoke moves by pawns which can weaken the white position a bit.]

23...♘e5

24.♟xe5? A big surprise! Sometimes even the best strategical players made unexpected weak moves. I have no idea why Rubinstein got rid of his strong bishop.

24...fxe5 25.♔d2 ♔d7 26.♖d1 ♔c7 Now the position is equal.

27.♔c3 ♖g8 [27...♖d8 28.♟e2 ♖xd1 29.♟xd1 c5! A very important move. Black doesn't let White create a distant passed pawn, the knight controls the c4 square and White is not able to improve his position. 30.g3 f6 31.f4 exf4 32.gxf4 h6=]

28.♟f1

28...♖d8? Not accurate. [28...c5!= Once again Black should play this important move.]

29.♖xd8 ♔xd8 30.b4! Now White gets a promising endgame.

30...axb4+ It was hard to take this decision, as Black also had alternatives: [30...a4

31.f4!! JK.Duda. - Otherwise Black plays f6 and White will not be able to improve his position, for example: (31.g3 31...f6 32.f4 exf4 33.gxf4 e5!=; 31.b5?! 31...c5) 31...exf4 (31...f6? 32.fxe5 fxe5 33.g4+- with an easy win for White.) 32.♔d4 f6 (32...♘d7 33.e5!1) 33.e5 f5 (33...fxe5+ 34.♔xe5 f3 35.gxf3 ♔e7 36.♟d3 h6 37.f4 White keeps the initiative, for example: 37...♘d7+ 38.♔e4 ♔d6 39.f5 e5 (39...exf5+ 40.♔xf5 c5 41.bxc5+ ♘xc5 42.♟b5+=) 40.♟c2 ♘b6 41.f6 ♔e6 42.f7 ♔xf7 43.♔xe5 ♘c4+ (43...♔e7

44.♔f5 ♕f7 45.♙e4±) 44.♖d4 ♜xa3 45.♙xa4 ♕e6 46.♖c5!
(46.♙xc6? 46...♜c2+ with a draw after Nxb4 next.)) 34.♙c4!
♕e7 (34...♜d5

35.♙xd5!! Miton - Unexpectedly it looks like the pawn
endgame is losing for Black! 35...exd5 (35...cxd5 36.♖c5! This
is the point! White is winning thanks to maneuver Kb5-Kxa4.)
36.e6! JK.Duda - The most accurate. (36.♖c5 36...♖d7 37.b5
cxb5 38.♖xb5 (38.♖xd5? 38...b4) 38...♕e6 39.♖xa4 ♕xe5
40.♖b3 ♕e4↑and the black d- and f-pawns are faster than
the a-pawn.) 36...♕e7 37.♕e5 f3 38.gxf3 f4 39.h4 h5 40.♖f5!+-
and Black is in zugzwang.) 35.b5 (35.♖c5 35...♜d7+ 36.♖xc6
♜xe5+ 37.♖c5 ♜xc4 38.♖xc4 e5=) 35...cxb5 36.♙xb5 ♜d5
(36...♖d8 37.♖c5 ♖c7 38.♙e8+- (38.♙c6?! 38...♜c4±))
37.♙xa4 ♜e3

38.g3! JK.Duda (38.♙c6 38...♜c2+ 39.♖c3 ♜xa3 40.♖b3
♜b1 and White can't catch the knight.) 38...♜d5 39.♙c6 f3
(39...fxg3 40.♙xd5 exd5 41.hxg3+-) 40.♙xd5! Miton 40...exd5
41.♖e3+- The distant passed pawn is decisive.]

31.♖xb4 ♖c7 32.a4 ♜d7 33.a5 h6 34.♙d3 ♖b7 35.♙c2
♜b8 36.♙d3 ♜d7 It looks like White is not able to improve
the position but Rubinstein finds a fantastic winning plan...
Let's see:

37.g4 ♖c7 38.h4 ♜f8

39.♙f1 White is not in a hurry and prepares everything very
accurately. Probably Rubinstein could use his idea even in
this position but Black had some defensive tricks- let's check
some example variations: [39.h5! 39...♜h7 40.♖c5 ♜f8 41.g5!
hxg5 42.h6 ♜d7+ 43.♖b4 ♜f6 (43...♜f8 44.a6 ♖b6 45.a7 ♖xa7
46.♖c5 ♖b7 47.♖d6 ♜g6 48.♖d7+-) 44.a6 ♖b6 45.a7! ♖xa7
46.♖c5 ♖b7 47.♖d6 ♖c8

48.♔xe5 (48.♔e7 is less accurate because of 48...♖g8+ 49.♔xf7 ♜xh6+ 50.♔g7 g4! 51.♔xh6 g3 52.♙f1 c5 53.♔g5 c4 54.♔g4 c3--+) 48...♜h7 49.♔d6 ♔d8 50.e5+-]

39...♜d7 40.♙h3 ♜f8

41.h5!! White is creating another distant passed pawn as g5 is threat. To avoid this Black needs to play

41...f6 but now the e6 pawn becomes weak and thanks to this White wins the game! [41...♜d7 42.g5 hxg5 43.h6 ♜f8 44.♙g4+- with the idea Bh5. We will now see why Rubinstein first transferred the bishop to h3.]

42.♙f1 ♜d7 43.♙c4 ♜f8 44.♙b3 ♜h7 45.♔c5 [45.♙xe6 45...♜g5]

45...♜f8 46.♙a2 ♜d7+ 47.♔b4 ♜f8 48.a6 ♔b6

49.a7! A typical idea. White sacrifices the pawn to open the way for the king which will grab all the pawns on the kingside.

49...♔xa7 50.♔c5 ♔b7 [50...♜h7 51.♔xc6 ♜g5 52.♔d7 ♜xf3 53.♙xe6+-]

51.♔d6+- ♔b6 52.♔e7 ♜h7 53.♙xe6 ♔c7 54.♙c4 ♜g5 55.♔xf6 ♔d6 56.♔g6 ♔e7 1-0

Editorial Preface

This week's main topic can only be Caruana, Caruana, Caruana and once again Caruana.

In the currently running Sinquefield Super Tournament, which is the strongest chess tournament in the history of chess by average rating, Caruana started with 7 wins in a row against the best chess players in the world, including Magnus Carlsen himself. It is just amazing! It is only in the 8th round that Magnus Carlsen got very lucky to escape to a draw with Black, having a close to lost position.

How can we explain such a miraculous performance by the World Nr2 Caruana Fabiano, who already has a live rating of 2836!?

There are simply no words and it seems that in case Caruana manages to keep this level of play, now I would not bet on Carlsen to stay World Champion for many more years.

In the last 2 rounds Caruana is facing Nakamura and Aronian and both are having a bad tournament, so maybe we will see a record score in history of chess of 9.5/10 points in an absolute top event. This would just be amazing!

It is hard to speak about the other players when after 8 rounds one player has a 3-point lead over everyone else. But all in all Carlsen is playing solidly, Topalov is doing pretty well too, for Vachier-Lagrave the tournament could have been much worse because he saved a few very bad positions and for Aronian and Nakamura the event is just a disaster.

Personally I am very excited to see the last 2 rounds and whether Caruana manages to achieve this all-time record and all-time highest performance for a super tournament.

Meanwhile Vallejo Pons has won the Spanish Championship with the great score of 7.5/9.

In the Women's FIDE Grand Prix in Sharjah the domination of the Chinese girls is obvious. Ju Wenjun is leading with great 8/10, followed by Hou Yifan with 7.5/10.

The Spanish Team Championship is under way with top players like Giri, Ivanchuk, Bacrot...

Already tomorrow a round robin tournament called "Grenke Chess Classics 2014" with 8 top German players is going to start in Baden-Baden, where one of your commentators is going to participate.

We wish you a nice weekend and hopefully you will be able to follow the excitement of the 2 final rounds of the Sinquefield Cup!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

2nd Sinquefield Cup 2014(5.3),
2014.08.31

GM Csaba Balogh
Best rating: 2672

Two weeks ago I commented the Topalov-Wojtaszek game from the Olympiad, a huge theoretical fight between two great Sicilian Najdorf experts. Here comes another one and Topalov once again shows extreme understanding of this very difficult and complex line.

1.e4 c5 2.♘f3 d6 3.d4 cxd4 4.♗xd4 ♘f6 5.♗c3 a6 The initial position of the Najdorf defence.

6.f3 e5 7.♗b3 ♘e6 8.♘e3 Black has a wide choice here.

8...♘e7 One of the main moves. [In the mentioned game, Wojtaszek went for 8...♗bd7 9.g4 b5]

9.♔d2 O-O 10.O-O-O

10...a5 A very sharp line. Black goes for a direct attack with a5-a4-a3, but it also has the drawback that it creates a big

hole on b5, which can be vulnerable if White manages to avoid the direct threats. [10...♘bd7 11.g4 b5 is the most common variation, where White has recently employed the subtle 12.♙g1! delaying the g5 push for a move because of some concrete reasons.]

11.a4! White has tried various setups here, but this seems to be the best. White consolidates the b5 square and keeps his knight on b3 which should have gone to an unfortunate square if Black pushes a4. The drawback of this move is the b4 square. Black immediately drives his knight there, where it might turn out to be dangerous attacking piece and it also supports the d5 break.

11...♘a6 12.g4 Topalov knows what he does, as he also plays this line with Black. He wants to send away the f6 knight to avoid the d5 break and also launches an attack against the opponent's king, which is principled in case of opposite side castling. [The Caruana-Topalov game last year continued with 12.♙b5 12...♘c7 13.♙b6 ♙c8 14.♙xc7 ♙xc7 15.g4 ♙fd8 16.g5 ♘h5 with an interesting game that Black went on to win later. Compared to the present game, White is missing his dark squared bishop a lot here.]

12...♘b4 13.♙b1 A standard prophylactic move to avoid tactical ideas.

13...♙c7 [13...d5 does not work immediately because of 14.g5 d4 In many lines this idea turns the initiative to Black, but here 15.gxf6 ♙xf6 16.♘xd4! exd4 17.♙xd4± wins a pawn.]

14.g5 ♘h5 15.♙b5 ♙ac8 Both players are developing their pieces to the ideal squares.

16.♙hg1 A standard move in this line, which might look a bit mysterious at first sight. White has successfully prevented the d5 break and the queenside is fixed, so he does not need to worry about any attacking plans. White has different ways to improve his position, one is the regrouping of the knight with Nc1-d3, trading the strong one on b4 and working out the d5 square for the other knight. The aim would be to jump with the knight to d5 and being able to recapture with a piece, keeping the structure and the pawn on e4. Black does not want to just sit and usually looks for counterplay with f5. The Rhg1 move is a perfect preparation for this.

16...f5 17.gxf6 Consequent! White opens the g-file for his rook. [However, in this particular situation it seems to be even stronger to play 17.♘d5! The point is that after Black has occupied the f5 square he cannot react with Nxd5 exd5 and Bf5, attacking the c2 pawn, while retreating the bishop drops the a5 pawn. 17...♙xd5 18.exd5 ♙xc2+ 19.♙xc2 ♙xc2 20.♘xa5± is also perfect for White. The b7 pawn is hanging and Bd2 is threatening to win some material.]

17...♙xf6 18.♙g2 ♘h5 [18...♙f7 19.♙g5 also looks fine for White, with the idea to play f4 and in case of exf4 Nd4 could be very unpleasant!]

19. ♖c1! A perfect positional plan! As we already discussed, White wants to trade the strong b4 knight and then occupy the d5 square and take back with a piece. This entire strategic plan is about working out the light squares and to obtain an opposite colored bishop middlegame, where the white one will be more active.

19... ♜f6 20. ♖d3 ♜xd3 Other moves are not better: [After some useful move like 20... ♔h8 White continues his plan with 21. ♖xb4 axb4 22. ♖d5 ♜xd5 23. ♖xd5 The b4 pawn and the opened a-file do not give Black any extra attacking ideas. The b5 bishop is controlling everything.; 20... ♖c6 is interesting to keep the knight and try to jump to d4, but White keeps the advantage with 21. f4! exf4 22. ♖xf4 ♖xf4 23. ♜xf4 Black has no time to take on c3 because the d6 pawn is hanging with tempo and after 23... ♖e5 24. ♖d5 ♜xd5 25. ♖xd5 White is perfectly again with the two bishops in an open position.]

21. ♖xd3 ♖f4 Black's defensive strategy involves to getting a strong dark squared bishop on the long diagonal, but as we will see that bishop will only look strong.

22. ♜xf4 exf4 23. ♖d5 ♜xd5 24. ♖xd5 ♜e5 Both sides have achieved their aims, but who was right?! We have reached an opposite colored bishop middlegame and the principle says, the player who has the more active bishop is better...

25. c3! This is the key! White completely neutralizes the e5 bishop with this move, while he is going to transfer his own bishop to the a2-g8 diagonal. The drawback of the a5 move can be perfectly seen now. White can maneuver with his pieces as he wishes, creating more and more weaknesses in Black's camp.

25... ♖f6 Black tries to trade a pair of rooks with Rg6, which would ease his defense, but Topalov rightly avoids it.

26. ♜f2 b6 Black prevents the potential threat of Qa7, which could cause the end of the a5 pawn after the retreat of the b5 bishop.

27. ♜a6 ♖b8

28. ♜d3! White frees the b5 square in order to pin all the black pieces to the b6 pawn with Rb5 and then he wants to transfer his bishop to c2-b3!

28...♔h8 29.♖b5 ♜f7 It is hard to suggest any plan for Black. Vachier decides to trade the annoying rook on b5 by maneuvering his own rook to c5. In general this should be a good idea to get rid of some pieces and ease the pressure. Meanwhile, Topalov has time to improve his position.

30.h4 Another very useful move. White is squeezing on the kingside with h4 to create potential tactical ideas in the future.

30...♞a7

31.♞c2! Suddenly White activates his queen along the b3-e6 diagonal. It is amazing how effectively White can use the light squares, while Black is completely useless on the dark ones.

31...♜c7 32.♞b3 ♜c5 33.♞e6 ♜xb5 34.♙xb5 A pair of rooks is traded. At least the problems are temporarily solved around the b6 pawn, but suddenly another thing might give reasons for Black to worry about. The white pieces are still more active, he is threatening with Rg5-f5-f7 and if Black sticks to his exchanging policy, even the opposite colored bishop endgame could be easily lost for him, because the white king simply marches to c6 on the light squares and Black cannot protect his queenside pawns.

34...♜f8 I assume Black played this move with the idea to trade queens with Qf7, but then he changed his mind... [Black cannot hope for any counterplay with 34...♞c7 35.♜g5 ♞c5 White simply continues his plan: 36.♜f5 and there is only one check on g1...]

35.h5 [35.♞c4 was also possible to keep the queens on the board. 35...♞f7 36.♞c6]

35...♞c7 [It would have been more consequent and the only practical chance to play 35...♞f7 36.♞xf7 ♜xf7 although this endgame is going to be a long torture, which I don't wish to anyone... 37.♙c4!? (37.♙a2 37...♜c7 38.♙b3 ♙g8 39.♙c4+ ♙f8 is also bad, but Black might continue suffering.)]

36.♙a2 Topalov prepares for the endgame and improves his king by driving it to b3. Black cannot create any threats against it even there.

36...♞d8 37.♞g4 ♞c7 38.♙b3 ♜c8 Black is hoping for some tricks with Bxc3, but it will never work... [38...♞f7+ was more resistant, although the torture starts again with 39.♙c4 ♞e7 40.♜d1 followed by Rd5-b5. Sometimes Qg1 afterwards, or h6 g6 and Rxe5 could be decisive. Black's chances to survive are very small...]

39.♞e6 ♞c5 [39...♙xc3 loses to 40.♜c1!+-]

40.♖g5! Excellent play by Topalov! White switches his rook to f5-f7 again. Black is simply unable to control all the ideas around the light squares.

40...♖b8 41.♖f5 [Black was so impressed that he resigned! It might look a bit premature, but it is justified as the following lines show. First of all, White is threatening with Be8 and the mate is unavoidable on f8! 41.♖f5 41...♖c8 is the most tenacious, but the endgame is easily winning for White: (41...h6 42.♗e8!+-; 41...♖c7 42.♗e8! ♗f6 Here the nicest win is: 43.♖xf6! gxf6 44.h6! Black cannot avoid getting mated in a few moves. 44...♖d8 (44...♖b7 45.♖xf6+ ♔g8 46.♗b5+-) 45.♖f7! ♖xe8 46.♖xf6+ ♔g8 47.♖g7#) 42.♖xc8+ ♖xc8 43.♖f7 Threatening Rb7 and after 43...♖b8 44.♗c6 comes Kc4-b5. Despite the material equality and the opposite colored bishops, Black can resign. A masterpiece by Topalov!] **1-0**

(2) Tomashevsky, Evgeny(2701) - Nepomniachtchi, Ian(2714) [A04]

5th Yaroslav the Wise Rapid(5.3),
2014.08.26

GM Csaba Balogh
Best rating: 2672

Nepomniachtchi was the convincing winner of this rapid tournament, but in his game against Tomashevsky, he ran into a very nice defeat.

1.♘f3 Tomashevsky wants to avoid the Gruenfeld defence and he starts with Nf3, c4 to keep more options for an Anti-Gruenfeld line.

1...c5 2.c4 ♘f6 3.g3 d5 4.cxd5 ♘xd5 5.♗g2 ♘c6 6.♘c3 ♘c7 An old line, which comes back to fashion again. Black would like to build a strong center with e5, which he could do successfully in case of some harmless moves by White. Theory is developing quickly even in such sidelines and Tomashevsky plays a subtle continuation.

7.a3!? With the idea to explode the strong c5 pawn with b4 to gain more control over the center and the queenside.

7...♖b8 Nepomniachtchi has already tried this move in some games. This motif can be seen in different lines and the point is to meet the b4 move with cxb4 axb4 and b5, blockading the queenside and Black leaves from the h1-a8 diagonal with his rook. [A new direction was successfully played by Karjakin twice nowadays: 7...g6!? This is slightly unusual here, because Black usually develops his pieces with e5 and Be7. 8.h4 h6 To meet h5 with g5. 9.d3 ♗g7; The point of the 7.a3 move becomes clear in case of Black's standard reaction.

Now on 7...e5

8.b4! cxb4 9.axb4 ♗xb4 10.♖xe5! this tactical idea wins back the pawn and the central e5 pawn has a much bigger value than the one on the queenside, therefore White is clearly better. 10...♗xe5 11.♔a4+ ♖c6 12.♗xc6+ bxc6 13.♔xb4± and Ba3 next, keeping the king in the center.]

8.b4! White can execute his undermining plan on the queenside without losing a pawn.

8...cxb4 9.axb4 b5 [9...♗xb4 could be met by 10.♔a4+ ♖c6 11.♗e5 is again perfect for White.]

10.♗b2 This is the novelty over Nepomniachtchi's previous game, which continued with 10.0-0. This one followed by the moves that we will see in the game was definitely a prepared plan.

10...e5 A consequent reaction! Black occupies the center and attacks the b4 pawn.

11.♔c1!! This extremely deep move was the idea of hurrying to develop the bishop to b2. White indirectly attacks the c6 knight, as he has created the threat of Nxb5. When Black prevents this idea somehow, the Ne4-c5 plan becomes very unpleasant. Qc2 would have served the same ideas, but that would have moved into the Nxb4 tempo.

11...♖b6 Black protects the knight and is threatening again with Bxb4. [11...♗xb4 loses to 12.♗a2!± as the black pieces lose their coordination.; 11...♗b7 is similar to the game. 12.♗e4! f6 (12...♗xb4 13.♗xe5 ♔c8 14.♔b1±) 13.♗c5 ♗xc5 14.♔xc5± White achieved what he wanted.]

12.♗e4! White would happily trade the e5 pawn for the b5. Black must waste another important tempo on protecting it and his king remains in the center.

12...f6 13.0-0 ♗xb4

14.d4! Principled and strong! White opens the central lines in front of the king to make use of the discoordination of the black pieces. Black is already in deep trouble.

14...f5 Black tries to lock the center with e4 when the knight goes away, however Tomashevsky had something different in mind. [14...exd4 does not solve the problems because of 15.♘xd4! ♘xd4 16.♙xd4 ♙xd4 17.♚xc7 Black collapses. 17...♚d7 (17...O-O 18.♖xa7 f5 19.e3+- wins the rook on b6.) 18.♖fc1 ♙xc7 19.♖xc7+- The rooks on the 7th rank decide the outcome of the game.; 14...♙f5 does not help either since after 15.♘h4! ♙d7 (15...♙xe4 16.♙xe4 ♘xd4 17.♙xd4 exd4 18.♖xa7+-) 16.♖d1+- Black has no adequate defence against the opening of the game.]

15.♘xe5! An excellently calculated piece sacrifice, which gives White a decisive advantage. If one takes a look at the position, it can easily be realized that it is calling for a tactical shot, but that must be well calculated.

15...♘xe5 16.dxe5 fxe4 17.♖d1! As simple as that! Black has problems with covering his pieces on the c-file. Both white rooks are joining the game with great power.

17...♚e7 [17...♘d5 also loses after 18.♙xe4 ♙e6 19.♖xa7 O-O 20.♙xd5 ♙xd5 21.e6! There are too many pins and threats, Black cannot defend... 21...♙e7

White has different ways to win, but the most spectacular is definitely 22.♙g5!! ♙xg5 23.♖xg7+ White wins back all the sacrificed material one by one... 23...♙h8 24.♖xg5+ ♖f6 25.♖gx5 ♙e7 26.♖d8+ ♙g7 27.♖1d7 ♖xe6 28.♖xe7+ ♖xe7 29.♖d6+-; 17...♙d7 18.♙h3!+- is a key move!]

18.♖xa7! ♙c5 [18...♙b7 loses to 19.♖xb7! ♖xb7 20.♙c6+-]

19.♙d4! Another very strong move and Black cannot hold his minor pieces on the c-file anymore.

19...♙xd4 [19...♖c6 is refuted by 20.♙xe4+-]

20.♖xc7 ♙xf2+ 21.♙h1! Taking the bishop was also winning, but this is more simple.

21...♙d7 Up to this point Tomashevsky played brilliant chess. He is completely winning after each move. He could have

chosen some shorter ways to convert the advantage, but the outcome of the game never saw any doubts...

22.e3 [22.♖dxd7 22...♙xd7 23.♖xd7 ♔xd7 24.♕h3+- and a queen check on the c-file next would have been decisive.]

22...♙xe5 23.♖dxd7 ♕xe3 [23...O-O Black was always missing this tempo to settle his king into safety. This time it was already too late: 24.♖xg7+ ♙xg7 25.♖xg7+ ♔xg7 26.♙c7+-]

24.♙xe3 [After 24.♙a3+- the mate is inevitable.]

24...♖a6 25.h4 O-O 26.♖xg7+ [26.♙c5+- was again a slightly shorter way to mate with the two rooks on the 7th rank.]

26...♙xg7 27.♖xg7+ ♔xg7 28.♕xe4 The game is over. Tomashevsky was probably low on time and Black decided to play some unnecessary moves...

28...h6 29.♙d4+ ♖ff6 30.♙d7+ ♔f8 31.♙xb5 ♖ae6 32.♕f5 ♖b6 33.♙e5 ♖fd6 34.♔g2 ♔f7 35.♔h3 ♖dc6 36.♔g4 ♖c4+ 37.♔h5 ♖cc6 38.g4 ♔f8 39.g5 hxg5 40.hxg5 ♖d6 41.♙h8+ ♔f7 42.♙h7+ ♔e8 43.g6 ♖d2 44.♙h8+ ♔e7 45.♙e5+ ♔f8 46.g7+ ♔g8 47.♕e6+ ♖xe6 48.♙xe6+ ♔xg7 49.♙h6+ Black finally resigned. A fantastic game! **1-0**

(3) Caruana, Fabiano(2801) - Topalov, Veselin(2772) [B46]

2nd Sinquefeld Cup 2014(6.1),
2014.09.02

GM Arkadij Naiditsch
Best rating: 2737

The rise of the new superstar Fabiano Caruana began already a few years ago, but what the only 21-year old Italian is showing in the Sinquefeld Cup is just unreal! 7 straight wins in the strongest chess tournament in history! Unbelievable. From a professional point of view I can tell that Caruana is not very lucky and his opponents don't blunder-he is simply playing much better chess. Great preparation, great positional play, great in tactics and precise in converting his advantage, this is what Caruana is showing us in his last games. And in the current game we will see a great example of how good Caruana Fabiano really is. After the opening Black makes a minimal mistake and gets himself in trouble. By playing solid/strong moves White's advantage is getting bigger and bigger and Caruana doesn't miss the moment to finish his opponent with a nice winning strike!

1.e4 Caruana almost always sticks to 1.e4.

1...c5 Topalov is also a very fighting player and almost every single one of his games in full of action, which is why his main opening is the Sicilian.

2.♘f3 e6 3.d4 cxd4 4.♘xd4 ♘c6 5.♘c3 What is also nice about the play of Caruana is that he is always going for the main lines and usually has some new little idea in his pocket.

5...a6 Not the most popular line, but quite a tricky one.

6.♘xc6 Clearly the main move. From a general point of view

of course it is never great to give Black the possibility of having a strong center, but now the move a6 will be useless.

6...bxc6 7.♘d3 d5 8.O-O ♘f6 So far things were very usual and now White has quite a few choices.

9.♖e1 is one of the main moves. Another possible plan for White is the idea with f4, it can be played over several move orders and it is usually connected with putting the queen on e2.

9...♘e7 is also the main move of theory and a very logical one. Black is preparing to castle kingside after which Black's position would be perfectly fine, so White needs to act quickly.

10.e5 The most logical move.

10...♞d7 11.♚g4 This is the idea of the move before 10.e5. The pawn on g7 is under an unpleasant attack.

11...♙f8 is clearly the main move. Caruana already has quite some experience in this position as he is playing it with both colors. After 11...g6 12.Bh6 the position is sharp, but White seems to have an advantage.

12.♞a4 An interesting move. White is trying to sort of save a tempo on playing the b3 move-which is actually useful anyway, so it is quite unclear if it actually brings White anything more than just being a different move order. [12.b3

12...c5 13.♞a4 is the more usual move order. White's idea is clear, to play c4 and fix the black pawn structure.]

12...♚a5 Topalov is immediately reacting and trying to figure out the difference. [Maybe Black should have continued with the usual 12...c5 and now White has a choice between getting back to the normal line with 13.b3 or try 13.c4 ♚a5 14.♚d1 d4 and for me it is very hard to say if White really did something important in comparison to 13.b3. It seems to me that Black is doing fine here.]

13.♖e2! A very unusual and a very strong move. White is preparing the Bd2 move and at the same time in many lines the rook on e2 could be very well placed, for example in case of the f4 push followed by Rf1.

13...h5?! Maybe not a bad move, but a very risky one. Black is launching some play on the kingside, where it is actually the black king who is finding himself "naked". [13...c5 looks much more solid. 14.♘d2 ♚c7 (14...♞xe5? 15.♖xe5 ♚xd2 16.♞b6 ♖b8 17.♞xc8 ♖xc8 and now White has 18.♖xd5 with a very big advantage.) 15.c4 Once again Blacks seems to not be able to take on e5 and in case of not playing Nxe5 the move Qa5 was just a loss of a tempo. 15...♞xe5 16.♙f4! ♞xg4 17.♙xc7 and because of White's great development Black's position is very dangerous here.]

14. ♖f4 There was no other place to go because the knight on a4 is hanging.

14...g5 If you say A with the h5 move you need to say B with the g5 move.

15. ♘d2 is also the only move for White.

15... ♖c7? I think this is already a serious mistake. By leaving the queens on the board, the h5 and g5 moves become clearly contra-productive. White is only getting more attacking targets. [Usually in the Sicilian it is a good idea for Black to exchange the queens if possible and here it is no different: 15...gxf4 16. ♘xa5 Now Black has a lot of different moves, but for example after 16... ♖g8 if White is better here, it should be minimally better.]

16. ♖g3 Now the g5 pawn became a target.

16...h4

17. ♖g4 Could it be that Black made a miscalculation and was hoping to win the pawn on e5 when playing 13... h5?!

17... ♖g8 [17... ♘xe5? of course doesn't work because of 18. ♖xe5! ♖xe5 19. ♘c3 and the rook on h8 is falling.]

18. ♖ae1 Simple and good. The e5 pawn is protected.

18...c5 What else?!

19. c4 dxc4 This move can't be good either as Black is opening the position further while his king has a very unsafe place on f8. [19...d4 was a better move. 20.b3 ♘b7 21. ♘b2 with the plan of playing Be4 and Nd3 at the right moment. The problem in comparison to the usual structures with the pawns on h7 and g7, where Black is doing more or less fine, is that now the pawns on h4 and g5 are very badly placed and are under constant attack. White clearly has a big advantage here.]

20. ♘xc4 ♘b7

21. h3! I like such moves a lot! Black's only chance is to use the long diagonal a8-h1 and maybe at some good moment to play h3 himself, so Caruana is stopping all the black hopes and at the same time h3 could be a very useful move for the future.

21... ♖d8 22. ♘c3 ♘b8 Topalov is trying to at least get his knight to d4.

23. ♖e3 Another very strong silent move by Caruana. It stops Black from playing Nc6 and White wants to play b3-Nb2-Nd3, bringing his last piece into the attack. Black is almost paralyzed.

23... ♘c6? After this move all is lost! Black is falling into the trap. [23... ♖g7 was better. Black now wants to play Nc6-Nd4, with a very bad position, but at least the fight would go on.]

24. ♖xe6! Black gets what he was asking for. To play with an open pawn position and a king on f8 is very dangerous.

24... ♖xe6 25. ♖f3+ Black has 2 moves now:

25... ♖e8 [Topalov was probably initially planning to play 25... ♖g7 but here White is winning with a very nice combination too: 26. ♖h5 ♖df8 27. ♖f6!! Black has no defence against the mating attack... 27... ♖xf6 28. exf6+ ♖xf6 29. ♖xg5+ Winning back the piece and getting a totally winning position.]

26. ♖xe6 There is no more escape here for Black.

26... ♖g7 [26... ♖d4 was not much better since after 27. ♖xg8+ ♖d7 28. ♖f7 ♖xf3+ 29. gxf3 White is 2 pawns up and he still has his mating attack.]

27. ♖h6 Precision until the end...

27... ♖d4 I guess Topalov still had little hopes to survive this game, but not after the next move!

28. e6! A very beautiful move! Of course White also had many other moves which probably would have won the game as well, but it is great to see how precise Caruana is acting in winning positions, practically not giving his opponents any chances for survival.

28... ♖xf3+ Black doesn't really have many options...

29. gxf3 The rook on g7 is hanging and in case of 29... Rg8 White has an easy win with 30. Qh5.

29... ♖f8 30. ♖h5+ ♖e7 Now the most simple move is

31. ♖xg7 What a great game by Caruana! Logical strong moves and a beautiful finish. Could it be that we finally see somebody who could be a match for Carlsen- or even somebody who is stronger?! **1-0**

(4) Vallejo Pons, Francisco(2698) - Arribas Lopez, Arribas(2503) [D27]

79th ch-ESP 2014(5.1),
2014.08.29

GM Arkadij Naiditsch
Best rating: 2737

Vallejo has clearly been the best Spanish player for many years. He participated in a lot of super tournaments like Linares, Monaco or Bilbao, but usually without big success as he is having trouble playing the very best chess players. On the other hand in the lower categories Paco has always been very effective. Right now we are going to see a game of the winner of this year's Spanish championship with a great overall score of 7.5/9, where he was in a great attacking mood, practically tearing his opponents' positions apart with powerful calculation and great tactical blows.

1.d4 Vallejo is playing a lot of tricky openings with White, but the start of the current game will be very solid

1...e6 A provocation for the French defence which could appear after 2.e4.

2.c4 d5 3.♘f3 White chooses not to go for the classical Queen's Gambit.

3...dxc4 A rare move order, but a possible one.

4.e3 A very solid move and we are back to one of the main lines of the Queen's Gambit accepted.

4...♘f6 5.♙xc4 a6 A lot of different move orders are possible here, but of course there is nothing wrong with starting with 5...c5.

6.O-O c5 Now White has to choose...

7.♙b3 is one of the main moves. We also often see 7.dxc5, entering a minimally better endgame for White, or 7.Qe2 with the idea of playing Rd1 next.

7...b5 Black is picking a very risky line, which is exactly the right reaction. It is important for White to win control over the c4 square, which can be used by the knight. [7...cxd4 8.exd4 ♘c6 9.♘c3 ♙e7 and we are in a classical position which has been played very often on any kind of level.]

8.a4! b4 [To hold the b5-c5 pawns is very difficult for Black: 8...♙b7 9.axb5 axb5 10.♖xa8 ♙xa8 11.♙e2 The attack on the b5 pawn is very unpleasant. 11...c4 12.♙c2 and White should be clearly better here because of the b3 or e4 ideas.]

9.♘bd2 9.e4 was also possible, but it leads to the same position as in the game over a different move order.

9...♙b7 10.e4! A very important move that puts the whole variation of Black into question.

10...cxd4 Other moves weren't better. [10...♘xe4 was almost instantly losing since after 11.♘xe4 ♙xe4 White has a wide choice of good moves, but the most simple is 12.♖e1 and in case of 12...♙d5 13.dxc5 ♙xb3 14.♙xb3 ♙xc5 15.♙g5 White just has a winning position.]

11.e5 ♘fd7 12.♘c4 Now we can see how great the white

knight is feeling on the c4 square.

12...♖c6

13.♗g5 A very typical move in this kind of position. In case Black was in time for Be7 and 0-0 everything would be great, but of course it is just impossible. White's development is just fantastic, which gives him a lot of different tactical ideas.

13...f6 Now Black's position is going to be overrun by the white pieces... [After 13...♗c7 14.♖c1 Black's position is also very dangerous.]

14.exf6 gxf6 Black's position is on the verge and this is easy to see, but White still needs to find the right attacking moves to prove it.

15.♖e1!! An excellent decision by Vallejo. White spots the

right weakness and this is the e6 pawn. [15.♗xd4 would lead to a crazy position: 15...♗xd4! 16.♗h5+ ♖e7 17.♗f4 with very unclear complications.]

15...♗c5 is the only move for Black. [15...fxg5 is of course losing: 16.♖xe6+ ♗e7 17.♗d6+ ♖f8 18.♗xb7 with a totally winning position for White.]

16.♗fe5! Another great attacking move in a complicated position, not giving Black any rest.

16...♗xe5 [16...fxg5? 17.♗h5+ ♖e7 18.♗f7#]

17.♗xe5 What to do now for Black?! White wants to play Qh5 next or even moves like Rc1 or Nd3, with even stronger pressure on the e6 pawn, could almost already decide the game.

17...♗e7 Not a bad move. Black is protecting the e6 pawn and defending from Qh5 because he is freeing the d8 square for his king to escape the mating threats.

18.♗d3 Absolutely correct play by White, not getting tempted by a win of material. [18.♗h5+ is a much worse move since after 18...♗d8 19.♗f7+ ♖d7 it is not that clear if White has anything better than to give a perpetual check after 20.♗e5+ (20.♗xh8? 20...♗xb3) 20...♗d8 21.♗f7+]

18...♖xb3 19.♔xb3 Black managed to exchange a couple of pieces, but the main problems remains. The king is open and the pawn on e6 is still under heavy attack.

19...♔f7 [It is bad luck for Black that 19...♗d5 is not working because of 20.♔xd5! exd5]

21.♗xf6 and White is winning the material back. **21...♔f7**
22.♗xe7 ♗xe7 It is easy to see that this endgame must be winning for White, for example after **23.♖e5** Black is going to lose a few of his pawns during the next moves.]

20.♗f4! A nice finishing move. The pressure on the e6 pawn is just too much to handle for Black.

20...♗c8 There is no other possibility of defending the e6 pawn without losing a lot of material. [Of course White is winning after 20...fxg5 **21.♖xe6 gxf4 22.♖xe7+ ♔xe7 23.♔xb4+** and **Qxb7** next.]

21.♔f3 Attacking the a8 rook and threatening Nd5.

21...♗g7 There were already no better moves for Black.

22.♖ac1 A nice move! Sometimes a threat is stronger than the direct action. White wants to play **Qxa8** or **Nd5** now, followed by **Rc7**. [After **22.♔xa8 22...fxg5** of course Whites position should still be winning, but Black would keep on fighting.]

22...♔a7 All the moves were losing by now...

23.♗xf6! Finishing in style! **23.Nh5** or **23.Nd5** would be the "cold" end for Black.

23...♗xf6 24.♗h5 Black can't defend from **Qxf6** or **Nxf6** next.

24...♔e8 [24...♔e7 would lead to a prettier mate: **25.♗xf6 ♔xf6 26.♖c7+ ♔g6 27.♔g3+ ♔h6** and the nice **28.♖e5** Black can't escape the mate during the next moves, the threat is to play **Qh3-Qh5** mate.]

25. ♔xf6 Black's position is just a disaster and he doesn't even have any material advantage, so it was time to resign. A really very nice game by Vallejo, although we could feel a clear difference in level. **1-0**

Endgame section

(15) Koneru, Humby(2598)
- Hou Yifan(2661)

Sharjah WGP,
2014.08.28

GM Csaba Balogh
Best rating: 2672

It seems like an easy draw, but this evaluation is far from reality. Black has more active rooks and the white pawns on the kingside are weak and vulnerable. They are missing the king from g2 and this allows Black to play for a win.

35...♖d3! 36.♞c3 ♜e2+! One of the rooks is going to penetrate.

37.♞b3 [White cannot neutralize both rooks with 37.♞1c2 because 37...♞xc3! 38.♞xc3 ♜e3+ wins a pawn.]

37...a4+! An excellent decision! Hou Yifan wants to eliminate the queenside in order to avoid any counterplay, which the a2 pawn could cause after taking on a5. [37...♞xc3+ 38.♞xc3 ♜g2 was worse, because White is in time to play 39.f4! a4+ (On 39...♞f6 40.a3! and Ka4 next!) 40.♞xa4 ♞xa2+ 41.♞b5 In comparison to the 37...a4 line, where the black rook stands on g2, Black is missing one tempo to attack the g3 weakness in time with Kf6-f5-g4. 41...♞f6 42.♞c6 ♞f5 43.♞d6= White is in time to counterattack the f7 pawn and holds the draw.]

38.♞a3 This is the best chance since White saves the pawn on a2. [38.♞xa4 runs into big difficulties after 38...♞xc3 39.♞xc3 ♞xa2+ 40.♞b5 ♞g2! This is the crucial tempo! 41.f4 ♞f6 42.♞c6 ♞f5 43.♞d6 ♞g4 and Black wins! 44.♞e7 ♞xg3 45.♞xg3+ ♞xg3 46.♞xf7 ♞xf4 47.♞xg6 ♞g4—+ White cannot squeeze the king to the h-file.]

38...♞xc3+ 39.♞xc3 ♜g2 40.♞d3 [On 40.f4 40...♞f6 Black improves his position with Kf5-g4. White has no useful move anyway, as the rook must protect the g3 pawn, while taking on a4 loses as we have seen in the 38.Kxa4 line.]

40...♞xg3? In my opinion Black should not have hurried with this capture. [He could simply have improved his king first with Kf5 or Ke5, as White has no useful move anyway. 40...♞f6 followed by Kf5 or Ke5 and only then to take on g3. I believe Black should objectively be winning.]

41. ♖xa4 ♜h3 42. ♔b3? The is the losing move! I understand the point, that Koneru wants to advance her a-pawn and she expects her opponent to stop it from behind with Rh1-a1. Therefore she keeps her king on b3 in order to be able to prevent this idea with Kb2. However White blunders another way how Black can stop the a-pawn. [It was more logical and also much better to play 42. ♔b5 to support the promotion of the a-pawn with the king. 42... ♜xh4 43. a4 ♜h1 (43... ♜f4? makes no sense now: 44. a5 h4 45. a6) 44. a5 g5 45. a6 h4 46. a7 ♜a1 47. ♔b6 h3

48. ♜d2! We could get this position from many different move orders after 42. Kb5. White is threatening with Rh2, therefore the next move is forced: 48... f5 49. ♔b7 This is the critical point. Black would like to sacrifice his rook for the a-pawn and promote his own pawns, but White can defend succesfully here: 49... g4 (49... ♔g6 is met by 50. ♜d6+! ♔h7 (50... ♔h5?? even loses to 51. ♜a6 and Qh8 checks the queen at the end.) 51. ♜a6! (51. ♜d2 already loses in view of 51... ♜xa7+! 52. ♔xa7 g4 53. fxg4 fxg4 and the pawns are promoting themselves. 54. ♜d4 h2--+) 51... ♜xa6 52. ♔xa6 h2 53. a8=♔ h1=♔ 54. ♔b7+ ♔g6 55. ♔c6+ Black is forced to agree a draw in view of the perpetual check, because 55... ♔h5?? drops the queen after 56. ♔e8+! and Qh8 next.) 50. fxg4 fxg4 51. ♜d4!= and White captures the pawns since after h2, the g4 pawn is hanging with

check.]

42... ♜xh4 43. a4

43... ♜f4! This was the idea which was most probably missed by Koneru. Black stops the a-pawn from f6. The rook stands perfectly on f4, because it also cuts the white king and as soon as White plays a6, Rf6 a7 Ra6 wins the pawn. Otherwise Black simply advances his own passed pawn. Black is winning.

44. a5 h4 45. a6 ♜f6! 46. a7 ♜a6 47. ♜d4 ♜xa7 48. ♜xh4

48... ♜c7! The last key move! Black cuts the king far away from the f3 pawn. The rest is very easy, he only needs to make progress slowly on the kingside and White can only watch this.

49. ♜f4 ♜c1 50. ♔b2 ♜c5 Black is threatening to simplify to a winning pawn endgame after Rf5!

51.♖a4 [51.♖b3 loses to 51...♗f5! 52.♗xf5 gxf5 53.♖c4 ♖g6 54.♖d5 ♖g5 55.♖e5 f6+ 56.♖e6 f4—+ and Kh4-g3 next.]

51...♖f6 52.♗a7 g5 53.♗b7 ♖g6 54.♗a7 f6 Black improves his position move by move.

55.♗a6 ♖f5 56.♗a4 ♗e5 [White resigned in view of the threat Re3. In case of 56...♗e5 57.♗a3 ♖f4 refreshing the Re3 idea 58.♖c2 ♗e3 59.♗a6 f5—+ wins.] **0-1**

(16) Nakamura, Hikaru(2787) - Topalov, Veselin(2772)

2nd Sinquefeld Cup 2014(8.3),
2014.09.04

GM Arkadij Naiditsch
Best rating: 2737

Nakamura is having a horrible tournament in his home country and this game was no exception. After the opening Nakamura quickly got a worse position in the Berlin, then things got worse and worse and finally he found himself in this very bad looking rook endgame. During the next moves we will see great technique by Topalov and a good example of how to convert such positions.

45...b4! A great positional decision. Black had couple of choices, but 45.. .b4! looks just great. It is clear that White will have to play a3 at some point and Black has prepared a very nice future winning plan.

46.a4 bxa3 The most simple.

47.♗xa3 and here comes the winning move:

47...Re5+! Perfectly played by Black. Now the white king has to choose whether to stay on the kingside or to protect the queenside.

48.Ke3 Queenside it is... [To stay on the kingside would lead to the same result as in the game: 48.Kf3 48...Kf6! now the black king will slowly come closer to the b-pawn and White can't do anything about it. The position is totally lost and the white king is nicely cut off on the e-file.]

48...Kg5 The black king is going for the f -pawn.

49.Ra6 White is trying to disturb Black by attacking the weakest pawn on d6, but of course it does not really help to save the game.

49...Re1 The most simple. First Black is forcing the white king to come back to d2

50.Ke2 and only now he is defending the d6 pawn.

50...Re6 Black is now ready to proceed the movement of his king and White can't do anything about it.

51.Rb6 Nakamura decides to at least exchange a pawn to have some theoretical chances of drawing the position.

51...Kg4 52.b4 cxb4 There is no reason even to think about any other moves, Black is easily winning here.

53.Rxb4+

53...Kf3 As we can see, it is only a matter of time until the f2 pawn is going to fall and to get a drawn position the white king should have been placed on the "short side", so on h2, which is simply impossible because he is cut off along the e-file.

54.Ke1 f4 55.Rd4 White is waiting for Black to win the game.

55...Re4 The d6 pawn is not important anymore.

56.Rd2 d5 Of course 56...Kg2 would win the game as well...

57.Ra2 Kg2 followed by f3, Kf1 and Re2. We just saw perfect technique by Black and a few easy looking, but not that easy to play positional decisions which we should remember for our own games! **0-1**

Editorial Preface

The Grenke Chess Classics 2014:

The top 8 German players played a round robin event and your commentator managed to win it with 5/7. The 2nd and 3rd places were shared by David Baramidze and Daniel Fridman.

The Spanish team championship was won by the team of "Merida Patrimonio de la Humanidad" with Ivanchuk, Kryvoruchko, etc playing first boards.

Clearly the main news of the week was that Carlsen signed the contract for the World Championship match against Anand, which will happen in Sotchi in November.

Already from next week onward, we can be very happy about the following tournaments:

The European Club Cup in Bilbao, where almost all the top GMs from all over the world are participating!

And of course the "Bilbao Masters", a round robin with Aronian, Anand, Ponomarev and Vallejo, playing a double round event.

We wish you a lot of fun with this week's CEWN!

Arkadij Naiditsch & Csaba Balogh

3 best games of the past week

(1) **Naiditsch, Arkadij(2715)**
- **Meier, Georg(2652) [E21]**

GRENKE Classic 2014(3),
2014.09.08

GM Arkadij Naiditsch
Best rating: 2737

Just a few months ago I lost a very unpleasant game against Meier with a blunder, so this time I wanted to get my revenge.

1.d4 Meier is a big hero in his exchange French and I was too scared of it this time...

1...♘f6 2.c4 e6 3.♘c3 ♙b4 4.♘f3 ♙xc3+ It is hard to imagine this line being the best for Black, but it is not that stupid. Meier played it as well in the first round to Wagner and won easily with Black.

5.bxc3 d6 Black's idea is simple, to play Nbd7-e5-Qe7 and maybe b6-Bb7, being very solid with the pawn structure and playing against White's bishop pair.

6.g4 An interesting try! My bishop pair needs space, so of course an opening of the position is clearly good for White.

6...O-O A very logical move. Of course 6...Nxg4 is just a bad move because of 7.Rg1, but maybe 6...Ne4 followed by a quick d5 and c5 could be a try for Black as well.

7.g5 ♘fd7 8.h4 The idea at the moment is not so much an attack on the black king, but more to squeeze Black's position to limit the options.

8...♘c6 [After a move like 8...e5 I can always show no reaction with 9.♙g2 and maybe followed by 0-0 or Nd2-Ne4 maneuver. I think White is already clearly better here.]

9.♙g2 ♔e8 My opponent keeps the pawn structure flexible, but of course a move like 9... Qe8 is again a very passive one. I think better would have been 9...Ne7 directly.

10.h5 e5 It is already hard to find a better option, as White was maybe ready to sacrifice a pawn with g6 next already. [10...f5 11.d5 also looks very bad for Black.]

11.g6 is maybe not the best move, but I was just too tempted to play it. The bad part of playing 11.g6 is that I give the f6 square to the black knight. [A better decision would probably have been to first play a move like 11.♙c2 asking Black what his next move is going to be.]

11...h6! The only move! Black needs to keep the position as closed as possible. [11...fxg6 didn't work because of 12.hxg6 ♙xg6 13.♘h4 with a huge attack against the black king coming up.]

12.♘h4 I am going for the white squares. Of course White's position is looking very good, but in fact Black is very solid.

12...♘e7 Another good defensive move! [Another option could have been 12...♘f6 but this move is really looking very dangerous for Black. Now I always have the idea of playing somewhere Bxh6 and g7. 13.♙g1 Now Bxh6 is already a threat.

13...e4 14. ♖c2 Black's position looks very dangerous to me.]

13.c5! A cool move! When I saw during the game that I can push c5, I was sure it should be the right way to go on. I need space for my bishops, so I open the position to the max. [13. ♖g1 was of course a normal move as well.]

13...dxc5 [To play 13...fxg6 14.cxd6 cxd6 15.dxe5 ♘xe5 16. ♖xd6 looks really bad for Black as the white bishops just must be better here.]

14. ♖g1 This was my point behind playing c5 first. Now I have not only weakened Black's pawn structure, but the idea of Qb3 somewhere could also be dangerous for Black.

14...fxg6 15.hxg6 Maybe I did not take the best decision, but during the game the idea of playing Qb3 and Bxh6 next seemed very hard to stop. [15. ♘xg6 was also very interesting. 15... ♘xg6 16. ♗d5+ ♔h8 17.hxg6 White wants to play Bxh6 next. 17...exd4! An amazingly strong move and very hard to find. 18.cxd4 (18. ♗xh6 doesn't work because of 18... ♖e5! but from a human point of view this is almost impossible to find.) 18... ♘f6 19. ♗f7 ♖e7 20. ♗xh6 ♗xf7 21.gxf7 gxh6 22. ♖d2 ♖xf7 23. ♖xh6+ ♘h7 with a very unclear position.]

15...♖f6? After a very long think, Meier finds nothing better than this practically losing move. [The only, but very strong was 15... ♘b6! From a human point of view this is a very

strange move as White can chose which pawn to take, c5 or on e5, but in both cases Black's pieces are suddenly becoming very active. 16.dxe5 (After 16.dxc5 16... ♘c4 Black seems to be doing just great! Strangely White has no good move and Black just wants to play Be6-Rd8 next.) 16... ♘f5 17. ♘xf5 ♗xf5 and again we are in a very unclear position, but probably in case somebody is worse here, it is White !]

16. ♖b3+ Of course I go for the sacrifice on h6, which actually just seems to win.

16...♗f8

17. ♗xh6! was not too difficult to calculate, but a nice move anyway.

17...c4 [Of course White is just winning after 17...gxh6 18.g7+ ♖xg7 19. ♗xb7+ There is no need to look for a forced mate. 19... ♖h8 20. ♗xa8 White is just an exchange up.]

18. ♖xc4 ♘b6 This might be the line why Meier actually played 15...Rf6?, but of course it is not difficult to find the winning move for White here.

19. ♖d3! Easy and strong.

19...gxh6 Of course this move is losing instantly, but in case of not taking on h6, all I would need to do is to play Bg5 next with a winning position.

20.g7+ ♔f7 [Meier probably blundered that after 20...♔g8 I have the nice 21.♗e4! and Black has no decent protection against Bh7 next.]

21.♗f3 Bh5 is coming.

21...♔g8 22.♗h5+ ♔e6 Of course many moves are winning here, but I chose the most simple one.

23.dxe5 ♖f4 and now after

24.♗g6 ♗xg6 25.♗xg6 there is no protection against Bh7 next. All in all it was not a game without mistakes, but a very important tournament point for me! **1-0**

(2) Svetushkin, Dmitry(2580) - Kryvoruchko, Yuriy(2708) [B40]

TCh-ESP Div Honor 2014(3.1),
2014.09.06

GM Csaba Balogh
Best rating: 2672

An extremely exciting game was played in the Spanish team championship. It was not perfect, but both players found remarkable ideas in a very difficult middle game!

1.e4 c5 2.♗f3 e6 Black is ready to play a sharp Paulsen variation in the Sicilian, but White prefers to keep the position closed and aims for a maneuvering fight.

3.d3 ♗c6 4.g3 d5 5.♔e2 [Another setup is 5.♗bd2 with the same idea to avoid the trade of the queens after dxe4. Usually Black plays the same as in the 5.Qe2 line. 5...♗f6 6.♗g2 ♗e7 7.O-O O-O 8.e5 ♗d7 9.♖e1 with an attacking plan on the kingside with Nf1, h4 and so on, while Black builds up his counterplay on the queenside with b5-b4, a5.]

5...♗f6 6.♗g2 ♗e7 7.O-O O-O 8.e5 ♗d7

9.c4!? This is the difference to the 5.Nbd2 setup. White is still able to develop his knight to c3 and he tries to exert pressure on the d5 pawn to force Black to decide what to do with the d5 pawn. After both d4 and dxc4, White gets the e4 square for

the knight and the diagonal of the g2 bishop opens up.

9...b5!? A very interesting attempt to fight for the center at the cost of a pawn. This reminds me of the Volga gambit! [Recently some high level games continued with 9...d4 10.h4 ♔h8 11.♘f4 f5! and Black locked the kingside in Svidler-Karjakin 2014. The point of the previous Kh8 move was that after 12.exf6 gxf6 13.♚xe6 is not with check and Black can play 13...♘de5]

10.cxb5! White chooses the right way to accept the sacrifice. [White could also have won the pawn with 10.cxd5 10...exd5 11.♘c3 with a double attack, but then the compensation should be enough after 11...♖b6 12.♘xb5 a6 13.♘c3 ♕g4 and it is not easy to deal with the threat of Nd4.]

10...♖a5

11.♘fd2! An excellent move! At first it is not easy to see the point, but soon it all becomes clear. Black's idea is to undermine the queenside with a6 (like in the Volga gambit) and after bxa6 Bxa6 compensating very strongly on the queenside, as the d3 pawn might become very weak. Svetushkin correctly realized that the a6 move should be answered by a4 and White should save his b5 pawn at any cost to avoid the very unpleasant compensation. Therefore he brings back his knight to d2 to avoid Nb3 after a4 and

prepares to strengthen the b5 pawn with his other knight from a3! [11.♚c2!? was also possible with the same idea to control the b3 square and play a4 and Na3 next.]

11...a6 12.a4! [12.bxa6 12...♕xa6=+ is already better for Black. Nc6 is threatening to win the e5 and also with Nb4. This is exactly what Black was playing for when he played b5!]

12...♘b6 with the clear plan to win the b5 pawn with Bd7. [The computer suggests 12...♚b6 13.♘a3 ♕b7 but in this case, I don't see how Black should strengthen the pressure on the b5 pawn to be able to seize the initiative on the queenside. 14.♚e1]

13.b3 White's intention is to play Bb2-c3 and clarify the situation on the queenside, therefore Black must urgently act before White could consolidate.

13...axb5 14.axb5 ♕d7 15.♘a3 ♚e8?! This is logical, but Kryvoruchko probably missed the next move of his opponent. [Black should have played 15...♘c8! with the same idea to win back the pawn after Na7 and the difference is that after 16.♘ac4 the a5 knight is not hanging (compared to Qe8) 16...♕xb5 is equal.]

16.♘ac4!! A brilliant positional piece sacrifice! Black has no choice, he must accept the sacrifice...

16...dxc4 17.bxc4 White simply recaptures. He already has two pawns for the piece, but it is more important to realize the misplacement of almost all the black pieces. The g2 bishop turns out to be a beast on the long diagonal, which cannot be neutralized with the one on d7. Black finds a clever idea to save the a5 knight, but this creates new problems...

17...♘c6!? A nice tactical idea! [On 17...♙a7 White can choose between some tempting options: 18.♘e4 (18.♘b3 is also good to win back some material. 18...♘xb3 19.♙xa7 followed by Bb2 to get rid of the d4 knight and the rook on the seventh rank combined with the strong bishop on g2 paralyzes Black completely.)]

18.♙b2! Svetushkin prevents the centralization of the c6 knight and continues playing on intuitively, using the fact that despite Black solving the problem of one of his poor pieces (the a5 knight) there are still many more left. [18.♙xa8 allows Black to have a centralized knight after the intermediate move 18...♘d4!]

18...♙xa1 19.♙xa1 ♘b4 [In case of 19...♘d4 20.♙xd4 cxd4 21.♘b3 White will be fine even materially after taking on d4, but the march of the queenside pawns looks even more scary from Black's point of view.]

20.♘e4! White plans another sacrifice on f6! Kryvoruchko knows exactly what his opponent is thinking about, but his poor pieces don't allow him to find an adequate defense against the coming attack.

20...♙h8 Black leaves from the check on f6 and also from gxf6 exf6 Qg4-Qg7 mate. [I tried to defend with 20...f5 but White gets a winning advantage after 21.exf6 gxf6 22.d4! cxd4 23.♙xd4 ♘c8 24.b6+- Black's pieces are simple too bad.]

21.♘f6! Consequent and strong! Svetushkin sees that the poor placement of the black pieces should allow him to execute a decisive blow.

21...♙d8! The only move! [The knight could not be taken as after 21...gxf6 22.exf6 ♙d6 23.♙h5!+- Be4 comes next with an inevitable mate on h7.]

22.♙h5 [It was actually even stronger to start with 22.♙e4! The difference is that after 22...♙xf6 23.exf6 g6 24.♙a7+- is threatening with Qe3, attacking the c5 pawn and dropping the queen to h6. Many times Bxg6 also wins, using the fact that fxc6 f7 and hxc6 Qh6 are both mate. The two bishops are killing.]

22...♙xf6 [22...gxf6 is refuted by 23.exf6 ♙xf6 24.♙e4!+-]

23.exf6 g6 24.♙h6 [Unfortunately for White 24.♙xc5 does not work because of 24...♘xd3 and Black gets rid of the b2 bishop.]

24...♙g8 25.♙e4 Protecting the d3 pawn. White even has some slow ideas like h4-h5 in mind.

25...♘c2 Black wants to close the a1-h8 diagonal with Nd4, but the problem is the same as in the 19...Nd4 line, that after Bxd4 cxd4, the c- and b- passed pawns start to march with the support of the bishop and rook. [The best chance would have been 25...♘xd3! 26.♙xd3 ♙xb5 Black finally makes use

of his poor bishop, although his position remains suspicious after 27.♖a3 ♗xc4 28.♗c2 White even has some g4 ideas in mind with the threat of Qxh7 Kxh7 and Rh3 mate! ; 25...♖f8 leads to a lost endgame: 26.♖xf8 (The pretty 26.♖g7+!? also wins: 26...♖xg7 27.fxg7+ ♖xg7 28.♗xg7+ ♔xg7 29.♖a7+- and Rb7 or Rc7 next.) 26...♖xf8 27.♗e5 ♖c8 28.♖a7+- Black is completely squeezed. Rb7 or Bc7 wins next move.]

26.♖a7 ♗c8 [On the direct 26...♗d4 27.♗xd4 cxd4 28.c5 comes with tempo. 28...♗c8 29.♖b7+- Those connected pawns should decide the outcome.]

27.♖a8 ♗d4 28.♗xd4 cxd4

29.♖f4! A difficult move to find! The queen was standing well on h6, but the f6 pawn had to be protected. White could not advance the c-pawn immediately because the b5 was hanging. Now the plan is simply to push h4-h5, as Black has no useful move anyway.

29...♖b6 30.♖b8 This seems to be unnecessary because the queen stands better on c5. [White should have started with 30.h4 30...♖c5 31.♖h6! The new threat is b6, which cannot be taken by the knight and after Qxb6 h5 is going to be mate in few moves. The only move is 31...♖h5 but now the endgame is lost after 32.♖xh5 gxh5 33.♖a6!+- and b6 next move! The pawn promotes.]

30...♖c5 31.h4 e5 32.♖g5? Until this moment, Svetushkin has played a nearly perfect game, but this mistake allows his opponent a miraculous survival. [32.♖h6 was the winning move. Svetushkin was probably worried about the f6 pawn, that could be lost after 32...♖d6 but White wins with 33.♖b7 ♗e8 34.h5! ♖xf6 35.hxg6+- and Black has no good recapture on g6.]

32...♗d6! Suddenly the black pieces are jumping out, which could not happen if the queen was on h6. Perhaps, Svetushkin was counting with this move and he had planned his very nice response beforehand, but he missed something later.

33.♗xg6! A great tactical shot, but Black also had something in mind! [33.♖xg8+ 33...♔xg8 34.♖h6 ♗e8! saves Black from the mate!]

33...♗c8!! A fantastic resource! Black closes the 8th rank and lets more pieces to focus on the defense. Both sides have to be precise now! [33...fxg6 was refuted by 34.f7! ♖xb8 35.♖f6#; 33...♖xb8 34.♖h6 fxg6 35.♖g7#]

34.h5! The tension is growing! White is threatening with Qh6 and on fxg6 f7 decides the game. Therefore, Black is forced to take the f7 square under control.

34...♔c7! [34...fxg6 loses again to 35.f7! ♞xf7 36.♔f6+ ♖g7 37.b6! and b7 next wins!]

35.♖a8

35...♔b7! Black continues defending perfectly. He sends away the active rook and intends to create counterthreats with Bh3 and mate on g2. [35...fxg6 was still losing because of 36.hxg6 hxg6 (36...♖xg6 37.♔xe5+- Black is helpless against f7 or c5!) 37.b6 ♔f7 38.♔h4+ ♔h7 39.c5+- Despite the two extra pieces, the 3 passed pawns decide the game in White's favor.]

36.♔h6! Another only move, this time by White! The game turns to a forced stage where all moves are necessary and if somebody fails to find one, he loses.

36...fxg6 37.hxg6 ♖xg6 38.♔f8+ ♖g8 39.♔xd6 ♔xa8 40.f7! Despite the extra rook and bishop, the game seems to be over. White is threatening with Qf6 or Qe5 mate, but in the last move of the time trouble Black finds the way to escape.

40...♖xg3+!! 41.fxg3 ♔a1+ 42.♔f2 ♔a2+! Only this check leads to perpetual, but the point is still about to come...

43.♔f3 ♔a8+! This is the reason why the queen had to give the checks on the a-file. Now the king is forced to go back. [43...♙b7+ loses to 44.♔g4 ♔e2+ 45.♔g5 ♔e3+ 46.♔f6 ♔h6+ 47.♔e7+- the king runs away and the f-pawn promotes.]

44.♔f2 [44.♔c6?? 44...♙b7 loses as both Qxb7 Qxb7 and f8Q Qxf8 are check!]

44...♔a2+ 45.♔f3 ♔a8+ 46.♔f2 Draw agreed! A fantastic game, where both players should have gained the full point for their achievements! **1/2-1/2**

(3) Iturrizaga, Eduardo(2660) - Giri, Anish(2758) [A34]

TCh-ESP Div Honor 2014(2.2),
2014.09.05

GM Csaba Balogh
Best rating: 2672

Iturrizaga managed to surprise Giri in the opening, who chose a wrong plan and got into trouble right after the opening...

1.♘f3 Giri frequently plays the Gruenfeld defense, therefore White starts with 1.Nf3 to keep more options to react against it. This is an advantage for the 1.d4 players, that they can trick their opponents with the move orders (1.d4, 1.Nf3, 1.c4 often transpose to each other), while an 1.e4 player cannot transpose from one line to another.

1...c5 2.c4 ♘f6 3.♘c3 d5 4.cxd5 ♘xd5 Giri's opening choice proves, that he was intending to play the Gruenfeld as now after 5.d4 or 5.e4 we would transpose to those lines. However White has alternatives now by keeping the pawn temporarily on d2.

5.♖b3

5...♘c7?! This is a move after which White already seems to get an advantage. [Few days later on in the same tournament, Ivanchuk was much better prepared against the same opponent and played 5...e6! 6.g3 ♘c6 7.♗g2 ♗e7 8.O-O O-O The black pieces are standing much more healthily compared to our game. 9.♖d1 White tries the same idea as against Giri to open the center with d4, but Black reacted well with 9...♗b6 10.d3 e5 Ivanchuk managed to consolidate the center and obtain some space advantage. He was definitely out of problems. The game finished with a draw after a tough fight.]

6.♗e5! An excellent positional move, which confuses the communication between the black pieces. The main idea is to avoid the ideal development of the b8 knight to c6.

6...e6 7.g3! The bishop belongs to the long diagonal to exert pressure on the b7 pawn and control the important central squares.

7...♗d7 [7...♗e7 8.♗g2+=; On 7...♗d6 8.♗c4 White wins an important tempo by threatening to grab the bishop pair and after 8...♗e7 9.♗g2 ♗c6 White has a nice option to size the initiative with 10.♗xc6+! bxc6 11.d3 This idea is known from many openings, even with reversed colors Black sometimes takes on c3. The point is to set the doubled c-pawns under big pressure with Be3, Rc1, Ne4, Qa4 or Qa3, focusing all the pieces against the pawns. The lack of the light squared bishop could be neutralized by O-O and f3 later.]

8.♘c4! Another excellent positional move! White keeps his strong knight on the board, because the other one is misplaced on d7 as it is far away from the c6 square. The knight is well placed on c4 in such structures.

8...♙e7 9.♙g2 0-0 10.a4 Another standard move in such structures. White wants to stabilize his c4 knight. It was not under threat by some b5 moves, so White could also have started with 0-0, but the a4 move will be useful anyway.

10...♘f6 11.0-0 ♘cd5 Black tries to improve his pieces, but it costs too much to time to jump with the knights. Iturrizaga finds the fastest way to make use of the undeveloped queenside pieces.

12.♖d1! With the idea to open the center with d4! The nice d5 knight might lose its stability.

12...b6 13.e4! 13.d4 was also possible, but this proves to be even stronger.

13...♘b4

14.d4! The previous e4 move was based on this central break! It is all very principled, White should open the center to gain the benefits of his more active pieces.

14...cxd4 15.♙f4! Another excellent positional move! White does not hurry to recapture the d4 pawn. It is not running away. White intends to play Nb5, annoy his opponent on the c7 and d6 squares and also to take back on d4. White has prevented the e5 move with Bf4! [15.e5 15...♘fd5 16.♖xd4 ♙b7 17.♘b5 would also have given White an edge, because the hole on d6 will be more relevant than the one on d5. But I like much more the way how Iturrizaga played.]

15...♙a6 [If Black wants to save his pawn with 15...♙b7 16.♘b5 ♘c6 White simply plays for huge positional compensation with 17.♖ac1 followed by jumping to d6 with the knight. In general it is not a good idea to passively defend such pawns, because Black soon runs out of useful moves.]

16. ♖b5 d3 Black tries to save the pawn as long as possible, but he runs into different, more serious problems. [16... ♗xb5 17. axb5 is also bad for Black. Suddenly the knight on b4 cannot retreat. White is threatening with Ra4 or Bd2.; 16... ♖c6 17. e5 ♖d5 18. ♖cd6± with the domination of the white pieces.]

17. ♗c7! White perfectly uses the lack of coordination between the black pieces. It might be strange at first sight, but in the following lines we can see how big the problems really are.

17... ♗xb5 Giri desperately tries to sacrifice his queen, but he does not get enough compensation for it. [The best defense would have been 17... ♖d7 which runs into 18. ♖e5 ♖c8 19. ♖ac1 It is getting worse and worse after each move... 19... ♗xb5 20. axb5 ♗c5 21. ♗d6 ♖d8 22. ♗xc5 bxc5 23. ♖xd3 ♖xd3 24. ♖xd3± Probably this is the best for Black, but this one is also quite bad. He is going to lose the c5 pawn and the bishop is going to dominate the knight after a well-timed e5 push.; 17... ♖c8 leads to a lost position by force after 18. ♖cd6 ♖d7 19. ♖xb4 ♗xb5 20. ♖xb5 ♖xc7 21. e5 ♖d5 22. ♗xd5 exd5 23. ♖ac1+- followed by Qxd5 and the d3 pawn also falls.]

18. ♗xd8 ♗xc4 19. ♖xc4 ♖fxd8 Black has two knights and the d-passed pawn for the queen, which is clearly not enough, but White needs to make some precise moves first to prove it.

20. ♖ac1! It is important to occupy the c-file to avoid any activity with Rac8. [On the direct 20. e5 20... ♖ac8! is less clear.]

20... e5 Otherwise White would have opened the diagonal by playing e5 himself. [20... d2 does not change anything. Black will drop this pawn soon after 21. ♖c3 ♗c5 22. ♖e2+-]

21. ♖b5! Attacking the new target and leaving from the Rd4 tempo, which could have been played after 21. Bf1.

21... ♗c5 [21... ♖d7 22. ♗f1+-]

22. ♖xc5! This is the right technique! White gives back some material, but he still keeps some. It is more important to get rid of the strong bishop. The e5 pawn also falls...

22... bxc5 23. ♖xc5 a5 24. ♖xe5 White is ready to remove his queen and push e5. Black cannot even activate his a8 rook because of the a5 pawn. The game is basically over, but Giri tries to put up some more resistance.

24... ♖e8 25. ♖f5 ♖a7 26. ♖c5 ♖a6 27. ♖b5 ♖a7 28. e5 Now the bishop also joins to the game.

28... ♖d7 29. f4 The black pieces are still missing harmony, which was the biggest problem for him in the entire game.

29... ♖b8 30. ♖c4 ♖b6 31. ♖c5 ♖d7 32. b3 Neutralizing the

b6 knight. Now he must forget about the Na4 and Nc4 jumps and the a5 pawn is hanging.

32...♘6d5 33.♙e4 ♖bd8 34.♖d2 White is winning after other moves too, but Iturrizaga does not want to give any chances to his opponent. He blocks the pawn and leaves from the potential Nc3 and Ne3 moves.

34...g6 35.♚xa5 Now even the b4 knight has lost its fortress.

35...♖b8 36.♚c5 Black resigned. A convincing win by White, although Ivanchuk's improvement with 5...e6 seems to solve the opening problems for Black. **1-0**

Endgame section

(14) Bacrot, Etienne(2729)
- Harikrishna, Pendyala(2725)

Spanish league,
2014.09.07

GM Csaba Balogh
Best rating: 2672

Bacrot played a nearly perfect game and reached this completely winning rook endgame. The connected passed pawns supported by the king are clearly faster than Black's pawns.

54.♖f1! This is the easiest way to stop the black pawns and the g-pawn promotes automatically. Black could have simply resigned here in conscience, but Harikrishna decided to play on...

54...a3 55.g6 a2 56.g7 ♖e8 57.♔h6 This is the end of the story. White plays Kh7 next and promotes his g-pawn. Bacrot was definitely expecting resignation, but his opponent finds a last trick...

57...♖a8 58.♖a1 This was not even necessary as a1Q was not a threat. White could simply have played 58.Kh7.

58...♔c6 59.♔h7 [White could anytime play 59.♖xa2 59...♖xa2 60.g8=♔+- when Black would just have congratulated his opponent, but White thought it does not matter what he plays, the game is over anyway...]

59...♖a7! Here is the last trick...

60.♔h8?? A shocking blunder, after which the game is drawn...There was simply no other legal move on the board which could have spoiled the win. [Even after the completely senseless Kg8, which just blocks the pawn, White is winning. Any nonsense rook moves except of Rb1 were winning too. The human 60.Rxa2 always wins on the spot. Probably the simplest was 60.h5 60...♔b5 61.♔h8+- and Black would finally have resigned.]

60...♖a4!! This amazing move saves the day for Black. This is how cruel chess can be. One blackout from the mind and the achievement you built up in 5 hours can slip away in one move. Black gets both of the pawns and promotes his own c-pawn with the help of the king.

61.h5 [61.g8=♔ 61...♖xh4+ 62.♔g7 ♖g4+= will be the same as the game.]

61...♖h4! White cannot save his h-pawn.

62. ♖xa2 ♜xh5+ 63. ♔g8 ♜g5 64. ♔f7 ♔d5 65. ♜a8 [65.g8=♔ does not change anything. The white king is too far from the pawn. 65...♜xg8 66. ♔xg8 c4 67. ♔f7 c3 68. ♔f6 ♔d4= Kd3 and c2 next.]

65... ♜xg7+! Harikrishna calculates perfectly the arising endgame. The black king supports the pawn and in the same time keeps his shoulder against the white king to approach towards the pawn. [65...c4?? would have been a counterblunder because of 66. ♜a5+ +–]

66. ♔xg7 c4 67. ♔f6 c3 68. ♔f5 [68. ♜c8 does not change anything. 68...♔d4 and Kd3 comes next followed by c2 and Kd2.]

68... ♔d4 69. ♔f4 [On 69. ♜d8+ it is important to keep the white king away from the pawn with 69...♔e3!= (69...♔c4? loses to 70. ♔e4! c2 71. ♜c8+ ♔b3 72. ♔d3+–)]

69...c2 70. ♜c8 ♔d3 71. ♔f3 ♔d2 72. ♜d8+ ♔c3 73. ♜c8+ ♔d2 74. ♜d8+ ♔c3 75. ♜c8+ ♔d2 76. ♜xc2+ ♔xc2 Draw agreed! I must say, such are the most painful moments in a chessplayer's career. Something that he will never forget. We are lucky to be outside of this game and we should learn from other's mistake and take the right consequences. We should never slip our focus from the game until it has not finished, otherwise such tragedies might happen! **1/2-1/2**

**(15) Naiditsch, Arkadij(2715)

2014.09.11GM Arkadij Naiditsch
Best rating: 2737

This was another game in the Berlin, as lately somehow everybody is playing this opening against me. This time I managed to get a small advantage out of the opening and slowly managed to get my pawns "rolling". Still to break Black's position is not that simple.

36. ♖g2! A very important move. If Black was able to keep the bishop pair, the position should be very close to a draw.

36...c6 Anyhow there is no way to defend against Kg1.

37. ♖g1 ♗xg2 38. ♖xg2 So I reached the dream of the Berlin wall, to play a bishop endgame practically with a pawn up because of Black's bad pawn structure.

38...g5 This move probably makes things easier for White. [38...g6 was probably a tougher defense. **39. ♖f3 ♖d7 40. ♖e4 ♗e7 41. f5** Now I want to play e6+ next, so Black is forced to take on f5 which frees the way for the white king. **41...gxf5+ 42. gxf5 ♗d8** Black can't do anything except to wait. **43. ♖f4**

♗e7 44. ♖g4 ♗f8 45. ♖g5 and the white king is marching... **45...♗g7 Kf6** has been a deadly threat **46. f6 ♗f8 47. ♖f5** and Black can't stop the upcoming e6 move, with a winning position for White. **47...♗h6 48. e6+ fxe6+ 49. ♖g6** The f-pawn is almost a queen.]

39. ♖f3 Of course 39.f5 was possible as well.

39...♖d7 [39...gxf4 **40. ♖xf4 ♖d7 41. ♖f5** and White is easily winning by bringing first the bishop to f6 by playing Bf4-Bg5-Bf6 and after playing g5.]

40. f5 ♖e7 41. ♖e4 ♗c7

42. ♗e1 White's plan is simple, first to force Black to play the f6 move and for that I need to attack the g5 pawn.

42...♗d8 43. ♗d2 f6 [43...♖d7 was of course losing. **44. f6 ♖e6 45. ♗xg5 ♗c7 46. ♗f4** followed by g5-Kf3-Kg4 and g6.]

44. exf6+ ♖xf6 45. ♗c3+ ♖f7 46. ♗e5 It is important to first put the bishop on e5 with a simple idea which we will see during the next move.

46...a6 Black doesn't have anything better.

47. f6! The last important move of the game. By giving the f-pawn I am getting my king to f5 which will allow me to win the black g-pawn.

47...♔e6 Black wants to play Bxf6 next. [47...♘xf6 48.♔f5 would lead to a similar position as in the game.]

48.f7 was the point of playing f6. Sooner or later the black king will have to take the f7 pawn and I will get the f5 square.

48...♘e7 49.♘c7 Now Bd8 is a deadly threat.

49...♔xf7 Black doesn't have a choice.

50.♔f5 The next step now is to win the g5 pawn.

50...b5 51.♘e5 b4

52.♘b2 The g5 pawn can't be saved.

52...♘d8 53.♘c1 ♘f6 54.♘xg5 ♘d4 and all I need to do now is to bring the g-pawn in action.

55.♘d8 ♘c3 56.g5 ♘d4 57.♘f6 ♘c3 58.g6+ ♔g8 The black

king is pushed away and my king is going for the queenside pawns.

59.♘e5 ♘d4 60.♔e6 followed by Kd6 and all the black pawns are going to fall. **1-0**

Clash of the Titans

GM Kamil Miton
Best rating: 2655

1.d4 ♘f6 2.c4 e6 3.♞c3 ♙b4 4.e3 O-O 5.a3 White is going to transpose to the 4.a3 variation. The two main alternatives are [5.♙d3 and; 5.♞e2]

5...♙xc3+ 6.bxc3

6...♞e8 The main plan for Black is [6...c5 with the typical idea to fix the weak pawn on c4. 7.♙d3 ♘c6 (7...d5 8.cxd5 exd5 9.♞e2 b6 10.O-O ♙a6 11.♙xa6 ♞xa6 12.f3 The evaluation of this line mostly depends on whether White manages to push e4 in the right moment. I recommend to check the famous game Botvinnik-Capablanca.) 8.♞e2 b6 9.e4 ♞e8 10.O-O Both sides have clear plans, Black creates pressure against the c4 pawn and White prepares an attack on the kingside. 10...♙a6 11.f4 f5!→After Ng3 Black can even play the strong

g6 move because White will not be able to activate the dark squared bishop.]

7.♞e2 e5 8.♞g3 d6

9.♙e2 It looked more active to develop the bishop to d3. [9.♙d3 and now let's check some example variations about strategical fighting in this structure: 9...b6 (9...♞c6 10.O-O e4 11.♙c2 ♞a5 12.f3! Activating all white pieces. 12...exf3 13.♞xf3 ♞xc4 14.e4 with great compensation for the pawn.) 10.O-O (10.f3! Preventing e4-Ba6.) 10...e4 11.♙c2 ♙a6 12.f3 ♙xc4 13.♞f2 d5 (13...exf3 14.♞xf3 ♞bd7 15.e4!) 14.fxe4 dxe4 (14...♞xe4 15.♙xe4 dxe4 16.♞g4 ♞d7 17.♞f4 (17.♞f5 17...f6) 17...♞xg4 18.♞xg4 ♞d7 19.♞xe4 ♞f6 20.♞xe8+ ♞xe8) 15.♞f4 ♞bd7 16.♞xe4 ♞xe4 17.♙xe4 ♞f6!? 18.♙xa8 ♞xa8 19.♞f3 ♙d5 and Black is not worse as he is controlling the light squares.]

9...♞bd7 10.O-O c5 A typical move. Black doesn't only fix the weakness on c4 but also stops the Bc1 from getting activated in case White sacrificed the pawn after c5. [10...♞b6 11.c5! (11.a4 11...♙e6! 12.d5 ♙c8 White doesn't have the idea with c5 now because the d5 pawn is hanging. In the next moves Black will transfer his knight to c5 and get a very promising position. 13.e4 ♞bd7=+) 11...dxc5 12.dxe5 ♞xd1 13.♞xd1 ♞xe5 14.e4 ♞e8 15.♙f4=]

11.f3

11...cxd4? A huge strategic mistake! Without any reasons Black allows White to get rid of two problems, the weak c4 pawn and the passive Bc1. [11...dxf8 is the most logical. 12.e4 dfg6 13.f3e3 (13.f2f2!? with the very tricky idea to transfer the knight to d5.) 13...b6 14.f2d2 h6 15.a4 a5∞with long-term play.; 11...e4 12.fxe4 dxe4 13.dxe4 fxe4 14.f3d3 f7e7 (14...dxf6 15.f2xf6+-) 15.e4†]

12.cxd4 dxb6 13.f3b2 exd4

14.e4! The most accurate move to keep all advantages in the position. [14.exd4 14...d5! and the bishop on b2 is limited. 15.c5 dxc4 16.f3xc4 dxc4 17.f2c2 f2d5=+; 14.f2xd4 14...dxa4!±]

14...f3e6

15.f2c1! Very accurate again. [15.f2xd4 15...dxa4! 16.f3c1 f2b6 White's initiative over the diagonal is over and Black gets counterplay.]

15...f2e7 This move makes sense. Black keeps the possibility to play Ne8 with the idea to protect the weaknesses on d6 and g7 and prepares Rc8-Rc7.

16.f2xd4 f2c7? The decisive mistake. [16...dxa4 is too late now. 17.f3a1 f2b6

18.c5! dxc5 19.e5+-; 16...dxe8 Black is worse but still fighting.; 16...f2c8]

17.c5! dxc5 18.f2xc5 f2f4 Stopping Rg5, but only temporarily... [18...f2d8 19.f2e3 with a huge attack over the dark squares.]

19. ♖c1 ♔b8 [19... ♖d7]

20. ♖g5! Four pieces in the attack is too much and Black is not able to avoid the blow on g7.

20... ♘bd7

21. ♖xg7+! ♔xg7 22. ♘h5+ ♔g6 23. ♔e3 1-0

Editorial Preface

The last week has been all about Bilbao, where 9 from the Top 10 players in the World were playing.

The Bilbao Masters with 4 players, Anand, Aronian, Ponomarev and Vallejo, took place as a double round robin event. Already after 5 rounds (from a total of 6) Anand had won the tournament as he had a fantastic start with 4/5, but his loss in the last round to Aronian of course made the perfect tournament look a bit "less perfect". So the 2nd place went to Aronian who had the same final score as Anand with 4/6, but less wins, which made the tiebreak. Ponomarev and Vallejo both finished on 2/6.

The European Club Cup was won pretty easily by the super star team SOCAR Azerbaijan with Mamedyarov, Topalov, Adams, Giri, Wang Hao, Radjabov, Korobov and Safarli, with a perfect score of 7/7. The second place went to the team of G-Team Novy Bor with a very good score of 6/7 and the 3rd place to Malakhov with 5.5/7.

The next week will be a bit of a silent one, with only the Baku Open under way.

Of course in the current issue we are focusing our attention on the chess action from Bilbao! Enjoy!

GM Arkadij Naiditsch
Best rating: 2737

After a very sharp middle game, White manages to get a stable advantage and got the game into a clearly better queen endgame where he finds a great winning plan-to go with his king all the way to e7, which supports the movement of the passed d-pawn and also creates some threats around the black king. A very nice game to watch and learn from.

1.d4 ♘f6 2.c4 c5 It is usually very hard to guess the opening choice of Morozevich, who plays a lot of different lines.

3.d5 g6 So we are entering some sort of Benoni structures.

4.♘c3 ♗g7 5.e4 O-O 6.♘f3 What is nice about Topalov is that he is usually playing the main lines and is not afraid of anything. [6.e5 could also have been an option, but in such positions it is hard to say if an early pawn push is good or bad... 6...♗e8 7.f4 d6 and Black is launching fast play against the white central pawns.]

6...d6 We are back in the Benoni.

7.♗d3 [7.h3 Usually White is avoiding the Bg4 move.]

7...e6 Morozevich was probably thinking that White is going to play h3 next anyway. [7...♗g4 could maybe be a try for Black.]

8.O-O [8.h3 8...exd5 9.exd5 ♖e8+ 10.♗e3 ♗h6 11.O-O is considered to be the main line here.]

8...exd5 9.exd5 ♗g4 Of course, Black is using the moment and exchanging the bishop against the knight, which is usually the right choice in such pawn structures.

10.h3 ♗xf3 11.♖xf3 ♘bd7 12.♖d1 White's idea is to limit the black knights by playing f4 and g4, thus gaining some more space and Black should be looking for active and fast counterplay.

12...h5 Very aggressive play by Morozevich. Black could also have considered the plan with Ne8-Nc7-f5 and then to prepare a6 and b5.

13. ♖e4 ♜e5 Black wants to play Bf4 next

14. f4

14...f5 As we can see, the game is very sharp. [14...♗d4+ 15.♖h2 f5 (15...♗df6 16.♗g5!± with the idea Nf3.; 15...♞e7 16.g4 ♗hf6 (16...♗g7 17.f5!) 17.♗g3+=) 16.♗g5 ♗df6 17.♗f3± (But not 17.♗e6?! 17...♗g4+! 18.♞xg4 fxg4 19.♗xd8 g3+ 20.♖h1 ♞axd8∞)]

15.fxe5 is the most concrete move. [15.♗g5 15...♗xf4 16.♗xf4 ♗xf4 17.♗e6 ♗e3+ 18.♖h1 ♞h4 19.♗xf8 ♞xf8± with more than just compensation.]

15...fxe4 16.♞xf8+ ♞xf8 It is clear that White can't be worse here, but whether the position is better is still unclear. The black knight could become quite dangerous and for the moment Black also has the f-file.

17.e6! seems to be the very right decision. White wants to play with the dark squared bishop against the knight, which makes the pawns on d6 and c5 potential targets.

17...exd3 Black doesn't find anything better.

18.exd7 ♞f5

19.g4 White continues playing very dynamic chess.

19...♞xd7 [19...♞e4 20.gxh5 ♞f8 with the idea of looking for perpetual check. 21.d8=♞! ♞d4+ (21...♞xd8 22.♗h6+—) 22.♖h1 ♞e4+ 23.♖h2 ♞e5+ 24.♖g2 ♞e4+ 25.♖g3 ♞e5+

26.♖h4! and the white king escapes from the checks! 26...♞e4+ 27.♞g4 ♞e1+ 28.♞g3 ♞e4+ 29.♗f4+—]

20.♞xd3 [20.gxh5 20...♞xh3 21.♞e1 ♞g4+ 22.♖h2 ♞f8 23.♗d2 (23.♞e6+ 23...♞xe6 24.dxe6 ♞f1—) 23...♞xh5+ 24.♖g2 ♞g4+=]

20...♗f6 It is still not that easy to prove White's advantage.

21. ♔f3! A very strong move. Before getting the bishop on c3, White is securing the kingside from all the tricks with Nxg4 and as well stopping Black from playing Rf8.

21... ♖g7 [21... ♖f8 22. ♗h6 ♖f7 23. ♖e1 and Black is paralyzed.]

22. ♗d2 [22. ♗f4 22... ♖e8 (22... ♗d7 23. ♗xd6 ♖xb2 24. ♖f1±) 23. ♖f1 (23. ♗xd6?! 23... ♗e4⇒) 23... ♗e4

24. ♗h6! ♖e7 25. ♔g2 It looks like Black will be in zugzwang soon, after Kh8 White will play the decisive Qf7 and in case Black will for example play Rd8 then Re1 with the idea Bf4-Bxd6 leaves White a pawn up.]

22... ♗d7 23. ♗c3 ♗e5 Black had an interesting alternative: [23... ♖f8!? 24. ♖e4 (24. ♖e2 24... ♖f7 25. ♖e1 ♖f4 26. ♔g2 ♗e5 27. ♗xe5 dxe5) 24... ♖f7 25. ♖e6 ♖xe6 26. dxe6 ♗b6 (26... ♗e5 27. ♗xe5 dxe5 28. ♖d1 ♖e8 29. ♖d6 ♖e7 30. ♔f2±) 27. ♖d1 ♗xc4

28. b3 ♗a3! 29. ♗b2 ♗b5 30. a4 ♗d4 31. ♗xd4 cxd4 32. ♖xd4 ♖f3 33. ♖xd6 ♔f8 with good drawing chances.]

24. ♖e4 Now things are getting more clear. White has a solid positional advantage.

24... ♖f8

25. ♖f1! This is also the right decision. Topalov is aiming for a queen endgame which promises him good winning chances.

25... ♖e7 26. ♖xf8+ ♔xf8 27. ♗xe5 dxe5 White has reached the most he could get out of the position. What can be the next plan?!

28. ♖e3! A great move! White frees the e4 square for his king!

28... ♖d6 [28... e4 29. ♖f4+ ♔g7 30. g5 e3 31. ♔f1! e2+ 32. ♔e1±; 28... b6 29. ♔g2 ♖f6 30. ♖f3! +–]

29.♔g2 and the white king is coming!

29...♔g8 30.♔f3 It is really a bad luck for Black that it is even hard to find any counterplay.

30...♖a6 31.♔e4! The best move once again! Probably 31.Qxc5 would also bring White very good winning chances, but Topalov's 31.Ke4 is much more accurate. All White needs is his d-pawn...

31...♖xc4+ 32.♔xe5 ♖xa2 [32...♔f7 33.♔d6+--]

33.♔e6! Topalov first puts his king to a perfect position and prepares to combine the mating threats to the black king with the promotion of the d-pawn. Black's position is hopeless.

33...♖xb2 34.♖f3 Qf7-Qf8 mate is a dangerous threat! :)

34...♔g7 35.g5 and there is no defence against Qf7! What a great and clean win by Topalov. **1-0**

(2) **Bosboom, Manuel(2424)** - **Leko, Peter(2734) [A14]**

30th ECC Open 2014(1.3),
2014.09.14

GM Arkadij Naiditsch
Best rating: 2737

Peter Leko has been a top player for almost 20 years and has even been the world number 2 for some time. What we know about Leko is famous, his super dry chess style with an attitude of "it is better to make 10 draws than to win 5 games and lose 5 games". To win a game against Leko is a really hard job, but not for the over 300 ELO lower rated Dutch player Bosboom apparently, who just destroyed Black's position already on move 20, so Leko had nothing else left than to resign on move 26. An amazing game!

1.c4 ♘f6 2.♘f3 e6 Leko is choosing to play his main repertoire.

3.g3 d5 4.♘g2 ♘e7 5.O-O O-O So we are in the Catalan. Leko has huge experience here with both colors.

6.♖c2 A rare move, of course the main is 6.d4.

6...b6?! What a strange decision. Why not just play 6...c5 or 6...d4?

7.cxd5! A good choice.

7...♘xd5 It would still maybe have been better to play 7...exd5 even here and the position would be close to equal. [7...exd5 8.d4 ♙b7 9.♘c3 ♘a6 10.♖d1 ♗e8 11.♘e5 c5 with typical play.]

8.a3 Another very good move by White. Bosboom is preparing to strike with the e4 move and Black's position is already quite dangerous.

8...♙b7 9.d4 Now the question is how to defend from the upcoming e4? Maybe there is just no way anymore...

9...♘f6 [9...c5!? 10.dxc5 (10.e4 10...♘f6) 10...♘d7!? is an interesting idea to get active play. (10...♙xc5 11.♘g5 g6 12.♘e4 ♙e7 13.♙h6†) 11.cxb6 (11.c6 11...♖c8 12.♘d4 ♘b8=) 11...♙xb6=]

10.♘c3 It is impossible to stop White from playing e4.

10...c5 A typical move, but it is coming just one move too late... [10...♘bd7 11.e4 c5 12.dxc5 (12.d5 12...exd5 13.exd5 ♘xd5 14.♘xd5 ♙xd5 15.♖d1 ♙e6 16.♘e5 ♘xe5! 17.♖xd8 ♗axd8=) 12...♘xc5 13.♖d1 ♙c8 14.♘d4+= with a typical slightly better position for White.]

11.dxc5! White's play is perfect again. There is no reason to wait for Black to play cxd4.

11...bxc5 [11...♙xc5 12.♖d1 ♘bd7 13.♙f4+=]

12.♖d1 White is gaining control over the d-file, which can't be bad...

12...♙b6 13.♙g5 Once again Bosboom is taking a good decision. White not only wants to push e4-e5 at some point, but he is also maybe preparing Bxf6 and Ne4, with big positional pressure, and Nbd7 is never possible because of Rxd7. Black's position is already on the verge.

13...♖c8 14.♖ac1 Maybe this was a bit unnecessary. 14.e4 looks very nice. [14.e4 14...♘c6!? 15.e5

15...♘d4! 16.♘xd4 cxd4 17.♙xb7 ♙xb7 18.♖xd4 (18.exf6

18...gxf6) 18...♘d5 19.♙xe7 ♘xc3 20.bxc3 ♖xe7 with maybe good practical chances for a draw.]

14...♘a6 15.e4 Here comes the attack!

15...♙f8 16.♙xf6 gxf6

17.e5! White starts crushing Black's position.

17...♙g7 [17...f5 18.g4!→]

18.♖d6 ♖c7 19.♖cd1 What a great domination of the white pieces. Not only is Black's king in potential danger, but the domination on the d-file could also already be a reason to be in trouble.

19...♖d8 20.♘b5 White is on the winning march!

20...♖a5

21.♘g5! White is just playing a perfect game!

21...♖xd6 22.♖xh7+ ♔f8 23.♘xd6 Too many black pieces are hanging. The game is totally over.

23...fxg5 [23...♙xg2 24.exf6 ♙xf6 25.♖xf7#]

24.♙xb7 ♖d8 White is a pawn up and he has a deadly attack, so here even the 300 ELO points are not making any difference anymore.

25.♖h5! Wow, what a nice finish. White is preparing something special for Black...

25...♖d7 There was no other way to protect the f7 pawn and now White plays [25...♖c7 26.♙xa6 ♙xe5 27.♘e4+- and the rook is protected.]

26.♘c4 Black is losing a full piece! We just saw a really amazing game by White, great play combined with nice positional moves and tactical ideas. I can't remember Leko losing a game like this. **1-0**

**(3) Ponomariov, Ruslan(2717)
- Vallejo Pons, Francisco(2712)
[B90]**

7th Grand Slam Masters(3),
2014.09.16

GM Csaba Balogh
Best rating: 2672

Ponomariov started the event with two losses, but he managed to strike back with a very nice game.

1.e4 c5 2.♘f3 d6 3.d4 cxd4 4.♘xd4 ♘f6 5.♘c3 a6 It is quite impossible to predict Vallejo's opening choice. This time he went for the Sicilian Najdorf and Ponomariov plays one of the most popular lines against it.

6.h3 Black has plenty of setups as well, Vallejo goes for one which was recently employed by Topalov and Cheparinov.

6...e6 7.g4 ♘e7 8.♘g2 ♘fd7

9.♘ce2 A novelty right in the 9th move, with a completely new idea behind it. White wants to castle kingside and intends to lead an attack with f4-f5. The e2 knight might effectively join the attack later through f4 or g3-h5. [9.♘e3 was played mainly before, followed by Qe2 and 0-0-0, but Black was doing well in the most recent games. It is not a surprise that White was

looking for something different.]

9...♘c6 10.c3 Preparing to take back with the pawn on d4 to strengthen the center. In general the idea of such retreats like Nce2 is to occupy the center and build up a hedgehog structure with c4, but here White has already showed his intentions with g4, that he is going to play on the kingside, therefore it is more logical to keep the queenside closed with c3.

10...h5 A blunder! Vallejo knows that Ponomariov was going to castle kingside and he wanted to scare him by opening the h-file. However, he misses a nice tactical idea... [Black could have played 10...O-O 11.O-O ♔c7 12.f4 with mutual chances, although I believe White's play is easier.]

11.gxh5 ♖xh5 Otherwise White protects his extra pawn with Ng3.

12.♘xc6! In general such captures on c6, improving Black's pawn structure by bringing one pawn towards the center, don't come into consideration but chess is a concrete game...

12...bxc6 13.♘d4! Vallejo has probably missed this double attack, otherwise he would never have played h5. The rook is forced to move into a very ugly place to avoid losing material.

13...♖c5 14.b4! Ponomariov sees the following pretty

combination and temporarily sacrifices a pawn.

14...♖xc3 [14...♖c4 is refuted by 15.♗f1! ♖xc3 16.♗b2 trapping the rook!]

15.♗b2 ♖c4

16.♘xe6! This knight sacrifice is the point behind the 14.b4 move. The knight cannot be captured because of forced mate...

16...♖b6 [16...fxe6 loses to 17.♖h5+ ♔f8 18.♖h8+ ♔f7 19.♖xg7+ ♔e8 20.♖g6+ ♔f8 21.♗g7+ ♔g8 22.♗h6+ ♔h8 23.♖g7#]

17.♗xg7+ ♔f8 White has won a pawn, but Black will most likely regain the material by taking on b4. It is more important that the black king became exposed and the b2 bishop together with the g7 knight and the queen, which soon comes to the game through h5 or d2-h6, are able to create decisive threats.

18.0-0! Ponomariov does not waste time on protecting the b4 pawn. 18.a3 could have been met by a5 anyway. White rather hurries to secure the safety of his king and focuses his forces on the attack.

18...♗e5 19.♗h5! is better than Nf5, as White keeps all the attacking pieces on the board.

19...♖xb4 [19...♖xb4 was also bad in view of 20.♗c3 ♖c4 21.♖d2 with a very strong attack.]

20.♖b1 The material is balanced again, but White improves some of his pieces with tempo by attacking the black queen.

20...♖c5

21.♗h1! With the idea to attack with f4-f5 or Qd2-h6. [21.♖d2 was premature in view of 21...♗g5! and Qxg5 drops the queen because of Nf3! After 21.Kh1, Black does not have such defensive ideas.]

21...♗g6 [Black cannot exert pressure on the b-file with 21...♖b8 22.f4 ♖cb4 because White simply leaves with tempo: 23.♖c1 and then moves the bishop away and continues attacking.]

22.♗f6! At first sight this move is wrong because it allows Nf4 or Nh4, but Ponomariov has prepared some tactical ideas against these moves and otherwise the knight perfectly supports the attack from f6. 22.f4 Nh4 would have been unclear, that was the point of 21...Ng6.

22...♖b8 Trying to trade some pieces or sacrificing on b2. [22...♗h4 loses to 23.♖d2! and Black has no adequate defense against Qh6. 23...♗xf6 24.♗xf6 ♗xg2 leads to forced mate after 25.♖h6+ ♔e8 26.♖h8+ ♔d7 27.♖d8+ ♔e6]

28. ♖e7#; 22... ♘f4 also loses to 23. ♖d2!+- and mate on h6!, while Qg5 loses to Nh7!]

23. ♖d2 White follows his standard plan and it is also good enough. [However it was even stronger and nicer to play 23. ♘c1!! White wins material in view of 23... ♖xb1 (23... ♘xf6 24. ♖xb8+-) 24. ♘h6#]

23... ♘xf6 24. ♘xf6 The black king becomes even more exposed after giving up the dark squared bishop, but there was nothing better as Black had to eliminate the f6 knight to avoid getting mated.

24... ♖b5 Black tries to avoid getting into trouble along the b-file, but it allows White to keep one more attacking piece. [24... ♖xb1 25. ♖xb1 and Rb8 should be also decisive.]

25. ♖bd1! The last strong move and the game is over. The d6 pawn is under attack, after which a decisive check on d8 is inevitable. Vallejo commits a kind of suicide with his next move, but his situation was already hopeless.

25... d5 Black himself opens the center, when his king intends to move to e8 from the check on h6.

26. ♖h6+ ♔e8 27. exd5 cxd5 Almost all the moves are winning now. Ponomarev has a pleasant choice.

28. ♖fe1+ ♔d7 [28... ♘e6 29. ♖xe6+ fxe6 30. ♖xg6+-]

29. ♖g7 ♖f8 30. ♘xd5 ♖xd5 31. ♖xd5+ ♔c7 32. ♘e5+ ♔c6 33. ♖xf8 Black resigned as Rd8 wins another piece. This Nce2 plan is a very interesting idea and it requires further testing. Vallejo's attempt to counter it with h5 was nicely refuted tactically. **1-0**

(4) Grischuk, Alexander(2789) - Rodshtein, Maxim(2678) [A07]

ECC Open(3),
2014.09.16

GM Csaba Balogh
Best rating: 2672

A very unusual and brilliant game was played by Grischuk.

1.♘f3 d5 2.g3 Rodshtein is a very good theoretician, he is one of the main seconds of Gelfand and Aronian since a very long while. Grischuk cleverly decides to lead the game to less explored territories and he plays the Reti opening.

2...c6 3.♗g2 ♕f5 4.c4 dxc4 This is a new direction. Just a few games have been played so far, with excellent results for Black.

5.♘a3 This is the way how White needs to regain the material and the trade should be in his favor, as Black has given up his strong center. However, there is a tactical point behind 4...dxc4.

5...e5!? Black wants to build a different kind of strong center.

6.♘xc4 [The point behind the whole idea is 6.♘xe5?? loses a piece to 6...♗xa3 7.bxa3 ♔d4—+ and the double attack wins.]

6...e4

7.♘fe5! This is the novelty, which seems to be a very strong one and it causes problems for Black. We can be sure that Grischuk was well prepared for this move. Nobody dared to jump to the center before, because the knight seems to get trapped after f6, but White always has some resource to save it. [Just a day before our game another battle between two GMs continued with 7.♘h4 7...♗e6 8.♘e3 ♘f6 The knight is misplaced on h4. 9.f3 White naturally tries to bring back the knight to the game. Black finds a spectacular way to continue: 9...♗c5 10.♘hf5 O-O 11.fxe4 g6 12.♔c2 ♘bd7 13.♘h4 ♗xe3 14.dxe3 ♘g4

With an unusual pawn structure. Black must be completely fine here, as the tripled pawns and the e5 square compensate for the small material deficit. Teterev-Matlakov, ECC 2014.]

7...♔c7 Black tries to play against the knights, as they are pinned together, but the queen soon turns out to be misplaced on c7. I did not find equality after other moves neither. [In case of 7...f6 White always wants to save his knight with 8.♘e3! freeing the c4 square for the other knight and the f6 move turns out to be a big weakening in Black's camp. 8...♙e6 9.♘5c4 f5 Black is completely undeveloped, White can launch a quick attack with 10.d3! exd3 11.O-O! The e-file is going to open and the rook will create serious problems for Black.; On 7...♙e6 Grischuk had probably prepared 8.♔c2! with the idea 8...f6 9.♘g4! saving the knight in a different way. The f6 move is a weakening again. Bxg4 drops a pawn after Qxe4 and taking the bishop next.]

8.d4! White not only ensures his knight in the center, but also prepares to develop his bishop to f4 with a very unpleasant tempo.

8...f6 Black is already forced to do something concrete, otherwise he simply ends up in a bad position after Bf4. [8...exd3 9.♘xd3 The big lead in development guarantees White an advantage.]

9.♘e3! White uses the same intermediate move to save his knight.

9...♙e6 10.♘5c4 f5 11.O-O ♘f6

If Black manages to finish the development with Be7 and O-O, he might solve his opening problems and the d5 square could be a big triumph for him in the future. Grischuk plays very principled chess. He undermines the e4 pawn, opens the diagonal for his fianchettoed bishop and wants to make use of the situation of the black king, which needs some moves to get into safety.

12.f3! exf3 13.♔xf3!? Grischuk was already planning the following fantastic tactical breaks. [White could also have gotten an advantage if he handled the position in a positional manner: 13.♙xf3 13...♘bd7 14.♔d3! g6 15.♘g2! This is the key idea if White takes back on f3 with the bishop! Bf4 is coming next move and Black faces serious difficulties.]

13...g6 Black tries to strengthen his weakness on f5, but it further delays the development with one tempo. [In case of 13...♘bd7 Grischuk had planned the following tempting exchange sacrifice:

14.♔xf5!! ♙xf5 15.♘xf5± and Bf4 followed by Nd6 check, or just e4-e5 swaps away Black from the board.]

14.g4! The most direct move, following the same principle to open the position on the black king which is stuck in the center. However the move required a lot of calculations, which was impossible to do because the position is too complex and there are no forced lines. The intuition plays a much bigger role at finding such moves!

14...f4 [14...fxg4 would have been met by 15.fxg4 fxg4 (15...xc4 16.f4 d6 17.Re3+ c8d8 18.d5+- The situation of the king on d8 cannot lead to anything good. White soon opens the center with d5 and Black should quickly collapse.) 16.Re3! Quite an unusual way to increase the pressure. 16...d7 17.b3 e7 18.d6+- Black collapses again.; Perhaps the best response would have been 14...bd7 15.gxf5 gxf5 16.c2 O-O-O 17.fxf5 White has an extra pawn and a clear advantage, but Black might hope for counterplay on the g-file after Nh5, preventing Bf4.]

15.g5! Another difficult move to find, which required again some precise calculations and a lot of intuition. [A strong alternative was 15.fxf4! 15...xf4 16.d5! A beautiful motif. The queen is trapped! Black can get 3 pieces for it with 16...xd5 17.fxf4 fxf4 but after 18.b3! Black is too much behind in development. White will be able to get a decisive advantage by playing the most direct and energetic moves.]

15...h5 At first sight Black is fine. He managed to consolidate his f5 weakness and both white knights are hanging. There is no way back for Grischuk, he must follow the plan he has started with 12.f3 and keep on opening the position to create decisive threats against the e8 king.

16.d5! cxd5 17.fxd5 Black has different ways to win a piece, but all of them are bad.

17...c5+ [17...xc4 loses to 18.c3 c5+ 19.e3! This is the best, otherwise Black would have the option to play Qd4! 19...fxe3 The queen is not hanging because of the e2 threat. But White has the very strong 20.fxe3! fxe3+ 21.h1! d4 22.c7+ f7 23.fxe6 fxd1+ (23...xe6 24.f3+- will end up badly for Black with such a king.) 24.fxd1 xe6 25.fxe3+ Even without the queens, White is mating with his remaining pieces. The black pieces are unable to participate in the defense. 25...f5 (25...f7 26.f1+-)]

forced line: 22. ♖f6+ 22... ♔e7 23. ♚xd6+ ♔xd6 24. ♖d1+ ♔e7 25. ♖d7+! ♔f8 26. ♖xe6+- and mate is coming soon. Just brilliant play by Grischuk!] **1-0**

26. ♖d5+ ♔g4 27. h3+ ♔h4 28. ♖e4+ ♔g3 29. ♖d3+ ♔f2 30. ♖f3#]

18. ♖ce3! fxe3 [A better try would have been 18... ♕g7 trying to castle as quickly as possible, but White wins here as well after 19. b4! ♖d4 (If 19... ♖c8 20. ♕a3! threatening with Rc1. Black cannot castle because of Ne7! 20... ♕xa1 21. ♖xa1 and Qe5 wins next move!) 20. ♖xd4 ♕xd4 21. ♖xf4! ♖xf4 (21... ♕xa1 22. ♖xe6+- Somehow, Black is unable to consolidate. His pieces are just too bad.) 22. ♖xf4 ♕xa1 23. ♕xb7+- winning back the rook and keeping the decisive advantage.]

19. b4! [Actually 19. ♕xe3 19... ♖d6 20. ♕d4 was also winning, but the text move was even better.]

19... ♖d6 [19... ♖c8 loses quickly to 20. ♕b2 ♕g7 21. ♕xg7 ♖xg7 22. ♖d4+-]

20. ♖xe3! Grischuk once again finds the most precise move to continue the attack. White is threatening to win the queen with Rxe6 Qxe6Nc7! [20. ♕b2 was tempting, but it allows some counterchances after 20... ♖c6! 21. ♕xh8 O-O-O Black continues resisting.]

20... ♖a6 21. ♕b2 With the knight on a6, Black cannot castle queenside as it would drop his queen after Rc1 Kb8 Be5.

21... ♕g7 22. ♖f6+! [Black resigned in view of the following

Endgame section

(15) Topalov, Veselin(2784)
- Grischuk, Alexander(2789)

30th ECC Open 2014(6.1),
2014.09.19

GM Arkadij Naiditsch
Best rating: 2737

Topalov was pushing all game long. After the opening Grischuk quickly got a worse position and it seemed like it would be difficult for Black to survive until move 40, but the Russian kept on fighting, so we finally reached this endgame. White is a piece up, but it is all about whether White can promote the d-pawn or not. Black's a- and g- pawns could become fast runners too.

53. ♖f3 A very strong and logical move. White is transferring his bishop to d5, a central position from where it can control the a2 and the g2 squares to be able to stop both black pawns.

53...a4 Black has to push the pawns...

54. ♗d5+ ♔f6 The bishop is perfectly placed, so it is time to get the b7 knight into the game.

55. ♖c5 ♗b5 The only move.

56. ♗e4+ White continues to play very well, now Black needs to decide to give a pawn or to let the white king into the central square.

56...♔f5 [Not better was 56...♔g6 57.♔e5 followed by Nf6 and d7 and Black is clearly not in time to be fast enough with the g-pawn.]

57. ♗xf7 g4 58. ♗d5 White's position already looks very promising, but some accuracy is still needed.

58...a3 [58...♔f4 was also losing since after 59. ♗f6 White is just going for the g-pawn. 59...g3 60.d7 ♗xd7 61. ♗xd7 The black king on f4 is terribly placed and can't cross the 4th rank. 61...a3 62. ♗c5 a2 63. ♗b3 The white knight stops the a-pawn and the bishop the g-pawn, so all White needs to do next is to bring his king to g1 and take the a-pawn and then the g-pawn, so the position is easily winning.]

59. ♗g3+ is still not a mistake.

59...♔f4

60. ♖e4?? After this move the position might be already be a draw. What a horrible error when the win was so close... [60. ♖e2+ was winning. 60... ♔f5 61. ♔c5 All moves are coming with tempo and the white knight is going for the a-pawn. 61... ♕d7 62. ♖d4+ ♔e5 63. ♖c2 The a-pawn is falling, so the game is over.]

60...g3! Of course Grischuk is taking his chance!

61. ♖c3 ♔f5! This is clearly the move that White missed when he played 60. Ne4??. White can't win any material now.

62. ♕e4+ [62. ♖xb5?? 62...g2 63. ♕xg2 a2 followed by a1Q.]

62...♔e6 63. ♕g2 ♕d7

64. ♔c5 The d6 pawn needs to be protected.

64...♔e5 Now the question is how to improve White's position next.

65. ♕d5 ♕e6 66. ♕c6 ♕d7 67. ♕h1 ♕e8 68. ♖a2 ♕d7 Black just keeps on moving with the bishop.

69. ♖b4 ♕e8 70. ♕d5 ♕d7 71. ♖d3+ ♔f6 g2 is a threat now.

72. ♖b4 No, Topalov can't find anything...

72...♔e5 73. ♖d3+ ♔f6 74. ♖b4 ♔e5 It is amazing , but this position might just be a miracle draw! What bad luck for the Bulgarian player when the win was so close! **1/2-1/2**

(16) Sandipan, Chanda(2619)
- Frischmann, Rick(2254)

ECC Open, 2014.09.14

GM Csaba Balogh
Best rating: 2672

A shocking endgame, where the white player with almost 400 rating points more and an extra pawn is going to lose. We must add that this endgame should be objectively drawn even if White simplifies with trading the h6 pawn for the one on e5. Sooner or later White should advance his pawns in order to make progress, but this will expose the king and Black will hold the draw by giving checks.

42.e6!? A clever attempt to break the pawn chain after fxe6 Qxh6, but unfortunately for White, Black can trade the queens and the arising pawn endgame is drawish.

42...♔xe6! 43.♔xe6 fxe6 44.♔f4 Such endgames could be easily winning sometimes. White has the more active king and the better pawn structure.

44...g5+! The only move to hold! It is very important to fix the pawns on h3 and f2 or f3 to avoid getting into zugzwang by using these tempi with the pawns. [We can see the importance of the 44...g5 move in the 44...♔f7 line. Black might get into trouble after 45.h4! ♔f6 46.g5+ hxg5+ 47.hxg5+ ♔f7 48.♔e5 ♔e7 49.f4+- and Kf6 or Kd6 wins next.]

45.♔e5 ♔f7 46.♔d6 The only move to continue playing for the win. [46.f3 46...♔e7 is an easy draw.]

46...♔f6

47.♔c7?? After this terrible blunder, White is losing. Sandipan was playing for some kind of zugzwang and he clearly miscalculated something... [The game was drawn after 47.♔d7 47...♔f7 48.f3 with the idea to set Black into zugzwang and invade with the king, but Black holds after 48...♔f6]

49.♔d6 White must retreat. (Because 49.♔e8? loses to 49...♕e5 50.♔f7 ♕f4 and Black is faster.) 49...♕f7=]

47...♕e5! [The point of Kc7 was to meet 47...♔e7? with 48.♔c6 ♕f6 49.♔d6 ♕f7 50.♔d7 ♕f6 51.♔e8 and in comparison to the 47.Kd7 line, the pawn is still on f2 which turns out to be a decisive tempo. 51...♕e5 52.♔e7 ♕f4 53.♕xe6 ♕f3 54.♔f5 ♕xf2 55.♕g6+- This time White grabs the pawns first.]

48.♔d7 ♕d5! Probably White forgot about this move in his previous calculations. Black advances his pawn to e5 first and only then he goes for the f2 pawn. This wins a significant tempo!

49.♔e7 e5! 50.♔f6 ♕e4 51.♔g6 [51.♔e6 does not change anything, Black wins after 51...♕f3 52.♕xe5 ♕xf2 53.♔f5 ♕g3-+]

51...♕f3 52.♕xh6 ♕xf2 53.♕xg5 e4 And Black is faster!

54.♔f6 e3 55.g5 e2 56.g6 e1=♔ 57.g7 ♔e8 58.h4 ♔g3 59.h5 ♔g4 60.h6 ♔h5 [White resigned in view of 60...♔h5 61.h7 ♔g6+-+ In all the pawn endgames, calculation plays the most important role. White was too optimistic about his position and after blundering the 48...Kd5! resource, the loss was already inevitable.] **0-1**

Clash of the Titans

URS-ch20 playoff-1pl(4), 1952

GM Kamil Miton
Best rating: 2655

1.d4 ♘f6 2.c4 e6 3.♘c3 ♙b4 4.e3 ♘c6 A rare move. Usually Black plays 4... 0-0 with the idea to fight for the center after d5-c5.

5.♘e2 d5 6.a3

6...♙e7 [6...♙d6 7.cxd5 (7.c5 7...♙e7 8.b4∞ and is not clear if White takes more space or Black will get counterplay after e5.) 7...exd5 8.g3 ♘e7 9.♘b5 (9.♙g2 9...0-0 10.0-0 ♖e8 11.f3 c5↔ A typical move which prevents the plan with e4.) 9...0-0 10.♘xd6 ♔xd6 11.♙g2 a5 12.a4 ♙f5 13.f3 ♖fe8 14.0-0∞wit hg4 next and White has chances to get an advantage.]

7.cxd5 exd5 8.♘f4 0-0 [8...♙f5?! 9.♖b3 ♘a5 10.♔a4+ c6 11.♙d2± and Black has problems with the knight.]

9.♙e2 [9.♙d3 looks more active. 9...♘b8! Black needs to lose some time to improve his knight, but this is the best way to play. 10.0-0 (10.h3 10...c6 11.g4∞) 10...c6 11.b4 ♘bd7 12.b5! with the idea to create a weakness and activate the bishop from c1.]

9...♙f5?! In my opinion Black should improve the knight. [9...♘b8 10.0-0 (10.g4!?) 10...c6 White has the better development but very bad pieces, which usually are placed differently. 11.♙f3 (11.♘d3 11...♘bd7 12.♙d2 ♖e8 13.b4∞) 11...♘bd7 12.e4 dxe4 13.♘xe4 ♘xe4 14.♙xe4 ♘f6 15.♙f3 ♙d6 Black is doing well.]

10.g4! ♙e6 11.♘xe6 [White could not hurry with the exchanges and simply take space on the kingside after 11.h4!]

11...fxe6 12.0-0 [12.g5 12...♘e8 13.h4 ♘d6 14.♙d2 with the idea to try and castle queenside.]

12...♔d7 [12...e5? 13.dxe5 ♘xe5 14.g5+—]

13.f4

13...♞d8! A good move with the idea to improve the knight and keep the possibility to play over c5.

14.♙d3 ♞f7 [14...c5 15.g5 ♞e8 16.dxc5 ♙xc5 17.b4 ♙b6 18.♞a4!↑ and Black is not on time with counterplay. White wants take on b6 and activate his second bishop over b2.]

15.b4! Preventing c5 and preparing the rook transfer over the second rank.

15...a5 16.b5 ♞d6 A very good place for the knight, from where it fights for the important squares b5, c4, e4 and f5.

17.♞f3 a4 18.♞a2 c6 Black is looking for counterplay but it was more accurate to secure the position on the kingside. [18...g6 19.♞g2 ♞f7 20.f5∞]

19.bxc6 ♞xc6 20.♞c2 ♞d7 21.g5 ♞fe8 [21...♞fe4!? is an interesting idea. 22.♙xe4 (22.♞xe4 22...dxe4 23.♙xe4 ♙xg5∞) 22...dxe4 23.♞xe4 ♞xe4 24.♞xe4 ♞ac8↔ Black has compensation thanks to the weak light squares and the a3 pawn.]

22.♙xh7+! No choice! Otherwise Black would take full control of the game after playing g6.

22...♞xh7 23.♞h3+ ♞g8 24.♞xd5 [24.g6 24...♞f6—+]

24...♙d8 25.g6 ♞f6 26.♞xf6+ gxf6 After a few forced moves we have the first critical moment.

27.g7?? What an amazing blunder! White should have started with [27.♞g2! 27...♞e8 28.g7 ♞f7 29.♞f3 White is preparing to mate over the h-file. 29...♞c8 Black needs to hurry with counterplay! 30.♙b2

30...♖c7!! A fantastic move! The most accurate square for the rook, Black is preapring Qc8 (with the idea Rc1) and at the same time (after Qc8) preventing White's idea of playing Qh8 -Nxh8- gxh8Q -Kxh8- Rh3-Rh7!! 31.♙h4 ♕c8 (31...f5 32.♙h5) 32.♖h3 ♖c1+ 33.♗xc1 ♙xc1+ 34.♚f2 ♙c2+↗]

27...♖e8?? Both players didn't realize that the g7 pawn can simply be captured! [27...♙xg7! and there is no mate! Black will escape! 28.♙h5 (28.♖g2+ 28...♙f7) 28...♖f7]

28.♙h8+ ♙f7 29.♙h5+ ♙g8 [29...♙e7 30.♙h7+—]

30.♖g2 ♘f7 31.♖f3+— Now White is simply wining...

Editorial Preface

After a very turbulent last week with the European Club Cup and the Bilbao Masters, we are in a calm week of chess.

In the Baku Open, where a lot of 2600+ players are participating, Ernesto Inarkiev is leading with 5/6, followed by a lot of players on 4.5/6, such as Areschenko, Artemiev, Lupulescu, Krasenkow and many more.

15 The Tseshkovsky Memorial was convincingly won by Baadur Jobava with a great 7.5/9, a full point ahead of 5 other players.

18 The World Youth Championship is also under way in Durban, South Africa, but it is pity to see that almost none of the leading young chess stars are participating in it. All in all, Indian chess kids are dominating a lot of age groups, followed by Russians, so there are no big changes in comparison to previous years.

25 For next week we can already be very excited about the start of the Grand Prix series in Baku, Azerbaidjan.

As usual we hope you enjoy the best games of the week selected by your 2 commentators!

Arkadij Naiditsch & Csaba Balogh

Best rating: 2737

We are going to see a typical Sicilian game: fight, fight fight. In the beginning of the game White picks a rare line and gets immediately countered in the center, after which in a complicated position White is starting to go wrong. Black is ending the game with a beautiful combination!

1.e4 c5 2.♘f3 e6 In open tournaments we see openings like the Paulsen much more often than in round robin top events. The simple reason is that you really need to win some games to get the chance to take some price.

3.d4 cxd4 4.♘xd4 ♘f6 So no Paulsen, which usually starts with 4...a6 or sometimes 4... Nc6, which actually I don't count as Paulsen! :)

5.♘c3 d6 This is a clear line for "let's play!".

6.♗e3 [6.g4 should clearly be the main line here, which counts as quite dangerous for Black.]

6...a6 and we are back in the main position of the Sheveningen/Najdorf.

7.♗e2 is one of the main moves. White prepares to castle kingside. The other two main moves are 7.f3 or 7.g4.

7...♔c7 Black has a lot of different move orders here.

8.g4 Quite a strange move! The combination of moves Be2-g4

rarely fits well together. It is clear that White wants to save some sort of tempo on playing f3 because of the future g5 and immediate f4, but Black also has different resources.

8...d5!? A very interesting reply and probably a preparation by Bukavshin.

9.exd5 White's move is forced.

9...♗b4 This was Black's idea. Actually this all looks quite strange to me. Black is giving up the very important dark squared bishop and doesn't have great development either... In my opinion Black should be risking more than it is possible to gain here.

10.dxe6 Another forced move as Black wanted to take on c3 followed by Nxd5.

10...♗xc3+ 11.bxc3 ♔xc3+ Using the fact that White has no other move than to play Kf1.

12.♔f1 fxe6 So let's take a fresh look at the position. The material is equal but things are looking very strange. White has the bishop pair and a better development, but the king on f1 is very badly placed. In case Black was in time to develop his pieces and play e5, White's position could become very bad, so White needs to act quickly.

13.♗f3?! White is trying to stop Black from playing Nd5, but

the bishop on f3 is taking a very bad position and after Nd5 the exchange is not so great for White in general. [After 13.♖b1 13...O-O 14.♔d3 ♔c7 Black's position seems to be promising because it is really hard for White to prevent the e5 move.; 13.g5 is premature since after 13...♘d5 Black is doing great.; The most logical move is probably 13.♙g2 13...O-O and now it is hard to say what to do next for White, a safe option is 14.♔d3 ♔xd3 15.cxd3 e5 16.♘f5 ♘c6 and the position is probably about equal, but White could still try to push for a win.]

13...O-O Black's king is safe, but White's one is not.

14.♙g2

14...♔c7 is a possible option, but somehow it looks a bit too slow. [Black could have started with 14...e5 15.♘f5 ♕xf5 16.gxf5 ♔c7 followed by Nc6 or e4. I think only Black can be better now.]

15.g5? This is already a serious mistake. Why push Black into playing Nd5? And of course White is making the bishop c8 a beast by giving him all the white squares. [15.♖b1 would lead to a complicated position now.]

15...♘d5 Of course!

16.♕xd5 exd5 So the position has changed a lot again! We still have equal material, but the position of the white king is

very open and Black's attack is only getting stronger because of the opposite colored bishops.

17.h4 Another very strange move by White. It seems like Shaposhnikov was not aware at all of what was going to happen to him already in couple of moves from now...

17...♘c6 A good choice. Black exchanges the strongest white piece, the knight d4, before starting the action on the kingside.

18.♗xc6 ♔xc6 18...bxc6 was also a good move.

19.♕d4 [19.♔d4 wasn't any better since after 19...♕f5 Black is going to be at least a full pawn up because the c2 pawn is lost.]

19...♖f4! A very nice move! Before playing Bf5, Black brings his rook into the attack and also frees the f8 square for the rook on a8 to join the action.

20.f3 The only move as Black was threatening to play Bg4.

20...♕f5 The c2 pawn is hanging.

21.c3 It seems like White is more or less solid, but in fact Black's attack is unstoppable.

21...♖f8 Black has a clear idea now: to put maximum pressure on the f3 pawn, for example by playing Bg6-Bh5 or maybe

Qg6-h6.

22. ♖e1 This move gives Black the chance to end the game with a beautiful combination! [22. ♖e2 22... ♖g6 and Black's position should just be crushing!]

22... ♗g4! Of course Black had a few moves which would give him great attacking chances, but why not end the game with a very nice piecesacrifice!?

23. fxf4 The only move.

23... ♖xg4+ 24. ♖h2 [24. ♖h3 24... ♖d7! and White is hopeless.]

24... ♖e4 What a nice plan by Black! After being so strong vertically, his rooks are now crushing horizontally.

25. ♖g3 ♖ff4 A beautiful move!

26. ♗f2 Once again White just has no choice, 26.Bf2 is the only move which defends from Rxh4.

26... ♖d6! This is the last pretty idea! By pinning the white king Black is threatening to play Rxh4 next again. The white king can never go to the g-file because of Rg4 and White would lose his queen, so the only thing left is to move to h3.

27. ♖h3 ♖e6+ The black queen is coming closer...

28. ♖h2 ♖e5 White resigned because of 29.Kh3 Qf5 and the game is over because of 30.Kh2 Rxf2. A very nice game by Black and actually an interesting idea with Qc7 and a fast d5!
0-1

(2) Salem, A.R. Saleh(2594) - Zhigalko, Sergei(2677) [E12]

Baku Open 2014(6.4),
2014.09.27

GM Arkadij Naiditsch
Best rating: 2737

Right from the opening the game is getting chaotic. Both sides are ready for a big fight! At first it looks like Black should be doing fine, but with a lot of tactics White is able to take over and convert his development advantage into a material one. A very interesting game is ahead of us...

1.d4 ♗f6 2.c4 e6 3. ♗f3 White decides not to enter the Nimzo with 3.Nc4 Bb4.

3...b6 This has been standing as a solid opening for at least the last 60 years!

4.a3 Of course moves like 4.g3 or 4.Nc3 are more popular, but 4.a3 also deserves a lot of attention, especially since in the latest games White is scoring very well with it.

4... ♗a6 is probably the main move. The idea of 4... Ba6 is simply that it is not that easy to defend the c4 pawn for White. 5.Nbd2 would block the bishop on c1 and the queen on c2 could not be in the best position.

5. ♖c2 ♗b7 Black lured the white queen to c2-the mission is done- so now it is time to place the bishop to b7.

6. ♗c3 c5 and that's the key: if the white queen was placed on d1, White would have the great d5 move, but now 7.d5 is connected to very complicated play because Black can just take twice on d5.

7.dxc5 This is nothing new either. Black wanted to play Bxf3 and win the d4 pawn so White takes on c5.

7...bxc5 8.♟f4 White is already preparing to put pressure on the d-file! Clearly Black wants to play d6 Nc6 or even try to play d5, so White has to get ready for the action in the middle. White's next move could be Rd1 or even 0-0-0.

8...♘h5 Black is asking White where he wants to put his bishop.

9.♟e3 The most logical move, but now e4 is never possible.

9...♟e7 Black is logically preparing to castle kingside.

10.g4!? White is starting the action. A more "silent" plan for White could have been with g3-Bg2 but probably Black should be doing fine after 0-0 and even f5-f4. Now things are quickly becoming very crazy.

10...♘f6 11.g5 ♘h5 The white pawn on g5 can of course be a weak one, but on the other hand it could be great to have it for the future because moves like Bf6 or Nf6 are possible anymore. [After 11...♘g4 12.♟f4 f6 13.g6 White should be clearly better.]

12.0-0-0 White needs to go "all or nothing"!

12...♟xf3 It is hard to blame Black for this logical move, but it seems like White is better after it. [I think Black should have continued with the more calm 12...O-O and now White has a lot of moves, but 13.♘e4 looks very tempting. 13...♚c7

White's position looks better, but things are unclear and Black is soon going to have his own play with Nc6-Rab8 on the white king.]

13.exf3 ♘c6 Black is trying to be fast with his play. [13...♟xg5?! 14.f4! White is just winning.]

14.f4 White wants to play Be2 next.

14...g6 Black is trying to be very solid by planning to play Ng7-Nf5 next. [14...♘d4 would be premature since after 15.♟xd4 cxd4 16.♚xd4 I can't see why Black should be fine here...]

15.♘e4 I think this move comes a bit too early. [Why not first play 15.♟g2 15...♚c8 and now maybe something like 16.♚d3 and it is going to be very difficult to castle for Black without losing the d7 pawn, so White should be clearly better here.]

15...♘d4! Zhigalko takes his chance to complicate matters.

16.♚c3 White can't take twice on d4 because the f4 pawn is hanging.

16...♚c7 is probably not the best. [Black could reach a very unclear position after 16...O-O 17.♘xc5 ♟xc5 18.♟xd4 ♚c8 White is a pawn up, but the king on c1 could be in trouble and the f4 pawn is also weak. I think the position is very unclear here.]

17. ♖xc5 Of course!

17... ♗xc5 18. ♗xd4 ♗xd4 [18... ♖xf4+ was losing since after 19. ♗e3 White is winning the rook on h8.]

19. ♖xd4 ♖xf4 [It was already too late to hope to be fine after 19...O-O 20. ♖d2 as White's Rd4-Qd2 are perfectly placed, so the pawn up gives White a clear advantage.]

20. ♖f3 As we can see the position is still very complicated.

20... ♗d5 is the only way to defend the rook on a8 and save the knight from f4.

21. ♖b1

21... ♖e5?! A very dangerous move without the chance to gain anything. [Safer was 21... ♗b6 but here after 22.h4 followed by h5 White's position is also looking better.]

22. ♖d3 is one of many good moves. [Another easy solution could have been 22. ♖e4 22... ♖f5 23. ♖xf5 gxf5 24. ♖d4 with a clearly better endgame for White.]

22... ♗f4 [After 22... ♗b6 23.f4 White is clearly better.]

23. ♖e3! A very nice move which puts Black into big trouble.

23... ♖f5+ [After 23... ♖xe3 24.fx3 ♗h5 25. ♗g2 White would be enjoying a fantastic endgame where the black knight on h5 is totally out of the game.]

24. ♖a1 The knight on f4 is hanging and can only be defended with the Black's next move.

24...e5 25. ♖e4 d6 What else to do?!

26.c5! White is crushing Black's position! If Black could manage to keep the pawn structure, of course the position would be at least equal, but it is just impossible to keep things together here.

26...O-O There was already nothing much else to do...

27.cxd6 ♗d5 [27... ♖ae8 28. ♗b5 and White's position seems to be winning.]

28. ♖e1 Cool and strong!

28... ♖ad8? This move loses on the spot. [Black could have fought harder after 28... ♖ab8 but of course White is much better after 29. ♗c4]

29. ♖xe5 Now the 2nd pawn is gone.

29... ♖f3 30. ♗e2 The knight on d5 is still hanging.

30... ♖b3 31. ♖d1! The last accurate move which forces the exchange of the queens and this decides the outcome of the game. All in all an interesting game and good play by White!
1-0

Best rating: 2672

Anand had a perfect warm-up tournament before his World Championship match. He won convincing games, such as this one.

1.d4 d5 2.c4 dxc4 The Queen's gambit accepted. Anand himself played it as Black some time ago.

3.e4 ♖c6 3...e5 and 3...Nf6 are more popular main lines nowadays, but the text move also has huge theory.

4.♟f3 ♟g4 5.d5 ♟e5 6.♟f4 ♟g6 7.♟e3 e5 8.♟xc4 ♟f6 9.♟c3 We are still at the beginning of this opening, with hundreds of games in the database.

9...a6 This is considered to be the best to avoid the trade of the light squared bishops after Bb5. [In case of 9...♟d6 10.♟b5+ ♟d7 11.♟xd7+ ♟xd7 12.O-O is very similar to the game.]

10.♟e2 Anand unpins himself and intends to improve his knight with Nd2-c4.

10...♟d6 11.♟d2

11...♟xe2 This is a positional mistake, after which White's game becomes very easy and comfortable. [All the experts of this variation play 11...♟d7 keeping the bishops and Black plays b5 next, followed by c6 undermining the center. 12.♟c4 is met by 12...♟b4 The e4 pawn is hanging and if White protects it, b5 works again sending back the knight and then c6 at some point.]

12.♟xe2 O-O 13.O-O White is ready to build a pleasant setup with Nc4, Rfd1, Rac1. The g3 move is always useful to neutralize the g6 knight. If Black does not succeed to free himself with c6, he must suffer long-term in a worse position with less space.

13...♟e7 [After the trade of the bishops, the move 13...b5 is rather a weakening. White could create some holes with 14.a4 b4 15.♟d1+= and the queenside pawns are vulnerable.]

14.♖fd1 Anand knows that Black should aim for the c6 undermining, therefore he prepares with his rook to the opening of the d-file.

14...♖ac8 [14...♗f4 with the idea to work out the e5 square for the minor pieces. But White is not forced to take. 15.♙f3 and g3 next, sending back the knight.]

15.g3 A very useful move to open the back rank and to paralyze the g6 knight.

15...h6 Black also spends a useful tempo before pushing c6. Vallejo was afraid of some Bg5 pins, after which the knight's jump to d5 could be very unpleasant.

16.♖ac1 c6 Black does not wait longer. [In case of 16...♖fd8 17.♗c4+ is better for White again. He might improve his position with grabbing some space on the queenside with a3-b4. Without the c6 move, Black cannot hope for equality, but in the game White was perfectly prepared to meet this break.]

17.♗c4 White prepares to land a piece on d5, with which he gives up his structural advantage, but his pieces are going to dominate the black ones.

17...cxd5 18.♗xd5 [18.♗b6!? was also good to have a knight on d5. Perhaps Anand wanted to avoid some kind of exchange sacrifice, like 18...♖xc3 19.bxc3 dxe4 but White is better after

20.♙c4 Nc8! is threatening.]

18...♗xd5 19.♖xd5 ♕c5 Less pieces, less problems, but it does not solve everything. The hole on d5 gives White a very pleasant initiative. [On 19...♖fd8 20.♖cd1 ♕c7 21.♕c5 ♙f6 22.♗e3+= keeps the advantage.]

20.♖cd1 ♕xe3 [Perhaps it was better to get rid of a pair of rooks with 20...b5 White needs his knight on e3 to stay ready to jump onto the holes f5 and d5. Therefore the right move is 21.♕xc5 ♖xc5 22.♗e3 ♖xd5 23.♖xd5! It is better to fight for the d-file and use the knight on the f5 square. Black cannot equalize with 23...♖d8 24.♗f5 ♙f6 because after 25.♙d3! ♖xd5 26.exd5!± a new problem arises. The d-passed pawn cannot be blockaded well.]

21.♗xe3 ♙b4 Vallejo realized that he is unable to neutralize the activity of the white pieces and he starts looking for counterplay.

22.♗f5 ♖c4 Black tries to provoke a serious f3 weakening, after which there is always hope for Black to get counterplay against the king. However Anand finds a nice way to push back the heavy pieces. [On 22...♙c4

the endgame would also yield an advantage, but it is much better to keep the queens on the board and play for more. 23.♙f3! ♙xa2 24.h4! with the threat of h5 and Qg4 or

the same with reversed move order. Black has no adequate defense.]

23. ♖d6! Protecting the e4 pawn with tempo.

23... ♖c6 24. a3 Sending the queen back to passivity to free the e4 pawn.

24... ♖b3 25. ♖5d3 ♖b6 26. ♖f5! The knight also returns to its initial place. In the last 3 moves, White has seemingly only retreated with his rook to d3 from a more active square, but actually he has done much more... Black is now left without any counterplay and he must think how he could defend against the deadly threat of h4-h5 and Qg4.

26... ♖e8 Black would like to get rid of the strong f5 knight with Ne7.

27. ♖d7! Simple prophylaxis against Ne7 and of course it is always useful to have a rook on the 7th rank. [27. ♖g4 27... ♖c2 Or; 27. h4 27... ♖e7 were less clear.]

27... ♖f6 [27... ♖c7 does not help. 28. ♖f3 attacking the f7 weakness and Nxe6 is threatening. 28... ♖e7 29. ♖1d6! sends the queen away from the 6th rank to create the following decisive mating idea: 29... ♖c5 30. ♖xe7+ ♖xe7 31. ♖d8+ ♖h7 32. ♖f5+ g6 33. ♖f6+-]

28. ♖g4! Black has no defense against the simple h4-h5.

28... ♖c6 [28... ♖xb2 29. h4+-; 28... ♖c8 29. h4 ♖c2 is met by 30. ♖f1! and h5 wins next move.]

29. h4 h5 A last try to trade the h-pawn for the one on e4 with the hope that the f5 knight might lose its base, but it weakens the king too much.

30. ♖xh5 ♖xe4 31. ♖d8 ♖c6 [On 31... ♖e6 the easiest win is 32. ♖xe8+ ♖xe8 33. ♖d6+-]

32. ♖g5! Refreshing the h5 threat.

32... ♖e6 33. ♖1d6 [Black resigned in view of 33. ♖1d6 33... ♖xd8 34. ♖xd8+ ♖h7 35. ♖h5# Such kind of wins against strong players are very helpful for the confidence before the real challenge against Carlsen.] **1-0**

**(4) Caruana, Fabiano(2801)
- Roiz, Michael(2579) [C95]**30th ECC Open 2014(4.2),
2014.09.17GM Csaba Balogh
Best rating: 2672

Caruana has continued his fantastic winning streak also in the European Club Cup. He was crushing one opponent after another in very nice games:

1.e4 e5 2.♘f3 ♘c6 3.♙b5 a6 4.♙a4 ♘f6 5.O-O ♙e7 6.♖e1
Recently 6.d3 was by far the most popular variation, but lately the old main line 6.Re1 has started to come back into fashion.

6...b5 7.♙b3 d6 [7...O-O 8.c3 d5 is the Marschall gambit and the reason why White has started to go for the 6.d3 line, but Roiz has never tried this opening.]

8.c3 O-O 9.h3 The initial position of the Ruy Lopez main lines. Black has various possible options here, Roiz goes for the Breyer variation.

9...♘b8 10.d4 ♘bd7 11.♘bd2 ♙b7 12.♙c2 ♖e8 13.♘f1 ♙f8 14.♘g3 g6

15.a4 A few issues ago I commented the Adams-Baramidze

game, which reached the same position. Black plays a rare move now, which caught Caruana by surprise.

15...♘b6!? Trying to force White to decide what he wants to do on the queenside. [The Adams game and the main line goes with 15...c5 16.d5 c4]

16.a5!? After a long thought, Caruana decided to close the queenside. To be honest, I have never seen that this idea could give an White an advantage, but Caruana had a very deep idea behind it. [In general it is better to keep the tension with 16.b3 and I believe White should also have done this here. 16...bxa4 (On 16...♙g7 17.♙d3! is the standard way to strengthen the position, force Black to decide what to do with the b5 pawn. Usually for Black the best is to hold it with c6, but it closes the diagonal of the b7 bishop and therefore White can develop with Be3 (the e4 is not hanging anymore after exd4) and Qd2.) 17.bxa4 a5 I have seen this reaction sometimes as an idea of Nb6, but it looks like White is better after 18.♙d3! and Bb5 next!]

16...♘bd7 17.b4 We reached a typical Ruy Lopez middlegame with all the pieces on the board and many hidden plans in a position in which the stronger player can outplay his opponent.

17...♙g7 I think that this most natural developing move is

a mistake. White was intending to close the center with d5, followed by undermining the b5 pawn with Bb3 and c4. Black should always meet the d5 move with the c6 undermining, but after the bishop has left the f8 square, the d6 pawn is going to be loose. Black will be forced to spend an important tempo to protect it first. Black has prepared to push d5 himself, which would have been an even better version than in the previous move, but of course White knew exactly what is going on and he locked the center. [The computer suggests 17...exd4 18.cxd4 c5 This is possible, but for a human it is always difficult and not advisable to give up the center like this. The position looks quite scary after 19.bxc5 dxc5 20.e5 ♘d5 21.♘g5 and e6, followed by sacrifices on Nxh7 Kxh7 Qh5. But the computer is stubborn...; 17...c5 is met by 18.d5 which leads to a typical Ruy Lopez middlegame, when White has an edge due to the space advantage and he continues with the standard attacking plan Be3, Qd2, Nh2 and f2-f4.; It looks like to me like the equalizer would have been 17...d5! 18.♘xe5 ♘xe5 19.dxe5 ♘xe4! This involves a pawn sacrifice, but Black gets adequate compensation for it. (19...♖xe5 20.♙f4 ♖e8 21.e5 is better for White.) 20.♘xe4 dxe4 21.♙xd8 (21.♙f4 21...c5) 21...♖axd8 22.♙g5 ♖c8 23.♙xe4 ♙xe4 24.♖xe4 c5! Or f5 first and when the rook retreats c5! Suddenly all white pawns on the dark squares become vulnerable and Black should have enough compensation to hold the draw without too much difficulty.]

18.d5! ♖b8 Black protects the d6 pawn and intends to undermine the center with c6. This is definitely the right plan, but the right execution is unclear. He could have tried Rc8 and take back with the rook on c6, Qe7 or Qc8 and preparing to recapture with the queen on c6. In any case, we get quite similar positions and I believe White's position is preferable everywhere.

19.♙b3 ♘f8 One more preparation move. After the c6 move, the knight will be much better placed on e6 than on d7. [On 19...c6 20.dxc6 ♙xc6 21.♖a2 (The computer suggests a very interesting attacking plan with 21.♘g5!? 21...♖f8 22.h4 and h5 next. This is also quite an interesting idea.)]

20.♖a2 A very deep maneuver to activate the white pieces. The course of the game has completely justified Caruana's decision! [Another positional plan would have been 20.c4 20...bxc4 21.♙xc4 c6 22.dxc6 ♙xc6 23.♙d3+= also with an advantage, but Caruana wanted to decide the game on the kingside with an attack.]

20...c6 21.dxc6 ♙xc6 22.♖d2 ♖d8 23.♖d3! A small and strong move! White opens the diagonal of the bishop to have better coordination between the pieces and in the same time he keeps the potential Ng5 and Rf3 attacking motifs in mind. Actually it is quite annoying for Black to deal with the d6 pawn. Black is never able to execute the d5 break and otherwise it pins his heavy pieces to its defense. White can also strengthen the pressure with a Be3-b6 maneuver.

23...♖d7 [If Black tries to avoid the Ng5 ideas and plays 23...♙e8 White keeps an edge after 24.♙e3 ♘e6 25.♙d2 followed by Bb6 and Rd1 with a clear advantage.]

24. ♖g5! Perfectly played! Caruana feels the moment is right to launch an attack. White has different ways to increase the attack, one is h4-h5, another even more dangerous one is f4-f5 as taking on f4 Bxf4 leads to the loss of the d6 pawn or big problems on the f7 square after White occupies the f-file. At the same time White is ready to play Nx f7 Rxf7 Rxd6, getting two pawns and a rook for the two minor pieces, which is also good for him.

24... ♖c7 [24... ♖e8 is also met by 25.f4!±]

25. ♕e3 [Perhaps it was stronger to play 25.f4 and on 25...h6 26. ♖xf7! ♖xf7 27. ♖xd6 but the way Caruana played was also very convincing.]

25...h6 It is very annoying to have such an attacking knight on g5. It is understandable that Roiz wanted to deal with it. On the other hand, after the sacrifice on f7, the h7-h6 move turns out to be a big weakening and Black gets into trouble on the g6 square.

26. ♖xf7! suggested itself, as even materially White is doing fine after taking on d6.

26... ♖xf7 27. ♖xd6 ♕e8

28. ♕b6! A very deep intermediate move before increasing the pressure with f4! [28.f4 immediately is less clear. Black might hope for counterplay after 28... ♖xc3]

28... ♖b7 [Now on 28... ♖xc3 Caruana had prepared the hidden idea 29. ♕c5!! and suddenly the black queen is trapped... 29... ♖c8 30. ♖e3 ♖b2 31. ♖d2+—]

29.f4! The attacking is rolling now! White would like to get a pawn to e5!

29... ♖6d7 [29...exf4 is refuted by 30.e5 ♖6h7 31.e6 ♖e7]

And here the prettiest win, which Caruana had foreseen before pushing 29.f4, is 32. ♖d7! ♕xd7 33.exd7+ ♖h8 34. ♖xe7+—; 29... ♖e7 30. ♕c5+— is also hopeless for Black. There are too many pins and he cannot hold the e5 square.]

30.f5 We can see the drawback of the h6 move now. White creates two extremely nice attacking squares on f5 and h5 for his knight and queen.

30...♟xb6 [30...g5 31.♟d5 ♚b8 32.♟h5+- Black is totally dominated!]

31.axb6 ♚h7 White can choose between the different winning plans and the material is also in his favor.

32.♟d5 ♚b8 33.♟xa8 ♚xa8 34.♚f1 Keep on attacking, Caruana brings one more piece against the opponent's king.

34...gxf5 35.♚xf5 ♚b8 [35...♚xf5 36.♟xf5 ♚xe4 is met for instance by 37.♚g4! ♚xg4 38.hxg4+- and the b-pawn promotes.]

36.♚xf7 ♟xf7 37.♟f5 Black resigned! No words on Caruana's play! **1-0**

Best rating: 2672

White has an extra pawn, but there are opposite colored bishops on the board. In such cases, sometimes even 2-3 extra pawns are not enough to win if the defensive side manages to create a fortress. In opposite colored bishop endgames, the passed pawns play a key role! In this position White is winning, because he has two passed pawns that are far enough from each other and this prevents Black from building a successful defense.

58.b4 White intends to create his passed pawn on the queenside with b5.

58...♔f6 [Another defensive attempt is 58...♔e8 with the idea to meet the b5 plan with axb5 cxb5 Kd8 and in case of a6, bxa6, bxa6 Kc8 and run with the king to the corner. Afterwards the game is a dead draw, because Black only needs to give up his bishop for the f-pawn and the a8 square does not fit to the

color of the d2 bishop. Therefore White should play 59.♔c7! to avoid the marching of the king to a8. 59...♔e7 (Black cannot stop the creation of the passed pawn with 59...♘c6 because of the following elegant breakthrough:

60.b5! axb5 61.a6!+- wins.) 60.b5 axb5 (Avoiding the trade with 60...♔e6 does not change anything as White creates his second passed pawn with 61.bxa6 bxa6 62.c5 ♔d5 63.♔b6+-) 61.cxb5 ♔e6 62.a6 bxa6 63.bxa6 The a-pawn itably promotes. The last chance for Black is to run for the f2 pawn as fast as possible. 63...♔f5 64.a7 ♔g4 65.♔b8

And in this position, Black is in decisive zugzwang. At the moment White is not threatening to promote the pawn, because after Bxa8 Kxa8 Kf3 Be3 d2 Bxd2 Kxf2 is a draw. But Black is forced to make a move with which he neutralizes this saving idea. If it was White's turn, he would give the tempo to

his opponent with let's say Bc1! and we reach the same story with the zugzwang. 65...♔h3 (65...♙e4 66.f4!+- and White can already promote the a-pawn. Black has no more chance to trade the d-pawn for the f- because the white bishop is ideally placed on c1-e3 diagonal.) 66.a8=♔ ♙xa8 67.♔xa8 ♙g4 68.f4!+- Again just in time to avoid Kf3! Now the king comes back from a8 and White wins automatically.]

59.b5 axb5 60.cxb5 ♔f5 61.a6 bxa6 62.bxa6 ♔g4 Kamsky tries the same idea as in the 58...Ke8 line and indeed, White has no time now to promote the a-pawn, because the king quickly gets to the g2 square and after Be3, d2 holds the draw.

63.♔e5! White has already done the job on the queenside, he has created his passed pawn there. Therefore he rushes back with his king to protect the f2 pawn and to send away the bishop from the f3 square in order to advance the pawn to f4, where it is already protected by the white bishop. [63.a7? 63...♔h3=]

63...♔h3 64.♔d4 ♔g4 65.♔e5 ♔h3 66.♔f4 Naturally White should send away the bishop.

66...♙c6 [66...♔g2 67.♔e3+- leads again to zugzwang. Black can only move with his bishop, but it allows the advance of the f-pawn.]

67.a7 ♙a8 Basically all moves are winning now. In any case, White will start to advance his f-pawn and we reach the same position which will occur in the game.

68.♙e1 ♙b7 [On 68...♔g2 69.♔e3 ♔h3 70.f4 ♔g4 71.♙d2+- transposes to the game.]

69.♔e3 ♔g4 70.f4! ♔f5 71.♙g3 71.Bd2 or driving the bishop to the e5-b8 diagonal were also good enough to win. In any case, White eliminates the d-pawn.

71...♙e4 [On 71...♔g4 72.♔xd3+- is possible as the bishop cannot be taken because of f5!]

72.♙h2! Another zugzwang! Black must give up his d-pawn.

72...♙g2 73.♔xd3 ♔e6 74.♔d4 ♙f3 75.♔c5 ♙e4 76.♔b6 ♙d7 This could still be a draw if the passed pawns were not far enough from each other. The black king is able to keep the white one away from the a8 square, but here with the other distant passed pawn, White is able to lure the the king away to the other side, opening the path for his own king.. If White had his pawns on d4 and a7, then the game would be drawn as Black simply keeps his bishop on the long diagonal and when White plays Kb6, threatening with Kc7, Black answers with Kd7, then after Kc5 with the threat of d5, Black goes back to e6 with the king and otherwise just waits with his bishop, therefore zugzwangs are not possible.

77.f5 [Black resigned in view of the following line: 77.f5 77...♙d5 78.♙f4 ♙e4 79.♙g5 This is just one of the winning plans. The point is to advance the pawn to f6, where it is protected by the bishop and at the same time it is threatening with promotion after f7, because the bishop also controls the e7 square. 79...♙d5 80.f6 f7 is a decisive threat now and on 80...♙e6 81.♙c7+- and Kb8 wins next. We should remember that distant passed pawns are very important in opposite colored bishop endgames.] **1-0**

(16) Berkes, Ferenc(2649)
- Iskandarov, Misratdin(2398)

Baku Open 2014(3.5),
 2014.09.24

GM Arkadij Naiditsch
 Best rating: 2737

White is clearly better in this rook endgame because of the active king, but still the win is far away. White's idea is clear, to create a passed pawn on the kingside and hope not to lose any pawns on the queenside. Berkes manages this in great manner.

33.fxg6! A strong move. White is fixing the black pawn structure before playing Kg5.

33...fxg6 34.♙g5 Now the danger for Black is to lose both pawns g6 and h5 after which the game would be over immediately.

34...♖c2 It seems like there are no better resources for Black. White just wants to play Rd3-Rf3 next.

35.h4 ♖c3 Black needs to get the g3 pawn, as to let White play Kxg6-Rxh5 followed by Rg5 and h5-h6 would just equal immediate resignation.

36.♔xg6 ♖xg3+ 37.♖g5! Another very important move! Before winning the h-pawn, White is putting the rook to g5 where it will not only protect the king from the checks, but also cut the black king on the g-file.

37...♖h3! Black is also defending well. The rook has to be behind the passed pawn.

38.♖xh5 ♖h2 Black is trying to win a pawn on the queenside which is very logical, but it leads to a forced loss. [38...♔e7 wouldn't have saved the game either. 39.♖h7+ ♔d6 (In case of 39...♔e6 40.h5 ♖g3+

41.♔h6 a5 42.♖b7 White is winning another pawn which of course leads to an easily winning position.) 40.h5 ♖g3+ 41.♔f5 a5 and here comes the very strong 42.♖h6+! ♔c5 43.♖g6 followed by h6 and the white king will go to g7 with an easy win.]

39.a4 ♖h3 40.b4 ♖b3 41.b5 White has fixed the black pawn structure and very soon we will see why this was so important.

41...♖b4 The a4 pawn is falling, but Black can't save the game.

42.♖h8+! Berkes calculates the complications correctly and goes for the forced win.

42...♔e7 43.h5 The h-pawn is running.

43...♖g4+ There is nothing else to do...

44.♔f5 ♖xa4 45.h6 White's idea is to play h7 to have Ra8 Rxh7 and Rxa7-Rxh7 agzr Rh4.

45...♔f7 All Black needs to do is to play Rh4 next, but there is just no time for it.

46.♖a8! The last exact move!

46...♖h4 47.♔g5 ♖h1 and White is forcing Black to enter a losing pawn endgame.

48.h7 ♔g7

49.h8=♔+ After 49....Rxh8 50.Rxa7 Kg8 51.Ra8 Kg7 52.Rxh8

Kxh8 53.Kf6 White is going to collect the b6 pawn and promote his own one. What we can see from this game is that rook endgames with an extra pawn on the different side of the board are very dangerous for the defensive side and sometimes even just lost. **1-0**

e6 7.♙b3 ♙e7 8.♙e3 0-0**

9.0-0 The alternative for White is a plan with 0-0-0. [9.♔e2 9...a6 10.0-0-0 ♔c7 with the idea to attack over g4, often linked with a sacrifice on f5. This line is called Velimirovich Attack.]

9...♙d7 Black decides to play without a6, which is very natural in this kind of the structures. [9...a6 10.f4 ♗xd4 (10...♔c7∞) 11.♙xd4 b5 12.e5 (12.a3 12...♙b7∞) 12...dxe5 13.fxe5 ♗d7 14.♗e4 ♙b7 15.♗d6 ♙xd6 16.exd6∞]

10.f4

10...♞c8 looks a bit unnatural but the idea is to prevent f5 and Black has few other options to play. [10...♞xd4 11.♞xd4 ♞c6 12.♞e2 b5 is a thematic idea. 13.♞xb5 ♞xb5 14.♞xb5 ♞xe4 15.f5∞ White is trying to activate the Bb3, but the position is unclear. 15...d5? doesn't work because of 16.fxe6 fxe6 17.♞c6! ♞d6 18.♞xf8+ ♞xf8 19.♞xd6 ♞xd6 20.♞xa7±; 10...♞c8 11.f5↑; 10...♞a5 is a very logical idea in many Sicilian Variations. Black is going to exchange the Bb3 which is potentially a very strong piece. 11.e5! forcing Black to put the knight on a bad square. 11...♞e8 12.♞g4 ♞xb3 13.axb3 and White keeps some initiative thanks to his space advantage and the limited knight on e8.]

11.f5! Fischer was not afraid of 10...Qc8 and anyway he is playing according to the plan that the activation of the pieces through the f5 break is most important! [11.♞db5 makes no sense because of 11...♞b8 and a6 next.]

11...♞xd4 [11...♞e5 12.fxe6 fxe6 13.♞f5↑]

12.♞xd4 exf5 [12...e5 13.♞e3+= White is clearly faster in the fight for the d5 square.; 12...♞c6 13.fxe6 fxe6 14.♞e2+= (14.♞xf6 14...♞xf6 15.♞xd6 ♞h8 16.♞xe6 ♞d8 17.♞xc8 ♞xd6 18.♞g4 ♞d2 and Black gets counterplay.)]

13.♞d3! [13.exf5 13...♞xf5 14.♞xf6 (14.♞f3!?) 14...♞xf6

15.♞d5 ♞d8 16.♞h1∞]

13...fxe4 14.♞xe4 After this pawn sacrifice the white pieces are becoming very active.

14...♞xe4 15.♞xe4 ♞e6

16.♞f3! ↑ The next piece joins the attack.

16...♞c6 17.♞e1 An interesting decision. From a logical point of view White should keep the queens on the board but Fischer doesn't lose any time and connects the next rook into play. [17.♞g3 17...♞xe4 18.♞xg7+ ♞h8—+; 17.♞f4 gives White the initiative as well.]

17...♞xe4 18.♞xe4 It is clear that Black's task now is to give back the pawn to stop White's initiative and limit the material.

18...d5 [18...♞fe8!?

19.♙xe6 (19.♞xe6 leads to a position where White will have more practical chances. 19...fxe6 20.♙xe6+ ♔h8 21.♞f7 ♙f8 (21...♙f6 22.♞xf6!) 22.♙d5 ♞ab8 (22...♞e7 23.♙xg7+!) 23.c4†) 19...fxe6 20.♞xe6 ♞ac8! is an important move which provokes c3. (20...♙f8 21.♞xe8 ♞xe8 22.♙xa7 ♞a8 23.♙d4 (23.♞a3? 23...d5 24.♞a5 ♞xa7+-) 23...♞xa2 24.♞b3±) 21.c3 ♙f8 22.♞xe8 ♞xe8 23.♙xa7 ♞a8=]

19.♞g3 g6 20.♙xd5 ♙d6 [20...♙xd5 21.♞xe7 ♞fe8 22.♞ge3 The position seems to be drawish but White keeps some pressure thanks to the weak dark squares and the strong rook on the 7th rank.]

21.♞xe6 ♙xg3 22.♞e7

22...♙d6 Black could have gotten counterplay after the forced [22...♙h4! 23.♞xb7

23...♞ae8! Active defense is the most effective. 24.g3 ♞e1+ 25.♙f2 ♞d1 26.c3 (26.♙c5 26...♞xd5 27.♙xf8 ♙xf8 28.gxh4 ♞d2+ 29.♙g3 ♞xc2=) 26...♞d2+ (26...♙f6 27.♙e2 ♞xd4 28.cxd4 ♙xd4 29.b4±) 27.♙e1 ♙g5± and the rook on d2 is very unpleasant.]

23.♞xb7 ♞ac8 [23...♞ab8 This trick doesn't work because of 24.♞xa7 ♞xb2 25.♞xf7! +- ♞b1+ 26.♞f1+]

24.c4 a5 25.♞a7 ♙c7 [25...♙c5 26.♙xc5 ♞xc5 27.♙f2+-]

26.g3 [26.a3 White immediately creates 2 passed pawns which should quickly decide the game. 26...♞fe8 27.♙f1! A strong prophylactic move. 27...♞e7 28.b4 axb4 29.axb4 ♙d6 30.♞xe7 ♙xe7 31.b5 ♙d6 32.b6 ♙f8 33.b7 ♞b8 34.♙b6!+- White takes control of the c7 square and now the simple winning plan is to promote the c-pawn.]

26...♞fe8

27.♙f1! ♞e7 28.♙f6! Very accurate! White prevents Black from doubling the rooks on the e-file. [28.♙c3 28...♞ce8±]

28...♞e3 29.♙c3 h5 Black is looking for some chances but his pieces are paralyzed.

30.♞a6 [30.♙xa5? 30...♙xa5 31.♞xa5 ♞ce8! 32.♞b5 g5 and the white king will get into trouble.]

30...♙e5 [30...♙h7 31.♞c6±]

31.♙d2! [31.♙f2 31...♖xc3 32.bxc3 ♜xc3 33.♖xg6+ ♔h7 34.♖a6 ♔g7 35.♙f3 ♖c7 and with opposite colored bishops sometimes one pawn is not enough.]

31...♖d3 32.♙e2 ♖d4 [32...♖xd2+ was the last hope but here Black is 2 pawns down. 33.♙xd2 ♜xb2 34.♖xg6+ ♜g7 (34...♙h7 35.♖a6 and White wins the next pawn.) 35.♖g5 h4 36.gxh4±]

33.♜c3 ♖cxc4 [33...♖g4 34.♜xe5 ♖e8 35.♖a8+—]

34.♜xc4 ♖xc4 35.♙d3 [35.♜xe5 35...♖e4+ 36.♙d3 ♖xe5=]

35...♖c5 36.♖xa5 ♖xa5 37.♜xa5 ♜xb2 38.a4 The a-pawn will decide the game! [38.♜b4 preventing Kf8.]

38...♙f8 39.♜c3! +— White promote the pawn with tempo.

39...♜xc3 40.♙xc3 ♙e7 41.♙d4 and pawns endgames with distant passed pawns are always easily winning.

41...♙d6 42.a5 f6 43.a6 ♙c6 44.a7 ♙b7 45.♙d5 h4 46.♙e6 1-0

Editorial Preface

The mini match out of 4 classical games between Laznicka and Rapport had a clear winner: 3-1 for Rapport. The games were exciting, but also not without mistakes.

The Baku Open was won by Inarkiev and Lupulescu, as both ended on 7/9.

And we come to the main event of the week, the start of the 1st FIDE Grand Prix.

In the first round Gelfand played a great game against Andreikin and Caruana managed to beat Karjakin in a very big fight where Karjakin made a huge mistake before the time trouble in a slightly better position.

The second round was also spectacular and there were a lot of missed chances.

After only 2 rounds it is of course too early to say anything, but the question for me is, can somebody or something stop Caruana from winning almost all his games?! The play of the World Nr2 is just amazingly good!

Another very strong open has begun on the Isle of Man, where Adams and Vachier-Lagrave are the top seeded players.

The Croatian team championship is also starting on the Island of Bol, with Navara, Naiditsch, Almasi, Malakhov and many more close to 2700 GMs.

As usual we bring you a selection of the best games of the past week, enjoy !

Arkadij Naiditsch & Csaba Balogh

Baku Open 2014(5.9),
2014.09.26

GM Csaba Balogh
Best rating: 2672

A great fighting game between two Ukrainian GMs. In a complex middlegame, Black nicely outplays his opponent move by move.

1.c4 ♘f6 2.g3 g6 3.♗g2 ♕g7 4.e4 O-O Black plays the King's Indian defense anyway, therefore he does not pay attention on White's tricky Anti-Gruenfeld moveorder.

5.♘e2 d6 6.O-O c5 7.d4 ♘c6 8.d5

8...♗a5 In a famous line of the King's Indian g3 system, White has his knights on c3 and f3 and his pawn on e2. He plays there, Nd2, followed by Qc2, b3 and Bb2 and it is considered to be slightly better for him. Here, somehow the placement of this e2 knight looks a bit unfortunate, Black's counterattack on the queenside connected with the b5 move comes more effectively.

9.♘d2 ♖b8 10.a3 White tries to be consequent and looks for an idea, that his knight is not on c3, standing in the long diagonal. He intends to use the misplacement of the a5 knight and tries to get some benefits from the b2-b4 idea.

10...♘d7! Black improves his knight (by driving it to e5) and the circumstances of playing b5. He also prevents temporarily the b4 threat. [10...b5 was a mistake, White's strategy could have worked now after 11.cxb5 ♖xb5]

12.b4! cxb4 13.♖a4! followed by taking back on b4 and the a5 knight becomes really poor.]

11.♖b1 Both players are following their initial ideas, White refreshes the b4 threat.

11...♘e5! An important tempo before executing the b5 break.

12.♖c2 Protecting the c4 pawn, b4 is a threat again. [I was looking for an alternative for White 12.b3 with the idea to develop the bishop to b2 and later playing f4. One drawback could be the Nd3, capturing the dark squared bishop and the remaining one of g7 could become extremely strong, but it already allows b4, as the c4 pawn is not under attack any longer. However the computer suggests a brilliant idea: 12...b5 13.cxb5 ♕d7 14.b4 (14.a4 is met by 14...a6 15.bxa6 ♖b6 like in the game with more than enough compensation.) This was my point with 12.b3, keeping the queen on d1. In the game

Black plays Bxb5 and the e2 is hanging.

Here comes the fantastic move: 14...♞xb5!! 15.bxa5 ♞xa5 Black is simple giving a piece for a single pawn, but all his pieces are standing so perfectly and the white ones are so badly, that the machine is giving the advantage to Black! For instance 16.♞b2 loses to (16.f4 16...♞d3 and c4 is coming next if White prevents the direct Ba4 with total domination.) 16...♞a4 17.♞c1 ♞d3—+]

12...b5! Black had no more time to delay this break, b4 was coming next.

13.cxb5 ♞d7! 13...Rxb5 14.b4 would have been the triumph of White's strategy again, but Black intends to grab the b5 pawn with the bishop, which could create decisive threats on the f1-a6 diagonal.

14.♞c3 Trying to get rid of the strong light squared bishop, but Black is not forced to restore the material balance, which could again met by Bxb5 Nxb5 Rxb5 and b4! [14.b4? runs into 14...♞xb5!; After 14.a4 White must forget about his b4 plan. Black gets excellent compensation after 14...a6 15.bxa6 ♞b6 Qxa6 next. Black pieces are extremely active and there are many holes on the light square in White's camp.]

14...c4! Black creates two very nice holes for his knights on d3 and on b3 and finally prevents the b4 idea.

15.a4 White decides to keep his extra pawn, but the activity of the black pieces are going to compensate him for this small deficit. [It would have been stronger to simplify the situation on the queenside with 15.b4 although Black is more than fine here as well after 15...cxb3 16.♞xb3 ♞xb3 17.♞xb3 ♞a5 and Rfc8 is coming next followed by knight jumps to d3 or c4.]

15...a6! Like in the Volga gambit! Black opens the b-file by temporarily sacrificing another pawn.

16.bxa6 [It was the last moment to push 16.b4 16...cxb3 17.♞xb3 ♞xb3 18.♞xb3 ♞a5 19.♞d2 ♞fc8 is again good for Black, but White has decent chances to hold the draw after the mass of simplification on b5.]

16...♞b6 17.♞f3 It is time for White to finish the development and trying to trade some of the active pieces, but Black has different idea about this...

17...♞d3! Of course! Why to trady such a nice knight if it could be installed to d3?! [Tough, Black is better also after 17...♞xf3+ 18.♞xf3 ♞xa6 followed by Nb3 , winning back the a4 pawn or jumping to d4.]

18. ♖e3 ♜xa6 19. ♙d4 Again with the same story like two moves before with 17.Nf3. White tries to trade an active piece to easen his defense, but the history repeats itself:

19... ♖h6!! Another excellent positional move! Black intends to jump Nb3 next move, taking the strong dark squared bishop after which his own bishop goes back to the long diagonal and rules the board in the entire game.

20. ♜e2 ♘b3 21. ♙e3 ♙g7! Yet again! Black's strategy to keep his best pieces on the board works perfectly. White cannot offer the trade of those bishops longer and he is going to lose the a4 pawn.

22. ♙g5 Searching for counterplay, but it turns out to be a loss of tempo. White was in trouble anyway.

22...h6! This motif is known also from the Volga gambit, just

as many others before. The e7 pawn cannot be taken, because the bishop gets trapped...

23. ♙e3 [23. ♙xe7 loses to 23... ♜fe8 24. ♙h4 g5—+]

23... ♙xa4 Black restores the material balance and his active pieces keep all the advantages he had before.

24. ♘d2 [In case of 24. ♘xa4 24... ♜xa4 25. ♘e1 trying to trade some pieces, Black could play 25... ♜b5 for instance, with the idea with the idea to confuse White about taking on d3 or not. Obviously the d3 pawn would become extremely strong, Black could use it for the invasion of his rook with Rfc8-c2.]

24... ♙d7 Well, if White did not take the bishop, Black decides to preserve it. As more pieces as more problems for White...

25. ♘xb3 ♜xb3 White got rid of one of the active knights, but now the rooks are coming against the b2 pawn and the power of the g7 bishop and the d3 knight is getting stronger and stronger.

26. ♜a1 ♜c8 27. ♜a2 ♜b8 28. ♘d1 ♙b5 Black creates this pin, which turns out to be very unpleasant for White. He is threatening with c3, trying to leave from it with 29.Qd2, it runs into Nxb2 Nxb2 c3! While Qc2 moves into Nb4 fork... [28... ♘xb2 was also winning material 29. ♘xb2 ♜xb2 30. ♜xb2 (30. ♜xc4 30... ♙b5! is the point, Black wins an exchange! 31. ♜xb2 ♙xb2—+) 30... ♜xb2 31. ♜xc4 ♙b5—+]

29. ♘c3 ♘xb2 Both weak pawns are fallen on the queenside. It is already Black who is up a pawn!

30. ♘xb5 ♜xb5 31. ♜a7

31...c3! I like this idea again a lot! Black does not waste time to preserve his extra pawn, he rather promotes his passed pawn.

32. ♖xb5 ♜xb5 33. ♖xe7 ♘c4 34. ♙c1 [The only chance would have been 34. ♖c7 34... ♘xe3 35. fxe3 ♙e5 but it is also quite hopeless with such big difference between the two bishops and together with the c3 passed pawn, Black should win the game.]

34...♖c8! Supporting the passed pawn from behind!

35. ♙h3 ♖cc5 White cannot create any counterplay, Black slowly promotes his c-pawn.

36. ♖e8+ ♙h7 37. ♖e7

37...♙d2! —+ It is over now. Re1 moves into Nf3, while in case of Bxd2 cxd2 the pawn promotes after Rc1 and Rbb1 next.

38. ♖d1 c2! 39. ♖xd2 ♖b1 40. ♙g2 ♖xc1 White resigned! A perfect game by Onischuk Vladimir! Such level of play we usually see only by the very top GMs! **0-1**

**(2) Sveshnikov, Evgeny(2502)
- Shirov, Alexei(2701) [B20]**Shirov-Sveshnikov Rapid m(1),
2014.09.26GM Csaba Balogh
Best rating: 2672

1.e4 c5 2.b3 Sveshnikov played the Alapin Sicilian (2.c3) in all his life. He also turned back to it in the next games of this match, but first he tried another sideline. This is an interesting option to play without much theory, Morozevich often employs it in blitz games or sometimes even Kramnik plays like this, when he starts with 1.e4.

2...♘c6 3.♙b2 e5 Black has various setups here. Shirov chooses a logical answer to close the diagonal of the fianchettoed bishop. The drawback of it is the hole on d5, White focuses his minor pieces on this square.

4.♙c4 ♘f6 5.♘c3

5...♗xe4!? Typical Shir ov. He is searching for a way right in the opening to complicate the matters. [Objectively, I believe finishing the development with 5...♙e7 is better.]

6.♗xe4 d5 Black wins back the piece and he manages to solve the problem of the d5 square with this tactical idea.

The question is, if he will have enough time to consolidate his position, especially to solve the pressure of the e5 pawn...

7.♙d3 dxe4 8.♙xe4 ♙d6 9.♙h5! Very well played, the only way to fight for the advantage! Sveshnikov knows, if Black manages to castle and plays f6 or f5, he achieves a very comfortable position. Therefore he puts pressure on the e5 pawn and prevents his opponent from the direct castling. [After 9.♗f3 9...O-O 10.O-O f6 Black is fine.]

9...h6 This is the novelty! Black prepares to castle short and he invites his opponent to grab the e5 pawn, which opens the e-file for a potential attack. [9...♙e7 10.♗f3 happened in some previous games.]

10.♙xc6+ White goes for the material, which turns out to be a wrong decision. [10.♗f3 is met by 10...g6 when White has no good square for his queen.; However after the very strong 10.f4! on the other hand it is also very logical to press even more the main target, White seems to get an advantage 10...O-O (10...g6 11.♙e2 White wins the e5 pawn anyway; 10...exf4 11.♙xg7 ♖g8 12.♙xc6+ bxc6 13.♙xh6 I am not sure if Black has enough compensation for the pawn.) 11.♙xc6 bxc6 12.fxex5 must be better for White again.]

10...bxc6 11.♙xe5 O-O! As simple as that. Black soon forces the king to move with Re8. Excellent intuitions by Shirov, the

analysis show, that Black has enough compensation for the pawn in all the lines.

12. ♖xd6 [12. ♘f3 loses to 12... ♖xe5 13. ♘xe5 ♔d5! and White cannot parry the doublethreat of f6 or Re8.; 12. ♖c3 is met by 12... ♖e8+ 13. ♔f1 We reach a Marschall Gambit kind of compensation. Black does not hurry to do anything quickly, he plays for longterm counterplay, using the fact that the h1 rook cannot participate in this game. Black has different good ways to continue, a logical one is 13... ♖e6 14. ♘f3 ♔d7 Developing and threatening with Bg4 15.h3

15...a5 trying to open a new front on the queenside. White cannot connect his rooks. 16.a4 c4! destroying the healthy pawn structure and getting rid of the doubled pawns. Black has a very strong initiative.]

12... ♖e8+ 13. ♘e2 [13. ♖e5 loses to 13... ♔d4! Black wins material in view of 14. ♘f3 ♔xa1!—+ using the pin.]

13... ♔xd6 14.O-O-O? An ambitious move, which causes all the forthcoming problems. Sveshnikov would like to preserve his extra pawn and he does not believe, that Black's attack could be dangerous here. However Shirov was on different opinion! [After the solid 14.O-O 14... ♔xd2 15. ♘g3= White gives back the pawn and gives up also the fight for the advantage, but the game should have finished in a draw in this case.]

14...c4! Of course! I guess, this came without too much hesitation. This is the first kamikaze pawn, which has the task of opening the lines in front of the king. Black also opens the diagonal for his queen to a3.

15. ♘c3 [I was trying to defend with 15. ♔b2 but Black leads a successful attack after 15...a5! 16. ♘c3 cxb3 17.axb3 a4! Very consequent attacking plan. Black intends to bring more attackers with Be6 and Reb8. 18. ♘xa4 Black wins after 18... ♖xa4! 19.bxa4 ♔b4+ 20. ♔c1 ♔a3+ 21. ♔b1 ♖e6—+ and mate is coming soon.]

15... ♔a3+ 16. ♔b1 ♖e6! Black prepares for a sacrifice on b3! Perhaps White did not sense the danger at the moment when he castled long, but only 3 moves later everything is obvious.

17. ♖he1

17... ♖ab8! The most natural is the strongest move again! Of course, the move suggests itself, the difficulty lays in that Black had other seemingly promising alternatives as well, but those were less accurate... [17...cxb3 18.axb3 ♖xb3 (Now on 18... ♖ab8 19. ♖e4! is a good defensive idea with Ra4. That is why, it is better to wait with taking on cxb3.) 19. ♖xe8+ ♖xe8 20.cxb3 ♔xb3+ Seems to win as Rb8 is coming next, but Shirov had calculated perfectly, that White is able to defend himself with 21. ♔a1! ♖b8 22. ♖b1 ♔a3+ 23. ♘a2 just keeping

everything together.]

18. ♖a1 [Now on 18. ♖e4 18...c5!—+ and only next move Black takes on b3 and then he pushes c4 again.]

18...cxb3 19.cxb3 ♙xb3! The most precise again! [19...♖xb3 20.♖b1 ♖xc3 looks winning, but White has a nice resource again to stay in the game 21.♖xe6! ♖xe6 22.♖b8+ ♔h7 23.♚f5+ forces the black rook to g6, but then, there is no mate on the back rank 23...♖g6 24.dxc3 ♚c1+ 25.♖b1 ♚xc3+ 26.♖b2 Black has an extra pawn, but he must work hard for the win. It is not so easy to use the g6 rook.]

20. ♖xe8+ ♖xe8 21.♖h1 This is sad, but it was already too late to do something. [21.♖b1 is met by 21...♙c2 and the rook cannot cover the e1 square and the b-file as well. Rb8 is coming enxt with mate. 22.♖h1 ♖b8—+]

21...♙c2! The bishop very well on c2. It controls the important b1 square to avoid the Rb1 defense after Rb8. White has no adequate resource against it, he can only delay the defeat.

22. ♘b1 ♚b4 23.a3 ♚b6 Black still wants to play Rb8 in each move.

24. ♚h4

24...♙e4! The most precise again! Shirov closes the 4th

rank and Rb8 is really coming next with a decisive effect. [On 24...♖b8 25.♚b4 White could still suffer.]

25. ♘c3 ♖b8 26. ♘a4 ♚d4+ [White resigned in view of 26...♚d4+ 27.♘c3 ♚xd2—+ Very nice attacking game by Shirov, but from the theoretical point of view, White could have get an advantage by playing 10.f4, therefore I consider 5...Nxe4 to be an inaccuracy.] **0-1**

**(3) Gelfand, Boris(2748)
- Andreikin, Dmitry(2722) [E15]**

Baku FIDE Grand Prix 2014(1.4),
2014.10.02

GM Arkadij Naiditsch
Best rating: 2737

Andreikin is clearly the main surprise of the event. With one very good tournament (the last World Cup) Andreikin qualified for the WCC Candidates and for the current Grand Prix. But it seems that the Russian is not really ready to play against the very best chessplayers of the world. We will see a great one-sided crush by Boris Gelfand!

1.d4 e6 Sometimes Black gives White the chance to enter the French...

2.c4 but of course Gelfand doesn't!

2...♘f6 3.♗f3 Gelfand usually avoids the Nimzo which could appear after 3.Nc3 Bb4.

3...b6 Andreikin also plays 3...d5.

4.g3 ♘b7 [4...♙a6 is the other main line.]

5.♙g2 c5 is a very risky line for Black. [5...♙e7 is the usual continuation. 6.O-O O-O Black is waiting for White to play 7.♗c3 before going 7...♗e4 Grischuk likes to play this line with Black.]

6.d5! Direct, straight and strong. Gelfand doesn't like to joke in the openings. He is usually very well prepared and has a lot of interesting opening ideas in his pocket.

6...exd5 7.cxd5!? This is already almost a novelty for the top level, although this move looks very logical to me. [7.♗g5 and; 7.♗h4 were the most played moves in previous games and Gelfand himself has played 7. Nh4 once.]

7...♙xd5 The pawn has to be taken, otherwise White is just much better. [7...♗xd5? 8.♗h4 and White is winning a piece.]

8.♗c3 ♙c6 Black had 2 options and I think the move in the game is the most logical. [The other option was 8...♙b7 9.e4 (9.O-O 9...♙e7 10.e4 might also be interesting.) 9...♗xe4 10.♗d5 ♗c6 11.O-O with a strong attack on the black king.]

9.e4 Gelfand is clearly in his preparation and to play such a position over the board is very hard for Black. White's play is quite simple, he develops pieces and starts to attack. Right now the threat is to play e5.

9...d6 A very human reply. [In case of 9...♗xe4 White had 2 interesting options: 10.♗d5 (After 10.♗xe4 10...♙xe4 11.♙e2 ♙e7 12.O-O the position also looks really dangerous for Black. 12...♗c6 Now White has 2 major options of either playing 13.Re1 or 13.Bf4 and both look pretty attractive.)

10...♘e7 11.O-O O-O 12.♙f4 White's initiative is very dangerous here because of the bad development of the black pieces.]

10.O-O It is easy to see that White has great compensation for the pawn. The black pieces are very poorly placed.

10...♘e7 Andreikin wants to castle.

11.♞h4! A very strong and typical move. The white knight wants to get to f5 after which White has the idea of playing f4-e5 or putting pressure on the d6 pawn.

11...g6?! This move just doesn't look good. Black had to secure the king's position. [Black should have castled in any case 11...O-O 12.♞f5 and now play something like 12...♞bd7 and of course Black's position is clearly worse, but the whole fight would still be ahead of us.]

12.♙h6 Of course White prevents Black from castling.

12...♙f8 It is already not easy to recommend anything better. White just wants to play f4, Qd2 and Rad1, with crushing play in the center.

13.♙xf8 13.Qd2 was maybe also possible, but the move in the game just looks very logical.

13...♙xf8 14.♙d2 White just wants to play Rad1 and take the d6 pawn. [14.e5 is premature since after 14...♞e8 White's

position is of course still very good, but we are entering complications that are not really needed.; An interesting option was 14.f4 preparing e5. 14...♞g7 15.e5 White's attack looks very dangerous here.]

14...♞e8 [14...♞g7 would lead to about the same position as in the game. 15.♙ad1]

15.♙ad1 is the most simple. [15.♙h6+ is not any better because after 15...♞g8 16.♙ad1 ♞d7 17.f4 ♙e7 Black could try to hold things together even if White is of course better here.]

15...♞g7

16.f4 White is starting the crushing attack. Now Gelfand can choose if he wants to play e5 or maybe f5.

16...♙c8 In a very bad position, Andreikin makes things very easy for White. The queen is not greatly placed on c8.

17.♞d5 Good and strong! White is preparing the e5 push and putting the knight on d5 first to avoid the exchange of the bishops.

17...♙f8 18.e5 Wow, what a domination of the white pieces!

18...dxe5 White has a lot of very tempting moves and Gelfand is picks the best one!

19.f5! An excellent move! Black has no defence against the

upcoming f6.

19...♔d8 [19...f6 20.fxg6 hxg6 21.♖xg6 and Black can't play 21...♖xg6 because 22.♗e7+ wins the queen.]

20.f6+ ♗xf6 It was time to resign, but Andreikin probably wanted to cross the 20 moves border. [20...♔h8 would lead to a complete disgrace: 21.♖h6 ♖g8 22.♗e7 What a position!]

21.♗f5+ ♔h8 [21...gxf5 22.♖g5+ ♔h8 23.♗xf6 followed by mate on h7 soon.]

22.♖h6 ♖g8 23.♗xf6 After 23...Qxf6 24.Rd6 the fight would not continue for many more moves before White would mate the black king. A very nice game by White and clearly not well done by Andreikin, whose pieces Nb8 and Ra8 remained on their starting positions for the whole game. **1-0**

(4) Laznicka, Viktor(2675) - Rapport, Richard(2713) [A41]

Rapport-Laznicka m 2014(1),
2014.09.30

GM Arkadij Naiditsch
Best rating: 2737

We are in the first game of this mini match out of 4 games between Laznicka and Rapport. Laznicka is a more solid player with a very solid style, while Rapport is more "crazy" and it is already impossible to guess even his first move. An interesting confrontation of styles. In the current game, we are quickly entering a very fighting position where things seem to be a bit better for White but with one inaccurate move Laznicka allows Rapport to show his tactical skills which results in a mating attack on the white king.

1.d4 d6 Well, I guess Laznicka did not expect this! :)

2.c4 Actually I could never understand why most of the 1.d4 players don't like to enter the Pirc? I think to dominate in the center is never a bad idea! :)

2...e5 3.♗f3 This is one of the main lines for White, but it all looks like Black gets what he wanted, namely very unclear play.

3...e4 4.♗fd2 f5 We have quite a strange position already. White is clearly going to develop his play on the queenside and Black's play is going to be on the kingside. If we look at the results, Black is just crushing here.

5.♗c3 c6 I am not sure about this move at all. Black's idea of playing d5 is very double-edged as it will give White quick play. Personally I would prefer to play 5...Nf6 without c6 and

keep my pawn structure flexible.

6.e3 ♘f6 **7.♗e2** White does not hurry with the b4 move, but why not actually?! Maybe it will not run away, but I think 7.b4 is looking very logical, followed by Qb3 and a4-Ba3, where White might even think about castling queenside.

7...♘a6 Stopping White from playing b4, but allowing him to have other attractive ideas. [7...♗e7 was more solid.]

8.♔a4?! A very unnatural move. The white queen belongs to b3 and not to a4. [White had a great different plan right now: 8.O-O 8...♗e7 and the very strong 9.f3! Since Black lost time with the c6 and Na6 moves, White is now in time to develop very nice play in the center.]

8...♘c7 9.b4 a6 a6 is a very useful move in many different positions.

10.♔b3 Of course the white queen has to leave the a4 square.

10...d5 Black tries to keep the center together. The knight on c7 is a very strong piece now.

11.a4 Very typical and logical, as White's idea should be to play b5 somewhere.

11...♗e6 12.♗b2 White is preparing the b5 move, but why put the bishop on such a passive square?! [12.♗a3 looks much

more natural to me.]

12...♗e7 It is time to end the development.

13.O-O O-O 14.b5 A good choice. [White should not play a move like 14.c5?! because it allows Black to keep the center stable and start his play on the kingside with moves like 14...g5.]

14...♔h8 This prophylactic move is very useful. In many lines Black is able to play dxc4 now.

15.♔fb1 Not a bad try, but again I can't understand why Laznicka doesn't want to exchange the black squared bishops which I think would be clearly positive for White. [15.♗a3 would be my choice here]

15...dxc4 Rapport decides enough is enough and goes for the open fight!

16.♗xc4 After this move I think White has lost most of his advantage. [16.♘xc4! should have been the right move and it is not that simple for Black to make a move. White wants to play bxc6 and enter over the b-file. I think White's position is clearly better here.]

16...♘cd5! Exactly! Now the white knight on d2 is just a dead piece.

17.bxc6 bxc6 18.♗a3 White finally decides to exchange the

black bishops, which is a good idea, but Black's play is already on the run.

18...♟xa3 19.♞xa3 White's pawn structure is clearly much better, so Black needs to act fast!

19...♘g4! Exactly the right choice. Suddenly the things around the white king are not safe at all anymore!

20.h3?! is not the best... [White should have first played 20.♟xd5 20...cxd5 (20...♞h4 21.♟xe6 ♞xf2+ 22.♞h1 ♘xe3 23.♞g1 ♞xd2 24.♞a2 seems to lead to a better position for White.) 21.h3 It seems like White doesn't have anything better because of Black's threat of playing Qh4 next. 21...♘xf2 22.♞xf2 f4 and we are in the good version for White in the current game position.]

20...♘xf2! Of course! Such moves Rapport makes "a tempo"!

21.♞xf2? This is already a clear blunder... [After 21.♟xd5 Black already had 21...♘h3+! (White would be better after 21...cxd5 22.♞xf2 f4 23.exf4 ♞h4+ 24.♞g1 ♞xf4 and the amazingly strong 25.♘ce4! The white queen is covering the e3 square. 25...dxe4 26.♞f1 with a big advantage for White.) 22.gxh3

22...♞g5+ Now the position is very unclear. **23.♞h1 cxd5 24.♘e2 f4** Practically it is maybe even easier to play with Black in this very complicated position.]

21...♘xe3!! A great move and it is clear that Laznicka blundered it!

22.♞c5 After this move it is all over. [White should have tried to fight after 22.♞xe3 22...♞g5+ 23.♞e2 ♞xg2+ when his position just looks lost, but in fact the fight goes on: 24.♞d1 (24.♞e1 24...e3 and the game would be over.) 24...♟xc4 (After 24...e3 25.♞b2! things are pretty unclear.) 25.♘xc4 ♞f1+ 26.♞c2 ♞d3+ 27.♞c1 ♞xc4 Black is better, but in a practical game White keeps some chances for survival.]

22...♞g5 The game is over now. Black just has too many different threats. Right now the main one is Qxg2.

23. ♖f1 [23. ♘e2 23... ♔xg2+ 24. ♔xe3 f4+ 25. ♘xf4 ♔g3+ 26. ♔e2 ♖xf4 with a winning mating attack.]

23... ♘d5 is the most simple. The knight on d2 is hanging and White is hopeless.

24. ♔e1 ♔g3+ followed by Nxc3. In case we look back at the game now, White was clearly better out of the opening, but step by step he missed the most critical lines until he completely collapsed in the tactical complications. **0-1**

Endgame section

(15) Shirov, Alexei(2701)
- Sveshnikov, Evgeny(2502)

Rapid match (4),
2014.09.27

GM Csaba Balogh
Best rating: 2672

White has an extra pawn, but as we know in rook endgames, the defensive side always has chance to hold. Black's aim should be to eliminate all the pawns from the queenside and reach a 3 vs 2 endgame, which is a theoretical draw. However there is no direct way to get rid of the pawns, therefore White can hope to convert the advantage.

44. ♔e2 White activates his king, which plays an important role in creating the winning plan. It could be something like, Ke3, Rd2, covering the c2 square and then Ke4 and in a good moment Rd5.

44... ♖c1 Black should have also brought his king to the center with Kg6-f6.

45. ♖d5! The rook should be placed on d2 to cover all the pawns and White wins an important tempo by attacking the a5 first.

45... ♖c2+ 46. ♖d2 ♖c1 [Another defensive attempt is 46... ♖c3 cutting the king along the 3rd rank, but here White could play 47. ♔d1! with the idea of Rc2, Rd3 Ke2 and driving to king to the center. 47... ♔g6 (Unfortunately for Black 47... a4 does not work, because after 48. bxa4 ♖a3 49. ♔e2 ♔g6 50. ♖b2! ♖xa4 51. ♔d3+- White is going to win the b-pawn with Kc4-b5!) 48. ♖c2 ♖d3+ 49. ♔e2 ♖d5 50. ♔e3 will be similar to the game. In my opinion, White has good winning chances after advancing the kingside pawns, but in any case this is the only hope for Black.]

47. ♔d3! White is threatening to cross the c-file with his king after playing Rc2 and when the rook moves, Kc4-b5 should be winning.

47... ♖c3+ 48. ♔e4 ♖c1 White has done the first step to win the game by activating his king. Rd5 is still met by Rc2, attacking all the pawns on the 2nd rank, therefore the next step is logical. Shirov advances his kingside pawns with two main ideas behind it. First of all, he is up a pawn on that side, therefore to increase the advantage he should create a passed pawn. He also evacuates the 2nd rank in order to threat with Rd5, winning another pawn.

49.g4! g5? This is definately the decisive mistake. Perhaps, White was winning anyway, but this definitely just helps to convert the extra pawn. Black weakens his own pawns and opens a path for the white king to penetrate on the kingside. [On 49...♖a1 to prevent Rd5, White is winning after 50.♔f5! (To start with 50.h4 is less accurate, because Black frees his king with 50...♔g6 51.h5+ ♔f6 and it is not so easy yet to win.) ; The best defense was again to bring the king 49...♔g6! when White should probably transpose to the 49...Ra1 50.h4 line by playing h4, because the direct 50.♖d5 ♖c2 51.♖xa5 ♖xh2 gives Black counterplay to create an h- passed pawn. The trade of the b4 pawn for the one on a2 is another little help for Black to get closer to draw, while going for the b4 pawn with Kd3-c4, allows Black to play Rf2.]

50.♖d7+ ♔g6 51.♖d6+ ♔g7

52.♖a6! After the serious g5 weakening, it is time to set Black into passivity.

52...♖c5 [52...♖c2 is already met by 53.♖xa5 ♖xh2 54.♔f5! and Black cannot avoid check on a7 and Kg6 next. 54...♖f2 55.♖a7+ ♔f8 56.♔g6 ♖xf3 57.♔xh6+- and the g5 also falls.]

53.h3 Shirov intends to create a passed pawn with f4. He has time for everything now, as Black does not have anything better than passing with his king on g7-h7.

53...♔h7 54.f4 gxf4 55.♔xf4 ♔g7 56.h4 Slowly but surely, White is making progress.

56...♔h7

57.♖a7+! Shirov lives with the chance to squeeze the black king to the 8th rank. In rook endgames, it is always a good idea, what the defensive side should try to avoid.

57...♔g8 [57...♔g6 loses to 58.h5+ ♔f6 59.♖h7+- is the justification of giving the 57.Ra7 check!]

58.g5! Accomplishing the plan of creating the passed pawn!

58...h5 [58...hxg5+ does not change anything, White wins after 59.hxg5 ♔f8 60.♔g4! The king keeps the g5 pawn as a shield to cross the 5th rank. 60...♔g8 61.♔h5+- followed by Kh6 and g6 next.]

59.g6 ♖d5 60.♗e7! Here comes the last step. White sends the rook away from the 5th rank with Re5 to penetrate with his king.

60...♗d2 61.♔g5 ♖xa2 62.♔h6 ♔f8 63.♗a7 Black resigned as the g-pawn promotes in few moves. **1-0**

**(16) Areshchenko, Alexander(2664)
- Inarkiev, Ernesto(2672)**

Baku Open 2014(9.1),
2014.09.30

GM Arkadij Naiditsch
Best rating: 2737

We are in the last round of the Baku Open and we have this very interesting endgame. It is clear that Black is better, but whether the position is winning is still very unclear. If Black didn't have his h-pawn it would just be a draw as White would just put his king to f1 and wait. But the h-pawn plays a decisive role as it doesn't give White the chance to just wait.

68.♔g3 A very logical move, stopping Black from playing h4. White even wants to give up his rook for the d-pawn in some variations and be in time with his king to support the f-pawn, thus securing the draw.

68...h4+! Black is trying his best practical chance! [68...♔e2 doesn't lead to anything since after 69.♗e7+ ♔f1 70.♗d7 it is impossible to improve the position.]

69.♔g2? This is a mistake, but the position is still a draw. [White needed to be brave and play 69.♔xh4! Not an easy move to make with little time on the clock. 69...♔e2 (69...♗xf2

70. ♔g5 with a draw.) 70. ♖e7+ ♕xf2 and here comes the move that White probably missed:

71. ♕g5!! The only move that saves the game! (71. ♖d7?? 71... ♕e3 72. ♖e7+ and the key idea of Black is 72... ♕f4 with the threat of playing d1 and Rh6 mate. White is lost.) 71... d1=♖ 72. ♕xf6 Black is a queen up, but with the strong pawn on f7 White should easily be holding the draw.]

69...h3+! Now the difference is that White will not have Kg5 anymore.

70. ♕h2 is the only chance. [70. ♕xh3? 70... ♕e2 71. ♖e7+ ♕f3 and Black is winning.]

70...♕e2 71. ♖e7+ ♕xf2 Black has collected the f2 pawn for free.

72. ♖d7 ♕e1 73. ♖e7+ ♕d1 74. ♖d7 and we are back to where we were, except that the f2 pawn is gone. The question now is whether Black can force White to play Kxh3 to get the winning position.

74...♖f5 A waiting move, as both players were probably playing on their increment.

75. ♖e7 ♖f3 76. ♖d7 ♖f4 It seems like Black is just making some random moves, but in fact Inarkiev is preparing a very pretty trap.

77. ♕xh3?? Falling into Black's trap... To make a draw, all White needed to do was to continue waiting with his rook [The right move was 77. ♖e7 77... ♖f6 78. ♖d7 and I don't see how to improve the position for Black. It is just impossible to force White to play Kxh3 and the only way is to play Rf2, after which Black has no more mating ideas. 78... ♖f2+ 79. ♕xh3 ♕e1 80. ♖e7+ ♕f1 81. ♖d7 Once again the position is just a draw.]

77...♕e2 The only move.

78. ♖e7+ ♕f3 79. ♖d7 I guess Areshchenko thought that because of the bad position of the rook on f4 it is just a draw, but it is not!

79...♖f6! Very beautiful, but not too hard to find.

80. ♕h4 ♕e3! This is the key. Black wants to play next Rxf7 so White is forced to give a check.

81. ♔g3 After this move we are entering a Q vs R endgame, which of course is winning for Black. [After 81. ♖e7+ 81... ♔f4 Black is simply winning because of the double threat of playing d1Q and Rh6 mate!]

81... ♖f3+ Precision until the end... [It was not too late for a mistake: 81... ♖xf7? 82. ♖xf7 d1=♚ and White achieves a draw after 83. ♖e7+ ♔d2 84. ♖d7+ ♔c1 85. ♖xd1+ ♔xd1]

82. ♔g2 ♖xf7 83. ♖xf7 d1=♚ 84. ♖e7+ ♔f4 The black king is escaping over the f4 square.

85. ♖f7+ ♔g5 86. ♖g7+ ♔f6

87. ♖g3 This is already an easily winning position and doesn't require any comments.

87... ♔f5 88. ♔h2 ♔f4 89. ♖a3 ♚c2+ 90. ♔h3 ♚h7+ 91. ♔g2 ♚b7+ We just saw a very interesting rook endgame and of course Black was a bit lucky to win it, but still as we could see it is never too late for a mistake... **0-1**

Editorial Preface

In the FIDE Grand Prix we see a mixture of very interesting and fighting games, while others involve surprisingly careful play. One of the biggest surprises was probably the loss on time by Grischuk, who defended very well in a very difficult rook endgame and when the draw was already so near, Gelfand just won on time. Another big surprise is the win of Andreikin over Caruana in the moment when Andreikin had 1.5/6 and Caruana was the tournament leader with 4.5/6. In the interview, Caruana said that he played a horrible game beginning from move one 1.e4 d5? :) As we can see, the World Nr2 is not losing his "dark" humor.

In the Isle of Man the last rounds will decide of the winner. Vachier Lagrave, Adams, Howell and Short will probably fight for the top prices.

In the Croatian league the team of Zagreb is dominating the Championship with Malakhov and Korobov on the first 2 boards.

The Millionaire Chess Open in Las Vegas is also under way, with a 1st price of 100.000 Dollars in the main tournament section. Surprisingly the line-up is everything but great though, as with the exception of Wesley So and Le Quang, there are no GMs over 2700 participating in it.

In a few days 2 interesting matches are going to begin between Giri-Shirov and Timman-Jobava at the Unive Chess event 2014. Of course there will also be an open tournament running besides the matches.

Enjoy issue Nr 137!

Arkadij Naiditsch & Csaba Balogh

1.d4 ♖f6 **2.c4** g6 **3.♗c3** d5 **4.cxd5** ♖xd5 **5.♙d2** Nowadays it is a normal tendency that top players look for an advantage in rare lines.

5...♗b6 The idea of this move is to attack the d4 pawn immediately, so that White is not able to play the e4 move. [5...♙g7 6.e4]

6.e3 [6.♗f3 ; 6.♙f4]

6...♙g7

7.f4!? This is the point of 6.e3. White is taking space and preventing the thematic e5 move.

7...c5 Black is fighting for the center. You can see the first game with this idea with e4-f4 below: [7...O-O 8.♗f3 ♙g4 9.h3

♙xf3 10.♖xf3 c6 11.h4! ♗8d7 12.h5 e6 13.hxg6 hxg6 14.e4 f5 15.g4 ♗f6 16.gxf5 exf5 17.e5 ♗g4 18.d5 cxd5 19.O-O-O with initiative. 1/2-1/2 Svidler,P-Gelfand,B/London ENG 2013 (31); 7...♗8d7 8.♗f3 c5 9.d5+ =]

8.dxc5 ♗6d7 **9.♗e4** [The following way of protecting the pawn is worse: 9.♗a4 9...e5 10.♗f3 exf4 11.exf4 O-O 12.♙e2 b6! 13.O-O ♗xc5 14.♗xc5 bxc5 15.♙c3 ♙xc3 16.bxc3 ♗d7 17.♖b1 ♗b6 18.♗e5 ♙f5 19.♖b5 ♖c7= 0-1 Wang Hao-Giri,A/Beijing CHN 2013 (32)]

9...♙xb2 **10.♖b1** ♙g7 **11.♙c4** By giving the pawn back White gets two important developing moves.

11...O-O **12.♗f3**

12...♗f6 [12...♖c7 13.♖b3 e6 (13...♗xc5? 14.♗xc5 ♖xc5 15.♗g5 Xf7 15...e6 16.♙b4+-) 14.O-O ♖c6 15.♗fg5 White is very active. 15...♗a6 16.♖c2 (16.♙xe6 16...fxe6 17.♗xe6 ♖h8 18.♗xg7 ♗axc5 19.♗xc5 ♗xc5 20.♖b2 ♙g8∞) 16...♗dxc5 17.♙b5 ♖d5 (17...♖c7) 18.♙c3 f6 19.♗xf6+ ♙xf6 20.♙xf6 ♖xf6 21.♖bd1 ♖f5 22.e4 ♖g4 23.♖d8+ ♙g7 24.♙e2 ♖h4 25.g3 ♖h6 26.♙xa6 ♗xa6 27.♖xc8 ♖f8 28.♖b2+ ♙g8 29.♖xa8 1-0 Gunina,V-Lagno,K/Warsaw POL 2013]

13.♗eg5 [13.♗xf6+ 13...♙xf6 (13...exf6 14.O-O ♖e7∞ and the knight exchange gives Black easier play.) 14.e4 e5 15.fxe5 ♙g7 16.O-O ♗c6 17.♙c3 ♖xd1 18.♖fxd1 ♗d8 19.♙a5 ♗e6 20.♙d5

♙h6 21.♚f2± 1-0 Gleizerov,E-Bok,B/Sarajevo BIH 2014 (30)]

13...e6 14.O-O h6 [14...♙e7 15.♘e5 ♘c6 16.♘xc6 bxc6 17.♙a4+=]

15.♘xf7! ♚xf7 16.♘e5

16...♚f8 Radjabov decides to keep the material, but he could also give the rook for development, for example: [16...♘c6 17.♘xf7 ♙xf7 18.f5! White needs to press! 18...gxf5 19.♙xf5 ♙g8 20.♙c2 ♙h8 21.♙f4 with a very complex position.; 16...♘e4 17.♘xf7 ♙xd2 18.♙f3 ♘c3 19.f5!→and Black should not survive here.]

17.♘xg6 ♚e8

18.f5↑ White already has two pawns for the piece, a development advantage and pressure against the black king.

18...♘a6 [18...♙h7 with the idea to solve the problem with the pin over the diagonal. 19.fxe6 ♙xe6 (19...♙xg6 20.♙c2+--) 20.♙xe6 ♚xe6 21.♘f4 ♚e7 22.♙c2+ ♘e4 (22...♙g8 23.♙c3→)

23.♙xb7! ♙xd2 24.♙xd2 ♘xd2 25.♙xe7 ♘c6 26.♙c7 ♘xf1 27.♙xf1 ♘e5 28.♘e6 ♙g8 29.c6 with the threat Rxc7. 29...♘c4 30.♙xa7±]

19.c6 [19.♙c2 19...♘xc5 20.♙c3↑All pieces are very active and White has very unpleasant pressure.]

19...bxc6! [19...♘c5]

20.fxe6 ♙xe6 [20...♙xe6 21.♘f4 ♘c7 22.♙c2 ♘cd5 23.♘xe6 ♙xe6 24.♙b7↑]

21.♙xa6

21...♘e4! We just see typical practical defense. Black gave

the piece back, but the character of the position completely changed as now Black is active as well.

22. ♖b4 ♜xa2 23. ♘e7+ ♚h8 24. ♙xd8 [24. ♖f4 24...c5 (24... ♖xb1 25. ♘g6+ ♚h7 26. ♙xb1 ♙b6 Many pieces are hanging, but White gets the advantage after the forced 27. ♖xe4 ♙xa6 28. ♖xe8 ♖xe8 29. ♘f8+ ♚g8 30. ♙h7+ ♚f7 31. ♙g6+ ♚g8 32. ♙xe8 ♙a1+ 33. ♚f2 ♙f6+ 34. ♚e2 ♙b2+ 35. ♚f3 ♙f6+ 36. ♚e4 ♙h4+ 37. ♚d3 ♙xb4 38. ♘e6+ ♚h7 39. ♙xc6+=) 25. ♖xe4 ♙xd1+ 26. ♖xd1 cxb4 27. ♖b5

27... ♚h7! is a strong move because the most important thing is to save the unpleasant b-pawn. 28. ♖xe8 ♖xe8=]

24... ♖axd8 25. ♘xc6 ♖xb1 26. ♘xd8 ♖xd8 27. ♖xb1

27... ♖b8! The last accurate move which leads to an endgame with opposite colored bishops.

28. ♖d3 ♘c3 29. ♖xc3 ♖xb1+ 30. ♖xb1 ♖xc3 31. ♚f2 1/2-1/2

Best rating: 2655

**1.d4 f5 2.c4 ♘f6 3.g3 g6 4.♙g2 ♙g7 5.♘c3 d6 6.♗f3 O-O
7.O-O**

7...♞e8 This is a typical move in the Leningrad System. Black is preparing to play e5 and also very often the queen is transferred into the attack after h6-g5-Qh5. [7...c6 This is the main line and the most solid move for Black, which was played for example by Nakamura many times.; 7...♘c6 The idea of this move is to play e5, but this is not the best way for Black. 8.d5 ♘a5 (8...♘e5 9.♗xe5 dxe5 10.♞b3 ♙h8 11.c5 h6 12.♞d1 g5 13.♙d2+= with the idea Rac1-Be1.) 9.b3 is an interesting option for White. (9.♞a4 9...c5 10.dxc6 ♗xc6∞) 9...♗e4 10.♗xe4 ♙xa1 (10...fxe4 11.♗d4 c5 12.dxc6 ♗xc6 13.♙e3±) 11.♗eg5 c5 12.e4 fxe4 13.♗h4→and the black king is under strong pressure.]

8.♞e1 ♞f7 [8...e5 9.dxe5 dxe5 10.e4!↑This is the point of 8.Re1, but even this position is still unclear, which Kamsky proved in his game against So.; 8...♗e4? 9.♗xe4 fxe4 10.♗g5+—]

9.e4 fxe4 A few games finished very quick after [9...♗xe4 10.♗xe4 fxe4 11.♞xe4 ♙f5?

12.♗g5! ♞f6 13.♞h4 h6 14.♙d5+ e6 15.♗xe6! ♙xe6 16.♞f4 ♞e7 17.♞e4 ♞f6 18.♙xb7 ♞f7 19.♞xe6 ♞xe6 20.♙xa8 c6 21.d5+— 1-0 Pelletier,Y-Koch,J/Mulhouse FRA 2011 (26)]

10.♗g5 [10.♗xe4 10...♗c6 11.♗eg5 (11.d5 11...♗xe4 12.♞xe4 ♗e5 13.♞f4 ♗xf3+ 14.♞xf3 ♞e8 15.♞xf8+ ♞xf8=) 11...♞xc4 with very complex play. Black won the pawn but the queen will be in trouble. 12.♙f1 ♞d5 13.b3 ♞f5 14.♙d3 ♞g4 15.h3 ♞d7 16.♗e6 ♞xe6 17.♞xe6 ♙xe6 18.♗g5 ♙d7 19.♙e3± 1-0 Reinderman,D-Muzychuk,A/Aix-les-Bains FRA 2011 (49)]

10...♞xc4 11.♗gxe4 ♗xe4 12.♞xe4 ♞f7 The queen is now back to a defensive position.

13. ♖f4 ♕f6

14. ♘d5 White has compensation for the pawn thanks to his active pieces.

14...g5 is an important move which forces White to put the rook on f3 and then one of Black's threats will be Bg4. [14...♖a6 15. ♖b3 (15. ♘xf6+ 15...exf6 16.d5 with the idea b3-Bb2 and it looks like White will have the initiative.) 15...c6 16. ♘xe7+ ♖g7 17. ♘xc8 ♖xb3 18.axb3 ♖xc8 19.d5 Otherwise Black would play the strong d5. 19...c5 20. ♖fa4 ♖c7 21. ♕f1 ♘b4 22. ♖xa7 ♖xa7 23. ♖xa7 ♕d4 and in my opinion Black should be fine here.]

15. ♖f3 [15. ♘xc7 15...gxf4 16. ♕xf4 ♘c6 17. ♘xa8 ♘xd4†]

15...c6 [15...♘c6 16. ♕e3 (16. ♕xg5? 16...♖xd5+-) 16...♖h8 (16...♕g4 doesn't always work because of 17. ♖xf6 ♕xd1 18. ♖xf7+-) 17. ♘xc7 ♖b8 18. ♘d5 ♖g6 and the rook is badly placed on f3.]

16. ♘c7 [16. ♘xf6+ 16...exf6 17. ♕xg5 ♕g4 18. ♖xf6 (18. ♕h6!? 18...♖e8 19.h3 ♕xf3 20. ♕xf3†) 18...♖xf6 19. ♖xg4 ♖xf2+ 20. ♖h1 ♖f5 21. ♖h4 ♘d7 22. ♕e4 ♖f7 23. ♕e7 ♖fe8 24. ♕xd6 ♖e6 25. ♕b4 ♖ae8† and Black has the initiative.]

16... ♕g4

17.d5 [17. ♘xa8 17...♕xf3 18. ♕xf3 ♘a6 19.d5 ♕g7 (19...c5 20. ♕h5 ♖g7 21. ♖b3 ♕d4 22. ♕e3 c4 23. ♖xc4 ♕xe3 24.fxe3 ♖xa8 25. ♖f1 ♖f8 26. ♖xf8+ ♖xf8 27.b4+= White is slightly better since Black has problems with the knight.) 20. ♕g2 (20. ♖g2 20...g4) 20...♖xf2+ 21. ♖h1 ♖xa8 22.dxc6 bxc6 23. ♕xg5 ♖b8; 17. ♖xf6 17...exf6! and the knight on c7 is lost.]

17...cxd5 18. ♕xg5 [18.h3

18...e6! is the most accurate. (18...♕xf3 19. ♕xf3 e6 20. ♘xe6!±) 19. ♖xf6 ♕xd1 20. ♖xf7 ♖xf7 21. ♘xa8 ♘a6 22. ♕xg5 ♕a4 23. ♖c1 ♖xa8=]

18...♖d7 [18...♖a6]

19.♗xa8 [19.♕xf6 19...♕xf3 20.♖xf3 ♗xf6 21.♗xa8 ♖xa8=]

19...♕xf3 [19...♖xa8 20.♖xf6 ♗xf6 21.♖b3 e6 22.f3 ♕f5 23.♖c1+= with the queens on the board, White has a chance to prove the advantage of the bishop pair.]

20.♖xf3 ♕xg5 21.♖xd5 ♖xd5 22.♕xd5+ ♔h8 23.♗c7 ♖c8 24.♗e6 ♕f6 [24...♖c1+ 25.♖xc1 ♕xc1 26.♕xb7 ♕xb2=]

25.♖e1 ♗c5 After this sequence of forced moves, the position is drawish now. [25...♕xb2 26.♕xb7 ♖c1 27.♖xc1 ♕xc1=]

26.♖e2 ♗xe6 27.♕xe6 ♖c1+ 28.♔g2 ♖b1 29.♕d5 ♖xb2 30.♖xb2 ♕xb2 31.♕xb7 An interesting fighting game, but probably only for the fans, as it looks like both players had prepared this line very well. **1/2-1/2**

(3) Caruana, Fabiano(2844) - Gelfand, Boris(2748) [B90]

Baku FIDE Grand Prix 2014(2.2),
2014.10.03

GM Csaba Balogh
Best rating: 2672

Caruana and Gelfand continue their thematic opening discussion in the Sicilian Najdorf defense.

1.e4 c5 2.♗f3 d6 3.d4 cxd4 4.♗xd4 ♗f6 5.♗c3 a6 6.f3 White avoids the 6.Be3 Ng4 variation and starts with the 6.f3 moveorder. This one also allows an extra option for Black, to try the 6...Qb6 line, but Gelfand rather chooses his favorite 6...e5.

6...e5 7.♗b3 ♕e6 8.♕e3 h5 9.♖d2 ♗bd7 10.♗d5 Caruana has already played many games for this position, including one against Gelfand...

10...♕xd5 [10...♗xd5 11.exd5 ♕f5 is the alternative for Black.]

11.exd5 g6 12.♕e2 ♕g7

13.♗a5 Caruana deviates from his own game against Gelfand with this move. The move has several ideas. First of all, it

attacks the b7 pawn and tries to get the c6 square for his knight. Second, White has pawn majority on the queenside and the longterm idea to make use of it is the plan of c4, b4, c5. However if White starts with c4, then Black has the strong response to push a5, followed by b6, creating strong blockade on the dark squares. [The previous encounter from the January of 2014 went with 13.O-O 13...O-O 14.♖ac1 b6 15.h3 ♜e8 16.g4 also with an extremely complex game, which was later won by Caruana. I have commented also this game in a previous CEWN.]

13...♞c7 Black naturally does not want to allow the knight's jump to c6.

14.c4 e4 Black creates his counterplay in the center and on the kingside, where he has his pawn majority. He also opens the diagonal for his strong bishop and creates some nice squares for his knights on e5 or in case of 15.f4 on Ng4.

15.O-O exf3 16.gxf3! This looks illogical at first sight, but White's kingside is much safer if he controls g4 square. White could later play Rf2 and Bf1, controlling all the important squares on the kingside. [16.♙xf3 is strongly met by 16...♘g4! White is forced to give up the pair of bishops.]

16...O-O 17.b4 ♜fe8 18.♞ac1 Both sides are making their most useful developing moves. The game is heading in still waters in a complex position, when suddenly Gelfand takes a fantastic decision...

18...♞xe3! An intuitive exchange sacrifice! Black is aiming for compensation on the dark squares, all his pieces are becoming very active. [In case of some logical and calm continuation like 18...♞e7 doubling the rooks on the e-file, White maintains an advantage after 19.♙f4 ♜ae8 20.♞f2!+= followed by Bf1. The two bishops are perfectly neutralizing the e-file and White creates serious threats, connected with c5!]

19.♞xe3 ♜e8 White is facing a difficult decision. The e3 bishop was controlling perfectly the c1-h6 and the g1-a7 diagonals. Now, the queen is forced to choose which diagonal to give Black. He must allow either Bh6 or Qb6.

20.♞d2 [In case of 20.♞f2 Black gets excellent compensation after 20...♙h6 21.f4 ♜e4!]

20...♙h7?! Black would like to get his bishop to h6, but this is a bit too slow kind of execution of the right plan.. [It was much stronger to play 20...♞b6+! 21.♙h1 ♙h6! 22.f4 This is already an achievement, since Black has spared the Kh7 move. But White had nothing better. (On 22.♞xh6 22...♞xe2 White's pawns are loose. The b4 is hanging, the knight is suddenly misplaced on a5. The e2 rook turns out to be very active and it can be exchanged with Re1 because of taking and Qxb4. We can see the power of the black pieces in the next variation: 23.a3 looks natural to protect the b4, but it is actually losing:

23...♔d4! Threatening to attack the h2 pawn with the queen and after 24.♖ce1

24...♘g4!! wins decisive material as 25.fxg4 leads to mate 25...♔e4+--+) 22...♘e4 23.♔e1 It is clear that Black has enough compensation here. He can choose here between some tempting options 23...♘ef6 (23...♔d4 is more human to active even more the pieces 24.♘xb7 ♘df6 with terribly active pieces.)]

21.♘b3 White is an exchange up, therefore Caruana changes the plan and tries to consolidate his position, but bringing back his pieces. This is a very clever reaction and the move also serves to meet the Qb6 idea with c5! [However the machine considers 21.♔g2 21...♘h6 22.f4 ♘e4 23.♔d3 to be much stronger with an advantage for White. In such positions, it is impossible to compete with the strongest machines. At the end, always he will be the one who is right! Caruana's 21.Nb3 was more human decision.]

21...♘h6 22.f4 ♘e4 23.♔e1 The white pieces are temporarily pushed back, but they are preventing all the direct threats. Therefore Gelfand decides to continue activating his pieces...

23...♘df6 [23...♔b6+ 24.♔h1 ♔e3? with the same purpose to active the pieces is much worse, because of 25.♘f3 and White consolidates.]

24.♘d3 White must operate with small moves, using the fact that Black cannot gain any benefits from the pin on the e-file. White intends to play Rc2-e2!

24...♔d7! Very nice answer also from the Black side. The last piece which could be improved was the queen, therefore Gelfand drives it to h3 or g4! [There is a forced line to win a pawn with 24...♘c5 25.♔d2 ♘xd3 26.♔xd3 ♔b6+ 27.c5 ♔xb4 but now White maintains the initiative after 28.♖c4 ♔b5 29.a4 ♔d7 30.c6+ =]

25.♖c2! White continues his plan and also prepares to meet the Qg4 check with Rg2. There Black plays the more direct queen move.

25...♔h3 attacking the d3 bishop.

26.♔d1 The most human reaction again, but this is an inaccuracy, allowing a tactical blow for Black. [The computer suggests the inhuman 26.♔e2 protecting the bishop, but it leaves the queen in the pin and also deprives himself from playing Re2. It is impossible to make such moves for a human, but the machine claims an advantage for him. 26...♘f2 (26...♘g3? is met by 27.♔f3!) 27.♘xg6+ fxg6 28.♔xf2 ♔e4 29.♘d2 ♔xf4 30.♔e2 is gives on White's favor but of course the position is looking extremely dangerous, very difficult to go for it.; 26.♘xe4 is wrong because of 26...♔xe4 27.♔g3 ♔f5!]

Black wins a pawn and keeps his very dangerous pieces.]

26...xf4! The small tactical shot solves the problems. All pieces were standing perfectly, so the position was calling for a direct blow.

27. f3 Caruana decides to play on. [White could have forced a draw with 27. f4 27... e3+ 28. ff2 fxf2 29. fxf2 g4 30. f3 fxf2 31. fxf7+ h8 32. f6+ g8 33. fxg6+ f8 34. f6+ with perpetual check. Neither side can avoid this line is White takes back on f4.]

27...xf3 28. fxf3 Black is still down materially, as he has only one pawn for the exchange, but his very active pieces supported with further active moves are giving him enough compensation.

28...g5! The bishop cannot be taken because of Nh3 and

Black invades with his rook along the e-file.

29. f1 e3! 30. c1 g4! Very nice play by Gelfand! White's position is still looking very dangerous, despite that the queens are off the board.

31. c5 Caruana is looking for counterplay with the c- passed pawn.

31...dxc5 32. bxc5

32...e8? This is too passive, not in the spirit of the position. [The right move was 32... e5 with the idea to play Rh3, which was not possible right away as the the bishop was hanging on f4 (Nh3 works no longer). 33. d6 (On 33. c6 33... bxc6 34. dxc6 e7 and Rh3 next.) 33... h3! 34. d7

34...hx2+! 35. g2 (35. f2 35... f2 36. d8= f h3#)

35...♖e3+ 36.♔f2 ♘c7 with Black's advantage, but both players has spent most of their time in the complex middlegame and it was very difficult to find these ideas.]

33.h4? The most human move again, but it spoils the win. White misses an unexpected tactical blow:

[33.♔h1! was the winning move, the bishop is hanging now on f4. If it goes away, h4 sends away the knight and wins the f7 pawn with check. 33...♖e3 (33...♘e3 34.h4) 34.♖e2! also wins.]

33...♖e3!! This brilliant move forces perpetual check! [Caruana was probably expecting 33...♖h3+ 34.♔g2 ♖e3 but here the difference is 35.♖f3! and white is winning.]

34.hxg5 White had nothing better.

34...♖g3+ 35.♔h1 [35.♖g2? loses to 35...♘e3+ 36.♔h1 ♖h3+]

35...♖h3+ 36.♔g2 ♖g3+ 37.♔h1 ♖h3+ A great fighting draw!

Endgame section

(14) Andreikin, Dmitry(2722)
- Caruana, Fabiano(2844)

Baku FIDE Grand Prix 2014(7),
2014.10.09

GM Arkadij Naiditsch
Best rating: 2737

49.♔g2 The pawn has to be protected, but White also had another option. [The logical move 49.♖d2 with the idea of putting the rook behind the pawn, which is usually good. 49...♖c7 50.♖c2 ♔f6 51.♔g3 ♔e6 would lead to an endgame where White needs to calculate accurately whether the position is winning or not, because the black king is coming to d5. So Andreikin makes the practical decision in the game not to enter these complications.]

49...♖f4! Black is trying his best chance and this is to get the rook behind the c-pawn. In case of passive play by Black, the white king will slowly come to e3 and then e4, after which the game would be over.

50.♖e6 White is winning a second pawn on e5, but probably another move would have led to an easier win... [50.c6 looks easier. 50...♖c4 51.♔f3 Now the white king needs to get to d3. 51...g5 52.♔e3 e4 Black is trying to create a fortress, but of course it doesn't work because of 53.f3! and White's position is totally winning.]

50...♖e4 Before giving the e5 pawn, Caruana wants White to weaken the second rank.

51.f3 [51.♔f3 51...♖e1 and it is not so easy for White to cross the e-file with his king.]

51...♖e2+ 52.♔f1 So the e5 pawn is lost, but now the white king is of course very badly placed on f1. [Of course not 52.♔g3? 52...♔f7 followed by Rc2 next and Black has very realistic drawing chances.]

52...♖d2 A strange looking move, but maybe Black's best chance. [After 52...♖c2 53.c6 ♔f7 54.♖d6 Black just can't do anything about White playing Ke1-Kd1.]

53.♖xe5 [Black's idea would come true after 53.♔e1? 53...♖d5 54.c6

54...♔f7! and the white rook is sort of trapped on e6. 55.c7 ♖xc5 56.♗xe5 ♜xc7 with a drawn position.]

53...♕f6 This allows White to finally put his rook behind the c-pawn. [53...♜c2 might give Black slightly more practical chances. Now White has a lot of different options, but let us check the most logical one: 54.♜e7+ ♔f6 55.♜c7 White's idea is to play Rc8, c7 and the push the f-pawn until f6. Of course this all just happens in case Black puts his king to g7 and keeps on waiting, so he needs to act quickly. 55...♕g5 56.♕e1 The white king is close to d1. 56...♕h4 57.♜c6 ♕xh3

58.♕d1 is the most accurate. 58...♜c3 59.♜xc3 and White is still winning.]

54.♜e2! Exactly! The white rook is going to be perfectly placed on the c-file.

54...♜d1+ 55.♜e1 ♜d3

56.♜c1! White should not care about the f3 pawn, as the c-pawn will guarantee him a winning pawn endgame.

56...♜xf3+ 57.♕e2 The black rook needs to hurry back to c8 now.

57...♜a3 58.c6 ♜a8 59.c7 ♜c8 All White needs to do now is to bring his king to the center.

60.♜c5 [Of course 60.♕e3 60...♕e5 61.♜c5+ ♕d6 62.♕d4 would win as well.]

60...♕e6 61.♕d3 h5 Black can't take the c7 pawn because of the winning pawn endgame for White and the rook can't move from c8. The position is totally lost.

62.g5 Of course White does not exchange the pawns.

62...♕d6 63.♕c4 The white king is going to b6.

63...h4

64. ♖b5 and Black resigned because the pawn endgame after 64...Rxc7 65.Rxc7 Kxc7 66.Kc5 Kd7 67.Kd5 K77 68. Ke5 Kf7 69.Kd6 is totally winning for White. A great victory by Andreikin in a game where not many would have guessed the outcome with the right result. **1-0**

(15) Filippov, Anton(2589)
- **Saric, Ivan(2678)**

Croatian league,
2014.10.05

GM Csaba Balogh
Best rating: 2672

Black has two extra pawns and his position is winning. However after the most natural move, White suddenly holds the draw in a very instructive way.

1... ♖b3?? Saric wants to save both of his pawns, but his rook remains passive. [1... ♖c4+ was the winning move 2. ♖xb5 (2. ♖d5 2...e3 is already hopeless as the king cannot come closer to the e-pawn.) 2... ♖c8—+ and the king is cut along the c-file. The e-pawn automatically promotes with the help of the king.]

2. ♔d4 e3

3. ♔e4! Perhaps, Saric has underestimated this move and the game is drawn. The point is to keep the shoulder against the black king to avoid coming to f3. White is threatening with Rg1 check, sending the king even further followed by Re1 and taking on e3, as the white king will be in the square of the b-pawn.

3...e2 [3... ♔g3 prevents Re1, but moves into 4. ♖f3+ ♔g2 5. ♖xe3=; 3...b4 4. ♖g1+ ♔h3 5. ♖e1= and White takes on e3 next move.]

4. ♖g1+ ♖g3 [4... ♔h3 5. ♖e1 ♖b2 6. ♔f3= ends in a draw again.]

5. ♖e1 ♖g2 6. ♔e3! Threatening again to take the pawn, but Black also has a tricky response now...

6... ♔f5! After any other moves, White would have taken on

e2, but now the pawnendgame is lost after Rxe2.

7. ♔f3! If Rxe2 does not work directly, then White should improve the circumstances. [In case of 7. ♖xe2 7... ♖xe2+ 8. ♔xe2 ♔e4! and Black takes the opposition. The rest is an easy theoretical win 9. ♔d2 ♔d4 10. ♔c2 ♔c4 11. ♔b2 ♔b4! 12. ♔a2 ♔c3—+ etc...]

7... ♖g4 [7... ♖h2 is met by 8. ♔g3 and Rxe2 next. White holds, because he also cuts the black king along the e-file. Without it's support, the b-pawn cannot be promoted.]

8. ♔xe2 This is the most principled to approach towards the pawn, but it requires perfect calculation... [White also holds after 8. ♖xe2 8... ♖f4+ 9. ♔g3! (9. ♔e3?? transposes again to the lost position 9... ♖e4+ 10. ♔d3 ♖xe2 11. ♔xe2 ♔e4—+)]

8... ♖e4+ 9. ♔d2 ♖xe1 10. ♔xe1 We reach an instructive theoretical draw. Black cannot win despite getting the distant opposition, because of the misplacement of his b-pawn...

10... ♔e5 The most challenging move for White... [10... ♔e4 is now met by 11. ♔e2! This time it is White who keeps the oppositon and the game is drawn. 11... ♔d4 12. ♔d2 ♔c4 13. ♔c2 ♔b4 14. ♔b2= etc.]

11. ♔d1! Excellent! White can only leave the first rank, if Black puts his king on the 4th rank... [11. ♔d2?? loses again to

11...♔d4–+]

11...♔d4 [On 11...♔d5 12.♔c1! ♔c5 13.♔b1! and here we can see the misplacement of the b-pawn. If it was on b6, Black was winning with Kb5, but now he cannot hold the opposition any longer and the game is drawn after 13...♔b4 (Or 13...♔c4 14.♔c2=) 14.♔b2=]

12.♔d2! b4 13.♔c2 [Draw was agreed in view of the well-known stalemate 13.♔c2 13...♔c4 14.♔b2 b3 15.♔b1 ♔c3 16.♔c1 b2+ 17.♔b1 ♔b3=] **1/2-1/2**

Clash of the Titans

(16) Botvinnik, Mikhail
- Larsen, Bent[D36]

Noordwijk(1), 1965

GM Kamil Miton
Best rating: 2655

1.c4 e6 2.♘c3 d5 3.d4 ♘f6 4.cxd5 exd5 5.♗g5 c6 6.e3 ♗e7
7.♚c2 O-O 8.♗d3 ♘bd7

9.♘ge2 This system is actually named after Botvinnik nowadays. Usually White develops the knight to f3, for example [9.♘f3 9...♗e8 10.O-O ♘f8 11.h3 ♗e6 (11...g6 Black is preparing a maneuver which will help him to exchange the light squared bishops. 12.♗ab1 ♘e6 13.♗h4 ♘g7 14.b4 a6 15.a4 A typical plan with the idea to create some weaknesses on the queenside. 15...♗f5 16.b5 axb5 17.axb5 ♗xd3 18.♚xd3 ♘f5 19.♗xf6 ♗xf6 20.bxc6) 12.♗ab1 (12.♘e5 12...♘d6d7!]

A strong move which guarantees Black the important exchange. 13.♗xe7 ♗xe7 14.f4 f6 15.♘f3 White can try to attack over g4 but Black will be on time with his counterplay over c5.) 12...♘d6d7 13.♗f4!+= with b4-a4-b5 next.]

9...h6? This move is bad for two reasons: 1. Black will not be able to realise the thematic knight transfer Nf8-Ng6 2. the black king becomes weaker and White gets the additional plan of castling queenside. [9...♗e8]

10.♗h4 ♗e8 [10...♘h5 11.♗xe7 ♗xe7 12.O-O-O!?→]

11.f3 This is the point of Botvinnik's plan. White is preparing the e4 move, with the idea to take control of the center.

11...c5 Black is fighting for the center as well!

12.O-O a6

13.♗ad1 [13.a4!? with the idea to prevent b5, but now Black can play 13...cxd4 14.exd4 (14.♘xd4 and here the pawn on a4 is not needed.) 14...♘b8!?∞with the idea to improve the knight, ideally by transferring it to b4.]

13...b5 14.♗f2 [14.dxc5 14...♗xc5 15.♘xd5? (15.♗h1!∞)

15...xd5! 16. exd8 Qxe3 17. Kb1 Qxd1+ 18. Kh1 Qf2+ 19. Rxf2 exf2 20. a5 b7= and the two rooks are much stronger than the queen here!]

14...c4 15. f5 b6 16. g3 The structure has changed, so White is back to his plan with e4 and Black should try to get some initiative on the queenside.

16...f8 [16...b4 17. exxc8 Rxc8 18. Qce2=]

17.a3! Black didn't push b4 in the last move so White stops it at least temporarily.

17...b7 18.e4 g6 19. h3 Other moves are not enough, for example [19.e5 19...gxf5 20.exf6 Qxf6 21. Qxf5 Qg6=; 19. exg6 19...fxg6 20.e5 Kh7 21.exf6 Qxf6=]

19...a5! Black needs to hurry!

20.e5

20...b4 21. Qce2 [21.exf6 21...bxc3 22.bxc3 Qxf6=]

21...h7 22.f4 Both sides play according to their plans.

22...c6 [22...bxa3 23.f5! g5 24.f6 axb2 25. f5 Qxf6 26.exf6 Qxf6 27. Qh5+-]

23.Qa1!? An interesting decision. White protects the pawn and escapes from the Ba4 threat, although players with Tal's style could easily play [23.f5!? 23...a4 24. Qb1 Qxd1 (24...g5) 25.fxg6 fxg6 26. Qxg6+ Qg7 27. Qe3! Qf8 28. Qxf8+! Qxf8 29. Qxh6 Qa7 30. Qh5+-]

23...a4 24. Qb1

24...f5! A typical idea. Black is trying to stop White's pressure.
[24...c3 25.bxc3 ♘c4 26.f5! Again! 26...♘d2 27.♙d3 ♘xf1
28.fxg6→]

25.axb4 axb4

26.♘xf5! White had no choice if he wanted to keep his attack going!

26...gxf5 27.♙xf5 ♙e7 28.♘g3 This is the critical moment! White has 2 pawns and a strong attack for the piece. The position is very complex but here Larsen made a big mistake:

28...♙d7? From a logical point of view this exchange can be good for Black, but unfortunately in this case it is not because it allows White to activate his queen. [28...♙b5 leads to an unclear position after 29.♘h5 ♙h8∞]

29.♙xd7 ♘xd7 30.♙g6+ ♙g7 31.♙c6! ♙xa1 32.♙a1 ♙f7 33.♙a7 ♘xe5? This is the last mistake. Black could still have fought on after [33...♘b8 34.♙b6 ♘d7 35.♙b5 ♙e7 setting the trap that if White plays 36.f5 then Black has 36...♘xe5!→]

34.dxe5 ♙e6 35.♙xe6+ ♙xe6 36.♘f5 ♙c6

37.♙f1+— The black pawns are not dangerous, White is a pawn up and has the better pieces, so the position is just winning for him.

37...c3 38.bxc3 bxc3 39.♙e3 ♙c5 [39...c2 40.♙c1 ♙b6 41.♙e2+—]

40. ♖xc5 ♜xc5 41. ♖a1 ♘f8 42. ♔e2 ♘e6 43. g3 h5 44. ♔d3 d4 45. ♘d6 [45. ♘xd4 45... ♜d5]

45... ♜c7 46. ♘e4 ♔h7 47. f5 ♘d8 48. ♘f6+ ♔h6 49. ♘d5 ♜b7 50. e6 ♘c6 51. ♜a6 ♘e5+ 52. ♔xd4 1-0

Editorial Preface

The 1st Grand Prix tournament in Baku came to an end with quite a surprising outcome.

The first place was shared by 2 participants, with a score of only +2, so 6.5/11. One of them was not so difficult to predict, and that is Caruana, who was actually very unhappy about his own play as he mentioned in several interviews, and Boris Gelfand! It seems like the older Gelfand gets, the better his place. He is already 44 years old, but playing very solid and strong chess, without giving big winning chances to his opponents. The 3rd place was shared by 5 players and one of them was Grischuk, who scored 3.5/4 in the last rounds, saying in an interview that it happened only because he changed to a hotel which had windows! :)

Another big surprise was the play Dominguez who scored a very negative 3/11 and dropped a lot of rating points.

The Millionaire Open was won by So who beat Robson 1.5-0.5 in the final. It was clearly a very disappointing tournament for the organizers, with just 2 players over 2700 ELO and just around 500 participants instead of the expected 1000+.

The 2 matches in Unive 2014 came to an end as expected. Giri-Shirov was a crush with a final score of 4.5-1.5 in favor of the former and the match Jobava-Timman ended with the same result, but here Timman missed a lot of opportunities.

In the World Junior Championship Goryachkina defended her title with a fantastic 11/13 and a 1.5 point lead over Khademalsharieh and Chumpitaz, who both finished on 9.5/13.

In the open section the Chinese did it again: 1st place goes to Lu Shanglei with 10/13, 2nd place to Wei Yi with 9.5 and the 3rd place to the Russian talent Fedoseev, also with 9.5.

Next week onward, we can look forward to the start of the German Bundesliga, the Corsican Rapid with Anand, Hou and many more and the 2nd FIDE Grand Prix in Tashkent.

With best greetings,

Arkadij Naiditsch & Csaba Balogh

(1) Gelfand, Boris(2748) - Radjabov, Teimour(2726) [E06]

Baku FIDE Grand Prix 2014(10.1),
2014.10.13

GM Csaba Balogh
Best rating: 2672

It is very rare to see such a clear-cut game on the highest level. Radjabov makes a small positional mistake in the opening (he probably mixed up the move order) and Gelfand cruelly makes use of it.

1.d4 ♘f6 2.c4 e6 3.♘f3 d5 Radjabov was heading to the Queen's Gambit after 4.Nc3 Be7. He could expect it, because Gelfand already had a game against Kasimdzhanov in this tournament and usually he does not change his openings too often. However he decides to turn his back on his old repertoire and plays the Catalan opening.

4.g3 ♙e7 5.♙g2 O-O 6.O-O dxc4 This is considered to be the most solid setup for Black, but there are many subtleties that one should be familiar with.

7.♞c2 a6 8.♞xc4 8.a4 is the other huge main line.

8...b5 9.♞c2 ♙b7 10.♙d2 ♙e4 This is the main line, but recently the biggest experts, Aronian, Karjakin and Leko all play 10...Bd6!

11.♞c1 ♙b7 The main move again. Black leaves from Nc3 and Nbd2 developing with tempo. [In case of the most natural development 11...♘bd7 with the intention to equalize with c5, White gets a pleasant edge after 12.♙a5! This is the point of the entire 10.Bd2 setup. 12...♞c8 13.♘bd2 ♙a8 14.♞c2 ♞e8

Black is ready to equalize again with c5, but... 15.b4! and Black has to suffer with a lack of space and weak queenside pawns.]

12. ♖f4 [Now on 12. ♖a5 Black could play 12... ♗c6 as this is the point of the retreat to b7.]

12... ♗d5

13. ♖d1!? This very tricky move by Gelfand was tried in just a few games. White retains the development of the b1 knight. [There were hundreds of games with 13. ♗c3 13... ♗xf4 14. ♖xf4 Black has a wide choice here and one of the main and most decent ones is Qd6, which was played Radjabov in the game.]

13... ♗xf4 14. ♖xf4

14... ♖d6?! Radjabov does not feel the difference between

Rd1 and Nc3 and he gets into deep trouble after the next move! The critical move is 14. ...Nd7, which requires further testing to get a clear evaluation.

15. ♗bd2! This is the point of keeping the knight on b1! Suddenly it is heading to b3, from where it is ready occupy the weak squares on a5 and c5 and the most important point is that it prevents Black from executing the freeing break with c5! If Black cannot play c5, he must be ready for longterm suffering.

15... ♗d7 [15... ♖xf4 16. gxf4 These doubled pawns are rather strong. 16...c5 does not equalize if Black cannot take back with the knight. 17. dxc5 ♖xc5 18. ♗e5 ♖xg2 19. ♖xg2+= and Ne4 or Nb3 is coming next with a typical Catalan endgame, which does not seem much, but actually it is very unpleasant for Black.]

16. ♖ac1 White gets the ideal placement for his rooks.

16... ♖ad8 The c7 pawn is indirectly protected. As the following lines show, the d7 knight is standing in some tactical motifs and Black decides to protect it. [The freeing break with 16... ♖xf4 17. gxf4 c5 does not work now because of 18. ♗e5! ♖xg2 19. ♗xd7 wins the c5 pawn. This kind of idea was the reason why Black played Rad8.; The most natural 16... ♖ac8 also allows the tactical shot 17. ♖xd6 cxd6

18.♖e5!! Without this move, White would not have anything, but now it is close to be decisive. 18...dxe5 (18...♙xg2 19.♖xd7±) 19.♙xb7 ♖xc1 20.♖xc1 exd4 21.♙xa6 and the b5 pawn plus the Rc7 threat are too much for Black to deal with.]

17.♖b3! All the pieces are standing perfectly. It is very sad news for Black that he must forget about c5! This is what White is playing for and the most he can get in the Catalan Opening. [17.♖xc7 was refuted tactically by 17...e5! and the rook is hanging.]

17...♙d5 Another clever attempt by Radjabov to gain counterplay, but Gelfand does not fall for the temptation and he continues with perfect positional moves.

18.♖fd2! White is ready to trade the bishops, whereafter he can also use the c6 square for penetrating with his rooks or knight. [White could have taken a pawn, but after 18.♖xc7 18...e5! 19.♖c1 e4! 20.♖fd2

20...f5 suddenly the initiative passes to Black! Gelfand does not give such a chance and he prefers to keep all the positional advantages to the material ones.]

18...♖b6 Radjabov keeps on trying to compensate the c7 weakness with active piece play. [18...♖c8 is met by 19.♖xd6 ♙xd6 (19...cxd6 20.♙xd5 exd5 21.♖a5± is also not much fun for Black.) 20.e4 ♙a8 21.e5 ♙xg2 22.♖xg2 ♙e7 23.♖c6± with

a hopeless endgame.]

19.♖xc7! Gelfand already grabs the pawn, as the knight has left the d7 square and e5 is simply met by Qxe5!

19...♙xb3 [Other moves are not equalizing either: 19...♖xf4 20.gxf4 ♙d6 (20...♙xg2 21.♖xg2 ♖d5 22.♖a7 ♖xf4+ 23.♖f3±) 21.♖a7 again with a healthy extra pawn for White.; 19...e5 was still the tactical test, but it does not work properly: 20.♖xe5 ♖xe5 21.dxe5 ♙xb3 22.axb3 ♙b4 23.♖c2± looks scary, but White closes the d-file with Be4-d3! and retains his extra pawn!]

20.♖xb3 ♖c4 [20...e5 works again in view of the pin on the d-file, but after taking on b3, a new diagonal is opened for the queen. 21.♖c1+—]

21.♖xd6 ♙xd6 22.♖a7 White's going to end up with an extra pawn in all lines and it is clear now that Black cannot get enough compensation...

22...a5 Another nice try by Radjabov, but Gelfand does not give him any chance today...

23.♖b1! Temporarily going into passivity, but after some consolidating moves White saves his extra pawn and activates his rook. [On 23.♖xa5 Black could have hoped for counterplay with 23...♙c5! 24.♖c7 ♙xd4 25.♖xc4 bxc4 White is better, but the appearance of the opposite colored bishops give Black chances for survival.]

23...♙b4 [23...a4 is met by 24.♖c5 ♙xc5 25.dxc5 and the c-passed pawn becomes very strong. 25...♖d2 26.c6+—]

24.a3 ♖d2 Trying to get the opposite colored bishops endgame, but White is not forced to go for it. [24...a4 25.♖c5+— was somewhat better, but also quite hopeless for Black.]

25.axb4! Simply perfect play Gelfand, although this part of the game is already quite easy on this level.

25...♟xb1 [25...♟xb3 26.bxa5 ♖xd4 27.a6 ♖a4 28.♖d1+- is also resignable. Bc6 is coming next.]

26.bxa5 White has a very strong passer on a5, which is excellently supported by all the white pieces, especially by the g2 bishop and additionally the knight is trapped on b1, so White is threatening the direct Be4!

26...f5 27.♖c7! The new threat is Rc1 against which Black cannot do anything.

27...e5 [27...♖c8 loses to 28.♖xc8 ♖xc8 29.a6 ♖c7 30.♙b7+- a7 next and the pawn promotes.]

28.♖c1 Black resigned. It was amazing that after one single mistake with Qd6 in the opening the position simply collapsed by itself. **1-0**

(2) Indjic, Aleksandar(2554)
- Lu, Shanglei(2533) [A80]

Pune(13), 2014.10.19

GM Kamil Miton
Best rating: 2655

1.d4 f5 2.♟c3 ♟f6 3.♙g5 d5 A logical reaction. Black prevents the plan with e4 and limits the knight on c3.

4.e3 In this variation White also has two other plans: [4.♙xf6 4...exf6 5.e3 ♙e6 and White develops the pieces Bd3-Qf3-Nge2 with the idea h3-g4, when Black plays Nc6-Qd7-a6-0-0-Bd6, with a very solid position.; 4.f3 with the idea Qd2, 0-0-0 and a quick break in the center with e4.]

4...g6 Usually Black plays [4...e6 5.♟f3 ♙e7 6.♙d3 O-O 7.O-O c5 (7...♟e4 8.♙xe7 ♖xe7 9.♟e2!) 8.dxc5 ♙xc5 (8...♟c6!? with the idea not to hurry with capturing on c5, but taking the initiative in the center after e5.) 9.♟e2!+= This kind of maneuver is typical because the knight on c3 is badly placed. White is preparing c4.]

5.h4! A good move and another typical idea.

5...♘g7 6.h5 White doesn't allow Black to easily and comfortably develop.

6...♙e6 [6...♗xh5 7.♖xh5 gxf5 8.♙xh5+ ♔f8 9.O-O-O↑ with a very unpleasant position for Black, as White has huge compensation here and easy play with Ne2-Nf4-Bd3-Rh1 etc.]

7.h6 White takes space and the pawn on h6 will also disturb Black's development. [7.hxg6 7...hxg6 8.♖xh8+ ♙xh8 9.♗h3 ♙f7∞]

7...♙f8

8.f4?! I don't like this move. Now the position is closed and the pawn on h6 unnecessary. The black pieces are not

perfectly placed, so it was more logical to prepare a break in the center after f3-e4. For example: [8.♗h3 8...♙f7 9.♙d2 ♗bd7 (9...e6 10.f3+= with the idea O-O-O and e4 next.) 10.O-O-O c6 11.♙f4! preventing e5, but if Black tries anyway then 11...e5 12.dxe5 ♗g4 13.f3 ♗xe5 14.e4↑]

8...♙f7 9.♗f3 e6 10.♗e2 ♙e7

11.♗c1 From a strategical point of view it looks very good as White is going to take the e5 square under control, but he is losing too much time for this knight transfer. An interesting option was: [11.c4!? with the idea to play Nc3 back and maybe c5-b4 etc.]

11...♗g4 [11...♗e4 12.♙xe7 ♙xe7 13.♗d3+=]

12.♙d2 O-O 13.♙xe7 ♙xe7 14.♗d3 ♗d7 How to improve White's position now?

15.♗f2 [15.O-O-O 15...c5 16.dxc5 ♖fc8 17.♙b1 ♗xc5 18.♗xc5 ♖xc5∞ and the f7 bishop will be activated over e8.]

15...♗df6 16.c3 c5 17.♗xg4

17...dxe4! Black is trying to complicate the position.

18.♞c2?? This is the decisive mistake! White should have played [18.♞f6+ 18...♞xf6 19.♞d1 White keeps a solid position, but black has already taken the initiative. 19...c4!? (or 19...g5 with pressure over the g-file after Kh8-Rg8.) ; 18.♞d1 was an interesting move. 18...fxg4 19.♞e5 g3 20.dxc5 ♞f2 (20...♞xc5 21.♞d4 ♞xd4 22.exd4 ♞e8 23.♞h4 g5 24.fxg5 ♞f2→) 21.♞d4 ♞e8 (21...♞xh1

22.♞c6!) 22.♞g1 ♞c8 23.b4 g5→and b6 next.]

18...fxg4 19.♞e5 cxd4 20.exd4 ♞e8 21.♞c1 [21.O-O-O 21...♞xf4 22.♞d3 ♞f2 23.♞hf1 g3→]

21...♞g3 22.♞h2 The white pieces lost their coordination and Black is ready for the final action: [22.♞g1 22...♞h4→+]

22...g5! 23.♞d3 ♞xf4 24.♞d2

24...♞a4! A nice move! Black doesn't let the white king escape.

25.b3 ♞af8! The last piece comes into play.

26.♞e3 ♞f1 27.♞g1 ♞xh2 28.♞xh2 ♞c7 29.♞d2 ♞f2+ 30.♞e2 ♞xe2+ 31.♞xe2 ♞xc3 Thanks to this victory Lu Shanglei became the World Junior Champion. Many congratulations! **0-1**

**(3) Radjabov, Teimour(2726)
- Dominguez Perez, Leinier(2751)
[D70]**

Baku FIDE Grand Prix 2014(7.5),
2014.10.09

GM Csaba Balogh
Best rating: 2672

We are facing a very sharp and exciting battle, where both players are calculating well and the game ends with a perpetual check.

1.d4 ♘f6 2.c4 g6 3.f3 Dominguez wants to play the Gruenfeld defence and Radjabov opts for the recently popular 3.f3 system.

3...d5 In the spirit of the Gruenfeld. [3...♗g7 4.e4 is a transposition to the King's Indian Saemisch variation.]

4.cxd5 ♘xd5 5.e4 ♘b6 6.♘c3 ♗g7 7.♗e3 O-O 8.♔d2 We have reached another crossroads. Dominguez goes for the old main line...

8...e5 [A few rounds earlier in this tournament, Caruana had defeated Svidler with the white pieces in the recently popular line 8...♘c6 9.O-O-O ♔d6]

9.d5 c6 Perfectly in the spirit of the opening. Black has developed his pieces and allowed his opponent to occupy the center and then he seeks for counterplay by undermining it.

10.h4 This is all well-known with lots of games and theory behind it...

10...cxd5 11.exd5 ♘d7 12.h5 ♘f6 13.hxg6 fxg6 Positionally this is a wrong decision, but the h-file could not be opened because Black gets mated after Bh6. Of course, positional factors are irrelevant in such sharp positions.

14.O-O-O ♗d7 15.♔b1 ♖c8 16.d6 [16.♔a1 is the other main line. In a previous issue, we have commented another fascinating game from the Anand-Gelfand World Championship match, which continued with 16...e4 17.♗d4 ♘a4]

16...e4! A very logical decision. Black opens the diagonal for his Gruenfeld bishop, just like Gelfand did against Anand.

17.♔a1 This is the novelty and the deviation from the previous Dominguez game. Radjabov was definitely very well prepared as he could expect all the previous moves from his opponent. [A year ago Grischuk played 17.fxe4 17...♘g4 18.♗g5 ♔e8 19.♘f3 and here Dominguez improved the Rodshtein-Navara game with 19...♖f7! 20.♗e7 ♖xc3! 21.bxc3 ♔c8! 22.♖c1 ♘a4! Blitzing out all these moves! Quite an impressive preparation!

23. ♖g5 ♖c5! 24. ♗xf7 ♗xc3+ 25. ♖xc3 ♗xc3 26. ♗h6+ ♔g7 Despite the extra rook, White has nothing better than allowing perpetual check with 27. ♖d5 ♖b4+ 28. ♖b3 ♖xe4+ 29. ♖c2 ♖e1+ 30. ♖c1 ♖e4+ 31. ♖c2 ♖e1+ 32. ♖c1 ♖e4+ 33. ♖c2 1/2 Grischuk-Dominguez Perez, Thessaloniki 2013. It is interesting that despite the extremely sharp position, most games finish in a draw with some kind of perpetual check.]

17... ♖e8 Dominguez even knew about this 17. Ka1 move as his answer arrived without much thought and Radjabov also blitzes out his next move...

18. ♗h3 Well, it is time to develop the kingside. White intends to go to g5, bringing another piece to the attack.

18... ♗c4 After a long think, Dominguez decided to grab the pair of bishops and opens the way for his queen to develop to it's most dangerous attacking place to a5! This was new also for Radjabov, since after the necessary take on c4, he was also thinking for an hour in the very complex position. [The computer suggests 18... ♗a4 just like Gelfand played against Anand. Radjabov has probably prepared at home 19. ♗xa4 ♗xa4

20. ♗e2! with the idea to connect the rooks and play Rc1 next! If Black does not do something directly, the middlegame might turn to be very bad for him because of the d6 passed

pawn. 20... ♖c2 (On 20... ♗xd1 21. ♗xd1! and Bb3 Kh8 Ng5 is coming with decisive threats. Black's attack is over and the upcoming White one is going to be extremely dangerous.) 21. ♖d4 ♖xe2 22. ♖c4+ ♔h8 23. ♗g5 looks very dangerous...]

19. ♗xc4+ ♖xc4 Both players were out of their preparation and it was time to calculate the variations on their own. Of course it is very difficult task as both sides have numerous resources and nothing is forced, but one mistake could be decisive. Things were happening very fast so far, but soon due to the complex position, both players found themselves in time trouble. White now needs to decide, as he must choose between Bh6 and Ng5. Both moves have their pluses and minuses.

20. ♗g5 Activating the knight. A check on d5 could be fatal for Black! [20. ♗h6 was the most logical continuation (at least to me), trying to trade the strong bishop. 20... ♗h8 was what Radjabov was afraid of. Of course, it is very difficult to deal with such complications over the board. (20... exf3 is the computer's suggestion. It gives a line which ends in equality after 21. gxf3 (On 21. ♗xg7 21... fxg2! 22. ♖xg2 ♔xg7 looks very dangerous for Black, his king is seemingly much more vulnerable, but the machine is happy and enjoys his extra pawn.) 21... ♗xh6 22. ♖xh6 ♗xh3 23. ♖xh3 (On 23. ♖xh3 23... ♖e6 24. ♗e4 ♖d7 Black seems to protect everything.)

23...♔d7∞) 21.♘g5

The inclusion of the Bh6 Bh8 pair of moves is good White since a check on d5 could lead to mate right away. The drawback is that it closes the h-file, so the sacrifices on h7 are much harder to execute and White no longer has the option to neutralize the long diagonal with Bd4 like it happened in the game... However the machine likes White after 21...exf3 22.♔he1! fxg2 23.♘d5! Indeed, it looks very dangerous.]

20...exf3 21.♘xf3! A clever, cold-blooded decision. White intends to put his bishop on d4 and the knight serves perfectly protects it. [21.gxf3 was more in the spirit of the position at first sight. Keeping the strong attacker on g5, but somehow Black's attack develops faster with 21...♔a5! Black has Rxc3 in mind and the a1-h8 diagonal could cause real problems to White. 22.♘d4 does not work now in view of 22...♔xd4! 23.♔xd4 ♔xg5]

21...♘g4! Black also finds the right solution in the complex position. He now gets a nice possibility to meet the Bd4 move. [On 21...♔a5 22.♘d4 is good for White. He continues with Rde1 and invading e7. The minor pieces are covering everything now.]

22.♘d5! Excellent calculation also by White! Radjabov had to foresee the final position... [On 22.♘d4 Black was intending

to play 22...♘xd4 23.♘xd4 ♘e3! implenting an annoying knight to e3, which cannot be disturbed by Rde1 in view of Rxd4 and check on c2! 24.♔c1 ♔f6 Black has full control over the position and the dark squares. The pawn on d6 might also become a weakness now as the rook does not support it anymore from behind. Black could win it with Rc6.]

22...♘xe3 23.♘xe3 ♔a4! Creating the decisive threat of Be6! White has only one way to deal with it!

24.♘d5! ♘e6!

25.♘e7+! Perfect play by both players and it leads to a draw at the end! [25.♘g5 was tempting, but it loses to 25...♔xd6! A very nice queen sacrifice, which cannot be accepted... 26.♘f6+ ♘xf6 27.♔xd6 ♔xa2+ 28.♔b1 ♔xb2+ 29.♔a1 (29.♔c1 29...♔c8+--+) 29...♔b4+ 30.♔d4 ♘xd4+-- wins.]

25...♔xe7! [25...♔f8 is possible, but better avoided. 26.♘e5! ♔xa2+ (26...♘xe5 27.♔df1+! ♘f5 28.♘xf5+--+) 27.♔b1 ♔xe7 28.dxe7+ ♔xe7 29.♔xh7 and the black king is more vulnerable.; 25...♔h8?? leads to a quick mate after 26.♔xh7+! ♔xh7 27.♔h1+]

26.dxe7 ♔xa2+ [It was possible to continue the fight with 26...♔xe7 27.♔d8+ ♔f8 28.♔xf8+ ♔xf8 29.♔xh7 ♔xa2+ 30.♔b1 ♔xb2+ 31.♔c1 but the game should end with a draw anyway.]

27.♔b1 ♖xb2+! 28.♜xb2 ♕f5+! 29.♔a2 ♕e6+ [29...♜a5+ also just leads to perpetual check: 30.♜a3 ♕e6+ 31.♔b1 as the queen cannot be taken because of e8Q and the e6 falls, Black is forced to make a draw: 31...♕f5+ 32.♔a2=]

30.♔b1 ♕f5+ 31.♔a2 ♕e6+ 32.♔b1 A very nice game! Both players would have deserved to gain more than half a point.
1/2-1/2

(4) Wei, Yi(2641) - Duda, Jan-Krzysztof(2599) [C57]

Pune(13), 2014.10.19

GM Kamil Miton
Best rating: 2655

1.e4 e5 2.♘f3 ♘c6 3.♙c4 ♘f6 4.♘g5 d5 5.exd5 ♘d4 It is a big surprise to see this old and interesting line on this level but the situation before the last round forced the Polish GM to go "all-in". [5...♘a5 6.♙b5+ c6 7.dxc6 bxc6 is the main line.; 5...♘xd5? 6.♘xf7! ♔xf7 7.♜f3+ ♔e6 8.♘c3 ♘e7 9.d4 with decisive pressure.]

6.c3 is the main move and other moves don't bring White any advantage. [6.♘c3 6...h6 7.♘f3 (7.♘ge4 7...♘xe4 8.♘xe4 b5! and Black recaptures the d5 pawn.) 7...♙g4 8.♙e2 ♕xf3 9.♕xf3 ♕b4 10.O-O O-O 11.♜e1 ♜e8= with the idea to exchange on c3, f3 and then take on d5.; 6.d6? 6...♜xd6 7.♘xf7?? is a famous trap! (7.♕xf7+ 7...♔e7 threatening h6. 8.♙b3 ♘xb3 9.axb3 h6 10.♘f3 e4 11.♘g1 ♔f7) 7...♜c6 8.♘xh8 ♜xg2

6...b5 7. ♘f1 [7.cxd4 7...bxc4 8. ♜a4+ ♜d7 9. ♜xd7+ ♘xd7 10.dxe5 ♞xd5+ Black controls the light squares.; 7. ♘d3 7...♘f5+]]

7...♞xd5 8.cxd4 ♜xg5 9. ♘xb5+ ♖d8

10. ♜f3 [10.O-O 10...♘b7 11. ♜f3∞]

10...exd4 [10...♘b7 11.O-O (11. ♜xf7? 11...♞f6++ threatening Bd5 and Qxg2.) 11...e4!? (11...♞b8∞) 12. ♜xe4 ♘d6 The black pieces are very active. 13.d3? and this is a huge mistake which was played in one famous Fischer game, where Black is winning now after a nice combination: (13. ♞e1 was the right move.) 13...♘h2+! 14. ♙xh2

14...♞f4!! 15. ♜xb7 (15. ♜xf4 15...♜xg2#; 15. ♘xf4 15...♜h4+ 16. ♙g1 ♘xe4 17.dxe4 ♜xf4++) 15...♜h4+ 16. ♙g1 ♞e2#]

11. ♘c6 ♞f4 [11...♞b4 12. ♘xa8 ♞c2+ 13. ♙d1 ♘g4 14. ♙xc2 ♘xf3 15. ♘xf3 ♜c5+ 16. ♙d1 d3 17. ♞c3 ♜xf2 18.b3 White has the advantage because he will slowly manage to develop his pieces.]

12.O-O [12. ♘xa8 12...♘g4 13. ♜e4 ♘d6 14. ♘c6 f5 15. ♜xd4

15...♞e8+! 16. ♘xe8 ♜e7+ 17. ♜e3 Black can now win thanks to the check on e8: 17...♞xg2+ 18. ♙f1 ♞xe3+ 19.dxe3 ♜e4++)

12...♘g4 13. ♞e1 ♘d6 14. ♜e4 Black has to prevent the mate on e8.

14...♙d7 is a safe option, but Black could also try [14...♗e2+ 15.♖f1! (15...♙xe2?? 15...♙xe2 16.♙xe2 ♙c5!-+) ; 14...♙e2!? threatening Nh3. 15.g3 f5 (15...d3 16.♗c3 ♙b8∞) 16.♙xd4 ♗h3+ 17.♖h1 (17.♖g2 17...♗f4+=) 17...♙e8 18.♙g2 preventing Bf3+. 18...♙g4 with very complex play. 19.♙d5 ♙b8 20.f3 ♗f2+ 21.♖g1 ♗h3+ 22.♖h1=]

15.d3 ♙xc6 16.♙xc6 ♙d5 17.♙xd5 ♗xd5 After a very complicated opening we now have a simple, equal endgame.

18.♗d2 ♖d7 [18...♗b4 19.♙d1 ♗xd3?! 20.♗c4 and White takes the initiative.]

19.♗c4 ♙he8 [19...♗b4 20.♙d1 ♙he8 21.♖f1]

20.♙d2 c5 21.♖f1 ♙ac8 possibly with the idea to activate the rook by playing Rc6-Ra6, but it is very hard to improve the

position.

22.g3 ♗b6 23.♗xd6 The position is of course still equal, but in my opinion White had more solid options: [23.♗a5 23...c4 24.♙xe8 ♖xe8 25.dxc4 ♗xc4 26.♗xc4 ♙xc4 27.♙c1 ♙xc1+ 28.♙xc1 ♖d7 29.♖e2 ♖c6 30.♖d3 ♖d5 31.♙d2 and White even has a small plus here.; 23.♙xe8 23...♙xe8 24.♙e1 ♗xc4 25.dxc4= (25.♙xe8 25...♗xd2+-+)]

23...♖xd6 24.♙xe8 ♙xe8 25.♙c1 ♖d5 26.b3 is the only move to stop c4.

26...♙e6 Black is trying to create some threats over the 6th rank.

27.f4 White is going to improve his king, but this move also weakens some squares.

27...f5 Black's position is hard to improve, but he could for example try: [27...♗d7 28.♙c4 ♙a6 29.♙c2 ♗f6 30.h3 (30.b4 30...♗d7; 30.♖e2 30...♗g4 31.h3 ♗e3! 32.♙xe3 ♙e6+ 30...♗e8 31.♖e2 ♗d6 32.♖f3 ♗b5 with the idea Nc3.]

28.♖f2 ♙h6 29.♖g2 ♙e6 30.♖f3 ♙h6 31.♖g2 ♙e6 32.♖f3 ♙h6 33.♙h1 ♗d7 [33...♗c8 34.h3 ♗d6 with the idea Nb5-Nc3, but then White plays 35.♙e1=]

Best rating: 2737

Straight from the opening I had a slightly worse position, but with solid play I reached something where I thought the game would just end just in a draw very soon. Usually R+B is stronger in an endgame than R+N, but my pieces are in the center and the rook on b5 is very nicely placed.

27...♔e7 28.♖d5?! This is clearly not a move to play for a win, but a try to get a worse position. An easy move like 28.Rd2 would be enough for a draw offer.

28...♖xd5 29.♗xd5 b5 In an endgame, the most important factor is the position of the king, but the second most important is space, so of course I play 29...b5 to gain as much space on the queenside as possible.

30.♔e2 ♔d6 My king is going to take a nice place on c5.

31.♗b3 a4 Gaining more space.

32.♗c2

32...♗e6 32...Kc5 would lead to the same.

33.♔e3 ♔c5 The position is of course still a draw, but White needs to be quite careful. In case I for example manage to get White to play a3 and then get my knight to c4, White could already be in big trouble, but of course with accurate play the game should still end in a draw.

34.♗h7?! Another very strange move by my opponent. [White's bishop would be best placed on 34.♗d3 followed by the pawn moves on the kingside, which would always give White counterplay. Black could try the maneuver Nd4-Nc6 now and maybe Ne5 or Na5-c4. This is all practical play where White needs to defend a bit accurately, but there is still nothing more than a draw here.]

34...♗d4 So I am bringing my knight to c6 as planned.

35.♔e4 This is yet another move in the wrong direction. Obviously my opponent was very excited about the Bg8 move.

35...♗c6 Setting a little trap.

36.♗g8?! This is already a serious mistake. With little time on the clock, Gajewski doesn't feel the danger.

[36.♔e3 36...♘e5 already leads to a very unpleasant endgame for White.]

36...f5+! This was my idea based on Ne7+.

37.♔f4 A normal practical decision with little time on the clock. [Probably the best move for White was 37.♔xf5 but how to take such a risky decision with only few minutes on the clock?! 37...♘e7+ 38.♔e6 ♘xg8 39.♔f7 Now Black has a few options:

39...♘f6 Of course Black keeps the knight. (39...♔b4? would be a mistake since after 40.♔xg8 a3 41.bxa3+ ♔xa3 42.♔xg7 ♔xa2 43.f4 b4 44.f5 b3 45.f6 b2 46.f7 b1=♔ 47.f8=♔ ♔b2+ 48.♔xh6 ♔xg2 the position is still a draw, with practically White would keep great chances to win here.) 40.♔xg7 ♘g4 and maybe the position should still be considered as unclear,

but from a practical point of view, it is looking very risky for White.]

37...g5+ Of course I take my chance to win even more space.

38.♔xf5? and my opponent makes a miscalculation. Now Black is just winning. [38.♔e3 38...♘e5 would lead to a very difficult position for White.]

38...♘e7+ 39.♔e6 ♘xg8 40.♔f7 My knight on g8 is caught, but thanks to my advanced pawns on the queenside, Black is winning now.

40...♔b4! This is not too hard to find, but it was the only winning move in the position.

41.♔xg8 a3 The idea is that I am not losing any time by going "around" the white pawns with my king.

42.bxa3+ ♔xa3 I think that in his calculations, Gajewski missed that after 43.g3 Black is winning thanks to the strong 43... g4!, blocking the white pawns.

43.♔g7 ♔xa2 44.♔xh6 To be honest, I expected my opponent to resign here, but strangely the game went on.

44...b4 45.♔xg5 b3 46.h4 b2 47.h5 b1=♔ 48.g4 ♔h7 Luckily I am very strong with a queen up! :)

49.f4 ♔b3 All I need to do now is to come closer with my king,

as my queen is easily holding the 3 pawns.

50. ♖f6 ♜h6+ 51. ♖e5 ♖c4

52. f5 ♜g5 53. ♖e6 ♜xg4 54. h6 ♜h3 We just saw a quite typical endgame and how easy it is to lose the game in case we stop feeling the danger-even in a very safe position. **0-1**

This study-like endgame was reached after 6 hours of play and both players were exhausted and down on time. White is winning, but to find the solution is basically impossible for a human mind, especially under such circumstances.

51. ♜d3? The most natural move to catch the passed pawn, but it leads to draw in a forced line. [The winning line starts with 51.f6+! 51... ♖h7 (51... ♖g6? is a blunder because the king moves into a tactical motif after 52. ♜c6! ♜xc6 (52... ♜d4+ 53. ♖e7 ♜e4+ 54. ♖f8+- and the king finds a safe shelter against the checks.) 53. ♖xc6 g2 54. c8=♜ g1=♜ 55. ♜g8+! points out the drawback of Kg6!) 52. ♜d3! (52. c8=♜ leads to the same draw as the game and the 51. c8Q line: 52... ♜xc8 53. ♖xc8 ♖g6 54. ♖d7 g2 55. ♜d1 ♖xf6 56. ♜g1 h5 57. ♜xg2 ♖f5=) 52... ♖g6 53. ♜xg3+ ♖xf6

54. Rg8!! This is a move only computers can find! Actually with the tempi we will reach the same situation if we promote the pawn at once and play Kd7 or after Rg8 and take back with the rook on c8. The only difference is the placement of the rook and it turns out that this one is winning, while c8Q is a draw. (54. c8=♚ leads to the usual draw after 54... ♜xc8 55. ♖xc8 h5 56. ♖d7 ♖f5) 54... ♖e5 (54... h5 55. c8=♚ ♜xc8 56. ♜xc8 ♖f5 (56... h4 57. ♖d6 ♖f5 is a transposition.) 57. ♖d6 h4 58. ♜h8 ♖g4 59. ♖e5 h3 60. ♖e4 ♖g3 61. ♖e3 White has an extra tempo in comparison to the game and it turns out to be decisive... 61... ♖g2 62. ♖e2 h2 63. ♜g8+ Black cannot play Kf1, which would be obligatory to save the game. 63... ♖h3 (63... ♖h1 is another standard way to hold with the defensive side. White is forced to leave the g-file with the rook to avoid stalemate, but then the Kg2 forces a repetition. However the extra pawns of Black are preventing the stalemate and White wins by simply mating the king with 64. ♖f2 f5 65. ♜e8 and Re1.) 64. ♖f2+- and Rh8 wins the queen.; 54... ♜d4+ makes no sense, because the rook is too close to the pawn and White can play 55. ♖c6 ♜c4+ 56. ♖d6 ♜d4+ 57. ♖c5 and Black has no check on the c-file. With the rook on the 3rd rank, the story would be different.) 55. ♜e8+!! Another computer move! It seemingly just drives the king to a better place to support one of his pawns, but things are different... Black faces a difficult choice of which one of his pawn he should

support... (The most obvious 55. c8=♚ leads to a draw after 55... ♜xc8 56. ♜xc8 f5! 57. ♜e8+ (White is not in time to catch the f-pawn with 57. ♜c5+ 57... ♖e4 58. ♖e6 f4 The black king blocks the shortest way to the pawn and going around with the king takes too much time... 59. ♜c4+ ♖e3 60. ♖f5 f3 61. ♖g4 f2 62. ♜f4 ♖e2= and White is just too late to play Kg2.. .) 57... ♖d5! It is very important to keep the white king away as long as possible. 58. ♖e7 (58. ♜f8 58... ♖e4 59. ♖e6 f4 Another very unlucky situation for White. With the black pawn on h7, he could win with Kf6, f3, Kg5 Ke3, Kg4, f2 and Kg3! But the lucky placement of the h-pawn saves Black!) 58... f4 59. ♖f6 f3

60. ♜e3! White has successfully stopped the f-pawn, but his king got too far away from the a-pawn. Black starts to advance his other passer... 60... f2 61. ♜f3 a5 62. ♜xf2 ♖c4 63. ♖e5 a4 The plan is easy, a3, Kb3 and a2. The black king stands perfectly again and blocks the path of the other king back to the corner. 64. ♜f3 ♖b4 65. ♖d4 a3 66. ♜f6 a2 67. ♜a6 ♖b3 68. ♖d3 ♖b2 and we have reached exactly the same draw as in the game, but the position is mirrored! Amazing! 69. ♜b6+ ♖c1 70. ♜xh6 a1=♚ 71. ♜h1+ ♖b2 72. ♜xa1 ♖xa1=) 55... ♖d4 (55... ♖f4 56. c8=♚ ♜xc8 57. ♜xc8 h5 58. ♜h8 ♖g4 59. ♖d6+- transposes to the 54... h5 line.) 56. ♜f8! Well, it is getting totally unhuman. It seems like White never wants to promote his pawn... This is the only winning move again. 56... a5

57.♖xf7 White is threatening to play Rf4! 57...♔c3 Black must advance to his a-pawn, but this move blocks the rook's way and White suddenly wins after 58.♖f4! ♖xf4 (58...♖xc7+ 59.♔xc7 ♔b3 60.♔b6 a4 61.♔b5 a3 62.♖f3+ ♔b2 63.♔b4 a2 64.♖f2+ ♔b1 65.♔b3+-) 59.c8=♔+- The rest still requires some technique, but it should already be easier than what we had before.; 51.♖c6? is wrong in view of 51...♖xc6! 52.♔xc6 g2; 51.c8=♔ leads to the game after 51...♖xc8 52.♔xc8 g2 53.♖d1 ♔f6 54.♖g1 ♔xf5 55.♖xg2 h5 56.♔d7 h4 57.♔d6 ♔f4!= and h3 next with a draw. But not 57...h3 because 58.Rg3 wins the h-pawn.]

51...♔f6 52.♖xg3 ♔xf5 Black sacrifices his rook for the c-pawn and promotes his h-pawn with the help of his king.

53.♖f3+ [53.c8=♔ 53...♖xc8 54.♔xc8 h5 55.♔d7 h4 and the same draw as in the game is inevitable.]

53...♔g4! Of course, the f-pawn does not count now. Black needs to keep his focus on the h-pawn.

54.♖xf7 h5

55.♖g7+! Unfortunately for White the game is drawn, but Gelfand shows us the best technique to play for the win. White gets behind the h-pawn with his rook with tempo.

55...♔f3 56.♖h7 ♔g4 57.♖h6! The best try again! White is

threatening to play Rc6 and from the checks the king goes to g7. Therefore Black is forced to take on c7 and like this the white king is closer to catch the h-pawn.

57...♖xc7+! 58.♔xc7 h4 59.♔d6 h3 60.♔e5 ♔g3 61.♔e4 h2 62.♔e3

62...♔g2! This is an important theoretical draw (the a-pawn does not count now).

63.♖g6+ ♔f1! And the game is drawn as Rh6 is met by Kg2. Gelfand decides to finish the game in style. [But not 63...♔h3? because of 64.♔f2! and Rh6 wins the promoted queen.]

64.♖xa6 h1=♔ 65.♖a1+ ♔g2 66.♖xh1 ♔xh1 67.♔e4 1/2-1/2

Clash of the Titans

(17) Tal, Mihail
- Benko, Pal C[C10]

Candidates Tournament(10),
1962.05.17

GM Csaba Balogh
Best rating: 2672

1.e4 e6 2.d4 d5 3.♘c3 ♘f6 4.♙g5 [4.e5 4...♘fd7 5.f4 c5 6.♘f3 ♘c6 leads to another kind of structure.]

4...dxe4 5.♘xe4 ♘bd7 6.♘xf6+ ♘xf6 7.♘f3

7...c5 A typical idea, fighting for the center.

8.♙c4 [8.♙b5+ 8...♙d7 9.♙xd7+ ♖xd7 10.♖e2 with idea Ne5-Qb5 or 0-0-0.; 8.♙d3 8...cxd4 9.O-O ♙c5 10.♖e2 White is in no hurry with recapturing the d4 pawn. He can create pressure on the kingside, for example with Ne5-Rae1-f4-Qf3.]

8...cxd4 9.O-O ♙e7 10.♖e2 h6 This kind of move is always very dangerous because it later gives White possibilities to sacrifice.

11.♙f4 O-O 12.♖ad1 ♙d7 [12...♖b6 13.♘xd4 (13.♙b3 13...♖d8) 13...♖xb2 is similar to the game. White gets the initiative for

the pawn. Let's check some example variations: 14.♘b5 The idea of this move is to trap the black queen or rook. (14.♘f5 14...exf5 15.♖xe7 ♙e6 16.♙xe6 ♖ae8! Black is fine thanks to this trick!; 14.♖d3 14...♖b4 15.♖g3 ♙d6! and Black is on time.) 14...♖b4 15.♘c7

15...b5! Another typical idea. Black's idea is to give the pawn in order to activate his pieces. (15...♖b8 16.♘e8 ♖a8 17.♘xf6+ ♙xf6 18.♙d6 ♖a5 19.♙xf8 ♖xf8 and now all depends on whether Black will manage to develop his pieces.) 16.♘xa8 bxc4 17.♘c7 ♖c5

13.♖xd4 ♖b6

14.♖d3! A typical Tal move. White is preparing the rook transfer to g3. Other moves were too slow, for example: [14.c3 14...♖fd8 15.♖d3 ♙c6 16.♘e5 ♖xd3 17.♙xd3 ♙e8= without any problems for Black.]

14...♙b5 [14...♚xb2?? 15.♙e5 and Black is losing material.]

15.♙xb5 ♚xb5 16.♘e5 ♚xb2 [16...♖ad8 17.c4 ♚c5 18.♖g3 It looks like White doesn't have enough pieces for an effective attack. 18...♙h8 (18...♙d6) ; 16...♚a4 17.c4∞avoiding Qe4.]

17.♖g3

17...♖fc8! Black decided to defend the position actively, the alternative was very solid: [17...♙h8 18.♖b3 (18.♙xh6 18...gxh6 19.♚e3 ♘h7 20.♚xh6 ♚xe5—) 18...♚xa2 19.♖xb7 ♘d5 and White has compensation but nothing more.]

18.♙xh6 ♙f8 19.♚e3 ♚xc2 [19...♘h5!? 20.♖g5 ♖c3 21.♚e4 ♚b4 22.♚e2 ♘f6 23.♚d2 ♘e8=+ and the white pieces have lost their coordination.]

20.♖e1 White is not hurrying with any concrete action, like a sacrifice on g7. [20.♙xg7 20...♙xg7 21.♖xg7+ ♙xg7 22.♚g5+ ♙h7 23.♚h4+ ♙g7 24.♚g5+ ♙f8 25.♚xf6 only leads to a draw but objectively it was the best way to play for White. 25...♚f5 26.♚h8+ ♙e7 27.♚h4+= f6 28.♚b4+ ♙e8 29.♘c4 ♚c5 30.♘d6+ ♙d7 31.♚xb7+ ♙xd6 32.♖d1+ ♙e5 33.♖e1+ ♙d6=]

20...♖c7! A good move. Black is defending the position over the 7th rank and at the same time he wants to play Rac8. [20...♘d5 21.♚g5 (21.♚f3 21...♚f5!) 21...f6 22.♚xg7+ ♙xg7 23.♖xg7+ ♙f8 24.♘g6+ ♙e8 25.♖xe6+ ♙d8 26.♖d6+ ♙e8=; 20...♚e4?? 21.♚xe4 ♘xe4 22.♖xe4+— and the c1 square is under control.]

21.h3! Another typical Tal move. To create practical problems White prefers to keep the tension, even if objectively it is not the best move. The idea behind this move is also to avoid threats on the first rank. [21.♙xg7 21...♙xg7 22.♖xg7+ ♙xg7 23.♚g5+ ♙f8 24.♚xf6∞]

21...♖ac8 [21...♚h7!?∞; 21...♘d5! 22.♚d4 f6 23.♘g4 ♙h8 24.♖xe6 ♚f5!± Black's pieces are better coordinated and White is losing material.]

22. ♖xg7 ♖xg7 23. ♖xg7+ ♖xg7 24. ♖g5+ ♖f8 25. ♖xf6
Thanks to his active pieces White has full compensation. Black had the chance to give some material back now, but didn't seize it...

25... ♖h7 [25... ♖f5 26. ♖h4 Here Black could reduce the material by playing 26... ♖c1 27. ♖h6+ ♖g8 28. ♖xc1 ♖xc1+ 29. ♖xc1 ♖xe5=]

26. ♖e3! Now we see how important the 21.h3 move was.

26... ♖f5 27. ♖h8+ ♖e7 28. ♖h4+ ♖f6 [28... ♖e8 ; 28... f6 29. ♖b4+ ♖e8 30. ♖b5+ ♖e7 31. ♖b4+ ♖e8 32. ♖g4 a5∞]

29. ♖b4+

29... ♖e8? is the decisive mistake. Black could have saved the position after [29... ♖c5! and again we have an example

of how to actively defend a position. The main task for Black is to exchange the active white pieces, even at the cost of some material. 30. ♖d3 (30. ♖xb7+ 30... ♖8c7 31. ♖b4 a5 32. ♖a3 ♖d8∞) 30... ♖c3 31. ♖h4+ ♖f6 32. ♖xf6+ ♖xf6 33. ♖xc5 ♖xc5=]

30. ♖b5+ ♖f8 [30... ♖e7 31. ♖f3 ♖g7 32. ♖xf7+ ♖xf7 33. ♖xf7 ♖xf7 34. g4± and White should easily be winning here thanks to his passed pawns.]

31. ♖f3 ♖d8 [31... ♖g7 32. ♖h2±]

32. ♖b4+ ♖e8 33. ♖g3 1-0

Editorial Preface

The Corsican rapid was won by Hou Yifan! Finally the 2nd best woman player in the history of chess (after Judit Polgar) can match with the men on the highest level. A very big surprise was the loss of Anand to Fedorchuk in the semi-finals, where Hou Yifan only qualified in the Armageddon game against Robert Ruck from Hungary. In the final Hou Yifan won very convincingly against Fedorchuk with a 2:0 score.

Now to main current event, the 2nd FIDE Grand Prix in Tashkent:

Vachier-Lagrave is leading with 2.5/3. A nice win over Caruana, a nice win over Kasimdzhanov and a solid draw against Radjabov sounds like a fantastic start!

It seems like Caruana is lacking his usual rock solid stamina, as the World Nr2 blundered quite a lot lately and also missed great winning chances, so his 1/3 doesn't come as a surprise. I guess after a few weeks' break we would see Caruana back in top shape, but it is just the 3rd round of the Grand Prix

Mamedyarov had a rather unlucky start as he lost a winning rook endgame to Andreikin, but he quickly recovered with his win over Gelfand and is now on 1.5/3.

Another very interesting player is Jobava, who continues playing his extraordinary openings. We will see how far he can go with them on the highest chess level during the next 8 games, but at the moment he is also on 1.5/3.

A lot of open tournaments are also going on:

The very strong Chigorin Memorial in St.Petersburg is under way with a lot of GMs from 2550-2670 participating in it.

The European Youth Championship in Batumi is another

interesting event.

The traditional Cap d'Agde open and rapid event is taking place this week as well.

The American Continental as well as the Spice Cup are the other top events which deserve attention.

This week we analyse the best games from the German Bundesliga as well as the games from the Grand Prix in Tashkent for you. Enjoy!

Arkadij Naiditsch & Csaba Balogh

PS: Your weekly commentator Arkadij Naiditsch got married to a wonderful girl on the 23rd October! :)

4 best games of the past week

(1) Karjakin, Sergey(2767) - Jakovenko, Dmitry(2747) [A05]

Tashkent FIDE GP 2014(3.2),
2014.10.23

GM Csaba Balogh
Best rating: 2672

Jakovenko is known as a great theoretician and a huge specialist of the Berlin defence. Karjakin decided to drive the game to less explored areas.

1. ♖f3 ♜f6 2. g3 The Reti opening is becoming more and more popular nowadays.

2...d5 3. ♘g2 c5 4. O-O g6 5. d4 cxd4 6. ♜xd4 ♙g7 Suddenly the game has transposed to the g3 system of the Gruenfeld defence with reversed colors, therefore White enjoys an extra tempo compared to those lines.

7. ♜b3! Jakovenko admitted that he missed this move in his preparation. From one side, it is understandable, since it looks illogical to run away from the center with the knight, especially since it was not even under attack. On the other hand, this is the main idea also with reversed colors. White

wants to put quick pressure on the center (in the spirit of the Gruenfeld) with Nc3 and e4.

7...O-O 8.♘c3 e6 9.e4! Very well played! White makes use of his extra pawn and opens the diagonal of his bishop. In the normal line with the reversed colors the knight is already developed to c6 and Black could answer with d4! But it is impossible now, so he must open the position.

9...dxe4 10.♗xe4 ♘xe4

11.♖xd8! Karjakin evaluates the consequences deeply. He understands that the trade of the queens favors him even if it brings the rook to the opened file with tempo. [On 11.♗xe4 Black could play 11...♖c7! and he could easily solve the development of the c8 bishop with Nc6, b6 and Bb7, because the queen on c7 perfectly holds the position together. Bf4 could always be met by e5!]

11...♖xd8 12.♗xe4 ♘c6 13.c3! This is the difference between the two bishops on the long diagonal. White could easily neutralize the pressure on the b2 pawn and he is ready to develop the one on c1 to e3 followed by bringing his rook to d1, while Black's task is much harder...

13...e5 Trying to develop the c8 bishop. [13...a5 with the idea to push a4-a3, weakening the queenside and give a target for the g7 bishop on c3, but White answers with the simple

14.a4! and Black has only created weaknesses for himself. White plays Be3-b6 next.; Black cannot connect his rooks with 13...♗d7 as it always runs into 14.♗c5!]

14.♗e3 f5 Jakovenko tries to defend actively. [Another attempt was 14...♗f5 trading the strong bishop. But of course it damages the pawn structure and Black cannot hope for full equality after 15.♗xf5 gxf5 16.♖fd1+= In the long term, White will use his pawn majority on the queenside, while Black will be unable to do the same on the kingside due to the doubled pawns.]

15.♗g2 ♗f8 Black intends to develop his bishop to e6 and prevents the Nc5 idea. [A logical move would have been 15...e4 closing the diagonal, but unfortunately from Black's point of view it does not reach its aim, because White activates his bishop again with 16.f3! exf3 17.♗xf3+= and Black did not win anything on the business.]

16.♖fe1! Another deep move by Karjakin. Putting pressure on the e5 pawn creates more problems for Black than occupying the open file. [On 16.♖fd1 Jakovenko wanted to play 16...♗e6 17.♗c5 ♗xc5 18.♗xc5 White has gained the two bishops, but 18...e4 closes the one on g2. Black wants to activate his knight with Ne5-d3 and the logical undermining play with 19.f3 is now met by 19...♖xd1+ 20.♖xd1 exf3 21.♗xf3 ♗xa2 The tactical

justification is that White cannot penetrate with his rook on the 7th rank, because of 22.♖d7 ♘e5!]

16...♗e6! A clever decision by Jakovenko. He rather sacrifices a pawn for active counterplay than suffering passively.

17.♗g5 Karjakin grabs the material.

17...♖e8 18.♗xc6 bxc6 19.♖xe5

19...♗d5! Black doesn't have anything concrete, just positional compensation! Black has the two bishops, he is intending to swap all the rooks off the board and then White could hardly avoid reaching an opposite colored bishop endgame, where Black should be able to hold with a pawn down. This kind of compensation is known from the Marshall and the biggest experts like Aronian and Leko usually hold such endgames without too much difficulties.

20.♗f4 ♗g7! Forcing White to give up the e-file. [On 20...♖xe5 21.♗xe5 ♖e8 22.f4! was Karjakin's point and the bishop stands perfectly on e5. It closes both files of the black rook (controls the b8 square too) and trading it with Bg7 should never come into consideration as Black should pin his compensation to the two bishops.]

21.♖xe8+ ♖xe8 22.♘d2! White wants to reduce the power of

the two bishops with c4. The rook cannot invade on e2, since it will be sent back after Kf1!

22...a5 Jakovenko continues with his very natural human moves. He advances his pawn to a4 to reduce the movement of the white pawns. If White plays a4 himself it is not the same story as in the 13... a5 line because then White will be unable to create a passed pawn with b4 because of the strong bishop on g7. Black would transfer his rook to e7-b7.

23.c4 ♗f7 24.♖b1 a4 25.b3 axb3 26.axb3 This trade was a small achievement for both sides. White has finally freed his pieces, he can use his knight and rook as they are not obliged to protect the pawns anymore, but of course it is still extremely difficult to make progress, as the bishops are keeping their eyes on the pawns. Black also had a positional benefit, he had 2 pawn islands before on the queenside and he managed to get rid of one of them.

26...h6 27.h4 ♖e7?! Jakovenko has defended perfectly so far, but he starts to lose the track now. He drives his rook to the b-file, but it is a bit slow now since it allows White to create a passed pawn. [It was better to play 27...♖d8 driving the rook to the very active place on d3! 28.b4 is now met by 28...♗c3 29.♘f1 ♗xc4 30.♗xh6 The trade of these two pawns clearly eases Black's defensive task. White will be unable to make progress now. Black can play any waiting move, for instance 30...♖d3 31.♘e3 ♗b5= and Black is safe.]

28.b4 ♗c3? This seems to be the decisive mistake. [The draw should still have been secured after 28...♖b7! Black is now threatening Bc3 and the difference is that after 29.b5 cxb5 30.cxb5 he could use his two bishops to send away the white rook from the support of the passed pawn. 30...♗a2! 31.♖b4 ♗c3! 32.♖a4 ♗d5 winning the b-pawn. The 3 vs 2 after Bxh6 should already be a very easy draw.]

29.b5 cxb5 30.cxb5 ♖b7

31.b6! This is the difference to 28... Rb7. White had time to advance the pawn to the 6th rank and now it can be safely protected.

31...♗a2 [31...♗d4 32.♗c7+- traps the rook. White only needs to activate his knight.; 31...♗a5 32.♗e3!+- saves the pawn again. Nf3-e5 is coming next.]

32.♖b5! The b-file is long enough now to have a free square for the rook against the bishops.

32...h5 33.♗f3 ♔f7 [33...♗c4 loses to 34.♖c5]

34.♗e5! traps the bishop! Black is forced to take, but it is equal to resignation.

34...♗xe5 35.♗xe5+ [Without the two bishops, Black has no hope to survive, so he resigned in view of 35.♗xe5+ 35...♔f6 36.f4+- fixing another weakness on g6, followed by bringing the king to c5! Black is helpless as his pieces are completely tied up and they are unable to create any counterplay. The bishop cannot attack anything as everything stands on dark squares, the king must protect the g6 pawn and the rook must blockade the b-pawn.] **1-0**

(2) **Almasi, Zoltan(2695)**
- **Bogner, Sebastian(2599) [B98]**

Bundesliga 2014-15(2.10),
2014.10.19

GM Csaba Balogh
Best rating: 2672

A highly spectacular game was won by my countryman Zoltan Almasi against my teammate in the German league.

1.e4 c5 2.♗f3 d6 3.d4 cxd4 4.♗xd4 ♗f6 5.♗c3 a6 The Sicilian Najdorf opening.

6.♗g5 White goes for the old main line. Recently, 6.h3, 6.f3 and 6.Be3 are the most common continuations, but there was a time when almost everybody played this text move against the Najdorf.

6...e6 7.f4 Black has a wide range of choices here. Bogner chooses a rather rare line.

7...h6 8.♗h4 ♗e7 9.♖f3 This, followed by 0-0-0 is the standard development of the pieces in the 6.Bg5 setup.

9...♖c7 10.O-O-O ♗bd7

11.♗e2! According to the theory, in case of the inclusion of the h6-Bh4 pair of moves, the bishop should develop to

e2 to parry Black's freeing attempt... [On the direct 11.g4 Black stops the attack with 11...g5! 12.fxg5 ♖e5 and Nfxg4 next is perfect for him.; In most of the lines the standard development is 11.♗d3 but here it once again runs into 11...g5! 12.fxg5 ♖e5 Nfg4 is coming next. Black wins back the g5 pawn and he successfully worked out the e5 square for his knight. 13.♖e3 ♗fg4 14.♖d2 ♗g6]

11...O-O [Now on 11...g5 White could play 12.fxg5 ♖e5 13.♖e3 ♗fg4 14.♖d2! It is important that the g4 knight is under attack, therefore Black's options are limited... 14...♖g8 15.♗xg4 ♗xg4 16.♗f3± preserving the extra pawn.]

12.g4 The most natural attacking move! Strangely, 12.Qg3 is given as the main line by theory. This is a more principled attack, as it makes use of the fact that Black has weakened his kingside with h6 and the g4-g5 maneuver opens the g-file with tempo.

12...b5 13.g5 hxg5 14.♗xg5 b4! Black must also hurry with his counterplay. [There is no time for 14...♗b7 since White crushes after 15.♖hg1 b4 16.♗h6! g6 17.♗xe6! fxe6 18.♖g2+-]

15.♗d5! A typical Sicilian knight sacrifice. White lures the e6 pawn away in order to settle his other knight to the excellent attacking position on f5. In other lines, sometimes

the opposite sacrifice works well with Nf5 and after exf5 Nd5, but now it makes no sense as the d5 square is controlled by the knight.

15...exd5 16.♗f5 White directly attacks the e7 and he puts pressure on the g7 pawn, the main defender of the black king. Such sacrifices cannot be calculated until the very end, some lines had to be foreseen and in others, very strong intuition is required.

16...♗c5 The most natural defensive move. Black protects his e7 bishop and opens the diagonal for his other bishop. [16...♖d8? is nicely refuted by 17.♗xg7! This devastating sacrifice is the main point behind the 15.Nd5 move! 17...♗xg7 18.♖hg1 The lines are quickly opening on the king. Black has no adequate defence. 18...♖g8 19.♗xf6+ ♗xf6 20.e5+!+- and mate is coming soon.; The computer suggests 16...♗b6 The best reply here is 17.♗xe7+! (Now on 17.♗xg7 17...dxe4 18.♖g3 ♗xg7 19.♖hg1 ♖g8 the machine strangely only sees a perpetual check after 20.♗xf6+ ♗xf6 21.♖h4+ (21.♖xg8 21...♗f5) 21...♗e6 22.♖h3+ ♗f6=) 17...♖xe7 18.e5! This unusual motif works perfectly here, just as in the game. 18...dxe5 (Probably the best defence is 18...♗g4 but it does not equalize either 19.♖xg4! ♗xg4 20.♗xe7 ♗f2

21.♗xd6! White does not go for the exchange, but rather

grabs two important pawns and keeps the initiative of the two bishops. 21...♖fc8 22.♙xb4 ♘xh1 23.♖xh1± The two pawns and the bishop pair are more than enough compensation for the exchange.) 19.fxe5 ♖xe5 20.♙xf6 ♖xf6

21.♖xf6! This could be a shocking blow for Black. He is a piece up and if he does not get mated he is going to win the game. The most dangerous attacking piece is the queen, Black should normally be very happy with its trade, but now he gets mated because of the opening of the g-file. 21...gxf6 22.♖hg1+ ♔h8 23.♖d4! This is the point! White drops his rook to the h-file. 23...♙f5 24.♖h4+ ♙h7 25.♙d3! f5 26.♙xf5+- and mate in the next move.; 16...♖e8? also loses to 17.♘xg7! ♔xg7 18.♖hg1+-]

17.♘xe7+! Almasi finds a very nice motif to win back the piece. [Now on 17.♘xg7

17...b3!! is a brilliant counterblow. It is very difficult to find it for a human, but the machine points out that after 18.axb3 ♙g4 19.♖g2 ♘fxe4 20.♙xe7 which would win for White without the b3-axb3 pair of moves, now suddenly Black is the one who mates first: 20...♘xb3+! 21.♔b1 ♘c3+!! 22.bxc3 ♖xc3+- and Black's attack comes faster! This is a rather typical turn of events in the Sicilians with opposite side castling.]

17...♖xe7 18.e5! dx5 19.fxe5 ♖xe5 [Black could have entered a slightly inferior position after 19...♙g4 20.♖xg4 ♖xe5 White has nothing better than 21.♙xf6 ♖xf6 22.♖xd5 with a more pleasant position. White can quickly attack the f7 pawn with Rf1, Bc4, Rdf5. Or create threats on the h-file after Rh5. The endgames are always better for him, because the bishop is stronger than the knight and the black pawns can be more vulnerable. 22...♖ac8 23.♔b1+=]

20.♙xf6! ♖xf6 21.♖xf6! The same things can be said as in the 16...Nb6 line. It is not easy to find such ideas, because White wanted to launch a mating attack when he sacrificed his knight on d5 and then we could understand that one does not even think about some line where White exchanges the queen. But Almasi has calculated deeper...

21...gxf6 22.♖hg1+ ♔h8 23.♖xd5 White wins back the piece because of the Rh5 threat. [23.♖d4? does not work now. Black could successfully parry the threats on the h-file with 23...♘e4! 24.♖xd5 f5]

23...f5 24.♖xc5 The complications are over. The material is even, but White can claim a clear edge because of his superior pawn structure. Not only the doubled f-pawns, but also the b4 and a6 pawns are pretty weak.

24...♙e6 Black prevents the Rc4-h4 threat and finally finishes the development, but now the a6 pawn has been left alone.

25.♖a5! ♖g8 26.♖f1! A very subtle move! This rook is very useful in the fight against the f5 pawn. Now it becomes a clear target, while after the trade on g8, it could have turned out to be a dangerous passed pawn... It is important that Rg2 does not work immediately because of Bf3! [26.♖xg8+ 26...♖xg8 27.♖xa6 ♖g2 is unclear. The f5 pawn gives counterplay.]

26...♖ac8

27.b3! Another very subtle move! Almasi understands his opponent's idea and he makes a very strong prophylactic move against it. [On the direct 27.♖xa6 Black solves his problems with 27...♖g2 28.♙d3 ♙c4! This is why White played b3 (he also opened his back rank). 29.♙xc4 ♖xc4 and the c2 pawn falls.]

27...♖g2 28.♙d3 The c2 pawn is safe now as the bishop on d3 is safe. Black has no chance to trade it.

28...♖xh2 [On 28...♖c6 White keeps a big advantage after 29.h3 ♖h2 30.♖f4 ♖xh3 31.♖xa6± and the b4 pawn will also fall.]

29.♖xa6 Only 3 pawns on each side are left on the board, but the f7-f5 can hardly be counted as two healthy pawns and the main problem is the one on b4. White is going to attack it with Rf4 and Rb6 and if it falls, the triple connected passed pawns will decide the game.

29...♖h4 Defending against Rf4.

30.♖a5! White is threatening to take on f5. After Bxf5 Bxf5 he can take with both rooks, because after Rxf5 Rh2 Rh5 check saves the c2 pawn or after Raxf5 Rh2 R5f2 saves the important c2 pawn. [30.♙xf5 was wrong again because of 30...♙xf5 31.♖xf5 ♖h1+ 32.♙b2 ♖h2=]

30...f4 [30...♖h2 31.♖b5+- is also bad.]

31.♖b5 ♖h3 A last trick, threatening to take on d3, but of course White leaves the pin...

32.♙b2 The game is over. The b4 pawn falls and the a-b-c passers start to advance.

32...f3 33.♖xb4 ♖g8 34.a4 ♙d5 35.a5 ♙g7 36.♙e4 Almasi decides to simplify into a completely won rook endgame.

36...♙xe4 37.♖xe4 White can even trade his a-pawn for the one on f3, the remaining connected c-b pawns are easily winning against the f7.

37...♙f6 38.♖e3 ♖gg3 39.a6 ♙g5 40.♖xf3! [Finishing the game in style! Black resigned in view of 40.♖xf3 40...♖xf3 41.♖xf3 ♖xf3 42.a7 and he cannot stop the pawn. A great Sicilian battle!] **1-0**

(3) Mamedyarov, Shakhriyar(2764) - Nakamura, Hikaru(2764) [D31]

Tashkent FIDE GP 2014(4.6),
2014.10.24

GM Arkadij Naiditsch
Best rating: 2737

We are going to see a great fighting game, with a lot of different tactical ideas and a very interesting material-structure constellation. The final result of the game is a draw-but it doesn't reduce the interest in it at all! Both players played very well.

1.d4 Mamedyarov is a very aggressive player with White and his score with White is as well better than the one with Black. Shakhriyar often shows interesting opening ideas.

1...d5 2.c4 e6 3.♘c3 ♗e7 and we have another game in the Queen's Gambit. Mamedyarov and Nakamura are not playing this position against each other for the first time, so of course it is going to be very interesting to see what White has prepared this time.

4.cxd5 exd5 5.♗f4 is one of the most critical lines.

5...c6 Black is preparing to play Bf5 next, which is not possible without the c6 move because of Qb3.

6.e3 White wants to play Bd3 next, with a slightly better position.

6...♗f5 and of course Black develops the bishop to f5. Now at moves like Qb3 he always has Qb6.

7.g4 This is of course all theory and quite a popular line which Nakamura has also played with White already.

7...♗e6 8.h4 White's idea is to win maximum space on the kingside and hope to later develop the pieces in a normal order, while having a space advantage.

8...♘d7 9.h5

9...♘h6! A great move by Black! The knight is taking a better position on h6 than on f6 and soon we will see why. [After the more usual 9...♘gf6 White continues with 10.f3 and it is not that simple for Black to find a clear way what to do next.]

10.♗e2 is the right choice. [10.f3?! 10...f5! and Black's play on the kingside could become very dangerous.]

10...♘b6 [After 10...f5 11.gxf5 (Another option could be 11.♗xh6 11...gxh6 12.gxf5 ♗xf5 13.♗g4 ♗xg4 14.♖xg4 ♘f6 and we have a position which is very difficult to evaluate. Maybe White can hope to be better here, but on the other hand Black could develop fast and dangerous play, so things are very unclear.) 11...♘xf5 12.♘f3 and of course the position is unclear, but maybe White could hope for some advantage.]

11.♘h3 Mamedyarov is also creative. Maybe White wants to play Bxh6 and Nf4 at some moment.

11...g5!? What a move! The game is getting very complicated now. [Black could also have continued with 11...O-O ; or 11...♖c8 which is a useful move in case White would want to

castle queenside.]

12.hxg6 White of course has to take on g6.

12...hxg6 Black now has the positional threat to play g5 next and then maybe f6-Nf7-Qd7 and 0-0-0, with an excellent position.

13.♕e5!? is a very nice tactical idea of Mamedyarov which destabilizes Black's position, which looks so solid.

13...f6 Black has nothing else, because White would play Nf4 next anyway.

14.♖f4 Things are now becoming very tactical.

14...fxe5 Black makes the right calculation. [In case Black would want to win a piece after 14...♕f7 White has the amazing 15.♞c2!! a silent but deadly reply. Black can't protect the g6 pawn. 15...fxe5 16.♖xg6 ♜g8 17.♖xe5 and White has a clear advantage.]

15.♖xg6 is the most logical, but White also had another choice. [After 15.♖xe6 15...♞d6 16.g5 ♞xe6 17.gxh6 we have a very interesting position which is very difficult to evaluate. From the feeling, Black should be doing fine here, but of course the central position of both kings makes the game very dynamic.]

15...♞g8?! I think Nakamura miscalculated something when

he played this move. [Black should have tried to keep the extra piece with 15...♞h7 16.dxe5 (After 16.♖xe5 Black has the amazing move

16...♕h4!! A very hard move to find during a practical game and maybe this is exactly the move that Nakamura missed. In case Black didn't have 16...Bh4!!, White's position would be clearly better, but now Black is not only closing the h-file, but also putting pressure on the f2 pawn. Black is much better here.) 16...♞d7 17.♖f4 O-O-O 18.♞c2 ♜hh8 and I can't imagine Black being worse here. A piece up is a piece up!]

16.♖xe7 ♞xe7 17.♞xh6 So White has won back the piece and is a pawn up.

17...e4 Black tries to close the position and be ready for putting pressure on the g4 pawn.

18.a4! A very logical and strong move. White wants to play a5-a6, chasing away the black knight from b6 and at the same time destroying the black pawn structure.

18...♖d7 19.♞b3?! White misses a great chance of being much better. [After the correct 19.♞d2! 19...♖f6 20.♞h1 White is transporting all his heavy pieces to the kingside. 20...♞d7 21.♞g1 I can't see any compensation for Black for being a pawn down. White should be clearly better here.]

19...♟f6 Now the g4 pawn is lost.

20.♖c1 Mamedyarov is preparing an exchange sacrifice.

20...♙xg4 [In case of 20...♟xg4 White would continue similarly as in the game with 21.♖xe6 ♜xe6 22.♞xb7 ♖d8 23.♗d1 and I think White's position is looking very promising.]

21.♖xf6 Of course this is what White was playing for with Qb3-Rc1.

21...♞xf6 22.♞xb7 ♖d8 All Black moves were forced until here. We now have an extremely complicated position and it is very difficult to say who is better here. White's problem is the open king on e1 which could very quickly be under attack.

23.♞xa7 Why not take a pawn if you can...

23...♖f8 A logical move, but Black also had many other interesting continuations. [23...♙f3 could be an option or; 23...♙d7 which looks like a stupid move, but the bishop from d7 is going to defend the c6 pawn which is very important. 24.♞c5 (24.♗d1?! 24...♞d6! and Black would already be better.) 24...♖b8 with a very unclear position.]

24.♗d1 Of course the f2 pawn needs to be protected.

24...♙xe2 25.♙xe2 ♞d6 Black wants to start some play on the b-file.

26.♖c5 This move looks a bit strange... Of course White wants to double on the c-file, but the idea is very slow. [Maybe a more promising try to fight for an advantage could have been 26.b4!? reminding Black that the king on e8 is open as well. 26...♞xb4 27.♖xc6 ♖f7 28.♞a6 and I think White's position is a bit better.]

26...♖b8 Of course Black is putting his rook on the b-file.

27.♞a5

27...♔d7! Nakamura is putting his king to the perfect place from where it is protecting the c6 pawn, while connecting the rooks at the same time.

28.♞c3 We have quite a funny position. White is an exchange down but he has two pawns for it, which is more than enough from a material point of view, but the knight on d1 is very passive and can never be moved because the f2 pawn would immediately be under attack. Black also doesn't really have any big plans here, so I think the position is just equal now.

28...♖a8 29.a5 ♖fb8 30.b4 White is of course trying to keep the queenside closed and as solid as possible.

30...♖b5 By exchanging the rooks, the game is more or less coming to a peaceful end. Maybe 30...♞b7 could have been a try for Black to develop some play on the queenside,

but of course White could be in time with Nb2-Na4-Nb6 and the position would remain complicated.

31. ♖xb5 Of course White should not let Black take on c5.

31...cxb5 32. ♔c5! Attacking the b5 pawn and threatening to play Nc3.

32...♖c8! Black also shows perfect play, in understanding that the pawn on b5 is not important.

33. ♖xb5+ ♔e6 Black wants to play Rb8 next and take the b4 pawn.

34.a6 [In case of 34. ♖a4 Black has the strong 34...♖c7! and I think White's position starts looking dangerous.]

34...♖a8 Winning back the a6 pawn with a draw offer... Indeed, the position is just equal and the game would probably end up in a draw, but both player could have made a few more moves to be "sure" about the result. Anyhow, this was a very interesting and exciting game! **1/2-1/2**

(4) Kasimdzhanov, Rustam(2706) - Jobava, Baadur(2717) [C10]

Tashkent FIDE GP(3),
2014.10.23

GM Arkadij Naiditsch
Best rating: 2737

1.e4 The games of Jobava are usually very exciting. A lot of "strange" opening ideas combined with aggressive and crazy play makes his chess shine so bright. Of course sometimes such opening experiments lead to unpleasant positions so it is going to be very interesting to see how well he will be doing against the very best players.

1...e6 2.d4 d5 3. ♖c3 dxe4 4. ♖xe4 ♕d7 Our good friend Baadur likes unpopular lines. The main move in the Rubinstein Variation is [4...♖d7]

5. ♖f3 ♕c6 6. ♕d3 ♖d7 I know one nice trap which can be use on beginner's level. If Black plays [6...♖f6 then after 7. ♖xf6+ ♖xf6??

8. ♕g5 ♕xf3 9. ♖d2!! and the black queen is trapped!]

7.O-O ♖gf6 8. ♖g3 is a possible, but not the main setup. [8. ♖xf6+ 8...♖xf6 gives Black good chances to equalize;]

8.♖ed2!? The knight on g3 is not always useful so usually White goes for this setup.]

8...g6 and here comes the "crazy play". Who would ever even think of playing the g6 move?! It seems like it is just weakening the black squares, but in fact Jobava is playing against the knight on g3 by cutting him completely. [8...♙e7 9.♚e2 O-O Black has two ways to fight for the center, b6-Bb7-c5 or Bxf3-c6-Qe8-e5. 10.♖d1 ♙xf3 (10...b6) 11.♚xf3 c6 White has a long-term advantage thanks to his space advantage and the bishop pair.]

9.c4 Who can blame Kasimdzhanov for wanting to punish Jovaba for his opening experiments!? [To a slightly better position for White would lead 9.b3 9...♙g7 10.♙a3 ♙f8 11.♙b2 ♙g7 12.c4 O-O 13.♚e2+= As we can see, White is very solid. 13...♙xf3 14.♚xf3 c6 and in this case the bishop on g7 seems to be better placed than on e7, but White's advantage is still clear.]

9...♙g7

10.d5!? Kasimdzhanov gets provoked onto a sharp territory. Usually the Nr.1 of Uzbekistan is trying to be solid and Jovaba is the one who likes unbalanced positions, so maybe from a practical point of view this was not the best choice for White. [10.♙f4 10...O-O 11.♖e1+= was the solid option.]

10...exd5 11.♖e1+ ♙f8 12.cxd5 is maybe premature, since after this move Black gets a strong and untouchable bishop on d5. [12.♖d4 12...♙g8 (12...dxc4 13.♖xc6 bxc6 14.♙xc4 ♖b6 15.♚c2+= of course White doesn't exchange queens.) 13.♙f4! (13.♖gf5 is too optimistic, but very interesting. 13...gxf5 14.♖xf5 dxc4 15.♙xc4 In a practical game White has a strong attack, but of course the computer is easily defending Black's position. 15...♖b6 16.♚b3 ♖xc4 17.♚xc4 ♖e4!± and Black is better.)]

12...♙xd5 13.♚c2 White is preparing to put his rook on d1.

13...c6 [Of course not 13...♙xf3?! 14.gxf3 c6 15.f4! and the strong bishop from d5 is gone, which gives White good play.]

14.♖g5 ♙g8 15.♙f4 We have a very interesting position. Black is a pawn up, but his king is on the run, so White clearly has good compensation.

15...♖f8 A very good defensive move. [15...h6 16.♖5e4 ♖xe4 17.♖xe4 ♙h7 18.♖ad1 with very active play. White can try Nd6 or Nc3 with idea to get rid of the bishop from d5 or at some moment h4-h5.]

16.♖ad1 ♚a5 Black keeps the logical h6-Kh7 moves in mind and first tries to irritate White on the queenside a bit.

17.a3 A solid move, but maybe 17.b3 was a bit stronger to limit the black bishop on d5. [17.♖e7? 17...♚b4-+]]

17...♖d8 [After 17...h6 18.♖5e4 ♖xe4 19.♙xe4 White's chances should probably be at least equal here.]

18.♙d2 [Another option for White could have been 18.♖e7 but now Black has 18...♖d7 with very unclear play.]

18...♚b6 19.♙e3 ♚c7 Black could probably have gone back to a5, but a quick draw is clearly not an option for Baadur with his great fighting spirit.

20.h3?! is clearly too slow... [Much stronger was 20.♘d4!? with the idea to improve the position after Qc3. 20...♙xg2? 21.♙e5+—]

20...h6 and Black starts his "development".

21.♘5e4 ♘e6 There are a lot of white pieces in the center, but Black's position is very solid and we should not forget that a pawn down puts big pressure on White to do something.

22.♘xf6+ ♙xf6 23.♙e4 White slowly panicks. Black seems to slowly solve all his problems and just be a pawn up! White is looking for a forced draw. [23.♙xg6 didn't work: 23...fxg6 24.♙xg6+ ♙g7 25.♙f5 ♘f8!± and White doesn't have Nh5 because of Qxg2 mate.]

23...♙g7 24.♙xa7? is of course a terrible decision, but White's position was already worse. [White should have tried to save the game after 24.♙xd5 24...♖xd5 25.♖xd5 cxd5 26.♙xc7 ♘xc7 27.♙xa7 A lot of pieces were exchanged, but of course Black's position is still better here. 27...♙xb2 28.♖b1 ♖a8! 29.♙b6 ♙e5 Black managed to keep his pawn up. 30.♙xc7 ♙xc7 31.♖xb7 ♙xg3 32.fxg3 ♖xa3 33.♖d7 and it is hard to say if this rook endgame is winning or drawish, but Black's chances to win the game here would be at least 50

24...b6 The white bishop on a7 is trapped.

25.♙xd5

25...♘d4! —+ This is clearly the move that White has blundered. Black is winning an exchange now.

26.♙a4 ♖xd5 27.♙a6 and here comes another excellent move from Jobava:

27...♙d7! Great tactical play! Jobava creates two deadly threats, to play Nf3 and to play Ra8. White's position is lost.

28.♖xd4 White decides to give away the exchange, but the chances to draw here are minimal.

28...♙xd4 29.♙xb6 c5 Keeping the monster bishop on d4.

30.♙a5 ♙xb2 Pawns are equal now...

31.♙c4 ♙d4 All Black needs to do now is to win the a-pawn.

32.♙c3 ♖a8 33.♖e3 White is in time trouble, but there were already no moves to save the game...

33...♖xa3 A great psychological trick by Jobava in the opening, practically provoking White onto a sharp territory—which clearly doesn't suit such a positional player as Kasimdzhanov- and later on outplaying White in a tactical battle! **0-1**

German league,
2014.10.18

GM Csaba Balogh
Best rating: 2672

We might think that this position is from a study, but actually it was reached from a game with classical time control... Black plays the most natural move, which changes the objective evaluation...

57...a2? [As the further analysis will tell, Black should have eliminated the pawn first and only then promote his passed pawn. The winning continuation was 57...bxf5! 58.♔xf5 a2 59.g6 a1=♔ 60.g7

White is threatening to play g8Q, so the right move is 60...♔f7! Black is ready to take on h7, therefore White does not have anything better than to play 61.gxh8=♔ ♔xh8 62.♘g5+ ♔g7 and Black is winning. The last trap that Black should not fall into is 63.♘e6+ ♔h6!—+ (But not 63...♔xh7?)

64.♘f6+! ♔h6 65.♘g4+ and the knights are forcing perpetual check, as 65...♔h5 moves into 66.♘f4+! ♔h4 67.♘g6+]

58.g6 a1=♔ 59.g7 White is threatening g8Q. Black finds the best chance to play for the win.

59...♔f7!

60.f6!! Fantastic!!! I personally would never believe that this is a game and not a study. This last move is the reason why Black should have taken that pawn in the initial position. White has closed the a1-h8 diagonal and he is threatening to take the rook. Despite the huge material advantage Black has no win, the knights are controlling everything.

60...♔xe6 Here comes the blunder, after which Black is winning again... [60...♖xh7 is met by 61.♘g5+! ♔g8 Otherwise White promotes the g-pawn with check, but now 62.♘e7#! is mate!]

61.gxh8=♚? White had two different ways to draw... [61.g8=♚+ was the difficult way to hold the draw, the idea becomes clear few moves later. ... 61...♔d6 62.♚xh8 With the king on d6, the game is drawn. 62...♚e5+ 63.♔g4 ♘f5+ 64.♔g5 This is the difference! The bishop is not protected on f5 by the king and Black cannot create a successful mating net. 64...♘xh7+ 65.♔h6=; The easiest draw was 61.♘c7+ 61...♔d7 62.gxh8=♚ ♚d4+ 63.♔g3 ♚e3+ 64.♔g4= and Black does not have more than perpetual check.]

61...♚e5+! 62.♔g4

62...♘f5+! 63.♔f3 Sad, but other moves would have led to a quick mate. [63.♔g5 63...♚g3+ and the bishop is not hanging. 64.♔h5 ♚g4+ 65.♔h6 ♚g6#]

63...♚xd5+ Black now wins thanks to the very effective cooperation of the queen and bishop.

64.♔f2 ♚d4+ 65.♔f3 ♘e4+ 66.♔g3 ♚e3+ 67.♔h4 ♚f2+ 68.♔g4 ♘f5+ [White resigned in view of the forthcoming mate: 68...♘f5+ 69.♔h5 ♚h2+ 70.♔g5 ♚g3+ 71.♔h5 ♚g4+ 72.♔h6 ♚g6#] **0-1**

**(16) Mamedyarov, Shakhriyar(2764)
- Gelfand, Boris(2748)**Tashkent FIDE GP(3),
2014.10.23GM Arkadij Naiditsch
Best rating: 2737

White was pushing all game long and somewhere around move 30 it looked like the win was not too far away for Mamedyarov, but with great defence Gelfand managed to get this difficult endgame, but with quite some chances of making a draw.

42...♖xc5! An excellent try and probably the only real hope for White to win this endgame. [A move like 42...♖c6 doesn't lead to anything after 42...♙e7 and of course the game would just immediately end in a draw after 43.♙xa6 ♖a8 since Black is winning back the a5 pawn.]

42...dxc5+ 43.♙xc5 We have a very interesting position. Black is an exchange up, but it is clear that only White is playing for a win here. The a6 pawn is going to fall and the white d- and a-pawns are going to be very dangerous. Still, a

rook is a very strong piece in an endgame and this gives Black good chances to save the game.

43...♖c8+! A strong move! The white king needs to be removed from the c-file to make it possible for the black king to come to d6 square.

44.♙b6 Now Black has two options.

44...♙e5 This is one of the two correct moves. [Another option for Black was the strange looking 44...♖d8!? and it is funny, but there is no win for White. 45.♙xa6 (45.♙c4 45...♖d6+ and the a6 pawn is saved.) 45...♖d6+! is the only move that holds the draw. 46.♙b7 ♖xd5 Now we see why Rd6+ was so important (because the a5 pawn is hanging now). 47.♙b6 ♖d6+ and the position is just a draw.]

45.♙xa6 ♖c2! Gelfand is playing perfectly. It is very important for Black to attack the g2 pawn.

46.♙f1 Protecting the g2 pawn and at the same time threatening to play a6-a7-Ba6.

46...♖f2?! is a slightly strange decision, even if not a mistake. Black could have drawn much more easily after [46...♙d6! The black king is back to help the rook to stop the a-pawn. 47.a6 ♖b2+! A very important check, forcing the white bishop to leave the protection of the g2 pawn.]

48. ♖b5 ♜xg2 49. a7 ♜a2

50. ♖b7 ♜xa7+ 51. ♖xa7 ♖xd5 and all Black needs to do now to reach a draw is to go to h8 with the king.]

47. ♖c4 ♜xg2? This move is already a serious mistake. [47... ♖d6 would take us back to the drawish line we saw before.]

48. a6 Now it is already difficult for Black to stop the a-pawn because the white bishop on c4 covers the a2 square.

48... ♜f2! Black's position is on the verge of being lost, but Gelfand finds the best chances to save the game again. [48... ♜b2+ 49. ♖c6 and Black is lost.]

49. ♖c5!! A really fantastic move by White which wins the game. The key idea is that White wants to play Bb5-Bc6!

[Black seems to hold the draw after 49. a7 49... ♜f8 50. ♖c6 g5 The g-pawn is going to save the game! 51. d6 ♜c8+! 52. ♖b7 ♜d8 and the game should end in a draw.]

49... ♜f8 Black doesn't have anything better. [49... g5 was also losing. 50. d6! White is just faster. 50... g4 51. d7 ♜f8 52. hxg4 hxg4 53. ♖d5 The white bishop on d5 is stopping the black pawn and at the same time supporting the upcoming a7-a8Q. Black's position is hopeless.]

50. ♖b5 The white bishop is going to c6.

50... ♜a8 Black stops the Bc6 move, but now the d-pawn is rolling...

51. d6 ♖e6

52. h4! A very nice technical move! Now Black doesn't have any counterplay at all.

52... g5 Other moves were also losing.

53. hxg5 h4 54. d7 White just has too many passed pawns...

54... ♖e7 White wanted to play Bc6.

55. g6 h3 56. g7 Black can't stop White from playing Bc6 next.

56...h2

57. ♖c6 Very nicely played by Mamedyarov and of course Gelfand is going to be very disappointed that he didn't manage to hold the endgame when the draw was so close!
1-0

Clash of the Titans

- Zubarev, Nikolay[D24]**

Moscow, 1925

GM Kamil Miton
Best rating: 2655

1.d4 d5 2.c4 e6 3. ♘f3 dxc4 4.e4 [4.e3 4... ♘f6 (4...b5 5.a4 c6 6.axb5 cxb5 7.b3+=) 5. ♖xc4 c5 6.O-O a6 transposes to the main variations of the Queen's Gambit Accepted.]

4...c5 5.d5 [5. ♖xc4 5...cxd4 6. ♘xd4 ♘f6 7. ♘c3 White keeps a small advantage thanks to his space advantage.]

5...exd5 6.exd5 ♘f6 7. ♖xc4 ♖d6 8.O-O [8. ♔e2+ 8... ♔e7 9. ♔xe7+ ♔xe7 10. ♘c3 ♖d8 and without queens the black position should be safer.]

8...O-O 9. ♖g5 ♖g4 10. ♘c3 ♘bd7

11. ♘e4! Because the d5 pawn is blocked Black's position is very solid, which is why White needs to play actively.

11...♔c7 Let's check some other possibilities for Black:
 [11...♙xf3? 12.♚xf3 ♘e5 (12...♙e5 13.d6†) 13.♚f5! ♘xc4
 14.♘xf6+ gxf6 15.♙xf6+–; 11...♙e5! 12.h3 ♙xf3 (12...♙h5 13.g4
 ♙g6 14.♘e5 ♘xe5 15.♙xf6 gxf6∞) 13.♚xf3 ♚b6

14.d6!? A typical move with the idea to activate the bishop and get the initiative over the light squares. 14...♘xe4 15.♚xe4 ♙xd6 (15...♚xd6 16.♚ad1 ♙d4 17.♙e7 ♚e5 18.♚xe5 ♘xe5 19.♙xf8 ♘xc4 20.b3 ♘b2 21.♙xc5 ♙xc5 22.♚d7±) 16.♚ad1 ♘e5 17.♙d5 ♚ab8 18.♚fe1= White has compensation.]

12.♙xf6 ♘xf6 [12...♙xh2+?! 13.♙h1 ♚f4 14.♙e7 ♚h6 15.♘xh2 ♙xd1 16.♚axd1 ♚fe8 17.d6± The white pieces are much stronger than the queen. Black's position is very bad.]

13.♘xf6+ gxf6 White managed to weaken the black structure but it is still not enough to prove an advantage yet. We can say that White did the first step.

14.h3 ♙h5 [14...♙xf3? 15.♚xf3± and White will create pressure over the b1-h7 diagonal.]

15.♚e1 ♚fe8 16.♚b3 a6 17.a4 ♙g6

18.♙d3! The bishop on c4 was limited by the pawn on d5, so Capablanca is going to regroup his pieces.

18...♚d7 [18...♚ac8!? and if White plays according to the plan 19.♘d2 then 19...♚xe1+ 20.♚xe1

20...c4! 21.♘xc4 (21.♙xc4? 21...♙f4) 21...♙h2+ 22.♙h1 ♙xd3 23.♚xd3 ♚xc4 24.♚xc4 ♚xc4 25.♙h2 ♚xa4= with a draw.]

19. ♖d2

19... ♖e7?! is too slow. Black should have played [19... ♗e5! with the idea to activate the bishop and prevent Nc4 (because of Qxd5). 20. ♗xg6 hxg6 21. ♖e4 ♗d4 22. ♖ad1 ♖g7 preventing Rxd4. The position is unclear.]

20. ♗xg6! Improve the black structure seems to be illogical but Capablanca has a concrete reason.

20...fxg6 This move weakens the black king and especially the e6 square. A more solid alternative was [20...hxg6 21. ♖e4 ♖g7 22. ♖f3 f5 23. ♖xc5! ♖xe1+ 24. ♖xe1 ♖c7 25. ♖c1+= with a pawn up, but thanks to the strong bishop on d6 White still has a long way ahead of him to win this game.]

21. ♖e4 ♖g7 22. ♖c3 [22. ♖xd6 22... ♖xd6 23. ♖xe7+ ♖xe7

24.d6! and thanks to the strong d-pawn White keeps a very unpleasant initiative, for example 24... ♖e4 25. ♖b6 (25. ♖d7 25... ♖d8 26. ♖b6 ♖d7 27. ♖xc5 ♖xa4 28. ♖d2+=) 25... ♖c6 26. ♖xc6 bxc6 27. ♖c1 ♖d8 28. ♖xc5 ♖xd6 29.g4+= with Ra5 next.]

22... ♗e5 23. ♖xc5 ♗xb2

24. ♖g5 [24. ♖ab1↑]

24... ♖ae8? is an inaccuracy. Black missed a good chance to defend the position after [24... ♖e5! 25. ♖xe5 (25. ♖e6+ The point was that this move doesn't work because of 25... ♖xe6!) 25... ♗xe5 26. ♖e6+ ♖f7 27. ♖b1 b5!→Black managed to limit the material and get rid of the weak pawn on b7.]

25. ♖e6+ White also keeps an advantage after [25. ♖xe7+ 25... ♖xe7 (25... ♖xe7 26. ♖e6+ ♖f7 27. ♖b1 ♖xc5 28. ♖xc5±) 26. ♖e6+ ♖g8 (26... ♖f7 27. ♖b1 ♗e5 28. ♖xb7+→) 27. ♖b1 ♗e5 28.a5±]

25... ♖f7 26. ♖ab1 ♗e5 27. ♖c4 ♖c8 28. ♖b3 ♗b8 Black could have tried to defend more actively. [28... ♖c3 and now if White plays 29. ♖xb7 ♖xb7 30. ♖d8+ ♖f8 31. ♖xb7 ♖d3 then Black get could counterplay.]

29.g3 ♖d6 [29...b5!? 30.axb5 axb5 31. ♖xb5 ♖xb5 32. ♖xb5 ♖d7 It was an interesting idea to give the pawn in order to

avoid practical problems with the weak king.]

30. ♖f4! Capablanca demonstrates fantastic play. He understood that the knight on e6 was very well placed, but it didn't bring any direct threats, which is why he is regrouping again- to improve the position his rook needs come toe6!

30... ♖ce8 31. ♖e6 ♖d7 32. ♖xe7+ ♔xe7 33. ♖xb7 ♕xf4

34. ♖e1+!! This the point! It is clear that the Cuban champion saw this idea a few moves before. White is winning after this nice combination! [34.gxf4 34... ♖xb7 35. ♖xb7+ ♔d6 and Black has good drawing chances thanks to his active king.]

34... ♕e5

35. d6+! ♔e6 36. ♖b3+ ♔f5 37. ♖d3+ ♔g5 38. ♖e3+! The black king cannot escape to a safe place. [38.f4+? 38... ♔h6∞]

38... ♔f5 39. ♖e4+ ♔e6 [39... ♔g5 40. ♖h4+ ♔f5 41. ♖g4#]

40. ♖c4+! The white queen needed five checks to force the black king to take on d6.

40... ♔xd6 41. ♖d1+ ♔e7 42. ♖xd7+ ♔xd7 43. ♖xa6 1-0

Editorial Preface

All the attention of the week is clearly on the 2nd FIDE Grand Prix in Tashkent.

After 9 rounds we have quite a surprising situation:

With 6/9, the sole leader and is not Caruana, Karjakin or Gelfand, it is Dimitri Andreikin, who looks like he never wants to win a single game, but with his very solid style he collects the "free points" that opponents give to him. The 2nd-3rd places are shared by Nakamura and Mamedyarov and these two are playing both very fighting and entertaining chess.

Caruana seems to be too tired, as he has been missing good winning chances in a couple of games already and is on 50%. It is clearly a very disappointing tournament for Boris Gelfand, who shared 1st place with Caruana in the previous Grand Prix. The happiness was also very short for Vachier-Lagrave, who started so well with 2/2 but somehow couldn't win any more games and even lost one.

As expected, Jobava shows very exciting chess! He got lucky in a few games, but he has an unstoppable desire of creating some mess on the board. He outplayed a lot of his opponents very nicely, but the loss to Andreikin with the white pieces in the 9th round is clearly a hard blow in a tournament that was going so well.

In the last 2 rounds we are going to see a lot of tension, as both Nakamura and Mamedyarov need to fight for the tournament win to be able to get into the top 2 places and qualify for the Candidates 2015.

There are a few other big events currently under way:

The World Senior Championship is held in Greece and one of the biggest German Opens in Bad Wiesse, but without the participation of any 2700 rated players.

At the European Youth Championship we saw a domination of the Russian kids.

That's all for the current week and we can already be very excited about the upcoming World Championship match between the World Champion Magnus Carlsen and the challenger Vishy Anand, which starts on the 7th of November in Sochi, Russia.

4 best games of the past week

(1) Karjakin, Sergey(2767) - Jobava, Baadur(2717) [B10]

Tashkent FIDE GP 2014(5.1),
2014.10.26

GM Csaba Balogh
Best rating: 2672

Jobava wins a very nice attacking game with the black pieces.

1.e4 c6 2.♘f3 Karjakin usually plays the very sharp Advance variation against the Caro-Kann (2.d4 d5 3.e5), but this time he chooses a rather calm setup to avoid Jobava's creativity in the middlegame.

2...d5 3.♘c3 dxe4 [3...♘g4 is the most common reaction.]

4.♘xe4 ♘f6 5.♘xf6+ exf6 White should have a very small, but longterm advantage due to the better pawn structure.

6.♘c4

6...♔e7+!? This clever check confuses the development of the white pieces. At such an early stage of the game, White should avoid trading queens, but then he should retreat with his bishop to a more passive position.

7. ♘e2 ♚c7! Black does not waste time with his queen moves, because it belongs to c7 anyway. White cannot make use of the delaying of the development, because Bd6 followed by 0-0 is coming in time.

8.d4 ♘d6 9.0-0 0-0 10.h3 A useful move to avoid the bishop's development to g4.

10...♞d8 I like this move a lot! Black does not decide yet, where to develop his c8 bishop, he improves his other pieces first with Nd7-f8 and develops the bishop only afterwards, according to White's setup. It is not easy to assess the ideal arrangement of the white pieces. White should first decide whether he wants to build up his position with c4 or c3. Both are playable and both have their pluses and minuses. Karjakin chooses the more aggressive one with c4... [In case of 10...♘f5 White could head for a superior endgame with 11.♘d3! ♘xd3 12.♚xd3 followed by Bd2 and Rfe1. In all the endgames, Black will feel the drawback of his doubled pawns, as White will be able to create a passed pawn on the queenside, while Black cannot do the same on the kingside.]

11.♘e3 ♘d7 12.c4 ♘f8 13.♘d3 White activates his bishop. We can see the effect of the 6...♙e7 check here. The bishop was misplaced on e2, it had to be removed also from the e-file as White is going to occupy it with his rooks.

13...♘g6 14.♚c2 ♘e6 15.♞fe1?! was played too quickly and Karjakin probably missed Black's reaction! [15.♘f5! should have been played, although Black is only very slightly worse after 15...♚d7 16.♘xe6 fxe6 getting rid of the doubled pawns. Black is slightly worse because of the f7-f6 weakening of the e6 pawn, although it should not be adequate after Black regroups his pieces with Re8, Rad8 and Bb8, with a flexible position.]

15...♚d7! An excellent move! Such tactical players like Jobava easily find such ideas. Black is willing to sacrifice on h3! It is actually very dangerous and from White's point of view it is not easy to prevent it at all.

16.♘d2 Karjakin is not afraid, he continues improving his position. [16.♘f1 was much safer, but very passive. Black could activate his pieces with 16...♘f5 immediately occupying the diagonal. 17.♚c3 a5 followed by Re8 and sometimes even Be4 and f5-f4 ideas could be dangerous.]

16...♘h3! Of course! Black is consequent. This sacrifice cannot be calculated, only intuition helps, but Black can easily foresee that a draw by perpetual check will always be in his hand and he can decide to give it or to play for more.

17.gxh3 ♚xh3 18.♘xg6 The only move, otherwise the knight joining the attack will prove decisive. [18.♞e3 is refuted by 18...♘h4! 19.♘h4 ♘h2+ 20.♙h1 ♘g3+ 21.♙g1 ♚h2+ 22.♙f1 ♚xf2#]

18...hxg6 19.♞e3

19...g5! Great play! Black wants to send away the knight with g4 to be able to give a check on h2. Objectively the game is drawn, but in a practical game White has a much harder task, because he must always choose between 2-3 seemingly equivalent moves, but some of them could be worse than the others.

20.c5 [20.♘e5 was a tricky alternative, Black should react precisely with 20...♙e6! (20...♙h5 looks more natural. The knight is under attack and then a check on h2 is possible. But suddenly White has the extremely strong

21.♙g2!! fxe5 22.♖h1 ♙g6 23.♗eh3! This is the point and Black can only avoid getting mated by losing big material... 23...♙f8 24.♗h8+ ♙e7 25.♙xg6 fxc6 26.♙xg5+-) 21.♙g2? is not strong anymore, as Black can neutralize the h-file with 21...fxe5 22.♗h1 f5 freeing the f7 square for the king.; From a

practical point of view, the best move seems to be 20.♗ae1 20...g4 21.♙f5! and the game ends in a draw after (21.♘e5 21...♙h5) 21...g6 22.♙xf6 gxf3 23.♙xf3 ♕h2+ The endgame after 23...Qxf3 Rxf3 is also just a draw. 24.♙h1 ♕g3+ 25.♙g1 ♕h2+= Karjakin had seen this line, but he was still hoping for something more...]

20...♕f4! [20...g4? did not work in view of 21.♘e5 and cxd6 next.]

21.♗b3

21...♕c7! Another great decision by Black! Jobava keeps his strong attacking bishop on the board and he creates the decisive threat of Rxd4! Nxd4 Bh2 Kh1 Bg3 and Qh2-f2 mate. [21...g4? did not work because of the nice defensive resource 22.♙f5! and suddenly White wins!; Black could have forced a draw with 21...♙g4+ 22.♙f1 ♙h3+ 23.♙g1 (23.♙e2? loses to 23...♗e8+ 24.♕e3 ♕xe3 25.♗xe3 ♗xe3+ 26.fxe3 ♙g2+ and the knight falls.) ; 21...♗xd4 also did not work immediately, because of 22.♕xf4 ♗xf4 23.♘h2! The only move, but it's good enough!]

22.♙c4 Karjakin parries the Rxd4 threat and intends to defend with Qf1. [22.♗e1? allows 22...♗xd4! 23.♘xd4 ♕h2+ 24.♙h1 ♕g3+ 25.♙g1 ♙h2+ 26.♙f1 ♙xf2#; 22.♗xb7? also loses to 22...♗xd4!]

22...♔h5 Black removes his queen from the pin and refreshes the g4 threat! [It was more forcing to start with 22...♔g4+ 23.♔f1 with a transposition to the game.]

23.♔g2 Karjakin sets a devilish trap again, but Jobava does not fall into it. [23.♖xb7 is simply met by the cold-blooded 23...♖ac8 f3 is hanging and g4 is coming next.]

23...♔g4+! [23...g4? was seemingly decisive, but suddenly after

24.♘h4!! White is the one who wins the game as Rh1 is coming next and White preserves his extra piece. 24...♔xh4 25.♖h1 traps the queen.]

24.♔f1

24...♖e8! Logical and strong! Black cuts the king from his

evacuating route along the e-file. Black is threatening Re4 and Qh3-Rg4 mate.

25.♖e1 ♔h3+! Jobava uses his queen extremely effectively in this game. He sends the king back to g1 to avoid the recapture with the king on e1 followed by running to the queenside.

26.♔g1 ♖xe1+ 27.♘xe1 ♔g4+! And he removes the queen from the pin again, before bringing the other rook to the attack. [27...♖e8 is met by 28.♘e5!]

28.♔f1 ♖e8! It is getting more and more unpleasant after each move.

29.♘g1 Trying to open the 3rd rank to bring the rook into the defense. [29.♘d2 does not help either. Black wins after 29...♔h5!—+ as there is no adequate defense for White.]

29...♘h2! Both players were already down on time, but Jobava continues with his perfect attacking moves.

30.♘e2? A blunder, but the position was bad anyway. [30.♘h3 was the only move, but Black gets a huge advantage after 30...♔e4! threatening on e1 and h1. The only move is 31.♖e3 ♔h1+ 32.♔e2 ♖xe3+ 33.fxe3 g4 and White must sacrifice one of his minor pieces to stop the g-pawn. 34.♘f2 (34.♘f4 34...g3—+) 34...♔f3+ 35.♔d2 g3—+]

30...♖xe2! Finishing the game in style!

31.♖xb7 [31.♙xe2 31...♙g1#]

31...♖e6 0-1

(2) Gelfand, Boris(2748)
- Vachier Lagrave, Maxime(2757)
[D83]

Tashkent FIDE GP 2014(6.1),
 2014.10.27

GM Csaba Balogh
 Best rating: 2672

A very exciting game, but not without mistakes.

1.d4 ♘f6 2.c4 g6 3.♘c3 d5 Vachier plays his favorite Gruenfeld defense and Gelfand chooses a slightly forgotten setup.

4.♙f4 ♙g7 5.e3 O-O 6.♖c1 White develops his queenside first and wants to get prepared for the standard c5 break.

6...c5 Vachier follows the old main line and sacrifices a pawn for activity, in typical Gruenfeld style. [White's setup used to be popular some time ago, but it went out of fashion because of the reply 6...♙e6 7.♙b3 c5! 8.♙xb7 ♙b6! with some very sharp and long lines, which lead to a draw in the end. Perhaps Gelfand wanted to check his opponent's memory or he prepared some improvement at home...]

7.dxc5 ♖a5 This is the main move, when White plays 6.Nf3 instead of 6.Rc1. The difference is that White can simply capture one more pawn now, because he can safely defend his c3 knight against threats like Ne4. [7...♙e6 is more common and probably also better.]

8.cxd5 ♜d8 After sacrificing two pawns, Black must find the most active moves to generate some compensation against the undeveloped kingside. [8...♞e4 9.♞e2 is the key resource of playing 6.Rc1 instead of Nf3. White is considered to be fine here.]

9.♙c4 e6 This is the novelty. Hardly a prepared one, because Black does not equalize. [9...♜xc5 10.♙b3 is also better for White.]

10.♞e2 ♞xd5 [Black could restore the material balance with 10...exd5 11.♙d3 ♜xc5 but he ends up with a positional disadvantage after 12.O-O ♞c6 13.♞b5 White has a very nice development of his pieces and an easy play against the isolated pawn on d5.]

11.♙d6! A very nice and unusual motif! White protects his extra c5 pawn and closes the d-file.

11...♞xc3 12.♞xc3 b5! Black may only try to compensate with such kind of active moves. Any Gruenfeld players must look for such opportunities. [12...b6 runs into the

unpleasant 13.♜f3!; A highly important point to confirm White's advantage is in the variation 12...♞a6 13.O-O ♞xc5

The pin on the d-file seems to be good for Black, but actually he is losing a piece after 14.b4!! ♜xb4 15.♙xc5+—]

13.♙d3! Unpinning the d-file again. [On 13.♜f3 Black has the strong reply 13...♙d7! 14.♜xa8 ♙c6 trapping the queen and the difference to the 12...b6 line is that after 15.♜xb8 ♜xb8 16.♙xb8 bxc4 the bishop was hanging and Black is fine.]

13...b4 14.♞e4 The human move. Gelfand strengthens his position by centralizing his knight. [The machine suggests 14.♞b5!? threatening to jump with both minor pieces to c7. It is not obvious what Vachier had in mind here.]

14...b3+! [14...♙xb2 turns out to be a bad alternative after White's great reply 15.O-O! Finally the king has found safety and White keeps a huge positional advantage. The fortress of the c5 pawn and d6 bishop completely paralyzes Black. 15...♙xc1 16.♜xc1 Black is going to end up in serious trouble on the dark squares. 16...♜xa2 is an attempt to prevent Qb2, but it fails to 17.c6!+— and c7 next wins the game.]

15.♜d2 ♜xd2+ 16.♞xd2 bxa2

17.♖a1 After a couple of natural moves, Black still needs to solve some problems. His problem is the same as before, he could maintain the balance materially, but then he ends up in a positionally bad situation. Vachier rightly decides to keep the activity and tries to win back the material later at better circumstances.

17...♗b7 The idea is correct, but this is probably not the best execution. [17...♘c6 seems to be stronger. The idea is 18.♖xa2 f5 19.♘c3 ♘b4 20.♖a4 ♘xd3 21.♙xd3 ♗e5 winning back the material like this. Black is finally close to equality.; 17...♗xb2 18.♖xa2 ♗g7 leads to a too passive position after 19.♖b1 ♘c6 20.♙e2! is a strong prophylactic move to avoid any kind of danger on the d-file and Black faces serious difficulties in finishing the development. The bishop on d6 is just too strong. 20...♗d7 is strongly met by 21.♗a6!]

18.♖xa2 ♗d5 19.♖a4 ♘c6? This is the first clear mistake. It allows White to consolidate his position and create a very dangerous passed pawn with b4-b5. [19...♗xb2 leads to the usual problems with the passivity. 20.♖b1 ♗g7 21.f3 protecting the g2 pawn just in case and White is threatening Nc3. Black is in positional trouble. 21...♘c6 22.♘c3±; 19...a5! was the right move to prevent b4 and only next Nc6 and Nb4 if it is possible. Black has compensation, but it is unclear whether it is sufficient or not. However, this was definitely the

way to play. 20.f3 with the idea of Nc3, preventing Black from developing his knight to c6, but he could play 20...♘d7]

20.b4! This is the first moment when White could be sure that he had won the opening battle. Probably this led to Gelfand relaxing and he starts to make mistakes...

20...♗e5 Vachier still pins his compensation to active pieceplay.

21.b5 The first inaccuracy. Gelfand wanted to improve his position by keeping all the advantages he had before, but this allows some counterplay... [White should have gotten rid of some active pieces with 21.♗xe5! Of course, it is a very difficult decision to give up that nice bishop on d6. 21...♗xe5 (21...♗xe4 is met by 22.♗d6 ♗xg2 23.♖g1 ♗b7 24.b5 with a positional win.) 22.♙e2 Leaving the d-file. White still keeps the extra pawn and the only way to win it back leads to a clearly worse position after 22...f5 23.♘g5! Keeping an eye on e6 and the knight is heading to f3. 23...♗xg2 24.♖c1 ♗d5 25.♗c4!± with serious problems.]

21...f5 22.♘c3 Another human move, sending away the strong bishop, but it is a mistake. [The machine shows that the only way to keep the advantage is 22.♘g5! 22...♗xg2 (22...h6 is met by 23.♗xe5 ♗xe5 24.♘f3 keeping the extra pawn.) 23.♖e1! Such moves are impossible to find for a

human. White seemingly just moves into Nf3, but the concrete lines still show a clear edge for him... 23...♙d5 (On 23...h6 24.♘xe6 ♘f3+ 25.♔e2 ♘xe1 26.♙c4!+- White first takes back one of the rooks and then the knight on e1.) 24.e4! This is the point of putting the rook to e4! 24...♘xd3 (24...fxe4 25.♙xe4±) 25.♔xd3 fxe4+ 26.♘xe4 The bishop on d6 controls the important f8 and b8 squares of the black rooks. The strong c5-b5 passers guarantee an edge.]

22...♙xg2 23.♖ha1 is the most natural move to attack the a7 weakness, but it is another mistake. Gelfand underestimates the pin on the long diagonal and Vachier makes use of it with some powerful moves. [23.♖d1 should have been played.]

23...♘xd3 24.♔xd3

24...♖ac8! Suddenly things are becoming very unpleasant. Everything is hanging because of the pins. Rxc5 is a threat, Bxc3 Kxc3 Rxd6 is another one and the direct Rxd6 is also hanging in the air. What a turn of events! This could have led to a quick collapse, but Gelfand manages to stay cool and saves the game...

25.♖c4! The only move to cover as many things as possible.

25...♙e4+! Vachier feels the moment, he must try to win material, otherwise the a1 rook leaves the pin.

26.♔e2 ♖xd6 27.cxd6 ♖xc4 28.♘xe4 [28.d7! was the accurate move order! Only after 28...♙f6 29.♘xe4! fxe4 30.♖xa7 transposes to the game.]

28...fxe4 [28...♖c2+!! would have given Black a big advantage. But of course, it is again a move which normally never comes to human mind... 29.♔f1 Black can choose between two very pleasant continuations here: (29.♔d1 is met by 29...♖c8! and Black wins the piece at much better circumstances than in the game.) 29...♖c8 (29...♙xa1 30.d7 ♖d2! 31.♘xd2 ♙f6 followed by winning the pawn with Kf7-e7. Black will end up with an extra pawn, but it is unclear whether a 4 against 3 on the kingside is sufficient for the win or not.) 30.♘c3!? A nice move, but it does not solve all the problems... (In the line 30.♖xa7 30...fxe4 Black has a better version compared to the game. Black manages to stop the passed pawns just in time. 31.b6 ♙e5! 32.b7 ♖b8 33.♖a8 (On 33.d7 33...♔f8 34.♖a8 ♔e7! Just in time!) 33...♙xd6+-) 30...♙xc3 31.♖c1 ♔f7 32.d7 ♖d8 33.♖xc3 ♖xd7 again with an extra pawn, but in rook endgames, the defensive side can always hope for survival. If White manages to trade the queenside pawns, the 4 against 3 should already be a draw.]

29.d7 ♙f6 30.♖xa7 ♖c2+ 31.♔f1 ♖d2 [31...♖b2 leads to a similar draw as in the game after 32.♖a8+ ♔g7 33.d8=♔ ♙xd8 34.♖xd8 ♖xb5 35.♖d4=]

32.b6 Black is forced to give up his bishop to stop the passed pawns and the arising rook endgame turns out to be a draw.

32...♔f8 33.♖a8+ ♔e7 34.b7 ♕e5 35.b8=♔ ♕xb8 36.♖xb8 ♖xd7 37.♖b4 ♔f6 A great fighting game! 1/2-1/2

(3) Mamedyarov, Shakhriyar(2764) - Karjakin, Sergey(2767) [E20]

Tashkent FIDE GP(8),
2014.10.29

GM Arkadij Naiditsch
Best rating: 2737

A very interesting game with a lot of tactical ideas and interesting play from both sides is awaiting us. In the opening I guess it is easy to see that Black was very well prepared and equalized pretty quickly. Then instead of making a fast draw, Karjakin strangely played for a win in a position where he definitely couldn't be better, but luckily for him, the position was still about equal.

1.d4 ♘f6 2.c4 e6 3.♘c3 ♕b4 4.f3 Lately the Nimzo with 4.f3 is Mamedyarov's favourite. For a long time the 4.f3 move was very rarely played on the top level, but in the last 5 years it is getting more and more fashionable. Even in the WCC match Anand-Carlsen, White got very big advantage after the opening by playing 4. f3.

4...d5 Another popular move is 4...0-0 and White needs to play 5.a3 anyway, because in case of 5.e4 d5! Black seems to have good play, as in Mamedyarov-Aronian.

5.a3 ♕d6 is quite a rare move, but not a stupid one at all. Because of the f3 move, White's pawn structure is not that solid anymore and Black wants to launch quick play in the center. Of course Black's main reply is 5...Bxc3.

6.e4 Of course White tries to be fast in dominating the center.

6...dxe4 7.fxe4

7...e5! is of course a known move, but still a nice one to remember. Of course Black should stop White from playing e5 at any costs.

8.d5 O-O 9.♘f3 ♕g4 Actually this position looks quite strange to me. Black's play is clear, it is all about dominating the dark squares, but is it really an equal position? White's central pawns are so strong and Black sort of lost a tempo by playing Bb4-Bd6-e6 and then e5.

10.h3 ♕h5 Black giving up the bishop pair would be the same as to agree being worse.

11.♕d3 White is preparing to castle kingside.

11...♕c5! Another very important move. If White managed to castle kingside, then to play Be3 and maybe Ne2-Ng3 I can't imagine Black's position being OK. Karjakin loses another tempo just to stop White from castling kingside, but maybe now White can switch the plan to castling queenside?!

12.g4 It is time to get active!

12...♕g6 13.♕c2 A strange looking move, but in fact a pretty logical one. White stops Black from playing Bd2 next and is preparing to play b4 next. [If White tried to castle queenside with 13.♖e2 13...♕d4 14.♕d2 ♘bd7 followed by Nc5 would

give Black excellent play.]

13...♖e8 Black is preparing to go for f8 in case of b4 and protecting the e5 pawn at the same time.

14.♕g5 h6 15.♕h4 So far the game was very logical and both players were playing quite quickly. We can see that the position is very complicated here and every move is very important.

15...c6 Black is starting his play against the white center, which is very typical.

16.b4 A very tempting move, but in hindsight we could say that it is maybe not the best try. [16.♖d2!? with the idea of castling queenside looks very interesting to me.]

16...♕e7 A very strong move! The black bishop is taking a better place than on f8, because Black wants to keep the idea of playing Nxex4 and Nxd4 in mind. Otherwise it would of course be a hard move to make. The e5 pawn is hanging and now the answer to the question as to why Black played Re8 is that he just wanted to provoke the b4 move. All this is not very logical, but the computer is very happy with Black's play, so we can be quite sure that Karjakin was still in his preparation.

17.O-O [17.♘xe5? of course didn't work because of 17...♘xe4! and Black is doing very well.]

17...a5 Wow! Black doesn't care about the e5 pawn and tries to destroy White from all sides. After his first very unhuman move, we could now be sure that Karjakin is still in his preparation. Now White has a lot to calculate... [It would be a bad idea for Black to get greedy with 17...♖xd5? 18.exd5 ♗xc2 19.♔xc2 ♗xh4 20.♖ad1 and all white pieces are actively participating in the game, which gives White clearly more than just compensation for the lost pawn.]

18.♗xe5 is a very tempting move and probably also the best. [If White tried to play directly in the center with 18.♗xf6 18...♗xf6 19.c5 Black would get excellent play with 19...♗a6! and although position is very unclear, I think only White can be in danger here.]

18...axb4 19.♗xg6 Once again White probably didn't have anything better. [In case of 19.axb4 19...♖xa1 20.♔xa1 Black has

20...♗xd5! with a good position for him.]

19...fxg6 What a position! So many different moves are possible here!

20.e5 [Once again 20.axb4 doesn't bring White anything more than a more or less equal position. 20...♖xa1 21.♔xa1 ♗xd5 22.♗xe7 ♗xe7 and slowly Black will play Nd7 and get the knight to e5. White is maybe minimally better here, but the

game should most likely end in a draw.]

20...♗fd7 Black has to go back.

21.♗xe7 is clearly the most critical reply. At first sight White's position looks very promising, but in fact Black's play seems to be enough to hold the position on equal territory. [21.♗xg6? 21...♗xh4 22.♗xe8 ♔xe8 and Black is much better.; A nice position for practical chess could arise after 21.♗g3 21...bxc3 22.e6 White is a full piece down, but the very strong pawns and a possible future attack on the black king make things extremely complicated here. This is a nice position for deep analysis, which we are not going to enter. We are just going to judge this position as very unclear!]

21...♔xe7 22.♗xg6 White didn't have anything better as Black just wanted to play Qxe5.

22...bxc3?! A very strange move. Karjakin starts to play for a win in a position where it is very unlikely that he can be better. [22...♔xe5 would lead to an immediate draw after 23.♗xe8 ♔g3+ 24.♔h1 ♔xh3+ 25.♔g1 ♔g3+]]

23.♗xe8 ♔xe8 White has a rook and a pawn against the black knights, which of course gives Black a slight material advantage, but the white central pawns remain very dangerous and I think only White can be better here.

24.e6 ♘f6

25.♔d3! White is preparing to play Rae1 to support the central pawns in their movement. An easy move when we see it, but a hard move to play, as White also had a lot of other different ideas in the position.

25...cxd5 26.cxd5 ♘a6 Karjakin's idea is of course to bring the rook from a8 back into the game.

27.♖ae1 ♘c7 Karjakin finds the only way! [27...♖d8 28.d6 and White would be winning on the spot.]

28.d6 White needs to give up one of the pawns, but puts Black in a dangerous pin.

28...♘xe6 29.♔c4 is a good try. [Black is OK after 29.♔xc3 29...♖d8]

29...♙f7 The only move to hold things together, but it is easy to see that Black's position is very dangerous.

30.♔e4! An excellent move! White is attacking the b7 pawn and at the same time he wants to play Rxf6.

30...♖d8! Once again Karjakin plays the best move!

31.♖xf6+ White didn't have anything better. [31.♔xb7+ 31...♔d7 and the black pieces are joining the game.]

31...gxf6 32.♔h7+ ♙f8 33.♔h8+ ♙f7 34.♔h7+ ♙f8 It seems like White doesn't have anything, but Mamedyarov finds another resource.

35.♖f1!? This move leads to a draw anyway, but it puts Black in front of some more trouble first.

35...♘f4! is the only move that saves the game! There was no other defense to stop White from playing Rxf6.

36.♔xh6+ ♙f7 The black king is better placed on f7 than on g8 because of the extra protection of the f6 pawn.

37.♔h7+ ♙f8 38.♔h6+ ♙f7 39.♔xf4 White is a pawn up, but the strong c3 pawn and the open position of the white king gives Black enough play to keep the position equal.

39...♔e6 is the most logical move. Black wants to play Rxd6 next.

40. ♖f3 attacking c3 and b7.

40... ♜e5! is another very good move by Black. The queen always threatens to get to g3 from e5 and at the same time it protects the f6 and c3 pawns.

41. ♜xb7+ and in fact this position is a total draw. After 41.. . Kg6 White doesn't have anything better than to play 42.Qb1 Kg7 43.Qb7 with a draw. A very interesting and exciting game, but what is a bit strange is that the game was played perfectly by both players, with zero mistakes! What a high level game!
1/2-1/2

**(4) Gelfand, Boris(2748)
- Jobava, Baadur(2717) [A40]**

Tashkent FIDE GP(8),
2014.10.29

GM Arkadij Naiditsch
Best rating: 2737

When you play Jobava, you never know which opening will show up on the board and you must be ready for a hard fight. Of course Jobava is much more dangerous with White than with Black, but he can sacrifice something or start to play very aggressively in any position. Such an approach is very risky, but sometimes it brings great winning games and here we come to the current one. After the opening I think White's position should be clearly better, but Gelfand tries to destroy Black with 8.Qg4 and gets himself in big danger where Jobava finishes him off without any mercy.

1.d4 e6 Sometimes Black starts with this move order against the 1.d4 players, knowing they are probably not going to enter the French defense after 2.e4.

2.c4 b6 Personally I could never understand this opening choice. White is immediately winning the control over the center and is just a bit better.

3.e4 ♘b7 4.♙d3 A very good move order for White, which shows again how well Gelfand is prepared in the opening phase of the game.

4...♗b4+ Black needs to exchange the bishop to get a bit more space for the pieces.

5. ♖d2 ♗xd2+ 6. ♘xd2 d6 Black's idea is to play e5 or c5, but in both cases White will most probably react with d5, after which position of the black bishop on b7 will be very unlucky.

7. f4! looks like a very strong move to me! In chess space advantage is very important, so why not take it if you can!

7... ♘d7 Black continues preparing the c5 or e5 pushes, which needs to be done already during the next moves.

8. ♖g4? I can't explain this move of Gelfand. There was absolutely no need for White to enter very unclear complications. [White is just better after an easy move like 8. ♘gf3 8... ♗e7 9. O-O O-O and now White has a lot of different options, but maybe a solid move like 10. ♖c2 should clearly give White some advantage. Rael is coming next.]

8... ♘gf6! Of course! Black only had this move and you don't need to ask Jobava twice if he wants to enter complications...

9. ♖xg7 Maybe it was still better for White to just play 9. Qh3 but of course if you say A it is difficult to stop yourself from saying B...

9... ♖g8 10. ♖h6 ♖xg2 Now the position has changed a lot. White is still dominating in the center, but the disadvantage of the central pawns is that they could quickly start hanging when the black pieces are going to target them. The position is already very unclear now.

11. ♘gf3 ♖e7 Black is preparing to castle queenside and White also needs to pay attention to moves like d5 and e5, which could destroy the pawn center.

12. ♖h3 A good move. The rook has to be chased away from the 2nd rank.

12... ♖g7 is also very logical, leaving the g8 square for the a8 rook after O-O-O.

13. O-O-O ♘g4! A very strong move! [After 13...O-O-O 14. ♖hg1 ♖dg8 Black looks fine, but White has this fantastic move: 15. ♖g5! and the rook on g5 can never be taken because of fxg5, so White is better here.]

14. ♖g3?! Once again White chooses the wrong path... [A stronger reply was 14. ♖g2! 14... ♘df6 Black also had other options, but this seems to be the most logical one to me. 15. h3 White probably needs to enter this forced line, as in case Black was in time with Nh5, White's position could collapse. 15... ♘e5 16. ♖xg7 ♘xd3+ 17. ♖c2 ♘f2 Black is winning back the exchange and it is very hard to say who is better here.]

14...♘df6! 15.♘g5?! White doesn't choose the best option again. After this move Black is getting all he wished for. White had to take extreme measures already: [15.♞dg1! looks like the right practical choice to me. 15...♘h5 The f4 pawn is falling. 16.♞e1 ♘xf4 17.♙c2! with the idea of playing h3 next and trying to use the fact that Black still did not castle. I think White's chances of creating a huge mess are very good here.]

15...h6 sending the white knight to a terrible position on h3.

16.♘h3 O-O-O So Black got all he wanted: all pieces are in the game, Rdg8 is coming soon to gain control over the g-file, White's central pawns became targets for the black pieces and the knight on h3 is in a terrible position. Black is already much better here and what is even worse is that it is very hard for White to find any decent idea of what to do next.

17.♞de1 White is trying to hold things together in the center, but he lets Black improve his position even more. [17.♞f3 would have been a better choice in hindsight...]

17...♘h5! Black is playing a perfect game! Jobava brings his queen to a very unpleasant position on h4.

18.♞f3 ♞h4 Whites position is very close to collapsing and still it is very hard to say what can be his next move?!

Black wants to play f5, d5, or maybe just Rdg8. At some moment tactical ideas with Nxh2 could also be possible, or even e5.

19.♞e2 defending from the direct Nxh2 threat.

19...♙b8 A good prophylactical move. [But why not just play 19...f5! with the idea to play Nh6 next. I think Black is already much better.]

20.♙c2 This move is not really helping White, but it is very hard to give a better advice. Maybe a move like 20.Qf1 was already White's best option, but it is hard to play such moves during a game as they just look too ugly.

20...f5! 21.♞f1 freeing the f3 square for the knight.

21...♘hf6 and one more piece is attacking the e4 point.

22.♘f3 ♞h5 23.exf5 exf5 White's position is getting worse and worse. The strong white center is gone and all the minuses of his position are still there, especially the knight on h3 and the rook on h1, which are totally out of the game.

24.d5 at least closing the bishop on b7.

24...Re8! Another very strong positional move. All Black needs to do to win the game now is to win control over the e-file and Jobava is doing just that. [Black had another very unhuman way of going on with 24...a6 and the funny thing is that White can't do anything about Black's threat of playing Nxd5 next. 25.b3 exd5 26.d4 de3 27.c6+ Kc8 and Black is winning.]

25.Rxe8+ Kxe8 White can't stop Black from playing Re7 next.

26.Kd3 Re7 27.Rf1 [After 27.Kxf5 27...Re2 Black has about 1000 different tactical threats and White's position is also just lost.]

27...e3 28.Rf2 [28.Re1 was also losing to 28...xc4! A nice tactical blow! 29.Rxe7 Kxe7 30.Kxc4 Ke3+ 31.d2 Kxh3 leaving Black with a pawn up and an easily winning position.]

28...a6 The c4 and d5 pawns are now the targets.

29.b3 exd5 and Black is finally starting to take White's material...

30.Kxf5

30...xc4 after 31.Bxc4 Re1 32.Nxe1 Qxe1 33.Kc2 Ne3 Black is winning the white queen. A really great game by Jobava, who combined tactical motives with very strong positional play against the white center and a great example on how dangerous it can be sometimes when pieces are playing against central pawns! **0-1**

Endgame section

(15) Nakamura, Hikaru(2764)
- Caruana, Fabiano(2844)

Tashkent GP,
2014.10.27

GM Csaba Balogh
Best rating: 2672

Black is a pawn up and he is threatening mate in two after Qf2, but Nakamura finds a very nice motif after which he turns to be the one who is playing for the win.

52. ♖a8+ [Actually, White could also play 52. ♖f1 covering the f2 square and threatening the f7 pawn with Qe8. Black has nothing better than forcing a draw by perpetual check: 52... ♖xg2+ 53. ♗xg2 ♕g4+ 54. ♗f2 ♕f3+ 55. ♗e1 ♕xe3+ 56. ♗d1 ♕d3+ and the king must protect the rook... 57. ♗e1 ♕e3+=]

52... ♗h7 53. ♖h8+! This is the point! Nakamura simplifies to a queen endgame.

53... ♗xh8 54. ♕c3+ ♗h7 55. ♕xd2 In queen endgames, there is the general rule that the quality of the pawns is more important than the quantity! Black is a pawn up, but it costs a lot of time for him to create a passed pawn, while White

already has a very dangerous one on b5. Suddenly Caruana must be very careful to not lose the game...

55... ♕g5 56. b6 h4! Caruana finds a very clever idea. He wants to sacrifice his h-pawn in order to expose the white king. The g2 pawn gives a safe shelter against the checks, but after removing it, Black can always hope for a perpetual. [Some careless moves like 56... ♕c5 57. ♕d4 ♕c6 might lead to quick defeat after

58. ♕b2! ♕b7 59. ♕b5! followed by Qc5-c7 and the b-pawn promotes.; 56... ♕b5 57. ♕d6 is also suspicious.]

57. ♕f2 The best try. White improves his queen by attacking the f7 pawn. [Black's point was that 57.b7? does not work immediately because of 57... ♕b5! and White cannot protect his main triumph.; 57. ♗h1 is met by 57...h3! 58.gxh3 ♕b5=

and White is forced to allow perpetual check on f1-f2 after protecting the b-pawn with either Qd6 or Qd4.]

57...♔g7 58.♚f4 [58.♚b2+ would have been a more tricky attempt.]

58...♔g8! It is quite difficult to find this move, since it is very illogical to move into the b8Q check. (The most natural 58...♔h7 is strongly met by 59.♚b3! protecting the e3 pawn and attacking f7 with check. This causes Black some real problems, because after Kg8 the b-pawn promotes with check, while Kg7 loses to b7 h2 and Qb2, protecting the g2 pawn with check and White queens next.) 59.b7 (Now on 59.♚b3 Black is in time to play 59...h3) 59...♚xe3+ and Black gives perpetual. 60.♔f1 If the king moves to the h-file, Black holds the draw with checks on g3 and e1. 60...♚d3+ 61.♔e1 ♚g3+ White cannot escape from the checks... 62.♔d1 ♚d3+ 63.♔c1 ♚f1+ 64.♔c2 ♚d3+=]

58...♚b5 59.♚c7 White is ready to advance his pawn. His queen safely covers the h2-b8 diagonal from the checks after the king moves to h2. But here comes the whole point of Caruana's defensive idea:

59...h3! 60.gxh3 [60.b7 also leads to a draw after 60...hxg2 Black is threatening with Qf1, therefore the next moves are forced: 61.♔xg2 ♚e2+ 62.♔g3 ♚f3+ with a draw.]

60...♚b1+ 61.♔g2 ♚b2+ 62.♔g3 ♚f6! Black cannot stop the b-pawn, but he can successfully play on perpetual check.

63.b7 ♚f3+ 64.♔h2 ♚f2+ 65.♔h1 An instructive endgame! **1/2-1/2**

(16) Jakovenko, Dmitry(2747)
- Mamedyarov, Shakhriyar(2764)

Tashkent FIDE GP(9),
2014.10.31

GM Arkadij Naiditsch
Best rating: 2737

White had a huge opening advantage, but step by step Black recovered and with the last move 26.c5? White made a serious mistake, going for the upcoming endgame.

26...♔xa2! Of course Black needs to enter the endgame. White wanted to play Rd6 next.

27.♔xa2 ♕xa2 28.♖d6 White is trying to get the c6 pawn. How to judge such a position?! It is not that simple, because the position is pretty tactical, but from general point of view we can see a few things: Black's a-pawn is at least as strong as White's c-pawn. White's advantage is that the bishop on e4 is stopping the black bishop from g7 to get activated.

28...♕c4! A strong move. Black is attacking the f1 rook and at the same time he wants to protect the c6 pawn with Bb5.

29.♖b1?! After this logical move, White's position is already very dangerous, maybe almost lost! [29.♕xc6? was also a big mistake because of

29...♖xc6! 30.♖xc6 ♕xf1 31.♔xf1 a4 and nothing can stop the a-pawn!; The following exchange sacrifice is also clearly bad for White: 29.♖xc6 29...♕xf1 30.♔xf1 a4 31.♖xc8+ ♖xc8 32.♕b7 This try to win the exchange back ends in nothing: 32...♖e8 33.c6 a3 34.c7 and now the important 34...♔h8! leaves Black with excellent winning chances.; I think White should have gone for 29.♖a1 29...♕b5 (29...a4 is not good because of 30.♖xc6) 30.♖xa5 ♖xa5 31.♕xa5 ♕f8 Black is winning the c5 pawn. 32.♖d7 ♕xc5 33.♕c3 and I think White's chances to make a draw are promising here.]

29...a4 How to stop Black's a-pawn now?!

30.♖xc6 [30.♕xc6? was immediately losing to 30...♖xc6! 31.♖xc6 a3]

30...a3

31.♖xc8+? This was clearly not the day of Jakovenko, who

is usually playing so solidly. White misses his only chance to continue the fight. [It was not very difficult for White to find that it was time for a passive defense: 31.♖d6 31...a2 32.♖a1 ♖a4 33.♖d2 and of course Black is better here, but White's chances to survive the game are not that bad.]

31...♖xc8 Black now wants to bring the bishop back into the game by playing Bd8 next. White's problem is that the bishop from e4 can't move because Black would immediately play e4 himself and the a-pawn would become a queen.

32.c6 a2 33.♖a1 ♖f8 The black bishop finally joins the game.

34.c7 Black wanted to play Bb4-Bc3.

34...♗d6! The last important move! The c7 pawn will be taken now, after which White can't do anything better than to give the rook for the a2 pawn, which would just leave Black with a clear piece up.

35.♗b7 ♗xc7 Mamedyarov is precise until the end.

36.♗xc8 ♗xb6 What a sad end for White, who was close to winning already after 20 moves of the game and then totally collapsed in the endgame. **0-1**

Clash of the Titans

(17) Alekhine, Alexander
- Saemisch, Fritz[A31]

Baden-Baden(11),
1925.04.29

GM Kamil Miton
Best rating: 2655

1.c4 c5 2.♘f3 ♘f6 3.d4 cxd4 4.♘xd4 b6 A rare move. Black has a few other ways to play, for example: [4...♘c6 5.♘c3 e6 leads to the main position where White has a few plans.; 4...e5 5.♘b5 d5 6.cxd5 ♘c5 gives Black an interesting initiative for the pawn.; 4...g6 5.♘c3 ♘g7 6.e4 transposes to a position from the Maroczy System.]

5.♘c3 ♘b7

6.♙g5 The main move is [6.f3 White is preparing e4 to take the center and limit the black bishop on d7. 6...d6 7.e4 e6 The position transposed to a very complex hedgehog structure.

8.♙e2 ♙e7 9.♙e3 O-O 10.O-O a6 11.♙d2 ♘bd7 12.♙fd1 ♙c7 13.♙ac1 ♙ac8 14.♙f1 ♙b8 Both sides have some plans, White usually tries to prove his advantage after a4-b4-Nb3-a5 and Black should wait for the right moment to break in the center after d5 or play Bd8-Bc7 and Kh8-Rg8-g5 etc...]

6...♘e4 It looks logical for Black to exchange pieces.

7.♘xe4 ♙xe4 8.f3 ♙b7 9.e4 f6 looks ugly, let's check more natural moves, for example: [9...g6 10.♘b5 threatening Nd6. 10...d6 (10...♙c8 11.♙d4 forcing f6 or Rg8.)

11.c5!! A fantastic break! Thanks to this sacrifice White will activate the next pieces and get a decisive initiative. 11...bxc5 (11...dxc5 12.♙xd8+ ♙xd8 13.♘d6!+-) 12.e5! dxe5 (12...♙a5+ 13.♙d2 ♙b6 14.exd6 exd6 15.♙c3 ♙g8 16.♙d2 with the threat Ba5 or simply O-O-O.) 13.♙xd8+ ♙xd8 14.♙c4 f6 15.O-O-O ♘d7 16.♙e6! ♙c6 17.♙xd7+ ♙xd7 18.♙d1 fxg5 19.♙xd7+ ♙c8 20.♘c7 ♙b8 21.♘a6+-; 9...♘c6!?)]

10.♙e3 ♘c6 [10...e5 with the idea to take control of the dark squares after the bishops exchange. 11.♘b5 ♘a6 (11...♙b4+ 12.♙f2 d6 is not on time because of 13.c5!) 12.♘d6+ ♙xd6 13.♙xd6 ♙e7 14.♙d2 ♘c5 15.♙e2 O-O 16.O-O+=]

11.♘b5 ♙b8 [11...a6 12.♘c3 e6

13. ♖a4! Otherwise Black would equalize after Bc5. (13. ♖d2 13... ♗c5=) 13...b5 14.cxb5 axb5 15. ♗xb5 ♖a5+ 16. ♖c3 ♗b4 17.a4 ♗xc3+ 18.bxc3 ♖xc3+ 19. ♖f2+=]

12. ♖d2 g6 13. 0-0-0 d6

14. ♗h6! The black pieces are not perfectly placed, which is why Alekhine is going to create pressure against the black king. [14.h4 14...h5∞]

14...a6 [14... ♖e5!? with the idea Nf7, bringing the knight closer to the weak king.]

15. ♖c3 ♗xh6 16. ♖xh6 ♖a7 with the idea that after 17.Qg7 the king escapes thanks to 0-0-0! [16... ♖f7 with the idea Qf8, but White has the thematic 17.c5! We don't need to calculate this kind of sacrifice, it is just obligatory to keep the pressure and initiative! 17...bxc5 18. ♗c4+ e6 19.f4 with the idea f5.

19... ♖a5

20. ♗xe6+! ♖xe6 21. ♖g7 ♖f8 22.f5+ ♖e5 23. ♖c7+-]

17. ♖d5 ♖f7 [17...0-0-0 18. ♖e3+-]

18.c5! White activates the bishop and the black king is in trouble.

18...bxc5 Black missed a great chance for counterplay after [18...b5! 19.cxd6 ♖d4 threatening Qc5. 20. ♖e3 e5↔Black has practical play and the pawn on d6 doesn't have a big meaning.]

19. ♖xe7! Another great blow! [19. ♖c7 19... ♖e5 20. ♖xa8 ♗xa8↔]

19... ♖xe7 [19... ♖xe7 20. ♖g7+-]

20. ♖xd6?! It is clear that Alekhine didn't see Black's next move. More accurate was [20. ♕c4+ 20... d5 (20... ♖e8 21. ♖xd6+-) 21. exd5 ♘f5 22. d6+ ♖e8 23. ♖f4+- with g4 or Re1 next and White's attack is too strong.]

20... ♕d5! An amazing defensive idea! Black prevents the check on c4 and the bishop is untouchable because of Nf5!

21. ♖xa6? It is typical that after a missed move the next reaction is not the correct one. White could still keep the initiative after [21. ♖xd5 21... ♘xd5 22. ♕c4 ♖e8 23. ♕xd5 ♖c8 24. ♖d1]

21... ♖b7!

22. ♖xa8 ♖xa8? Black had a big chance to get final counterplay after [22... ♖xa8 Why not activate the next

pieces? After a few moves the white king will be very weak compared to the black one! 23. ♖xh7+ The pawn on h7 has no meaning. 23... ♖f8! 24. exd5 ♖xa2 25. ♖h6+ ♖g8 26. ♖d2 White managed to defend the b2 pawn but it is not enough. 26... ♖a1+ 27. ♖c2 ♖g7! An easy but nice move. Black prepares the knight activation after Nb4 and he is winning thanks to his strong attack.]

23. exd5 ♖xa2 24. ♖f4 White's idea is to consolidate the position, but more accurate was [24. ♕d3 just developing the pieces and keeping the possibility of playing Bb1 after the check on a1. 24... ♖b8 25. ♖xh7+ ♖f8 26. ♖h6+ ♖g8 27. ♖d2 ♘xd5! X Kb1]

24... c4!? Black could also try [24... ♖a1+ just pinning the white pieces on the first rank. 25. ♖c2 ♖d8! 26. d6 ♘d5 27. ♕c4 ♖xh1 28. ♕xd5+ ♖g7 29. ♖e3 ♖xg2+ 30. ♖c3 ♖b8+ and Black is on time.]

25. d6 ♖a1+ 26. ♖c2 ♖a4+ 27. ♖b1 [27. ♖c1 27... ♖a1+=]

27... ♖d1+? A big mistake! Black could develop an initiative after [27... ♘d5!! 28. ♖xc4 (28. ♕xc4 28... ♖g7! with many ideas like Nc3, Nb4 or Ra8.) 28... ♖d1+ 29. ♖c1

29...c3+!! 30.bxc3 Bb8+-+]

28. Qc1 Qxd6 29. Bxc4+ Kg7 30. Rd1± Now White remains a pawn up and most important is the fact that the white pieces are consolidated.

30... Qc6 31. Re1 Nc8 32. Qc3 Re8 33. Rxe8 Qxe8

34. Qd4! An easy but technical move. On a central square the queen controls a lot of squares. This sounds easy, but this kind of move shows technical skills!

34... Qe7 35. Bd3 Qc7

36.g4! Another strong move! Because the advantage of the b-pawn is not enough, White is going to create some weaknesses.

36... Qf7 [36... Qxh2? 37. Qd7+-+]

37. h4 Bb6 38. h5 gxh5 39. gxh5 Qc6 40. Be4 Qb5 41. h6 Qb3 42. Bc2 Qb5 43. Qd3! +- is the most practical move.

43... Qxd3 44. Bxd3 Nc8 45. Bxh7 Nd7 46. Qc1 [46. Bd3 46...f5 47. b4 Qg6 48. b5 Qxh6 49. b6 Qg5 50. Bb5+-]

46...f5 47. b4 Nd5 48. b5 [48. Bxf5?! 48... Nxb4 with some hope to sacrifice the knight for the f-pawn.]

48... Qe6 49. Qd1 Qd6 50. f4 Nxf4 51. Bxf5 Nd5 52. Be4 1-0

Editorial Preface

The 2nd FIDE Grand Prix in Tashkent came to an end with a big surprise. Andreikin managed to get clear first place with 7/11. Andreikin is a player who is very hard to judge, sometimes making quick draws with White and often playing sidelines, but on the other hand he is very good at collecting points when it is needed and he doesn't let the opponent escape when he is better.

The 2nd place was shared by Nakamura and Mamedyarov. Nakamura escaped a lot of dangerous positions so I think he can be very happy with the final result, while Mamedyarov is probably less happy, as he was playing much more aggressive and attractive chess and maybe half a point more in the crosstable would have been a deserved result.

Jobava's final result of 6/11 is also worth mentioning, as he was playing crazy openings, crazy games and doing crazy interviews! This guy is a real entertainer!

It is very difficult to say what went wrong with Gelfand, but something went wrong very seriously. 3.5/11 is probably one of his worst results during the last few years.

Now let's come to the main current event, the "Petrosian Memorial", which is an 8-players round robin with 7 superstars and Inarkiev, who qualified for the tournament by winning a very strong open a couple of months ago.

Grischuk had the best start with 2/2 and played great chess. A big change in his style is easily visible, as he is not in deep time trouble so much anymore and crossed 2800 for the first time in the live ratings! It is going to be very exciting to follow whether he can keep us this great shape.

And of course from tomorrow on all eyes are on Sochi, where Carlsen is defending his title against Anand. Does Vishy have

a chance?! From our point of view- no. Why should he? The last match ended with a result of 3 losses and 0 wins and while Anand got older, Carlsen is just getting stronger and stronger, so why should the Indian player have a chance this time?! We feel that Anand's only chance might be to catch Carlsen in the opening, but the Norwegian's team is not sleeping either, so it is going to be a hard mission.

The games are starting tomorrow, so of course in the next issue we will be paying most of our attention to the WCC match!

We wish you a great weekend and a lot of fun with this week's issue!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Grischuk, Alexander(2795) - Inarkiev, Ernesto(2688) [A13]

Petrosian Memorial 2014(1),
2014.11.04

GM Csaba Balogh
Best rating: 2672

Grischuk convincingly outplays his opponent positionally. It is very instructive to see the way he uses the bishop pair.

1. ♘f3 Grischuk wants to avoid the theoretical discussions against his lower rated opponent.

1... ♞f6 2. c4 e6 3. g3 d5 4. ♙g2 dxc4 5. O-O!? A rare move. White usually wins back the pawn right away with 5. Qa4.

5... ♙e7 This is already an inaccuracy, which allows White to recapture the c4 pawn at better circumstances. Black should have tried to hold the extra pawn - at least for a while - with 5... a6 or 5... Nbd7, with the idea b5 and Nb6.

6. ♞a3! After Black wasted a tempo on playing Be7, he will hardly decide to take on a3, giving up the two bishops. The doubled a-pawns are not necessarily bad in such situations,

as Black might miss his dark squared bishop after a4 and Ba3, or just Bb2 and White also has a lot of potential on the opened b-file.

6...c5 Consequently played after the previous move. Black occupies the center.

7. dxc4 c6 8. b3 O-O 9. Bb2 White has finished the development and he is ready to open the center with d4. It is very strange, because seemingly Black has done everything correctly, but he found himself in some trouble. He should have his bishop on b7 to equalize, but b6 drops an exchange after Nfe5! Otherwise, he is just not well prepared for the d4 push and he ends up in a cramped position.

9... Bb7 10. d4! Rf8 Inarkiev tries to put all his pieces to a healthy square, in general this is a good idea, but this time it does not help. Grischuk continues the game with very concrete and powerful moves.

11. dxc5! 11.Rc1 was also good, but Grischuk feels that the moment has already come to gain some direct benefits.

11... Bxc5 12. Nd6! Installing a terribly strong knight to d6. Giving up the dark squared bishop would be a positional disaster for Black. Inarkiev tries to temporarily ignore the knight and later kick it out with Qe7 and Rd8.

12... Rc7 13. Rc1! Bringing a piece to the game with tempo is always welcomed.

13... b6 The only move. [The natural 13... Bb6 already drops an exchange after 14. Nb5 Rc8 15. Ba3 Ne7 16. Bxc8+-]

14. Ng5! White must play concretely, otherwise he gets pushed back by Qe7. There are many positional and tactical threats in the air. The main one is to attack the h7 pawn with the queen, when Bxf6 is a decisive threat. Grischuk had to foresee this move before playing 11. dxc5, otherwise he would have chosen the calm 11.Rc1.

14... Qe7 [14... Nd5 attacking both knights, but it does not solve the problems since after 15. Nge4± Black is forced to give up his dark squared bishop.]

15. Nge4! Simple and strong. The queen has occupied the retreating square of the bishop to e7, therefore Black loses his important dark squared bishop.

15... Nxe4 16. Nxe4 Rd8 [There is a beautiful line if Black tries to save his bishop, as 16... Bb4 is strongly met by 17. Be5! Rcc8 18. Bd6! Bxd6 19. Nxd6 19.Qxd6 guarantees a big advantage and with superior pieces too. Both players were probably counting that recapture, but the machine recommends this even stronger one with a neat tactical point: 19... Rc7 20. Qd2! with the idea to play Rfd1 and on 20... Rd8

21. ♖xf7!! wins material! 21... ♔xf7 (21... ♕xf7 22. ♔f4+ checks the rook.) 22. ♖xc6+- Quite a unique motif!

17. ♖xc5 bxc5 It is hard to dream about more than this. White has gained the two bishops and there is a clear target on c5! But of course, converting the advantage requires good technique.

18. ♔e1! I was always a big fan of this kind of move! White improves his queen by driving it to c3.

18... ♖cc8 19. ♔c3 ♖d4 20. ♖fe1 The knight is going to be pushed back with e3, but first the check on e2 had to be covered.

20... f6 Black was forced to weaken his pawn structure even more to avoid getting mated on g7.

21. e3 ♖b5 22. ♔a5! We can see the strength of the Qe1

maneuver now. The queen has finally reached its ideal square on a5 after making a stop on c3 to force a weakening. Now it keeps an eye on both isolated pawns on the queenside.

22... ♕e8 23. ♖ed1!? Grischuk is not in a hurry. He believes that Black's position is going to fall apart by itself as he has no useful move. [White could have won material by playing 23. a4! 23... ♖d6 24. ♕a3!+- (But not 24. ♖xc5? 24... ♖b7)]

23... ♔c7 It is difficult to suggest something for Black. Inarkiev decides to trade the well-placed queen on a5, but it does not solve the problems...

24. ♖xc7 ♖xd1+ 25. ♖xd1 ♖xc7 26. ♖c1 White is ready to strengthen the pressure on c5 with Ba3, while the other strong bishop prevents the defensive possibility of Na6 because of Bb7.

26... ♖d8 Searching for counterplay along the d-file. [26... ♖d5 is met by 27. ♕a3!; 26... ♖b5 is refuted by 27. a4! ♖d6 28. ♕a3 grabbing the weakness next move.]

27. ♕c3 Grischuk sticks to his policy to avoid any counterplay and to squeeze his opponent slowly. [There was actually nothing wrong with 27. ♖xc5 and the point is that Black cannot simplify to an opposite colored bishop endgame with 27... ♖d1+ 28. ♕f1 ♖b5 because of 29. ♖c1! with a technical win.]

27... ♖d5 Black continues looking for active counterplay. [Perhaps it was more tenacious to defend passively with 27... ♖a6 28. ♕a5 ♖b8 otherwise White plays Bf1. Now Black could reply with Bb5, therefore White simply strengthens his position with 29. e4 followed by f3 and Kf2. White could transfer his bishop to d2-e3 and the other bishop will attack the knight with Bf1 at some point. Black cannot hold.]

28. ♕a5 ♖b6 [28... ♖c8 29. ♕f1 is similar to the game.]

29. ♖f1 [29. ♖h3 would have won the pawn on the spot. White can take on c5 next as he does not need to pin himself after the check on d1, but he can play Kg2.]

29... ♗g6

30.f3! White opens the back rank, intends to bring his king towards the center and wants to limit the movement of the black pieces with e4, closing the bishop and taking away the d5 square from the knight!

30... ♖c8 31. ♖a6 ♖c6 [31... ♖c7 is met by 32.e4±]

32. ♗b5 ♖c8

33.b4 Grischuk finally decides to gain material!

33...c4 [33...cxb4 leads to a lost endgame after 34. ♖xc8+ ♗xc8 35. ♖d7 ♗b6 36. ♖xe6+ ♖f7 37. ♖xf7+ ♗xf7

38. ♖xb4+— This should be an easy technical win for White. Not only does he have an extra pawn, but there are also pawns on both sides, when the bishop is considered to be stronger than the knight, as it can be more easily switched to the other side.]

34. ♖xb6 axb6 35. ♖xc4 White has converted his two bishops advantage into an extra pawn.

35... ♖d8 [35... ♖a8 is met by 36. ♖d7! (It is better to not give the chance to enter to a rook endgame after 36.a4 36... ♖d3 37. ♖c6 ♖xb5 38.axb5 ♖f7 39. ♖xb6 ♖a4 when Black might hope for survival.)]

36. ♖d4 White is ready to transfer to a bishop endgame, which would be easily won with the passed a-pawn.

36... ♖c8 37.a4 ♖c3 [The rook endgame is hopeless after 37... ♖e8 because White wins another pawn: 38. ♖xe8 ♖xe8 39. ♖d6!+—]

38. ♖d6 [38.a5 was also winning 38...bxa5 39.bxa5 ♖xe3 40.a6 ♖a3 41. ♖a4 and the pawn promotes.]

38... ♖xe3 All moves are winning now. Grischuk does not give any chances...

39. ♖f2 ♖b3 40. ♖xb6 ♖b2+ [40... ♖xb4 drops the rook after 41. ♖b8+ ♖f7 42. ♖e8+—]

41. ♖e3 The time trouble is over and so is the game. There is no way to stop the queenside passers.

41... ♖b3+ 42. ♖d4 e5+ [42... ♖xb4+ is met by 43. ♖c5 ♖b1 44.a5+— and the a-pawn automatically promotes with the support of the 3 white pieces.]

43. ♖c5 ♖xf3 44. ♖c4+ ♖f8 45. ♖d6 ♖e8 46. ♖b8 Black resigned as Bb5 is coming next! A nice positional crush in Karpov style. **1-0**

**(2) Kramnik, Vladimir(2760)
- Inarkiev, Ernesto(2688) [D37]**Petrosian Memorial 2014(2),
2014.11.05GM Csaba Balogh
Best rating: 2672

A tough start for Inarkiev. After getting positionally outplayed by Grischuk in the first round, he is facing Kramnik with the black pieces again. This time he falls to a tactical masterpiece.

1.d4 ♘f6 2.c4 e6 3.♘f3 d5 4.♘c3 ♙e7 The Queen's Gambit declined is considered to be rock solid, but Kramnik manages to drive the game to wild waters.

5.♙c2 A rare move. The two main lines are 5. Bg5 and 5.Bf4. [5.♙g5 5...h6 6.♙xf6 (6.♙h4 is the main move here.) 6...♙xf6 7.♙c2 dxc4! 8.e3 c5! is Black's correct reaction, which is why Kramnik starts with 5.Qc2.]

5...O-O As far as I know, 5...c5 is an interesting option for Black with the idea to have 6.dxc5 d4 and White is not in time to pin with Rd1.

6.♙g5 c5 [Now on 6...h6 7.♙xf6 ♙xf6 White plays 8.O-O-O followed by e4 next move. The Mamedyarov-Bacrot game finished with a nice crush by White and it was commented by Arkadij in a previous CEWN.]

7.dxc5 dxc4 8.e4! We are still following the theory, but it is already given as better for White. It is also confirmed by the time consumption of the players, as Kramnik has blitzed out his moves, while Inarkiev was already in deep thought.

8...♘fd7 [The most common move is 8...♙a5 9.e5 ♘d5 10.♙xc4 ♘xc3

11.O-O! This was played by Kasparov against Karpov in their WC match in 1987 and Kasparov gained an edge. Black cannot save his extra piece with 11...♘d5 because of 12.♙xd5 ♙xg5 13.♘xg5 and mate is threatening on h7!]

9.♙f4! A logical retreat. Kramnik does not ease his opponent's position by trading pieces. The bishop on f4 is going to be well placed, controlling the important squares on the h2-b8 diagonal. A standard reaction in many opening is to send it away by Nh5, but it does not work anymore.

9...b5 The novelty of the game, but not a prepared one, as Black ends up in a difficult position... [9...♘xc5 10.♙xc4 followed by normal development with O-O, Rfd1 and Rac1 is also better for White.]

10.cxb6 ♘xb6 The material is balanced, but the c4 pawn is isolated and weak. The white pieces are also better placed and developed, so everything confirms White's advantage. It is interesting to mention that in the other game commented by me this week, Inarkiev ended up with the same unfortunate pawn structure against Grischuk.

11.♙d1 ♙e8 12.♙e2 Kramnik finishes the development.

12...♖a6

13.♘e5! A very strong intermediate attack on c4 to confuse Black's ideal piece arrangement. [In case of some normal move like 13.O-O Black could have replied with 13...♖c5 14.♘e5 ♘a6 followed by Rc8 and he gets a much better version than the game with the knight on c5, which is ready to occupy the d3 square after sending away the knight from e5.]

13...♖b4 Black had no time to get the ideal Nc5-Ba6 arrangement.

14.♔c1 ♘a6 15.a3 ♘c6

16.b4! A great positional move, using the pin on the e2-a6 diagonal. It limits the movement of the black pieces and prevents Na5-b3. White is threatening sometimes with b5 or

if Black leaves the b4 square a4-a5 could be very strong. It also gets rid of the backward b2 pawn. The only drawback is that it makes a passed pawn from the c4, but it is excellently blockaded by the knight, so it cannot be counted as a real minus.

16...♙f6

17.♘f3! Just like 9.Bf4 in the opening, this is another excellent positional retreat to keep the pieces on the board. White intends to push back with e5 and b5 is already threatening to win a piece. [17.♘g4 is worse in view of 17...♙d4! and e5 next! It is important to control the d4 square. 18.b5 now is met by Bxc3 check and the b5 pawn falls.; 17.♘xc6 17...♔xc6 18.e5? and Bf3 next does not win an exchange, but loses to 18...♔xg2]

17...♙xc3+ Black pins his counterplay to the light squares on the queenside. He intends to play Bb5, Na4, a6 and c3 at some point.

18.♔xc3 ♔c8 The dark squared bishop is missing, therefore White was threatening with Bd6. Inarkiev frees the rook from f8 before starting his Bb5 plan...

19.O-O ♙b5 20.♙d6 ♔d8 21.e5 Of course, it is nice to install such a bishop to d6! It paralyzes Black and cuts him from the connection to the kingside. All black pieces are driven to

queenside and a potential attack against the g8 king could be decisive. Of course at the moment White is also far from the decisive breakthrough, but he can be there in just a few moves.

21...h6 Black was afraid of Ng5, which is quite understandable.

22.♘d4 Kramnik opens the way to queenside. He is ready to drop the queen there and after Nxd4 Rxd4 the rook is only one move away from g4 and another potential attacking idea could be f4-f5, launching another kind of very dangerous attack.

22...a6 23.♙f3 Forcing Black to invite the rook the 4th rank.

23...♞xd4 24.♖xd4 ♙c6

25.♙e2 It is very clever to keep the two bishops on the board.

The light squared bishop could be very useful and have many different functions. However, it is already debatable where that bishop should go. 25.Bh5 was an alternative, where the bishop might take part in the attack by keeping an eye on the f7 pawn. 25.Bd1 also had its point. It goes to c2 and something like Bb1 and Qc2 could create decisive threats. Ba4 drops the c4 pawn. Kramnik decides to retreat to e2, pinning the black pieces to the c4 pawn.

25...♙b5 26.♖g4 ♞h8 There was no other defense for Black against Qg3, as a move with the g-pawn would be a decisive weakening.

27.♞g3 [27.♖c1 would have been more circumspect, with the idea to drop the rook into the attack along the 3rd rank.]

27...♖g8 [Black could actually have gotten decent counterplay by playing 27...c3! 28.♖xg7 ♖g8! Forcing a couple of exchanges. (28...♙xe2 is also tempting, but it runs into 29.♖xf7 ♖g8 30.♞f4 ♖g6 31.♖f8+ ♞xf8 32.♙xf8 ♙xf1 33.♞xf1 and White is able to stop the c-pawn. 33...c2 34.♙xh6 ♖c8 35.♞h4! ♞g8 36.♙c1 is a strange computer line, but White seems to be winning after all.) 29.♖xg8+ ♞xg8 30.♞f3 ♞d5 followed by Qg6. White should be better with the extra pawn, but the safely protected pawn on c3 gives Black decent counterplay.]

28.♖h4! Changing the target. After the black rook has

blocked the king's path, Rxh6 gxh6 Qxh6 could be mate. Therefore White is threatening with Qe3, doubleattacking on b6 and h6!

28...♞d8 Keeping an eye on h4 prevents Qe3. [28...c3 loses to 29.♟xb5 axb5 30.♞e3! +- ♞d5 31.♞xh6+ gxh6 32.♞xh6#; 28...♞d5 29.♞g5 is also very strong.]

29.♞f4! ♞e8 Black seemingly prevents the Rxh6 threat by freeing the g8 square for the king... [29...g5 is strongly met by 30.♞c1! (But not 30.♞xh6+? because after 30...♟g7 White is forced to trade queens to save the rook, but of course it is not his idea... 31.♞f6+ ♞xf6 32.♞xf6 ♞d5 33.♞f3 c3 with compensation for the pawn.)]

30.♞xh6+!! A brilliant tactical blow!

30...gxh6 31.♞xh6+ ♟g8 32.f4?! is very tempting, but the wrong follow-up after the rook sacrifice. White intends to lift the rook to the 3rd rank, but the same idea could have been executed in a more effective version. [32.♞d1! with the idea of Rd4 was winning. 32...c3 White has different wins, but a pretty one is 33.♞d3! ♟xd3 34.♟xd3 f5 35.exf6 ♞a7 36.♞g6+ ♟h8 37.f7+- and Be5 mates next move.]

32...♟c6 33.♟f3?! The most natural human move, trying to get the rook to the 3rd rank, but Black has a hidden defense... [33.f5! was the winning continuation, although the winning

line is almost impossible to find for a human. 33...exf5 34.♞xf5 ♞e6 35.♞g5+ ♞g6 36.♞xg6+ fxg6 37.♞xg6+ ♟h8 38.♞h6+ ♟g8

This is all forced and it seems like a draw. However White can play for more with 39.♟g4! ♟d5 40.e6! White creates the decisive threat of Be5 or Qg6 check first and then Be5, therefore Black is forced to take more material... 40...♞xd6 41.♞g6+ ♟h8 42.♞f6+ ♟g8 43.♞f7+ ♟h8 44.♟f5! and White wins! 44...♞a7 45.♞xa7 ♟b7 46.♞xb7 and there is no perpetual check with a single black queen. 46...♞d4+ 47.♟f1 ♞f4+ 48.♞f3+-]

33...♞c8? Missing the chance. [33...♞c8!! suggested by the computer seems to save Black from the biggest problems. 34.♟xc6 ♞xd6! (34...♞b6+ loses to 35.♟c5 ♞xc6 36.f5! The simple threat is f6 and Qg7! 36...♞e4 with the idea of f6 Qh7, but White wins after 37.♞g5+ ♟h8 38.♞h5+ ♟g8 39.fxe6+- and there are problems on f7!) 35.exd6 ♞b6+ 36.♞f2 ♞xc6 37.♞f3 ♞xf3 38.gxf3 ♞ad8 White ends up with two extra pawns, but this is a typical situation when the rooks are going to be superior to the queen. In my opinion, the draw is the most likely result now.]

34.f5! Kramnik does not give Inarkiev any more chance. He brings the f1 rook to the game with decisive effect.

34...exf5 35.♔g5+! An important intermediate check to start with! [The direct 35.♙xc6 allows 35...♖e6!]

35...♔h8 36.♙xc6 ♖e6 [36...♙xc6 White can choose between several win here. One of them is 37.♖xf5 ♖e6 38.♔h5+ ♔g8 39.♙xf7++-]

37.♖xf5 Threatening with Qh5 and taking on f7 with check.

37...♖a7 38.♔h4+ ♔g7 39.♖h5 ♙g8 40.♙e4 There is no defense against the mate! **1-0**

When two players like Mamedyarov and Jobava are meeting over the board, we can expect a real firework on the board and this is what we get! Mamedyarov would share the first place with a win and Jobava would get to share 2nd place with a win as well, so this was a high stakes game!

1.d4 Jobava used to play any opening possible, for example a lot of his games start with 1.b3.

1...♘f6 2.c4 and 2.Nc3 is one of Jobavas favorites as well, but it seems like he is taking this game very seriously and is going for the main lines.

2...c5 An interesting opening choice by Mamedyarov, who more often plays 2...e6 with a solid position or the Gruenfeld or Slav, but this time it seems like Shakhriyar can't wait to get a fighting position and chooses the Benoni.

3.d5 e6 4.♘c3 exd5 5.cxd5 d6 6.e4 g6 We are in the very main line of the Benoni.

7.♘f3 ♙g7 Jobava goes for one of the most concrete lines and things are getting pretty forced. Generally the 8.h3 move is of course made to avoid Bg4, as in Benoni structures it is usually very good for Black to exchange the c8 bishop for almost any white piece.

8.h3 O-O 9.♙d3 Protecting the e4 pawn for the future.

9...b5 is one of the main lines. In case Black does not act dynamically, White wants to play 0-0 and on a6 he always has a4, so it is not that simple to find a clear future play for Black. 9...b5 is therefor counted as the most critical reply.

10. ♖xb5 ♜xe4 Mamedyarov seems to have been working a lot on the Benoni to be ready to play such a crazy line. [Another line is 10...♞e8 11.O-O a6 12.♜a3 ♜xe4 13.♞e1 ♜f6 14.♞xe8+ ♜xe8 15.♙g5 ♜f6 16.♜c4 and White is a bit better.]

11. ♙xe4 ♞e8 From now on, things are very forced.

12. ♜g5 White needs to protect the e4 bishop.

12...♞a5+ is the only way to go on. [12...h6? would be a big mistake because after 13.♜e6 fxe6 14.O-O White is just winning.]

13. ♜c3 It seems like White is doing well, but here comes Black's main idea:

13...♙a6! Of course this is all a preparation, but anyhow it is an excellent idea! Black is a full piece down and not trying to recapture it quickly but instead playing for the initiative! You don't often see such play!

14. ♙d2 What can be more logical than protect from Bxc3 and at the same time develop a piece and get ready to get the white king away from e1 by castling queenside.

14...♜d7 Mamedyarov still doesn't care about winning the piece back and is getting fully developed first.

15. ♞c2 White is ready to castle queenside.

15...♞ab8! What a fantastic move! I don't know if Mamedyarov made it at the board or knew it, but we just see a super rare case where one side is a full piece up, the other side has no direct threats and the position is still very unclear! Black is actually waiting for White to castle queenside and by playing 15...Rab8 is focusing the pieces in the future direction of the white king. The bishop on g7 and rook on b8 put very dangerous pressure on b2.

16.O-O-O The white king is in safety, or at least it seems so...

16...♜e5 Black continues what he started, the knight is going to c4 to create even more pressure on b2, which is actually very dangerous for White. After Jobava played the most logical moves, it is now time to think about how to defend against Black's threats and we should not forget that White is a full piece up!

17.♞he1! A very strong move, based on a precise calculation.

17...♞ec8 Black is not falling into the trap. [The first question is of course why not to play 17...♜c4? and the answer is that 18.♙d3!! is an amazingly strong reply. It seems like bad

luck, but nothing is working for Black, for example: 18...♖xe1 19.♗xe1 ♖xb2 White's position is looking dangerous, but in fact it is just winning! 20.♗e8+ ♕f8 21.♙a4!! leaving White with a winning position.]

18.♘a4 Once again Jobava is making the most logical move, attacking the queen on a5 and defending the b2 pawn. Black's position seems to be getting critical, but Mamedyarov has another amazing move in mind!

18...♖b4!! Wow! Black is not only defending the queen, but at the same time attacking the a4 knight. A position can't be much more crazy than what we see now!

19.f4 is one of the best moves in the position, but White had another interesting option: [The silent 19.b3!? looks interesting as well. White's idea is to play Kb1 next and simply take on b4. 19...♙b5 is probably the main move here, with the idea of playing g4 next. (Maybe a bit too early would be 19...c4 20.♕xb4 ♙xb4 21.♙b1 and of course the position remains very tactical, but maybe Black doesn't have enough compensation for the rook.) 20.f4 White has many other moves as well 20...c4! with a total mess and it is impossible to say who is better here without an in-depth analysis.]

19...♘c4

20.♕f5! A very good move. White is chasing the rook from c8 to take on b4 next. [20.♕xb4 would be premature since after 20...cxb4 Black just has too many threats on the c-file.]

20...♖cb8 Black can't do anything else. [20...gxf5?? 21.♙xf5 and White is easily winning.]

21.♕xb4 ♙xb4 So White is a full rook up, but the position still remains unclear. The pawn on b2 is hanging and the bishop on f5 as well.

22.a3?! This is the first moment where White goes wrong, as Jobava missed a very strange but very strong reply by Black. [22.♙b3! was probably the best move as now Black can't avoid the exchange of the queens any longer. 22...gxf5 23.♗e7 (Black seems to be OK after 23.♙xb4 23...cxb4 24.b3 ♕b5)]

22...♘a3! Of course there is no way back in such a position!

23.bxa3 ♖xa3+ 24.♔d2 White's position seems to be solid and although the white king is open on d2, it is hard to see anything direct, but here comes the move that Jobava had clearly underestimated by playing 22.a3:

24...♜g3!! What a move! Black is a rook and a piece down and now he makes an unforeseen move after which he is probably better! The main threat is to play Qxf4 next.

25.♖b1! The only defense! White is trying to escape by starting giving some material back. [After 25.♘d3 25...♜xf4+ 26.♞e3 ♘d4 Black is just close to winning.; 25.♔c1 was just losing on the spot as after 25...♜xf4+ 26.♞d2 gxf5 27.♘f3 ♜b4 Black is mating the white king.]

25...♜xf4+ Black starts to collect some material back.

26.♔d1 ♜xb1+ winning the a4 knight.

27.♜xb1 Black is giving two checks first.

27...♜d4+ 28.♔c1 ♜f4+ 29.♔d1 gxf5 Mamedyarov is fighting for the 1st place in the Grand Prix! [At first sight 29...♜xa4+ looks very strong, but now we are entering a long forced line: 30.♜c2 ♜d4+ 31.♜d2 ♜a1+ 32.♜c1 Black has nothing better than to enter the endgame by playing 32...♜xc1+ 33.♔xc1 and after the nice move 33...♘h6!]

the position remains very forced. 34.♞e8+ ♔g7 35.h4 gxf5 Black has 3 pawns for the exchange, but White has good chances to escape after 36.♞e7 followed by Rd7 and the outcome of the game would probably be a draw anyway.]

30.♞e8+ Jobava is getting rid of the monster bishop on g7.

30...♘f8 Both knights are hanging.

31.♘xc5! is the only move with which White can escape into a draw!

31...♜d4+ [31...dxc5 32.♜b8! This was the idea behind Nxc5! 32...♜d4+ 33.♔e1 ♜g1+ 34.♔d2 ♜d4+ with a perpetual check.]

32.♔c1! The only move which holds a draw!

32...♜xc5+ 33.♜c2 The white queen joins the defense.

33...♜g1+ 34.♜d1 ♜c5+ 35.♜c2 ♜g1+

36. ♔d1 Black has nothing better than making a draw...

36... ♜xg2 The last try, but it doesn't change anything any longer of course.

37. ♜h5 is the safest move.

37... ♜g1+ and Black forces a draw by perpetual check. What an amazing game and what kind of fantastic calculation by both players who played an almost perfect game in a very complicated position, with a lot of possible continuations!
1/2-1/2

**(4) Karjakin, Sergey(2767)
- Kasimdzhanov, Rustam(2706)
[A22]**

Tashkent FIDE GP 2014(11.5),
2014.11.02

GM Arkadij Naiditsch
Best rating: 2737

An interesting pairing as Kasimdzhanov was Anand's for many years, then worked for the website chess24 and lately became the second of....Karjakin! To play somebody who basically knows all you know -at least in the openings- is not an easy task. A slightly strange fact about Karjakin is that the young Russian keeps on announcing that he wants to become World Champion, but a World Champion doesn't make 17 draws in a row. Karjakin's style is ultra solid, with very strong preparation, but he is clearly lacking ambition, which is pretty strange, as usually Karjakin is winning when his opponents want to beat him too much, with a good example being the game Giri-Karjakin. Anyhow, in the current game White is going totally to destroy Black's position, first positionally and later on with a little combination. A very nice game is awaiting us!

1.c4 Karjakin also plays 1.e4.

1... ♘f6 2. ♘c3 e5 I think 2...e5 is clearly the most critical move with the move order 1.c4 2.Nc3.

3.g3 d5 is the main move. Another popular setup for Black is 3...Bb4 or 3...Nc6 and Bc5.

4.cxd5 ♘xd5 5. ♘g2 ♘b6 6.d3 ♘e7 7. ♘e3 White picks a tricky move order. Not developing the knight from g1 too early has the idea not to allow Black to play Nc6 because of Bxc6.

7...O-O 8.♖c1 White makes another useful move, asking Black what he wants to play next.

8...♜e8 Black also makes an useful waiting move, hoping for White to play Nf3 next and to get Nc6 in. [8...♞c6 9.♟xc6 bxc6 10.♞f3]

9.a3 ♟f8 Now finally White runs out of "waiting-improvement" moves so he plays

10.♞f3 ♞d7?! What a strange decision by Black. Why not 10...Nc6 with a very usual position. I think the knight's position on d7 is just wrong.

11.O-O c6 is an usual way of blocking the g2 bishop, but now White's idea of playing b4-b5 can become a dangerous positional threat.

12.♞b3!? An interesting move. White is trying to lure the black knight to c5. [A more simple move could be 12.b4 12...a5! It is very important for Black to activate the rook from a8. 13.♞b3 axb4 14.axb4 ♞f6 15.b5 and I think White's position should be a bit better, but of course it would be much better to do all this without the opening of the a-file.]

12...♞c5 is the most logical move even though the knight will have to leave the c5 square soon because of b4. It is very hard to find a better move for Black. [After 12...♞f6 White has

the very strong 13.♞g5! and Black can't defend the f7 pawn in a "nice" way and of course a move like 13...♟e6? is just a positional mistake. 14.♞xe6 and White is much better.; 12...h6 with the idea of playing Nf6 next. 13.♞fd1 and White is already threatening to play d4 next. Black is just too slow.]

13.♞c2 This is a nice square for the queen.

13...♟g4 14.b4 ♞cd7 Now White has a lot of different plans. The usual play connected with b5, or maybe choose a plan connected with d4, or maybe transpose the knight to c5 could be very nice as well. Black's position is very passive so White has a lot of time.

15.h3! I think that this is a very strong positional move by Karjakin! Before taking some action, Karjakin is asking Black where he wants to keep his bishop?!

15...♟f5 The black bishop should be placed on e6, but now it is not possible because of Ng5, so Kasimdzhanov is taking a temporary place on f5, which is of course not a great position.

16.♞d2 A logical move, but it gives Black chances to get back into the game. [I think that 16.g4 looks much more logical since after 16...♟g6 now that the black bishop can't go to e6, White has 17.♞b3 followed by action on the queenside and I think his position should be much better here.]

16...h6?! Black is not fighting back! [In any case Black should have tried to get some play with 16...a5! and things are not that clear anymore!]

17.♖b1! Another very good positional move! Now moves like a5 are probably not working anymore and at the same time White is getting ready for play on the queenside.

17...♖c8 18.♖fc1 ♜f6 Black has not much to do, so Kasimdzhanov decides to at least put his knight on d5.

19.♘c5 At first sight it is difficult to say if it is good or bad to exchange the dark squared bishops, but in fact it is good for White as later on he will have the c5 square for his knight.

19...♜fd7 Black keeps on playing passively, but is it quite difficult to find something better. [Not much better is 19...♖d7 20.g4 ♘e6 21.♘xf8 ♖xf8 22.♜de4 and the knight is getting to c5, with a clear advantage for White.]

20.♜ce4 The black pieces have less and less space.

20...♖c7 21.a4 A good move! Karjakin does not go for any forced continuation and keeps on improving his position. This is a very good strategy in this kind of position where your opponent has no direct play.

21...a6 [It was maybe best to play 21...♜d5 but after 22.♖b2 it is still pretty hard to find a normal move.]

22.♘xf8 ♖xf8 23.♜c5 White have everything it was possible to dream about. The knight on c5 is untouchable because of bxc5, the b7 pawn is a clear target and Black has no counterplay at all on the kingside.

23...♜f6 24.♖b2 The queen is better placed on b2 than on c2 and finally White wants to play b5 next.

24...♖e7?! After this move Black's position is probably already just lost. [24...♜bd7 and Black keeps on fighting in a bad position.]

25.a5 Exactly! White is using the fact that the black knight has nowhere else to go than to take a disastrous position on a8.

25...♜a8 There is nothing else left... [25...♜bd5 26.e4 would lose a piece.; 25...♜bd7 26.♜xb7 is losing a pawn.]

26.e4 White is starting a rush on Black's position. First he is fixing the black bishop on the diagonal h7-b1.

26...♘h7 27.♜c4 ♖fe8 28.f4 Another good move. White is totally dominating in the center and it is still unclear for Black what to do next and how to get the knight from a8 back into the game without losing some material.

28...exf4 29.gxf4 ♖b8 Black is trying to get the knight from a8 to c7 without losing the b7 pawn.

30.♖e5! A fantastic move by Karjakin. I guess many people

would try to directly win some material or start an attack, but in fact the threat of a positionally lost endgame is much stronger! White is practically not giving Black any chances at all.

30...♔f8 At least looking for some fight... [In case of 30...♘c7 31.♔xe7 ♖xe7 32.♘d6 White's domination is just amazing! During the next moves White doesn't even need to hurry with winning anything quickly, he can just keep on improving the position by playing Kf2-Ke3.]

31.♔d6 ♖e7 Black has nothing else left, this is the only way to avoid a horrible endgame.

32.f5 Killing the h7 bishop.

32...♘c7 Finally the knight is back in the game, but it is already too late...

33.♔f4 ♘fe8 What an ugly position for Black and Karjakin keeps on enjoying playing slow moves...

34.♔h2 White is preparing a final attack on the kingside.

34...♔h8 35.♙f3 Freeing the g-file.

35...♙g8 36.♘e5 What an amazing domination of the white pieces!

36...♘f6 37.♖g1 White is totally winning.

37...♘b5 is giving White a chance to finish the game with a little tactical blow.

38.♘e6! A very nice finish of a great positional game!

38...g5 A desperate move...

39.♘xf8 [39.fxg6 was winning on the spot as well.]

39...gxf4 40.♘fg6+ White is going to be an exchange up.

40...fxg6 41.♘xg6+ We just saw a fantastic positional win by Karjakin, who played very cleverly without and practically squeezed his opponent into despair... **1-0**

Endgame section

(15) Gelfand, Boris(2748)
- Andreikin, Dmitry(2722)

Tashkent FIDE GP 2014(10.4),
2014.11.01

GM Arkadij Naiditsch
Best rating: 2737

In the current position White is a bit better because of the more central position of the king and the passed d-pawn. Of course Black's chances to hold are very good, but sometimes it is not that simple to defend a worse endgame where a mistake could lead already to big trouble. Andreikin is going to show us a great defense which is a perfect example on how to defend this quite typical rook endgame.

36...♔f7 Of course. It is important to bring the king to the center as quickly as possible, in the best case to d6.

37.♖e2! A great move by Gelfand! White's idea is to go "around" the d4 pawn with the king and cut the black king on the 3rd rank.

37...♖g6! Excellent defense by Andreikin. The most important for Black is to get his king to the d-file. [Of course

not 37...♔e6?? 38.♔f3+ ♔f5 39.♖e5+ and White is winning the rook.]

38.♔d3 ♖e6 Now we can see why the previous move was so important for Black.

39.♖b2 White can of course not enter the pawn endgame...

39...♖g6 The most safe move. White can't do anything about Black playing Ke7 next.

40.♔c4 ♔e7 So the little time trouble is over and both players have some time to think again. White's only hope now is to get the black a-pawn and be very fast with the own a-pawn, but it costs a lot of time and it is actually pretty hard to win the a5 pawn. The position is very close to a draw, but Gelfand still tries everything to play for a win.

41.♔b5 Checking how Black is going to defend the a-pawn.

41...♖d6 A good and very safe move! Black is not only attacking the d4 pawn but he also maybe wants to start pushing his own kingside pawns.

42.♔c5 ♖g6 and the rook can go back to g6. Passive, but very solid play by Black.

43.a4 h5 and the black pawns start to advance too.

44.d5

44...h4 Fixing the g2 pawn and also preparing to get the own pawn to g4 and to play h3 later.

45.♔b5 A second attempt to get the a5 pawn.. .

45...♖d6 and we see a pretty similar defense by Black.

46.♖d2 Gefland is winning the a5 pawn, but of course it doesn't help to win the game anymore, as the black pawn are very fast now.

46...g5! There were also other ways to hold a draw, but this is clearly the most easiest one.

47.♔xa5 g4 Black is going to create a passed h-pawn.

48.♔b5 h3 49.gxh3 gxh3 50.a5 Both pawns are running.

50...♖h6 Black is fixing the white rook.

51.♖h2 ♔d6 and the black king is comfortably holding the a-pawn.

52.a6 ♔c7 53.♔c5 ♖xa6 54.♖xh3 ♖g6 We just saw a great defense by Andreikin with a lot of standard tools which are quite important to know for practical rook endgames. **1/2-1/2**

**(16) Giri, Anish(2768)
- Jakovenko, Dmitry(2747)**Tashkent GP,
2014.10.29GM Csaba Balogh
Best rating: 2672

Giri was supposed to be satisfied with the outcome of the opening, as he seems to get a superior endgame in any case. However, Jakovenko was still in his preparation and he sacrifices his queen to build up an unbreakable fortress.

19...Qxc5! [The endgame after 19...Qxd6 20.cxd6 Qd7 is going to be quite unpleasant and Black will face longterm suffering for Black because of the passed pawn on d6.

21.a4! White could not achieve anything directly on the c-file

with Rbc1 as Black simply opposes his rook on c8. Therefore the best is to gain further positional advantages with a4! White is ready to sacrifice his a-pawn in order to invade on b7 and even if Black parries this concrete idea the pawn will be excellently placed on a4, always ready to create a weakness with a5. 21...Qab8 (21...Qac8 is strongly met by 22.a5! bxa5 (22...Qc6 23.axb6 axb6 24.Qd4 White has successfully created a weakness on b6 and he intends to advance his pawn to e4-e5!) 23.Qb7±) 22.Qb4 Qfc8 23.e4! and Black is going to have a tough day...]

20.Qbc1 Qxd6! This is the point! Other moves were losing on the spot. [20...Qa5? 21.Qc4+-; 20...Qc3? 21.Qd3+-]

21.Qxc5 Qxc5 Black is slightly down materially with his rook, bishop and pawn for the queen, but he has weaknesses. The bishop gives full control for the queenside, while Black is able to defend himself with his rooks on the kingside. Trading a pair of rooks would always easen Black's defensive task. White should have some more material to be able to convert his advantage. For example if both sides had a knight, that would seriously increase White's winning chances.

22.Qd3 [Occupying the 7th rank does not give White real benefits as Black could answer with 22...Qd7 22...Qfd8 23.Qb7 (On 23.Qb7 23...Qxd7! 24.Qxa8+ Qf8=) 23...a5 24.Qf3 Qd1+

25.♔g2 ♖f8= White cannot create more pressure against the only weakness in Black's camp, the f7 pawn.]

22...a5! A good positional move! Black puts his queenside pawns on dark squares to be able to protect them with the bishop.

23.a4 Giri also reacts well positionally. The a4 pawn alone neutralizes the pawn majority on the queenside.

23...♖ae8!? Jakovenko decides to advance his defensive front a rank forward. A clever idea, but it was not obligatory. [23...♖a7 covering the 7th rank would have been another defensive setup.]

24.♔g2 e5 25.♚e4 ♖e6 26.♖d5 [26.♖d7 does not bring anything neither. Black could chase the rook from the 7th rank with 26...♖fe8 27.♚b7 ♖8e7 28.♖d8+ (28.♖xe7 28...♗xe7=) 28...♖e8=]

26...♖fe8

27.g4! The positionally correct move again! White takes ground on the kingside. The ideal formation of the pawns are e3-f2 (to neutralize the c5 bishop) and g5-h5 to sometimes threaten g6 or h6. Unfortunately for White, despite all his great efforts, he has no chance to win the game...

27...h6 Opening the back rank.

28.e3 g6! Giving more air to the king.

29.h4 ♔g7 30.♔f1 Black has put all his pawns and pieces to their ideal squares, so it is time for him to wait and see how White intends to make progress...

30...♔g8 31.♔e2 ♔g7 32.♔f1 The king could not help on the queenside, so Giri decides to go back.

32...♔g8 33.♔g1 ♔h8 34.♖d7 ♖6e7 35.♖d1 ♔g7 36.♔g2 ♖e6 37.♖d5 ♔h8 38.g5 [38.h5 is met by 38...g5 39.♖d7 ♔g7 40.♚f5 ♖8e7= White cannot make progress.]

38...hxg5 [38...h5= was also good enough to keep the h-file closed.]

39.hxg5 ♔g8 40.♔g3 ♗f8 41.♖d7 ♖6e7 42.♖d1 ♖e6 43.♔g2 ♗c5 44.♖h1 White got this extra option thanks to Black's 38th move, but it still does not bring anything. Jakovenko neutralizes all the attacking threats with

44...♗f8! 45.♚h4 ♗g7 and there is only one check on h7...

46.♚e4 ♗f8 47.♖b1 ♗b4 48.♖h1 and a draw was agreed as Bf8 is coming again. An instructive example that in different kind of endgames, the defensive side should always keep the possibility of setting up a fortress in mind. **1/2-1/2**

Clash of the Titans

(17) Bronstein, David I
- Botvinnik, Mikhail[B63]

World Championship 19th(6),
1951.03.26

GM Kamil Miton
Best rating: 2655

1.e4 c5 2.♘f3 ♘c6 3.d4 cxd4 4.♘xd4 ♘f6 5.♘c3 d6 6.♙g5
e6 7.♚d2 We have the Rauser Variation.

7...h6 The idea of this move is to force White to exchange on f6. Nowadays Black has more popular options, for example [7...a6 8.O-O-O ♙d7 and White has a choice between two plans, either with f4 or f3.; 7...♙e7 8.O-O-O O-O; 7...♚b6!?]

8.♙xf6 [8.♙h4? is a mistake because of the typical trick 8...♘xe4!]

8...gxf6 [8...♚xf6? 9.♘db5 ♚d8 10.O-O-O+- and White is winning the pawn.]

9.O-O-O a6 10.f4 ♙d7 11.♚b1 ♙e7 [11...♚b6 with the idea to chase the knight from its central position.]

12.♙e2 with the idea Bh5. White could also play [12.g3 with Bh3-f5 and the idea get control of the d5 square.; 12.♙c4 looks more active but Black can get quick counterplay after 12...b5 13.♙b3 ♘xd4 14.♚xd4 a5=]

12...♘xd4 13.♚xd4 ♚a5 Black develops the queen and prevents Bh5.

14.♖hf1 [14.f5!? The idea of this standard plan is to take control of the light squares, but the disadvantage is that Black gets the useful e5 square. Let's check some example variation: 14...♚e5 15.♚d2 h5 Preventing Bh5. 16.♙f3 ♙c6 17.♘e2 ♙xe4 (17...O-O-O 18.♘f4↑ with the idea to create pressure on e6, h5 and f7.) 18.♙xe4 ♚xe4 19.fxe6 fxe6 20.♘f4± threatening Re1, so Black is forced to play e5 and then White will get the d5 square for the knight and a very strong initiative.]

14...h5

15.♖f3! A typical rook activation.

15...♔c5 16.♔d2 Of course this endgame is without any problems for Black.

16...♙c6 17.♖e3 One of the ideas in these structures is the trick with Nd5, which is why Black plays

17...♔a5 [17...O-O-O 18.♘d5!]

18.♙f3 O-O-O 19.♔d3 [19.♘d5 19...♔xd2 20.♘xe7+ ♔d7 21.♖xd2 ♔xe7 Black's position is good as the queens were exchanged.]

19...♖d7! Once again Black is preventing Nd5.

20.h4 White fixed the h5 pawn, but on the other hand the g-file is weaker now.

20...♙b8 21.a3 ♙d8! A good idea. Black is improving his bishop.

22.♙a2 ♔c5 [22...♙b6?? 23.b4+—]

23.♖e2 a5 with the idea b5-b4. [23...f5!? 24.exf5 ♔xf5 25.♔xf5 exf5 The position is equal because of the weak h4 pawn.]

24.a4 ♙b6 25.b3 ♖c8

26.♔c4 The stake of each world championship game is very high and Bronstein understood that he was not playing for the advantage anymore, so he decided to make a draw. [26.f5 26...exf5 27.♘d5 ♙xd5 28.exd5 ♔b4 with the initiative over the dark squares.]

26...♔xc4 27.bxc4 ♖h8 28.♙b3 ♖dd8 Black has two bishops and the better structure, but the character of the position is closed, so it is hard to find and improvement ideas.

29.♖d3 ♙g1 Threatening Bh2.

30.♖ed2 ♔c7 31.♘e2 ♙f2 32.♖d1 ♙c5 [32...♙xh4!? 33.g3 f5 34.exf5 ♙f6 35.fxe6 fxe6=]

33.♘g3 ♖dg8 34.♘e2 White is waiting. [Worse was 34.♘h5 34...♖h6! A nice move, after which White is losing coordination. (34...♙xe4 35.♘xf6 ♙xd3 36.♘g8 ♙g6 37.h5 ♙xh5 38.♖h1 ♖xg8 39.♖xh5=) 35.g4

35...f5! 36.g5 fxe4 37.gxh6 exf3 38.♖f6 ♜h8 39.h7 ♔d8! The king comes to e7 and thanks to the powerful bishops Black has a big advantage.]

34...♜h7 [34...♜g4!? with the to idea change the character of the position a little bit. 35.♙xg4 hxg4 36.♘g3 ♜xh4 37.♞e1 ♜h2 38.♞e2 ♔d8 with the idea to bring the king to g6 and push f5. Black is better.]

35.f5 e5 Stopping Nf4.

36.♘c3 ♙d4

37.♞xd4 White can allow himself to play this move because Black will not be able to open the position. [37.♘b5+ 37...♙xb5 38.cxb5 was enough for a draw as well.]

37...exd4 38.♞xd4 ♜hg7 39.♘e2 ♜xg2 This is the only way to complicate the position.

40.♙xg2 ♜xg2 41.♘f4 ♜g3+ 42.♙b2 ♜g4 43.♘xh5 ♜xh4 44.♘xf6 ♙b6 Black activates the next piece at the cost of a pawn.

45.♞xd6 ♙c5 46.e5 ♜d4 [46...♜f4 47.♘d7+ ♙xd7 48.♞xd7 ♜xf5 49.♞xb7 ♜xe5 50.♞xf7 ♙xc4 with an easy draw.]

47.♞xd4 ♙xd4 48.♘g4 [48.e6 48...fxe6 49.fxe6 ♙e5=]

48...♙xa4 49.e6 fxe6 50.f6 [50.fxe6 50...♙e4 and Black will catch the pawn after Kf5.]

50...♙e8 51.♙b3 White is winning the piece but there is not enough material on the board to win the game. [51.♘h6 51...e5 52.f7 ♙xf7 53.♘xf7 e4 54.♘d6 e3 55.♘f5+ ♙e4=; 51.c3+ 51...♙xc4 52.♘e5+ ♙d5 53.f7 ♙xf7 54.♘xf7 b5=]

51...e5 52.c3+ ♙e4 53.♘h6 ♙f4 54.f7 ♙xf7 55.♘xf7 e4 56.♘d8 e3

57.♙c2?? What an amazingly huge blunder! The game should have finished in a draw after [57.♘e6+ 57...♙f3 58.♘d4+ ♙f2 59.♙a4 e2 60.♘c2 e1=♙ 61.♘e1 ♙xe1 62.♙xa5 ♙d2=]

57...♙g3! White forgot about this optically longer way for the black king and now the pawn will be promoted! **0-1**

Editorial Preface

Let's first quickly go through the finished events:

The round robin in Moscow which was named after the great World Champion Petrosian was won by Grischuk with the fantastic result of 5.5/7 and a performance of almost 3000 ELO, which also brought him the World Nr3 spot in the live rating list, with his personal record of 2810. Second place went to Kramnik with 4.5/7 and 3rd place was shared by Gelfand and Aronian, both with 4/7.

Right after this event, most of the participants had to fly to Sochi to play a double round blitz event which was named after the great World Champion Mikhail Tal, who was a fantastic blitz player himself.

In the blitz event nobody could stop Mamedyarov and only Grischuk even came close during the last rounds but it wasn't enough to stop the Azeri from clinching the tournament victory.

Now let's get to the main event, **the World Chess Championship** between Carlsen and Anand.

After 5 games, the score is 2.5-2.5.

In the 2nd round Carlsen managed to win a nice game with White from an opening position, where probably a draw should have been the normal outcome, but Anand, made few slight errors, then few more and the game been over. It seemed like the match is going to be a repetition of what we have seen a year ago, but no, directly in the next round Nr3, Anand tried an interesting opening idea, put Carlsen under a lot of pressure and won easily the full point! Wow, this has been really a big surprise, and I guess Carlsen been a bit angry at his team for getting such an opening surprise where there

should be no surprises.

The games 4 and 5 has been not really spectacular, the Black side had to be accurate and fight for a draw, but all been without any side having a real chance of getting into the lead. What is really different to the previous match is, Anand is searching a tactical fight and is clearly much better prepared than the last time. We already saw a lot of different openings and clearly there are going to be more to come. It is an open fight! As well the level of play somehow seems to involve more little mistakes than in the first match, especially on the side of Carlsen who is usually playing super exact technical positions.

To us, Carlsen stays a clear favourite to win the match, but probably we are going to see a lot of action and exciting games and maybe, just maybe Anand will have his chance!

The other event that is currently under way is the Ukrainian Championship, with all the best players participating in it, such as Ivanchuk, Eljanov, Ponomarev, Korobov, Kryvoruchko etc... Eljanov and Korobov had the best start with 2/2, while Ivanchuk started rather poorly with 0.5/2.

In the current issue we of course focus most of our attention on the WCC Match. Enjoy!

Arkadij Naiditsch & Csaba Balogh

We are happy to announce, that Chess Evolution will cooperate with Hungarian Chess Federation in the prestigious event of World Chess Olympiad U-16. Chess Evolution will also devote two issues from our newsletter to share with you the best games, the most interesting moments and the nicest combinations played by the young stars.

FIDE Youth Chess Olympiad Hosted by Hungary Already Breaks Records

Only four months after the Chess Olympiad in Tromsø where the greatest chess players of the world competed against each other it is already time to have a look at the best talents of the next generation. In December this year Hungary may organize a Chess Olympiad for the first time, the competition for youth aged under 16 years. The event takes place in the city of Győr and with more than a month to the start the organizers have already confirmed the entries of more participant nations than ever before at any Youth Chess Olympiad. It really seems that the best chess talents of all five continents will be present in Hungary between 12th-22nd December. Awarding the right of organization to Hungary is a clear sign of high international recognition of chess life in the country which is rightly confirmed by the fact that Judit Polgar who has been leading the FIDE world rankings for more than 25 years has agreed to be the face of the event representing talent and the Hungarian chess traditions all in one person or we could even say legend. By mentioning Judit Polgar let us not forget that after FIDE tightened on a rule that had existed earlier participation of girls are now guaranteed. In each team a maximum four of the five team members can be a boy.

The promo video of the Youth Chess Olympiad 2014 features Judit Polgar, Csaba Balogh, Olympic Silver medalist, Benjamin Gledura who was European Champion of his age group and Kata Karacsonyi who was the first to follow in the footsteps of Judit Polgar to win the National Championship topping all boys in their age groups.

You can see the video by clicking on this link:

You can find more information about the FIDE U-16 World Youth Chess Olympiad 2014 on the official website of the event:

4 best games of the past week

(1) **Carlsen, Magnus(2863)**
- **Anand, Viswanathan(2792) [C65]**

WCh 2014(2),
2014.11.09

GM Csaba Balogh
Best rating: 2672

The second game of the match and the first one where Carlsen leads the white pieces. All the top players are able to play any openings with both colors and it is always interesting to see what they have prepared for the match in their training camps...

1.e4 e5 2.♘f3 ♘c6 3.♙b5 ♘f6 So Anand plays the Berlin defense, just like Carlsen neutralized his 1.e4 openings in their previous WC match.

4.d3 Carlsen does not want to play the Berlin endgame, he rather aims to keep all the pieces on the board.

4...♙c5 5.O-O d6

6.♖e1 Well, it becomes clear now that Carlsen just wants to avoid a theoretical battle, he does not play for an advantage, he just wants to get a playable position where he can slowly

outplay his opponent. [The main move and the analyzed territory starts with 6.c3]

6...O-O 7.♙xc6 [7.c3 transposes to the theory. Black's most common reply here is 7...♘e7 and that is why Carlsen prefers to take on c6, giving up the bishop pair, but damaging the pawn structure.]

7...bxc6 8.h3 A useful move against Ng4 followed by f5 and it also prevents Bg4.

8...♖e8 9.♘bd2 ♘d7 A typical maneuver in this type of position. Black would like to execute the d5 break to open the position for his two bishops, but for this he needs to protect the e5 pawn. The knight is heading to f8-g6, after which d5 is possible. The position is closed, therefore such kind of maneuvers are justified.

10.♘c4 ♙b6 Not a necessary , but a useful move, before continuing the knight transfer.

11.a4 a5 12.♘xb6 A strange decision at first sight, to improve the pawn structure without the knight getting attacked. We might think that White had more useful moves, but in a few moves everything becomes clear... [12.♙d2 12...♘f8 followed by Ng6, Qf6 (or f6) and d5.]

12...cxb6 [Actually even 12...♘xb6!? is completely fine, followed by c5 and f5. 13.d4 exd4 14.♘xd4 c5 is OK for Black.]

13.d4 The logical follow-up after taking on b6.

13...♙c7 Anand would like to continue his knight's journey to f8-g6, which was not possible right away in view of dxe5 dxe5 Qxd8 Rxd8 and Nxe5.

14. ♖a3! This is the first point why Carlsen took on b6 so fast. He wants to use his rook along the 3rd rank, but the real idea just becomes clear in two moves.

14... ♟f8 15.dxe5 dxe5

16. ♟h4! Carlsen had this position in mind when he took on b6. He wants to attack with Rg3, followed by Bh6 and Nf5. In case of the defensive attempt Ng6, closing the g-file, he might bring a new attacker with Nf5 followed by h4-h5. It is amazing how effectively Carlsen managed to bring life to the position, although his position is not better yet, as Black also has his resources.

16... ♖d8 17. ♖h5 f6 Strengthening the e5 pawn and opening the 7th rank to be able to successfully defend the g7 weakness, maybe even with Ra7 at some point.

18. ♟f5 Black has a wide choice here. Anand fails to find the best option... [If White starts with 18. ♖g3 Black defends himself with 18... ♖f7 19. ♖f3 ♟g6! 20. ♟f5 (20. ♟xg6 20... hxg6= White cannot make use of the doubled pawns as he cannot attack the g6 pawn with another piece. Black continues with Be6 and doubles his rooks on the d-file.) 20... ♖h8 and it is not easy for White to continue the attack because 21.h4 drops the pawn after 21... ♟xf5 and Nxh4 next.]

18... ♟e6 [Black should have played 18... ♖f7! sending back the attacking queen as after the trade White should forget about giving mate... 19. ♖e2 ♟g6 20. ♖g3 ♟xf5 21.exf5 ♟e7 and Black is fine. He can create counterplay against the f5 pawn and Rd4 is an important resource in many lines.; 18...g6 weakens the kingside too much. 19. ♟h6+ ♖h8 20. ♖h4 White is better.; 18... ♟xf5 19.exf5 is also preferable for White. The f8 knight is misplaced now compared to the final position of the 18...Qf7 variation. White plays Rg3 next followed by Bh6 or Re4-g4 or breaking the pawn chain with f4!]

19. ♖g3 ♟g6

20.h4 Consequently played! Once the pawn arrives to h5,

that could be decisive. White clearly has the initiative on the kingside, while Black cannot compensate on the d-file as all invading squares of the rooks are perfectly under control. [20.♗h6!? was an interesting alternative. 20...gxf6 21.♖xg6+ hxf6 22.♗xg6+ ♔f8 23.♗xf6+ ♗f7 (23...♗f7? loses to 24.♗h8+ ♗g8 25.♖e3 and Black has no adequate defense.) 24.♗xh6+!? is the computer's suggestion. (Carlsen thought that he had nothing more than a perpetual check with 24.♗h8+ 24...♗g8 25.♗f6+) 24...♔e8 25.♗h8+ ♗f8 (25...♔d7 is met by 26.♖d1+ ♔c7 27.♗xe5+ ♔b7 28.♗d6+ ♖xd6 29.♖xd6 The 4 pawns for the bishop should guarantee an edge.) 26.♗xe5 ♔f7 27.♗d4 and Re3 next move looks very dangerous.]

20...♗xf5 [Now on 20...♖d7 21.♗h6! is even stronger than before. 21...gxf6 (21...♔h8 loses to 22.♖xg6! hxf6 23.♗xg7+ ♔g8 24.♗h8+ ♔f7 25.♗h6+ ♔e7 26.♗xf6+--; 21...♖f8 is strongly met by 22.♗g4! gxf6 23.h5) 22.♗xh6 and h5 is coming next with a very strong attack.]

21.exf5 ♗f4 [21...♗f8 is too passive and White gets an advantage after 22.♗h6 ♖d7 23.♖e4! ♖a7 24.f4! is very bad for Black.]

22.♗xf4 exf4 23.♖c3 Black has successfully traded the minor pieces and he is safe now from getting mated. However, this heavy piece endgame is extremely unpleasant for him. Both white rooks are more actively placed, the rook is going to e6 next move, making all the queenside pawns vulnerable. It cannot be avoided by Rd6 as the rooks must control the back rank. The situation of the f-pawns also favors White, as the one on f4 is much weaker than f5.

23...c5 24.♖e6 ♖ab8 A clear mistake, as Anand had missed the next move. [24...h6 should have been played with the idea to open the back rank and to be able to react with Rd4 to Rc4! But White still keeps an edge after 25.♗f3 ♖ab8 26.♖c4 ♖d4 27.c3! ♖xc4 28.♗d5 ♔h7 29.♗xc4 White is clearly better because of the weak f4 and b6 pawns.]

25.♖c4! An excellent move! Carlsen transfers his rook to e4 after which he is threatening to penetrate on the 7th rank and also to give mate on e8. It also keeps an eye on the f4 pawn!

25...♗d7 [25...h6 26.♖ce4 is also very bad for Black.]

26.♔h2! Prophylaxis against the queens' exchange! [26.♖xf4 allows 26...♗d1+ 27.♗xd1 ♖xd1+ 28.♔h2 ♖d2 with excellent chances to draw.]

26...♖f8 [26...♗d1? is now refuted by 27.♖e8+!+-]

27.♖ce4 [There was nothing wrong with 27.♖xf4 but Carlsen wants more by creating the Re7 threat.]

27...♖b7 28.♗e2 Refreshing the Re7 idea. [28.♗f3 was perhaps even stronger, taking on f4 next. Black has no compensation.]

28...b5! A desperate attempt to gain counterplay.

29.b3 [Carlsen said that he forgot about 29.♖e7 29...♔d6! initially when he went for Rce4 and Qe2 instead of collecting the f4 pawn. However White should still have gone for this line and now play 30.f3! (30.♖xb7?? 30...f3+) 30...♖xe7 31.♖xe7 bxa4 32.♔e4! +- Black is a pawn up temporarily, but all his pawns start to fall in the next moves. Qb7 is a decisive threat now and 32...♔h8 loses to 33.♖e8! threatening to deflect the queen with Qc6 or Qd3 and mate on the back rank. 33...g6 34.fxg6 (34.♖e7 also wins and Qb7 next.) 34...hxg6 35.♔xg6+-]

29...bxa4 30.bxa4 ♖b4 Black at least manages to ease his position by trading one of the active rooks.

31.♖e7! A great move with a beautiful trick behind it...

31...♔d6 Anand does not fall into the trap. [31...♔xf5 loses to 32.♖xb4 axb4]

33.♔c4+! ♔h8 34.♔f7!! ♖g8 (34...♖xf7 35.♖e8+ ♖f8 36.♖xf8#) 35.♖e8+-]

32.♔f3?! An inaccuracy. [32.f3! was stronger again. 32...♖xe4 33.♔xe4+- with more or less the same position as in the 30.f3 line! Qb7 is the decisive threat.]

32...♖xe4 33.♔xe4 f3+! 34.g3

34...h5?? A terrible blunder finishes the game. [Black had some chances to survive after 34...♔d2! 35.♔xf3 (35.♔c4+ 35...♔h8 36.♔xc5 ♖d8 is also an extra pawn for White, but it is not easy to make progress because of the pressure on the f2 pawn. This is the reason why it was better for White to play f3 twice before. Black opens the back rank with h6.) 35...♔xc2 36.♔g2 By protecting the f2 pawn, White creates the threat of Qd5 Kh8 Qf7! 36...♔h8 (36...♔xa4? loses nicely again: 37.♔b7! The direct Qd5-f7 maneuver did not work immediately, as Black covers the e8 square, therefore White includes the intermediate move 37...♔g4 and only now 38.♔d5+ ♔h8 39.♔f7! ♖g8 40.♖e8+-) 37.♔c6 h6 38.♖a7 ♔xf5 39.♖xa5 White retains the advantage, but it is going to be difficult to convert into a full point. 39...♖c8?! leads to an instructive position. 40.♖a8! ♖xa8 41.♔xa8+ ♔h7

42.♔c6! and White is probably winning because of the

excellent position of the queen on c6! It stops the c-pawn and Black has no adequate defense against the simple advance of the a-pawn!]

35. ♔b7+—1-0

(2) Anand, Viswanathan(2792) - Carlsen, Magnus(2863) [D37]

WCh 2014(3),
2014.11.11

GM Csaba Balogh
Best rating: 2672

Just like in the WC match in 2012 against Gelfand, Anand strikes back right after his loss. As we go deeper into the game, it turns out to be very difficult to understand how Carlsen and his team prepared for this game...

1.d4 ♘f6 2.c4 e6 Carlsen deviates from the first game of the match, where he employed the Gruenfeld defense.

3. ♘f3 d5 4. ♘c3 ♙e7 The Queen's Gambit declined is highly popular nowadays on the highest level.

5. ♙f4 O-O 6.e3 ♘bd7 7.c5 c6 The old main line. [Within a week, Kramnik twice successfully played the new fashionable move 7... ♘h5 which should be the better option for Black.]

8. ♙d3 [The alternative is 8.h3 I would like to draw your attention to the following game: 8...b6 9.b4 a5 10.a3 ♙a6 11. ♙xa6 ♖xa6 12.b5 cxb5 13.c6 ♖c8 14.c7 b4 15. ♘b5 a4 16. ♖c1 ♘e4 17. ♘d2 ♘df6 18.f3 ♖a5 19. ♘xe4 ♘xe4 20.fxe4 ♖xb5 21. ♖xa4 ♖a5 22. ♖c6 bxa3 23.exd5 ♖xd5 24. ♖xb6 ♖d7 25.O-O ♖c8 26. ♖c6

We have exactly the same position as in the game, the only difference being that the pawn is on h3, which is of course useful for White, but not a decisive difference as White is close to be winning in any case. It is quite sure that Anand knew about this game. Only the correct move order played an important role, but it was also shown by Aronian as we will see later in the game... This game, just like our present game finished in a few moves. 26...h6 27.♖fc1 ♔h7 28.♔a6 ♖f5 29.♘d6! ♘h4 30.♔xa3 Black resigned soon in Tomashevsky-Riazantsev, Moscow 2008]

8...b6 9.b4 a5 Black tries to undermine the queenside, but White successfully keeps the pawn structure and saves the space advantage.

10.a3 ♘a6 11.♘xa6 [11.O-O is the old main line.]

11...♖xa6

12.b5! A nice breakthrough, but it is all theory... Both players were blitzing out the moves.

12...cxb5 13.c6 White seems to win a piece as the knight has no other free square than b8, but it loses to the fork with c7! However

13...♔c8! saves the piece by pinning the c3 knight.

14.c7 This is the point of the b5 break and the pawn sacrifice.

White creates a powerful passed pawn on c7, which paralyzes the black pieces.

14...b4 15.♘b5! Strengthening the c7 pawn!

15...a4! A very important resource for Black. He should try to kick out the b5 knight from its safe place. It prepares Ra5 and also prevents Qa4, which would stabilize the knight.

16.♖c1! Supporting the c-pawn from behind and White creates the decisive threat of Bd6, after which he inevitably frees the d6 square for the knight, which would send away the queen from c8 and the pawn promotes.

16...♘e4 Preventing Bd6! [16...bxa3? 17.♘d6+- is over.; 16...♖a5 is also met by 17.♘d6! ♖xb5 18.♘xe7 and the best for Black is to sacrifice an exchange before White could take on b4 and a4. 18...b3 19.♘xf8 ♘xf8 20.O-O must be better for White, Qd3 is coming next.]

17.♘g5!! This was Aronian's novelty last year. It was very strange that Carlsen did not know anything about it. He spent more than 40 minutes here. White tries to deflect the pieces from the d6 square. [17.♘d2 was less convincing in a previous game, because Black could play 17...♘c3 18.♘xc3 bxc3 19.♖xc3 b5 followed by Nb6-c4.]

17...♘df6 After a long thought, Carlsen repeated Adams's reply. [17...♙xg5 18.♙xg5 ♖a5 Here probably the most precise is (18...♘xg5? 19.♘d6 ♕a8 20.c8=♖+-) 19.♖e2! ♖xb5 20.♖xb5 ♘xg5 21.axb4 with a strong initiative due to the c7 pawn. Black's pieces are discoordinated. ; Compared to the 17.Nd2 line 17...♘c3 is now met by 18.♘xc3 bxc3 19.♖d3! with tempo! 19...♙xg5 20.♙xg5 Black is lacking his very important dark squared bishop. White takes on c3 next and saves his c7 pawn for the entire game. It cannot be taken now as the a6 is hanging then.; 17...♘xg5 runs into 18.♙d6!! The only move is (18.♙xg5 18...♘f6 is less clear.) 18...♖a5 but it does not solve the problems since after 19.♙xe7 ♖xb5 20.axb4 ♖e8 21.♖xa4 ♖xe7 22.♖xb5 Black is in trouble again.]

18.♘xe4 ♘xe4 [18...dxe4 frees the d5 square for the knight, Bd6 could met by Nd5, but now 19.♘d6! ♙xd6 20.♙xd6 is again better for White, because the c7 pawn is safe.]

19.f3! The usual story! The fight is around the d6 square.

19...♖a5

20.fxe4! This is the novelty to the Aronian game, but now we transpose to the previously mentioned Tomashevsky-Riazantsev game, where the only difference is the pawn on h3. [20.♖e2 also looked strong, but Black has the strong answer 20...♖d7! 21.fxe4 ♖c8! and the b5 knight is

suddenly trapped! 22.exd5 exd5 23.axb4 ♖xb5 24.O-O ♖xb4 and Black was fine. Aronian-Adams, Bilbao 2013]

20...♖xb5 21.♖xa4 ♖a5 22.♖c6 bxa3 23.exd5 ♖xd5 [23...exd5 24.O-O is also bad for Black. White takes on b6 next move or in case of b5 or Ra6 the d5 falls. The c7 passed pawn is much more dangerous than the one on a3. As soon as the pawn gets to a2, it becomes a weakness as it cannot be supported well enough, while the c7 pawn is completely safe because of the f4 bishop.]

24.♖xb6 ♖d7 25.O-O ♖c8

26.♖c6! Depriving Black from any kind of counterplay. He cannot bring his d5 rook back to the game with Rb5. Anand had an extra hour and a winning advantage even according to the machines. He also admitted that this position was existing in his home analysis, but the strange thing is that he did not even require a strong novelty or something to stand like this, it was enough to be familiar with two top games, Aronian-Adams and Tomashevsky-Riazantsev. It is very hard to understand how Carlsen could end up in this position...

26...g5 This is already a kind of desperate move. Black realized that he is lacking useful moves, while White can

increase his advantage by playing Rfc1 followed by Qa6 and Rb6-b8 for example. [26...♙g5 instantly loses to 27.♙xg5 ♖xg5 28.♖d6!+- and Rd8.]

27.♙g3 [27.♙e5 was also strong enough.]

27...♙b4 A nice try confuse the matters, but it does not help. Black pins his hopes to Bd2, counterattacking the e3 pawn or sometimes Ba5 might be a small hope for salvation... However Anand reacts perfectly! [27...♖a5 was a critical line to check. It would be a huge improvement for Black if he could transfer his rook to a8. That would support the a-pawn and also control the c8 promoting square. Unfortunately for Black, it runs into 28.♖xe6! ♙xe6 29.♙xa5 ♙xe3+ 30.♙h1 White is threatening with the direct win of Qf5! 30...♙d3 31.♖e1+- leaves Black in a hopeless situation. Qe5 or d5 is coming next. Black has no chance to advance the a-pawn, the c7 is always much faster.]

28.♖a1! An excellent prophylactic move! Black must forget about his Bd2 idea as it always drops the a3 pawn and Black has no useful move left.

28...♙a5 This loses, but it was probably already over. [In case of some waiting move like 28...h6 White could improve his position with 29.h3! opening the back rank, just in case. 29...♙h7 30.♖a2! followed by Rac2, after which the bishop is hanging on b4 and White plays Qa6, Rb6-b8 next. Black cannot create any counterplay.]

29.♙a6 White is threatening to play Rxa3.

29...♙xc7 [29...♙b4 30.♖b6!+- and Rb8 wins next.; 29...♖xc7 30.♙xc7 ♙xc7 31.♖xa3+- is also hopeless.]

30.♙c4! The last precise move! Black loses huge material because of the pin on the c-file. [Black's last trick was 30.♖ac1? which seems to be winning as well, but actually after 30...♖a5! Black pushes a2 next and survives.]

30...e5 31.♙xe5 ♖xe5 32.dxe5 White is an exchange up and Black still cannot leave the deadly pin on the c-file.

32...♙e7 33.e6 [The last trap to be careful about was 33.♖c1 33...a2 34.♙xa2? ♙xe5 and Black might hope for salvation. Everything else is just winning for White.]

33...♙f8 34.♖c1 A very important win for Anand to win back his confidence and to come back in the match. It will be very interesting to follow how such a game will affect the match.

1-0

**(3) Carlsen, Magnus(2863)
- Anand, Viswanathan(2792) [B40]**WCh 2014(4),
2014.11.12GM Kamil Miton
Best rating: 2655

1.e4 c5 2.♘f3 e6 This is a little surprise because Anand usually plays the Najdorf, but of course it is normal that for a match you have to prepare new weapons.

3.g3 Carlsen didn't want to enter the main lines and chose a quiet option.

3...♗c6 4.♙g2 d5 Black had many other plans but this one looks very solid and logical as Anand immediately fights for the center.

5.exd5 exd5 6.O-O ♗f6 7.d4 ♙e7 8.♙e3 [8.dxc5 8...♙xc5 9.♙g5 (9.♙e1+ 9...♙e6 10.♗g5 makes no sense because Black gets counterplay against the f2 pawn. 10...O-O 11.♗xe6 fxe6 12.♙xe6 ♗e4+) 9...♙e6 10.♗c3 The idea of this setup is to put pressure on the d5 pawn, which is similar to the Tarrasch System, where White's structure is a bit different as the pawn is on e2 instead of c2. 10...O-O (10...d4 11.♙xf6 ♙xf6 12.♗e4

♙e7 13.♗eg5+ and after taking on e6 White will get full control over the light squares.) 11.♙d3 h6 12.♙xf6 ♙xf6 13.♗xd5 ♙xb2 14.♙fb1 ♙a3 15.♙xa3 ♙xa3 16.♗c7 ♙ab8 17.♗xe6 fxe6 18.♙e1 e5 with equal play.]

8...cxd4 [8...♙b6!?]

9.♗xd4

9...♙g4! is probably the most accurate move. [After the natural 9...O-O White could play 10.h3 and now Black has no good square to develop the bishop, as after 10...Be6 White at some moment can exchange on e6 and get the advantage of the two bishops and after 10...Nxd4 11.Bxd4 this exchange is in White's favor.]

10.♙d3 ♙d7 Preventing h3.

11.♗d2 O-O 12.♗2f3 ♙fe8 13.♙fe1 ♙d6 14.c3 h6 Because there are a lot of pieces on the board White is not able to take advantage of the isolated pawn.

15.♙f1 White is preparing the h3-Nh4 idea.

15...♙h5 16.h3 ♙g6 The black bishop is going to the strong e4 square, from where it will reduce the strength of his opponent on g2.

17.♙ad1 ♙ad8 Both sides placed their pieces on optimal positions, so it is time to do something concrete now.

18. ♖xc6! [18. ♖b5 18... ♖b8 19. c4 ♖c8 20. cxd5 ♖xd5 (20... ♖xd5 21. ♖xh6!) 21. ♖fd4 ♖e4 and Black is not worse.]

18...bxc6 19.c4 Carlsen starts to create some potential threats on d5 and a7.

19...♖e4 20.♖d4 ♖h7 The knight is going to e6. [20...♖e6!?]

21.cxd5 ♖xd5 Anand will be able to exchange more pieces now. [21...cxd5 22. ♖a6 and thanks to his better structure White keeps some small plus.]

22. ♖xe8+ ♖xe8 23. ♖d3 [23. ♖a6 23... ♖f5! 24. ♖h4 ♖c2↗]

23...♖f8

24. ♖h4 is maybe premature. More flexible was [24. ♖c3+= with the same idea of bringing the knight to the very useful f5 square.]

24...♖e5! Anand sticks to his plan of just exchanging pieces.

25. ♖xd5 [25. ♖xe5 25... ♖xe5 26. f4?! weakens the white king. 26... ♖e8 27. ♖f5 (27. ♖xd5 27... cxd5 28. ♖xd5?? ♖e1+—) 27... ♖e6 28. ♖xd5 cxd5 29. ♖xd5 ♖b6+=]

25...♖xd5 [25...cxd5 26. ♖xe5 ♖xe5 27. ♖f3 ♖e8 28. ♖xd5 (28. ♖g2+= White has the better structure.) 28... ♖xh3 29. b4 White keeps some initiative thanks to his more active pieces and a distant passed pawn, but objectively the position is drawish.]

26. ♖xe5 ♖xe5 27.b3 ♖e6 28. ♖f3 ♖f6 29. ♖g2 [29. ♖e1 29... ♖d8=]

29...♖d8 30. ♖e2 ♖d5 [30... ♖xd1 31. ♖xd1 ♖b2 (31... c5 32. ♖d5+=) 32. ♖d7 ♖xa2]

33. ♖e5! ♖xb3 34. ♖xf7+ ♖h7 (34... ♖h8? 35. ♖g6+ ♖h7 36. ♖f8+—) 35. ♖f5+ (35. ♖d7 35... ♖f4+! 36. ♖xf4 ♖d5+) 35... ♖h8 36. ♖xc6 a6 37. h4 and white keeps some initiative thanks to some mate ideas like h5 next and then Ne7 etc...]

31. ♖xd5 cxd5 32. ♖e5 ♖f5 33. ♖d3 ♖d4 34. g4 ♖d7 Of course Black should not exchange queens because then White will have more chances to take advantage of the passed pawn. [34... ♖xe2 35. gxf5 ♖d4 36. ♖g3!? ♖xf5+ 37. ♖f4 ♖e7 38. ♖e5 An active king and the plan of playing b4-a4-b5 next gives

White the initiative.]

35. ♖e5 ♜e6 36. ♔g3 ♜b5 37. ♞f4 ♞xf4 38. ♔xf4 ♜b4+ 39. ♔f3

39...d4! In time trouble Anand is going to defend actively.

40. ♜e8+ ♔h7 41. ♜xf7 ♜d2! White is a pawn up but thanks to the d-pawn Black's counterplay is enough. [41... ♜c3+? 42. ♔e4 d3 43. ♜f3! and Black loses the important d-pawn.]

42. ♜f5+ [42. ♜xa7 42... ♜d1+! (42...d3?! is less accurate because of 43. ♜e3! ♜c2 44. ♜e4+ ♔h8

45. ♔g2! A fantastically strong move! 45... ♜e2 (45... ♜d1 46. ♜a8+ ♔h7 47. ♜f3 ♜c2 48. ♜e4+ wins a tempo.) 46. ♜a8+ ♔h7 47. ♜f3 ♜c2 48. ♜e4+ ♔g8 49. h4+= and is not easy to improve Black's position because White has the idea

of winning a tempo which we saw in previous variations.) 43. ♔g2 d3 44. ♜e3 d2 now Black is on time, so White needs to give a perpetual check. 45. ♜e4+ ♔h8 46. ♜e8+=]

42... ♔h8 43. h4 ♜xa2 44. ♜e6 ♜d2 [44...d3? 45. ♜e8+ ♔h7 46. ♜e4+=]

45. ♜e8+ ♔h7 46. ♜e4+ ♔h8 47. ♜e8+ ♔h7 1/2-1/2

- Carlsen, Magnus(2863) [E15]**WCh 2014(5),
2014.11.14GM Kamil Miton
Best rating: 2655

1.d4 ♘f6 2.c4 e6 3.♞f3 b6 4.g3 ♘b4+ A solid choice where you don't find too much complex theory.

5.♘d2 [5.♞bd2]

5...♘e7 Black had other possibilities to develop: [5...♘xd2+ 6.♚xd2 ♘a6 7.b3 c6 8.♘g2 d5 9.O-O O-O 10.♚c1 ♞bd7 with a very solid position where its hard to prove an advantage for White.; 5...♚e7 6.♘g2 ♘b7 7.O-O ♘xd2 8.♚xd2 O-O 9.♞c3 d5 (9...♞e4 10.♞xe4 ♘xe4 11.♚f4+)=] 10.cxd5 exd5 11.♚ac1+;

6.♞c3 ♘b7 7.♘g2

7...c6! Carlsen has provoked the Bd2 move to transpose into a Catalan structure. This is a typical idea because then White is not able to play over b3-Bb2.

[7...O-O 8.O-O d5 (8...♞e4?! makes no sense at all because Black is a tempo down compared to the known line.) 9.cxd5 exd5 10.♘f4+=]

8.e4! Fighting for the center immediately.

8...d5 9.exd5 [9.e5 9...♞e4 10.cxd5 cxd5 11.O-O O-O∞White will not be able to create any kingside pressure as is usual in this kind of structure, because of the bad bishop on g2 and the strong knight on e4.]

9...cxd5 10.♞e5 O-O 11.O-O

11...♞c6 [11...♞bd7 is less accurate because of 12.♚a4↑and the pawn on d4 is not hanging.]

12.cxd5 [12.♘g5 doesn't bring White any advantage. 12...♚c8 (12...h6 13.♘xf6 ♘xf6 14.cxd5 ♞xe5 15.dxe5 ♘xe5 16.dxe6 ♘xg2 17.exf7+ ♚xf7 18.♚xg2 ♘xc3 19.bxc3 ♚f6 Black's active pieces and the weak white structure give Black good drawing chances.) 13.♚e1 dxc4 14.♚a4 ♞xe5 (14...♚e8∞) 15.dxe5 (15.♘b7 15...♚xd4+) 15...♘xg2 16.exf6 gxf6 17.♘h6 ♘f3 18.♘xf8 ♚xf8=]

12...♞xe5 [12...♞xd5 13.♞xd5 exd5 14.♚a4 ♞xe5 15.dxe5 ♘c5 16.♘c3+= White has a long-term advantage because of the weak d5 pawn.]

13.d6 [13.dxe5?! 13...♞xd5 and here only Black can be better.]

13...♞c6 [13...♙xg2 14.dxe7 ♞xe7 15.dxe5 ♙xf1 16.exf6 ♞xf6 17.♞xf1 ♞fd8 18.♙e3+= Black's position is very solid but White has some potential chances to create pressure against the a7-b6 pawns, so I prefer his position.]

14.dxe7 ♞xe7 15.♙g5 Anand needs to hurry with the break in the center, as if Black managed to create a blockade on d5, White could be worse.

15...h6

16.d5! ♞a5 [16...♞ad8 17.dxc6 ♞xd1 18.♞fxd1 ♙c8 19.♙xf6 ♞xf6 20.♞ac1 and from a practical point of view White has easier play thanks to his strong pawn on c6.]

17.♙xf6 [17.d6 17...♞d8 18.♙xf6 ♞xf6 19.♞e2 ♞fd8↪ The d-pawn could be weak here.]

17...♞xf6 18.dxe6 ♞xe6 [18...fxe6 19.♙xb7 ♞xb7 20.♞e2 ♞c5 This should be an easy draw despite the weak e6 pawn.]

19.♞e1

19...♞f6! is the best square for the queen because after Nd5 the b2 pawn will be hanging.

20.♞d5 ♙xd5 [20...♞xb2 leads to a draw by force: 21.♞e2 ♞a3 22.♞e3 ♞b2 23.♞e2 ♞a3 24.♞e3 with a move repetition or Black can play 24...♞c5 25.♞c1 ♞c4 26.♞f6+ (26.♞e7+ 26...♞h8 27.♞xc4 ♞xc4 28.♙xb7 ♞ad8↪) 26...gxf6 27.♞g4+ ♞g5 28.♞xc4 ♙xg2 29.♞xg2 ♞xg4 30.♞xg4+ ♞h7=]

21.♙xd5 [21.♞xd5 21...♞ad8 (21...♞xb2 22.♞xa8 ♞xa8 23.♙xa8+= and the two rooks can be stronger because of the potential weakness on f7.) 22.♞e5 ♞xe5 23.♞xe5 ♞d2↪]

21...♞ad8 22.♞f3 ♞xb2 [22...♞xf3 23.♙xf3 ♞d2 24.♞e2 ♞xe2 25.♙xe2+= and one of Fischer's and Kasparov's classical games proved that this kind of endgame is drawisch but Black must be careful as the bishop is always stronger with pawns on both sides, so in case the rooks will be exchanged Black should create a setup with the knight on c7 and the king on d6.]

23. ♖ad1

23... ♗f6! is the most solid move. The white pieces became very active so it is time to exchange queens and fix the draw, as other moves were already very risky. [23... ♖d7 24. ♗f5! ♖c7 (24... ♖fd8? 25. ♗xf7+--) 25. ♗e4 g6 26. ♗f4 ♖fc8 27. ♗xh6 ♗f6 28. h4↑]

24. ♗xf6 gxf6 25. ♖e7

25... ♗g7! The most accurate move, preventing the tactical Bf7 threat. [25... ♗c6 26. ♖c7 ♗e5 (26... ♗b4? 27. ♗xf7+) 27. ♖xa7 (27. f4 27... ♖d7!) 27... ♖d6 28. ♗b3 (28. f4 28... ♖fd8=) 28... ♖xd1+ 29. ♗xd1 ♖d8 30. ♗b3 ♖d7 31. ♖a8+ ♗g7 32. ♖b8 ♖d6 33. ♖b7+=]

26. ♖xa7 ♗c6 27. ♖b7 [27. ♖a4 was the last chance to keep the pawns on the queenside.]

27... ♗b4 28. ♗b3 ♖xd1+ 29. ♗xd1 ♗xa2 30. ♖xb6= ♗c3 Now the position is completely drawn.

31. ♗f3 f5 32. ♗g2 ♖d8 33. ♖c6 ♗e4 34. ♗xe4 fxe4 35. ♖c4 f5 36. g4 ♖d2 37. gxf5 e3 38. ♖e4 ♖xf2+ 39. ♗g3 ♖xf5 1/2-1/2

Endgame section

(15) **Morozevich, Alexander(2724)**
- **Aronian, Levon(2797)**

Petrosian memorial,
2014.11.05

GM Csaba Balogh
Best rating: 2672

Instead of a quick draw, the game becomes extremely interesting due to a terrible blunder by Morozevich...

47. ♖e3? A tactical oversight, which gives Black a sudden chance. [After the natural 47. ♜xb6 47... ♜b3 followed by Nd4 next, winning the b5 pawn and the game ends in a draw.]

47... ♜xe4! Of course, Aronian never spoils such a chance.

48. ♜f4+!? was played almost without thinking, trying to pretend that everything is under control. [48. ♖xe4? 48... f5+ wins.; 48. ♜xb6 48... ♜d6 49. f4 would have been a practical decision. White is a pawn down, but the limited material on the board should allow him to hold the draw relatively easily.]

48... ♖f5?! Aronian also takes a decision with less than a minute of thinking. This is a very strange mistake, because as

we will see, that pawn endgame would have been very tricky, while now it is just a draw... [The critical line is 48...exf4+ 49. ♖xe4

49...f3! Perhaps Aronian forgot about this option, trying to send the king to a passive position. The arising pawn endgame is a very good example to improve our calculating skills... (Probably Aronian only checked the possibility of quickly going towards the b5 pawn, but it leads to draw after 49... ♖d6 50. ♖f5 ♖c5 51. ♖g6 ♖xb5 52. ♖xh5 This is not the only way for White to play, but the most principled one. White does not waste time on capturing the f-pawns, since it is more important to advance the h-pawn as fast as possible. 52... ♖c4 53. ♖g4 The pawns are promoting at the same time.) 50. ♖f4! The only move, trying to keep the black king away from the opposition. (50. ♖xf3 loses easily after 50... ♖f5 and White is forced to let the black king in. 51. ♖g3 ♖e4 52. f3+ Otherwise Black goes Kf4 and collects the h4 or the f2 pawn. 52... ♖e3 53. ♖g2 f5 54. ♖g3 f4+ 55. ♖g2 ♖e2—+ wins.) 50... ♖d5 51. ♖f5! The only move! Taking on f3 costs too much time in the pawn race... (51. ♖xf3 51... ♖c5 52. ♖e4 ♖xb5 53. ♖f5 ♖c4 54. ♖xf6 b5—+ and Black is faster because the f6 king blocks the way...) 51... ♖c4

52.♔g6! The h5 pawn is more important than the one of f6. White needs to promote his h-pawn, therefore he should not waste time on any other things. (52.♔xf6? loses in view of 52...♔d3!! Black was very tricky in the last move, pretending to go for the b5 pawn, but actually the real target was the one on f2! (52...♔xb5 53.♔g6 ♔c6 54.♔xh5 b5 55.♔g4 b4 56.h5 is a draw.) 53.♔g5 ♔e2 54.♔xh5 ♔xf2 55.♔g4 ♔g2—+ and Black is faster.) 52...♔d3! 53.♔xh5 ♔e2 54.♔g6 (54.♔g4? was another way to lose the game on the spot: 54...♔xf2 55.h5 ♔e3 56.h6 f2 57.h7 f1=♔ 58.h8=♔ ♔f3+ 59.♔h4 ♔h1+—+) 54...♔xf2 55.h5 ♔e3 56.h6 f2 57.h7 f1=♔ 58.h8=♔ ♔xb5

59.♔xf6 We basically reach this position by force from the 48...exf4 line. This is a theoretical draw, but I must say that in a practical game Black's chances to win are decent! I don't wish to anyone to defend an endgame like this, because it is going to be 100 moves of torture.]

49.♔xh5 ♔d6 50.♔g3+ ♔e6 [50...♔g6 does not change much. 51.h5+ ♔h6 52.f4= trading all the pawns.]

51.h5 f5 52.f4 ♔c4+ [Black has no time to create a passed pawn with 52...e4 53.h6 ♔f6 54.h7 ♔g7 55.♔d4 55.Nxf5 also leads to draw, but this one is the most easy. 55...♔xh7 56.♔e5= and the f5 falls.]

53.♔e2 exf4 54.h6 ♔f6 55.h7 A draw was agreed as White takes on f5 next. 1/2-1/2

**(16) Gelfand, Boris(2759)
- Svidler, Peter(2743)**

Tal Memorial Blitz 2014(13.5),
2014.11.14

GM Arkadij Naiditsch
Best rating: 2737

We are in a blitz game, but anyhow this game clearly deserves attention, as already very soon we are going to see a funny endgame.

56...b4 Black is pushing his pawn, what else?!

57. ♖xh5 ♜c4! Great play with only a few seconds on the clock by Svidler. [57...♜c2 leads to a draw after 58.h4 b3 59.♖g6 ♜f8 60.♜e5 ♜b4 61.h5 ♜c3 62.♜xc3 ♜xc3 63.h6 b2 64.h7 b1=♚+ 65.♜g7]

58. ♜g6 White can't stop Black from playing Bd4.

58...♜d4?! [58...b3 59.♜b2 ♜d4 would be more exact to not give White the chance to play Bf8.]

59. ♜h6 [A more tricky try would have been 59.♜f8 and now Black needs to be careful. 59...♜c5 comes back to the winning plan of playing b3 first. (59...b3? leads to a draw after 60.♜a3 ♜c3 (60...♜b5 61.h4 ♜a4 62.♜c1 and Black can't chase the

white bishop from the diagonal a3-c1.) 61.h4 ♜c2 62.h5

62...♜c5 with the same idea as in the game, but just with an extra tempo for White. 63.♜xc5 b2 64.h6 b1=♚ 65.h7 with a draw.) 60.♜g7 b3 and Black is back on the winning track.]

59...b3 60. ♜c1 ♜d3 Black is going to take away all the square from the white bishop, which is needed to promote the b-pawn.

61.h4 ♜c2 62.♜a3

62...♜c5 The b-pawn is a queen, but the game is far from over.

63. ♜xc5 b2 64.h5 b1=♚ 65.h6 In case White managed to reach a position where the pawn is on h7 and the king on g7, even if he had to give up the bishop to reach it, it would be a draw.

65...♔c3+ A good move. Black needs to bring his king as close as possible to the h6 pawn.

66.♔g7 ♚b7+ 67.♔g6 ♚c6+ 68.♔g7 ♚c7+ The black queen is coming closer and closer with checks.

69.♔g8 [69.♔g6?? 69...♚xc5 70.h7 ♚f8--]

69...♚g3+ 70.♔f7 ♚f4+ 71.♔g6 ♚g4+

72.♔f6 is White's only chance. [72.♔f7 72...♚f5+ 73.♔g7 ♚g5+ 74.♔h7 ♚xc5 and Black is simply winning.]

72...♚h5?! is not the best. [72...♚g8 followed by Qh7 would win the game immediately, because all Black would need to do is to bring his king to e4.]

73.♚f8 ♔d4 74.♔g7 ♚g5+ 75.♔f7 Now that the h6 pawn is not hanging, White has the possibility of playing Kf7, threatening to play h7 next.

75...♚f5+ 76.♔g8 [76.♔g7 76...♔e5 would lead to the same position as in the game.]

76...♚e6+ 77.♔g7 ♔e5 The black king is in time to help the queen.

78.h7

78...♔f5! A nice move, as White can't queen the pawn now.

79.h8=♞! White takes his only chance and promotes to a knight. [79.h8=♚ 79...♚g6# What a beautiful mate! :)]

79...♚e5+ [79...♚d7+ 80.♔g8 ♔f6 would win faster.]

80.♔g8 This position is winning, but it is still a fight. White has a little chance to regroup the pieces into Bg7-Ne5, after which we would reach a theoretically drawn position, which is useful to know!

80...♔e6 81.♚g7 ♚b8+ 82.♔h7 ♚c8 83.♔h6 ♔f5 The black king is coming closer and closer.

84.♔h7 ♚e8 Now Black is trying to get White into zugzwang to make the g7 bishop move.

85.♔h6 ♔g4 86.♔h7 ♔g5 Black came as close as he could.

87.♚h6+ ♔f5 88.♚g7 So we have the same position as a few moves ago, except that it is Black to move.

88...♚h5+ 89.♔g8 ♔e6 This position is still not that easy to win, especially in a blitz game.

90. ♖f8

90... ♖h7! but finally Svidler makes Gelfand move the bishop from g7 and of course he doesn't let the knight from h8 into the game.

91. ♗a1 ♖a7 and the a1 bishop has no good squares. After 92. Bg7 the queen is mating on the 8th rank and if the bishop goes to any other square White is losing the bishop because of the check on b8 or c5. What a funny endgame! :) 0-1

Clash of the Titans

(17) Rubinstein, Akiba
- Tarrasch, Siegbert[D06]

Berlin Tageblatt+, 1928

GM Kamil Miton
Best rating: 2655

1.c4 c5 2. ♘f3 ♘f6 3.d4 cxd4 4. ♘xd4 d5 [4... ♘c6 5. ♘c3 e6 leads to the main positions.]

5.cxd5 ♘xd5

6.e4 White is taking the advantage in the center.

6... ♘f6 [6... ♘b4!? threatening Qxd4! 7. ♖a4+ (7. ♗e3 7... ♘8c6 8. ♗b5 ♗d7 9. ♘xc6 ♗xc6 10. ♗xc6+ ♘xc6 11. ♘c3 e6 and the position is equal because of the reduced material.) 7... ♘8c6 8. ♘xc6 ♘xc6 9. ♗e3+= and White keeps the possibility to develop the knight to d2.]

7. ♘c3 e5 [7...e6 8. ♘db5 a6 9. ♖xd8+ ♖xd8 10. ♘d4 ♗b4 11.f3 ♖e7 12. ♗d2 and White can be better because of a few factors: the bishop on b4 is not placed perfectly, the b6 square can be weak and White has more space.; 7...a6 8.e5 ♘d5 9.e6! ♗a

typical sacrifice idea to stop Black from developing his pieces so easily.]

8. ♖db5 [8... ♗b5+ 8... ♕d7 9. ♕xd7+ ♖bxd7 10. ♖f5 White can look for a some small plus thanks to the potentially weak d5 square.]

8... ♖xd1+ [8...a6 9. ♖xd8+ ♖xd8 10. ♖a3 b5 11. ♖c2 ♕e6! (11... ♕b7 12.f3! and the bishop on b7 is limited. 12... ♖bd7 13.a4! A typical idea to weaken the black queenside.; 11...b4 12. ♖a4 ♖xe4 13. ♕e3 with a huge initiative for White, when 0-0-0 and Bc4 can come next.) 12.f3 ♖bd7 13. ♕e3 ♕c5 followed by Ke7 with equal play.]

9. ♖xd1

9... ♖a6 The king on d1 has no meaning. Black was forced to put his knight on the inactive a6 square, which will be the reason of Tarrasch's loss, since now Rubinstein will demonstrate great technique.

10.f3 [10. ♕e3 10... ♖g4 11. ♕xa7 ♖xa7 12. ♖xa7 ♕d7 13. ♖e1 ♕c5 14. ♖ab5 ♖b4⇐]

10... ♕c5

11. ♖a4! ♕e7 12. ♕e3 The previous move allowed White to get a good diagonal for the bishop.

12... ♕d7 13. ♖c1 O-O

14.a3! preparing a a3-b4 setup, which will limit the black pieces even further.

14... ♖fd8 [14... ♖fc8 15. ♖xc8+ ♖xc8 16. ♕xa7±]

15. ♖e1 ♖e8! A logical move. Black is going to exchange the inactive knight for his strong opponent on b5.

16. ♕e2 ♖d6 17. ♖ac3 ♖xb5 18. ♖xb5 b6 [18... ♖dc8 19. ♖f2 (19. ♖xc8+ 19... ♖xc8 20. ♖xa7 ♖c2 21.b4 ♖a2⇐) 19... ♖c5 20. ♖hd1 with the idea to play Nd6 or Rd5 and Black will be

forced to exchange one of the bishops for the knight and defend a worse endgame.]

19.b4! ♟e6 20.♟f2 ♞d7 21.♞hd1! A strong move which stops the rook from a8 from activation.

21...♞xd1 22.♞xd1 ♟f8

23.g3! The white pieces are placed on optimal positions, so now is the time to improve the position by getting more space or creating some additional weaknesses.

23...♟e8 24.f4 f6 25.fxe5 [25.♟c1]

25...fxe5 White created a weak pawn on e5.

26.♟c1! preparing to put pressure against the e5 pawn.

26...♟c8? [26...♟f8! was not an easy move to make, but the last chance to hold the position. 27.♟b2 ♟f6 and White has

no check on d6 since the king is on f8 now. 28.♞d6 (28.♞c7 28...♟e7 29.♞c6 ♟d7 30.♞d6+ ♟e7=) 28...♞c7 29.♞c4 ♟xc4 30.♟xc4 ♟e7 White is better thanks to the bishop pair, but the black pieces are well coordinated.]

27.♟b2 ♟f6 28.♞d6+ ♟e7 29.♞c4 White didn't fall into the trap. [29.♞xc8+? 29...♞xc8 30.♟xa6 ♞c2+=]

29...♟e6

30.♞xe5! +— The decisive blow!

30...♞c7 [30...♟xe5 31.♟c4+ ♟f6 32.♞d6+ ♟e7 33.♟xe5+—]

31.♟c4+ White is easily winning now.

31...♟e7 32.♞c6+ ♟f8 33.♟xf6 gxf6 34.♞d8+ ♞e8 35.b5 ♟b7 36.♞d7 ♟xc6 37.bxc6 1-0

Editorial Preface

Carlsen is only 2 games away from retaining his chess crown! This is not a surprise, but if we look at the games the match is everything but clear. Carlsen looks surprisingly tired, doesn't play very accurately in the openings and even blunders tactical blows.

Anand, who is extremely well prepared as usual, is just not taking his chances, which is a huge pity both for him and his team.

So the situation seems to be very critical for Anand, as with only 2 games to go and only one with the white pieces, the Indian will probably have to go "all in" in the last game of the match. The current score is 5.5-4.5 and in 4 days from now we will see whether Carlsen managed to successfully defend his chess crown.

In the current issue we bring you full coverage on the match by commenting all its games.

In one of the strongest ever Ukrainian Championship there are 3 leaders before the final 11th round and these are Kuzubov, Eljanov and Ponomariov. We are going to see a very interesting ultimate round.

This week there is also the match between Aronian and Nakamura in Saint Louis. There will be 3 different time controls: classical, rapid and blitz. This will definitely be a very exciting event to follow.

That's all for now and in the next issue we will already know the name of the new World Champion!

Arkadij Naiditsch & Csaba Balogh

We are happy to announce, that Chess Evolution will cooperate with Hungarian Chess Federation in the prestigious event of World Chess Olympiad U-16. Chess Evolution will also devote two issues from our newsletter to share with you the best games, the most interesting moments and the nicest combinations played by the young stars.

FIDE Youth Chess Olympiad Hosted by Hungary Already Breaks Records

Only four months after the Chess Olympiad in Tromsø where the greatest chess players of the world competed against each other it is already time to have a look at the best talents of the next generation. In December this year Hungary may organize a Chess Olympiad for the first time, the competition for youth aged under 16 years. The event takes place in the city of Győr and with more than a month to the start the organizers have already confirmed the entries of more participant nations than ever before at any Youth Chess Olympiad. It really seems that the best chess talents of all five continents will be present in Hungary between 12th-22nd December. Awarding the right of organization to Hungary is a clear sign of high international recognition of chess life in the country which is rightly confirmed by the fact that Judit Polgar who has been leading the FIDE world rankings for more than 25 years has agreed to be the face of the event representing talent and the Hungarian chess traditions all in one person or we could even say legend. By mentioning Judit Polgar let us not forget that after FIDE tightened on a rule that had existed earlier participation of girls are now guaranteed. In each team a maximum four of the five team members can be a boy.

The promo video of the Youth Chess Olympiad 2014 features Judit Polgar, Csaba Balogh, Olympic Silver medalist, Benjamin Gledura who was European Champion of his age group and Kata Karacsonyi who was the first to follow in the footsteps of Judit Polgar to win the National Championship topping all boys in their age groups.

You can see the video by clicking on this link:

You can find more information about the FIDE U-16 World Youth Chess Olympiad 2014 on the official website of the event:

5 best games of the past week

(1) Anand, Viswanathan(2792)
- Carlsen, Magnus(2863) [D97]

WCh 2014(10),
2014.11.21

GM Arkadij Naiditsch
Best rating: 2737

There are only 3 more games to go and Anand gets the white pieces twice. Does he need to push and take some risks or maybe keep it for the final game?! It is hard to choose the right strategy when you are playing Magnus Carlsen who seems to be almost impossible to beat. After the opening Black's position seemed to be solid, but something quickly went wrong and Anand clearly had his chances to put Carlsen under pressure, but maybe because of tiredness or maybe a lack of self-confidence Anand quickly let his advantage slip away.

1.d4 Anand of course continues playing 1.d4 because Carlsen did actually not manage to show such a strong preparation here and Anand had some good winning chances.

1...♘f6 2.c4 g6 Carlsen is back to the Gruenfeld after playing a few games in the Queen's Gambit. To me this seems to be the right choice because it seemed from the games that Anand was very well prepared in the QG with a lot of new ideas.

3.♘c3 d5 4.♘f3 ♙g7 5.♚b3 Anand is going for a different line than in the 1st game of the match where he tried to surprise Carlsen with an interesting idea in the Bd2 line.

5...dxc4 6.♚xc4 O-O The Gruenfeld is one of the most analysed openings and especially by Anand's team, who had

the same job already in the match with Gelfand who played ONLY the Gruenfeld defense.

7.e4

7...♞a6 This is one of the main lines of theory. Sometimes the Gruenfeld is not that easy to understand, it seems like White has the center, more space, but Black's aggressive play which usually starts immediately against the d4-e4 pawns and the strong bishop on g7 makes the opening one of the most solid and most played on the top level.

8.♙e2 c5 9.d5 Moves like .dxc5 don't usually bring any advantage in the Gruenfeld. The c5 pawn is going to fall and Black will get a great position.

9...e6 This is of course all theory but anyhow we see a good example on how to play against strong central pawns and this is to break them!

10.O-O White has no better options in the position.

10...exd5 11.exd5 ♖e8 So now the situation has changed a lot. White has a passed d5 pawn but of course the pawn is not dangerous at the moment. Carlsen's main problem is the knight on a6 which stands very passively. White usually wants to put the rook on d1 as quickly as possible and then push the d-pawn as far as it goes.

12. ♖g5 The bishop has to be developed and of course it is hard to understand why there is a need to provoke Black into playing h6, but already in couple of moves we will see why Anand played first 12.Bg5 and not Be3.

12...h6 Black has to get out of the pin, White just wanted to play Qh4

13. ♖e3 ♖f5 A very usual way of playing and still theory. Black wants to play Ne4 to make the g7 bishop strong and to get some play in the center.

14. ♖ad1 ♖e4 is a very logical move, but maybe now White reaches a better endgame almost by force. [14...♖b6 looks interesting to me as well, attacking the b2 pawn and just preparing to play Rad8 or maybe Qb4. The exchange of queens should be good for Black.]

15. ♖xe4 White can't let Black play Nd6.

15...♖xe4 [To take with the rook doesn't make much sense: 15...♖xe4 16. ♖c1 and the rook on e4 can easily get attacked.]

16. ♖c1! A very strong move and White's key idea is coming true with 12.Bg5 and provoking Black into playing h6. Now the h6 pawn is hanging and at the same time White maybe wants to play Bb5 or just to push d6.

16...♖f6 A very solid move. [16...♖b6 would probably lead

to about the same position as in the game. 17.d6 (17. ♖xh6 17...♖xb2 and we are back to the position of the game.) 17...♖xb2 and here as well White's initiative looks dangerous, but in fact I think Black is perfectly fine.]

17. ♖xh6 An important pawn has been taken, so now the white bishop can support the d-pawn from the g5 square.

17...♖xb2 Black needs to win the pawn back.

18. ♖xb2 ♖xb2 I think we reached a critical position of the game now. Things are looking very dangerous for Black as the d-pawn could become the match winner, but on the other hand, if there is nothing concrete, Black will slowly get things under control and then the position will be nothing but equal.

19. ♖g5! A very nice try by Anand! [19. ♖b5 is of course a bad move, since after 19...♖ed8 Black is doing great.; 19.d6 This tempting-looking move doesn't seem to bring any advantage because of 19...♖b4! (19...♖c6 20. ♖c4 and White is better.) 20. ♖c4 (20. ♖g5 20...♖d5! Black's position is very dangerous, but it all seems to work out. 21. ♖b5 (21. ♖xd5 22. ♖c4 ♖e5) 21...♖ed8 and Black is even better.) 20...♖xf3 21.gxf3 ♖d4 and Black has nothing to be worried about thanks to his solid bishop on d4.]

19...♖d4! Another very good move. At first sight nobody

would like to give up the e4 bishop, but there is nothing better to do and the d4 bishop will compensate quite a lot. [19...♗xg2? 20.♗xa6! ♗xf1 21.♗xf1 and White has two pieces for the rook.; Another solid looking option could be 19...♗f5 but now the d-pawn is already becoming very dangerous. 20.♗b5 ♖ed8 21.d6 ♜b4 Black is trying to bring back the pieces into the game. 22.♖fe1! with the threat of playing Re7 next and I would not like to be Black here...]

20.♗xe4? A very strange move and I think clearly not the best one from a practical point of view. White had a much stronger looking option and Anand definitely needed to fight for the win, so why not keep things a bit more complicated?! [Why not just win an exchange by playing 20.♗b5! 20...♗xd5 is the only way to go on. (Very bad for Black is 20...♖e5 21.♖fe1!) 21.♗xe8 ♖xe8 22.♖fe1 White is an exchange up, but of course Black's bishop pair is very powerful and gives some compensation, but why should this position be equal?! I see no reasons for that. I think White's chances should be clearly better here, especially since the black king could be in danger as well. So now the next question is, why did Anand not do it?! Was he too afraid that the c-pawn would actually give Black great play or that he could even lose the game here?! In any case, I think White should have gone for this position according to the tournament situation where a win was badly

needed!]

20...♖xe4 21.♗f3 White is still a bit better, but the bishop on d4 holds things together.

21...♖e7 All Black needs to do is to get the a6 knight into the game to equalize.

22.d6 ♖d7 23.♗f4 White is still better, but the advantage got smaller. Still Black needs to be very careful with the d6 pawn.

23...♜b4 Black is attacking the a2 pawn and even maybe wants to play Nc6.

24.♖d2?! I think that after this move the position is just equal. [White should have tried to get the control over the e-file: 24.a3 24...♜c6 25.♖fe1 ♖ad8 Black wants to take on d6. 26.♖b1! (After 26.♗g4? 26...♖xd6 27.♗xd6 ♖xd6 Black is an exchange down but thanks to his great bishop on d4 he should have no trouble holding things together.)]

24...♖e8! Of course! The e-file is under Black's control, which is very important.

25.♖c1 ♖e6 Black is preparing the Be5 move next and White can't to anything about it.

26.h4 with the idea of playing h5 next, but it all just comes too late to bring any real winning chances.

26...♙e5! The last exact calculation by Black!

27. ♙xe5 ♖xe5 Black wants to play Nc6-Nd4 next.

28. ♙xb7 White doesn't have anything better.

28...♖xb7 29.d7 ♘c6 30.d8=♔+ [30.f4 also leads to a draw: 30...♖h5 (30...♖f5 is also possible, but it is a move for people with strong nerves! :) 31.g4 ♖xf4 32.♖xc5 ♖xg4+ 33.♙f2 and Black holds the position thanks to the only move 33...♖bb4! which is a draw because of Rbf4 next.) 31.g4

31...♖h8! 32.d8=♔+ (We can see why Rh8 was needed in the following line: 32.♖xc5 32...♘d8 33.♖c8 ♙g7 protecting the d8 knight.) 32...♘xd8 33.♖xd8+ ♙g7 34.♖xh8 ♙xh8 with a totally drawn position.]

30...♘xd8 31.♖xd8+ ♙g7

32.♖d2 and of course this rook endgame is a dead draw. A sad outcome of the game for Anand, who in my opinion missed a few chances to put Carlsen under pressure and again we could see that Carlsen did not manage to equalize completely out of the opening. All in all a very important draw for Carlsen, who is now only 2 games away from remain the Chess King. **1/2-1/2**

(2) Carlsen, Magnus(2863) - Anand, Viswanathan(2792) [C67]

WCh 2014(9),
2014.11.20

GM Arkadij Naiditsch
Best rating: 2737

There are just 4 games to go until the end of the match and with 4 draws Carlsen would protect his WCC title thanks to his 1-point lead. Both players are clearly a bit tired, but usually we see Carlsen in very good physical condition and playing every game until the end. What we are going to see in the current game is the opposite. Clearly Carlsen decided to just take a "rest day" and focus on defending with the black pieces in the next game. We will see a short and very boring draw, but an important one for the theory of the Berlin. Anand seems to close one of the lines here.

1.e4 e5 No more Sicilian s and actually why not?! Anand needs to fight in each game and look for chances, but it seems like his strategy is to make a comeback with the white pieces.

2.f3 c6 3.b5 f6 4.O-O Carlsen continues trying to break the Berlin endgame.

4...xe4 5.d4 d6 6.xc6 dxc6 7.dxe5 f5 8.xd8+ xd8 9.h3 e8 10.c3 h5 This is the main line for Black. It counts as very solid, but the disadvantage of the move h5 is that Black can almost never be better now. The g5 square is very important.

11.e2 This is a new try in comparison to game 7, where Carlsen continued with 11.Bf4, which is the main line, and managed to get some winning chances after 30 moves of theory. But being aware that Anand's team very likely managed to find a clear equalization, Carlsen is switching to a sideline.

11...b6! In my opinion this move is "closing" the 11.Ne2 line. As we will see in the game, White is going to make the most natural moves and just doesn't get anything better than a draw.

12.d1 White doesn't need to hurry with Nf4 because actually the knight's position is not that great, so Black can easily play for the Be7-g5 idea.

12...a6 Another very good move! Black is ready to lose a tempo to force White to play Nf4.

13.f4 is the most logical. Of course a move like 13.Ned4 is not really an option because with the exchange of one pair of knights in the Berlin Black is usually doing fine.

13...♖b7! This is yet another very important move in Anand's preparation. Black wants to push c5 next and White basically has only one logical option and that is to play

14.e6 I don't see any other logical continuation for White.

14...♗d6! and this is the last important move which Anand definitely knew was equalizing completely. The game is basically over...

15.exf7+ again White didn't really have a choice. [After 15.♘g5 15...fxe6 16.♗fxe6 ♔d7 Black would already be the one fighting for an advantage.]

15...♔xf7 16.♘g5+ White needs to act quickly, as in case Black managed to get the rooks into the game, the bishop pair would dominate the game in the long term.

16...♔f6 The most simple. Of course 16...Kg8 could be an option as well, but then the rook would be very poorly placed on h8.

17.♘e4+ And Carlsen starts to repeat the moves, which is a very normal decision. White didn't manage to get anything out of opening and with only 3 more games to go Carlsen keeps a comfortable advantage of one point!

17...♔f7

18.♘g5+ ♔f6 Of course Black can't avoid the repetition either...

19.♘e4+ ♔f7 20.♘g5+ and the score is 5-4 for Carlsen. **1/2-1/2**

**(3) Carlsen, Magnus(2863)
- Anand, Viswanathan(2792) [B41]**WCh 2014(6),
2014.11.15GM Arkadij Naiditsch
Best rating: 2737

We often hear people say that World Champions never blunder. In fact, World Champions blunder very rarely and even more rarely a one-move tactic. And what is even more rare is that after a blunder the opponent doesn't use the mistake and exactly this is the case in the current game. How to explain such a moment? There have been many suggestions, but I just believe that Magnus Carlsen was just very very lucky! A very emotional game is awaiting us and maybe a game that decided the outcome of the match...

1.e4 Carlsen continues playing 1.e4 because of his fantastic score against the Berlin, which is Anand's main opening.

1...c5 2.♘f3 e6 And again we see 2...e6. We can also see a big change in the match strategy of Anand, who is now looking for complicated fighting positions rather than trying to hold a solid draw with Black.

3.d4 cxd4 4.♘xd4 a6 This probably came as a surprise- or maybe not. The Paulsen is a very rare opening on the very top level, but it is a fighting opening and often leads to unclear positions.

5.c4 5.Nc3 or 5.Bd3 are more common moves and also the ones usually played by Carlsen.

5...♘f6 6.♘c3 ♘b4 Black is starting a quick attack against White's center.

7.♙d3 is again not the main move, but I believe it deserves a lot of attention. The endgame which we will reach already in a couple of moves is far from being an easy draw.

7...♘c6 From a practical point of view this is a strange decision by Anand. From the first moves it seemed like Black was going for a fight and then with 7...Nc6 he entered a slightly worse endgame. How to understand that?! [7...♙c7 and; 7...d5 are the other 2 major possibilities here, which lead to pretty unclear positions.]

8.♘xc6 For the next moves things are getting forced.

8...dxc6 [In case of 8...bxc6 White has two nice-looking options: 9.a3 (After 9.e5 9...♘g4 10.f4 White's position also looks better.) 9...♙xc3+ 10.♙xc3 and the bishop pair should give White a comfortable advantage.]

9.♙xd8+ ♙xd8 10.e5! A very important move. If Black was in time to play e5 himself, White's position could never be better.

10...♘d7 The only move. [10...♘e4?! 11.a3! It is very important for White to get the black dark squared bishop. 11...♙xc3+ (11...♙a5 12.b4 and White is doing great.) 12.bxc3 ♘xc3 and here comes the crusher:

13.a4! preventing Black from playing Na4, so now the knight on c3 is almost trapped and needs to come back. 13...♘e4 14.♙e3 and once again the knight is in trouble. White is just a pawn down but has fantastic play.]

11.♙f4 Of course not 11.f4 which would fix the structure even further and make the c1 bishop as good as dead.

11...♙xc3+ This move is also almost forced. White wanted to play Kd2 next followed by a3.

12.bxc3 So now it is time to take a fresh look at the position. White has the bishop pair, more space and the better development, but a horrible pawn structure on the queenside. But is it enough to make the position equal?! I don't think so. I believe that White is seriously better here, it is a long-term advantage and soon we will see how unpleasant it is to play this position with Black.

12...♔c7 The king is better placed on c7 than on e7, to protect the b-pawn at some point and to support the play on the queenside.

13.h4! A typical and very strong move! White gains more space and he has the idea of playing Rh3-Rg3 to try and create some play on the kingside- and that is where the action will start already very soon.

13...b6 Black is developing the bishop from c8, which is a must.

14.h5 threatening h6.

14...h6 15.O-O-O ♙b7 So the pieces have been developed and now it is time for White to think what to do. next

16.♖d3!? is a very interesting way of playing this position. More standard moves could be g4 and Rg1, trying to play g5 next, or maybe Rh3 and Rg3, but Carlsen's idea is deeper. Black's idea could be to play c5, Rad8 and Nb8 and then White would have the choice of exchanging the rook or let Black control the d-file.

16...c5 17.♖g3 The g7 pawn is a target!

17...♖ag8 Black has no choice as after 17... Rhg8, 18.Bd3 and Bh7 would have come next.

18.♙d3 ♘f8 Black is preparing to play g6 next.

19.♙e3 A prophylactic move against g6.

19...g6 It is hard for me to believe that to open the h-file can be good for Black. [Maybe Black could have chosen a more passive strategy with 19...♘d7!? when the e5 pawn is under attack and White needs to either to go back to f4 with the bishop and try to find something better on Nf8 than Be3, or maybe to play 20.f4 but now the e3 bishop became a much weaker piece. 20...f5!? could be a try for Black to fight for equalization, but of course only White is trying to play for a win here.]

20.hxg6 ♗xg6

21.♖h5 [21.♖xh6? doesn't work for the moment as after 21...♗xe5 22.♙f4 ♖d6 Black equalizes.]

21...♙c6 Maybe Black wants to play Ba4 and Rd8, targeting the d1 square.

22.♙c2 ♖b7 A waiting move and also leaving the pin in case Black could take the e5 pawn at some point.

23.♖g4 This move is hard to understand. Does Carlsen think the rook is better placed on g4 than g3?! I don't know... Black never threatens to attack the c4 pawn and White's idea of playing g3 at some moment is just impossible because of Bf3. But of course White doesn't do any harm to his position, since

all Black can do is just keep on waiting.

23...a5 24.♙d1 with the idea of playing g3?! I don't know...

24...♖d8 25.♙c2 ♖dg8 After repeating g moves twice, Carlsen starts the usual idea of getting his king to a more central position, but the way he starts it is everything but accurate...

26.♙d2?? What a shock for the people in the playing hall. The World Champion is blundering 2 pawns in a 2-moves tactic! Can you imagine what would have happened if in this moment somebody screamed "Nxe5"?! [26.♙d1 with the same idea, but not allowing the Nxe5 blow, was maybe Carlsen's intention.]

26...a4?? After only one minute of thinking, Anand doesn't play it! I guess this might have been the longest 60 seconds of Carlsen's life and had Anand played 26...Nxe5 he would probably have been a clear favourite to win the match... [The crushing move was of course 26...♗xe5! 27.♖xg8 ♗xc4+ 28.♙d3 and now comes the move that Anand might have blundered?! We will never know, but for me it is very hard to believe that it is possible to miss it in the calculations...

28...b2+! 29.Ke2 Rxf8 and Black's position just looks totally winning.]

27.Ke2 What a relief for Carlsen, the game goes on and White keeps his big advantage!

27...a3 fixing the a2 pawn of White in deeper endgame

28.f3 A solid and good move. White still doesn't threaten anything concrete but he keeps on improving the position.

28...Rd8 allowing Bxg6 in the hope of getting some play on the d-file and the a3 pawn could also become strong at some moment.

29.Ke1 There is no reason for White to give Black any play. [29.fxg6 would not be the best in my opinion. 29...fxg6 30.Rxg6 a4! Black wants to play Bc2-Bd3 and get the c4 pawn. White should still be much better here, but the game would get more dynamic and Black would have some practical chances.]

29...Rd7 Anand resigns himself to passive defense. Actually I think he quits too early. Of course it is very unpleasant to defend just by moving the king, but it would not be that easy for White to break through either. I think 29... Rdg8 back would have been a better practical choice for Black.

30.fxc1 Another cool move by Carlsen. To keep the a3 pawn under attack could be useful.

30...Ra8 Anand is trying to look for complications as he is planning to play Ba4.

31.Ke2 It seems like the moves 29.Ke1 or 31. Ke2 are just senseless, but they are not. White got what he wanted, Black's kingside is crushed and the only thing that is needed now is to take the material in an accurate way.

31...a4

32.fxe4+ Of course before taking on g6 White forces the black bishop back to c6.

32...fxc6 [32...Ka7 33.fxa8 Kxa8 34.fxa3 and I see no compensation for Black.]

33.fxg6 White is starting to collect the pawns.

33...fxg6 34.Rxg6 White is a pawn up and the e6 and h6 pawns are hanging. The game is over.

34...a4 35.Rxe6 Rd1

36. ♖xa3 White keeps on collecting the pawns.

36... ♖a1 37. ♖e3 is the most safe.

37... ♖c2 38. ♖e7+ and now the black king is even the one who is in danger. What a game! If it wasn't for this terrible blunder it would have been an accurate and very nice win by Carlsen, perfectly fitting his style, but how to explain a 2 moves blunder like 26. Kd2?? Maybe the World Champion is feeling somewhat immortal, but already game 3 showed this is not the case... In the next game it is clear that it is going to be very hard for Anand to recover and of course his team is going to very depressed after holding their breath for 60 seconds and just screaming after Anand did not play Nxe5. It is also hard to imagine that Carlsen is not going to keep his WCC crown now, but we will know more in about 10 days from now! **1-0**

(4) Carlsen, Magnus(2863) - Anand, Viswanathan(2792) [C67]

WCh 2014(7),
2014.11.17

GM Csaba Balogh
Best rating: 2672

An amazing 122-moves fight, which was almost a record beater in the history of the World Championship matches.

1.e4 e5 Anand comes back to 1...e5 after two Sicilian games in rounds 4 and 6.

2. ♖f3 ♖c6 3. ♖b5 ♖f6 Just as in the 2nd game of the match, Anand plays the Berlin defense, but this time Carlsen decides to go for the endgame...

4. O-O ♖xe4 5. d4 ♖d6 6. ♖xc6 dxc6 7. dxe5 ♖f5 8. ♖xd8+ ♖xd8 9. h3 Carlsen himself usually plays the 9...Bd7 setup as black.

9... ♖e8 10. ♖c3 h5 This is considered to be the most solid setup, played frequently by Kramnik, Karjakin, Aronian and other top players. White also has a very wide choice here, Carlsen follows the latest development of this line and copies the game Giri-Radjabov, Tashkent, played just a few weeks ago. **11. ♖f4 ♖e7 12. ♖ad1 ♖e6**

13.♖g5 White would like to grab one of the bishops. Usually giving up the dark squared bishop for one of the knights solves the opening problems, but here Black would face difficulties because he cannot send away the strong bishop from g5, which controls the d8 square. White would double his rooks on the d-file, creating serious problems.

13...♖h6 14.g3 A common move in the Berlin structure. White prevents h4, after which it is much harder to make progress on the queenside with f3-g4.

14...♗xg5! 15.♗xg5 ♖g6 The difference to the capture on g5 on the 13th move is that White cannot keep his bishop on g5.

16.h4 A pawn sacrifice which is necessary to keep the initiative. [Many games finished with a draw after 16.♗f4 16...♖h4! The h3 pawn is hanging and the only way to save it allows perpetual check: 17.♔h2 ♖f3+ 18.♔g2 ♖h4+ 19.♔h2 ♖f3+=]

16...f6! 17.exf6 gxf6 18.♗f4 ♖xh4 19.f3! Otherwise Bh3 followed by Nf3 was threatening to win an exchange. White had to take the f3 square under control.

19...♖d8 Finally the rook comes into the game.

20.♔f2 ♖xd1 21.♖xd1 [21.♖xd1?! runs into 21...♖xf3! 22.♔xf3 ♗g4+ 23.♔e4 ♗xd1 24.♖xd1 ♖g7 and only Black can be better with the 2 pawns and the rook against the minor pieces.]

21...♖f5 22.♖h1 ♗xa2 We are still following a dozen of games.

23.♖xh5 [23.b3 does not trap the bishop because of the misplacement of the d1 knight. Black has 23...♗b1!]

23...♗e6

24.g4! This was basically, Giri's improvement a few weeks ago. [In the previous games White played 24.♗xc7 which restored the material balance, but allowed the trade of the rooks. 24...♖h6! 25.♖xh6 ♖xh6 and the opposite colored bishop endgame is drawish.]

24...♖d6 [An alternative is 24...♖d4 but it fails to equalize after the strong reply 25.♖e3 ♖g7 The white rook should not be allowed to occupy the 7th rank. 26.♖h8+ ♔d7 27.g5! using the tactical point that fxc7 drops a piece after Be5!]

25.♖h7 ♖f7 [The Giri-Radjabov game continued with 25...f5 26.g5 ♖f7 27.♖h5 ♖g8 28.♔g3 ♖h8 29.♖xh8+ ♖xh8 30.♗xc7 ♖g6 White had some advantage because of the protected passed pawn on g5, but Black built up a successful blockade and held the draw rather comfortably. Probably Carlsen prepared some improvement somewhere before.]

26.♖e3! The next three moves were played instantly by Carlsen, showing that he is still in his preparation, while Anand just started to spend his time. Black is a pawn up, but the c7 is very weak and all the white pieces are excellently placed, while the black ones are rather passive, especially the rook on g6. [26.♗xc7 would have again allowed the simplification 26...♖h6! as 27.♖g7? loses to 27...♔f8 as the

rook is trapped.]

26...♔d8 Anand tries to protect all his pawns. [I tried another defense with 26...♖g8 27.♙xc7 ♖h8 with the idea to exchange the bad rook, but White is able to save it with a very nice tactical motif: 28.♖g7! ♔f8 29.♖g6 ♖h6 30.♙d6+! ♔e8 31.♖g8+= ensuring a small advantage.]

27.♘f5 Further paralyzing the black pieces. The knight cannot be taken as after gxf5 Black loses a piece.

27...c5 A logical answer. Black is not facing any direct threat yet, therefore he advances his queenside, where he has two extra pawns.

28.♘g3! Still without thinking. Quite an impressive preparation by Carlsen's Team! The threat is Ne4 or Nh4, followed by Bg3-h4, pressing the f6 pawn. Black cannot really move with his pieces, it is difficult to organize a defense.

28...♘e5 Anand would like to transfer his knight to d7 from where it protects the f6 weakness and still closes the 7th rank. Rh8 is met by Rg8 and if the knight reaches the d7 square, we could say Black has created a safe blockading position. However, there is a critical line, which leads the game to an unusual endgame by force.

29.♖h8+! [29.♘e4 29...♘d7 and Black holds.]

29...♖g8 [29...♔d7 is met by 30.♘e4! as Nd7 is no longer possible. The f6 and the c5 pawns are hanging.]

30.♙xe5! A small tactical motif, the rook cannot be taken.

30...fxe5 31.♖h5

31...♙xg4! The best practical chance! If White could have taken on e5, the connected passers would have become unstoppable. [An illustrative line is 31...♔d7 32.♖xe5 b6 33.♘e4± followed by Kg3 and White is ready to advance his pawns, while the black ones are perfectly controlled by the active rook and the knight.]

32.fxg4 ♖xg4 33.♖xe5 What can we say about this endgame? To be honest, I personally thought that White was going to win, not necessarily because the position is won, but because defending such an endgame against Carlsen is almost impossible. Carlsen admitted at the press conference that he initially thought his position was winning, but Anand's perfect defense seems to prove that it is holdable.

33...b6 [It would be a huge achievement for Black if he could trade a pair of pawns. To hold 3 against 1 should already

be a very easy task. Unfortunately 33...♖b4 34.b3 c4? runs into 35.♙e4! b5 36.♙e3 a5 Black is ready to take on b3, but 37.bxc4! bxc4 38.♘e2+— Despite the success of trading a pawn, Black is easily lost as he destroyed his own pawn structure. White puts his knight on c3.]

34.♘e4 ♖h4 35.♙e2 White brings his king towards the queenside to ensure the safety of his pawns.

35...♙h6 36.b3 ♙d7 37.♙d2 ♙c6

38.♘c3 In the long term the winning plan would be to install the knight to d5, followed by attacking the c7 pawn with the rook. Carlsen uses the advised method for executing his plan. He has all the time to do something, therefore he does not hurry with anything, but rather moves around with his pieces, making his opponent more exhausted for when the critical moment will be reached. In general, this is advisable also to gain some time with the 30 seconds increments after each move or to get closer to the time control. In this game, Carlsen did not need any of them, he just wanted to make Anand more tired...

38...a6 39.♙e4 ♖h2+ 40.♙c1 ♖h1+ 41.♙b2 ♖h6 42.♘d1 ♖g6 43.♘e3 ♖h6 44.♙e7 ♖h2 45.♙e6+ ♙b7 46.♙c3 ♖h4 47.♙b2 ♖h2 48.♘d5 ♖d2! is an important resource to send away the knight from its ideal place. White should play c4 now

and then Re7 wins inevitably, but of course it does not work now.

49.♘f6 ♖f2 50.♙c3 ♖f4 Intending to answer with Rd4 on Nd5. White just creates small threats, but it still forced Black to stay fully concentrated, which of course drains his energy.

51.♘e4 ♖h4 52.♘f2 ♖h2 53.♙f6 ♖h7 54.♘d3 ♖h3 55.♙d2 ♖h2+ 56.♙f2 An interesting moment! White offers the trade of rooks. Should Black accept it or not?

56...♖h4! Anand correctly keeps the rooks on the board! [Let's examine the endgame after 56...♖xf2+? 57.♘xf2 ♙c6 58.♙d3 ♙d5 I believe that White should win relatively easily with the following technique: 59.c4+ ♙e5 60.♘e4 ♙f5 61.♘c3 ♙e5 (61...c6 62.♘a4+—) 62.♘d5 ♙d6 63.♙e4 Step by step squeezing back the black king... 63...b5 (63...♙d7 64.♙e5 will lead to the same result...) 64.♘c3 c6 (64...♙c6 65.♙e5 ♙b6 66.♙d5+—) 65.♙f5 a5 Black can trade only one pawn, the other one will stay on the board and will win the game. 66.♙f6 ♙d7 67.♙e5+—]

57.c4 Carlsen finally decides to make progress. He works out the d5 square for his knight.

57...♖h3 58.♙c2 ♖h7 59.♘b2 ♖h5 60.♙e2 ♖g5 61.♘d1 Anand finds a very clever defensive setup against the threatening Nc3-d5 and Re7!

61...b5! 62.♘c3

62...c6! Black takes his defensive line a rank forward. It is very important that the black rook protects the c5 weakness along the 5th rank.

63.♘e4 ♖h5 64.♘f6 ♗g5 65.♖e7+ ♔b6 66.♘d7+ ♔a5 We can see the point of Black's defense. The c5 pawn is protected, while the black king is ready to gain counterplay by going to b4! Carlsen finds the most challenging continuation again.

67.♖e4! Stopping Kb4 with cxb5 check!

67...♖g2+ 68.♔c1 ♖g1+ 69.♔d2 ♖g2+! After pushing c4, the king got exposed, so Anand lures it away from the pawns by giving checks.

70.♔e1

70...bxc4! Perfect timing! This move is only good if it forces a draw, but it does now.

71.♖xc4 [White has no winning chance after 71.bxc4 71...♔b4 72.♘e5 ♔c3 73.♘c6 ♖a2 followed by advancing the a-pawn. Protecting the c4 pawn engages the white pieces, he cannot make progress...]

71...♖g3 72.♘xc5 ♔b5! Black is threatening with Rxb3 and the c4 rook is hanging.

73.♖c2 a5 All white pieces are stuck. All pieces are defending one another, only the king can move, but it also cannot head toward the b-pawn, because after Kd1 or Kd2 Black trades the rooks and the c5 falls.

74.♔f2 ♖h3 75.♖c1 White is ready to approach the queenside now as the trade of rooks is not a worry anymore.

75...♔b4 76.♔e2 ♖c3! Not the only, but the most forcing way to draw.

77.♘d3+ Giving up the pawn is equal to a draw offer... [The critical line was 77.♖xc3 77...♔xc3 78.♔e3 ♔b4 79.♔d4

79...♔b5!! This idea had to be foreseen before offering the rook exchange. Only the knight can move, but it most control the b4 square and 80.♘d3 runs into 80...a4 81.b4 a3 82.♔c3 a2 83.♔b2 ♔c4= winning the b-pawn!]

77...♖xb3 78.♞a1 ♖c4 The rest is easy. Carlsen plays on to make his opponent tired for the forthcoming games...

79.♜f2 ♖b5 80.♞b1+ ♖c4 81.♜e4 ♞a3 82.♜d2+ ♖d5 83.♞h1 a4 84.♞h5+ ♖d4 85.♞h4+ ♖c5 86.♖d1 ♖b5 87.♖c2 ♞g3 88.♜e4 ♞g2+ 89.♖d3 a3 90.♜c3+ ♖b6 91.♞a4 a2 92.♜xa2 As black, the best strategy in such cases to give up the pawn as fast as possible and don't waste the energy for 30-40 moves to defend it. Sacrifice it and then start to count the 50-moves rule towards the draw.

92...♞g3+ 93.♖c2 ♞g2+ 94.♖b3 ♞g3+ 95.♜c3 ♞h3 96.♞b4+ ♖c7 97.♞g4 ♞h7 98.♖c4 ♞f7 99.♞g5 ♖b6 100.♜a4+ ♖c7 101.♖c5 ♖d7 102.♖b6 ♞f1 103.♜c5+ ♖e7 104.♖xc6 Here we are! The position is a dead draw, although there were some examples in the history when a good player lost it, but it is not going to happen in a World Championship match. There are plenty of good defenses and Anand demonstrates one of them...

104...♞d1 105.♞g6 ♖f7 106.♞h6 ♞g1 107.♖d5 ♞g5+ 108.♖d4 ♞g6 109.♞h1 ♞g2 110.♜e4 ♞a2 111.♞f1+ ♖e7 112.♜c3 ♞h2 113.♜d5+ ♖d6 114.♞f6+ ♖d7 115.♜f4 ♞h1 116.♞g6 ♞d1+ 117.♜d3 ♖e7 118.♞a6 ♖d7 119.♖e4 ♖e7 120.♞c6 ♖d7 White cannot even squeeze the king to the 8th rank. Carlsen finally agrees to a draw...

121.♞c1 ♞xc1 122.♜xc1 Huge efforts by both players. Carlsen tried hard, but Anand defended perfectly! **1/2-1/2**

(5) Anand, Viswanathan(2792) - Carlsen, Magnus(2863) [D37]

WCh 2014(8),
2014.11.18

GM Csaba Balogh
Best rating: 2672

After the marathon of the previous day, it was Anand's turn to put pressure on Carlsen with the white pieces. However Carlsen's perfect preparation allowed him to hold the draw effortlessly.

1.d4 ♜f6 2.c4 e6 3.♜f3 d5 4.♜c3 ♞e7 Carlsen turns back to the Queen's Gambit declined, which he employed without success in the 3rd game of the match. This time he was much better prepared...

5.♞f4 O-O 6.e3 c5 is a deviation of their previous game, which continued with 6...Nbd7, but of course this is another main line with thousands of games in the database, although it is slightly out of fashion nowadays.

7.dxc5 ♞xc5 8.a3 ♜c6 9.♞c2

9...♞e8 This was a surprise! Just a few games were played by GMs with it. The idea is to support a quick central break with e5-d4. White has numerous options to react and Anand chose the most human way. [The main line is 9...♞a5 but White is

recently able to get some advantage. I have commented in a previous CEWN the Jakovenko-Onischuk game from 2012, which was a quite convincing win for White.]

10. ♖g5 Pinning the knight and leaving from the e5 threat. [White cannot get a standard position against an isolated pawn with 10.cxd5 10...exd5 because the e8 rook is perfectly placed again, pinning the king allows Black to get rid of the weakness with d4 next move. 11. ♖e2 d4; 10. ♖d1 is probably met by 10...e5 11. ♖g5 d4 12. ♘d5 ♖e7; 10.O-O-O 10...e5 11. ♖g5 d4 12. ♘d5 ♖e7 In both cases, the white king becomes vulnerable.]

10... ♖e7 Black unpin s himself, but this retreat is already a confirmation that 10.Bg5 should be the right move. [10...h6 is also logical, but Black does not seem to get adequate compensation after White simply grabs the pawn: 11. ♖xf6 ♖xf6 12.cxd5 exd5 13. ♘xd5 ♖d6 14. ♖d1 followed by Be2 and 0-0.]

11. ♖d1 [11.O-O-O was an option again, but of course it is risky to go for such a position without knowing anything about it against Carlsen, who was extremely well prepared for this day.]

11... ♖a5 Black creates the pin this time. He is threatening to play Ne4, seriously damaging the pawn structure after taking on c3!

12. ♖d3 h6 Defending the pawn with tempo and opening the back rank for the future.

13. ♖h4 [13. ♖xf6 13... ♖xf6 14.cxd5 exd5 15. ♖h7+ ♖h8 16. ♖xd5 obviously does not work now because of 16... ♖xc3+ and the rook falls.]

13... dxc4! As it happens in many different openings, where a similar pawn structure arises, Black only releases the tension when White has already spent a tempo on developing his light squared bishop.

14. ♖xc4 a6 Everything comes instantly by Carlsen.

15.O-O b5 16. ♖a2 The most natural retreat. If Black finishes the development with Bb7 and Rac8 then he just gets full equality, therefore White has no time to waste, he must try to create some kind of threat. Anand finds a clever way to build a battery on the b1-h7 diagonal! Unfortunately for him, it did not surprise Carlsen, who continued blitzing out his moves...

16... ♖b7 17. ♖b1 [The alternative was 17. ♖xf6 17... ♖xf6 18. ♘e4! (18. ♖d7 immediately does not lead anywhere because of 18... ♖e7!) 18... ♖e7 19. ♖d7 Everything comes with tempo, it is getting very suspicious, but Black holds... 19... ♖b6 20. ♖b1 White is threatening to play Nf6 and mate with Qh7-h8. With the rook on d7, Black cannot escape through the e7 square. 20...g6 21. ♖c3 (On 21.h4 21... ♖ac8! comes just in time and White is forced to leave the b1-h7 diagonal with his queen because of the threatening discovered attack.) 21... ♖ad8! No fear! 22. ♖xe7! seems to be crushing, but the final blow is just about to come! 22... ♖xe7 23. ♘f6+ ♖f8 24. ♘h7+ White is forced to give a perpetual check! (It seems like 24. ♘d5? is winning because of the mate on h8 or the queen falls, but...

24...d4!! What a counterblow! Suddenly Black wins! I am sure that Carlsen's preparation included this amazing move! 25. dxb6 (25. dxd4 25...exd5 26. d5 d4! is another shock for White! Closing the h8 square with tempo.) 25...dxe2+ 26. g8 h1 dxc3 27. bxc3 d6 the white knight is trapped and Black wins! 24...g8 25. d6+]

17...ad8! was played still without thinking, clearly showing that Black is still in his preparation. A blood-freezing move, but actually there is only one check on h7 and then the king runs away...

18. dxf6 dxf6 19. de4 [19. h7+ 19...g8 20. de4 looks very dangerous, but Black survives after 20...xd1! 21. xd1 d8! and White has nothing better than to trade everything and force a draw... 22. xd8+ (22. c1? 22...xb2 wins for Black.) 22...xd8 23. h8+ e7 24. xd8+ xd8 25. d6=]

19...e7! The bishop temporarily blocks the king's route to e7, a check on h7 would be decisive, but the knight has no good square to leave from e4.

20. c5 White at least gets rid of the bishop pair, but at the same time with this simplification he admits that Black has solved the opening problems. [Another attacking idea is 20. g3 20...g6 21. h4 threatening with h5 and exploding the kingside, but Black is again in time to save himself with 21...xd1 22. xd1 c8 sending away the queen from the b1-h7 diagonal. Qd3 moves into Rd8, while other queen moves are already not dangerous.]

20...xc5 21. xc5 This is the moment when Carlsen started to think. What a fantastic preparation!

21...b4 Aiming for further simplifications. [There was no problem with 21...xd1 22. xd1 d8 23. c1 b4= (Or 23...c8=)]

22. c1 [White only temporarily wins a pawn with 22. xa5 22...xa5 23. axb4 This doubled pawn cannot lead to any advantage. One way to force a draw is 23...d4 24. b3 dxf3 25. xd8 (25. gxf3? 25...d2 wins an exchange.) 25...xd8 26. bxc4 e2 27. c1 xc4! restoring the balance by using the weak back rank.; 22. c2 22...g6 is also equal.]

22...bxa3 23. bxa3 xc5 24. xc5 de7 25. f1 c8 The trade of the rooks is inevitable and the arising symmetrical endgame is just a draw.

26. d3 ed8 27. xc8 [27. e2 does not change anything. 27...xc5 28. xc5 c8=]

27...xc8 28. xc8+ de8 29. d2 Trying to create some problems with Nb3-c5, but of course such a threat can be easily parried...

29...♖b6 30.♗b3 ♗d7 31.♗a5 ♕c8 Temporarily moving into passivity, but White does not have enough pieces to make use of it.

32.♖f1 ♖f8 33.♖e1 ♖e7 34.♖d2 ♖d6 35.♖c3 ♗e5 36.♗e2 ♖c5 37.f4 ♗c6 38.♗xc6 ♖xc6 39.♖d4 f6 40.e4 ♖d6 41.e5+ Otherwise Black closes the center with e5. [A draw was agreed in view of 41.e5+ 41...fxe5+ 42.fxe5+ ♖c6 and White cannot make progress. An impressive preparation, which basically secured Carlsen a free day with the black pieces. It is going to be very interesting to see which team will deviate from this game... Was this 9... Re8 just a one game idea or does Anand need to search for another opening...] **1/2-1/2**

Ukrainian Championship,
2014.11.14

GM Csaba Balogh
Best rating: 2672

We are in the last move of the time trouble and Black makes a serious mistake in terms of maintaining the advantage.

40...♙g4? A very important rule in queen endgames is that the quality of pawns is much more important than the quantity! The key element of this game is the pawn on f6. Any other white pawns are irrelevant, but as long as that one is on the board, White will have all the chances to secure enough counterplay to hold, despite being momentarily a pawn down and later it will be even more... [Black should have eliminated the dangerous passed pawn with 40...♙f7! 41.♙c6 c4 followed by Kg6. Black has good chances to win.]

41.♙b7+! White must play actively and pin all his hopes to the f6 pawn. Defending the h4 and f4 pawns passively equals resignation.

41...♙h6 42.♙f7! That is the point! White is ready to give

a check on f8 and then according to the circumstances give more checks or advance the f-pawn, which will then only be one square away from promotion.

42...♙xh4+ 43.♙g2 ♙g4+ 44.♙h1 ♙d1+ 45.♙g2 ♙xc2+ Black collects all the pawns with check, he is already 3 pawns up, but his position is not winning. The f6 pawn is too strong.

46.♙g1 ♙c1+ 47.♙g2 ♙b2+ 48.♙g1 ♙a1+ 49.♙g2 ♙b2+ 50.♙g1 ♙b1+ 51.♙g2 ♙e4+ 52.♙g1 ♙e1+ 53.♙g2 ♙e4+ 54.♙g1 ♙e3+ 55.♙g2 ♙e2+ 56.♙g1 ♙g4+ 57.♙h1 ♙h3+ 58.♙g1 ♙g3+ 59.♙h1 At this point, Black should have realized that he cannot win, but it is very difficult to admit this when you have such a big material advantage. Black continues to play for a win, but he soon turns out to be losing...

59...h4 With the idea to open an evacuating path for the king along h5-g4 and to threaten h3 and Qg2 mate. [59...d3 is met by 60.♙f8+ ♙h7 61.♙f7+ with perpetual check.; 59...♙g6 60.♙f8+ ♙h7 61.♙e7+ (61.f7 is also good enough because of the Qe7 threat.) 61...♙g8 62.♙d8+ ♙h7 63.♙e7+ also holds by perpetual.]

60.♙f8+ ♙h5? Consequent, but this could have been the decisive mistake. [Black should have allowed perpetual check with 60...♙h7 61.♙f7+=]

61. ♖e8+! Suddenly the f-pawn turns out to be too strong and White is winning in a study-like way.

61... ♔g4 [It is already too late to turn back with 61... ♔h6 as it loses to 62. ♖h8+ ♔g6 63. ♖g7+ ♔h5 64. ♖xg3 hxg3 65. f7+—]

62. ♖e2+! The first thing is to guarantee the king's safety and then White can advance his f-pawn. Black probably blundered this check when he went 60... Kh5. [62. f7? is premature in view of 62... ♔f3! threatening with mate on g2. 63. ♖g8 (63. ♖a8+ 63... ♔f2 and mate follows in the next move.) could be a saving idea, but not in this position, because of

63... ♔f2!! creating the threat of Qh3. 64. ♖xg3+ hxg3 65. f8=♖ g2+ 66. ♔h2 g1=♖+ 67. ♔h3 ♖g3#]

62... ♔xf4 [62... ♔h3 loses more easily because of 63. f7 ♖g7 (63... d3 64. ♖f1+ ♔g4 65. f8=♖+—) 64. ♖h2+ ♔g4 65. ♖g2+—]

63. f7! A very nice position. White is fighting with 1 pawn against 5, but that one is the most advanced and the most relevant one.

63... ♖g7! The best chance again! [63... ♖h3+ runs into a countercheck with 64. ♖h2+ ♖xh2+ 65. ♔xh2+—; 63... d3 64. ♖f1+— and f8Q next.]

64. ♖e8! It is very important to have the Qg8 option for White to avoid getting mated on g2. [64. ♖e7 is met by 64... ♔f3 and White is forced to give a perpetual here: 65. ♖b7+ ♔f2 66. ♖b2+ ♔f3 67. ♖b7+—]

64... ♖g4! Black finds the most tenacious defense again, which brings him back the half point for the huge risk he has taken before. [64... ♔f3 loses to 65. ♖g8! ♖e5 66. f8=♖ and Black has only one check. 66... ♖e1+ 67. ♖g1+—; 64... h3

is tricky, but it fails to 65. ♖b8+! White drives the king to a wrong place before playing Qg8! (The direct 65. ♖g8 allows 65... ♖e5! 66. f8=♖ ♖e1+ 67. ♖g1 ♖e4+! This is the key and the reason why White needs to give a check on b8 first. 68. ♔h2 ♖e2+ 69. ♔xh3 ♖h5+ 70. ♔g2 ♖f3+ 71. ♔h2 ♖h5+— with a perpetual.) 65... ♔f3 66. ♖g8+— without the check on e4, Black is lost.]

65.f8=♔? White returns the favor, since Black has a perpetual check now... [The winning move was 65.♔b8+! 65...♔e3 (65...♔f3 66.♔g8!+-) 66.♔g8! (Still not 66.f8=♔ 66...♔f3+ 67.♔h2 ♔f2+ 68.♔h3 ♔f3+= and White cannot take on h4 in view of Qg4!) 66...♔e4+ (66...♔f3+ 67.♔g2+- no more checks as Qd1 runs into Qg1 check!; 66...♔h3+ 67.♔g1+- and there are no more checks for Black.) 67.♔g1 ♔b1+ 68.♔h2 ♔a2+ 69.♔h3+- and once again, the game is over.]

65...♔f3+ 66.♔g1 ♔g3+ 67.♔f1 ♔f3+ 68.♔e1 ♔c3+! The king cannot escape from the checks...

69.♔f1 ♔f3+ 70.♔e1 1/2-1/2

Clash of the Titans

**(17) Petrosian, Tigran V
- Smyslov, Vassily[E12]**

URS-ch28, 1961

GM Kamil Miton
Best rating: 2655

1.c4 ♘f6 2.♘c3 e6 3.♘f3 b6 4.d4 ♘b7 5.a3 This line is named after Petrosian.

5...d5 is the most logical plan. [5...c5 makes no sense because after 6.d5 exd5 7.cxd5 the bishop on b7 is badly placed.]

6.cxd5 White has two other possibilities. [6.♘g5 and; 6.♔c2]

6...♘xd5 [After 6...exd5 the game could for example continue with 7.g3 (7.♘f4 7...♘e7 8.e3 O-O 9.♘d3 c5 10.O-O ♘bd7 White can try to play for hanging pawns after dxc5 or Ne5-Qf3-Rd1, with the idea to create some pressure on the kingside.) 7...♘e7 8.♘g2 O-O 9.O-O c5 10.♘f4 ♘a6 11.dxc5 ♘xc5 (11...bxc5 12.♘e5†)]

7.e3 [7.♔c2 7...♘xc3 8.bxc3 ♘e7 9.e4 O-O 10.♘d3 c5 11.O-O White is better thanks to his strong center, but many games

showed that Black has counterplay over the c-file.]

7...♙e7 8.♙b5+ This check nt change much because Black will fight for the center after c5 anyway.

8...c6 9.♙d3 c5 10.♘xd5 [10.O-O?! 10...cxd4 11.♘xd5 ♙xd5 12.e4 (12.exd4 12...O-O can not bring White any advantage because Black controls the h1-a8 diagonal, especially the important d5 square.) 12...♙d8 13.♘xd4 O-O 14.♘f3 ♘d7↗ and Black is very quick, as Nc5 or Bf6 are coming.]

10...♙xd5 11.dxc5 [11.e4 11...♙d7 12.dxc5 ♙xc5 13.b4! is the most accurate since now 13...Be7 doesn't work because of 14.Ne5 and Bb5 next. (13.♙e2 13...O-O 14.O-O ♘c6= with the idea to exchange more pieces on the d4 square.) 13...♙d6 14.♙b2 O-O 15.O-O+= White has more space.]

11...♙xc5

12.♙d2! A strong move. Petrosian is immediately going to put his pieces on their best places. The bishop is going to c3 and the rook to c1.

12...♘c6 [12...O-O 13.♙c1 ♙d6 14.♙c2 h6 15.♙c3 ♘d7 16.O-O (16.♙d1 16...♙c6=) 16...♙xf3! 17.gxf3 ♙f6 is a typical idea, first destroying the white structure then getting rid of White's bishop pair. 18.♙fd1 ♙e7 19.♙h7+ (19.♙b4 19...♘c5=) 19...♙h8 20.♙e4 ♙ab8 21.♙xf6 ♘xf6 22.♙c7 ♙fe8 and White is not

able to improve the position. Black can slowly come with the king to f8.]

13.♙c1 ♙d6 14.♙c2 ♙c8 [14...h6?? is losing because of 15.♙b5 ♙c8 16.♘d4+-]

15.O-O

15...h6 Black wants to castle as soon as possible, but an interesting option was [15...♙f6 The idea is very simple, just to be the first on this active diagonal. 16.♙e4 (16.♙fd1 16...♙b8↗) 16...♙d7 (16...♙b8? 17.♙a4±) 17.♙fd1 (17.♙a4 17...♘d8! and Black holds the position.) 17...♘d4 This is a very forced line. (17...♘e7 18.♙c3 ♘d5 19.♙xd5 exd5 20.♙d2 ♙xc3 21.♙xc3 and the knight on d4 will be much stronger than the bishop, so White has a strategical advantage. An interesting endgame in this structure was played between Capablanca and Reshevsky in 1936.) 18.♙xc8+ ♙xc8 19.♘xd4 ♙b7 (19...O-O 20.♘c6† followed by Bb4 and the black pieces lost coordination.) 20.♙xb7 ♙xb7 21.♙b4 is the only way to keep the black king in the center. 21...♙xd4 (21...♙e7? 22.♘c6! ♙xb4 23.♙d8#) 22.♙xd4 e5 23.♙d3 h5 with the idea to activate the rook over the 6th rank. The position is complex.]

16.♙fd1 O-O 17.♙c3 ♙b8 It looks liked Smyslov solved the problems and his position is safe but now comes

18. ♔a4! A great move! Petrosian improves his queen, which gives him an extremely strong attack!

18... ♖fd8 19. ♔e4 forces Black to make some weaknesses around the king.

19... ♗g6 [19... ♗f6 20. ♔h7+ ♔f8 21. ♗xf6 gxf6 22. ♔xh6+ ♔e7 From a practical point of view maybe it was the best idea to give the pawn in order to solve the problems with the king. 23. ♔h4±]

20. ♔g4! with the idea Bxg6. The black pieces are all very far away from their king and can't help in defense.

20... ♗h5 [20... ♔h7 21. ♗xg6+! fxc6 22. ♔xe6 ♖f8 23. ♗h4! ♗xh4 24. ♖d7+ ♗e7 25. ♖xe7+ ♗xe7 26. ♔xe7+ ♔g8 27. ♔g7#]

21. ♔h3 White is still threatening Bxg6!

21... ♗f5 After this move White gets a new target on e6! The best chance for Black was [21... e5 22. ♗xg6 (22. g4!?→) 22... fxc6 23. ♔e6+ ♔f8 24. ♗xe5 (24. ♔xg6 24... ♖xd1+ 25. ♖xd1 ♗d8→) 24... ♖xd1+ 25. ♖xd1]

25... ♖d8! 26. ♖c1 ♖d6 27. ♗xd6 ♔xd6 and it looks like Black can save the game.]

22. ♗c4 ♖xd1+ 23. ♖xd1 ♔f7 [23... ♗d8 24. ♗e5±]

24. e4! A strong move which crushes Black's position.

24... ♔f4 Black is hoping to exchange the queens.

25. ♖e1 ♔g4 But he is not on time...

26.exf5! +— Petrosian probably saw this a few moves ahead. White is simply winning now.

26...♔xc4 27.fxg6+ ♕e8 28.g7 e5 [28...♔f7 29.♔xh5+ ♕g8 30.♔h8+ ♕f7 31.♔h7 ♖g8 32.♔h5#]

29.♔xh5+ ♕d7 30.♖d1+ ♗d6 31.♗xe5 ♘d4 32.♘xd4 1-0

Editorial Preface

Magnus Carlsen is the new and old World Champion. The Norwegian secured a winning score of 6.5-4.5 thanks to a victory in the 11th game with the white pieces, so the 12th game was not needed.

The match was much tougher than the final score seems to reflect. Anand had a lot of chances which he didn't take advantage of. If we look at the match and stop the games after move 20, Anand would have been the clear favorite, but the games went on and Anand kept on making mistakes, which Carlsen used to his advantage.

Clearly the critical moment of the match was game 6, with a double blunder of both players. In games 8 and 10 Anand could also have pushed Carlsen to the verge, but he missed his chances and of course in the game 11 Anand was clearly better out of the opening, had more time and a very pleasant position. But then what happened next was really strange... Anand totally lost control and just gave an exchange without any objective reason for it, so Carlsen just took it and the match was over.

Overall we witnessed a very fighting match with a lot of ups and downs, which clearly shows how the tension was affecting both players and under such pressure, even the best players can crack.

On almost the same day the Ukrainian Championship came to an end, where the first place was shared between Kuzubov and Eljanov with 7.5/11 and a full point ahead of Korobov and Ponomarev, who shared the places 3-4th with 6.5/11.

The play of Ivanchuk, who started the tournament badly and continued playing interesting chess but was making too many mistakes, was a big disappointment to many chess fans from all over the world.

The Russian Super Cup was won by Jakovenko who won the final match against Matlakov 1.5-0.5

The Nakamura-Aronian match in Saint Louis ended 2-2 in the classical control and 9.5-6.5 in favor of Nakamura in the blitz. The games were very spectacular but far from great, as neither of the players seemed to be in their best shape.

Now let's come to the current events:

What is probably the strongest open tournament in the history of chess has begun in Doha, Qatar, where the top seeds are Giri, Kramnik and Mamedyarov and the field includes 14 players over 2700 ELO.

Already in a few days the Russian Super Final will start, but this year it is going to be much weaker than in previous editions....

As usual we are commenting on the most exciting moments from the last week. Enjoy!

Arkadij Naiditsch & Csaba Balogh

We are happy to announce, that Chess Evolution will cooperate with Hungarian Chess Federation in the prestigious event of World Chess Olympiad U-16. Chess Evolution will also devote two issues from our newsletter to share with you the best games, the most interesting moments and the nicest combinations played by the young stars.

FIDE Youth Chess Olympiad Hosted by Hungary Already Breaks Records

Only four months after the Chess Olympiad in Tromsø where the greatest chess players of the world competed against each other it is already time to have a look at the best talents of the next generation. In December this year Hungary may organize a Chess Olympiad for the first time, the competition for youth aged under 16 years. The event takes place in the city of Győr and with more than a month to the start the organizers have already confirmed the entries of more participant nations than ever before at any Youth Chess Olympiad. It really seems that the best chess talents of all five continents will be present in Hungary between 12th-22nd December. Awarding the right of organization to Hungary is a clear sign of high international recognition of chess life in the country which is rightly confirmed by the fact that Judit Polgar who has been leading the FIDE world rankings for more than 25 years has agreed to be the face of the event representing talent and the Hungarian chess traditions all in one person or we could even say legend. By mentioning Judit Polgar let us not forget that after FIDE tightened on a rule that had existed earlier participation of girls are now guaranteed. In each team a maximum four of the five team members can be a boy.

The promo video of the Youth Chess Olympiad 2014 features Judit Polgar, Csaba Balogh, Olympic Silver medalist, Benjamin Gledura who was European Champion of his age group and Kata Karacsonyi who was the first to follow in the footsteps of Judit Polgar to win the National Championship topping all boys in their age groups.

You can see the video by clicking on this link:

<http://www.youtube.com/watch?v=PZu0iBrc5rE>

You can find more information about the FIDE U-16 World Youth Chess Olympiad 2014 on the official website of the event:

WCh 2014(11),
2014.11.23

GM Arkadij Naiditsch
Best rating: 2737

The 11th game of the match- and at the same time the last one- was very dramatic. We will see how Anand is got a great position out of the opening, played the great b5 move, after which it was clear that Black was doing more than fine without any big risk of losing the game, and then he suddenly sacrificed the exchange without any reason and got himself in a very bad/ dangerous position where Carlsen didn't give him any more chances of playing the 12th game, as he secured a 6.5 points to 4.5 lead. A very sad end for Anand who could have turned around the match or at least have gotten a good mood for the 12th game by making a safe draw.

1.e4 As in all his games, Carlsen continues opening with 1.e4.

1...e5 2.♘f3 ♘c6 3.♙b5 ♘f6 Another game on the Berlin, which is not a surprise.

4.O-O ♗xe4 5.d4 ♗d6 6.♙xc6 dxc6 7.dxe5 ♗f5 8.♔xd8+ ♔xd8 9.h3

9...♙d7 Anand is switching from the Ke8-h5 variation to the Bd7 one, which has actually been very popular in the latest games, often played by Caruana and Adams.

10.♘c3 This is one of the main moves, but it is the "old variation". [10.♞d1 is the move played recently. The idea is to force Black to decide immediately what to do next with the king. 10...♙c8 (10...♙e7 Now White has a lot of different move orders but his ideas are of course mainly connected to the g4 move or Bg5.) 11.♘g5 ♙e8 12.g4 ♘e7 13.f4 leads to very sharp play.]

10...h6 Preventing Ng5 or Bg5.

11.b3 ♙c8 and now of course Black doesn't stay in the center any longer, but secured the king's position. All this is of course well-known theory.

12.♙b2 c5! It is very important not to make any mistakes in the move order here for Black and of course Anand is well aware of the details. It is important first to take the d4 square under control before playing b6.

13.♞ad1 b6 In this position White has tried a lot of different possibilities but Black seems to be fine in all of them.

14.♞fe1 Personally I don't see a big sense in the position of the white rook on e1.

14...♙e6 15.♘d5 White wants to play Nf4 and take the bishop on e6 with a small edge.

15...g5! and of course Black doesn't allow it.

16.c4 ♙b7 17.♙h2 White is preparing g4, followed by Kg3, which is a very typical idea for the Berlin.

17...a5! It is very important for Black to provoke White into playing a4 and we will see why in couple of moves!

18.a4 White can't allow Black to play a4.

18...♘e7! Another excellent move by Anand, who I am pretty sure was still in his preparation. There is no reason to wait for White's g4 because anyway he doesn't have anything better to play and the black knight has to take position on g6.

19.g4 I don't think White has a better plan in the position.

19...♘g6 20.♙g3 White's idea should clearly be to play on the kingside, with moves like h4 or maybe first Nf6 and then h4.

20...♙e7 Another very good move by Anand. Before starting the action on the queenside, Black brings his h8 rook into the game. [20...♙g7 was also possible, but after 21.♘f6 maybe White will be able to play h4 next with some pressure.]

21.♘d2 I don't like this move at all. Why get the knight to e4?! I think White's plan should be connected with playing h4

and not f4. [White can't reach any advantage after 21.♘xe7 21...♘xe7 22.♖d2 ♖ad8 23.♖ed1 ♖xd2 24.♖xd2 ♘g6 Black's position is very solid, but White is not risking being worse here either.]

21...♖hd8 22.♘e4 ♙f8 So White and Black both are solid in the center and it is not easy to see what either's plan is actually.

23.♘ef6 Maybe White is preparing the Nh5-f4 idea.

23...b5!! and here comes the shock for Carlsen. This was the very idea for which Anand was playing by provoking the a5-a4 moves. Black is starting his play on the queenside first.

24.♙c3 What else to do?! [After 24.axb5 24...a4 25.bxa4 ♖xa4 Black's play on the queenside is very dangerous and his position is at least equal, but probably already better.]

24...bxa4 25.bxa4 Black managed to open the b-file, which is a huge improvement of the position.

25...♙c6 The king is taking an excellent position on c6 and Black is starting to plan his entry on the b-file.

26.♙f3 Carlsen tries to keep things together by bringing his king to e4, but we can already feel that White is in quite some trouble.

26...♖db8 27.♙e4 We are in a critical position. Black has a lot of nice options now: it is tempting to play 27...Rb3 as well moves like 27...Bg7 or Be7, which look very nice with the simple idea of playing Bxf6. The position is not that easy to evaluate, but personally I think that White is already in quite some serious trouble.

27...♖b4?? What a shocking decision by Anand! There was absolutely no reason to sacrifice the exchange. Maybe he felt that he was close to change the outcome of the match, but still, why give an exchange and play a very dangerous looking position rather than just continuing playing a slightly better position with an extra 12th game in the pocket?! It is hard to explain this decision by a player with so much experience as Anand.

28.♙xb4 Carlsen just says "thank you".

28...cxb4 Black's idea can only lie in his play connected to the b-pawn and this can only happen in case Black manages to remove the knight from d5, so he needs to somehow play c6.

32...♙xc4 33.♖d7 ♜a6 Maybe this is the move Anand was playing for, but White is winning by force now. [33...♜e8 was not much better since after 34.♘d5 ♙d6 35.♙d4 followed by Rxf7 next, White is almost winning.;

And after 33...♙c8 34.♖ed1 ♜d6 White has 35.♗7xd6! cxd6 36.♖c1 winning the c4 bishop.]

35...♗c5 Black still has some hope because of the bishop pair, but not for long...

36...♖xc7 37.♘xc7 ♔c6 Black has nothing else to play. [White's calculation is visible after 37...♖xc7 38.♖c1 b3 39.♖xc4 b2 40.♖xc5+ ♔b6 41.♗b5+ Of course this is a very

easy line to see for a World Champion, even under the pressure of winning the WC title.]

38. ♖b5! This is the last exact move of the game. White wants to play Nd4 next so Black is forced to take on b5.

38... ♗xb5 39. axb5+ ♔xb5 40. e6 40.Kd3 would basically lead to the same position as in the game, just over a different move order.

40... b3 41. ♖d3 White is threatening to play e7 next.

41... ♗e7 Actually White has a couple of different wins in the position, but of course Carlsen picks the most simple one.

42. h4 White creates another passed pawn.

42... a4 43. g5 hxg5

44. hxg5 Black is just too slow with his counterplay.

44... a3 45. ♖c3 Stopping all the black pawns from moving. Anand resigns the game and the WC match. What a dramatic and very emotional last game and of course what a mistake by Anand to sacrifice the exchange. **1-0**

**(2) Jakovenko, Dmitry(2745)
- Matlakov, Maxim(2685) [A15]**Russian Cup Final 2014(4.1),
2014.11.23GM Csaba Balogh
Best rating: 2672

We are in the final of the Russian Cup, where Jakovenko convincingly beats his young opponent.

1.c4 ♘f6 2.♗f3 c6 3.g3 d5 4.♕g2 We have transposed from the English to the Reti opening.

4...♕f5 4...Bg4 is the other main line.

5.O-O e6 6.cxd5 This is the right moment to take on d5 to challenge Black's opening preparation. [Trying to delay it with 6.d3 allows Black a good extra option with 6...dxc4 7.dxc4 ♘bd7 7...Qxd1 is also possible. This line is more common with the bishop on g4, but it stands better on f5. 8.♘c3 h6 Intending to save the strong bishop against the Nh4 positional threat. 9.♕f4 ♕e7 Black was doing fine in some recent games.; 6.♖b3 is met by 6...♖b6 7.♖xb6 axb6 8.cxd5 exd5 followed by b5, with an excellent position for Black.]

6...exd5 [On 6...cxd5 7.♖b3 is already much stronger, because after 7...♖b6 8.♖xb6 axb6 9.♘c3+= in comparison to the 6.Qb3 line, the doubled b-pawns are separated and weak. They might quickly get under attack by d3 and Be3.]

7.d3 ♘a6 8.a3 It seems like White just would like to get a playable position with b4 and Bb2. [Jakovenko deviates from the recently played 8.♘c3 8...♕e7 9.♘d4 ♕g6

10.e4 This plan is considered to be critical from the opening point of view. If White manages to consolidate in the center, he might get a big advantage with f4. However, the following game shows that Black is excellently prepared for this plan, due to his prophylactic Na6 move... 10...O-O 11.♖e1 (11.e5 11...♘d7 12.f4 looks dangerous, but Black has 12...♕c5! 13.♕e3 ♖e7! when Black prevents the direct f5 threat by having Qxe5 with a double attack on e3 and d4 and otherwise he is going to undermine the advanced pawns with f6 and the premature action of White backfires.) 11...♕c5 (Black is doing well also after 11...♘c5 keeping an eye on the d3 pawn.) 12.♕e3 ♖e8 13.f3 ♘d7 14.♘c2 ♕xe3+ 15.♖xe3 ♖b6 16.♘a4 ♖a5 17.♘c3 ♘b4 Black was more than fine and he had already refused a moves repetition with Qb6 in the game Svidler-Tregubov, Bilbao 2014, although he later went on to lose...]

8...♕e7 9.b4 ♘c7! A good reaction. After the a3-b4 moves, the knight must forget about the c5 square, where he was initially intended to go, but there was a drawback in White's play too, that Black is suddenly ready to change the pawn structure in his favor by undermining the queenside with a5. That would force White to take on a5, but it leaves the a3 pawn isolated and also taking outward from the center is never recommended. Jakovenko finds a clever idea to avoid this plan...

10.♘d4! [On the natural 10.♙b2 Black could finish his plan with 10...a5 11.bxa5 ♖xa5=]

10...♞d7?! A very strange mistake on this level. Giving up the bishop pair so easily cannot be a great idea. [Black should simply have played 10...♙g6 when White would have completed his maneuver started in the previous move with 11.♘b3! preventing a5. 11...O-O 12.♙b2 ♘d7 followed by Bf6 with a playable position for both sides.]

11.♘xf5 ♞xf5 I guess that Black's idea behind 10...Qd7 was that after Nb3 he can exchange the bishops with Bh3, while now White has no good way to avoid the positional threat of a5. However, taking the light squared bishop is a bigger achievement for White than being able to execute the a5 break for Black...

12.♙b2 a5

13.e4! Jakovenko knows that his opponent went wrong before and he tries to seize the initiative right away.

13...dxe4 14.dxe4 ♞d7 [14...♘xe4? cannot lead to anything good after 15.♙xg7 ♞g8 16.♙b2 as the black king is stuck in the middle of the board.; is not great for Black either. 14...♞e6 15.bxa5 ♞xa5 16.♘d2! O-O 17.♘b3! The knight occupies the ideal f5 square with tempo. Now the rook is hanging, then it attacks the queen from d4 and when it gets to f5, Black is already in trouble.]

15.♞xd7+ ♘xd7 [Despite the queens being off, Black runs into a very strong attack after 15...♙xd7 16.♘d2! axb4 17.♘c4 threatening Nb6. Black should try to hide his king, but he has no time for it. 17...♙e8 Disconnecting the rooks cannot be good, but there was nothing better for Black. 18.axb4 ♙xb4 19.♞xa8+ ♘xa8 20.♞a1 ♙e7 21.♞a7 Black is in trouble as the b7 pawn falls. Rb8 loses to Be5!]

16.b5! A great positional move! White had to compare the options of taking on g7 right away and allowing axb4, opening the a-file and eliminating all the white pawns from the queenside, with the temporary pawn sacrifice that happened in the game. [16.♙xg7 16...♞g8 17.♙b2 axb4 18.axb4 ♞xa1 19.♙xa1 ♙xb4 White should still be better because of the two bishops, but it is much less obvious than in the game.]

16...♖xb5 17.a4 ♖d6 18.♗xg7 ♖g8 19.♗d4! The ideal retreat ! 19. Bh6 would have allowed Black to get rid of the bishops after Bg5. 19.Bb2 moves into Nc4 with tempo, while 19.Bc3 occupies the knight's ideal development. Black cannot trade the bishops now with Bf6 as it drops a piece after take and e5, while c5 is a huge weakening, as after removing the bishop, the knight occupies the d5 square in two moves.

19...♖c4 20.♖c1! The most accurate move again, depriving Black from his counterplay. [After the natural 20.♖c3 Black could have seriously eased his position by playing 20...♗c5! getting rid of the bishop pair.]

20...♗ce5 21.♖d2 O-O-O The black king feels relatively safe on the queenside behind his pawns, especially since the b-file can be closed with Bb4.

22.♖b3 Jakovenko immediately points out the drawback of the previous move, that the a5 pawn is left alone and Black can never think about b6 as it leaves the c6 pawn unprotected (after f4).

22...♗b4 23.♖c2 White leaves from the Nd3 tempo. A serious threat could be Bc3, trading the defender of the a5 pawn, after which Black has no adequate way to save the pawn.

23...♖b8

24.♖f1! I like this move a lot! The point can be seen in the 24.f4 line! White improves the circumstances of the Bc3 and the f4 moves and also brings his king towards the center, which is generally a good approach in endgames. [24.♗c3 could have been played right away. Jakovenko was most probably afraid of 24...b6 (24...♗xc3 is bad in view of 25.♖xc3 b6 26.f4 and the c6 falls.) 25.♗xb4 axb4 26.f4 ♖d3 27.♖xc6 ♖7c5! when Black creates counterplay with his b4 passed pawn. However the computer finds an unexpected move to retain the advantage... 28.♖xc5! It looks very suspicious to create such connected passed pawns, but somehow Black is unable to advance them. 28...bxc5 29.♖d1! Kb7 runs into e5. Otherwise White plays a5 and Bf1. 29...b3 drops the pawn after Rb6.; The most human move is 24.f4 24...♖d3 (24...♖g6 25.♗c3 wins a pawn.) 25.♖d1 but here comes the unexpected blow 25...♖e1!! It is easy to miss such moves and Black takes on g2. This is the reason of playing 24. Kf1! A very deep idea indeed.]

24...c5? The effect of the Kf1 move! Black was so shocked that he does not have this Ne1 resource that he sacrificed a pawn for basically nothing... It is true that he is lacking any useful moves and his position was already bad because f4 or Bc3 was coming next, but still any other move would have been better than this...

25.♖xc5 ♖xc5 26.♗xe5+ Perhaps Black forgot that White can take this knight?! Now White is just a pawn up... [Possibly Matlakov had expected 26.♗xc5 when after 26...♖c8! 27.♗xb4 axb4! (But not 27...♖xc2? 28.♗d6+) 28.♖b2 ♖d3 followed by Rc3, Black gets very strong counterplay with his b4 passed pawn.]

26...♖a7 27.♗f4 Driving the bishop back to e3.

27...b5 A desperate attempt to find counterplay with the

a-pawn, but it again rather just helps White to convert his advantage. [27...♖d3 28.♔e2 ♗gd8 White can demonstrate the power of the two bishops with 29.♕g5 ♗8d7 30.♕h3 ♗7d6 31.♕e3 b6 32.♕f5+- wins the h7 pawn because of the main threat of pushing e5!]

28.axb5 ♖b6 29.♕f3 White transfers his bishop to e2 to start the haunt of the black king after taking on b5.

29...♗d3 [29...♖xb5 30.♕e2+ ♖b6 31.♕e3+- is more or less over.]

30.♕e2 ♗c3 31.♗xc3 ♕xc3 32.♗d1 a4 Finally the pawn starts to run, but of course it is too slow...

33.♕e3 ♗c8 [33...a3 loses to 34.♗d6+ ♖b7 35.♕c4!+- stopping the a-pawn first and now the c5 is hanging, just as Bd5 is a decisive threat against the king.]

34.♗d6+ ♖a5 [34...♖b7 loses again to 35.♕c4+-]

35.♗c6 The human win. [The machine recommends the brilliant 35.b6 35...a3 36.♕xc5! a2 37.b7! a1=♖+ 38.♖g2 wins as the rook is hanging and Ra6 is threatening with mate in one. Obviously with a human mind, it is better to not allow our opponent to promote a queen with check, if we have other easy ways to win the game...]

35...♗xc6 36.bxc6 ♜xe4 [36...♜e6 was slightly more resistant, although it would not have changed the outcome... 37.♕c4 ♕e5 38.♖e2 a3 39.♖d3+- is the easiest, catching the a-pawn and at some point White pushes f4-f5 to win the game with the two extra pawns.]

37.c7 ♜d6 38.♕c5 [Black resigned in view 38.♕c5 38...♜c8 39.♕g4+-] **1-0**

(3) Kryvoruchko, Yuriy(2706) - Eljanov, Pavel(2719) [B12]

83rd ch-UKR 2014(9.3),
2014.11.20

GM Csaba Balogh
Best rating: 2672

The Ukrainian Championship was a really hard fought tournament. All players wanted to win their games with both colors, therefore there were many very interesting encounters such as the following one.

1.e4 c6 2.d4 d5 3.e5 ♕f5 The Advanced variation of the Caro-Kan defense.

4.♜f3 e6 5.♕e2 ♜e7 Black avoids the theoretical battle in the extremely sharp 5...c5 lines and drives the game to a less explored territory.

6.c3 h6 7.♜bd2 ♜d7 8.O-O ♖c7 Black slowly prepares for the standard c5 break followed by Nc6, gaining space on the queenside and putting pressure on the central pawns.

9.♗e1 Preparing for the knight maneuver to f1-g3. [In such positions it is more common to play 9.♜b3 preparing for the c5 move.]

9...a5 A very interesting and deep plan by Eljanov, knowing what happened two moves later. We will come back to the details after the 11th move... Black intends to take space on the queenside with a4.

10.a4 The most natural reaction, not allowing Black to take ground.

10...♘g6 11.♗f1

11...c5! This is the standard break, but not after playing a5. Black would like to gain space and finish the development with Nc6, Be7 and 0-0 and if he succeeds, he ends up with a perfect position. However, it takes many moves and there should be a direct problem with the king standing in the center. White has won many nice games by blowing the center with a well-timed c4. Kryvoruchko plays the most natural moves, but after all, Black's plan seems to work perfectly.

12.♗b5 This should be the drawback of including the a5-a4 pair of moves. The bishop has a very nice square on b5 and the explosion of the center with c4 seems to be even stronger now.

12...♗c6 13.c4 Very principled play, but Black consolidates with some very calm moves.

13...♗b6! It is necessary for Black to hold the d5 square to be able to recapture with a piece. [13...dxc4 is strongly met by 14.d5! exd5 15.♗e3! and Nxd5 next. This is a typical example of how Black usually collapses in such positions.]

14.cxd5 [14.♗e3 14...0-0-0 is going to be a transposition.]

14...♗xd5 15.♗e3 White continues with the most natural moves, trying to put pressure on the center as fast as possible

until Black had no time to secure the safety of his king.

15...0-0-0!? A very brave decision, but here we can see another point of including the a5-a4 pair of moves. The drawback was the creation of the hole on b5, but there is another point as well, the hole on b4 turns out to be much more relevant. Black will effectively occupy it with his minor pieces and also the pawn structure on the queenside is fixed, so it is much more difficult to launch an attack against the black king as b4 never works for White. [15...♗d8 is actually also possible, with the idea to castle kingside after Be7.]

16.♗c4 White occupies all the holes on the queenside and intends to attack the a5 pawn with Bd2. [The machine tries to release the tension on the d4 pawn with 16.♗xc6 but on the other hand it gives up the nice bishop on b5. Black seems to be fine after 16...♗xc6 17.♗d2 ♗b4; 16.♗xd5 16...♗xd5 attacking on d4 and intending to finish the development with Be7 and Rhd8 looks also better for Black.]

16...♗db4! Black had no time to waste, so Eljanov looks for counterplay on the c2 square and he intends to win the pawn on d4. White tries to point out the drawback of this move...

17.♗f4 After the knight has left the d5 square, White prepares to install his knight to d6! [17.♗d2 was another logical way to continue and Black must react accurately with 17...cxd4!]

17...♖xd4! [The alternative 17...♖c2 was wrong again.
18.♗d6+! ♔b8 (18...♖xd6 is not the same as in the game.
19.exd6 ♕xd6 20.♕xd6 ♖xd6 21.♕xc6! The point is Qxc6 runs
into Ne5! and after taking on g6, the c2 knight is hanging.
21...bxc6 heavily weakens the king's position. 22.♖c1 ♗xe1
23.♖xe1± with a very strong attack.) 19.dxc5 ♗xa1 20.♖xa1
That beautiful knight on d6 guarantees more than enough
compensation for the exchange.]

18. ♖d6+

19.exd6 ♟xd6 20.♟xd6 ♔xd6 I must say that the outcome of the middlegame is a bit strange to me. Black has a

huge advantage despite the very natural play of both sides. Normally in such cases, there should be equality, but now it is not true.

21. ♖e5 Giving back the exchange is a clear sign of despair.
[In case of 21. ♖xd4 21...cxd4 22. ♖c1+ ♔b8 ♚ we can clearly see the domination of Black's position. Even materially he is doing fine with the two pawns for the exchange, but the supported d4 passed pawn causes the biggest problems. Black has no weaknesses in his camp, there is nothing for White to attack with his rooks...]

21...♘bc2 22.♖c1 ♘xe1 23.♔xe1 Black has converted his initiative into two extra pawns. Now the initiative has passed to White, but Black has enough resources to consolidate.

23...♔c7! Protecting the important a5 pawn without weakening the position. [The most natural 23...b6 weakens the h1-a8 diagonal and White could make use of it with 24.♕a6+ ♖b8 25.♞xg6 fxg6 26.♔e4 with counterplay.]

24.  d3  xd3 25.  xd3 b6

26.b4! A necessary sacrifice to find counterplay. Otherwise the two extra pawns yield an easy win for Black.

26...axb4 27.a5 ♖b3! 28.axb6 ♔xb6?! The first inaccuracy by Eljanov in this game, although his position remains winning.

Black is already three pawns up, but his king got exposed. [The most straightforward way to win was 28...♞d6! delaying the capture on b6 and pinning the white pieces instead. 29.♞d1 (29.b7+ 29...♞b8! (But not 29...♞xb7 after which 30.♜xc5+! ♜xc5 31.♞xb4+ ♞c6 32.♞a4+ ♞c7 33.♞a7+ ♞c6 34.♞a4+ holds by perpetual check.)) 29...♞d8! and White cannot create counterplay. 30.♜b2 ♞xb6—+]

29.♞b1 c4 30.♜e5 [On 30.♜xb4 30...♞d8 31.♞c3 ♜d2—+ also wins for Black. Qxf2 Kxf2 Ne4 is a hidden threat.]

30...♞d8 Black finally brings his inactive rook to the game.

31.♜xc4 ♞c5 32.♜e3 [Unfortunately for White 32.♞xb3 32...♞xc4 33.♞xb4 did not work because of the unopened back rank. 33...♞xb4! 34.♞xb4 ♞d1+]]

32...♞d3! Black gave back one pawn, but two are still left from his material advantage. It was more important to bring the h8 rook into the game and the perfect cooperation of the black pieces deprives White from finding sufficient counterplay. A nice idea to improve the position could be to drive the king to the comfort zone to g8.

33.h3 White misses the next strong move, but his position was lost anyway. [33.♞e2 33...♞c3—+]

33...♞c3! A very strong move, which forces the trade of the rooks with Rc1 next move! White cannot avoid it and of course all kinds of exchanges brings Black's victory closer...

34.♞e2 ♞c1+ 35.♞xc1 ♜xc1 36.♞f3 b3! 37.♞xf7 [37.♞a8+ 37...♞c7—+ and there are no more checks.]

37...♜e2+! White has no good square to leave from this check! [But not 37...b2?? 38.♞g8+! followed by Qxg7 check and Qxb2.]

38.♞f1 [38.♞h2 is refuted by 38...♞c7+ 39.♞xc7+ ♞xc7 40.♜d1 ♞c6—+ simply promoting the b-pawn with the help of the king.]

38...♜d4! Black is threatening with mate on c1 and also to promote the b-pawn in 2 moves with check. The game is over.

39.♞g8+ ♞b7 40.♞xg7+ ♞a6 41.♜d1 b2! [White resigned as 41...b2 42.♜xb2 ♞c1+ is mate.] **0-1**

(4) Korobov, Anton(2680) - Ivanchuk, Vassily(2726) [E15]

83rd ch-UKR 2014(11.3),
2014.11.22

GM Arkadij Naiditsch
Best rating: 2737

We are going to see a very wild game, which is maybe to be expected when Korobov and Ivanchuk meet, since both are very creative and fighting players. After the opening, Ivanchuk managed to get a very promising position thanks to a great exchange sacrifice, but in time trouble he misses his chance to convert his advantage and the game ends in a draw.

1.d4 ♘f6 2.c4 e6 3.♘f3 b6 A very solid opening choice from Ivanchuk, who simply plays every opening!

4.g3 ♟a6 5.b3 ♟b4+ 6.♟d2 The provocation of the bishop to d2 looks strange, but in fact it is clearly the main line. The white bishop belongs to b2 and not on d2, which is a good place for the knight from b1.

6...♟e7 7.♟g2 c6 Black of course wants to play d5 next. Another main line is 7...d5 8.cxd5.

8.♟c3 d5 9.♘bd2 White used to often play 9.Ne5 first.

9...♘bd7 Black is preparing c5, which is the main idea of this line.

10.♚c2 Does Korobov really want to castle queenside? Or is this move made to play e4 next?!

10...c5! Ivanchuk doesn't waste any time and attacks the white center. The white queen can be pretty badly placed on c2 because of the upcoming Rc8 move.

11.dxc5 White tries to unbalance the position. [In case of the simple 11.O-O 11...♚c8 the exchanges in the center would lead to a pretty equal position.]

11...bxc5 This is the right choice. [Another easy choice could have been 11...♘xc5 12.cxd5 Black gets an isolated pawn. 12...exd5 (12...♘xd5 13.♟xg7) 13.♘d4 and I think that Black's position is fine as well, but sometimes it is not that pleasant to play such a pawn structure knowing that theoretically it could be a dangerous position because of the weak pawn on d5.]

12.♘e5 Another aggressive move by Korobov. [12.e3 to avoid d4 would have been a much more solid choice, with a roughly equal position.]

12...d4! Ivanchuk plays a great positional exchange sacrifice! This is clearly something we should remember for our own games.

13. ♖xd7 This move is forced.

13... ♗xd7 **14.** ♕a5 Another forced move.

14... ♔c8 **15.** ♕xa8 White needs to take the exchange otherwise after Bb7 Black would just be much better.

15... ♔xa8 **16.f3** This move looks a bit strange to me. [Why not to castle queenside first?! Maybe the reason is to save a tempo on the f3 move. 16.O-O-O ; After 16.O-O an attempt to attack immediately is 16...h5 (16...O-O 17.a3 and White is probably better.) 17.e4 h4 and I think White's position looks really dangerous.]

16...O-O 17.O-O-O So which plan to chose now for Black?!

17... ♕b7! Another very good positional move. Before starting to push the f- and e-pawns, Black is trying to improve the position of his pieces as much as possible because any opening of a file could be a disaster for Black since the white rooks would immediately win on power.

18. ♖hf1 **f5** Black's pawns start to roll. Black just wants to play e5-e4 next.

19.g4! A good decision. Korobov is looking for counter chances, as to stand and wait for e5-e4 is not an option. But as we can see, White is already under quite a lot of pressure despite being a clear exchange up! What a deep understanding of chess Ivanchuk has to give up an exchange for just slowplay!

19... ♔b8 The black queen is joining the game and of course Black is trying to keep the position as closed as possible.

20.gxf5 exf5

21.b4!? Very creative play by White. Many other players would probably have chosen to play something like 21.Rf2, trying to be as solid as possible, but not Korobov, who doesn't like to be under pressure of getting squeezed and looks for chances in an open fight.

21... ♕g5 The black bishop on e3 is going to be a beast! [The position after 21...cxb4 22. ♖b3 ♗e5 is very unclear but at least now White has a clear plan of what to do next.]

22. ♖b1 ♕c6 Black continues following the strategy of keeping the position as closed as possible, allowing White to play b5 now, after which the white rooks would have no open files.

23. ♖b3 and White continues his best to open the d-file.

23... ♕a4 **24.** ♖b2 Does Korobov want to put his King to a3? Maybe he is trying to chase the bishop from a4, but it is extremely risky.

24... ♔b7 Maybe this move was already too slow. Moves like 24... cxb4 followed by Nc5 or just Be3 would have given Black a clear advantage in my opinion.

25.f4! White is using the fact that Black can't play Bf6.

25...♙e7 Not falling into the trap... [25...♙f6? would be a big mistake because after 26.♖xf5 d3+ 27.♙b1 dxe2 White has this little check: 28.♖e6+! ♙h8 29.♖xe2 with a big advantage for White.]

26.♖d3 ♖e8 Ivanchuk spots the weakness in White's position and this is the e2 pawn.

27.♖d2 ♙f6 All black pieces are perfectly placed.

28.♙a3? This move gives Black the chance of practically winning the game in 2 moves. [White should have continued with 28.♖g1 taking the g2 square under control, but Black's position is clearly much better anyway.]

28...♖a6? This is clearly not the best move. [The simple 28...♙xb3 29.axb3 ♖g2 would almost put an end to the game, as White can't hold the e2 pawn. 30.♖e1 ♙h4 and Black is just winning.]

29.♖c1 [In case of 29.b5 Black has a slow move like 29...Qe6 which leads to a nice position, but he can also play 29...♙xb5! 30.cxb5 ♖xb5 threatening to play c4 next, with a total mess!]

29...cxb4+ 30.♙xb4 [30.♙xa4 is losing on the spot because

30...♖b8! comes with the deadly threat of playing Qc6 next.]

30...♙xb3+ 31.♙xb3 ♖b8 The game seems to be almost over, but Korobov keeps on finding the only moves.

32.a3! is the only way to go on!

32...♙c5+ 33.♙a2 ♙e4! A good choice. [In case of 33...♙xd3 34.exd3 Black's position should be a bit better, but the white c-pawn gives him good chances to survive.]

34.♖b2! Once again Korobov grabs his only chance and this is to give up his queen!

34...♙c3+ too tempting not to play it...

35.♙xc3 ♖xc4+ This pawn of course had to be taken.

36.♙a1 ♖xb2 37.♙xb2 So now we have a very interesting position. White has 2 rooks for the queen and a pawn which is materialy speaking around equal, but the black king's position is very safe, while the white king is exposed and the pawns on e2, f4 and h2 could be potential targets, all of which clearly gives Black some edge here.

37...Ke6 It is hard to say whether to give the d4 pawn was the best decision. [Black didn't need to hurry and could just have played 37...a4 followed by h6-Kh7 and then let's see what happens.]

38. exd4 Of course White needs to take his chance.

38...xe2 39. ccd1 exd4+ 40. exd4 exxh2 Ivanchuk makes the right choice on move 40. [After 40...h6 White has the very strong 41. d1d2 and now both f4 and h2 pawns are protected and it is going to be very hard for Black to improve the position, which is probably just a draw now.]

41. d8+ The only move. White needs to do something right now or just resign because the Black pawns would start to roll.

41...f7 42. 8d7+ g8 Ivanchuk starts to repeat the moves, but why?! [After 42...g6 43. d6+ h5 44. xg7 h6 Blacks seems to keep good winning chances and is clearly not risking anything. 45. d1 h3 46. gb2 f3 followed by Kh4-h5, kh3-h4 etc. White would need to show an excellent defense to save the game here.]

43. d8+ f7 44. 8d7+

44...Kg8 It is a bit of a pity that such a great and interesting game ends in such a draw, especially for Ivanchuk who played fantastically but missed an easy win once and later on could not convert his advantage. **1/2-1/2**

Endgame section

(15) Eljanov, Pavel(2719)
- Zubov, Alexander(2588)

83rd ch-UKR 2014(11.1),
2014.11.22

GM Arkadij Naiditsch
Best rating: 2737

We are in the last round of the Ukrainian Championship and Eljanov is one of the leaders and needs a win to share the first place.

41.f5! In my opinion this is an excellent move. White is a clear pawn up, but there is quite a good chance that Black will manage to hold the position in case both pawns could be exchanged on the queenside, so White doesn't give Black any chance for consolidation by playing Bd7 or trying to exchange both pawns by playing a6.

41...a6 What can be more logical than a pawn exchange and making the e8 bishop stronger?! [41...gxf5 didn't make any sense because now White has the extra option of playing 42.g3 attacking both pawns, e5 and h5.]

42.g3 White is following his plan.

42...gxf5 Black had 2 options here. [The other possibility was 42...axb5 43.fxg6 fxg6 44.axb5 but here as well White has quite some winning chances.]

43.bxa6 [43.hxh5 would be premature since after 43...axb5 44.axb5 hxb5 45.g7 d7 Black is holding.]

43...bxa6

44.a5 The white a-pawn is most probably going to fall, but Eljanov lets his opponent work for it.

44...c4 Black is going for the a-pawn and what can be more logical than to attack the f4 knight to win atempo?

45.g3 **46.d5+** I don't think this is the best practical choice. [In my opinion White would have gotten serious winning chances after 46.hxh5 46...cxa5 47.fxd6 cxe5 48.fxa6 and because of the passed h-pawn and the very unlucky position of the black bishop on e8 White can hope for a full point here. Of course the position should objectively be a draw, but to defend it is far from easy.]

46...f8?! A very strange move... Now White gets very dangerous play. [Safer was 46...e6 47.hc7+ e7 White needs to try his only chance: 48.fxd6 cxa5 49.hd5+ f8 50.fxd8 g7 51.hf6 c6 and now we have a quite similar position as in the game, just in a slightly better version for

Black.]

47. ♖f6 Rd8 is coming.

47...♗b5 [47...♗c6 Attempting to put the bishop to a better position would not work because of 48. ♖d6 and Black has to play Bb5 which brings us back to the position in the game.]

48. ♖xh5 ♖xa5 **49.** ♖f6 White is counting on his h-pawn.

49...♔g7

50. ♔e3! A strong move. Eljanov brings his king into the game.

50...♔g6 Black is defending against the Kf4 threat.

51. ♖d8 and the white rook enters. Now is the question, what is White's threat?!

51...♖a3+ 52. ♔d2 Black is trying to get the white king away from the kingside, which is very logical.

52...♖a2+ 53. ♔c3 ♖a3+ **54.** ♔b4 Now that the white king is far away, Black can try to attack the e5 pawn.

54...♖e3 55. h5+! Excellent calculation by Eljanov! The h-pawn starts to move.

55...♔g5 56. ♖g8+ ♔h6 **57.** ♖h8+

57...♔g7 The only move. [57...♔g5 58.h6 ♖xe5 59.h7 and Black can't stop White from playing Rg8.]

58. ♖g8+ ♔h6 **59.** ♖h8+ ♔g7 Eljanov probably wanted to gain some time by repeating the moves.

60. ♖h7+ ♔f8 **61.** h6 ♖xe5 Black didn't have any better move... [61...♖xg3 62. ♖h8+ ♔e7 63.h7 and the h-pawn is a queen!]

62. ♖h8+ ♔e7 **63.** h7 It is a pity for Black, but there is no way to stop the h-pawn!

63...a5+ 64. ♔c3 Not falling for any tricks...

64...♖e3+ 65. ♔d4 ♖d3+

66. ♔c5 The white king escapes from checks, so Black resigned. We saw great endgame play by Eljanov, who used

his chances to put Black under a lot of pressure and finally won the endgame thanks to his excellent technique! **1-0**

**(16) Zubarev, Alexander(2588)
- Ponomariov, Ruslan(2711)**

Ukrainian Championsip,
2014.11.19

GM Csaba Balogh
Best rating: 2672

Sacrificing the rook for the pawn and a bishop would secure the draw, but the power of the bishop pair is especially strong in such positions. Ponomariov converts the advantage with nice technique. White's connected passers are quite useless, because they are not advanced enough to create counterplay.

42...e4 43.♖c1 White intends to bring his king towards the passed pawn. [White had no other move, as 43.h4 gives the important g3 square for the bishop, from where it perfectly supports the e-pawn. 43...♗g3 44.h5 e3—+; 43.g4 loses to 43...e3+ 44.♔g1 ♗c5—+ and e2 next.; 43.♔g1 43...♗c5+—+ forces the king back to the corner.]

43...♗b4 44.♔g1 ♗d2 45.♖c2 e3 46.♔f1 White temporarily manages to block the e-pawn and he creates the threat of Ke2 with the idea to sacrifice the rook on d2. Black finds the only move to win, the other bishop joins to the game...

46...b3! 47...c8 White must control the c4 square, otherwise Bc4 followed by e2 wins.

47...d7 48...c5 d6 49...c8 a4! Changing the diagonal, but keeping the same idea in mind, Bb5 check followed by e2.

50...b8 [50...e2 loses faster to 50...b5+ 51.d1 (51.f3 51...e2+) 51...a5! The bishops are cooperating perfectly. They cover the e8 and d8 squares and support the promotion of the e3 pawn. 52.c2 a4+]]

50...c7 [50...d1 also requires some technique, but at the end it brings the same result. 51.e8 h5 52.e4 d5 53.e7 d4 54.h3 b4 55.e6 d3 56.g4 f7 57.e5 d6+ White must leave the e-file, but then e2 wins in the next move.]

51.b1 The most tenacious defense, but it does not help. [51.b2 loses on the spot to 51...d1!+]]

51...c2! 52...a1 d3+ It is obligatory to send the king away from the e2 square, because then White could always threaten to take on e3 or d2.

53.g1 d6! The white king is far away now, so Black has time to activate his king. [53...e2 is too hasty as White could play 54.f2]

54.g3 with the idea to bring the king to g2-f3. [I was trying to make use of the h-pawn with 54.h4 54...e5 55.h5 f4 56.h6 c3 This is the prettiest win. (56...g3 is also good enough, Black is ready to push his e-pawn. White cannot prevent it by playing 57.a3 because 57...e2! still wins. 58.xd3+ g4 59.d4+ f5 60.g4+ e5+) 57.c1 e2 58.f2

58...e1=! 59.xe1 d4+ This pretty mate net helps Black to convert the advantage.]

54...e5 55.h3 [55.g2 is met by 55...e4+ 56.f1 f3 which will be similar to the game.]

55...c4 56.g2 d5+ This is the easiest, to prevent the king from coming to f3.

57.f1 f3 White is already completely paralyzed, but Black still needs to work a bit for the win, because after e2, Kf2 still controls the promotional square.

58.g1 [White does not want to open an entrance to the

kingside by moving one of his pawns. 58.h4 is met by 58...♔f5 followed by Kg4-g3 and then e2 wins.; 58.g4 also helps because of 58...♔f4 and Kg3 next.]

58...♔e4 The king's support of the passed pawn decides the outcome...

59.♖a7 [59.♔f1 59...♔d3 60.♔g1 ♘c3 61.♖c1 ♔d2 62.♖b1 ♘e4—+ and e2 next move wins.]

59...♔d3 60.♖e7 ♘b4 61.♖e8 Black can choose between many different winning plans.

61...♘e1 [Taking control over the e-file with 61...♘h5 62.♖e5 ♘f7—+ followed by Bd6 next move and when the rook leaves the e-file e2 wins.]

62.♔f1 [62.g4 62...♘f2+ 63.♔f1 ♘h4—+ There is no check on d8, so e2-e1Q are the next two moves.]

62...♘xg3 63.♖d8+ ♔e4 64.♖e8+ ♘e5 65.h4 ♘h5 66.♖e7 ♔f5 67.♔g2 e2 [White resigned in view of 67...e2 68.♔f2 ♔f6! and the rook cannot hold the e-file, therefore Bg3 promotes the pawn next. It was instructive to see how hopeless White was in this endgame, despite doing fine materially, but the strength of the bishop pair and the passed pawn decided the game.] **0-1**

Editorial Preface

A few first-class chess tournaments have come to an end. Here are the results of the most major ones:

Probably the strongest open in the history of chess took place in Qatar. 14 players with ratings over 2700 ELO participated, including such heavyweights as Kramnik, Giri, Mamedyarov, Vachier-Lagrave and many others.

The winner of the open (with an amazing score of 7.5/9) is Yu Yangui, a young Chinese GM. He is rated over 2700 already and is progressing quickly, so we can expect to see him in the world's top-10 quite soon. The 2nd and 3rd places were shared by Giri and Kramnik (7/9). Both of them have performed very well and have each won 6 games in a row at a certain point of the event.

A small, yet strong GM round robin tournament with just 6 players occurred in Barcelona. Csaba Balogh, one of the commentators of "Top GM Secrets", took the first place with a score of 3.5/5. Congratulations on another great result!

The results of the Russian Superfinal were quite surprising. Igor Lysyj played very solid enterprising chess and clinched the title with a score of 5.5/9. The 2nd place went to Dmitry Jakovenko with 5/9 and the 3rd - to Denis Khismatullin, who was quite amused to win a bronze medal with a modest result of 4.5/9. The biggest upset of the tournament was Sergey Karjakin finishing last.

In the female section Valentina Gunina has been just unstoppable. She started with 0/2 and "did a Caruana" by winning all the remaining 7 games. What a run! The 2nd place with 6/9 went to the experienced veteran Alisa Galliamova and the 3rd - to the young chess prodigy

Aleksandra Goryachkina (5.5/9).

The London Classic has attracted 6 chess stars and many other players, who will be competing in a number of entertaining events.

Hikaru Nakamura dominated the rapid open tournament and finished with a spectacular 9.5/10 score. The 2nd and 3rd places went to Anish Giri and Fabiano Caruana respectively.

The blitz event was a double round robin featuring Caruana, Anand, Nakamura, Kramnik, Giri and Adams. Adams, Nakamura and Kramnik scored 17 points each (3-1-0 scoring system). Michael was declared winner on tie-break.

The London Classic itself is just about to start. There will also be an interesting side match between Gawain Jones and Romaine Edouard.

Next week the World U-16 Olympiad is going to take place in Hungary. We will be focusing on the strongest young players and sharing with you annotations to fighting and brilliant games. Stay tuned!

We hope you will enjoy the current issue, featuring the duels of the very best GMs in the world.

Arkadij Naiditsch & Csaba Balogh

FIDE Youth Chess Olympiad Hosted by Hungary Already Breaks Records

Only four months after the Chess Olympiad in Tromsø where the greatest chess players of the world competed against each other it is already time to have a look at the best talents of the next generation. In December this year Hungary may organize a Chess Olympiad for the first time, the competition for youth aged under 16 years. The event takes place in the city of Győr and with more than a month to the start the organizers have already confirmed the entries of more participant nations than ever before at any Youth Chess Olympiad. It really seems that the best chess talents of all five continents will be present in Hungary between 12th-22nd December. Awarding the right of organization to Hungary is a clear sign of high international recognition of chess life in the country which is rightly confirmed by the fact that Judit Polgar who has been leading the FIDE world rankings for more than 25 years has agreed to be the face of the event representing talent and the Hungarian chess traditions all in one person or we could even say legend. By mentioning Judit Polgar let us not forget that after FIDE tightened on a rule that had existed earlier participation of girls are now guaranteed. In each team a maximum four of the five team members can be a boy.

The promo video of the Youth Chess Olympiad 2014 features Judit Polgar, Csaba Balogh, Olympic Silver medalist, Benjamin Gledura who was European Champion of his age group and Kata Karacsanyi who was the first to follow in the footsteps of Judit Polgar to win the National Championship topping all boys in their age groups.

You can see the video by clicking on this link:

<http://www.youtube.com/watch?v=PZu0iBrc5rE>

You can find more information about the FIDE U-16 World Youth Chess Olympiad 2014 on the official website of the event:

4 best games of the past week

(1) Giri, Anish(2776) - Oleksienko, Mikhailo(2620) [B12]

Qatar Masters Open 2014(4.1),
2014.11.29

GM Csaba Balogh
Best rating: 2672

Another very spectacular miniature crush by Anish Giri! Oleksienko likes choosing tricky sidelines, but sometimes they don't work out properly.

1.e4 c6 2.d4 d5 3.e5 ♖f5 4.h4 My favorite 4.h4 system in the Advanced variation of the Caro-Kan defense is getting very popular nowadays even on the highest level.

4...c5 A rare line, which turns out to be quite dubious after all. [4...h5 is the main line.; 4...h6 is the main alternative to 4...h5.; The point of both moves with h-pawn is to free the h7 square for the bishop in order to complete the normal development with e6, c5 and Nc6. 4...e6?? immediately drops a piece after 5.g4 ♗e4 6.f3 ♗g6 7.h5+—]

5.dxc5 ♘c6 6.♗b5 ♔c7

7.♘e2! This looks like a very strong novelty. I don't

know whether it is a prepared one or found over the board. Both are possible, because giving back the pawn for fast development is very logical. [7. ♘f4 happened before, but maybe Oleksienko had the machine-aided idea to play 7...e6 with the point, that after 8.g4 trying to trap the bishop 8... ♖a5+! 9. ♗c3 ♖b4! gives very strong counterplay for Black!]

7... ♖xe5 A brave, but not a great decision. White gets too many tempi and the undeveloped kingside pieces deprives Black from castling to the safety. [7...e6 is better, although White is doing well here as well 8. ♘e3 ♖xe5 9. ♗bc3 Black still has some difficulties with finishing the development, because 9... Nf6 runs into trapping the queen with 10.Bf4 and otherwise Nd4 is coming soon.]

8. ♘f4! Very nice play, reminds me to the games of the previous century, when people could play romantic chess with many sacrifices without being affected by the long computer-analyzed theoretical variations. Giri sacrifices all his queenside pawns, in order to complete the development as fast as possible.

8... ♖xb2 There is already no way back for Black. [8... ♖e6 looks also terrible after 9.O-O and Nd4 comes next with tempo!]

9. ♗bc3! Developing with tempo!

9... ♗f6 [9... ♘xc2 is met by

10. ♖xd5! ♖xa1+ 11. ♔d2 ♖d8! (11... ♖xh1? leads to quick mate 12. ♘xc6+ bxc6 13. ♖xc6+ ♔d8 14. ♘c7+ ♔c8 15. ♘b6+ ♔b8 16. ♖c7#) 12. ♘xc6+ bxc6 13. ♖xd8+ ♔xd8 14. ♖xa1 ♘g6 15. ♗d4 ♔d7

Black seems to be in control. He needs only one move to play e6, attacking the c5 with tempo, followed by Nf6-d5 and he consolidates his extra pawn. However, White has an enormous way to seize the initiative: 16.h5!! ♘xh5 17. ♖b1!+- the rook joins to the game and it should decide the game. Suddenly the black king faces a terrific attack.]

10.O-O! Obviously White does not waste time on protecting the c2 pawn. Now all the pieces are developed and it is time to punish Black for grabbing too many pawns instead of taking care of the kingside pieces.

10...♖b4 Trying to evacuate the queen from the danger zone. [10...e6 is met by 11.♖b1 ♜xc2 12.♞e1! keeping the queens on board to keep the attack even more dangerous. 12...♙xc5 13.♙a4 ♞d3 14.♖xb7 The game is over. Black was missing just one tempo to castle short, now the knight on c6 drops. 14...♞a6 loses to 15.♙xc6+! ♜xc6 16.♖c7 ♞b6 17.♘a4+-; 10...♞xc2 is refuted by 11.♞xc2 ♙xc2 12.♘d4+- wins.; 10...♙xc2 11.♞d2+- is also over, Black cannot leave the deadly pin.]

11.♖b1! White has already sacrificed two pawns, so the one on c5 should not be counted. It is more important to activate the rook, again with tempo!

11...♞xc5 12.♙a4! Simple and strong, White opens the b-file and it is not easy to protect the b7 pawn.

12...e5 Trying to develop with tempo by giving back one of the pawns. [12...O-O-O can never end in anything good. All white pieces are joining to the attack 13.♖b5! ♞c4 (13...♞a3 14.♞b1!+-) 14.♙b3!+- the queen is trapped!]

13.♙xe5 ♘g4 [Unfortunately for Black, he could not play 13...♙e7 14.♖xb7 O-O because of the simple 15.♙xc6 ♞xc6 16.♖xe7+-]

14.♙g3 O-O-O Well, this is equal to resignation, but there was nothing else to do. Dropping the b7 pawn would have led to

the same result, the pin on a4-e8 turns out to be deadly.

15.♙xc6! Sometimes the simplest moves are the strongest. White eliminates the only defender of the king and intends to bring all his pieces to attack again with tempo...

15...♞xc6 16.♘b5 ♙c5 17.♘ed4 White attacks something in each move and meanwhile he gets all his pieces to better places.

17...♞f6 18.♞f3 [Black decides to finish this terrible suffering. The only question when will he get mated. White is threatening to take on f5 and also to drop the queen to the queenside with Qc3! Some illustrative lines: 18.♞f3 18...♙e6 (18...♙xd4 19.♘xd4 ♞xd4 20.♞xf5+ ♖d7 21.♖xb7!+-) 19.♘xa7+ ♙xa7 20.♞c3+ ♙d7 21.♖xb7+-] **1-0**

**(2) Mamedyarov, Shakhriyar(2757)
- Giri, Anish(2776) [A22]**Qatar Masters Open 2014(5.1),
2014.11.30GM Csaba Balogh
Best rating: 2672

A shocking game, where a top player is losing in 21 moves with white.

1.c4 Mamedyarov is a 1.d4 player, but probably he wanted play some less theoretical position against Giri, who is well-known from his huge preparation.

1...♘f6 2.♘c3 e5 3.g3 ♙b4 4.♙g2 O-O 5.e4 ♙xc3 6.bxc3

6...♖e8!? Probably this came as a surprise to White. [The main move is 6...c6 and it usually transposes to the game by different moveorder. However Mamedyarov's countryman and good friend played an interesting rare move here 7.d4 which most probably White wanted to repeat. However, Giri's start with 6...Re8 deprives White from this possibility because of the simple exd4 and White cannot take back with the pawn as the pawn is hanging on e4.]

7.d3 c6 8.♘e2 d5 9.cxd5 cxd5 10.exd5 ♘xd5 We are back to the theory now, but this is rightly considered to be very

comfortable for Black.

11.♖b1 White's benefits in this position are the two bishops, from which especially the one on g2 is extremely strong, controlling the long diagonal. White tries to put even more pressure on the b7 pawn to disturb the development of the c8 bishop. However it turns out to be too slow. [11.O-O 11...♘c6 12.h3 an attempt to avoid the happenings of the game, but Black is completely fine after (12.♗b3 12...♘b6 13.♖d1 ♙e6! followed by trading the strong bishop with Bd5, Black ends up with better pawn structure and a slight advantage.) 12...♙f5 and Nb6 next. Black's target is the pawn on d3, which will get under big pressure after Qd7 (attacking on h3 with tempo) and Rad8.]

11...♘c6 12.O-O

12...♙g4! A very unpleasant move to deal with, pointing out the drawback of the slow 11. Rb1 move. Black is threatening to take on c3. White must close his nice bishop to unpin himself.

13.f3 [13.♙d2 is met by 13...♗d7 and Rad8 next. White has problems with the d3 pawn and the g4-d1 pin.]

13...♙f5 This is the most principled retreat to keep an eye on the d3 weakness. [13...♙e6 also makes sense to avoid the complications. Black wants to play Qd7, Rad8 and Nb6. Now on 14.♖xb7 ♘b6 Black simple traps the rook, he is threatening

to take it with Qc8 , Bc8 or Na5 and now after 15.f4 ♖c8! works.]

14. ♖xb7 The critical test, otherwise White ends up in much worse position from the positional point of view.

14... ♜b6 15.f4! Opening the diagonal again! White tries to save his rook.

15... e4! Excellent reply! Giri prefers to keep the initiative to grabbing material. White still needs to work to save his rook, meanwhile, Black locks the g2 bishop or taking everything on e4, leaves White with a very exposed and vulnerable king's position. [15... ♖c8 is now met by 16.fxe5! ♖xb7 (16... ♜g6 17. ♜d4! is strong. It saves the rook.) 17. ♖xf5 White has two pawns for the exchange and suddenly all his pieces are becoming very active. The initiative passes to White, this is what Black should avoid.]

16. ♖b3? A mistake, but White's position was very difficult to play. [The only move was 16.dxe4! 16... ♜xe4 17. ♖b3! (17. ♖xd8 drops a piece after 17... ♜xd8! 18. ♖c7 ♜xg2 19. ♜xg2 ♖xe2+--; 17. ♜xe4 17... ♖xe4 is also bad. The e2 knight is hanging, the b7 rook is still trapped and the king is weak. This is too much for white.. . 18. ♖c2 ♖d5 19. ♖d1 ♖c4-- the knight has no free square!) 17... ♖f6 with more than enough compensation for the pawn, but still this would have been the only chance for White.]

16... ♜e6! Protecting the f7 pawn with tempo.

17. ♖b5 exd3! White opens the diagonal again, but of course he takes a pawn for free and all the concrete variations justify, that Black is winning in all the lines.

18. ♖xb6 [18. ♖xc6 18... dxe2 19. ♖e1 ♖c8 20. ♖b5 ♜c4-- will be the same as the game.; 18. ♜xc6 is strongly met by the intermediate move 18... ♜c4!-- followed by taking on e2!

Otherwise the queen could have taken backward to e2.; 18. ♜d4 18... ♜xd4 19. cxd4 ♖xd4+ 20. ♖h1 d2-- promotes the pawn.]

18... dxe2 19. ♖e1 Black has more than one promising continuation, but Giri finds a beautiful way to convert the advantage to full point.

19... ♜c4! Giri works out a spectacular win, in which the e2 pawn is important to be protected. [19... axb6 20. ♜xc6 ♖a5 21. ♖xe2 is also winning for Black, but White can still fight.; On the direct 19... ♖d1 20. ♖f2 ♖ad8 White can put up resistance with 21. ♖xe2 ♖xe2+ 22. ♖xe2 axb6 23. ♜xc6]

20. ♖xc6 [20. ♖xc4 20... ♖xb6+--; 20. ♜xc6 20... ♜xb5 21. ♖xb5 ♖d3-- Black ends up with material advantage and an e2 pawn!]

20... ♖d1! 21. ♖f2 ♖ad8!! This is the point! [White resigned

in view of the threat of taking on Qxe1! Kxe1 and Rd1 check followed by promoting the queen with mate! 21...♖ad8 The only move to avoid getting quickly mated is 22.♙xe8+! (22.♙f3 22...♙xe1+! 23.♙xe1 ♖d1+ 24.♙f2 e1=♙+ 25.♙g2 ♙f1#) 22...♖xe8 23.♖b2 ♙d3—+ the Black ends up with winning material advantage!] **0-1**

(3) Yu, Yangyi(2705) - Kramnik, Vladimir(2760) [C65]

Qatar Masters Open 2014(9.1),
2014.12.04

GM Arkadij Naiditsch
Best rating: 2737

We are in the last round of the Qatar Open and at the first board of it. Kramnik is leading the event with 7/8 points, where he won the last 6 games after having started the event with 2 draws. Yu Yangyi is his direct competitor with only 0.5 points behind. Clearly, Kramnik wasn't expecting a short draw and was prepared for a very tough game. What actually happened was a disaster from Black's point of view. White has managed to get comfortable play. Kramnik tried to solve his problems in a tactical way, but missed Yu Yangyi's brilliant replies. White won a very nice game.

1.e4 e5 2.♘f3 ♘c6 3.♙b5 ♗f6 As usual, Kramnik is playing his favourite Berlin

4.d3 This is also quite expected. The Chinese players tend to avoid endgames.

4...♙c5 the very main line. Another possible answer is 4...d6

5.♙xc6 dxc6

6.♗bd2 White's idea in this line is to play for a better pawn

structure, but usually Black is doing very solid here and showing reasonably good results

6...♙e6 one of the main moves, avoiding White's Nc4 next

7.O-O now White wants to take on e5

7...♘d7 protecting the e5 pawn and preparing Ng5

8.♘b3 White attacks the c5 bishop and wants to play Ng5 next

8...♙b6 What bishop should Black give up: the dark-squared or the light-squared one? [in case of 8...♙e7 9.d4 and White is doing a bit better; 8...f6 9.♘xc5 ♘xc5 10.♙e3 White has a small edge due to having a better pawn structure]

9.♘g5 Of course, White is going for the Black's bishop pair. Should Black be in time to play f6, White would be at least not better

9...♙xb3 10.axb3 a very interesting situation from the positional point of view.

10...f6 What can be more logical than chasing away the knight from g5 and strengthening the center?

11.♘f3 ♘f8 I am not sure about this move. Of course, the Black knight belongs to e6-it is a great square, but maybe it would have been simpler to just castle short, then to play Re8 and only after that go for Nf8-Ne6

12.♘d2! What a great move by Yu. White is not only planning to get the knight to c4-probably the best location for the piece, but as well wants to weaken Black's pawn structure

12...♘e6

13.♙h5+! this was the main idea of the early Nd2. Really deep positional play by White, who is not afraid of losing 2 tempi on weakening Black's pawn structure

13...g6 14.♙d1 Now Black has to decide what to do next. White's idea is simple: to play Nc4 followed by Kh1 and f4

14...♙c5 Kramnik is preparing to play b5 - a very risky plan, because now Black's pawn structure is going to be really vulnerable! [Maybe Black could have tried castling long 14...♙e7 15.♘c4 and the seemingly shocking 15...a6!? with the idea is to castle long 16.♘xb6 cxb6 17.f4 O-O-O and probably White is doing a bit better, but things are far from clear. An excellent position of the Black knight on e6 always provides some counter-chances]

15.♘c4 b5 Kramnik is persistently following his plan

16.♘a5 ♙d7 Seems like the White knight on a5 is doing "nothing", but very soon it will become the key piece on the board

17.♙e3! a move that Kramnik has clearly underestimated. White not only wants to exchange the Black bishop, but the main idea is to play Qd2-Qc3, after which the pawn c6 is going to be very hard to defend. Also, we should not forget that one day White's control over the a file will offer him an advantage

in the endgame.

17...♙b6 avoiding the direct exchange of the bishops and hoping to play c5 next. It's clear that Black has done something very wrong. To play Bc5-Bb6 and then again Bc5-Bb6 can't be recommended

18.b4 White continues following his positional plan

18...O-O 19.♖d2 Qc3 is coming and Kramnik decides to try his chances in active play

19...f5?! I think this has been a clear miscalculation

[Black should have continued with a tough and passive defense 19...c5 20.bxc5 ♙xc5 21.♙xc5 ♘xc5 22.♖e3 and of course White is doing clearly better, but Black's position is still very solid]

20.exf5! another perfect choice by White. Before playing Qc3 it is important to open Black's position as much as possible in the center

20...gxf5 21.♖c3 the pawns e5 and c6 are under attack

21...f4 This must have been Kramnik's idea. Things are getting forced now

22.♙xb6 Nothing else to play

22...cxb6 23.♘xc6 The only correct choice. Could it be that

Kramnik has underestimated this move of White when he played 19... f5?! [a big mistake for White would be to play now 23.♖xc6? now Black has a few decent options 23...♖f7 is one of them 24.♘b3 ♖ac8 25.♖e4 f3 with a very unclear game]

23...♖d6 [White is winning in case of 23...♖ac8 24.♘xe5 ♖d6 and now comes a very nice move 25.♖b3! small, but nice tactics. Black can't take on e5 25...♖xe5 26.♖fe1 and White is winning back the e6 knight and keeping a winning position]

24.♖xa7! Yu Yangyi keeps cool and continues disposing of Black's pawns. This is clearly the strength of the Chinese players: they have no emotions during the game and calculate lines very precisely, making few mistakes [24.♘xe5 24...♘d4]

24...♖xa7 25.♘xa7 f3 Kramnik went all-in with his counter-play. Would you be afraid here as White?

26.♖c6! White continues playing just perfectly! The White queen on c6 will not only attack the e6 knight, but will as well protect the White king in many ways on the diagonal a8-h1 [position would be much less clear in case of 26.♘xb5 26...♖d7 27.♖c4 ♙h8 and Black wants to play Nf4 next with a very dangerous attack]

26...♖e7 of course, Black needs to keep the queens on the board

27. ♖xb5 ♕h8 Black tries his last chance [not helping Black at all is 27...fxg2 28. ♖xg2 ♕h8 29. ♖h1 and the White king is feeling safe on h1]

28.g3! another very cool and strong move! Black is not in time to create any real threats on the light squares

28...♖f7 The Black queen is going to h3 via f5

29.♖a1 White wants to play Ra8 next. As more pieces are exchanged, Black's attack is getting extinguished. By now we can already state that White is just totally winning

29...♘g5 the rest of the game is a pain for Black

30.♖a8 ♖e7 Black doesn't even have a single threat and White is already two pawns up

31.h4 ♘h3+ 32.♖f1 The Black knight on h3 will soon be stranded.

32...e4 33.♖xe4 This encounter was quite one-sided. Yu Yangyi played a really fantastic game with great positional play and later on, when needed, demonstrated his ability to calculate accurately. Kramnik tried to make things complicated, but clearly missed something, and White had no difficulties securing the full point. This must have been the most important tournament victory in Yu Yangyi's career so far. Congratulations on the very strong and brave play! **1-0**

(4) Nepomniachtchi, Ian(2714) - Vitiugov, Nikita(2738) [C19]

67th ch-RUS 2014(9.3),
2014.12.07

GM Arkadij Naiditsch
Best rating: 2737

We are in the last round of the Russian Superfinal. Nepomniachtchi (4.5/8) needs a win to get a theoretical chance on the title. Vitiugov (3.5/8) is more or less playing for fun. Ian is a quite popular and well-known player internationally. He has few great results in classical chess and many great ones in rapid and blitz events. Moreover, he has been one of the seconds of Magnus Carlsen. Another thing worth mentioning about Ian is his "crazy" chess. Many original ideas, sometimes very strange, irrational play and clearly no fear or losing make his games very exciting to watch!

1.e4 Ian is playing almost all the openings possible. For example in Round 2 of the tournament he started with 1.f4 against Karjakin and won a very nice game

1...e6 this move should have been expected. Vitiugov has been a French Defense player for ages and has written a very good book on the opening

2.d4 d5 3.♘c3 The very main line. 3.Nd2 another popular move, followed by 3...c5, where Black is actually doing fine at the current moment

3...♗b4 a little surprise. Usually Vitiugov plays 3...Nf6

4.e5 c5 5.a3 ♗xc3+ 6.bxc3 ♘e7 7.♖g4 with this move we are entering a long theoretical line. A calmer option for White is to

play 7.h4, which is getting more and more popular lately. The main idea is to play h5 and win some space on the kingside, which will be very important later in the game

7...cxd4 one of the sharpest lines! [7...♖c7 would lead to the same position as in the game after a transposition; 7...O-O 8.♙d3 f5 9.exf6 ♜xf6 10.♙g5 ♜f7 11.♙h5 g6 12.♙d1 is another popular line where things are far away from clear]

8.♙xg7 ♜g8 9.♙xh7 ♙c7 In the current position a lot of games have been played at the highest level and it seemed like Leko has found a way to be doing better with White, but maybe things are more complicated than the current theory implies

10.♘e2 ♘bc6 11.f4 So far the play has been pretty much forced.

11...dxc3 the main move

12.h4 This is not something most people would be analyzing. Notably, Nepomniachtchi himself has played a couple of games here as both Black and White before, so probably the position is well-known to him [12.♙d3 seems to be one of the main moves to analyse 12...d4 13.♘xd4 (13.♘g3 13...♙d7 14.♙e2 O-O-O 15.♜b1 is the other interesting choice for White. The position is quite complicated) 13...♘xd4 14.♙xd4 ♙d7 15.♜g1 ♘f5 16.♙f2 ♙c6 17.♙d3 this was a game between Leko

and Caruana where White has achieved a winning position, but managed to spoil it and achieve just a draw. It seems like people have found a defense for Black. If you like to analyze complex position, this is a treat for you!; 12.♘xc3 12...♘d4 13.♙b2 ♙d7 14.O-O-O ♙b6 15.♙d3 ♘df5 is another way to proceed for White. This position is also very sophisticated.]

12...♙d7 13.♙d3

13...d4! a very typical and important move for this kind of positions. Black's idea is to open the position as much as possible in order to launch an attack on the White king on e1

14.h5 and, of course, White's idea is to make use of the h free pawn, which secures almost every time a winning endgame

14...O-O-O 15.♜b1?! to me this move looks a little strange. Of course it is good to put the rook on b1, but maybe it would have been even better to start by pushing the h pawn as far as possible?! [15.h6 should be clearly the main move here. It has been tried before by many strong grandmasters.]

15...♙b8 Black's idea now is to get the bishop to b7. This idea is nothing new as well.

16.g3? This move looks logical, but in fact I think it is not the best one. White really had to play 16.h6

16...♙c8 Black continues with the manoeuvre

17.♙g2 b6 and now it is really hard for White to find the right plan what. It is clear that White's play should be on the kingside, but why did White play g3-Bg2 instead of h6-h7 and g4, saving at least a tempo?

18.♙f3 ♙b7 19.g4 White decides that the g4 move is needed anyway. It stops Black from playing Nf5 at a certain point. On the other hand, Black will now start his rush on the White king's position. White's play over the last 4 moves looks too slow.

19...♞a5! Great play by Black! Not only the exchange of the light-squared bishops is now forced, which clearly weakens White's position, but as well the Black knight is going to c5!

20.♞h3 And this move is really strange. Maybe White was hoping to gain control over the d3 square with his rook from h3, but it actually doesn't matter much anymore [White really had to push his h pawn 20.h6 20...♙xf3 21.♞xf3 ♞b7 22.h7 ♞h8 and I think Black's position should anyway be better here. It is difficult to find a defense against Nc5-d3]

20...♙xf3 21.♞xf3 ♞b7 so the Black knight is going to c5

22.h6 better later than never

22...♞c5 23.h7 ♞h8 What can White do now? How to stop Black from playing d3 next? I don't know

24.♞g2 not helping much, but at least it irritates the opponent

24...♞d7 strong move, but Black could have already forced a win here. There is no way of stopping Black from playing d3. White's position is just lost [Black could have gone for 24...d3! 25.♞xc3 and the very nice

25...♞a4! (of course not 25...dxc2 26.♞xc2) 26.♞xa4 dxc2 attacking the b1 rook and threatening to play Rd1 next. There is no escape for White 27.♞a1 ♞d1+ 28.♞f2 and after the cool, killing move 28...♞c4! the game is over]

25.f5 [not helping as well is 25.♞b4 25...d3 Black destroys White's position 26.♞xc3 dxc2 27.♞xc2 ♞d3+ 28.♞f1 ♞xb4 29.axb4 Black is an exchange up already 29...♞d5! seems to end the game on the spot. The White king will get mated very soon, or White is going to lose the h7 pawn and the game.]

25...d3 26. Nxc3 Qd4! a fantastic move! White can't defend the knight on c3 in a normal way

27. Qd2 What to say about Whites position here?! A move like 27.Kd2 could only have brought a smile on Vitiugov's face :)

27...Nd5 Black continues playing safe and strong moves

28. Nxd5 Ne4+ Another Black piece joins the attack

29. Qd1 Black is just a pawn down, but really almost all the White pieces are hanging now [White had a nice option of getting mated in the middle of the board after 29.Qe1 29...dxc2 30.Qxc2 Qg1+ all is forced now 31.Qe2 Qf2+ 32.Qd3 Qxd5+ 33.Qxe4 Qd4# what a beautiful mate :)]

29...Qxd5 30. Qe1 [Of course, losing is 30.Qxd3?? 30...Nc3+ followed by Qxg2 with a full queen up]

30...Qa2 the rook on b1 can't be protected

31. Qxb6+ axb6 32. Qxe4 White is trying to fight, but it doesn't really work out well

32...Qb1! the last precise move of the game. The bishop on c1 can't be protected

33. cxd3 [not helping is 33.Qe3 33...d2+]

33...Qxc1+ 34. Qe2 Qc8 Surprisingly, White hasn't resigned by this point

35. Qf3 Qc2 Black is a up plus having a mating attack. Looks enough to win at least 2 games :)

36. Qg3 Qg1+ and the checkmate is approaching

37. Qf4 Qf2+ 38. Qg5 exf5 Vitiugov starts taking pawns

39. Th1

39...fxe4 and finally White threw in the towel and admitted

that this game has been nothing else than a disaster from the beginning till the end. Actually, it is a great example of what to do for Black and what to avoid for White in such structures.

0-1

(15) Harika, Dronavalli(2505)
- Harikrishna, P.(2725)

Qatar Masters,
2014.11.26

GM Csaba Balogh
Best rating: 2672

The material is quite limited and the outcome should be a draw, although Black can still press a bit, because his rook cuts the white king along the f-file and the g4 pawn has good chance to fall.

64. ♖e3 Not a mistake objectively, but the arising rook endgame requires very accurate defense by white. [From practical point of view, it is much easier to sacrifice the knight for the pawn and hold easily the rook vs the rook+knight. 64. ♖e7 64...g5 65. ♖f5+ ♔h3 66. ♖d4= and Ne6 or Nf3 next.]

64... ♖xe3 65. ♔xe3

65... ♔g3! The move, which creates the biggest problems. Black shoulders the king away from the g-pawn. White cannot avoid losing it and unless he could get his king somehow under the g-pawn, White is going to lose the game. [65...g5 is another principled try with the idea to fix the weakness on g4 and play Kg3 next. White holds after 66. ♔e2 ♔g3 67. ♖d4 ♔g2 Black tries to cut the king with another line away, but White starts counterattack... (67... ♖e7+ is met by 68. ♔f1=; Important, that the pawn endgame is drawn 67... ♖f4 68. ♖xf4 ♔xf4 69. ♔f2 ♔xg4 70. ♔g2= White has the opposition.) 68. ♖d5 ♖e7+ 69. ♔d2 ♖g7 70. ♔e2= holds the draw.]

66. ♖a4? The decisive mistake, Black is winning now. [The only move to save the game was 66.g5! White holds fairly easily, because the only way to win the g5 pawn allows the white king to get to g1. 66... ♖f5 67. ♔e2 ♖xg5 68. ♔f1 ♔h2 69. ♖h4+!= Important to avoid Rf5, which could have forced again the white king got out under the pawn.]

66... ♖e7+! Cutting the king with another line is a serious achievement for Black.

67. ♔d2 g5! Fixing the weakness and getting the pawn a square closer to the promotion.

68.♖a1 Trying to defend with the frontal attack method, but it does not help. [In case of waiting policy 68.♖b4 Black wins after 68...♔f3 69.♖a4 ♖e2+ 70.♔d1 ♖g2

Black wins the pawn and White has no time to get under the pawn. 71.♖a3+ (71.♔e1 runs into 71...♖g1+! important intermediate check to keep the king away 72.♔d2 ♖xg4—+) 71...♔xg4 72.♔e1 White seems to hold, but...

72...♖g3! The only winning move! Black wants to cut the king again with Rf3! The only attempt for White is 73.♖a4+ ♔h3 74.♔f2 g4! 75.♖a8 ♔h2! hides the king away. After preventing Kg1, Black is threatening again with Rf3. 76.♖h8+ ♖h3 77.♖g8 (77.♖f8 77...g3+—+ promotes the pawn automatically.) 77...♖f3+ 78.♔e2 ♔h3—+ and Black wins with the bridge-building method.]

68...♖e5 [68...♔xg4 is also winning 69.♖g1+ is White's idea and Black cannot keep his king in front of the pawn 69...♔h5 70.♖h1+ ♔g6 Black is ready to push g4, therefore the only move is 71.♖g1

We have reached a very important theoretical position! 71...♖e5! is the winning move. Black protects his pawn and prepares to activate the king, as after the check he can already go forward with his king. However with the white king on d3, the position is drawn, as White could play Kd4, attacking the rook forces it to leave it's ideal position 72.♔d3 ♔f5 73.♖f1+ ♔g4 74.♖g1+ ♔f3—+ is winning now!]

69.♖g1+ [69.♔d3 69...♔xg4 70.♖g1+ ♔f3—+]

69...♔f2 70.♖h1 ♖d5+! Driving the king even further. Black should always live with such possibilities.

71.♔c3 ♔g3 72.♖g1+ ♔f3 73.♔c4 ♖d2 74.♔c3 ♖g2 75.♖f1+ ♔xg4 The rest is easy, Black only needs to use the bridge-building!

76.♔d3 ♔g3 77.♔e3 g4 78.♖f8 ♖a2 79.♖g8 ♔h3 80.♔f4 ♖a4+ [White resigned in view of 80...♖a4+ 81.♔e3 g3 82.♔e2 (82.♔f3 82...♖a3+—+) 82...♔g2 83.♖g7 ♖e4+ 84.♔d3 ♖e5 85.♔d2 ♔f2 86.♖f7+ ♔g1 87.♖g7 g2 This is the bridge-building. 1. Black cuts the king with lines away from the pawn. 2. Advances his pawn to the 2nd rank. 3. Puts

his rook to the 5th rank to get a shelter for his king. 4. He rescues his king from behind the pawn. 88.♖g8 ♔f2 89.♗f8+ ♔g3 90.♗g8+ ♔f3 91.♗f8+ ♔g4 92.♗g8+ ♖g5—+ The bridge has been built up and the pawn promotes.; 80...♗f2+ 81.♔e3 g3—+ leads to the same.] **0-1**

(16) Zvjaginsev, Vadim(2655) - Lysyj, Igor(2686)

67th ch-RUS 2014(7.1),
2014.12.05

GM Arkadij Naiditsch
Best rating: 2737

White is a pawn up, but the b3 pawn is under attack. In case Black manages to win the b3 pawn, the position is, of course, a draw. In case b3 pawn survives, White's chances to win the game are very good.

28...♟a3 a very natural move, although it already makes the things for Black very tricky. Instead Lysyj should have calculated the lines very accurately and reached a forced draw [Here is the line: 28...♟xb3 29.♟c6 This position looks lost at first glance, but it should be drawn after 29...♟g5! the only move 30.♗xe8+ (In case of 30.♟xe8 30...♟xc1 31.♟xf7+ ♔xf7 32.♗xc1 ♖d1+ 33.♗xd1 ♟xd1 this opposite color bishop endgame is just a dead draw) 30...♗xe8 31.♗b1 Black's position looks lost, but Black can escape by making a few only moves

31...♙a2! a very strong resource 32.♖b2 ♜c8 and again the only move for Black 33.♙b7 (33.♙d7 33...♜d8 and the position is equal) 33...♜c1+ it's very hard to find this idea over the board 34.♙h2 ♜b1! attacking the White rook and simultaneously exploiting the position of the White bishop on b7 35.♜xa2 ♜xb7

36.♙e3 and again a move which is not that easy to see from far away 36...h6 now it's time to shake hands]

29.♜a1 White is trying his best chance!

29...♜e7?! this move still holds, but now the variations are becoming quite challenging to find for a human! [a more simple way of fighting for a draw was to play 29...♙b2 30.♜a2 ♙c3 31.♜e3 ♙d2 32.♜e2 ♙b4 and it is very hard to find a way

for White to save the b3 pawn from falling. The game should probably end peacefully.]

30.♙b6! an excellent move by White who is taking all his chances!

30...♜b8 31.♙g2 What to do now for Black?! To play a bad endgame being a pawn down or to go for the risky complications?

31...♙xb3 Lysyj is trying his luck [31...♜xb6 32.♜xa3 g6 would lead to a position a pawn down, but Rb6 is perfectly placed, putting pressure on the b3 pawn, and Black has the idea of playing Re8-Reb8 next. It is a 50-50 position from a practical point of view: White's chances of winning and drawing are more or less equal.]

32.♙e3 What a funny position! The material is equal and almost nothing is left on the board, but Black's pieces are under the attack and the 8th rank is weak. Therefore, White has excellent chances all of a sudden.

32...♙d6? after this move the position is already lost [The position should still be drawn after 32...♙b2 33.♜ab1 looks like White is winning, but Black has an amazing strong reply

33...♙a4! 34.♖e2 ♘e5 35.♖xb8+ ♘xb8 36.♖a2 and again Black is just in time to save the game with precise moves 36...♙e8 37.♙c5 ♖c7 38.♙d4 ♖d7 39.♙b6 ♙d6 40.♖a8 ♖e7 it is almost impossible to play at this level for a human]

33.♖a6! Zvjaginsev doesn't miss his chance

33...♙c7

34.♖b1! ♙e5 [Of no avail is 34...h6 35.♖a3 ♙e6 36.♖xb8+ ♙xb8 37.♖a8 ♖e8 38.♙f4 winning a piece and the game]

35.♖a3 Black can't avoid losing material

35...♙c4 36.♖xb8+ ♙xb8

37.♖a8 What an instructive endgame! Very rarely we get to see such a horizontal and vertical play of the pieces on a board where almost no more pawns are left! **1-0**

Editorial Preface

We are enjoying another fantastic week of Chess. The London Chess Classics, the Mind Games in China and the U-16 Olympiad in Hungary are the Top 3 events of the week.

Our long-term subscribers know that we usually try to bring you commented games from the strongest players in the world, but this week and next one, we will make an exception and focus on the U-16 Olympiad where many upcoming young stars are competing for their countries. The games might be not as tight as on the highest level, but that makes them even more fun to watch, because they can sometimes turn for 180 degrees a couple of times! :)

But let's first come to the finished event in London:

In the classical tournament with only 5 rounds (a 6-players round robin) there was a share for first place between Anand, Kramnik and Giri, who all finished on 3/5. Then followed Nakamura on 2.5/5, Caruana on 2/5 and Adams on 1.5/5. Nakamura played his usual fighting chess, while Anand tried to be as safe as possible, winning just one game in the Berlin with Black!! Kramnik played more attractive chess and his result of +1 was fully deserved. Michael Adams was clearly the "black cat" of the event as he played really great chess, but scored far less points than he could have. A result of 1.5/5 is just crazy if you look at the positions he got. Giri as usual showed great preparation and fighting chess in each game and finished on a deserved result, while Caruana could have scored a bit more, but with a loss in round 1 it was difficult to recover from it later on.

All in all this was a great and very interesting event.

The Mind Games in China:

Who is not in London is in China! A fantastic line-up is competing in Rapid, Blitz and Basque Chess (where you play your opponent on two boards simultaneously, once with the white pieces and once with the black pieces) and the name of the man of the hour is Grischuk!!

After winning the rapid event in great style with 5/7, he went on to win the blitz event with 19.5/30. It is an amazing result to win both events unshared! The second man's name is Vachier Lagrave, who finished second in rapid with 4.5/7 and as well second in blitz, with 18.5/30.

In the Women section, Russian champion Gunina won the rapid with 5.5/7, while second place went to Hou Yifan with 5/7 and Ushenina finished 3rd with 4.5/7.

In the blitz event, Hou Yifan was unstoppable as she scored 22.5/30, while 2nd-3rd places were shared by Gunina and Anna Muzychuk, both with 19.5/30.

And now we come to the U-16 Olympiad that is currently under way in the city of Gyor, in Hungary. 54 teams from 38 countries and 5 continents (which amounts to a total of 257 players) are competing in the biggest U-16 Chess Olympiad in history, which is a team event where every team must have a female player.

The organizers tried to make the event as good as possible, as this is the first step of the preparation in order to try and host the Chess Olympiad in 2020. A nice hotel, a great playing hall and many side events are provided to the players with the clear intention to show that Hungary is not only a leading country for professional chess players, but also a great host with powerful organizational abilities. The opening ceremony of the event took place in the National theatre with ballet, Latin dance and a lot more spectacular events on show.

A lot of interesting and funny games have been played between the young chess players and we bring you the most crucial ones, which feature great fighting spirit and nice tactical blows. The competition will be played over 10 rounds and we have not even reached the halfway mark as only 4 rounds having been played so, so it is too early to say who is going to be the winner...

We hope you enjoy the games of the young and talented! :)

Arkadij Naiditsch & Csaba Balogh

5 best games of the past week

2014.12.13

GM Csaba Balogh
Best rating: 2672

In general young players like attacking chess, but the Iranian talent with the black pieces shows very deep understanding in the very difficult Berlin endgame...

1.e4 e5 2.♘f3 ♘c6 3.♙b5 ♘f6 4.O-O ♘xe4 5.d4 ♘d6 6.♙xc6 dxc6 7.dxe5 ♘f5 8.♚xd8+ ♚xd8 Here we are! The Berlin endgame. It is very risky to go for it with both colors if you have not studied the positions deeply enough. We will see how easily one can get outplayed...

9.♘c3 ♙d7 The Bd7-Kc8 systems are considered to be an attempt to win or at least to get a sharp position, while the Ke8 systems are rather for a draw.

10.♘e4 I believe that this is already an inaccuracy. It is better to make other developing moves first and decide about the direction of the c3 knight later. White usually employs the

Ne2-f4 plan with the idea to support an e6 break. Now the knight is heading to g5, but this can easily be parried.

10...h6! Getting control over the g5 square and restricting the mobility of the e4 knight.

11.b3 ♖c8 12.♙b2 b6 The standard plan for Black. The long term idea is to connect the rooks and make use of the bishop pair.

13.♖ad1

13...c5! This is a known idea when the knight leaves the c3 square. Black gains space on the queenside with c5, using the fact that White cannot play Nd5 anymore. Black wants to accomplish the Kb7 plan. He wants to move his bishop to e6 (where it will be better placed than on c6, because the e5 pawn should be blockaded) without being afraid of g4, sending away the knight, followed by Nd4!

14.♖fe1 ♘e7 Another useful maneuver to drive the knight to c6 and the bishop to e6. It was executed effectively by Kramnik in his WC match against Kasparov back in 2000. One point is to harass the white pawns with Nb4 and another is to leave from the potential space grabbing plan of h3-g4-f4, which is considered to be White's most dangerous plan. [14...♙e6 was also possible right away.]

15.h3 ♖e6 16.♘h2 White would like to support his g4-f4-f5 plan and he strengthens his g4 pawn in case of the standard counterattack g4-h5. However the knight gets a bit misplaced, it should have gone to d2.

16...a5! Black wants to use his rook along the a-file!

17.♘f1 [The point is that 17.a4 is strongly met by 17...c4! destroying the pawn structure! Here we can see why Nfd2 would have been preferable.]

17...a4 Suddenly the a8 rook joins the game without losing a single tempo.

18.♘e3 axb3 Well, it is always a question whether Black should hurry with releasing the tension. Sometimes when Black cannot gain some direct benefits along the a-file, it backfires and White occupies the a-file...

19.axb3 ♖a2 20.♖b1 [In case of 20.♙c3 Black switches the direction of the e7 knight and retreats to 20...♘f5 playing against the weakness on c2.]

20...g5! Black basically just employs the standard ideas of this opening and his position is getting better and better with each move. He prevents White's main idea of playing f4 (g4-f5) and intends to activate his pieces with Nc6-Bg7 and Rd8. Suddenly all his pieces are standing perfectly, White has many

weaknesses to deal with and the two bishops are also getting stronger with each move.

21.♘f6 ♘c6 Black sometimes wants to put his knight on d4.

22.♘d1 Not the best move, but one can understand that White wanted to kick out that annoying a2 rook with Nc3.

22...c4 Getting rid of the doubled pawns and opening the diagonal for the f8 bishop to develop to a more active square. [22...♘d4 was also strong.]

23.♘c3 [23.bxc4 23...♙xc4 The tactical line that Black had to check before pushing c4 is 24.e6 opening the long diagonal, but Black was rightly not afraid of it, since he can simply grab the pawn: 24...♙xe6 and White cannot make use of the pin. 25.♘h5 ♖g8 26.♘f6 ♖g6! There is no way to force a repetition.]

23...♖a5 24.bxc4 ♙xc4 25.♘ce4

25...♙e6! After the bishop has done its job and exchanged the doubled pawn on c4, it retreats to the ideal position on e6, blockading the e5 pawn.

26.♙c3 [26.♖a1 26...♙b4 is also perfect for Black.]

26...♖a2 27.♖e2 [White should have exchanged the active rook, but of course Black's advantage is undisputable anyway. 27.♖b2 27...♖xb2 28.♙xb2 ♙b4]

27...♙e7 Black is ready to use his last missing piece by playing Rd8.

28.♖a1 ♖xa1+ 29.♙xa1 ♔b7! This is even stronger than Rd8, because the rook is going to penetrate along the a-file.

30.♔h2 ♖a8 31.♙c3 b5 [31...♖a2 followed by b5 was even stronger to pin the e2 rook to the protection of the c2 weakness.]

32.♘g3 [White should have tried to look for counterplay with 32.♗e1 although his position remains quite hopeless after 32...♖a2 33.♖b1 b4 34.♙xb4 ♘xb4 35.c3 c5 36.cxb4 cxb4 This endgame with such a strong passed pawn on b4 supported by the two bishops should be easily won for Black.]

32...b4 33.♙e1 ♖a2 The material is balanced, but the game is over. White cannot avoid losing his most important pawn on c2.

34.f3 ♘d4 35.♗e4 ♘xc2 36.♘g8 b3 Black finishes the game in style, but of course all other moves were also winning.

37.♙c3 [37.♘xe7 37...b2—+]

37...♙b4! 38.♙xb4 b2 A very impressive performance by Black and a model game for the Berlin! **0-1**

(2) Zhang, Jiabao(2089) - Litvinov, Maxim(2238) [C53]

World Youth U16 Olympiad(2.4),
2014.12.14

GM Csaba Balogh
Best rating: 2672

A very nice attacking game by the young Chinese player against the rating favorite from Russia.

1.e4 e5 2.♘f3 ♘c6 3.♙c4 ♙c5 4.c3 ♘f6 5.d3 The Italian opening often ends up in similar positions and structures like the Spanish (or Ruy Lopez).

5...d6 6.♙b3 White prepares to save his bishop against the potential Na5 and Be6 ideas.

6...a6 A standard prophylactic move to save the bishop. On c5 it stands in the d3-d4 central break, therefore Black removes it along the diagonal. Bb6 with the same purpose might be met by Nbd2-c4, grabbing the bishop pair.

7.O-O O-O 8.♘bd2 White intends to employ the Spanish knight maneuver to the kingside through f1-g3.

8...♙a7 9.h3 A necessary and useful preparation to take the g4 square under control. [In case of the direct 9.♗e1 Black

could reply with 9...♘g4! 10.♞e2 ♔h8 11.h3 ♘h6! followed by f5 with a dangerous attack.]

9...♘e7 Black also fers his knight to the kingside. In general it is a very useful plan, because it allows him to fight for the center with c6-d5. However, White seems to be faster to explode the center... [9...h6 is considered by theory to be the right way to equality. The line goes with 10.♞e1 ♞e8 11.♘f1 ♙e6 12.♙c2 d5!]

10.♞e1 ♘g6 11.♘f1 The e5 pawn must be overprotected to execute the c6-d5 break, but it costs Black further tempi.

11...h6 12.♘g3 ♞e8

13.d4! White gains space in the center, he is going to have more ground for maneuvering with his pieces.

13...c6 What is the next step for White? He should finish the development of his pieces. The next one should be the bishop on c1, which is ideally placed on e3. However it is met by exd4 and White cannot recapture with the pawn, which would be necessary to maintain the center and the advantage, because the pawn is hanging on e4. By following this thinking, we come to the conclusion to play [13...♙e6 trying to ease the position by trading pieces is met by 14.♙c2! saving the bishop, followed by Be3 and Qd2.]

14.♙c2! overprotecting the e4 pawn. This is a known plan for the Spanish and Italian opening players.

14...♞c7 15.♙e3 ♙e6 16.♞d2 b5 Black decides to gain some space on the queenside. It was probably preferable to activate the a8 rook with Rad8. [16...d5 This central break solves the problems in some similar position, but not in this case because of 17.♘xe5! ♘xe5 18.dxe5 ♙xe3 (18...♞xe5 19.♙f4 traps the queen!) 19.♞xe3 ♞xe5 20.f4! ♞c7 21.e5 White manages to keep his strong center and he has many dangerous attacking plans, such as f5-f6, Qd3 or Nh5-Qg3.]

17.♘f5! Brining one more attacker and White is ready to sacrifice on h6! Bxh6 gxh6 Qxh6 is already a decisive threat, with which it is not easy to deal.

17...♙xf5 [17...d5 is a principled break to open the center, but it also runs into

18.♙xh6! ♘xe4! The critical move! (18...dxe4 19.♙xg7 ♙xf5 20.♙xf6+- and Qh6 is coming.; 18...gxh6 19.♞xh6 ♙xf5 20.exf5+- wins back the piece, because the f6 knight is also hanging.) 19.♙xe4 dxe4 20.♘xg7 exf3

21. ♖h5! is the right move, with some spectacular lines to follow: (21. ♖xe8? gives up the initiative and with the two pieces for the rook, Black consolidates. 21... ♖xe8) 21... ♖e7 (21... exd4 22. ♖g5! Qf6 is threatening with mate on g7 and after 22... ♖e7 23. ♖f6+ ♖h8 24. ♖h5! ♖xf6 25. ♖g5+ ♖g7 26. ♖h6+ ♖g8 27. ♖xf6+- wins.; 21... f5 is met by 22. ♖g5! ♖f7 23. ♖xe5 with a very strong attack.) 22. ♖g5 ♖d6 (22... ♖f8 is refuted by 23. ♖f6+ ♖h8 24. ♖h6! ♖e7 25. ♖g5!+- and Black cannot parry the Qh5 threat!) 23. ♖e7!! What a fantastic move! (23. ♖f6! is also winning.) 23... ♖xe7 24. ♖h6 f5 (24... ♖f8 25. ♖f6#) 25. ♖xg6+ ♖h8 26. ♖f6 Qh6 is threatening. On Qg7 Qh5 mates. The only move is (26. ♖xe5 also wins, but the other move is nicer.) 26... ♖g8 and now the easiest solution is 27. ♖xe8 ♖xe8 (27... ♖xe8 28. ♖f6+ ♖h7 29. ♖xe5+- and Re7 next.) 28. ♖xe5+-]

18. exf5 ♖f8 [18... ♖f4 19. ♖xf4 exf4 20. ♖xf4 Black does not have enough compensation for the pawn.]

19. ♖xh6! White feels the moment and executes the decisive blow! Qg5 is threatening so Black is forced to accept the sacrifice.

19... gxf6 20. ♖xh6 ♖8h7 [20... ♖e7 does not change the outcome. White can simply play 21. dxe5 dxe5 22. ♖xe5 ♖d6 23. ♖d1+- and the f6 knight falls.]

21. ♖g5! Exchanging defender! White has created two threats. One is to lift the rook to e3-g3 and the more direct one is Nxh7 Nxh7 and f6!, opening the bishop's diagonal.

21... ♖d8 [21... ♖xg5 22. ♖xg5+ ♖f8 23. ♖xf6+-]

22. ♖xh7 [22. ♖e3 was also winning.]

22... ♖xh7 23. f6! ♖xf6 24. ♖e3 Black resigned! A perfect game by White, who was clearly not playing at an under 2100 level, but the ratings of the young players are often misleading. **1-0**

(3) Karthikeyan, Murali(2497) - Nikitenko, Mihail(2379) [B90]

World Youth U16 Olympiad(2.1),
2014.12.14

GM Arkadij Naiditsch
Best rating: 2737

Another nice attacking game in the Najdorf. White quickly tricks Black in the opening and gets a very strong attack with a great piece sacrifice! A nice game to watch and enjoy!

1.e4 c5 2.Nf3 d6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 a6 6.a4 A rather quiet line. Usually this move is played against people who like to play the Najdorf with e5, but of course in case of e6 we are entering the usual Sheveningen positions.

6...e6 [6...e5 7.Nf3 could give White a slightly better move order than in the normal line with 6.Be3 e5 7.Nf3 because the bishop on e3 is not very usefully placed. Now White's idea could be to play Bg5 and then Bc4, in order to try and dominate over the d5 square, with some positional advantage.]

7.♖e2 b6?! The idea of putting the bishop to b7 is correct, but to do it immediately is very risky. The usual plan would be to first play Be7-0-0 and only after that to play either b6 or the normal Nc6, which would lead back to the main lines.

8.♘f3!? is an interesting try to immediately take advantage of the b6 move. White is preparing the e5 push.

8...♞fd7 Black is afraid of e5. [Of course after 8...♞b7? White is almost winning after 9.e5!; But Black should maybe have tried to continue with 8...♞a7 followed by Rd7 and Bb7, which looks a bit strange, but is actually quite OK for Black.]

9.0-0 [There is no reason for White to hurry with 9.e5 9...d5]

9...♞b7 [In case of 9...♞e5 White can play the solid 10.♞e2 and continue with f4 and Bf3 back next, when the black knight from e5 will need to go back, thus giving White a good version of the variation.]

10.e5 d5 Black is entering the fight. [After 10...♞xf3 11.♞xf3 ♞a7 White can reach a small plus after 12.exd6 ♞xd6 13.♞d1 with a pleasant position for White.]

11.♞g4!? is a very creative move in comparison to a normal move like 11.Re1. White wants to play f4 next so Black is practically forced to take on e5 in order to avoid being clearly worse.

11...♖xe5

12.♗xe6! White continues what he started!

12...♗c5? After this move things start to go very wrong for Black... [Black had to be brave and take on e6: 12...fxe6 and now White has several options. 13.♔e1 Playing for the attack! (13.♔h5+ is not so good since after 13...♗g6 14.♗xe6 Black has the chance to give some material back in order to force the exchange of queens. 14...♔h4! 15.♔f5 ♔f6 White can't avoid the exchange. 16.♔xf6 gxf6 17.♗c7+ ♔f7 18.♗xa8 ♗xa8 and Black's position actually looks better here, although things are still very complicated.) 13...♗bc6 Protecting the e5 knight and attacking the white knight on d4. 14.♗xe6 ♔d7 15.♗xd5 Black's position looks almost lost, but things are still very complicated. 15...♔f7! is a very strong reply! The black king will hide on g8. White has 2 pawns and some attack, but the black pieces are in the game, so we have a very complicated position.]

13.♗xd5! 13.Bh3 would have given White a clear plus, but Karthikeyan wants to mate the black king!

13...♗xd5 The only move.

14.♗f5 Double attacking on d5 and g7. It is clear that Black can't save both, so the bishop from d5 has to move.

14...♗e6 The most solid move. The bishop on e6 is going to protect the king.

15.♗xg7+ ♔e7 16.♔h5 White's attack is very dangerous! We should also not forget that White already has 2 pawns for the piece and the black king feels anything but safe on e7.

16...f6? White is probably just winning after this move. [Another possibility was 16...♗bd7 but after 17.♔e1 White also has a very strong attack.]

17.♔d1! An excellent move! The white rook is perfectly placed

on d1.

17...♖b7 What else to do?! To play with Nb8-Ra8 is not really an option...

18.♗f5+ is not the best. [Simpler was 18.♗xe6 18...♔xe6 19.♗d5 with many different threats. White's position is close to winning.]

18...♗xf5 Black misses his chance to defend more tenaciously. [Black should have kept his bishop on e6 at any costs: 18...♗f8 But still, after a simple move like 19.♗e4 White's attack is very strong.]

19.♗d5+ ♔d6 is losing more quickly, but Black already didn't have any good moves. [Tougher was 19...♔e6 but here White has 20.♗f4+ ♔e7 21.♗xf5 and Black is doing very badly.]

20.♗xf5 Now the knight moving from d5 is a deadly threat.

20...♔c6

21.b4! Another excellent move by White! The black king is getting into more and more trouble.

21...♗d6 22.♗e4! This move is basically ending the game! Black has no defense against the knight move from d5 any longer.

22...f5 23.♗e7+ ♔c7 24.♗xf5 White has 3 pawns for the

piece and continues the attack!

24...♗e7 25.♗f4 Bringing yet another piece into the attack...

25...♗f6 26.♗d6 ♗e8 27.♗ad1 White has at least 5 different direct threats. The game is over!

27...♗a7

28.♗xd7+ A really very well-played game by Karthikeyan, who is clearly very gifted in tactical skills! **1-0**

(4) Puccini, Jack(2188) - Radovic, Luka(2352) [B90]

World Youth U16 Olympiad(3.1),
2014.12.14

GM Arkadij Naiditsch
Best rating: 2737

We are going to see a great attacking game by Puccini, who mated his clearly higher rated opponent in a furious mating attack! White chose a very fighting opening with quite a long theoretical line, where Black quickly made a mistake and found himself facing a mating attack...

1.e4 c5 In junior championships we much more often see fighting openings like the Sicilian than the Berlin let's say, which of course makes the games much more fun to watch for the spectators.

2.♘f3 d6 3.d4 cxd4 4.♘xd4 ♘f6 5.♘c3 a6 We are in the Najdorf.

6.♙c4 The Sozin variation is one of the sharpest ones with the most direct play. Lately it hasn't been played too often on the high level because it seems that Black is doing perfectly fine in it, but anyhow, very precise knowledge of theory is needed for Black not to quickly get into trouble in these very sharp lines.

6...e6 [A little trick is that in case of 6...b5?! White needs to play 7.♙d5! ♘xd5 8.exd5 with a much better position for White.]

7.♙g5

7...♙e7 Another possibility for Black is to play 7... Nbd7.

8.♙b3 b5 A risky move where Black needs to know exactly what he is doing!

9.♙f3!? Many years ago I played this line myself as White and I believe it is a good line to try and quickly get your opponent into trouble.

9...♙c7 The correct move. Black can't play 9...Bb7 because of 10.Bxe6! fxe6 11. Nxe6 and the g7 pawn is also going to fall, leading to a very good position for White.

10.e5 This is all still theory and the beginning of very sharp complications.

10...♙b7 11.exd6 ♙xd6 12.♙e3 Now White has a lot of different threats which are connected to the blow against the e6 pawn.

12...♙e5?! is already a small mistake and it immediately leads to trouble... [12...♙c5! would have been the right answer. 13.O-O-O ♘c6! is a very hard move to find over the board, but of course not if you are familiar with it! 14.♙xf6 gxf6 15.♘d5 Black's position looks very dangerous, but in fact it is White who needs to be afraid of getting a worse position.

15...♔e5! The best move. 16.♔xe5 ♘xe5 17.♘c7+ ♔e7 18.♘xa8 ♘xg2 19.♖hg1 ♘xa8 is one of the most simple ways for Black to be fine here. White is an exchange up, but Black has the bishop pair and a great pawn structure, which gives him at least an equal position and probably even a slightly better one.]

13.0-0-0 As we can already see, the position is very direct. White wants to start the attack on the black king with all his pieces and every move counts here, so he needs to be very accurate.

13...♘bd7 A very dangerous move. [After a normal move like 13...O-O 14.f4 ♘xd4 15.♖xd4 ♘bd7 16.♖hd1 White is slightly better.]

14.♘xe6!? The start of very interesting tactical complications. White could of course have continued with 14.f4 and gone back into the main line.

14...fxe6

15.f4! This is the difference to Black's move order of not castling first and playing 13...Nbd7.

15...♘xc3 What else to play?!

16.♔xe6+ ♔d8 The black king is under a massive attack, but a piece is still a piece.

17.bxc3 Logical and good. White has to win some material back. Now the threat is to play Bxf6, so Black needs to do something very urgently.

17...♖e8 Black is bringing his rook into the game, which is very logical. [Another option could have been to try and run away with the king: 17...♔c8 18.♘xf6 gxf6 White now has a lot of different options to continue the attack and we will just take a look at the most "normal ones": 19.♖d6 It can't be bad to double the rooks on the d-file. 19...♖d8 20.♖hd1 Black is totally paralyzed and pinned. 20...♖a7! The black rook will protect the d7 knight from a7! Very creative and not easy to find... 21.♔f5 is one of the possible moves to continue the attack with the idea of playing Be6 next. Black's position remains very dangerous and almost impossible to hold during a practical game.]

18. ♖f7 is a possible way of playing, but White had another interesting option: [Why not be greedy and play 18. ♗xf6+ 18...gxf6 19. ♖xf6+ ♔c8 20. ♗e6 ♗c6 21. ♖f7 ♖d8 22. ♖d4 followed by Rhd1 and winning the black h-pawn. White must just be better here!]

18...h6? Black blunders a tactical blow! [It was really time for Black to remove his king from the dangerous d-file: 18... ♔c8! 19. ♗e6 ♖xe6! 20. ♖xe6 ♗c6 and White must still be better, but Black wants to play Kb7 next and finally get the rook from a8 into the game. His position is still playable.]

19. ♗xf6+! White doesn't miss his chance!

19...gxf6 20. ♗e6 Before taking on d7, White decides to exchange the bishops, which is a normal decision. [The immediate 20. ♖xd7+ was of course possible too.]

20...♗c6 [20... ♖xe6 21. ♖xe6 is also over for Black.]

21. ♗xd7 ♗xd7 and of course now comes

22. ♖xd7+! Black probably missed this tactical idea.

22... ♖xd7 23. ♖d1 ♖a7 Black doesn't have a choice.

24. ♖xd7+ ♖xd7 and White continues with taking all the black pawns.

25. ♖xf6+ ♔c7 26. ♖xa6 Black's position is totally hopeless! The white pawns will start to advance not only on the kingside, but also on the queenside, so this is a good moment to resign. A very nice game by Puccini, who was well prepared and made a great tactical blow on e6 in connection with a slow move like f4. Well done! **1-0**

**(5) Zhou, Jiangnan(2100)
- Donchenko, Alexander(2523)
[E20]**

World Youth U16 Olympiad(4.1),
2014.12.15

GM Csaba Balogh
Best rating: 2672

The highest rated player of the field is the German Alexander Donchenko, who nicely outplays his opponent. A Chinese player, even with a relatively low rating, should never be underestimated as they are all very strong and usually underrated, although this game does not prove this fact.

1.d4 ♘f6 2.c4 e6 3.♘c3 ♙b4 4.f3 The Nimzowitsch with 4.f3 is a very sharp system in general. Black tries to find a setup where he can keep the game in calm waters.

4...O-O 5.a3 ♗xc3+ 6.bxc3 White gets the bishop pair and a very strong center, but Black compensates it with his superior pawn structure. He immediately focuses his attention against the c4 pawn with a known arrangement of his minor pieces.

6...c5 7.e3?! This is too passive, not in the spirit of the opening and not consequent after playing f3. [White should play actively and occupy the center with 7.e4 which is the critical continuation from the opening point of view.]

7...♘c6 8.♙d3

8...b6! All the black moves are directed against the c4 pawn. He intends to develop with Ba6, Na5 and Rc8, putting maximum pressure on the weakness!

9.a4? This is wrong again. White is doing badly on the queenside, he should organize his play in the center, where he has his pawn majority. [9.♘e2 9...♗a6 10.e4 is the natural follow-up, even if White lost a tempo compared to 7.e4. White creates the unpleasant threat of Bg5, after which is it not easy to deal with the pin! The right way to counter this plan is 10...♘e8 preventing Bg5 and sometimes it might help on the queenside with Nd6.]

9...♗a6 Consequently following the plan!

10.♙e2 ♙c7 A logical positional follow-up, putting another eye on c4. [Black could have already played for even more with 10...cxd4 11.cxd4 is strongly met by (11.exd4 is terrible from a positional point of view. Black could seize his advantage with a nice break: 11...e5! Opening the center against the king on e1. White doesn't only have a poor pawn structure, but his pieces are also undeveloped. 12.dxe5 (12.d5 12...♘a5 is also a catastrophe for White. Rc8 wins the pawn next.) 12...♘xe5! White collapses.) 11...♘b4! 12.♗a3 ♘xd3+ 13.♙xd3 ♙e8 and White has no good defense against Rc8, Qc7 or d5. Black is going to win a pawn and there is no compensation for it.]

11. ♖a3 ♜fe8 12.g4? Kind of desperation. White launches a kingside attack, but Black is ready to counter it. [White was aware that he was doing poorly in case of some slow move like 12. ♘h3 12... ♘a5 but it was still better than the game.]

12...e5! The principled reaction! White launches a flank attack and Black counters it with a well-timed central break!

13.d5 Trying to lock the position with e4, but Black is coming first.

13...e4! A very strong intermediate move, which completely destroys the white pawn structure.

14.fxe4 [14.dxc6 14...exd3 15. ♖xd3 ♜xc6—+ is also hopeless. All the white pawns are hanging and he ended up with a dead bishop on a3.]

14...♘e5 One can normally only dream about such beautiful knights. I am a big fan of the two bishops, but this is a tragic scenario for them. If we look at the ones on d3 and a3 our hearths start to ache.

15.g5 By trapping the knight White at least manages to get rid of one of his bishops, but the main problem on a3 remains on the board.

15...♘xd3+ 16. ♖xd3 ♘xe4 17. ♘f3 The material is balanced, but the superiority of the pawn formation and the pieces give

Black a decisive advantage.

17...♘d6! 18. ♘d2

18...♘xc4! Black finds a pretty tactical blow to increase his advantage.

19. ♘xc4 ♜f4! This is the nice point and Black wins back the sacrificed piece.

20.O-O-O ♜h4! Another very clever move! Black wants to keep the queens on the board as the white king is much more vulnerable than the black one. The white pawns are extremely shaky and the queen is the most valuable piece with which Black could put even more pressure on them.

21. ♖de1 ♘xc4 22. ♜f5 ♜e4! Total domination on the light squares and the bishop on a3 is still dead...

23. ♜hg1 [There was no time for 23. ♖xd7 in view of 23... ♜f2!—+ and White cannot deal with the simple threat of Bb3 or Bd3 and mate on c2.]

23...g6 Black uses the same idea as before. He sends away the queen to invade on f2!

24. ♜xd7 [24. ♜f6 24... ♜ae8 is also hopeless. It is funny that the c3 pawn is the key of the position, as it locks the bishop up. Without that pawn, the bishop could have been a beast on b2!]

24... ♖f2 **25.** ♖h3 White resists for a few more moves with the resource of Qg2, but Black finishes the game in the fastest way.

25... ♖a2! **26.** ♗b2 ♗d3 White resigned, as there is no defense against Qb1! The principle says that in middlegames with opposite colored bishops, the side who has the more active bishop is better. Well, it seems to be justified in this game. **0-1**

(18) Korpa, Bence(2415)
- Snihur, Piotr(2161)

World Youth U16 Olympiad(3.2),
2014.12.14

GM Arkadij Naiditsch
Best rating: 2737

After a "shaky" game, Black's position looks close to winning. He is 2 pawns up and the white king on f1 is very passive, both of which are a good signs for a full point. On the other hand, a lot of rook endgames are famously drawn, so the result of the game still unclear.

50. ♖b7! White's only chance to achieve a draw is to somehow collect the b-pawn for the h-pawn, so clearly the rook is taking a perfect position on b7.

50... ♔g5 A good choice! Black needs to stop the h-pawn. [50... ♔g4 looks good, but doesn't lead anywhere: 51.h6 ♔f3 52.♔g1! and Black can't stop the h-pawn without losing the b-pawn.]

51. ♖b5+ White is fighting!

51... f5 Black wants to play Kxh5 next.

52.h6 The best practical decision, hoping for Black to make a mistake...

52... ♖h3?? And what a mistake this is! Snihur was probably thinking that his position is winning with the double f-pawns, but it is not ! [The simple 52... ♔xh6 53. ♖xf5 f3 54. ♖b5 ♖b2 followed by transferring the king to c6 would have given Black the win!]

53. ♖xb4 I guess it was a huge relieve for Korpa, who is rated 300 points above his opponent.

53... ♖xh6 54. ♖b3 The funny thing about this position is that no matter how many pawns Black has on the f-file, the position remains a draw! And during the next moves White is going to show us a perfect defense.

54... ♔g4 55. ♔f2 ♖h2+ 56. ♔f1 ♖a2 57. ♖c3 Perfect play. The white king has to be standing on f1 and the rook on the 3rd rank, waiting for the f3 move and only then going back to the 8th rank, from where it will check the black king.

57... ♖h2 58. ♖a3 ♖h3

59.♖a2 Stopping Kg3, after which White would play Rg2+.

59...♜b3 60.♖g2+ ♜g3 61.♖a2 ♜f3+ 62.♔g2 ♜b3 63.♔f2 ♜h3 64.♔f1 Black did not manage to improve his position at all, so he is at last playing f3.

64...f3

65.♖a8! Exactly! Now White has the saving Rg8+ after Kg3.

65...♜h1+ 66.♔f2 ♜h2+ 67.♔f1 ♜b2 68.♖g8+ ♔f4 69.♖a8 and again White keeps on waiting.

69...♔g3 70.♖g8+ ♔f4 71.♖a8 ♜b4 72.♔f2 ♜e4 73.♜b8 Black can't improve his position any longer.

73...♜e2+ 74.♔f1 ♜a2 75.♜c8 f2 the last try

76.♜c3! Now White keeps on waiting for the other black pawn to advance...

76...♔g4 77.♜b3 f4

78.♜c3 ♜d2 79.♜a3 ♔f5 80.♜b3 ♔e4 81.♜a3 ♜d3 and of course this is a draw after the easy 82.Rxd3 Kxd3 and 83.Kxf2 Ke4 and 84.Ke2, with opposition. A very practical endgame which is good to be aware of for your next tournament games!
1/2-1/2

World Youth U16 Olympiad,
2014.12.13

GM Csaba Balogh
Best rating: 2672

A very interesting endgame has been reached. White has a huge trump on c6, but Black has prepared to get counterplay on the 2nd rank with his rooks.

33.g4 A clever attempt to fight for the win. White tries to send the bishop to an unprotected place in order to support the promotion of the c-pawn. [On the direct 33.c7 Black saves the game with 33...♖bb2! We can see the point of 33.g4 now, as in case of 33...Bxg4 34.c7 and Rbb2, the bishop is hanging on g4.; The best try to win was the hidden knight move 33.♞d1!! with the idea to prevent Rbb2 and also to transfer the knight to e3. White wants to advance his c-pawn now. 33...♗e4 (In case of 33...♗a4 34.c7 ♗aa2 White has the important resource of

35.♞e3! preventing the check on g2 and attacking the bishop at the same time! It seems to be over, as Bh3 is met by g4, Be6 Rxe6 wins and Bd7 Rd8 is also over, but Black can continue resisting with 35...♖xh2! 36.♞xf5 ♗ag2+ 37.♞f1

37...♖b2! The only move again! (37...♗a2? loses and the difference is quite deep: 38.♗h8+! ♞xh8 39.c8=♖+ ♞h7 40.♖b7! prevents the mate on h1 and after 40...♗hf2+ 41.♞g1 ♗xf5 42.♖b1!+- wins one of the rooks as g4 is coming next.) 38.♗h8+! ♞xh8 39.c8=♖+ ♞h7 40.♖c6! is the only way to continue the game. 40...♗hf2+ 41.♞g1 ♗xf5 A very tricky endgame has been reached, similar to the final position of our game. It is very difficult to assess whether White's position is winning or not. Without a pair of rooks on the board the game is an easy draw, because Black builds up an unbreakable fortress by putting his pawns on h5 and g6.)

34. ♖xe4 ♗xe4 35. c7 ♗b7 36. ♘e3 ♖e2! (36... ♗c8? is nicely refuted by

37. ♘c4!+- and the rook has no good square to leave. In case of Re2 Nd6 wins as Re8 does not work and if Ra2 Nb6 promotes the pawn.) 37. ♖c3 White retains his chances, but the game should probably end in a draw.]

33... ♖bb2! Black had foreseen and correctly judged the arising position with a queen down...

34. gxf5 ♖xf2 35. c7 ♖g2+ 36. ♔f1 ♖gf2+ 37. ♔e1 White can avoid the perpetual, but he still cannot win the game...

37... ♖xh2! Creating the mate threat on h1 forces White to sacrifice his rook.

38. ♖h8+ ♔xh8 39. c8=♖+ ♔h7 40. ♖c6 ♖he2+ 41. ♔f1 [Of course not 41. ♔d1?? 41... ♖bd2#]

41... ♖f2+ 42. ♔g1 ♖xf5 Black holds fairly easily now. The white king is exposed, so Black is always threatening with perpetual checks. White has no time to activate his rook along the 7th or 8th rank, while trading a pair of rooks is an easy theoretical draw as we will see...

43. ♖e4 g6 44. ♖c8 ♖a5 [A draw was agreed in view of there not being any time to play Qd4 and after 44... ♖a5 45. ♖h8+ ♔xh8 46. ♖d4+ ♔h7 47. ♖xb2 The game is drawn since White cannot break through. It is interesting to mention that even if Black gives up his g- and h- pawns, Black still holds... 47... ♖a6 48. ♔g2 ♖e6 49. ♔g3 h5 50. ♔h3 h4 Of course there is no need for such measures, it is just a demonstration. 51. ♔xh4 g5+ 52. ♔xg5 ♔g8 and Black holds by only playing Rg6-e6 and Kg8-g7. White cannot make progress.] **1/2-1/2**

Clash of the Titans

(20) Alekhine, Alexander
- Tsvetkov, Alexandar K[B50]

Buenos Aires ol (Men) prel-B(1),
1939.08.24

GM Kamil Miton
Best rating: 2655

1.e4 c5 2.♘f3 d6 3.c3 ♘f6 4.e5!? The combination of the c3 and e5 moves doesn't look promising for White. Usually White plays [4.h3 Black can't take the pawn because of Qa4+. 4...♘c6 5.d3 (5.d4? 5...cxd4 6.cxd4 ♘xe4 7.d5 ♔a5+)]

4...dxe5 5.♘xe5

5...♘c6 An original idea. Black is not afraid of getting doubled pawns because of his good development and the potential weakness on d3. [5...e6 was more solid and Black should have no problems at all here.]

6.♘xc6 bxc6 7.♘c4 ♘f5 8.d3 e6 9.♔f3 Attacking c6 and preparing Nd2.

9...♔d7 10.h3 Alekhine probably wanted to keep the queen on f3, which is why he wanted to avoid Bg4 followed by Bd6.

10...♘e7 [10...♘d5 The idea of this move is to exchange the bishop on c4. 11.O-O ♘b6 12.♘a6!? The bishop is not active here but after 12...♘e7 13.♘d2 O-O 14.♘e4 White is still slightly better.]

11.♘d2 ♔d8 12.O-O ♘xd3 13.♘xd3 ♔xd3 14.♔xc6+ ♔d7 15.♔a6 The structure has changed but Black still has some weaknesses on the queenside.

15...O-O 16.♘c4

16...♔c7 Alekhine is going to exchange queens because then it will be easier for him to create some pressure against the c5 and a7 pawns.

17.♔a5 [17.♘g5!?]

17...♔xa5 [17...♔b7!? 18.♘e3 ♘d5! 19.♘xc5 ♘f4 f3 doesn't work because of Rd5. 20.♘e3 ♘xc5 21.♔xc5 ♔xb2=+ 22.♔xa7 ♔a8! and Black takes the initiative.]

18.♘xa5 ♔d6 19.♘e3 ♔a6 20.♘b3 [20.♘c4 20...♔a4 with the idea to provoke b3 to create a weakness on c3 and Black will have counterplay after Nd5-Bf6.]

20...♔c8?! is not the most accurate move. Black should have played [20...c4! and now Black will get the good d5 square for

the knight and counterplay against the b2 pawn.]

21.c4! += A very strong move. Alekhine limited the black pieces and the weakness on c5 is also fixed.

21...♖f8 22.♜fd1 ♜d6 I'm not sure this exchange is good for Black. Usually the weaker side should keep both rooks to have more counterplay possibilities.

23.♜xd6 ♜xd6 24.♜d1 ♖e7

25.♞a5 White is activating his pieces. [25.♜d3!? 25...♜b8 26.♜xc5 ♜xc5 27.♞xc5 ♜xb2 28.♜a3 ♖d6 29.♞b3 ♞e4 with the hope to defend actively, but of course White is better.]

25...♜e5! A logical move. Black activates the bishop and provokes the b3 move, which will stop White from transferring the rook over the 3rd rank.

26.♜d3! Alekhine improves his position with each move.

26...♜c7 [26...♜xb2 27.♜b3 ♜d4 (27...♜e5 28.♜b7+ ♜c7? 29.♞c6+--) 28.♜b7+ ♖e8 29.♜xa7 and with his rook on the 7th rank, White keeps some pressure.]

27.♜b3

27...♞d7 [27...♜d4!? 28.♜xd4 cxd4 29.♜d3 e5 30.f4! is the only move to destroy Black's pawn structure but Black has some hope to save the game thanks to his active king. 30...♖e6↖]

28.f4! Alekhine put his pieces on the optimal squares, so now is the time to improve the king!

28...♜d6 [28...♜d4 29.♜xd4 cxd4 30.♜d3+--]

29.♖f2 ♞b6 30.♖f3 ♖d7 31.♜d3 ♖e7 32.g4 White slowly takes space.

32...f6 33.h4 ♞a4 34.♜b3 ♞b6 35.♜b5 ♖d7 36.h5 ♖e7 37.a3 It looks like Alekhine could win the pawn after [37.b4 37...♞d7 38.♞b3 but maybe he was waiting for a better moment.]

37...♖d7 38.♖e4 ♖e7 39.♖d3 ♖d7 40.♞b3 ♞a4 41.♞d2 ♖c6 42.b3 ♞b6 43.♞e4 ♞d7 44.♜a5 ♜e7 45.♞c3 White is waiting for the right moment to finally push b4.

45...♖b7 46.♘b5 ♔b6

47.b4! a6 48.♘c3 ♔c7 [48...♖c7 49.♘a4+ ♔b7 50.♘xc5+ ♘xc5+ 51.♙xc5 ♙xc5 52.bxc5 and White will easily improve his position after Ke4 -f5 or Ke4-g5-h6, with the idea to activate the king.]

49.♖xa6 cxb4 50.♘b5+ ♔d8 51.axb4 ♙xb4 52.♖xe6+— ♙c5 53.♙d2 ♘f8 54.♖c6 ♘d7 This is the last nice moment in the game. White is pawn up but Black controls the c5 square and still defends the position, but thanks to a nice maneuver Alekhine finishes the game very quick!

55.♔e4! ♔e7 56.♔d5 I remember when I was a junior player we called this kind of idea "the king in the attack is worth 10 points! ".

56...♙g1 57.♙b4+ ♔d8 58.♔e6 1-0

Editorial Preface

The 2 main events of the week came to an end: The U-16 Olympiad in Gyor and the European Championship in Rapid and Blitz in Wroclaw.

Let's first come to the event in Poland:

In the blitz section nothing and nobody could stop Navara who crushed the field with a result of 19/22 and got the clear first place. The young Polish talent Duda came second with 17/22 and Salgado was 3rd, also with 17/22.

In the rapid section we saw a huge fight for the 1st place, which was finally shared between Duda, Volokitin, Gajewski and Kovalev, all with 9.5/11.

It was a bit of a pity that not many top Grandmasters took part in the event. This might have been because of the prices or maybe because of the World Mind Games, but anyhow this year's event was clearly much weaker than the previous European Rapid and Blitz championships.

Now let's come to the Olympiad-U16:

They started as favourites and won the event, and that is the team from India! In the last few years the Indian talents have been dominating the youth events and it was no different this time. With 18/20 possible points India took another gold medal. The strong team from Russia came second with 17/20 points and the big surprise of the event was the team of Iran, who came third with 16/20. Those standings seem to be quite clear, but if we look at the details, the event was far more exciting and close than it seems:

Russia started with 12/12 and a very important win over India, but surprisingly they lost to Iran, who went on to keep the shared lead with India until the very last round, when they lost to Hungary 1. Meanwhile Russia could not recover and made

another draw, so the 1st place was practically out of reach for them.

After a great start, Hungary 1 got a bit unlucky in a few matches and finally took the 4th place with 14/20, which is still a very good result for the team.

If we take a look at the individual results, it is not a surprise to see that the best result of 8.5/10 goes to Tabatabaei from Iran (with a rating performance of 2685), the 2nd to Aravindh from India with 8/9 (with a performance of 2683) and 3rd to Vavulin from Russia, also with 8/9 and a performance of 2663.

The feedback from the event has been great and it seems to have been a big success, with a professional organisation, good playing conditions and nice side events. Especially the daily best game prize and the birthday cakes that were given to the participants brought a big smile to many of the young faces.

Just like last week, we are commenting the best games from this great youth event. Enjoy!

Arkadij Naiditsch & Csaba Balogh

5 best games of the past week

**(1) Moller, Sophus M(2133)
- Cao, Jason(2309) [B94]**

World Youth U16 Olympiad(5.2),
2014.12.16

GM Arkadij Naiditsch
Best rating: 2737

We are going to see a nice fighting game in the Sicilian, where White is acting a bit too slowly and then getting greedy to win the black queen, which will get him into big trouble. Cao is finishing the game by taking almost all the white pieces. A nice game to watch!

1.e4 c5 2.♘f3 d6 3.d4 cxd4 4.♘xd4 ♘f6 5.♘c3 a6 As we can see once again, the Najdorf is the dominating opening of the youth championships.

6.♙g5 This one of the most sharp lines, with very long lines. As Black I would advise you to watch the games of Wojtaszek or Vachier-Lagrave, who both play the Najdorf greatly!

6...♘bd7 [6...e6 is of course the main move here. 7.f4 ♖b6 leads to the most critical lines.]

7.f4 ♖c7 [Another interesting option for Black is to play 7...g6]

8.♔e2 There are two different ways of developing the queen, to f3 or to e2. The usual way is 8.Qf3 but 8.Qe2 is more and more coming into fashion. White's idea is to quickly play g4 and Bg2.

8...e6 9.O-O-O b5 This is still a theoretical position.

10.a3 stopping b4.

10...♘b7 11.g4 ♘e7 12.♘g2 Now is the moment for Black to have a thought about what to do next.

12...♖c8!? A good move. To castle kingside is very risky and a move like 12...h6 doesn't make much sense because White often wants to play Bxf6 anyway, so Black uses the moment to improve the position of the rook.

13.♘xf6?! I think White should not give up the bishop without the h6 move being played first. [One idea for White could be

to play 13.f5 provoking Black to play e5 and winning control over the d5 square. 13...e5 14.♘xf6 ♘xf6 15.♘b3 with a very complicated play.; A move like 13.♖he1 looks very normal, to have moves like e5 or even maybe at some good moment Nd5 or Nf5 sacrifices in mind.]

13...♘xf6 14.g5 This was White's idea, but as in all the Sicilians, the black bishop is a very important piece and should not be given away for no reason.

14...♘d7 15.h4 Whites idea is simple, to play h5 and g6 next.

15...♔c4! 16.♔e1 What else to do?! To enter the endgame means to be at most equal and probably worse in the long term, so White decides to try his luck with the queens on the board.

16...b4! Black is playing a perfect game. The very typical and strong b4 move already gets White into quite some trouble. Black is starting the action first!

17.♘f1 It is not easy to give White good advice, but Bf1 looks strange. Why not try and get the bishop to d3?!

17...♔c5 18.♘b3 White uses the moment to put his knight to b3 and keep things together.

18...♔b6 19.axb4 White already doesn't have a choice and must take on b4.

19...♔xb4 Now Black has a lot of different attacking ideas and White actually doesn't have much, so White's position is very dangerous.

20.♔b1 Another inaccurate move by White. [The best move was probably 20.♖d4 20...♔b6 21.♔d2 with a worse, but fighting position.]

20...♘c5! Great play by Black again. Cao perfectly evaluates the queen sacrifice that will give him more than just a compensation.

21.♙b5+ White is going for it. [21.♘xc5 21...♖xc5 just leads to a worse position for White.]

21...axb5 22.♖d4 The black queen is still caught.

22...♔xd4 23.♘xd4 b4 Black has a piece and a rook for the queen, but the e4 pawn is falling and soon White will find himself under huge attack.

24.♘a2 ♙xe4 25.♖h2 The rook on h2 will protect the c2 pawn in the future.

25...d5 26.♘xb4 O-O Black is bringing his last piece into the game. Already very soon we are going to see clear domination of the black pieces.

27.♔d2 [Maybe White's best chance was to play 27.h5 to at least have some threats in the future.]

27...♖a8 This is not the most precise move. [The simple 27...♖c7 with two ideas, to play Ra8-Ra7 or Rfc8, was probably better.]

28.♘d3? After this passive move all is lost for White. [The best way to fight was probably 28.♘bc6 28...♙d6 and 29.♖h3 bringing the rook into the game with the hope to exchange one pair of rooks to make Black's play a bit less effective.]

28...♖a4 Black doesn't miss the decisive move! White can't do anything against Rfa8.

29.♔e3 [29.♘c6 29...♖fa8 30.♘xe7+ ♔f8 with a mating attack.]

29...♖fa8 30.♔c1 There is no other way to escape from the mate on a1.

30...♙xd3 and Black starts to take all the pieces.

31.♘c6 [31.cxd3 was of course also losing. 31...♖xd4 32.♔xd4 ♘b3+ and the queen will be taken next.]

31...♙d6 The game is over.

32.cxd3 ♜xf4 All in all a great game by Black! We saw very dynamic play with a great queen sacrifice, which is important to remember for our own games. **0-1**

(2) Goryachkina, Aleksandra(2441) - Tabatabaei, M.amin(2363) [E15]

World Youth U16 Olympiad(7.2),
2014.12.18

GM Arkadij Naiditsch
Best rating: 2737

The match between Russian and Iran was decisive for the final rankings. If the Russians won it, they would probably have been the champions. After the opening we quickly reach a very strange position where Tabatabaei clearly finds the better solutions and later on he feels perfectly comfortable in the tactical phase, which brings him a clean and important win over one of the strongest female players in the world.

1.d4 Finally a game on 1.d4... In youth events 1.e4 is much more played.

1...♘f6 2.c4 e6 3.♘f3 b6 is one of the most solid lines for Black.

4.g3 ♜a6 5.♚a4 Goryachkina is going for the currently very popular 5.Qa4.

5...♜b7 6.♜g2 c5 We are still in the main line of theory. Now we can see why Black played 4... Ba6, luring the white queen to a4, which would now be better placed on d1.

7.dxc5 Black wanted to play cxd4 next.

7...bxc5 8.O-O ♜e7 Black's idea is to be as solid as possible during the next moves and to try and develop his pieces because later on the great pawn structure would give Black at least an equal position, so White needs to play quickly and actively.

9. ♖c3

9... ♖e4 is an interesting move. Of course 9...0-0 is more usual. It is often good for Black to exchange the knights, but the question is whether Black has enough time to do it right now...

10. ♖d1 A very risky move! Now White gets a horrible pawn structure. [10. ♖xe4 doesn't lead anywhere. 10... ♖xe4 11. ♖d1 O-O with an equal position.; The best try might have been 10. ♖b3 10... ♖xc3 (10... ♖b6 11. ♖f4! and Black already needs to be quite careful because of the better white development.) 11. ♖xc3 (11. ♖xb7 is bad because after 11... ♖xe2+ 12. ♖h1 ♖c6 Black is going great.) 11...O-O 12. ♖d1 and White maybe keeps some hopes of being a bit better here.]

10... ♖xc3 11. bxc3 ♖c6 is the safest move for Black. White might have wanted to play Ne5 next.

12. ♖c2 ♖c7 The black queen is well placed here, but it gives White the chance for direct play... [12...O-O looks more solid to me.]

13. ♖g5! A very strong move! Now Black needs to take a difficult decision.

13... f6 Black decides to give up his good pawn structure. [Maybe Black could have gone for the very risky looking 13... ♖xg5 14. ♖xg5 ♖xg2 15. ♖xg2 White wants to play Ne4 next. 15...f5 followed by 0-0 and Nc6. Of course Black's position looks a bit dangerous, but maybe White doesn't have anything more than just equality.]

14. ♖f4 Of course now White also provokes Black into playing d6.

14... d6 We are at one of the key moments of the game! If Black managed to play Nd7 and maybe Ne5, his position would be clearly better, so White needs to act quickly!

15. e4?! This is a bad decision, since the e4 move doesn't help White to open the position and it gives Black enough time for development. [15. ♖d2 provoking Black into playing e5 because of the attack on d6. 15...e5 16. ♖e3 The d5 square is weak now, but Black's pawn structure is still very solid. Black's position is probably at least equal here.; The right move seems to be 15. ♖h3! and it is not that simple for Black to defend the e6 pawn in a good way. 15... ♖f7 (15...e5 16. ♖c1

leads to a very unclear position. White will clearly have some play on the white squares.) 16. ♖d2 e5 17. ♘e3 with a great pawn structure but a slightly bad position of the king on f7 for Black. He is probably still doing ok and might even be better.]

15...g5 Of course 15...Nd7 was possible too.

16. ♘e3 ♘d7 17. ♖e2 h5 Black continues winning space and it is very hard to say what to do next for White! In the perfect case Black wants to play maybe Kf7, then exchange some pieces on the b-file and just be much better in the endgame.

18.h4 Looking for play on the kingside is the right plan.

18...g4 Black of course keeps the position closed.

19. ♘e1 ♘e5 What to do next as White?! This is a very difficult question.

20. ♘f4 I don't thinking giving up the bishop for the knight on e5 is a great decision. [20.f4 doesn't work because after 20...gxf3 21. ♘xf3 ♘g4 it is Black who is going to attack White and not the other way around.; But maybe White should have tried 20. ♘d3!? and now Black would need to find the difficult but very strong 20...♘f3+! (20...♘xc4 would lead to a good position for White: 21. ♘f4 ♘xe3 22. ♖xe3 ♖d7 23. ♘f1! bringing the bishop into the attack via c4.) 21. ♘xf3 gxf3

22. ♖xf3 and the key move is 22...♖b7! with a better position for Black because White doesn't have a defense against Bxe4 next.]

20...♖f7 Simple and good, connecting the rooks.

21. ♘xe5 dxe5 Black's position is clearly better. [I think a better move is 21...fxe5 and Black should not be afraid of 22.f3?! gxf3 23. ♘xf3 ♖ag8 24. ♖f1 ♖e8 with big pressure against the g3 pawn.]

22. ♘c2 White's idea is to bring the knight to e3 and to play f3- a very risky plan! But on the other hand to defend passively is also a very unpleasant decision to make.

22...♖a5! A very nice move! Black starts attacking the white pawns.

23. ♘e3 White is following the plan she started.

23...♖xc3 24. ♖ac1 ♖a3 Now Black just wants to play Rad8 so it forces White to play f3.

25.f3 ♖ab8! Another great move by Black. The threat of playing Rb2 next is very strong.

26. ♖b1 This is clearly the beginning of the end... [26.fxg4 is not any better since after 26...♖b2 27. ♖d2 ♖xd2 28. ♖xd2 the second black rook is getting into the game. 28...♖d8!

followed by Rd3 next, with an almost winning position for Black.; Maybe the best was to play 26.♖c2]

26...♖xb1 27.♖xb1 Black is a pawn up, but the position is still closed and White has some threats on the kingside.

27...♖d8! A very good decision! Black doesn't care about the g4 pawn and brings his rook into the game.

28.fxg4 White needs to take.

28...hxg4 Another solid move by Black. [Much worse is 28...♖d3?! 29.♗f1 and White is fighting!]

29.♖b3 What else to do?! Black has a lot of ideas how to improve the position, for example playing Bf8-Bh6 or trying to reach an endgame. [29.♗f1 wouldn't help since after 29...♖d3! White can't take the g4 pawn: 30.♖xg4 ♖xb1 and of course there is no perpetual check... 31.♖h5+ ♔g7 32.♖g4+ ♔f8 Black is a rook up and easily winning.]

29...♖c1+ 30.♔h2 [Maybe White could have fought a bit harder after 30.♖f1 30...♖xf1+ 31.♔xf1 but of course the position after 31...♖d4 just looks lost.]

30...♗xe4! A small and winning tactic...

31.♖xg4 White didn't have a choice.

31...♗xg2 Once again there is no perpetual check for White.

32.♖h5+ ♔g7 33.♗xg2 [33.♖g4+ 33...♔h6 and White is running out of checks.]

33...♖d1 The threat is Rh1 mate and there is no defense against it. ..

34.g4

34...e4! Great play until the end. Bd6 will come into the game with a deadly effect. The white queen is trapped on h5, so the game is over. Really fantastic play by Tabatabaei who showed great positional understanding and later on felt very comfortable in the tactical phase! **0-1**

1.d4 ♘f6 2.c4 e6 3.♞f3 c5 4.d5 b5 The Blumenfeld Gambit. A dangerous surprise weapon. It is very rarely seen in tournament practice nowadays, but White must be well prepared to fight for an opening advantage.

5.♙g5 The main reaction. As we will see in the other commented game by me, 5.e4 looks like an extremely dangerous way of handling the opening with White. [5.dxe6 5...fxe6 6.cxb5 d5 is the point of the gambit and Black has built up a very strong center with which he is going to compensate in long term.]

5...b4 There were some recent games for this move, but I believe it is slightly dubious. Black would like to take ground on the queenside and prevents the knight's development to c3, but it takes away the pressure from the central pawns and White is able to further strengthen it. [5...Qa5 was the old main line, but it is more interesting to play 5...exd5 6.cxd5 d6 7.e4 a6 8.a4

It looks very suspicious for Black as he cannot keep his queenside pawn structure. Pushing b4 yields a beautiful place for the knight on c4. However, there is a tactical solution with which Black is able to create counterplay. 8...♙e7! By unpinning the knight, Black attacks the e4 pawn. 9.♙xf6 (9.axb5 9...♞xe4; 9.♞c3 is met by 9...b4 and the e4 is hanging.; 9.♞bd2 9...♞xd5! is very strong as the queen cannot take back anymore on d5.) 9...♙xf6 10.axb5 ♙xb2 restoring the material balance.]

6.e4 d6 7.♙d3 White has a very strong center and he is going to undermine the b4 pawn with a3.

7...♙e7 8.O-O e5 [I think that it is better to keep the tension with 8...O-O

White has a very spectacular tactical blow though: 9.e5!? Black was probably afraid of this and it is the reason for locking the center with 8...e5. 9...♞xd5! The only move! A common motif with the bishops on g5 and e7, we have seen it also in the 5...exd5 line. (The point is after 9...dxe5? 10.d6! ♙xd6 (10...♙xd6 11.♙xf6! gxf6 (11...♙xf6 12.♙xh7+! ♙xh7 13.♙xd6+-) 12.♙e4+-) 11.♙e4 traps the rook!) 10.♙xe7 ♞xe7 11.exd6 ♞ec6 A very interesting position. The question is whether the d6 pawn is weak or strong. After all, I believe that White has the initiative (11...♙xd6? never works. 12.♙xh7+ ♙xh7 13.♙xd6+-) 12.a3! ♙b7 13.axb4 ♞xb4 Otherwise White

protects the passed pawn with c5. 14. ♖c3 The d6 pawn looks rather strong. Black is not in time to capture it. Be4 or Ne4 could be a follow-up with Qd2, Rfd1 ideas.]

9.a3! An important positional move! White must undermine the b4 pawn in order to open the queenside. White has more space thanks to the d5 pawn, but that in itself is not enough; he must open new areas, where he could make use of it.

9...bxa3 [9... ♖a6 looks more natural to me. 10.axb4 ♖xb4 11. ♖c3+= White should be better anyway, but at least Black has a triumph on b4!]

10. ♖xa3 ♖xd5!? The known motif comes back again. It indeed wins a pawn, but the positional disadvantages of this tactical shot are much bigger than the value of the extra pawn. White had foreseen the move, but he was rightly not afraid of it! [10...O-O 11. ♕d2! I like the idea to explode the central pawn structure with b4 a lot, which would be a huge positional achievement for White. Black cannot avoid it by playing a5, because it makes the pawn very weak and White could quickly concentrate some of his pieces on it with Nb5 and Qe1.]

11.cxd5 ♕xg5 12. ♖xg5 ♖xg5 13. ♖c4! Getting the knight to c4 is a huge success for White, but it is more important to take a look at the undeveloped black pieces, which allows White to explode the center. 13... Bh3 can easily be parried by 14.Qh3.

13... ♖d8 The only move! [13... ♖e7 loses to 14. ♖b6!]

14. ♖a4+! Avoiding castling by forcing the black king to move is another achievement for White!

14... ♖f8 [14... ♕d7 can be met by 15. ♖xd6+ ♖e7 16. ♖b3! ♖xd6 17. ♖b7+- wins back the material, Black's structure collapsed and of course his king is also shaky.]

15.f4!? White decides to attack the king! Actually, only this move was the novelty of the game! White did not need any preparation for this, his position looks so nice that he could get it by playing according to his feelings. It is rather strange that the black player has gone for this position, which was already reached once and Black was in serious trouble in a few moves. Perhaps they were not familiar with this game, who knows... [The alternative was 15.b4!? as playing on the queenside was also promising. 15...cxb4 16. ♖fc1 This is probably more precise than the direct recapture. (16. ♖xb4 16... ♖a6 17. ♖xd6+ ♖xd6 18. ♖xd6 ♖c5 Black gets some counterplay.) 16...a5 17. ♖xa5 g6 18. ♖xb4± happened in the game Laznicka-Filippov, Istanbul 2012. White had a big advantage because of the more active pieces, the space advantage and the very weak d6 pawn.]

15...exf4

16.e5!? Very spectacular and human play. White opens all the central lines in order to exert most pressure on the vulnerable

king on f8. [Actually there was nothing wrong with 16.♖xf4 16...♗a6 The ideal defense for Black is to take on c4 followed by installing the knight to Nd7-e5! But of course, there is no time for it. The punishment comes quickly: (Black cannot lock the position with 16...f6 as White plays anyway 17.e5! dxe5 18.♗xe5 with a very strong attack.) 17.e5! ♗xc4

18.e6!! A very effective attack against which Black has no adequate defense. 18...♗xd3 19.♖xf7+ ♔g8 20.♗g4! ♗g6 (20...g6 is refuted by 21.e7 ♗e8 22.♗e6!+-) 21.e7 ♗e8 22.♖f8+ ♗xf8 23.♗e6+ ♗f7 24.exf8=♗+ ♔xf8 25.♖f1+-]

16...♗a6? The final mistake, but the position was very unpleasant anyway. [The only and critical continuation was 16...dxe5 17.♗xe5 g5! Trying to keep the f-file closed. White has many promising resources here again, one of them is 18.♗e4 centralizing the queen and creating the threat of d6! 18...♗b7 19.♗f5! ♗xd5 (19...♗xd5 loses to 20.♗e4!+- deflecting the queen from the f7 square.) 20.♗xf7! ♗xf7 21.♗e4 traps the rook and Black still remains with his very weak king on f8.]

17.♗xd6! The sacrifice calls for itself! All white pieces are going to attack the f7 pawn, while the black ones are still undeveloped...

17...♗xd3 18.♗xf4 f6 19.exf6 gxf6 [Black cannot keep the f-file closed with 19...g6 because of 20.♗h6+ ♔g8 21.f7#]

20.♗h6+ ♔e7 White has several winning moves and the Indian player finds one of them... [20...♔g8 does not change anything, the attack continues to roll: 21.♖xf6 ♗d7 22.♗g5+ ♗g6 23.♖xg6+! hxg6 24.♗xg6+ ♔f8 25.♗f7#]

21.♗b7 [21.♖xf6+- was also just over for Black.]

21...♗f8 22.♗e3+ ♔f7 23.♗xd3 White won back the material and Black immediately gave up this hopeless battle with such a weak king. [23.♗xd3 23...♗d7 24.♗f5+-] **1-0**

I decided to comment this game because I really liked one of the moves in the middlegame...

1.c4 ♘f6 **2.♘c3** d5 **3.cxd5** ♘xd5 **4.g3** A kind of Anti-Gruenfeld setup.

4...g6 **5.♗g2** ♘xc3 **6.bxc3** ♗g7

7.♖b1! This is the point of delaying the development of the g1 knight. White exerts pressure on the b7 pawn and deprives Black from his ideal arrangement of his pieces with c5 and Nc6.

7...0-0 In the spirit of the Gruenfeld! Black sacrifices a pawn for quick development and positional compensation. The expert of this line with Black is GM Li Chao from China, he played some games for this move. [7...c6 and; 7...♘c6 are the other theoretical continuations.]

8.♖xb7! White accepts the challenge and grabs the pawn.

[But not with 8.♗xb7? because of 8...♗xb7 9.♖xb7 ♖d5! with a double attack.]

8...♗xb7 **9.♗xb7** ♘d7 **10.♗xa8** ♖xa8 This is the point! Black pins his hopes to the lack of the light squared bishop. In some opening variations he sometimes even sacrifices an exchange for achieving this and now it only costs a pawn. He has already completed the development, while the white pieces are still in their initial position. He believes it is worth a pawn, but on the other hand White has no weaknesses and if he manages to consolidate in a few moves, Black ends up without compensation. Therefore the next couple of moves are significant.

11.f3 [The alternative is 11.♘f3 when Li Chao plays 11...♖c6! (11...♘e5 is the other option, but Black does not have enough compensation after 12.0-0 ♘xf3+ 13.exf3+=) 12.0-0

12...♖c4! An unpleasant move to deal with! Black attacks the a2 pawn and it is not easy to protect it as the two most natural reactions, 13.Qc2 and 13.Qb3 are both leaving the e2 pawn. 13.♗a3 (13.a3 is met by 13...♘c5 and Rb8 next. White has serious difficulties with finishing the development. The queen must protect the e2 pawn and the movement of the d2 pawn drops the one on c3...) 13...♗f6 and Black wins back the sacrificed pawn on a2 and solves the opening problems.]

11...♖d8 Black creates an x-ray on the d-file. He wants to take on c3 sometimes. [Li Chao had a game with 11...♙d5 12.♙c2 (12.♙b3 is strongly met by 12...♙xb3 13.axb3 a5! followed by Rb8 and Nc5, Black wins back the pawn.) 12...♘e5 13.♘h3 was logical, but it missed a tactical blow: (13.♙f2! must be the critical move and perhaps the prepared improvement of the white player. White plays Nh3 and Kg2 next.) 13...♘xf3+! 14.exf3 ♙e6+ 15.♙f2 ♙xh3 and Black was fine in Tao-Li Chao, Queenstown 2012]

12.♘h3 ♙c8 Black again tries to operate with the x-ray. He wants to play Nb6 next, with a discovery attack on h3 and at the same time attacking the c3 pawn. He also thinks about playing Qa6 at some point, attacking the a2 and e2 pawns. [On 12...♘c5 White has time to consolidate with 13.♘f2 because the threat of 13...♙xc3 is not really a threat, as White could answer with 14.♙c2! ♙d4 15.e3! winning a piece.; After 12...♘b6 White already parries the Bxc3 threat with 13.♙c2]

13.♘f4 [I thought that 13.♘f2 is a safer place for the knight, but the computer agrees with the young Iranian's move.]

13...♘c5 [Black should have reached the game's position by playing 13...♙a6 14.♙c2 ♘c5 depriving White from other possibilities.]

14.♙c2 [14.♙a3! looks very strong and it is not obvious where the knight is going to leave. 14...♙xc3 is not enough 15.♙xc5 ♙xd2+ 16.♙xd2 ♙xd2 17.♙xd2± White consolidates with Nd3 and the 3 pieces are going to dominate the queen.]

14...♙a6 15.d3 This looks a bit careless, because it weakens the c3 pawn.

The critical moment for Black. He has many options and it is quite difficult to make a preference at first sight... [15.O-O was wrong in view of 15...e5 and the e2 pawn falls.; But 15.♙f2!? should have been played and White slowly brings his h1 rook to the game. Black is still a pawn down and it is already unclear where his compensation is.]

15...♙b6 Black prevents O-O and Kf2 at the same time. It sets a tactical trap after 16. Be3, but he misses a hidden resource and he falls into his own trap... [15...♙a5 is met by 16.♙d2 ♙b8 17.O-O and White consolidates.; 15...♘a4 16.c4 also looks inadequate for Black.; 15...♙a4! seems to be the best, although it does not solve all the problems, but at least it wins back the pawn... 16.♙xa4 ♙xc3+ 17.♙d2 ♘xa4 18.♙xc3 ♘xc3 19.♙d2 ♘xa2 20.♙a1 ♘b4 21.♙xa7 White has a small, but undisputable advantage because of his better pawn structure and more active rook, but the win is far away. 21...♙d7]

16.♙e3! White calculates a move further!

16...♘xd3+ Well, it does not work, but otherwise White plays Kf2 and he is simply a pawn up for nothing.

17.♙xd3! Obviously this is not the move Black has missed...

17...♖xd3 18.♗xb6 ♖xc3 Here we are! The bishop is hanging and Black is threatening with Rc1, winning the rook. Kd2 does not work because the c3 is protected, so Black was probably happy at this point, but the next move clears the smile away from his face.

19.♗g1!! It is possible to blunder such an ugly move! White preserves his extra piece!

19...♖c2 [19...♖c1+ 20.♔f2 The king goes to g2 and frees the kingside pieces. Black cannot create any counterplay within two moves... 20...♖a1 21.♔g2 ♖xa2 22.♗f2 e5 23.♗d5 ♖xe2 24.♖c1+- winning the c7 pawn with a technical win.]

20.♗e3! White frees the h1 rook and the extra knight decides the game.

20...♖xa2 21.♔f2 a5 22.♖c1 ♗e5 23.♗d5 a4 24.♗xe7+ ♔g7 25.♗c6 ♗f6 26.♗b4 ♖b2 27.♗d5 1-0

1.d4 ♗f6 2.c4 e6 3.♗f3 c5 4.d5 b5 Once again the Blumenfeld Gambit! It looks like it is a very popular weapon in youth tournaments. I must admit that I also employed this variation when I was younger.

5.e4!? A shocking move, but it looks extremely strong! Black wants to sacrifice a pawn to get a very strong center and White replies with a counter sacrifice for quick development!

5...♗xe4 This must be the critical move. [5...bxc4 is simply met by 6.♗c3 followed by taking back on c4.]

6.♗d3 ♗f6 7.O-O! As simple as that! White has sacrificed a pawn and at first sight the compensation is not obvious, but the machine already gives him a significant advantage. There are no direct threats at the moment, but still Black is unable to solve the problems.

7...♗e7 The most logical follow-up. Black should aim at quickly finishing the development.

8. ♖c3! It seems like White is not in a hurry at all, he calmly develops his pieces, ignoring the fact that he is a pawn down.

8...b4 [The drawback of 8...bxc4 9. ♗xc4 is that White is threatening with d6, trapping the bishop and it is not easy at all to parry this threat. 9...exd5 weakens the light squares too much, 10.Nxd5 gives more than enough compensation. 9...d6 is met by 10. ♗b5+ Kf8 would already confirm that something went wrong for Black, but other moves are not better either. 10...♗d7 11.dxe6 fxe6 12. ♖g5! Quickly putting pressure on the e6 weakness. 12...O-O 13. ♖e1 e5 14. ♗c4+]

9. ♖e4 White creates the threat of d6!

9...exd5 Not an easy decision as it deprives Black from castling, but other moves were not better either. [9...♖xe4 10. ♗xe4 f5

looks decent, but White has the important reply 11. ♖e5! O-O (11...fxe4 12. ♖h5+ g6 13. ♖xg6 hxg6 14. ♖xh8+ ♖f7 15. ♖h7+- wins.) 12. ♗f3 Black cannot hold the h1-a8 diagonal. 12...d6 13.dxe6 dxe5 14. ♗xa8±; Even after 9...d6 the problems are coming along the long diagonal: 10.dxe6! ♗xe6 11. ♖xf6+ ♗xf6 12. ♗e4 wins material.]

10. ♖xf6+ ♗xf6 11. ♖e1+ ♖f8 [11...♗e7 is met by 12. ♗g5! provoking a huge weakening! 12...f6 13. ♗f4 threatening Bd6! 13...O-O 14. ♖h4!+- This is the point of provoking f6. Now

Qh5 and Nf5 are decisive threats against which Black has no adequate defense.]

12. ♗f4! Developing with tempo. The bishop cannot be allowed to occupy the d6 square as that would paralyze the black pieces.

12...d6

13. ♗c2! A very deep and powerful move! The rook on a8 seems to be a permanent problem for Black in this entire game. White is threatening to play Qd5, trapping the rook and 13...d4 is met by 14.Be4!

13...♗b7 The only move. Black must try to cover the long diagonal, but suddenly the problems are coming from another direction. [13...d4 14. ♗e4+-]

14. ♗a4! The other point of 13.Bc2! Suddenly Black's back rank becomes a real target and he has no good way to parry the threats because of the d6 weakness.

14...♗e7 [14...♖d7 15. ♗xd6+ is also bad.]

15. ♖d2!? White makes a useful developing move, connects his rooks and at the same time he prepares the exchange sacrifice on e7, followed by bringing the other rook to e1 and penetrating on e8.

[However it was even stronger to play

15. ♖h4!! Of course it is easy to miss this move, but once the knight occupies the f5 square the game is over. 15... ♗xh4 (15...g6 does not prevent the threat, White still plays 16. ♖f5! gxf5 17. ♗h6+ ♔g8 18. ♗f3!+- and Qg3 wins next.) 16. ♗xd6+! ♔g8 (16... ♗xd6 17. ♗e8#) 17. ♗e8+ ♗xe8 18. ♗xe8+- with decisive material advantage and White keeps on attacking.]

15... ♖d7 [Unfortunately for Black, there is no time to push 15...d4 because of 16. ♗xe7! ♗xe7 17. ♗e1 ♗e4 White has different winning moves here, but the strongest is 18. ♖xd4! cxd4 19. ♗xd4+- and the threats of Rxe4 and Bxd6 are too much for Black.]

16. ♗xe7!! Excellent intuitions! The young Polish player feels that he should not let his opponent slip away. One cannot

calculate such sacrifices until the end, but must feel that all white pieces are already perfectly placed, while the black rooks are still disconnected and it takes a lot of time until he could get them into the game. There is a lot of tension in the center, but Black is ready to lock the center with d4. One can feel that this is the moment of seizing the initiative with some tactical blow.

16... ♗xe7 17. ♗e1 ♖e5 [17... ♗d8 is even worse and White wins after 18. ♗xd6+ ♔g8 19. ♗f3! ♖f6 20. ♗f4+- simply bringing all the pieces to the attack. Black has no move, the b7 bishop is hanging and Ng5 is coming. 20... ♗a6 21. ♗c6+-]

18. ♖xe5 dxe5 19. ♗xe5 ♗d8 Black tries to protect the back rank. [19... ♗f6 is strongly met by 20. ♗e3!+- and the threat of Re8 is decisive. 20...Bc6 does not work because of 21. Qxc5+, winning the bishop.]

20. cxd5 Not a bad move, but not the best either. [White could have played more directly and won more or less by force:

20. ♗e2! 20...f6 Black could take twice on e8, because after Bd6 he has Kf7. However White continues slowly with 21. ♗e6! threatening Bd6! 21... ♔f7 22. ♗d6!+- and Black cannot parry the Re7 threat! The game is over. This would have been a very nice finish.]

20...f6 Black tries to connect his rooks with Kf7.

21. ♖e8+ ♜xe8 22. ♘e8 ♖xe8 23. d6 In general, the two rooks are superior to the queen, but in this particular position, there are more relevant factors. Black still needs a few moves to activate both of his moves. Meanwhile, the pawn on d6 is very dangerous, threatening to promote with d7 and Bc7. The black pawns on the c5 and b4 are vulnerable. All these facts mean that only White can be better.

23... ♙f7 24.h4 White opens the back rank. [24.d7 right away was premature because of 24... ♖e4! and White cannot promote his pawn because of his weak back rank and Bc7 is met by Rd4!, winning the pawn.; 24.f3! was stronger to get control over the e4 square. Now it is much harder for Black to use his rooks.]

24... ♖e4 25. ♘g3 White frees his queen. Black already seems to consolidate, but the variations prove that he is still in trouble.

25... ♖he8 [25... ♖d4 is met by 26. ♜e2 ♖e8 27. ♜h5+! and the c5 pawn falls.; 25... ♖d8 26.f3 ♖d4 27. ♜e2 threatening on e7 and after 27... ♖e8 28. ♜b5! this time the way to h5 is closed, but the queen penetrates from another direction.]

26. ♙h2 Kind of prophylaxis, but a bit slow. [White could have attacked the weak pawns with 26. ♜c2! 26...c4 27.f3 (Or 27. ♜a4 is also strong.)]

26... ♘c6 Black tries to parry the Qb5 and Qa4 ideas and also to block the d-pawn.

27. ♜d1! A very nice move and the point of the previous Kh2! White had this Qh5+ in mind and he wanted to execute it at any cost.

27...g6 [27...c4 28. ♜h5+ ♙g8 29. ♜c5 wins the b4 pawn.]

28. ♜c1! The profits of provoking g6. White now keeps an eye on the h6 square. The queen is extremely powerful, threatening from all directions with each move.

28...c4 29. ♜h6 [White missed a beautiful direct win: 29.f3! The c4 pawn must be protected, so the only move is 29... ♖d4

30. ♜g1!!+- (But not 30. ♘f2? because of 30... ♖xd6 31. ♜xc4+ ♖ee6)]

29... ♙g8 30. ♜d2! The queen is switching directions again and again. This time the b4 is under attack and it supports the d-pawn.

30...a5? The decisive mistake, but the position was difficult anyway. [30... ♖d8 31. ♜xb4 is also bad.]

31.d7! The right moment for advancing the pawn. White correctly calculates that he wins material.

31...♖d8 32.♔d6! ♘xd7 33.♔d5+! ♜e6 34.♘c7! +- And the game is over!

34...♜e8 35.♔xd7 c3 36.bxc3 bxc3 37.♘f4 c2 38.♘h6 ♜6e7 39.♔d5+ ♜e6 40.♔c4 Black resigned! A great opening and a very nice attacking game! **1-0**

World Youth U16 Olympiad,
2014.12.18

GM Csaba Balogh
Best rating: 2672

An excellent demonstration for the power of the two bishops. Even with such reduced material, Black manages to convert his advantage.

27...♖a2! Obviously Black must play the most active moves, otherwise White consolidates and holds the draw.

28.♖f2? Probably the decisive blunder. White gets into a fatal pin on the first rank. [The only move was 28.♖e1 although Black keeps his advantage after 28...♖xg2+ 29.♔f1 ♖c2! 30.♘e6! Black is better, but White is fighting hard for the draw.]

28...♖a1! Naturally Black needs the rooks on the board to maintain his winning chances.

29.♖f1

29...♙d3! Sending the rook away from the protected square to avoid the movement of the c1 bishop.

30.♖e1 [30.♖d1 is not better either. 30...♙xe5 31.♘e6 (31.♘d5 also loses to 31...♙e2! 32.♖e1 ♙g3! 33.♖xe2 ♖xc1+--+) 31...♙f5! 32.♘g5 ♙b2--+ wins an exchange!]

30...♙xe5! Making use of the unfortunate placement of the c7 knight.

31.♘d5 [31.♖xe5 31...♖xc1+ 32.♔f2 ♖xc7--+]

31...♙g3! The rook runs out of squares on the back rank, but it defends along the c-file.

32.♖e8+ [32.♖d1 loses instantly to 32...♙e2--+]

32...♔f7 33.♖c8 The rook has more squares on the c-file than on the back rank, but it does not solve the problem of the c1 bishop. White cannot leave the pin with his king, the two bishops are squeezing it to the corner. Black cannot attack the c1 bishop once more, but he can slowly create more and more threats.

33...♔e6 [The direct way to win was

33...♘f5! 34.♞c5 (34.♞c6 loses to 34...♘e4!-+; 34.♞c4 runs into 34...♘e6!-+) 34...♘d6! 35.♞c3 Otherwise Ba3 wins. (35.♞c6 35...♘a3-+) 35...♘e5! and the white rook has no good square to leave. 36.♞c4 (36.♞c5 36...♘d4+--+; 36.♞c6 36...♘e4-+) 36...♘e6-+]

34.♘e3 ♞b1 At the moment, White manages to avoid losing a piece, but he still cannot leave the pin. White is lacking any counterplay, the best he can do is waiting and trying to parry the direct threats of winning the bishop. From a practical point of view, White's position is pretty much hopeless and the game also finishes in few moves.

35.♞c3 ♘e2 Black keeps the king in the corner. It is important to deprive White from the Kf1-e2 possibility.

36.♘c4? A blunder, but the position was very difficult anyway. [36.♞c2 36...♘b5 37.♞c8 ♔e5 is also quite hopeless from a practical point of view.]

36...♘xc4 37.♞xc4 ♔d5! Black wins a piece. The rook cannot control the f4 square...

38.♞c8 ♘f4 39.♞h8 ♞xc1+ 40.♔f2 ♞c7 White could have simply resigned here, but the game goes on for a while...

41.♔f3 ♘e5 42.♞a8 ♞c3+ 43.♔g4 h5+ 44.♔g5 ♞g3+

45.♔h4 g5+ [It was not too late to go wrong with 45...♞xg2??

46.♞a5+ ♔e4 47.♞xe5+! ♔xe5= with stalemate!]

46.♔xh5 ♞xg2 White has no chance to trade pawns. h4 is always met by g4.

47.♞a3 [47.♞g8 does not help 47...♘f4 48.h4 ♞h2-+]

47...♔e4 48.♞a4+ ♔f5 49.h4 g4 50.♞b4 g3 51.♞g4 ♘f6 52.♞g8 ♞h2 53.♞g5+ A nice trick, but it does not help. Black is not forced to take the rook.

53...♔f4 54.♞g4+ ♔f3 0-1

GM Arkadij Naiditsch
 Best rating: 2737

Black clearly managed to outplay his opponent and White finds himself in a very difficult endgame. The a-pawn is fixing the white knight to a3 and the black bishop is a great piece. We should also consider that the h1 square is white, which gives Black some extra winning chances. Black has a couple of winning ideas and the most simple one would be to get to b3 with his king, but as we can see on the result, something will go terribly wrong...

60...♔h2 61.♔f2 The only move. [61.♔e3 was losing on the spot: 61...♔xg3! 62.♔xd3 ♔xh4 The h-pawn will now decide the game. 63.♔c4 ♔g3 64.♔d6

64...a3 Black is just faster. 65.♔c2 a2 66.♔b2 h4 67.♔xf7 h3 68.e6 h2 69.e7 h1=♔ 70.e8=♔ a1=♔+ with mate to follow shortly.]

61...♔a6 Black needs to give White an "extra move" to make him play Kf3 to have Kg1 and this is what Aravindh is doing, but whether this is the right idea we will see in the next couple of moves. Black could have played much safer by just putting his bishop let's say to e6, then playing Kh3-Kg4 and only then try to put the opponent into zugzwang.

62.♔f3 White can't keep the king on f2 for long anyway. [62.♔b1 62...♔c4 63.♔a3 ♔d3 and White has to move the king.]

62...♔g1 Black is following his plan.

63.g4 is White's only chance, otherwise the black king will sooner or later reach the b2 square.

63...♙b7+? What a blunder! Black had a lot of different ways of playing for a win! [63...hxg4+ was also a mistake because after 64.♖xg4 ♔f2 White is escaping with only moves: 65.♔g5 White wants to play f5 now. 65...♙c8 66.♖f6 ♙e6 67.f5! ♙xf5 68.♖xf7 ♔g3 Black is going for the h4 pawn, but it is too late. 69.e6! The last exact move! 69...♙xe6+ 70.♖xg6 ♔xh4 71.♖f6 ♙b3 72.♖e5 and the white king is reaching the b2 square, which leads to an easy draw.; The right move was 63...♙c8! 64.gxh5 gxh5 Now the white pawns are blocked for a moment. 65.♖e4 ♔f2 66.f5 ♔g3 67.e6 and the beautiful and not so difficult 67...♙xe6! wins the game! 68.fxe6 fxe6 69.♖e5 ♔xh4 70.♖xe6 ♔g3 71.♖d5 h4 72.♖c4 h3 and Black is winning because the white knight from a3 is not in time to stop the h-pawn.]

64.♖g3 hxg4 and here comes the move that Black missed:

65.f5! Suddenly it is Black who is in danger of losing as it is not that simple to stop the white pawns!

65...gxf5? Another unlucky move... [Black had couple of ways to force a draw here, connected to the idea of sacrificing the bishop: 65...♙c8 66.e6 ♙xe6! 67.fxe6 fxe6 68.♖xg4 ♔h2 and White can't improve his position without giving up the last pawn on h4, so the game is a draw.]

66.h5 The h-pawn is running... How to stop it?!

66...♙e4 [66...f4+ would lead to a very complicated, but probably drawn position: 67.♖xf4 ♔f2 forcing White to take the g4 pawn because of the threat of playing g3 next. 68.♖xg4 ♙e4 69.♖g5 ♔e3 70.♖f6 ♔f4 71.h6 ♙d3 White can't take the f7 pawn because of Kxe5, but the white knight is joining the game. 72.♘c4! ♙h7 Black doesn't have anything better than to keep on waiting. 73.♖xf7 Black's position looks lost, but a miracle saves the game: 73...a3! 74.♘xa3 ♖xe5 75.♖g7 ♙d3 76.♘c4+

76...♖f4 The black king is going to g5 and Black starts to wait with his bishop on the b1-h7 diagonal. The position is a draw.]

67.h6 f4+ 68.♖xf4 ♙h7 69.♖xg4 ♔f2 As we can see, we have a similar position as in the line above, but with Black being a sort of tempo down.

70.♖g5 ♔e3 71.♖f6

71...♔d4? This move is already a fatal mistake! [71...♔f4 would still have led to a draw! 72.♘c4 ♕e4! and White doesn't have anything better than 73.♔xf7 a3 74.♘xa3 ♔xe5 75.♘c4+ ♔f4 76.♘d6 ♕b1 77.♔f6 ♔g4 78.♘f7 ♔h5 with a draw.]

72.♘b5+! White takes his chance! The trick now is that Black can't play Ke4 or Kd5 because of Nc3+ followed by Nxa4.

72...♔c5 73.♔xf7! White is just faster.

73...♔xb5 74.e6 a3 75.e7 a2 76.e8=♔+ I think this was a good moment to resign, but clearly Black was very upset with the outcome of such a promising endgame.

76...♔b4 77.♔e5 ♔b3 78.♔g7 ♕d3 79.h7

79...a1=♔ 80.♔xa1 We just saw a very interesting endgame where Black was very close to win, then totally lost the control over the position and finally even lost it! **1-0**

4 best games of the past week

**(1) Salem, A.R. Saleh(2558)
- Ivanisevic, Ivan(2633) [B29]**

Karpos Open 2014(7.7),
2014.04.03

GM Csaba Balogh
Best rating: 2672

A brilliant game was played by the young GM from the Arabian Emirates. Ivanisevic is a very creative player and he often wins games like the following one, but this time he is on the suffering side.

1.e4 c5 2.♘f3 ♘f6 Salem is a 1.d4 player, therefore Black tries to surprise his opponent with a tricky sideline.

3.♘c3 [3.e5 3...♘d5 4.♘c3 is probably White's best reaction.]

3...d5 The consequent continuation. Black could have transposed to a classical Sicilian with 3...Nc6, but the text move follows the idea of leading the opponent to an unexplored territory.

4.e5 d4 4...Ne4 and 4... Nfd7 are also alternatives.

5.♞a4! This is already a novelty and a very strong one. It is quite rare to see one between two GMs right on move 5. In general, this move is against the principles because the knight should not be placed at the rim of the board, but there is a very concrete idea behind it! [5.exf6 happened mainly in the previous games, although Black usually obtained a nicely playable position after 5...dxc3 6.fxg7 cxd2+ 7.♙xd2 ♙xg7]

5...♞fd7 The c5 pawn had to be protected, but this allows the standard sacrifice which completely confuses the development of the black pieces.

6.e6! fxe6 With his sacrifice, White has created a doubled pawn which hardly can be called a real material advantage. White might put big pressure on the e6 pawn with Bc4, Ng5, Qe2 and 0-0 followed by Re1 and Black faces difficulties in completing his development. With his next move, White aims to improve the situation of his misplaced a4 knight.

7.b4! White undermines the d4 pawn and also frees the way for the knight to b2-d3, from where it might either jump to e5 or f4.

7...cxb4 8.♞xd4 An amazing position, which cannot be evaluated on a positional basis. Black has an extra pawn and the a4 knight is still out of the game, but in my opinion White's attacking potential gives him more than enough compensation for the deficits. From a practical point of view, White definitely has the easier game.

8...Nf6 9. Bb5+ Bd7 A concrete attempt to make use of the misplacement of the a4 knight. [9...Kf7 was more natural at first sight, but White obtains excellent compensation here as well after 10. Nf3 Qa5 11. Qe2 with a nice edge and Black cannot win the a4 knight with 11...a6 in view of 12. Ng5+ Kg8 13. Bc4 wins. 13...Qxg5 14. Qxe6+ Bxe6 15. Bxe6# Not bad... :)]

]

10. Nxe6! Small tactical trick, using the fact the the bishop is pinned. White has restored the material balance.

10...Qa5 This was Black's point but White has a very strong reply to maintain his strong pressure:

11. c4! Great! White protects his a4 knight and also keeps his bishop on b5 to avoid the unpleasant check on e5. [The harmless 11. Bxd7+ 11...Nxd7 12. Nb2 would have allowed Black to trade the queens after 12...Qe5+ and without the queens on board, there is no more danger anymore for Black.]

11...Kf7 [11...bxc3 is simply met by 12. Nxc3! Bxb5 13. Nxb5+- and the knight cannot be taken in view of Nc7!; 11...Bxb5 12. cxb5+]]

12. Ng5+ Kg8 Black tries to put his king into safety, but on g8 it is hardly any better than it was in the center.

13. Nc5 Finally the knight arrives to the game and it immediately turns out to be an extremely strong piece. [13. Qe2± also looked very strong.]

13...Bg4

14. ♖e8!! The first brilliant move of the firework!

14...g6 There was no other move to avoid mate. The following sacrifice is even missed by the computers. They only find it in big depth or after making the next 3 moves. [14...♗xd1 15. ♖f7#; 14...♞xe8 15. ♔xg4+- is also hopeless for Black.]

15. ♔xg4!! ♞xg4 16. ♖f7+ ♔g7 17. ♞ce6+ ♔f6 [17...♔h6 is met by the calm 18.d4!+- and Black gets mated after the discovered check of Ne4 next move!]

18. f4!! The key move behind the queen sacrifice! Bb2 is coming next and the haunt of the king is starting. White only has one bishop for the queen, but Black cannot prevent the fatal threats. [18. ♖b2+ right away was a mistake in view of 18...♔e5+! 19. ♖xe5+ ♞xe5 and Black is fine.]

18...h6 [18...♞c6 does not make big difference. 19. ♖b2+ ♔f5 and White wins for instance after 20.h3+-]

19. ♖b2+ ♔f5 Here White goes for the most trivial and most human win...

20. ♞d4+ [The machine suggests 20. ♞f3!? 20...♔h7 21. ♞h4+ ♔e4 22. ♖xg6!+- mate.]

20...♔f6 [20...♔xf4 leads to forced mate in many different ways. One of them is 21. ♞e2+ ♔xg5 22.h4+ ♔f5

(22...♔h5 23. ♞f4#) 23.O-O ♔e4 24. ♖xg6+ ♔f5 25. ♖xf5#]

21. ♞b3+ White is satisfied with winning the queen and ending up with an extra piece.

21...e5 22. ♞xa5 ♞c6 [22...hxc5 23. ♖d5+- is totally over.]

23. ♞xc6 bxc6 24. ♖e6 hxc5 25. ♖xg4 The game is over. White has an extra bishop and still continues attacking.

25...gxf4 26. ♖f3 ♖c5 27. ♖xc6 ♔ad8 28. ♖d5 ♔f5 29.d3 What a game!!! 1-0

(2) Fedoseev, Vladimir (2662) - Zvjaginsev, Vadim(2642) [D00]

67th ch-RUS HL 2014(9.3),
2014.06.13

GM Csaba Balogh
Best rating: 2672

We are in the final round of the Russian Higher league. The tournament, where the first 5 players qualify to the Russian Superfinal, where they join to Kramnik, Grischuk, Karjakin and the other top players. The winner of this game had a guaranteed place there, but draw were not enough for them. My good friend Vadim Zvjaginsev manages to win a brilliant tactical game. The game is full of unusual, but beautiful tactical motifs.

1.d4 d5 2.♘f4 White tries to drive the game to less explored territories.

2...♞f6 3.e3 g6 4.c4 An ambitious move. Usually the players who quickly develop their bishop to f4 like to set up a very solid position with c3, but in this game White logically wanted to create complications. Now we reached a Gruenfeld-like position and both sides played in the spirit of this opening and used many typical tactical and positional ideas.

4...c5!? In the spirit of the Gruenfeld to play against the center. [4...♘g7 5.♞c3 would have transposed to a huge main line of the Gruenfeld, but Zvjaginsev himself does not employ this opening, therefore he handles the opening with the typical moves but in the same time he avoids some theoretical discussions.]

5.dxc5 ♞c6 Zvjaginsev consequently continues his idea to avoid transpositions. We have already reached a new position. [However if Black had played 5...♘g7 6.♞c3 we have again transposed to a position with thousands of games...]

6.♞f3 ♘e6 [The most natural and objectively stronger move 6...♘g7! would have been a transposition again after 7.♞c3]

7.♞c3 ♖a5 The most consequent move again, but White can make use of, that the bishop has not developed yet to g7 and the pressure on c3 is that big at the moment. [7...dxc4 was dubious in view of 8.♞g5! White wins the c4 pawn.]

8.♞b3! White attacks the b7 pawn and suddenly it is not easy to deal with this simple threat. Black has no adequate way to protect it, some passive moves like Nd8 obviously does not come into consideration, neither the trade of the queens with Qb4 because White is pawn up. Black is basically forced to do the following intuitive sacrifice.

8...♘g7! 9.♞xb7 O-O! Who says A must say B too. A piece

does not count now, Black must focus on the e1 king, which still needs two tempi to castle kingside and Black should find his counterplay on the c3 square. Ne4 is a very dangerous threat.

10. ♖xc6?! Too greedy! [10. ♖b5! White should have been satisfied with two extra pawns and offered the trade of queens. White would have had the advantage in this case, but who could refrain to a "free" piece on c6...]

10... ♘e4! We have reached the dream of all Gruenfeld players. Such a dynamic position.

11. ♘d4 White tries to close the bishop and prevents the main Bxc3 threat. [On 11. ♘d2 11... ♘xd2 12. ♖xd2 dxc4 is very unpleasant. All diagonals and files are opened on the exposed king. White has nothing better than 13. ♔e2 ♖b4 14. ♖b5 but then Black wins back the material and gets a good position after 14... ♙xc3 15. ♖xb4 ♙xb4]

11... ♘xc3 12. a3! Very nice resource also from White! Black was threatening with different kind of discovered checks with the knight, but all of them could be met by b4! Only one check prevents it, but first Black activates one of his rooks.

12... ♖ac8 13. ♖b7

13... ♘a2+!! What an amazing move, which forces the king

to run! [13... ♘e4+ 14. b4 ♖a4 15. ♖b5+- forces the trade of the queens and White wins.; 13... dxc4 14. ♖b4 ♖xb4 15. axb4+- also with a winning advantage.]

14. ♔d1 [14. b4 could now be met by 14... ♖xa3! this is the point of the unexpected Na2 move to close the rook on a1!]

14... ♖a4+ 15. ♔e1 [15. ♖b3 White obviously would like to trade queens with such a vulnerable king, but it did not work tactically in view of 15... ♖xb3+ 16. ♘xb3 dxc4 17. ♘d4 ♖fd8! The dynamic plays continues even without the queens on board. 18. ♖xa2 c3 19. ♖a1 ♙xd4 20. exd4 ♖xd4+ 21. ♔c2 cxb2 22. ♔xb2 ♖xf4+- Black soon ends up with material advantage.]

15... ♖a5+ Unfortunately Black is forced to repeat moves. [15... dxc4 might look tempting at first sight, but Black does not have enough compensation after 16. ♖xa2! ♙xd4 (16... c3 17. b3) 17. exd4 c3 18. ♖a1 ♖xd4 19. ♖b4!+- and White covers everything.]

16. ♔e2?! Objectively a mistake after which Black is better, but it was impossible to foresee what will be the outcome of the complications.. White should have agreed to the repetition with 16. Kd1, but the tournament situation also forced White to continue this exciting fight.

16... ♖xc5! Grabbing some material and indirectly protecting the a2 knight.

17. ♘xe6 [17. ♖xa2? 17... ♖xc4+ 18. ♔f3 ♖xa2+-]

17... ♖xe6 [17... ♖xc4+ was also strong, but Zvjaginsev did not want to send the king to the kingside, he preferred to keep it in the center... 18. ♔f3 (On 18. ♔e1 Black wins with the pretty blow

18...♙c3+! 19.bxc3 ♖xc3+ 20.♙e2 ♖xa1 21.♘xf8 White is still ahead materially, but there is a forced mate... 21...♙c3+! 22.♙f3 ♖d1+! 23.♙g3 ♘e4+ 24.♙h3 ♖h5#) 18...♖e4+ 19.♙g3 fxe6 with a promising position for Black!]

18. ♖b3 White tries to bring back the queen to the defense and also would finally like to take that knight on a2 off the board...

18...dxc4! Excellent reaction! Black sacrifices a piece again, but he locks the white queen to the corner, which gives him more space to build up his attack against the king, which is still standing in the center.

19. ♖xa2 e5!? Zvjaginsev decides to advance his pawn to e4 to squeeze white even more and to avoid defenses like f3-Kf2.

[However Black had an even stronger move, which leads to win in beautiful lines:

19...♖xf4!! Eliminating the defender of the b8 square. 20.exf4 ♖b8! 21.♖b1

21...♖b3!! This would have been just amazing! Black is a full rook down, but he basically caged all white pieces. Black is winning in all lines: 22.h4 Nice idea to bring a defender and exchange an attacker with Rh3, but it is too slow (22.♙e1 trying to free the bishop, but Black does not allow it 22...♖a5+! 23.♙d1 ♖d5+ 24.♙e1 and the winning combination is: 24...♙c3+! 25.bxc3 ♖e4+ 26.♙d2 ♖xb1-+) 22...♖f5 23.♖h3 ♖c2+ 24.♙e1 ♖xh3 25.gxh3

25...c3+! 26.bxc3 ♖xa2—]

20. ♗g3 e4 21. ♖d1 A desperate attempt to hide the king on the queenside, but it is easy to feel, that it should not be successful. However to find its refutation requires enormous play. [Unfortunately for White 21.f3 trying to hide the king with Kf2 and Be2 did not help in view of 21...exf3+ 22.gxf3 ♗h6! 23.f4 e5! is going to be crushing! Black opens all the lines on the king.]

21... ♖fd8+ 22. ♖c2

22... ♗f8!! This is shocking! The idea itself is very nice and logical, Black would like to push c3 with a crushing attack and first he leaves the pin. But why he moves with his king to f8 and why not to h8? Actually only Kf8 was winning and the reason could not be calculated, Zvjaginsev could only believe to his intuition. [22... ♗h8 could have met by exactly

the same moves as White was defending in the game 23. ♖d1! ♖xd1 24. ♖xd1 c3 it looks over, but it is actually not 25.b3! ♖d8+ (25...c2+ 26. ♖c1 ♖c3 seems to be over, but White saves himself with 27. ♗c4! ♖d8 28. ♖xc2! and Black does not have more than perpetual check. 28... ♖a1+ 29. ♖b1=) 26. ♖c1 ♖d2 27.b4! completely unexpected at such attacking pieces, but White survives 27... ♖h5 28. ♖b3 ♖b2 29. ♖a4!!+— And here is the difference! White is threatening with Qe8 mate! This is the reason, why Black had to put his king to f8, to cover the backrank mate! Amazing!]

23. ♖d1 [There was no time for 23. ♗e2 23...c3—+ is over, Rd2 or cxb2 is coming next.]

23... ♖xd1 24. ♖xd1 c3 25.b3! Perfect defensive skills, but it does not help this time. White would like to close the c-file by developing the bishop to c4. [25.bxc3 25... ♖xc3—+ leads to mate soon.; 25.b4 25...c2+ 26. ♖c1 ♖c3]

25... ♖d8+! Only this wins! [25...c2+ 26. ♖c1 ♖c3 looks also very tempting, but it leads only to draw after 27. ♗c4! White is ready to take on c2. 27... ♖d8 28. ♖xc2 ♖a1+ 29. ♖b1 ♖c3+ 30. ♖c2=]

26. ♖c1 ♖d2 27.b4

27... ♖h5!! Zvjaginsev finds again the only way to win! The d1 square is the key in Black's attack.

28. ♖b3 ♜b2! 29. ♘c4 Kind of resignation, but there was nothing better. [And in comparison to the 22...Kh8 line, on 29. ♖a4 there is no threat on e8, so Black has time to play 29... ♖d5!—+; 29. ♖c4 leads to forced mate after the pretty 29... ♜b1+! 30. ♔xb1 ♖d1+ 31. ♔a2 ♖c2+ 32. ♔a1 ♖b2#; 29. ♖d1 29... ♜b1+—+]]

29... ♜xb3 30. ♘xb3 ♖e2 31. ♘c2 ♖a6! The most precise move. Before going to c4, Black first weakens the b4 pawn.

32. a4 ♖c4 33. ♜d1 ♔e8 34. ♜e1 ♖a2 White resigned. What a game!! **0-1**

(3) Shimanov, Aleksandr(2649) - Jobava, Baadur(2716) [D16]

15th ch-EUR Indiv 2014(4.5),
2014.03.06

GM Arkadij Naiditsch
Best rating: 2737

We will now face one of the most crazy games I have ever seen. Jobava is famous for being a very creative player and Shimanov is also very good in tactics. The crazy play started on move 12 and went on over 20 moves, which is a very rare fact, because most of the games are decided relatively quickly in the tactical phase. Enjoy this parade of tactics and creativity!!!

1.d4 ♘f6 2. ♘f3 d5 This time Jobava decides for something very solid, which we don't see too often in his games. His usual repertoire is more connected to Benoni or KID structures.

3.c4 c6 4. ♘c3 dxc4 5.a4 So we are in one of the main lines of the Slav.

5... ♘g4 Not the main move, but not a rare one either.

6. ♘e5 ♘h5 7.f3 White's idea is simple: take the bishop h5 out of the game by putting up a pawn-wall with f3-e4. [Lately White is more often trying 7.g3 7...e6 8. ♘g2 ♘b4 9.O-O with maybe a little advantage for White and a much more calm position than in the game.]

7... ♘fd7 This is still theory and in 2009 Shimanov played this position with the white pieces.

8. ♖xc4

8...e5 Now we can see the idea behind 7...Nfd7: to get fast play in the center. In case White would now be in time to play e4 and then Be2-0-0 Black's position would already be quite bad because of the horrible bishop on h5.

9.e4 [Of course not 9.dxe5?? 9... ♖h4+ and the knight on c4 is lost. 10.g3 ♖xc4]

9... ♖h4+ An important check to weaken the white pawn structure.

10.g3 ♖f6 And now the d4 and f3 pawns are under attack. As we can see, the position is already getting quite forced.

11.dxe5 ♖xf3!? This move is some sort of novelty on the high level. [In Shimanov's previous game 11... ♖xe5 was played. 12. ♖xe5 ♖xe5 13.g4 ♖g6 14.f4 The black bishop is trapped. 14... ♖f6 15.f5 ♖h4+ 16. ♖d2 Black has some compensation, but White should have a clear advantage here.]

12. ♖d6+ The only move, but a very strong one.

12... ♖e7! And this is probably a novelty prepared by Jobava. What a shocking idea to put the king in front of all the pieces, but things are much more complicated than it seems. [After 12... ♖xd6 Black would lose on the spot after 13. ♖xd6 ♖xh1 and even a full rook up is not helping Black to survive here.

The position is lost by force. 14. ♖g5 f6 15.exf6 gxf6

16. ♖xf6 ♖xf6 17. ♖e6+ ♖f8 18. ♖xf6+ ♖g8 19. ♖d8+ ♖g7 20. ♖g5+ ♖g6 21. ♖e5+ White is totally winning.]

13. ♖b3!? A very tricky move by Shimanov. [The more solid continuation 13. ♖g5+ 13... f6 14.exf6+ gxf6 15. ♖f4 ♖xd1+ 16. ♖xd1 ♖e5 would at most lead to a slightly better endgame for White.]

13... ♖xe5 [Black would be doing bad after 13... ♖c5 14. ♖c4 ♖xh1 15. ♖xc5 and White's attack is clearly crushing. ; But maybe it was time to take the rook: 13... ♖xh1!? 14. ♖xb7 And here comes a very strange, but strong computer move: 14... ♖e6! With very unclear play. Of course White at least has a draw by playing 15.Qb3 Ke7 16.Qb7.]

14. ♖xb7+ ♖f6! No fear! [14... ♖xd6 would also lead to a complicated, but worse position. 15. ♖g1 Threatening to play Be2 next. 15... ♖e6 There are many other moves for Black, but this seems to be the strongest. 16. ♖e2 ♖d3+ 17. ♖d2 ♖f2 18. ♖f1 ♖d4 19. ♖b3+ ♖e7 20. ♖xd3 and only White can be better here.]

15. ♖g1! The best and only move. Black already wanted to play Qxh1.

15... ♖xd6 Black is playing the best. The queen on f3 cannot

be saved anymore, so it is time to get as much compensation for the queen as possible.

16. ♖e2

16... ♜bd7! Strong play! Black is bringing all his pieces into the attack.

17. ♘xf3 ♜c5 Jobava continues playing for the initiative. [Another way to go on was 17... ♜xf3+ 18. ♖f2 ♜fe5 Black has 2 pieces for the queen and quite some attack. 19. ♖b3 Objectively White should be better, but I think Black has quite some practical chances to be back in the game.]

18. ♜d5+ The only move for White!

18... cxd5 Black has to take the knight and let back the white queen into the game. In case of 18... Kg6 19. Nf4 the game would be over.

19. ♖xd5 ♜xf3+ Black has 3 pieces for the queen, which is already a lot, but the bishops on d6 and h5 are hanging and the king on f6 is also badly placed. The position remains very unbalanced and probably favourable to White.

20. ♖f1 [20. ♖f2? is a mistake as after 20... ♜e5! White cannot take on c5 because of Bd4 check.]

20... ♜e5 Once again Jobava plays the most practical move in the position, trying to get the maximum compensation for the

queen.

21. ♖xc5 This move is also forced.

21... ♜ac8 22. ♖f2 A logical move, but now Black is getting very strong play. [22. ♖e3 was probably stronger and after 22... ♜hd8 all the black pieces are in the attack, but it is just not enough. 23. g4! ♜xh2+ 24. ♖e1 And White should win the game because of the huge material advantage.]

22... ♜d4 The game continues being very tricky.

23. ♜e3 ♜xe3 24. ♖xe3

24... ♜xh2+ White is always missing one move to be winning. As long as the white king is under attack the game remains very unclear.

25. ♖g2 [25. ♖e1 doesn't lead anywhere after 25... ♜f3+]

25... ♜c2+ 26. ♖h3 The white king escaped to the h-file, but here White is also in a mating net, what a crazy position!

26... ♜g4+ Jobava continues finding the best practical chances.

27. ♖h4 h5 Finally a move without check, but the white king is caught. Black wants to play Nf3 next with a mate.

28. ♖g5+ The only move. [After 28. ♜gf1+ 28... ♖g6 29. ♖g5+ ♖h7 only Black can be playing for a win.]

28...♔e6 29.♚d5+ ♔e7 Not a mistake, but the black king is going into the wrong direction. [29...♔f6 would probably lead to a draw. 30.♚gf1+ (After 30.♚d6+ 30...♙e6 Black is already better.) 30...♔g6 31.♚xf7+ And here Jobava probably missed the very strong

31...♔h6! and White doesn't have anything better than to force a draw after 32.♚f6+ gxf6 33.♚xf6+]

30.♚b7+ ♔f8? This move already gives White what is probably an advantage, but of course during a practical game and with not much time left on the clock it is hard to blame Jobava for such a logical reply. [Black could still save the game after 30...♔f6 31.♚gf1+ ♔g6 32.♚xf7+ ♔h6 and we are back to the line above.]

31.♔g5 The white king finally escapes its trap on h4.

31...f6+ 32.♔f4 ♚e2! Once again Jobava is trying to mate, this time by playing g5.

33.♚b4+ The only move. The position is still very forced.

33...♔g8 34.♚c4+ ♔h7

35.♚xe2! This is the only way for White to go on.

35...♙xe2 36.♚g2 With a double attack on the knight h2 and bishop on e2. After amazing complications we reached an endgame which should be minimally better for White.

36...g5+ Another logical move.

37.♔e3 ♚g4+ To keep the bishop doesn't make sense as the knight is now going to take a very strong position on e5.

38.♔xe2 ♚b8 Another logical move.

39.♔d3! A good move! White is quickly bringing the white king closer to the queenside pawns.

39...a5 And this move probably costs Black the game... [39...♚b4! would put White in quite some trouble. 40.♔c3 Giving up the e4 pawn is probably the best option. 40...♚xe4 41.b4 White should of course be better, but the game is far from over as the black pawns and a very strong knight on e5 would give Black counter chances.]

40.♔c3 ♔g6 41.b3 The time trouble is now over. White is an exchange up and should be winning, even if it is not that easy.

41...♚c8+ 42.♔b2 White continues to stabilize his position.

42...♚e8 43.♚e1 Everything is finally protected and next

White wants to activate the rook from g2.

43...♘e5 44.♖d1! Shimanov continues playing a perfect game. White gives up the e4 pawn but goes for the much more important a5 instead.

44...♘f3 45.♖d5 ♖xe4 46.♖xa5

46...h4? And Jobava misses his final chance... [46...♖g4! with the idea of playing h4 next would have led to a much tougher fight. 47.♖c2 White needs to give up the g3 pawn. 47...♖xg3 48.♖d5! Cutting the f3 knight. White's position should be winning now, but things are still quite tricky from a practical point of view.]

47.gxh4 ♘xh4 48.♖c2 Now White is just must faster and the game finally comes to an end.

48...g4 49.♖a8 ♔f5 50.a5 g3 51.♖g8 Preventing the g-pawn from advancing further.

51...♖e5 52.b4 g2 53.a6 We just saw a really amazing game where both players played almost perfectly in a very very complicated position. Just a few mistakes by Black gave White a chance for a full point. But what an impressive performance by Shimanov, who managed to play an almost perfect game in a crazy position! **1-0**

(4) Savchenko, Boris(2596) - Rapport, Richard(2704) [B07]

Riga Tech Open A 2014(9.1),
2014.08.24

GM Arkadij Naiditsch
Best rating: 2737

Both players, Savchenko and Rapport, are playing very creative chess. In many cases both of the opponents are choosing a creative move instead of a practical one, so we are going to see one of the most craziest game I have ever seen. After a total mess from move 14 until 40, the game finally ends in a perpetual check. A really fun game to watch is ahead of us!

1.e4 d6 2.d4 ♘f6 3.♘c3 e5 Another game with the Philidor by Rapport.

4.♘f3 exd4 This was a popular line, but lately it has been very rarely played on GM level.

5.♘xd4 ♙e7 6.♙f4 is one of the most sharp moved, but also one of the most central lines.

6...O-O 7.♖d2 White wants to castle queenside as quickly as possible and start the attack on the kingside.

7...d5 and here starts the crazy line!

8.♘db5 This is of course all theory, the next moves for both sides are forced.

8...♙b4 Any other move is bad for Black.

9.O-O-O c6! Of course this is all known, but it is still a nice move by Black.

10. ♖c7

10... ♖c7 Now White needs to choose between 2 moves.

11. ♔d4 I am not sure at all if this is the best square. [11. ♔e3!? is at least an interesting option.]

11... ♗xc3 12. bxc3 ♔e7 and the craziness is starting! Black can't save the rook on a8, but of course he is getting strong compensation. White's king's position is open and the knight on e4 is a monster piece.

13. ♖d3 It is hard to find another defence against Qa3.

13... ♗e6 A very nice move. Black is not only developing the pieces, but also preparing to play c5 next.

14. ♖xa8 c5 As we can easily see, the position is very sharp and very hard to evaluate.

15. ♔e3 [15. ♔a4 is not good since after 15... ♖xf2 White is losing material.]

15... c4 Of course, chasing the rook away from d3 and getting ready to play Qa3.

16. ♖d4 ♔a3+ 17. ♔d1 White didn't have anything better already.

17... ♖xc3+ 18. ♔d2 is also the only move for White. [18. ♔e1 is just bad due to 18... ♖c6! with a double attack on d4 and a8.]

18... ♖b1+ 19. ♔d1 Black can already force a draw after 19... Nc3, but the position is looking very promising and of course you don't need to ask Rapport twice if he wants to play for a win...

19... ♖c6! The strongest move in the position. Black is using the fact that White cannot exchange the queens and wins some material back.

20. ♖c7 [In case of 20. ♔xa3 20... ♖xa3 21. ♖d2 ♖xa8 Black's position should be close to winning.]

20... ♖xd4 21. ♔xd4 If we take a fresh look at the position now, Black is still some material down, but he continues having a strong attack which gives him clearly more than just compensation.

21... ♖c3+ Very logically played, the knight does not belong to b1.

22. ♔d2 ♖e4+ 23. ♔e2 ♔xa2 Black already has 3 pawn for the piece and the white king is still on the run.

24. ♔f3 It seems like White doesn't have anything better.

24... ♔a3+?! What a strange decision by Black. [Much more logical is 24... ♔xc2 Why not take such an important pawn?! 25. ♖xd5 White is trying to at least stay in the game. 25... ♖xd5 26. ♔xd5 and now Black has the very strong and safe 26... ♖e8

Qxf2 is the threat now. 27.♔d4 b5 Black has 3 pawns for the piece, the white pieces are badly placed and the king is on f3, so I think Black's position should be close to winning.]

25.♖e3 ♖e7 and here comes the move that Rapport probably underestimated:

26.♟xc4! Very nice calculation by White and anyhow it is clear that he needed to do something with the bishop on f1.

26...dxc4 also seems to be the best for Black. [26...♖h4 doesn't bring anything since after 27.♔e2 strangely the white king is quite safe.]

27.♟xe4 Wow! What a position. The white king is in the middle of the center, but it seems like there is no mate! [27.♖xe4 was of course losing: 27...♟g4+ 28.♔e3 ♖a3+! 29.♔d4 ♖d8+ with an easily winning position for Black.]

27...g5 An interesting try but this move is too dangerous! There are soooo many interesting moves for Black that it is really hard to choose a continuation, especially during a practical game, where Rapport was definitely thinking that he just must be winning somehow. [After 27...♖f6 28.♖d4! seems to hold things together for White.; Maybe Black could have tried 27...♟g4+ 28.♔d4 ♖b4 29.♟d5 ♖a4 with a very crazy position.]

28.♟g3 A cool and good reply by Savchenko.

28...♖f6 [28...f5+? 29.♔f3 and now it is already White who is winning.]

29.♟e5?! A very human reply, but not the best. [29.♖d4 looks very strong. 29...♖f5+ 30.♔e3 ♖xc2 Although White gave the pawn on c2, finally the rook is getting into the game. 31.♖d1 and I think White is already the one that could have big ambitions here.]

29...♖f5+ [After 29...♟f5+ 30.♔d4 ♖d8+ 31.♔c3 ♖e7 32.♖a1 White is clearly better because the king on c3 is actually feeling quite safe.]

30.♔d4 f6 The position remains very sharp, but slowly White is taking over. The white king only needs to reach the c3 square to give White a clear advantage.

31.♟xe6! Savchenko is playing a great game in a complicated position but actually a move like Nxe6 is very logical, as less black pieces mean smaller mating chances.

31...♖e8 32.♟g3? White misses a fantastic win. [32.♟xf6! was leading to a win. 32...♖xf6+

33.♔d5 The king is a strong piece! 33...♖f5+ 34.♔d6 Black is out of checks, which means "game over". The white king on d6 holds everything together... What a funny position!]

32...♖xe6 33.♔f3 ♕xc2 and we are back to a very complicated position...

34.♕xb7! In a very complex position and being short on time, Savchenko continues playing very well. White's position looks extremely dangerous again with the king on d4, but Black doesn't have anything more than just a draw...

34...♔d2+ Black needs to give a check and the move in the game leads to a draw by force. Black doesn't seem to have anything more than that.

35.♖c5 ♕a5+ White also needs to be very careful with the king moves. One mistake and the game could be over immediately.

36.♕b5 and now it is White's turn to play for a win... [36.♖d4 36...♕d2+ with a draw.]

36...♕a3+! The right check! Black is forcing White to take the c4 pawn to open the position of the white king even further.

37.♖xc4 ♖e4+ Finally the useless rook on e6 is entering the game.

38.♖d5 ♖b4 Once again the best move. Both players are handling the time pressure perfectly, playing a very high level of chess.

39.♕e8+ ♖g7 40.♕e7+

40...♖g6 So the time trouble is over and the question is, does White have anything more than a perpetual check?!

41.♕e8+ ♖g7 42.♕d7+ Savchenko doesn't find anything and there is just nothing. It is not possible to play for a win with a totally opened king on d5-even with a piece up.

42...♖g6 43.♕e8+ ♖g7 44.♕e7+ ♖g6 45.♕e8+ What a game! 1/2-1/2

David vs. Goliath

Peter Zhdanov
Chief Editor of Pogonina.com

In this special weekly column we will be looking at the most unexpected results that occurred last week. Players usually face opponents of a similar level. Considerably less frequent are situations when a significantly lower-rated player succeeds in beating a much stronger adversary.

22 upsets from last week will be featured in this issue. A 537 rating points gap and a first-move advantage didn't help GM Baryshpolets (2566) against Tagelsir (2029). How did GM Oleksienko (2621) lose to Aliyev (2141) as White? GM Strikovic (2528) was blown off the board in just 19 moves by Barrenechea Bahamonde (2142). The gargantuan encounter FM Gruskovnjak (2357) - Zirkelbach (1920) lasted 121 moves. GM Tkachiev (2629) lost an interesting London Classic simul game to Healey (2111). And many more.

Top-10:

Baryshpolets (2566) - Tagelsir (2029), 0-1, [537](#) points
 Tkachiev (2629) - Healey (2111), 0-1, [518](#) points
 Oleksienko (2621) - Aliyev (2141), 0-1, [480](#) points
 Gruskovnjak (2357) - Zirkelbach (1920), 0-1, [437](#) points
 Vishnu (2463) - Asadli (2033), 0-1, [420](#) points
 Zirkelbach (1920) - Kos (2328), 1-0, [408](#) points

Barrenechea Bahamonde (2142) - Strikovic (2528), 1-0, [386](#) points
 Al-Bashayra (1780) - Pal (1406), 0-1, [374](#) points
 Tomas Falcon (2112) - Liascovich (2473), 1-0, [361](#) points
 Buzeti (2252) - Rifelj (1903), 0-1, [349](#) points

Average gap: 427; White won 3 games, Black won 7 games.

You can view all the games in the accompanying pgn file.

If you have ever won a game against someone rated 300 points or above yourself, please send it to peter@pogonina.com for publication. Any additional information (a photo, annotations, etc.) will be appreciated.

This week's featured player is Lee Bullock. Here is the message we have received from him:

"I created one of the biggest shocks ever on Monday so just sending you the game for your David vs Goliath Website. I will also email it to you, thanks difference of 575 and I am no junior, 36 years old and playing Chess only 4 years. Did play a bit when little though. Thanks".

Endgame section

(15) Svidler, Peter(2758)
- Kramnik, Vladimir(2787)

FIDE Candidates,
2014.03.15

GM Csaba Balogh
Best rating: 2672

This is not a typical endgame which we usually comment, but an amazing position where in a seemingly hopeless situation Kramnik finds a miraculous defence and saves the game.

41. ♖c6?! is objectively a mistake, but who could blame Svidler for missing the following continuation. White seems to be easily winning, his d-pawn supported by all his pieces seems to be decisive. [White should have been greedy and grab the pawn: 41. ♖xb4! 41... ♖a6 42. ♖d5 ♖xd6 (Keeping the material balance with 42... ♗xd6 is risky due to the pin on the d-file. 43. ♖c4 ♖b7 44. ♖d3+-) 43. ♖xe5± White has an healthy extra pawn and very good chances to win the game.]

41...e4!! The first shocker by Kramnik. Black weakens the pawn structure in order to be able to create counterplay against the white king. [41... ♖d8 42. d7+-; An important detail is that after 41... ♖e2 42. ♖e3! is winning: 42... ♖xd6 43. ♖xd6! ♖xe3 44. ♖xf8+! ♖xf8 45. ♗xe3+-]

42. fxe4 There was nothing better than accepting the sacrifice, but now the g4 pawn becomes a target. [42. ♖xe4 42... ♖xd6= equalizes.; 42. ♖xd7 42... exd3 43. ♖c8 d2 Black's d-pawn is faster.]

42... ♖e2!

43. ♖f3! Svidler had to give up his strong d-pawn, but suddenly the black king becomes vulnerable after the opening of the f-file. [43. ♖xd7 43... ♖xd3 44. e5 ♖e4+=]

43... ♖xd6 44. ♖e8 f6 45. e5! Svidler had probably foreseen this position long ago and thought that he is going to win soon. However the real cold shower is just about to come. [45. ♖g6+ 45... ♗g7 Black holds.]

45...f5!! What a brilliant idea, combined with the next move! [The point was that 45...♙xe5 is refuted by 46.♙xe5 fxe5 47.♖xf8+! ♔xf8 48.♕c5 ♔e7 and White has a decisive tempo until the black king leaves the pin... 49.♕xb4! ♔e6 50.♕xd6 ♔xd6 51.♖f3 ♔d5 52.♖e3+- With an easily won pawn endgame with the distant passer. White gives up his b-pawn and collects the e5 and runs faster towards the kingside pawns.; 45...♖a6 46.♙c8+- leaving the pin also wins for White.; 45...♙e4 46.♙g6+! is another important nuance. 46...♙xg6 47.hxg6 fxe5 48.♖xf8+! ♔xf8 49.♕c5+- and the g-pawn promotes.]

46.gxf5 [46.♖xf5? 46...♙xg4+]

46...♖f6!! Just amazing! Another only move by Black and suddenly he is safe. The white king is too exposed to be able to make progress. [46...♙e4 was also tempting, as in comparison to the 45...Qe4 line, White cannot trade queens, but here White wins after 47.e6 ♙g4+ 48.♔h2 ♙xf3 49.♙f7+ White collects all the material with checks! 49...♔h8 50.♙xf8+ ♔h7 51.♙f7+ ♔h8 52.♙f6+ ♔g8 53.♙g6+ ♔h8 54.♙xh6+ ♔g8 55.♙xg5+ ♔h7 And here the winning move is 56.♕h4! ♙e2+ 57.♙g2 ♙xh5 58.♙e4+- and Black has no adequate defence against the march of the pawns. He runs out of checks after Rd2 Kg3.]

47.♔g3 Trying to free the bishop by leaving the pin, but Black

has another only move! The white queen had no good square to leave the pin on the e-file. [47.♙c8 47...♙xe5; 47.♙b8 is met by 47...♖xf5! 48.♖xf5 ♙g4+; 47.e6 47...♙e4 And Black holds in all the lines.]

47...♙e4! A last exact move and Black has nothing to worry about anymore. Qh4 Kg2 Qe4 is threatening. White has no useful move. Somehow all his pieces are immobilized and they are lacking any harmony.

48.♕c5 [48.♙b8 48...♖xf5]

48...♙e1+ 49.♕f2 ♙e4 50.♕c5 ♙e1+ 51.♕f2 What a defence by Kramnik! 1/2-1/2

(16) Naumann, Alexander(2560)
- Jorczik, Julian(2400)

German league,
 2014.10.18

GM Csaba Balogh
 Best rating: 2672

We might think that this position is from a study, but actually it was reached from a game with classical time control... Black plays the most natural move, which changes the objective evaluation...

57...a2? [As the further analysis will tell, Black should have eliminated the pawn first and only then promote his passed pawn. The winning continuation was 57...♙xf5! 58.♙xf5 a2 59.g6 a1=♚ 60.g7

White is threatening to play g8Q, so the right move is 60...♙f7! Black is ready to take on h7, therefore White does not have anything better than to play 61.gxh8=♚ ♚xh8 62.♘g5+ ♙g7 and Black is winning. The last trap that Black should not fall into is 63.♘e6+ ♙h6!-+ (But not 63...♙xh7?)

64.♘f6+! ♙h6 65.♘g4+ and the knights are forcing perpetual check, as 65...♙h5 moves into 66.♘f4+! ♙h4 67.♘g6+)

58.g6 a1=♚ 59.g7 White is threatening g8Q. Black finds the best chance to play for the win.

59...♙f7!

60.f6!! Fantastic!!! I personally would never believe that this is a game and not a study. This last move is the reason why Black should have taken that pawn in the initial position. White has closed the a1-h8 diagonal and he is threatening to

take the rook. Despite the huge material advantage Black has no win, the knights are controlling everything.

60...♖xe6 Here comes the blunder, after which Black is winning again... [60...♖xh7 is met by 61.♘g5+! ♔g8 Otherwise White promotes the g-pawn with check, but now 62.♘e7#! is mate!]

61.gxh8=♚? White had two different ways to draw... [61.g8=♚+ was the difficult way to hold the draw, the idea becomes clear few moves later... 61...♔d6 62.♚xh8 With the king on d6, the game is drawn. 62...♚e5+ 63.♔g4 ♕f5+ 64.♔g5 This is the difference! The bishop is not protected on f5 by the king and Black cannot create a successful mating net. 64...♕xh7+ 65.♔h6=; The easiest draw was 61.♘c7+ 61...♔d7 62.gxh8=♚ ♚d4+ 63.♔g3 ♚e3+ 64.♔g4= and Black does not have more than perpetual check.]

61...♚e5+! 62.♔g4

62...♕f5+! 63.♔f3 Sad, but other moves would have led to a quick mate. [63.♔g5 63...♚g3+ and the bishop is not hanging. 64.♔h5 ♚g4+ 65.♔h6 ♚g6#]

63...♚xd5+ Black now wins thanks to the very effective cooperation of the queen and bishop.

64.♔f2 ♚d4+ 65.♔f3 ♕e4+ 66.♔g3 ♚e3+ 67.♔h4 ♚f2+

68.♔g4 ♕f5+ [White resigned in view of the forthcoming mate: 68...♕f5+ 69.♔h5 ♚h2+ 70.♔g5 ♚g3+ 71.♔h5 ♚g4+ 72.♔h6 ♚g6#] **0-1**

Editorial Preface

First of all we once again want to wish you a Happy New Year 2015!

Our weekly newsletter is going to experience some changes that we hope will make every issue even more enjoyable:

1) Peter Zhdanov (the husband of Natalia Pogonina and redactor of pogonina.com) will be in charge of the weekly "David vs Goliath" game, which will feature the biggest upset of the week. Chess is a game of pieces and not of "names", so anyone can beat anyone.

2) We are very happy to announce that Alexander Khalifman (former World Champion, fantastic writer, chess books publisher, chess coach, owner of "The Grandmaster Chess School" in St.Petersburg, etc.) is going to share his thoughts on opening theory with us! The new column titled the "The K-Files" are coming up, starting next week.

With all this new material, Csaba and Arkadij are only going to comment the best game of the week instead of the previous two.

Now let's come to the chess:

There were a lot of New Year's opens, but the chess elite was resting, with the exception of Wesley So, who crushed the North American Open with the fantastic score of 8/9.

Your commentator Arkadij also won the Zurich Open with 6.5/7.

Another great result was shown by the young German player Donchenko, who won the strong Groningen Open with 8/9.

Already in 10 days from now we will see the best chess players battle it out in Wijk aan Zee and the line-up includes Carlsen, Caruana, etc...

Until then, we hope you enjoy our comments from the less prestigious events- but not less interesting games!

Arkadij Naiditsch & Csaba Balogh

2 best games of the past week

**(1) Kurmann, Oliver(2426)
- Naiditsch, Arkadij(2731) [C58]**

38th Zurich Christmas(4.1),
2014.12.28

GM Arkadij Naiditsch
Best rating: 2737

We are in the 4th round (out of 7) of the Zurich Open, and both my opponent and I are on 3/3. Oliver is a very solid player and has been an IM for many years, but he will probably never become a GM because of his law studies which went successfully and now he is working as a lawyer. To win against a solid IM with the black pieces is always a difficult task, but in the current game I was lucky to get a very complicated position right out of the opening, where my opponent was a full 2 pawns up, but my pieces clearly had the better development and I managed to finish the game with a nice mating attack.

1.e4 e5 2.♘f3 ♘c6 3.♙c4 ♘f6 I decided to play a slightly more complicated line than 3...Bc5, which often leads to very boring positions.

4.♘g5 Kurmann surprised me with this move, as he usually plays the 4.d3 line. Of course 4. Ng5 is one of the main moves, but now things are very quickly getting complicated.

4...d5 5.exd5 ♘a5 This is also the main move. [After 5...♘xd5? 6.♘xf7! ♔xf7 7.♚f3+ ♔e6 8.♘c3 White gets a deadly attack.]

6.♙b5+ c6 This is also clearly the main move. In a couple of my games I tried 6...Bd7, but I was not too happy with the

outcome of these games.

7.dxc6 bxc6 Now White has the choice between 3 moves: 8.Be2 has been the main line for many years, 8.Qf3 is a very risky decision, but a possible try and 8.Bd3 is the new fashion, which was already played in a couple of games on the highest level.

8.♘d3 This move looks a bit strange because White doesn't have the d3 move with the usual development, but we should not forget that White is a full pawn up.

8...♞d5 9.♞f3 ♘d6 10.O-O There is nothing new until here.

10...O-O [I didn't want to play 10...♞f4 because it is just a line where Black can at most equalize: 11.♞c3 ♞xd3 12.cxd3 O-O 13.♞e4 and White might be a bit better.]

11.♞e1 Black wants to play f5, so White attacks the e5 pawn.

11...♘g4 After some thought, I decided to play this move because it looked very interesting to me. More usual is 11...Re8.

12.h3 A forced move, since Black wanted to play f5 again.

12...♞xf3! It is usually a bad decision to give up the light squared bishop, but I found quite a forced line which I want to play next. [in case of 12...♞h5 13.♞f5 I believe that White's position can be a bit better here.]

13.♞xf3 and here comes the key move behind 12... Bxf3:

13...f5 Of course I can't give White any rest and need to play aggressively, trying to use the bad development of the white pieces.

14.♞xf5 This move is probably a must. [After a passive move like 14.♞f1 14...e4 15.♞d1 I have the nice 15...♞c7! with the idea of playing Qd6 and f4 next. White is under heavy attack.]

14...♞e7! Before playing this move, I had a 30 minutes thought. Black really had a lot of choices and the position is very complicated. [14...g6? was clearly a mistake. 15.♞e6+ ♞g7 and now White has the strong 16.♞xd5! sacrificing the queen! 16...cxd5 (If Black takes the queen, his position is probably close to lost: 16...♞xf3 17.♞xf3 followed by Nc3-d3 and I don't see how Black should survive here.) 17.♞xd5 Things are still not that clear but Black probably doesn't have enough compensation here. 17...e4 doesn't lead anywhere after the cool 18.♞c3 and White is close to winning.; And after 14...♞f6?! 15.♞e4 I couldn't really find a way to continue my attack, maybe just with 15...Qe6, but I was not sure at all if I would have enough compensation here, when White has such a great bishop on e4.; 14...♞c5!? This was the other move I liked during the game. It is hard to say what to do now for

White... Black's threat is simple, to play g6 and put maximum pressure on the f2 square. 15.♖f1 is maybe the best try for White and now Black has a very wide choice of moves, such as 15...Nf4 or 15...Qe7. It is a very complicated position that needs deep analysis.; White will also be better after 14...♗g5?! 15.♕e6+ ♖h8 White wins a tempo with 16.d3 ♗e7 followed by the "usual" queen sacrifice 17.♕xd5 ♖xf3 18.♕xf3 with a much better position for White.]

15.♗e4 My opponent spent almost 45 minutes on this move, but it seems like it is almost losing by force. The question is, does White has anything better?! Black's threat is to play g6 and win a full piece. [15.♘c3 is a possible try. 15...♘xc3 16.♗xc3 ♖xf5 17.♗xa5 but here as well Black's play looks very dangerous.]

17...♖af8 How to protect the f2 pawn?! 18.♖f1 doesn't solve the problems. Black has a lot of very nice continuations and one of them is 18...♗f7 19.f3 e4 with probably a mating attack for Black.; Another possibility for White is to play 15.♗g4 but now Black is gets direct play with 15...♗f6 16.♕e6+ ♖h8 17.♖f1 And after a simple move like 17...♘f4 once again White's position just looks close to lost. All the black pieces are in the attack and White's development of the queenside is still on "pause".]

15...g6 I of course have to open the f-file.

16.♕g4 [16.♕xg6 is not much better. 16...hxg6 (Black can also continue with 16...♖f4 17.♕xh7+ ♖h8 18.♗g6 ♖f6 19.♗h5 ♗xh7 20.♗xh7+ ♖xh7 and in this endgame Black is clearly better because of White's horrible development.) 17.♗xg6+ ♗g7 18.♗xg7+ (White can't win the piece back with 18.♗xd6? because after 18...♘f4 it is not possible to defend from Qxg2 next.) 18...♖xg7 and we are in an endgame where White has 4 pawns for a piece, which is good, but on the other hand all the pieces are still on the 1st rank, which gives Black enough time to create strong play. Black should be clearly better here.]

16...♖f4 17.♗e2

17...♖af8 I am just playing the most natural moves and it seems like I am already close to winning.

18.♕f3? This move loses by force. [White should have tried 18.d4! and things are still not that simple. 18...♖xf2 19.♗xf2 ♖xf2 20.♖xf2 Now Black has quite a few different ways to continue: 20...h5 (20...e4?! 21.♖g1! and the position is very unclear.) 21.♕f3 ♗h4+ 22.♖f1 exd4 and I think White's position should be very dangerous, but the fight still goes on.]

18...♖xf3! Of course! This move is just impossible to miss.

19.gxf3 ♘f4 20.♗f1 ♗g5+ 21.♖h1 [21.♖h2 leads to the same result. 21...e4 and the bishop on d6 joins the attack. 22.♖xe4 ♘xh3+ 23.♖xh3 ♖xf3#]

21...Kf5 The most simple. The pawns on f3 and h3 are hanging.

22.Ke3 Qxh3 23.Qc3 White is trying to develop the pieces, but it is too late...

23...e4 Once again am choosing the most direct way to finish the game. The threat is to mate with Nxf2 and Qh2.

24.f4 Qxf4+ 25.Kg1 The fight is over, mate in 3 is on the board.

25...Qe2+ 26.Qxe2 Kf2+ and my opponent lets me mate him! :)

27.Kf1 Kh1# I was very happy to win this game and I actually don't know where exactly White went wrong. Clearly the most critical position is after 14...Qe7!, but it still seems to be very hard to play during a practical game. **0-1**

(2) Vitiugov, Nikita(2738) - Kosyrev, Vladimir(2520) [D37]

European Rapid 2014(9.13),
2014.12.21

GM Csaba Balogh
Best rating: 2672

Nikita Vitiugov wins a very nice attacking game despite the shortened time control.

1.d4 e6 2.c4 f6 3.Qc3 d5 4.Qf3 dxc4 We have reached the Vienna gambit from a slightly unusual move order. It used to be a very popular opening not so long ago, but recently it has gone out of fashion a bit.

5.e4 Bb4

6.Bxc4!? This pawn sacrifice is considered to be one of the most critical tests of the opening and probably the reason why it disappeared from the highest level. [The main line continues with 6.Bg5 6...c5]

6...Qxe4 7.O-O! Another pawn sacrifice! It is already the logical follow-up after the previous move. White gives up some material for a quick development and active piece play.

7...Qxc3 8.bxc3 Be7 Black should be satisfied with only one

extra pawn and he should aim to consolidate. [It is better not to be too greedy with 8...♙xc3 9.♖b1 White wants to deprive Black from castling with Ba3 and if he castles now Rb3 might be very dangerous with the idea of switching the rook to the kingside after playing Ne5.]

9.♘e5 The main and the most dangerous move, activating the knight and opening the route for the queen to develop to g4.

9...O-O 10.♕e1 This is basically the novelty. I don't know if it was a prepared one or just played over the board, but in any case I don't believe that it improves the main line. [Theory goes with 10.♖g4 10...♘c6 11.♕e1 f5! (Entering the structure 11...♘xe5 12.dxe5 is very risky for Black! The e5 pawn reduces the movement of the black pieces and it gives very strong attacking potential against the king. White is threatening with Bh6 and also intends to bring his pieces to the attack with Re3-g3 or Rh3, followed by Bd3 and sacrifices in front of the king.) 12.♖f3 ♘xe5 13.♕xe5! (13.dxe5 Having the pawn on f5 is a huge difference compared to 11...Nxe5 12.dxe5. White is very far from a succesful attack, as the f5 pawn prevents the main threats.)]

10...♘c6 11.♖f3 This is the real novelty, as there were some games where White transposed to the main lines with 11.Qg4.

11...♙d7 [Black was familiar with the structure 11...♘xe5!? 12.dxe5 that it is very dangerous for him, however the placement of the queen on f3 allows the following defensive resource: 12...f5 13.exf6 ♙xf6 14.♙a3 ♙e7! This is the difference to the 10.Qg4 line. Now the queen is under attack and White cannot play Rad1 with a significant tempo! White still has very strong compensation, but I am not sure if it is going to be enough for more than a draw... 15.♙xe7 ♖xe7 16.♖e3

16...♙d7 Black is ready to give back the e6 pawn and simplify to a balanced endgame, although White can still press a bit with 17.♕ad1 threatening to sacrifice on d7 and Black cannot bring his a8 rook to the game because the a7 pawn is hanging. However after some move like 17...Rf6, I don't believe that Black should lose this game...]

12.♖g3 ♖h8 Leaving from the pin and the Bh6 threat.

13.♙f4! Developments with a tempo are always welcome. The c7 is under attack and White wants to bring his a1 rook into the game.

13...♙d6 [In case of 13...♘xe5 White can already recapture with the bishop, creating a double attack. 14.♙xe5 ♙f6 15.♙xc7 ♖c8 16.♕e3! White has leveled the material and keeps a very strong initiative. He still has good attacking potentials with Bd3, Qf4 and Rh3.]

14.♕ad1! All pieces are playing now! White also prepares for the capture on e5 with the pawn, after which the rook will stay perfectly on the d-file. Nevertheless, there is a potential idea to lift the rook to the 3rd rank.

14...♘e7! A clever move! Black drives a piece to the kingside around his king.

15.♙d3! The bishop stands the best and creates the biggest

threats along the b1-h7 diagonal!

15...♖g6 Black goes for the bishop on f4. [15...f5 leaves Black with a cramped position and deprives him from the chance of exchanging some minor pieces with Ng6.]

There is no need to hurry for White, he can slowly improve his position with 16.c4! taking ground and restricting the mobility of the black pieces. Black is obliged to suffer in such positions despite his extra pawn.]

16.♗xg6+ hxg6 In many cases, this kind of doubled g-pawns are strengthening the king. The g-file is closed and there are much less potential sacrifices, unless we don't count Bxg6, but it looks also less dangerous. However, there is a very important factor which didn't exist before and that is that the h-file is opened and White has the possibility of driving two of his heavy pieces over there.

17.♕e5! Very well played! Vitiugov feels that keeping the initiative has a bigger importance than restoring the material balance! White is ready to transfer his rook to the h-file through e4 or e3. [After 17.♕xd6 17...cxd6 18.♖xd6 Black forces the trade of the queens with 18...♕a4 19.♖xd8 ♖fxd8= and equalizes.]

17...♗g8 It is understandable that Black wanted to leave

the h-file, but at the same time it allows Re4. [I was trying to improve Black's play with 17...♕c6 but White has a nice attacking position here as well: 18.h4! Exploding the kingside with the use of the h-pawn! 18...♗g8 19.h5 g5

20.h6! The attack is rolling. 20...♕xe5 (20...g6? loses right away to 21.h7+! ♖xh7 22.♖h3+ ♗g8 23.♖h8#; 20...gxh6 is also bad because of 21.♖h3! and Black cannot protect the h6 pawn. 21...♕xe5 22.♖xh6) 21.♖xe5 gxh6 22.f4! and the black king is terribly weak and vulnerable!]

18.♖e4 [18.h4!? was also possible, but I prefer the rook transfer to the h-file.]

18...♖c8 An ugly move, but it is not easy to defend such positions, especially in a rapid game. Black protects the c7 pawn in order to be able to neutralize the threats on the h-file with Be7 and at the same time he prepares to create counterplay with c5! In general this is the right approach against an attack on a side, Black should search for counterplay in the center. [18...♕xe5 19.dxe5 ♕c6 20.♖h4 is also very suspicious.]

19.♖h4 ♕e7 20.♖h3 Seemingly there is nothing on the h-file, because White cannot put another heavy piece there, however this assessment is completely wrong...

20...♙f6 Black parries the sacrifice on g6 by protecting the g7 pawn. [If Black starts his counterplay with 20...c5?

21.♙xg6! leads to a forced win: 21...fxg6 22.♖xg6 ♖f6 (On 22...♙f6 the strongest is the known motif of changing the rook with the queen on the h-file. White executes it by playing 23.♖h7! threatening with Rxg7 and after 23...♙xe5 24.♖h5!+- mate is coming next.) 23.♖h7+ ♗f7 24.dxc5! The best! Suddenly the rook on d1 joins the game and decides the outcome. 24...♖xc5 25.♖h5+ ♗g8 26.♖h8+ ♗f7 27.♖xd8 ♙xd8 White has different wins here, one of them is 28.♖d7+ ♗e8 29.♙xf6 ♗xd7 30.♖d3+ ♖d5 31.♖xd5+ exd5 32.♙xg7+-]

21.♖e1! Very subtle and strong! Vitiugov brings his second rook into the attack.

21...c5 Too late! [The only move was 21...♙c6 preventing Re4, but it also deprives Black from his counterplay with c5. White can increase the pressure with 22.♙xf6 ♖xf6 23.♖h4! with the idea of playing Qh3. The only move is 23...♖fd8 24.♖h3 ♗f8 25.♙c4! and the game goes on, but White has a very serious initiative. A mistake by Black could be fatal with such a weak king. A sacrifice on e6 is also hanging in the air. Black's position is very dangerous, for instance trading the strong bishop with 25...Bd5 loses, because after 26. Bxd5, Rh8 is coming next either with mate or it wins the c8 rook.]

22.♖e4! The rook arrives to h4 and decides the game.

22...g5 [22...cxd4 23.♙xf6 ♖xf6 24.♖eh4+-; Freeing the king's route toward the center with 22...♖e8 does not work anymore because of 23.♙xf6 ♖xf6 24.♖eh4 ♗f8 25.♖d6+!+- and the king does not reach the e7 square. Rh8 mates next.]

23.♖f3 Other moves were also winning. White creates the threat of Qh5 and prepares for a very nice finish after Bxe5...

23...♙xe5

24.♖h8+!! finishes the game in style! [24.♖h5 24...f5 remains unclear.]

24...♔xh8 25.♖h4+!! Another rook sacrifice to open the bishop's diagonal! [25.♖h5+?? is wrong because after 25...♔g8 26.♖h4 f5 suddenly Black wins!; Black resigned in view of 25.♖h4+ 25...♔g8 (25...gxh4 26.♖h5+ ♔g8 27.♖h7#) 26.♖h8+! The desperado rook! It forces the king to move to the wrong square. 26...♔xh8 27.♖h5+ ♔g8 28.♖h7#] **1-0**

David vs. Goliath

In this special weekly column we will be looking at the most unexpected results that occurred last week. Players usually face opponents of a similar level. Considerably less frequent are situations when a significantly lower-rated player succeeds in beating a much stronger adversary.

If you have ever won a game against someone rated 300 points or above yourself, please send it to peter@pogonina.com for publication. Any additional information (a photo, annotations, etc.) will be appreciated.

**(3) Salzgeber, Frank(2175)
- Rapport, Richard(2716) [A65]**

2014.12.26

Peter Zhdanov
Chief Editor
of Pogonina.com

The biggest upset of the week was definitely the loss of the young chess prodigy GM Richard Rapport (2716), who succumbed to Frank Salzberger (2175)!

1.d4 ♘f6 2.c4 d6 3.♘c3 g6 The Pirc Defence is a popular choice among rating favorites who wish to play for a win against a lower-rated opponent with Black. The opening is risky in the strategic sense though and often backfires.

4.e4 ♗g7 5.f3 O-O 6.♗g5 c5 7.d5 h6 8.♗e3 e6 9.♘ge2 exd5 10.cxd5 Black has a reasonably comfortable game here and can play either a6 or Nbd7 as in the game.

10...♖bd7 11.♗g3 h5 12.♙e2 h4 13.♗f1 ♗h7 14.♗d2 f5

15.exf5N Surprisingly, this natural move is a novelty. [15.g3 15...a6 16.a4 ♗d4! Braun (2537) - Thiede (2511), 2007, 1/2-1/2; 15.O-O 15...f4 16.♙f2 ♗e5 17.♙h1 (17.a4 17...♗g5 18.♙h1 ♗gf7→ and Black's attack prevailed in Lapicciarella (2212) - Chetalbashev (2613), 2010, 0-1) 17...a6 18.a4 ♗d7 19.a5 ♖c8 20.♗a4 ♙xa4 21.♙xa4 ♗f6? 22.♙xh4+— Black gave up a pawn for no apparent reason, but White didn't manage to convert it in yet another David vs. Goliath encounter: Djukic (2157) - Nikolov (2552), 2014, 1/2-1/2]

15...gxf5 16.O-O ♗e5 17.♙h1 ♙e7 18.♙f2 ♗g6 19.♖g1 ♗d7 20.a4 ♗f4 21.♙f1

♗h5? [21...♗d4! This move is extremely hard to make for a human since it trades the amazing g7 bishop for a

relatively modest colleague on f2 and creates a weak double pawn on d4. However, this bold exchange seems to be the only good option for Black. 22.♙xd4 cxd4 23.g3 (23.♗b5?! 23...♗h5→; 23.♗e2?? 23...♗d3 0-1) 23...hxg3 24.♖xg3+↗ with a complicated struggle ahead]

22.♙e1 ♙f7 23.♗c4?! [23.♙xh4 23...♖ae8 24.♙c1± Black's compensation for the pawn looks insufficient.]

23...♖ae8 [23...♖fe8 24.♙d1 ♙f6± Black is clearly worse here. The Black queenside is becoming a target.]

24.♙d2

♙xc3? The decisive mistake. [24...♙f6 and if 25.♗b5 (25.♗d3!?) 25...♙xb5 26.axb5 then 26...f4! was Black's last chance to try to confuse White and to spice up the game, for example, 27.♖xa7 ♗g3+ 28.♙xg3 hxg3 29.h3 ♙e7 and Black, although down a pawn, is still in the game.]

25.♙xc3+— ♗g3+ desperation

26.hxg3 hxg3 27.♙xg3 ♙h5+ 28.♙h2 ♖f6 If it was Black's move, the position would be a mate in 3. One tempo is worth the entire kingdom here!

29.g4 ♙h4 30.gxf5+ ♙f7 31.♗xd6+ Black resigned in view of the upcoming mate on g7! **1-0**

(14) Morozevich, Alexander(2712)
- Artemiev, Vladislav(2662)

Nutcracker rapid,
2014.12.24

GM Csaba Balogh
Best rating: 2672

47...♖xe2+! 48.♙xe2 g6! White is a pawn up, but he has a very bad pawn structure because it is fixed. He can only create a passed pawn by trading pawns, but reducing the material brings the draw closer for the defending side. The black pawns are fixed on the light squares, which mates the color of the white bishop, but the black king safely protects them. Black holds the draw rather comfortably...

49.g3 ♙b1 50.♖e1 White invades with his king on the queenside. Black cannot avoid it by transferring his own king to d6, because it is forced to guard the pawn on g6 against the potential Bd3 threat, aiming to exchange the bishops.

50...♙e4 51.♖d2 ♙f5 Black patiently waits.

52.♙f3 ♖e7 This move is unnecessary but possible, because White cannot trade the bishops with Bd3 now.

53.♖c3 ♙f6 The king returns to its ideal place and Black continues waiting with his bishop.

54.♖b4 ♙h3 55.♖c5 ♙f5 56.♖d6

56...♙h3! It is important to wait on the h3-g4-f5 squares to avoid the g4 break. [56...♙d3? allows 57.g4! hxg4 58.♙xg4+- and the e6 pawn is lost.]

57.e4 [The attempt to get 3 pawns for the bishop is rather dangerous: 57.♙xd5? 57...exd5 58.♖xd5 ♙g2+! 59.♖c5 (White gets into zugzwang after 59.e4? 59...♙f3+- and the e4 pawn falls.) 59...♖e6! The white pawns are excellently blockaded. 60.♖c4 otherwise Black goes Kd5. 60...♙d5+! It is important to transfer the bishop to f3 before invading with the king. (The direct 60...♖f5? runs into 61.d5 ♖e4

Everything seems to be under control as the bishop stops the

d-pawn from h3, but suddenly 62.g4!! ♖f3 (62...♗h3 63.f5!) 63.f5! keeping the h3-c8 diagonal closed! 63...♔e5! The only move, otherwise Black even loses.

64.d6! An only move also for White! The bishop was threatening to take on d5 with check. 64...♗xd6 65.gxh5 gxh5 66.♔d4= followed by e4-e5 and driving the king to f4-g5. The game ends in a draw!) 61.♔c5 ♖f3 62.♔c4 ♔f5! 63.d5 ♔e4! already works as g4 makes no sense for White. Black wins. 64.d6 ♗g4--]

57...dxe4 58.♗xe4 A pair of pawns has been traded, but White is still very far from creating a passed pawn.

58...♗g4 59.♗c6 Morozevich plays out all his cards! Black must be very careful.

59...♗d1! Artemiev realizes the danger and continues defending precisely! Black must change the diagonal of his bishop. [59...♗h3? Or 59...Bf5 was wrong in view of 60.♗d7! ♗f5 61.♗c8! An important waiting move and after both Bg4 and Bh3, d5 wins! 61...♗g4 62.d5! exd5 63.♗xg4 hxg4 64.♔xd5+-]

60.♗e4 [60.♗d7 60...♗b3!= Black holds!]

60...♗b3 In comparison to the positions when the d5 and e3 pawns were still on the board, Black had to be careful to not allow g4. However without the pawn on d5, the e6 pawn is safe!

61.♔d7 ♗a4+ 62.♔d8 ♗b5! Black prevents the king's march to h7!

63.♗c2 ♗c6 64.♔c7 ♗b5 65.♗b3 ♔e7 66.♗d1 ♗c4 Black has already showed the right defensive ideas against all the dangerous attempts. It is time to wait for White to make some progress.

67.♗f3 ♗d3 68.♔c6 ♗c2 69.♔c5 ♗d3 70.d5 Morozevich decides to trade one more pawn, but the material is getting reduced again. There was no good way anyway to make some progress.

70...exd5 71.♔d4 ♗b1 72.♔e5 ♔f7 73.♗xd5+ ♔g7 The problem remains the same for White! He is still lacking a passed pawn and the only way to create one is by trading even more pawns...

74. ♖e6 ♜c2 75. f5 gxf5 76. ♖xf5 ♜d1! Of course Black must keep the bishops until the end! White is still missing a passed pawn and after playing g4, Black just takes everything and the pawn endgame is a theoretical draw.

77. ♖e4 ♜h6! It is important to protect the h6 pawn in order to avoid the last trick of Kf4 followed by Bf3!

78. ♜f4 ♜a4 79. ♖f3 ♜e8 80. ♜e5 ♜d7 81. ♜f6 ♜c8 82. ♖e4 ♜d7 83. ♖f5 ♜b5 Draw agreed! Nice defense by Black! 1/2-1/2

GM Arkadij Naiditsch
Best rating: 2737

We are in a very interesting rook endgame. White's position feels like it should be winning, but on the other hand in case the black king manages to escape from the h-file, it could just be a draw. Let us take a look at how things will develop.

66. ♜f3! A good move! The white king will disturb the black king from coming back into the game now and White also has many mating ideas. [66. ♜b5? of course doesn't lead anywhere, since after 66... ♜g4! the black king is on the way back to e8, when the position is an easy theoretical draw.]

66... ♜h2?! A very strange move. Black is waiting for the e-pawn to start moving, which can't be good. [Black had an amazing way of making a draw: 66... ♜b4! This kind of move is very hard to find, because now the h-pawn is free to move. 67. ♜g1 is the best try for White. (67.h6 also leads to a draw. 67...b2 68. ♜h5+ (68.h7 is not better:

68...Rf8 69.Rb5 Rf7 70.Rxb2 Rf7+ 71.Kg4 Kg4 and again the black king is in time to go back.) 68...Rf8 69.Rb5 Rf7 70.Rxb2 and Black is in time to free his king. 70...Rf6+ 71.Kg4 Kg4 with a not too difficult draw.) 67...Kg4! The black king starts to run back. 68.h6 Now Black needs to find another only move: 68...Rb8! The black rook has to be in time to be placed on h8! 69.h7 Rf8 70.Kf4 threatening mate on h1. 70...Kg5 71.Kf5 and Black saves the game with 71...Kg6 72.Kf6 Rf8+ 73.Kg7 Rb8 with a clear draw.]

67.e4! White is not only preventing Black's idea of playing Rb4, but in many lines it could also be important for the e-pawn to be as advanced as possible.

67...Kg1 This move looks strange again, but there was already nothing better Black could do.

68.Rb5 Kg2 Black's position looks really lost now, but White still needs to be careful!

69.e5? What a miscalculation by White! [69.Kg3! was leading to an easy win. White just wants to play Kd4 next. 69...Kg3 70.Rxb3 Rf7 and now White needs to play the strong 71.Rb8! with the idea of Rg8+ to cut the black king by 2 squares from the pawn and in case of 71...Rg5 72.Kd4 followed by Rf8, e5 finishes the game.]

69...Rf7! Black doesn't miss his chance.

70.Kg4 Rf3 Of course the b3 pawn has to be protected.

71.e6 Kg2 The black king starts his march to the c2 square!

72.Kd4?! Another unlucky move, after which things are getting easy for Black. [The best try was 72.e7 72...Kg2 73.Kd5 Now the best Black can do is to get the white king to e8. 73...Rf3 74.Kd6 Rf3+ 75.Kg6 Rf3+ 76.Kd7 Rf3+ 77.Kg8 In this very complicated position White's idea is to play Re5+ in many lines, so Black should not cross the e-file with his king and needs to keep on waiting. 77...Rf3 78.Rb8 (Another interesting try for White is 78.Rf5 and Black needs to find

78...♔f1! 79.♔d7 b2 80.e8=♔ (80.♖b5 80...♖d3+ 81.♔e8 ♖d2) 80...b1=♔ and White has no checks, so the position is equal.) 78...♔e2 Now the black king has to start running to the b-pawn to be just in time! 79.♔d7 ♖d3+ 80.♔c6 ♖e3 81.♔d6 ♖d3+ 82.♔c5 ♖e3

83.e8=♔ White can't improve the position any more. 83...♖xe8 84.♖xe8+ ♔d2 85.♔c4 b2 86.♖b8 ♔c1 Wow, the black king reaches c1 just in time!]

72...♔f2 e7 never works any longer because of Re3.

73.♔c4 ♖e3 forcing the white king to defend the e-pawn.

74.♔d5 ♔e2 and the black king comfortably reaches the c2 square.

75.♔d6 ♔d2 76.e7 ♔c2 The king has reached its final destination and the position is a draw!

77.♖c5+ ♔d2 78.♖d5+ ♔c2 79.♖c5+ ♔d2 We just saw a very interesting endgame with many funny draw ideas and of course this was another great example of how easy it is to miss a winning continuation in a rook endgame! **1/2-1/2**

Clash of the Titans

(16) Tal, Mihail
- Brinck Claussen, Bjorn[D40]

Havana ol (Men) fin-A(4),
1966

GM Kamil Miton
Best rating: 2655

1.♘f3 ♘f6 2.c4 c5 3.♘c3 ♘c6 4.e3 e6 5.d4 d5 6.a3 cxd4
Black can also choose not to hurry with any concrete action in the center and simply play a waiting move like [6...a6]

7.exd4 ♙e7 8.♙d3 [8.c5 with the idea to take space on the queenside and improve the position by playing b4. 8...♘e4 Otherwise white will play Bd3. Black should play 0-0-f5-Bf6 next, with counterplay over the center.]

8...0-0 9.0-0 dxc4 10.♙xc4

10...b6 and we have a structure with ab isolated pawn, where White has a few different setups.

11.♙d3 [11.d5 This break in the center doesn't bring White any advantage here: 11...exd5 12.♘xd5 ♘xd5 13.♙xd5 ♙b7 with

Bf6 next and an equal position.]

11...♙b7 12.♖d1 ♜c8 [12...♘a5 13.♙a2 ♘d5 14.♘e4 White keeps more pieces for the attack and thanks to the bad knight on a5 he has a stable advantage.]

13.♙a2 ♜c7 14.♙g5 ♜fd8

15.♜e2 White had to lose some time to play this move.

15...♘d5!? Black is going to change the structure to avoid the d5 break. [15...♘h5? 16.d5+-; 15...♘g4 is a very interesting idea, based on the tactical trick that White cannot play 16.Bxe7 or 16.Bxe6 because of 16...Nxd4! 16.d5 (16.♘b5 16...♘xd4 (16...♜b8 17.♙xe6! works now because the d4 pawn is protected.) 17.♜xd4 ♙xf3 18.♘xc7 ♙xe2 19.♜xd8+ ♙xd8 20.♘xe6 ♙f6 21.♙xf6 ♘xf6 22.♘g5 ♙h5=) 16...♙xg5 17.h3 Not an easy move to see in one's calculation. 17...exd5 18.♘xd5 ♜b8 19.hxg4 ♜e8 20.♜f1 h6 with equal play.]

16.♘xd5 exd5 17.♜d3 ♜d6 18.♙xe7 ♘xe7 19.♜e1 White keeps a symbolic advantage thanks to the bad bishop on b7.

19...♘g6 20.g3 ♜e8 21.h4 Tal is slowly looking for some improvements.

21...♜f6 22.h5 ♘f8 23.♜xe8 ♜xe8 24.♘e5 The first step is done, now White has an active place for his knight.

24...♜g5?! Black wants to get rid of the knight by playing

f6, but this move will create weaknesses around the black king. More solid was for example 24...Re7 with the idea to play Nd7 or [24...♘e6!? threatening Nxd4. 25.♖e1]

25. ♖f3 f6

26. ♘c4! White creates pressure against the d5 pawn. [26.♙xd5+?! leads to equal play after the forced 26...♙xd5 27.♙xd5+ ♖e6 28.♙d8 ♙xh5 and Black is fine.]

26...♖d8 27.♖e1! is the most accurate move. [27.♘e3 27...♘e6↔]

27...♙c8 [27...dxc4 28.♙xb7 ♖xd4 29.♙xa7 ♙xh5 30.♙xb6 White has a huge advantage because of the weak black king and pawn on c4.]

28. ♘e3 ♙e6 29.♖c1↑ And the next step is done. White improved his pieces as much as he could and took control of the c-file.

29...♙f7 30.h6 The h-pawn has no meaning, it is more important to have active pieces and get the rook to the 7th rank. [30.♖c7 30...♘e6 31.♖xa7 ♘xd4 32.♙d1 ♘c6 33.♖b7 ♘e5 34.♖xb6 d4 with some chances for counterplay.]

30...♙xh6 31.♖c7 ♙g5 [31...♘e6 32.♖xa7 ♘xd4 33.♙g4 ♘c6 and in case of Rxf7 Black would answer Ne5!]

32. ♖xa7 ♘g6

33. ♘xd5! +— Not the only winning move, but a very nice one and typical for Tal's style.

33...♙xd5 34.♖a8 ♙xa2 35.♖xd8+ ♙f7 36.♙c6! An easy but yet very important move, not allowing the black king to escape to a safe place.

36...♘e7 37.♙e8+ ♙e6 38.♖c8 ♙d5 39.♖c3 ♙d7 40.♖e3+ ♙d6 41.♙b8+ ♙c6 42.a4 ♘d5 43.♖e1 ♙d6 44.♖c1+ ♙d7 45.♙c8+ 1-0

Editorial Preface

A lot of opens came to an end this week and here are some of them:

The 90th Hasting Congress was won by Zhao Jun, with a fantastic score of 8/9. In the 44th Rilton Cup, the 1st place was shared by Hammer and Hillarp Persson, both on 7/9, but Hammer had the better tiebreak.

In the ongoing Australian Open (which is not that strong, but a decent open anyway) Ni Hua is currently showing an amazing result of 7/7, but there are still 4 rounds to go.

In other news, we are starting another new column, "Chess and the City", by WGM Elisabeth Paehtz, the best German female player and current Nr. 26 in the World. You will find her own little introduction inside her first column.

On Saturday the world's best players will start to battle it out in Wijk aan Zee. The A tournament features Carlsen, Caruana, Aronian and many more Super GMS, while the B group, where Navara is the top seed, will also be very interesting to follow. In our next issue our focus will mainly be on this traditional super event!

For now we hope you will enjoy our current issue and of course we would be very happy to hear your opinion about the latest changes to the newsletter.

Best wishes,

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

**(1) Grandelius, Nils(2581)
- Turov, Maxim(2591) [A15]**

44th Rilton Cup 2014-15(4.1),
2014.12.30

GM Arkadij Naiditsch
Best rating: 2737

Nils Grandelius is not only famous for his spectacular haircuts, but also for his very attractive chess. He can beat almost any player, but sometimes things can also go horribly wrong for him. This time, the victim of the very aggressive Swedish GM was Maxim Turov. After a very strange opening, Black misses White's play which leads to a mating attack. Grandelius finishes the game in a great manner, not giving Black any chances for survival.

1. ♘f3 Grandelius plays quite a few openings with White.

1... ♘f6 2. c4 e6 3. g3 Usually White plays this move order to avoid some lines in the Catalan or maybe just to provoke Black into not playing d5.

3... a6 This move looks bad, but actually it is not a stupid one. Black wants to play b5 followed by Bb7, winning some space on the queenside.

4. b3 A very rare move and clearly a decision by White just to play a game of chess. [4. ♘c3 4... d5 would lead us to the main positions.]

4...c5 It is hard to say why Black didn't want to start with b5.

5. ♗g2 b5 6. ♘c3 A logical move. Attacking the b5 pawn and maybe provoking Black into playing b4- but is it really that bad for Black to play b4?!

6... ♖b6?! This is quite a careless move. Black should have paid much more attention to the fact that his pieces are still not developed and to White's possible play in the center. [In my opinion Black is doing fine after 6...b4 7. ♘a4 ♗b7 and White has quite a few plans here, but I think Black's simple setup with d6, Nbd7, Be7 and 0-0 would give him comfortable play.]

7.e4! An excellent move by White, using the fact that Black is badly prepared for central play. White's idea is simple, to play e5 next.

7...d6 A solid move, but Black's position is already very risky. [7...♙b7 would lead to a clearly better position for White: 8.e5 ♘g4 and for example after the simple 9.O-O the pawn on e5 can't be won and White's threat of playing h3 next is quite unpleasant.]

8.d4 Grandelius s exactly with the right approach and this is to use the moment and not give Black any rest!

8...♙a5 Another queen move in an already very risky position doesn't make things better. But it is already not an easy task to find the right moves. [8...♙b7 was probably the most solid move. 9.O-O Black can n ever take the pawn on e4, as it would immediately lead to a deadly attack in the center. 9...cxd4 10.♘xd4 b4 11.♘a4 ♙c7 Of course Black just lost a tempo by playing Qb6 and now Qc7, but still the fight just started. 12.a3! This strong move opens the a-file and gets rid of the strong pawn on b4. White is clearly better but the position is very fighting.]

9.♙d2! Another very good move by White. Nils correctly evaluates the complications after the b4 move, when the e4 pawn can just be taken.

9...b4 10.♘a4 The question is whether Black can take the e4 pawn or not. If not, all of Black's play just looks very bad.

10...cxd4 Turov doesn't take and this is the right decision. [10...♙xe4? leads to a direct loss of material after 11.♘g5! ♙xd2 12.♙xa8 and White is not only an exchange up, but the knight on d2 is also doing very badly... The game would not last for much longer here.]

11.♘xd4 ♙b7 Black finally managed to develop his bishop to b7, but already the position is looking very bad, especially since the queen is horribly placed on a5.

12.O-O! Of course White should not care about the e4 pawn, especially since it is not that difficult to calculate that the pawn can't be taken.

12...♘bd7 [12...♙xe4 loses on the spot: 13.♙e1 and White starts collecting the material.; White is almost winning after 12...♙xe4 13.♙xe4 ♘xe4 14.♙f3 and Black has no good way of defending the knight on e4.]

13.♙e1 White is pl aying a perfect game. Of course it was tempting to play 13.a3 and win the b4 pawn, but the move in the game is even stronger! White does not only want to play a3, but the threat of playing e5 at a good moment could also be deadly for Black.

13...♘c5 Black tries to complicate things, which is usually the best practical chance in a bad position.

14.♙xc5 Simple and strong! Maybe Turov had overlooked White's next move and was happy for a moment here... [14.a3 14...♙cxe4 15.axb4 ♙c7 16.♙e3 and White's position is of course much better, almost close to winning.]

14...dxc5 This move practically loses by force. [Not much better is 14...♖xc5 15.♘c2 is one of the possible continuations for White. 15...a5 16.a3 bxa3 17.♖xa3 and of course Black can never play 17...♙e7? because of 18.e5! ♙xg2 19.exf6 and White is winning a piece.]

15.♘xe6! Clearly White had prepared this move before playing 14.Nxc5. Black's position is falling apart.

15...fxe6 Black needs to take.

16.e5 The bishop on b7 is hanging, so Black's next move is also forced.

16...♙xg2 17.exf6 So what to do now? The bishop on g2 is hanging and the black king is totally open. Things are looking very dark here...

17...♙b7 Turov still hopes to survive White's attack. [Maybe the relatively best move here was 17...O-O-O 18.♖xg2 and now the calm 18...♖b6 to defend the e6 pawn, but of course White has a huge advantage after 19.f7!; 17...♙h3? 18.♖h5+! and the bishop is lost.]

18.♖xe6+ ♙f7 19.fxg7 Once again very practical play by White. Of course there were a lot of good moves here, but the move in the game is very safe! An excellent practical decision.

19...♙xg7 Black has no choice...

20.♖g4 Who cares about the rook on a1 when the black king is on f7!

20...♖d8 Turov is suffering but fighting. [After 20...♙xa1 21.♖f5+ ♙g8 White has a beautiful winning move: 22.♖e7! This calm but deadly move ends the game. White wants to play Qf7 mate or Qe6, the game is over!]

21.♖ae1! Another very nice move by White. There is no reason to hurry with the mate, so White brings an extra piece into the game...

21...♙f8 There is no more hope for Black. All moves are losing.

22.♙g5 White ends the game with a nice little combination:

22...♖d4 23.♖e7+ ♙xe7

24.♖e6+ Of course in case of 24.... Kf8 25.Bh6! ends

the suffering after 25...Ke8 26.Qxe7#! We just saw a clean start-finish win by Grandelius, who played logical and strong moves, supported by good calculation. This is really what we can call a perfect win! **1-0**

**(2) Galyas, Miklos(2428)
- Rodshtein, Maxim(2676) [A09]**

90th Hastings Masters 2014-15(4.2),
2015.01.01

GM Csaba Balogh
Best rating: 2672

My good friend and countryman IM Miklos Galyas wins a nice attacking game against his top GM opponent.

1.♘f3 d5 2.c4 The game starts calmly, but it is getting very wild soon.

2...d4 3.b4 White prepares to attack the advanced pawn with Bb2 and prevents c5.

3...f6 The main theoretical move. Black would like to strengthen his center with e5.

4.e3 White undermines the d4 pawn and would like to take control over the center after recapturing with the f-pawn on e3, followed by d4.

4...e5 5.c5 [5.exd4? is a known theoretical mistake. 5...e4 6.♙e2 ♙e7 7.♘g1 ♘c6 and Black is better.]

5...♙e7 A dubious novelty.... I think that Rodshtein mixed up something. [The right and the critical move is 5...a5! with very

sharp lines, Arkadij has recently commented the Panjwani-So game in a previous issue.]

6.♘b5+ This is a known move in the critical 5...a5 variation. White provokes the c6 move before occupying the ideal c4 square with the bishop. The idea is to avoid Nc6 and in some lines the d6 square might get vulnerable when a knight arrives to c4. [However in this particular position, I believe it was better to start with 6.♘c4 The point is that after 6...♘e6 7.♘xe6 ♖xe6 8.O-O White is already threatening to take on d4. 8...dxe3 9.fxe3 and d4 is coming next and after e4 White has the very unpleasant intermediate move d5. After provoking c6, this does not work.]

6...c6 7.♘c4 ♘e6 8.♖b3 [Probably it was better to play 8.♘xe6 8...♖xe6 9.O-O dxe3 10.fxe3 followed by Nc3 and d4 at some point. Black still has some problems with finishing the development of the kingside pieces to finally ensure the safety of his king with 0-0. 10...a5 is strongly met by

11.♖b3!+= either wins a huge tempo or trades the queens, which favorably opens the a-file for White.]

8...♘xc4 9.♖xc4 dxe3 [Black could have solved his problems with 9...♖f7! White cannot really avoid the trade of the queens and the point is that after 10.♖xf7+ (10.♖c2 10...dxe3 11.fxe3 ♖g6) 10...♗xf7 11.exd4 exd4 12.♗xd4 Black wins back

the sacrificed pawn with 12...a5! White cannot consolidate his queenside pawns and the c5 is going to fall.]

10.fxe3 a5?! A standard undermining of the c5 pawn, using the fact that White cannot play a3. However, Black is far behind in development and his king is stuck in the center. Losing two important tempi with a5 and axb4 requires punishment... [10...♖f7 was not the same anymore. 11.♖xf7+ ♗xf7 12.O-O threatening Nxe5. 12...♗e8 13.d4+= and Nc3 next. We can see that in comparison to the 9...Qf7 line, having the inclusion of the dxe3 fxe3 pair of moves strongly improves White's position, because he is able to take control over the center.]

11.O-O! axb4 12.d4! Very well played! White does not pay attention to the queenside, he rather focuses on opening the position somehow.

12...♗a6 [12...e4 trying to close the center does not solve the problems 13.♗fd2 ♗h6 14.♖xb4 White creates the serious threat of Nxe4 because Qxe4 loses to Qxb7. 14...f5 15.♗c4 and Black is in trouble. Now we can see the fruits of provoking c6: the d6 and b6 squares are weak.]

13.a3! A great decision again! White opens the position even more and by eliminating the b4 square he prepares to develop his knight to its ideal square on c3! [13.dxe5 was premature

because of 13...♔xc5]

13...bxa3 14.♖xa3 [14.♙xa3 was also promising with the idea to protect the c5 pawn and threatening to take on e5. 14...e4 15.♘fd2 and Nc3 or Rf4 next looks terrible for Black.]

14...g6 Black finally tries to finish the development, but obviously it is too slow. [14...♘h6 is not better either. 15.♘c3 ♘f7 16.♘e4 and Black cannot really make a move.]

15.♘c3 e4 Black tries to lock the center, but the position screams for a refutation.

16.♘d2 f5 Black actually needs only one move, Nf6, to be consolidating the center and to be fine, but White does not spoil the moment and punishes his opponent for his lack of development.

17.♘dx4! fxe4 18.♘xe4 Nd6 is the threat, which is not easy to deal with...

18...♔d7 [18...♔xe4 loses to 19.♔f7+ ♔d8 20.♔xf8+ 20. Qxb7 also wins on the spot. 20...♔e8 21.♔d6+- and Rf8 next.]

19.♘d6+! Well played yet again! At first sight this is a strange decision because it trades the active knight for the bishop, which has not moved yet, but Galyas correctly foresees that the advancing of the e-pawn will decide the fight.

19...♙xd6 20.cxd6 ♘h6 Black is only two moves away from

solving the problems with Nf7 and 0-0.

21.e4! A very effective way of leading the attack! e5-e6 is coming next. The black king is still in the center. The h6 knight is hanging and the a3 rook is ready to join the game along the 3rd rank.

21...♔xd6 [21...♘f7 also loses after 22.e5 O-O 23.♙h6+- Raf3 and e6 are coming.]

22.♙xh6! The last accurate decision! White calculates perfectly and sacrifices his a3 rook. Black has nothing better than accepting it and hoping not to get mated.

22...♔xa3 23.♔f7+ ♔d8 24.♔xb7! The best again! White prevents the hiding of the king after Kc8.

24...♘c7 [24...♖b8 25.♙g5+ ♔e8 26.♔f7#]

25.♙g5+ ♔d7 26.♔f7+ ♔e6 27.♔xc7! +- It is clear that Black cannot avoid getting mated, the only question is if he could create some counterplay. However the well placed bishop on g5 prevents the Qe3 check after which Ra1 could follow.

27...♔a1+ 28.♔f1! ♔xd4+ 29.♔h1 [Black resigned in view of 29.♔h1 Qe7 is threatening with mate and for instance after 29...♖he8 30.♔xc6+ ♔d6 31.♔f6+- wins.] **1-0**

The K-Files. Accelerated Queen's Indian, 3.f3

GM Alexander Khalifman
FIDE World Chess Champion (1999)
Best rating: 2702

No Name Opening

It's rather confusing but the line 1.d4 Nf6 2.c4 b6 really has no name.

It looks like simply nobody has taken it seriously until now... In 2007 Artur Kogan wrote an interesting (quite good, but sometimes more emotional than analytical) article in NIC-SOS where he called it "The Queen's Gruenfeld". Well it makes some sense but in fact there are many lines where the black bishop doesn't even have a chance to be developed to g7. In some others a fianchetto is possible, but definitely not the best. So...Gruenfeld?! Hmm...

Alexei Kornev in his "1.d4 2.c4 Repertoire" called it "Accelerated Queen's Indian". This might be more logical but it is still far from an acknowledged name.

The story began in 1912, when Czech grandmaster Duras played 2...b6 against Teichmann. In 1921 Alekhine played this line no less than 4 times (later he used it successfully in his World Championship match against Bogoljubow).

This was when the NoName opening reached its first peak of popularity (1921 - 1930). The efforts of Reti and Gruenfeld, who used it quite regularly, must of course also be mentioned.

However, as it still happens quite often nowadays, the fashion then changed. The general assessment used to be that after 3.Nc3 Bb7 4.Qc2 White has a comfortable advantage. And then the reputation of this "minor line" stayed stable for more than 70 years. The fact that the NoName opening was used by Fischer, Bronstein and Larsen didn't change anything.

A new era only began in the 21st century. OK, when Vallejo Pons played it twice in 2008 almost nobody paid attention. Everybody knows that Paco likes experiments - so what?! However, in 2011 GMs Vallejo, Ivan Sokolov, Kiril Georgiev, Edouard and some others started playing it on a regular basis with fantastic results. And it was a clear sign that something happened. As a matter of fact, there was no opening bomb in critical lines but some lines were not as forced as it seemed before, some old evaluations were too categorical and so on and so on. The whole situation is fairly standard for well-forgotten lines.

The opening then got some attention from some 2700+ players (Vachier-Lagrave, Harikrishna, Ding Liren) and, finally, in December 2014, it was used by Shakhriyar Mamedyarov as his main weapon against 1.d4 in the Mind Sports blitz tournament. OK, it was only blitz but it was Mamedyarov! He is currently one of the brightest role models for young players all over the world (not only in Azerbaijan) due to his unconventional and aggressive style. So I can easily take the risk to predict that the popularity of the NoName opening will only grow in the nearest future. And then it will maybe finally get a name.

But enough history, it is time to say a couple of words about the plans and ideas. Of course it's rather banal, but Black's main point is to stop e2-e4. If White doesn't pay attention to this fact and just develops his pieces randomly, then quite often Black just doesn't touch his e-pawn and goes for a double fianchetto. If White tries to organize e2-e4 then Black's typical response is d7-d5, with the idea to undermine White's center in Gruenfeld style. In fact, this opening is a real chameleon: the positions after the early phase may be similar to the Queen's Indian (of course!), the Gruenfeld, the Nimzo, the King's Indian, the Benko gambit, the Benoni and even the Queen's gambit (TMB system). So there is at least one definite plus: if you analyze it seriously, your strategic outlook will be widened massively.

And finally here is the necessary disclaimer: I'm not claiming that Black at least equalizes comfortably in all lines! I'm no adman, just a chess player and one that is quite bored of reading various junk, such as "1.e4 h6! - Black is winning!!!". So there are lines where Black faces certain problems and I will only try to describe the situation objectively. My conclusion is that this is fairly new and original branch of the opening theory is quite playable for Black. But you'd better judge for yourself, dear reader.

So, after so many words... Back to the chessboard!

Part 1 Refuting here and now 3.f3, etc.

Part 2 Solid and classical 3.Nf3

Part 3 Good old central setup 3.Nc3

(3) 1.d4 Nf6 2.c4 b6 3... [A50]

1.d4 ♘f6 2.c4 b6

3.f3 The only 3rd move (except for the natural 3. Nf3 and 3. Nc3 of course) which must be taken seriously. In fact, Avrukh recommends it in his excellent book as the strongest move. I'm not so sure about it, but the practical strength of this move is absolutely undoubtable. If Black doesn't know how to react properly, he might be in deep trouble very soon. The idea is very simple and natural: to build a strong pawn center. [3.♗g5 definitely doesn't look like an improved version of the Trompovsky. 3...♗b7 4.♗xf6 gxf6 and Black is doing fine as his dark squared bishop will soon be very strong.; 3.d5 If White intends to gain space this way, then he'd better wait for Bb7. 3...e6 4.a3 (4.♘c3 4...♗b4; 4.f3 4...♗c5 5.e4 exd5 6.cxd5 O-O) 4...♗a6 (Of course Black can switch to the 3.Nc3 Bb7 4.d5 line by playing 4...♗b7 5.♘c3 ♗d6 but it's not necessary.) 5.e3 exd5 6.cxd5 ♗xf1 7.♔xf1 g6 8.♘c3 ♗g7 9.g3 O-O 10.♔g2 Vaulin - Ibragimov Maikop 1998 and now 10...c5!? would have led to a comfortable version of the Benoni.]

3...♘c6! In a certain sense this is the only move. The alternatives differ from "very dubious" to "simply bad". [3...c5 4.d5 d6 5.e4 e5 6.♘c3; 3...e5 4.dxe5 ♘h5 5.♘h3; 3...e6 4.e4 d5 5.e5; 3...d5 4.cxd5 ♘xd5 5.e4]

4.♘c3 A necessary preparation move. White is not ready for a pawn advance yet. [After 4.d5 4...♗e5 5.e4 e6 the pawn center is rather shaky. 6.♘c3 ♕b4 7.♙e3 O-O 8.♖c1 c6 9.d6 ♗e8↑Dubov - Vallejo Khanty Mansiysk rapid 2013; 4.e4 4...e5 5.d5 ♗d4 6.♗e2 ♕c5 doesn't look attractive either.]

4...e5 5.d5 ♗e7 [5...♗a5 is recommended by strong engines. However, from a human point of view it looks absolutely mysterious. 6.e4 ♕b4 (6...♗b7 7.a3) 7.♙d2 O-O 8.a3 (8.♙d3 8...♙a6 9.b3 c6 10.♗ge2+=) 8...♙e7 9.♙d3+= Ivanishevic - Jurcik Yerevan 2014 It is still unclear what the black knight is doing on a5.]

6.e4 ♗g6 This is the critical position of the whole line with 3.f3. White has a strong center and a space advantage. Black is slightly better developed and has different possibilities to undermine White's center. Boris Avrukh evaluates this position as slightly better for White, but I believe that it is quite double-edged.

7.♙e3 Just for fun, we can note that this position has already occurred in practice via this different move order: 1.e4 Nc6 2.d4 e5 3. d5 Nce7 4.e4 Ng6 5.Be3 Nf6 6.f3 b6 7.Nc3. [It might be the right moment to look for an improvement. In general White, who has a space advantage, should better avoid exchanging pieces. However, the consequences of

7.♗ge2!? (which was never tested before) 7...♙c5 8.a3 (8.h4!?) 8...a5 (8...O-O 9.b4 ♙e7 10.♙e3 ♗h5 11.g3 a5 12.♖b1 d6) 9.♖b1 O-O 10.b4 axb4 11.axb4 ♙e7 12.♙e3 ♗e8 13.c5 (13.♖d2 13...♗d6) 13...bxc5 14.bxc5 d6 15.c6 f5 are far from clear.]

7...♙c5 8.♖d2 [8.♙xc5 8...bxc5 9.d6 O-O Manolache - Zajarnyi Techirghiol 2000 doesn't look too promising for White, especially when one understands that Black will find the route from g6 to d4, and he will do so quite soon.]

8...d6 9.O-O-O [9.♗ge2 is recommended by Avrukh (the idea is not to define the king's position too early). However, after 9...O-O 10.♗c1 ♗h5 Black has serious counterplay.]

9...a6!? 10.♗ge2 [10.h4 10...h6]

10...♙xe3 11.♖xe3 ♙d7 Black has adequate counterplay. (Sammalvuo - I.Sokolov Porto Carras 2011)

David vs. Goliath

Peter Zhdanov

Chief Editor of Pogonina.com

Let me start this column by making a disclaimer. Last week a technical mistake has occurred during the makeup. As a result, the overview of the upsets, the statistics and the pgn file with the games have been disposed of, thus making my brief annotations the main dish instead of a bonus to the traditional format. While this is not my fault, I still feel like I should apologize to you for what has happened.

Last week has produced relatively few upsets - 18. The highest profile one was FM Shetty (2307) - GM Gareev (2621), 1-0. GM Leonid Milov had a tough time at Zurich (by the way, GM Arkadij Naiditsch won the tournament), which has resulted in two sensational defeats: Lochte (2079) - GM Milov (2484), 1-0 and GM Milov (2484) - Agushi (2143), 0-1. The longest game took a David 64 (chess number!) moves to beat a Goliath: Chiu (2052) - FM Jackson (2356), 1-0. No miniatures this time. The shortest game was De Oliveira (1751) - Miyoshi (2082), 1-0, 26 moves.

A special "hardcore" nomination goes to Chew Lee (1931) - Zelesco (2256), 1-0. The encounter ended with Black getting checkmated - a rare occurrence in modern practice!

Top-10:

Farias (1574) - Moyses Fo. (2115), 1-0, [441](#) points
 Lochte (2079) - Milov (2492), 1-0, [413](#) points
 Rakesh (2123) - Rombaldoni (2505), 1-0, [382](#) points
 Lodici (2312) - Amaro (1936), 0-1, [376](#) points
 Vinoth Kumar (2119) - Deepan (2489), 1-0, [370](#) points
 Ashcar (1676) - Chaves (2040), 1-0, [364](#) points
 Le Roy (2290) - Jackson (1927), 0-1, [363](#) points
 Milov (2492) - Agushi (2143), 0-1, [349](#) points
 De Oliveira (1751) - Miyoshi (2082), 1-0, [331](#) points
 Schwabeneder (2377) - Suta (2049), 0-1, [328](#) points

Average gap: 372; White won 6 games, Black won 4 games.

You can view all the games in the accompanying pgn file.

If you have ever won a game against someone rated 300 points or above yourself, please send it to peter@pogonina.com for publication. Any additional information (a photo, annotations, etc.) will be appreciated.

27. ♔xe8+ ♕xe8 A very interesting endgame has been reached. White's overwhelming advantage is undisputable because of the bishop pair and the protected passed pawn on d5! The weakness on a6 is another important factor as it pins the b8 knight to its protection. However, despite the many plusses the win is still far from obvious, because the position is closed and Black might hope for a successful blockade.

28. h4 White has all the time to make these small improvements. Later he might open the position a bit with h5 or rather after playing f5, he could create a passed h-pawn. White could also have activated his king, the only thing he had to take care about is to keep on attacking the a6 pawn in order to avoid Black playing b5, followed by c4 and Nd7.

28... ♖e7 29. ♖f3 In the endgames, the kings belong to the center.

29... ♘d6 30. ♖e4

30... a5? A committing decision. Black would like to use his b8 knight, but he destroys his pawn structure. He fixes all his pawns on dark squares and deprives himself from the potential counterplay of playing b5. [Black should have continued with the waiting policy, starting to play Kf8-e7 and see how White intends to make progress. 30... ♖f8 By feeling, White should be winning, but I did not manage to figure out the method. Another winning attempt is 31.f5 opening the position for the two bishops. (The point of this move is to transfer the bishop to the h3-c8 diagonal. On the direct Bg4, Black could play b5. 31. ♘f1 31... ♖e7 32. c4 ♘d7 By playing Bf1, White has left from the motif of Bg4 f5 gxf6 Nxf6. 33. ♘c3 f5+! Black tries to close the position. (33...f6 34. ♘h3; On 33... ♖f8 34. ♘h3! ♘b8 35. ♘e5!+- White manages to make progress and the d-pawn decides the game.) 34. ♖f3 (34. gxf6+ 34... ♘xf6+ is not clear either.) 34... ♖f7 35. ♘d3 a5 36. h5

Everything seems to go well for White, but after 36...♙c7 followed by waiting with Bd6-c7, I don't see how White could make progress. It is important to keep the knight on d7 to avoid Be5.; 31.c4 frees the b8 knight. 31...♘d7 32.♙c3 f5+! Otherwise Be5 could be unpleasant. 33.gxf6 (33.♙e3 33...a5 34.h5 ♙f7 is the same as the 31.Bf1 line.) 33...♘xf6+ with Kf7 next and Black might hope for survival.) 31...gxf5+ 32.♙xf5 g6+! It is important to include this move, otherwise White creates another passed pawn with h5-h6. 33.♙e4 ♙e7 And again it is not obvious how White could make progress. A very natural try is 34.♙f4 trying to invade with the king through e5. 34...♙xf4 35.♙xf4 ♙d6 36.h5! This is the point! White opens a new front to attack the f7 pawn.

However after 36...♘d7!! It is very important to keep the structure (the pawn on g6) to avoid the penetration of the

white king on f5 or e5. (Black loses after 36...gxh5 37.♙xh5 ♙e7 (37...♙xd5 38.♙xf7+ ♙d6 39.g6 ♙e7 40.♙g5+- The g-pawn promotes soon.) 38.c4 ♘d7 39.♙f5 ♘f8 40.d6+!+- and again White breaks through.) 37.h6 ♘f8 And Black starts to wait with Nh7-f8 and again I don't see how White could make progress. 38.c4 (38.♙xa6 38...♙xd5) 38...a5 Seems like a fortress.]

31.♙b5! White immediately occupies the weakened square.

31...♘d7

32.♙xd7! A perfect decision! The bishop endgame is easily winning after White manages to occupy the a1-h8 diagonal, because he attacks the g7 pawn and at the same time is threatening with Be5.

32...♙xd7 33.c4 ♙e7 [The alternative defense was 33...♙f8 protecting the g7 pawn with the bishop and controlling the c7 square (against Bc3-e5-c7) with the king, but it also fails... 34.♙c3 ♙d6 35.♙e5+ ♙d7 36.♙f3 ♙d8

39. ♖d2+ ♔g4 Black tries to avoid Kf5, but now the h-pawn becomes too strong. [39... ♖xh5 does not change anything. 40. ♖f5 ♜e5 White has many ways to win. A nice one is 41. ♜c1 setting Black into zugzwang. The bishop cannot move and after 41... ♔h4 42. ♜g5+ fxg5 43. ♖xe5 g4 44. d6+- White promotes the pawn with check.]

40. h6 f5+ 41. ♖d3 ♜e5 42. h7 f4 43. ♜c3 Black resigned. **1-0**

37.f5! The decisive break. White either creates a passed pawn or he opens a way for his king to penetrate. 37... ♖d7 (37... gxf5 38.h5+- followed by Kf4-f5 and Black cannot play g6 because of h6.) 38.fxg6 fxg6 39. ♖g4 ♖d8 40.h5+-]

34. ♜c3 f5+ [34... ♖f8 simply loses to 35. ♜e5! ♜xe5 36. ♖xe5 ♖e7 37.d6+ ♖d7 38. ♖d5+-]

35. gxf6+ gxf6

36.f5! The last important move, otherwise Black locks the position with f5. Now the distant passed pawn on the h-file decides the game.

36... ♖f7 37.fxg6+ ♖xg6 38.h5+! ♖g5 [After 38... ♖xh5 39. ♖f5+- we can see the superiority of White's pawn structure. Black has no chance to create a passer and his pawns start to fall one after another.]

GM Arkadij Naiditsch
Best rating: 2737

We are in a very interesting rook endgame, but already on move 57. Both players are a bit tired and probably don't have too much time, which makes the game even more exciting. At first sight the position looks like a draw. The white king is blocking the d2 pawn, the h-pawn can be stopped by the white rook and of course the b2 pawn gives White some counter chances if the black king would start his walk to support the h-pawn. But things are much more tricky than that and soon we will see why...

57...h5 Black needs to push the h pawn-this is clear

58.♔c2! A good move. It is very important for White not to give Black the chance to play Kb3-Ka2. Not now, but later when the pawn will be on h3.

58...♚b5 The black king starts to walk towards the h-pawn.

59.♖c7 White doesn't have anything better than to keep on

waiting anyway, so why not cut the black king off at least for a while.

59...h4 60.♖c8 ♔b6 A slightly strange move. Why not play h3 immediately? But it doesn't really change anything.

61.♖c4 h3 Now Black already wants to play Rf2 followed by h2 with a win, so the white rook needs to take position on the h-file.

62.♖h4 The only move. [62.♖c3 is losing on the spot. 62...♖h1! Black is showing a very typical idea for many rook endgames. 63.♔xd2 h2 64.♖h3 ♖b1! If White was in time to play Kc2 the position would of course be a total draw. 65.♖xh2 ♖xb2+ 66.♔c3 ♖xh2]

62...♚c5 The black king starts walking to g5.

63.♔d1 White still doesn't have anything better than to keep on waiting. [A very wrong idea is to touch the b2 pawn, which would lead to an immediate end of the game: 63.b4+? 63...♔b5 64.♔d1 and now Black wins exactly with the same idea as we saw before: 64...♖h1+! 65.♔xd2 h2 66.♔c2 Once again if White had enough time to reach the b2 square the position would be a draw, but it is Black to move... 66...♖a1! Now that the b2 pawn is gone, Black has a check on the a2 square. 67.♖xh2 ♖a2+ 68.♔b3 ♖xh2 and Black is winning.]

63...♔d5 64.♔c2

64...♔e5 65.♖h8 White could have waited for the black king to reach the g5 square, but the rook would have to leave the 4th rank anyway, which would allow the black king to reach the position in the game. [After a waiting move like 65.♔d1 65...♔f5 66.♔c2 (White doesn't save the game with the king on d1 either, because now Black is using the other winning idea: 66.♖h8 66...♔f4 67.♖f8+ ♔e3 68.♖e8+ and here comes the difference:

68...♔d3! 69.♖d8+ ♔c4 The black king is going to b3. 70.♖h8 The white rook must go back to h8 and Black is using this for the standard winning idea: 70...♔b3 71.♖h6 ♖h1+ 72.♔xd2 h2 and White can't stop Black from playing Rb1 next. Black is winning.) 66...♔g5 and the white rook would have to go back

to h7 or h8, because in case of 67.♖a4? ♖f2 the game would be over immediately.]

65...♔e4 66.♖e8+ White doesn't have anything better.

66...♔f3 67.♖f8+ ♔e2 68.♖e8+ ♔f1 So there are no more checks and Black wants to play Rf2.

69.♖e3! White uses his only practical chance. [69.♖h8 loses to 69...♔e1 70.♖e8+ ♖e2 followed by d1Q.]

69...♔g2? Black is missing a win, even if it was not that simple to find! [The right move was 69...d1=♖+! 70.♔xd1 and now the very strong

70...♖h1! It is amazing, but White can't save the game here. 71.♔d2 (71.♔c2 71...h2 72.♖h3 ♔g2 and Rf1 next.) 71...♔g2 Black wants to play h2 next. 72.♖e2+ White doesn't have

anything better. 72...♔f3 73.♖e3+ ♔f4! White has no defense against Black's idea of playing h2 followed by Rb1. 74.♖e8 h2 75.♖h8 ♖b1 76.♖xh2 ♖xb2+ 77.♔c3 ♖xh2 and the game is over.]

70.♔xd2? and White returns the favor... [

70.♖d3!! 70...d1=♖+ What else to try? 71.♖xd1 ♖h1 (White easily holds the draw after 71...♔f3+ 72.♔c3 ♖e2 73.b4! The b2 pawn is finally useful. 73...h2 74.♔c4 ♔g2 75.b5 h1=♖ 76.♖xh1 ♔xh1 77.b6 ♖b2 78.♔c5 ♔g2 79.♔c6 ♔f3 80.b7 ♔e4 81.♔c7 with a draw.) 72.♖d2+! Now that the white king is placed on c2, Black doesn't have the usual h2-Rb1 idea. 72...♔g3 73.♖d3+ ♔f4 74.♖d4+ ♔e3 75.♖h4 and the position is a draw.]

70...♖h1 Now we are back to what we already know...

71.♖e8 h2 Black is simply winning. **72.♖h8 ♖b1**

73.♔c3 White tries to get the b-pawn going, but of course it is too late...

73...h1=♖ 74.♖xh1 ♖xh1 In case of 75.b4 Black can win with 75...Rh4! and after 76.b5 Kf3 77.b6 Rh6! So, finally it was a winning endgame for Black, but both players managed to exchange presents. Again we can see how hard it is to play rook endgames well! **0-1**

Chess and the City

WGM Elisabeth Paetz

"Strong minds discuss ideas, average minds discuss events, weak minds discuss people."

Yes Socrates was a very wise man indeed...

But we do not want to waste our time with useless explanations, people always hear what they want to hear! And this gossip corner will not be abused to spread negative and personal things about people, but to provide you with funny and interesting stories about our life in and outside the chess world.

As we have New Year, and some of you may not have sobered totally down by now, let me start with something less conventional and I truly hope I may be forgiven...

"I'm selfish, impatient and a little insecure. I make mistakes, I am out of control and at times hard to handle. But if you can't handle me at my worst, then you sure as hell don't deserve me at my best." (Marilyn Monroe)

Wish you all an UNFORGETTABLE 2015! :)

Mirror, mirror on the wall, who is the "most talented" of them all?

It is well known that chess players often display a broad range of talents especially in fields such as arts and science. However, deciding whose talent is more worthy or impressive is subjective. Examples of multi-talented well-known chess players could be easily drawn from history (to name a few: Philidor, Lasker, Botvinnik and Smyslov), but taking into account living players we can for example cite some accomplished musicians or opera singers such as Emil Sutovsky (bass-baritone), Lajos Portisch (bass-baritone) and Mark Taimanov (concert pianist). These are those I have heard singing myself, but I am sure that the list could go on.

As for other fields, one of the prominent economists of our time happens to be a chess Grandmaster as well, his name being Kenneth Rogoff. He is not an active player nowadays, not surprisingly given that being a Professor at Harvard must not leave too much spare time...

I could also write about scientific talents or other similar skills, but the reader might point out that all these skills are not very useful in everyday life, just like chess.

But what talent could be actually useful in daily life? This reminds me about my flight from Oslo to Tromsø for the 2014 Chess Olympiad. In this flight I not only had the pleasure of being seated next to the charming Woman World Champion Hou Yifan, but also to get lectured on how to greet your chess colleagues in about 10 different languages by the as charming Grandmaster David Navara. Just when I thought to award him the non-official prize of most "everyday life" talented chess grandmasters I happened to come across the following picture...

"Never have I thought that I was the happy possessor of a talent; my sole concern has been to save myself by work and faith." (Jean-Paul Sartre)

Satre's concern was to save himself, but brave "window cleaners" can save women the efforts connected to such dangerous and dull work.

Thus, my female readers will not be surprised that the award of multi-talented player of the year 2015 will go to GM Alexander Ipatov from Lvov. To challenge him for 2016 I encourage all male GMs (and btw. all men in general) to improve their ironing and pamper changing skills :)

1.e4 e6 2.d4 d5 3.♘c3 ♘b4 4.e5 ♘e7 5.a3 ♘xc3+ 6.bxc3 c5

7.a4!? In general this move is very useful but in this concrete position White usually plays other moves: [7.♖g4 7...O-O (7...♖c7 leads to very complex play after 8.♖xg7 ♖g8 9.♖xh7 cxd4 10.♘e2 ♘bc6 11.f4 ♘d7 12.♖d3 dxc3 and Black is looking for a strong initiative on the queenside.) 8.♘d3 f5 (8...♘bc6 9.♖h5 ♘g6 10.♘f3) 9.exf6 ♖xf6 10.♘g5 ♖f7 11.♖h5 g6 12.♖d1 ♘bc6 13.♘f3 and is not easy for White to prove an advantage because of the weak dark squares.; 7.♘f3 7...♖c7 8.h4 This is the alternative plan. White is going to create

some weaknesses on the kingside. 8...b6!? with the idea to exchange bishops. 9.h5 h6 The only move! 10.♘b5+! A strong move which was probably discovered by Fischer. White simply prevents Ba6. 10...♘d7 11.♘d3 ♘a4 An important square for the black bishop. In many lines Black also plays Qa5-Qa4 just to prevent the activation of the white bishop after a4-Ba3. 12.♙f1!?

7...♘bc6 8.♘f3 ♖a5 9.♖d2 White wants to keep the opportunity to develop the bishop to a3 but in my opinion the whole setup looks very artificial. [9.♘d2 9...♘d7∞]

9...♘d7 10.♘d3

10...c4?! I don't like this move. In my opinion Black could equalize after [10...cxd4 11.cxd4 ♖xd2+ 12.♘xd2 (12.♙xd2 12...♘a5 Without the queens on the board the a3-f8 diagonal has no big meaning and Black has good counterplay over the c-file.) 12...♘f5 13.♘xf5 exf5 and only Black can be better here!]

11.♘e2 O-O-O 12.♘a3 f6 13.O-O ♘f5 14.♖fe1 ♘e8 Black is going to activate his pieces. It was also possible to play [14...h5!? 15.♘f1 h4∞]

15.g4! White's only plan is to regroup his pieces and to create pressure on the kingside.

15...♞fe7 16.♟f1 ♟d7 [16...h5 17.exf6 gxf6 18.g5∞(18.♟xe7 18...♞xe7 19.♞xe6 hxg4 20.♞xe7 gxf3 21.♞f4 ♟d7∞) ; 16...f5? 17.♞g5±]

17.♟h3 It is clear what Fischer wants. He could immediately try [17.exf6 17...gxf6 18.g5 ♞hg8 19.♞h1 fxg5 20.♞xg5 ♞f5! In a dynamic position it is important to play very actively. 21.♞xe6 ♟xe6 22.♞xe6 ♞cxd4 23.♟h3! ♞xe6 24.♟xf5 ♞de8 25.♞e1 ♞g6 26.♟xg6 hxg6∞]

17...h6! Black simply prevents White's idea.

18.♟d6

18...♞df8! Black also looks for the best places for his pieces.

19.♞ab1 ♞f7 [19...fxe5 20.♞xe5 ♞xe5 21.dxe5 ♞f7 22.f4 h5!⇒ with the idea to stop the f5 break.; 19...f5 20.gxf5 ♞xf5 An original strategical sacrifice! 21.♟xf8 ♞xf8 22.♟xf5 ♞xf5 and I suppose that because of White's many weaknesses, Black has full compensation.]

20.exf6 gxf6 21.♟g3

21...♞g6 Black prevents the Qf4 threat.

22.♞b5?! The beginning of a strange plan. White should probably create something over the e-file and on the kingside, so the idea to double rooks on the b-file cannot be dangerous for Black.

22...♞a6?! Why not take the a4 pawn immediately? [22...♞xa4 23.♞bb1 ♞a3±]

23.♞eb1 [23.♞c1!? with the idea to activate the queen over Qa3-Qd6. 23...♞xa4 24.♞b2 threatening Ra1.]

23...b6 and the white rooks are stopped very easily.

24.♞c1 ♞xa4 25.♞b2 threatening Ra1.

25...♞a3 26.♞e3 ♞b7 27.♞h4 ♞xh4 28.♟xh4

28...e5?? A huge strategic mistake. Black opens the position and with one move activates all the white pieces!

29.dxe5 fxe5 The decisive mistake! Black lost a good game in just 2 moves! [29...♖e8 30.♗xb6+ (30.♕g2 30...♗xe5 31.♗d2↑ and here White has many attacking targets like d5-h6 and even b6.) 30...axb6 31.♗xb6+ ♔c8 32.e6 ♗xe6 33.g5 ♗a7! preventing the white queen from activating. 34.♕xe6 ♗xb6 35.♗xb6 ♕xe6 36.g6 ♗g7 37.♗xc6+ ♔d7 38.♗a6 ♗xg6+=]

30.♗xb6+! +— and White is winning very quickly now!

30...♔a8 31.♗b5 ♕e6 32.♕g3 e4

33.♗xh6! 1-0

Editorial Preface

Wijk aan Zee 2015 has begun! Both the A and the B group are very exciting with a lot of surprises, especially in the A group. Let us take a look at the situation after 5 rounds:

Who would have guessed that Wojtaszek would beat Carlsen and Caruana in a very convincing way, or that Ivanchuk would lead the tournament with a fantastic 4/5. The play of Wesley So and Ding Liren is also both good and stable. The young Chinese players have been doing very well recently, even in the best European tournaments.

These are the good surprises, now let us take a look at the upsets:

Jobava has as usual been playing very attractive chess, but he's on a catastrophic score of 0.5/5!

The same goes to Aronian, who is probably having one of his worst ever performances with 1.5/5. We should not forget that Aronian has already won Wijk aan Zee 4 times!

Caruana, who started to well, had a tough time losing to Wojtaszek on Thursday.

Saric, Hou Yifan and Van Wely are also all having very hard times, but this was more expected, as it is not easy to play against players who are more than 100 points higher rated than you.

In the B group things are also very mixed up, but the favorites are still leading: Navara, Wei Yi (who is only 16-years old but already has an ELO of 2675) and the Dutchman Erwin l'Ami are all on 3.5/5.

A huge surprise was the loss of Jan Timman to Anne Haast.

Very important news is that the price of the newsletter is going to change to 99.88\$ for a yearly subscription, but we are giving all our subscribers the option to renew their subscriptions (when they are going to run out) for the old price of 52.99\$ a year. What you need to do is to send us an email where you prove that you have been our subscriber and we will provide you with a personal bonus code. You can find all the informations on our official website: www.chess-newsletter.com

In the current issue we of course mainly focus our attention on Wijk aan Zee. Enjoy!

Arkadij Naiditsch & Csaba Balogh

Two best games of the past week

**(1) Ding, Liren(2732)
- Caruana, Fabiano(2820) [D78]**

77th Tata Steel GpA(1.5),
2015.01.10

GM Csaba Balogh
Best rating: 2672

Fabiano Caruana got into a suspicious position by preparation, but some "invisible" mistakes of his strong Chinese rival allowed him to nicely turn the game to his favor.

1.d4 ♘f6 2.c4 g6 Caruana would like to play the Gruenfeld and Ding Liren chooses the g3 system against it.

3.g3 c6 4.♗g2 d5 5.♘f3 ♗g7 6.O-O O-O 7.b3 An ambitious line where White tries to hold the tension in the center. The main move is 7.cxd5. This temporarily weakens the long diagonal and Caruana directly makes use of it.

7...dxc4 8.bxc4 c5 We are still following some theoretical variation with hundreds of games with it.

9.♗b2 ♖b6

10.♖c1 This seems to be the new direction! [Most of the games continued with 10.♖b3 10...♗e4 11.e3 ♗c6 and theory considers it to be fine for Black.]

10...cxd4 11.♗xd4 It is very interesting, that in the first round of the tournament there were two games for this position.

11...♗c6 Caruana follows the recent game of Gelfand. [The other game continued with 11...♗d7 Black prepares to develop the knight to c6 and recapture with the bishop. This seems to me to be a more accurate response than Caruana's choice. 12.♗d2 ♗c6 If Black manages to finish the development he might even get some advantage because of the better pawn structure and the isolated pawn on c4. 13.c5 ♖a6 14.♖c4 ♖xc4 15.♗xc4 ♖fc8 The isolated c-pawn has the advantage of having an opened b-file. White might put some pressure on the b7 pawn, but it does not seem to be enough to achieve an edge... 16.♖ab1 ♖ab8 17.♖fc1 ♗e8 followed by a mass of exchanges and the game became very drawish, Shankland-Wei Yi, Wijk aan Zee Challengers 2015.]

12.♗xc6 bxc6 13.♗d2! This is the ideal development of the knight. It is heading to b3 from where it might potentially jump to c5, a5 or d4 and at the same time it closes the b-file against Black's counterplay with Rb8.

13...♗f5 This is the novelty. I am not sure if it was a prepared one. [The previous game continued with 13...♗g4 14.♗b3! ♗xe2 15.♖e1 ♗d3

16.c5 (I guess Ding Liren wanted to improve his own game by playing 16.♘d4! The idea is to keep the c5 square for the knight. This is quite hard to find over the board, because Black can save his extra pawn, but the activity turns out to be more important. White seems to get an advantage everywhere... 16...♙a6 (On 16...♙c7 17.♙c3 ♘f5 18.♙e5! ♙c8 19.♘a5! If the c6 pawn falls, White gets an indisputable advantage with such active pieces. 19...♘d7 20.♙ab1!± White has more than enough compensation for the pawn. Black cannot really move with any of his pieces. The c6 and e7 pawns are doomed.) 17.♙e3! Very strong computer moves. The complications favor White in all the lines. 17...♘f5 (17...♘xc4? drops the bishop after 18.♘c5 ♙b5 19.♙b1+; 17...♙xc4 is strongly met by 18.♙d2! ♘f5 19.♘a5! ♙c2 20.♙xc2 ♘xc2 21.♘xc6± White wins back the e7 pawn next move and his pieces are going to be dominant. The a1 rook also joins the game with tempo.) 18.♙xe7 ♙fe8 19.♙xe8+ ♙xe8 20.♙c3+= White is better again.) 16...♙a6 17.♙xe7 ♙ae8 Black equalized in the game Ding Liren-Gelfand, Moscow 2014]

14.♘b3 ♙ac8 Black wishes to push c5! which limits the movement of the b3 knight. Afterwards White could forget about the Nd4 or Bd4-Nc5 ideas. It also gets rid of the weakness on c6 and fixes the white pawn on c4, which might potentially become a target like it happened in the game.

[14...♙ad8 was very natural, but it runs into the very strong 15.♘c3! and suddenly it is not easy to deal with the Ba5 and Na5 threats.; However 14...♙fd8! seems to be stronger. The point is that after 15.♘c3 (It also prevents the deep idea of White which he could execute in the game 15.e4? which does not work now because after 15...♘xe4 16.♘xf6 ♘xg2 17.♘xg7 ♘xf1 the f8 rook is not hanging...) 15...a5! works!]

15.e4! Very well played! Gaining space and pushing back the black pieces.

15...♙e6 A forced retreat. The pawn could not be taken either way... [15...♘xe4? drops a piece after 16.♘xg7 ♙xg7 17.g4!; 15...♘xe4? is refuted by 16.♘xf6! ♘xg2 17.♘xg7 ♘xf1 18.♘xf8+— and White ends up with an extra piece.]

16.e5? This is a very natural move, but it is wrong. It further pushes back the black pieces, opens the diagonal of the g2 bishop, closes the one on g7, but somehow it turns out to be a huge weakening of the pawn structure and this becomes the most important positional factor. It is very hard to understand and evaluate the plusses and minuses at first sight, but a few moves later it all becomes clear. [The right move was 16.♙b1! creating a highly unpleasant pin on the b-file with which it is not easy to deal at all... 16...♙a6 (On 16...c5 17.♙a3! is very strong and Black has no good way to protect the c5

pawn.) 17.♘c5! Again the activity is more important than the material! 17...♙xc4 18.♙xc4 ♘xc4 19.♖fc1! ♘e2 (19...♘xa2 does not equalize. 20.♖a1 ♘e6 21.♖xa7

White's pieces are too active. The e7 pawn is hanging, but the main problem is the e6 bishop with which Black cannot do anything. One illustrative line is 21...♖fe8 It seems quite natural to protect the hanging pawn, but it runs into 22.♘xe6 fxe6 23.♘h3! ♔f7 24.e5! ♘d5 25.♖a3! An extremely unpleasant maneuver! Rf3 is coming next and the e6 pawn falls!) 20.♖c2 The light squared bishop does not find its place on the board... 20...♘h5 White has a strong initiative and a pleasant choice. Probably the most accurate is 21.h3 threatening to trap the bishop with g4. Black's reply is forced: 21...g5 22.♘c1! h6 23.♖b7!+= winning back the pawn.]

16...♘d7 17.♖e1 Protecting the e5 pawn. [Knowing what happened in the game, White should have played 17.c5 but it is understandable that Ding Liren did not want to give up the control over the d5 square... 17...♙a6 18.♙e3 ♘d5! followed by e6. Black has no problems.]

17...c5! Finally Black got his free move to push c5 and its effect is even higher than expected. Black has fixed the weakness on c4 and is ready to attack it with Qa6 and Nb6! Suddenly the knight on b3 becomes misplaced, it has no more chance to occupy the d4 or c5 squares.

18.♘d2 Black has a choice between three tempting moves and it is very hard to assess which one is the best.

18...♙a6 Consequently following the plan with Nb6 and putting pressure on the c4 pawn. [It made sense to include 18...♖b8!? 19.♘c3 and only now play 19...♙a6 This way, Black could have avoided what happened in the game.; 18...♙c7!? also looks very strong. 19.f4 ♘b6 20.♙c2 ♖fd8! In this case Black just brings his pieces to their ideal squares. He is going to double his rooks on the d-file and uses the fact that the d2 knight cannot move because it is obliged to defend the c4 weakness. 21.♖ad1 ♖d7 Black has the initiative.]

19.♖e3! Resourceful prophylaxis against Nb6, which is now strongly met by Ra3 and the queen is trapped.

19...♖b8 20.♖a3 [Perhaps it was better to play 20.f4 right away. Nb6 is still met by Ra3 and if Black plays Qb6 White will have an extra tempo compared to the game.]

20...♙b6 21.♖b3 ♙c7 22.f4 ♘b6! After some maneuvering we have reached a similar position to the 18...Qc7 tempting

option. Black is going to play Rbd8 followed by doubling on the d-file. A well-timed undermining of the e5 pawn with f6 is also hanging in the air to bring the g7 bishop to the game.

23. ♖b1 seems to be an inaccuracy. White cannot really do something useful on the b-file. [It looked more natural to play 23. ♔c2 and bring the rook to e1, preparing to the f6 break.]

23... ♖bd8! Black can leave the b-file, as the b6 knight controls it properly. The d-file turns out to be a more relevant file.

24. ♕c3 [24.a4 would have been a consequent follow-up, trying to invade the 7th rank. Although Black is completely fine after 24... ♖d7! 25.a5 ♖a4 and the a5 pawn becomes weak, while the 7th rank is properly secured.]

24... ♔d7 Black is threatening to take on c4 now, as with his last move he prepared to meet the Rb7 counterplay with Qd3! [24...f6!? also looked very good 25.exf6 exf6 and Black plays Qf7 next, increasing the pressure on the c4 pawn.]

25. ♕f1 Not a nice move to make, but White had to do something about the c4 pawn. [25. ♖b5 25... ♔d3 is also much easier to play with black.]

25... ♕f5! 26. ♖a1

26...f6! Here comes the freeing break! There is huge

disharmony between the white pieces. The rooks are cut off from the game. The minor pieces are just protecting each other and the c4 pawn. These are the facts that justify that the opening of the position will favor Black!

27.exf6 Allowing Black to take on e5 and open the f-file for his rook is even worse.

27...exf6 Black is ready to occupy the e-file. Suddenly the white king becomes extremely vulnerable. The move f2-f4 seriously weakens the king's position. Perhaps if White could pull it back to f2 he would not have any serious problem, but now he is in huge trouble.

28. ♖b5 Too slow, but it is difficult to be clever. [28. ♖f3 is not better, as Black has good answers here as well: 28... ♖fe8 (Or 28... ♕e4 followed by Ba8 with potential threats on the long diagonal with Qb7.)]

28... ♖a4! Black picks up the important dark squared bishop after which the opening of the h8-a1 diagonal with f5 turns out to be decisive.

29. ♖b3 [29. ♕a5 is not much better. 29... ♔d4+ 30. ♖h1 ♖de8 with complete domination and the h1 king might get mated very soon, for example after Bd7-c6.]

29... ♖xc3 30. ♔xc3

30...♙e4! Of course! Black occupies one of the long diagonals and prepares to open the other one in the next move with f5! The bishop pair starts to work, there is no way to stop them!

31.f5 Trying to lock the g7 bishop for at least a few moves. [31.♘xc5!? would have been more tricky. 31...♙c6! (It seems like Black wins on the spot with 31...f5 however it spoils the advantage because of 32.♘xd7 ♙xc3 33.♚d1! (33.♘xf8 33...♙d4# would have been the neat point! Quite a pretty mate, we must admit!) 33...♚f7 34.♚b8! and White just holds by miracle.) 32.♘xe4 f5! wins an exchange and the game, but it would have been worth a try and hoping that Black plays 31... f5, since Black is winning anyway in the game.]

31...♙xf5 32.♚e1 [32.♘xc5 32...♙c6–+; 32.♚xc5 32...♙d7–+ and f5 next.]

32...♚fe8 Caruana uses all his pieces!

33.♚xc5 [33.♘xc5 loses to 33...♙c6 White must protect the c5 knight. 34.♚a5 (34.♚xe8+ 34...♚xe8 35.♚a5 ♙h6–+ and Be3 next wins.) 34...♚xe1 35.♙xe1 ♙f3–+]

33...♙d7 Black was in some time trouble and quickly plays the most natural move. He is pushing f5 next move and the joining of the bishop to the game decides the outcome. [However, there was a brilliant win with 33...♙xc5+!! 34.♘xc5

f5 and Black wins the queen because Bd4 is a decisive threat. 35.♙e3 (35.♘xe4 35...♙xc3–+; 35.♙a3 35...♙d4+ 36.♚e3 ♙c6–+) 35...♙d4–+]

34.♙c1 f5 35.♙f4 White desperately tries to complicate the matters in Caruana's time trouble. He would like to play Rc7, which gets parried in the simplest way.

35...♚e7 36.h4 Giving air to the king on h2 against checks on the g1-a7 diagonal.

36...a5!! A brilliant finish! Caruana sees that the b3 knight is the key in White's defense, otherwise Bd4 is decisive. Therefore he is threatening to send it away with a4 and both captures on a5 lose material.

37.♚xa5 ♙c3! 38.♚d5 Desperation again! Black has many different wins here, Caruana finds an easy one...

38...♙a7+ 39.♙h2 ♚xd5 40.cxd5 ♙xe1 A great game! It was interesting that this all happened because of the natural 16.e5 move. Sometimes one mistake like this determines the entire game... **0-1**

**(2) Ivanchuk, Vassily(2715)
- Van Wely, Loek(2667) [B45]**

77th Tata Steel GpA(3),
2015.01.12

GM Arkadij Naiditsch
Best rating: 2737

Ivanchuk's games are usually fun to watch, with a lot of interesting ideas and original play, but Van Wely is also a very fighting player who stands by his Sicilian already for many years. Ivanchuk seems to celebrate his comeback in Wijk aan Zee with a fantastic start of 4/5 and we are going to see one of this excellent victories. In the current game the position quickly becoming extremely sharp and complicated, where White clearly has a better overview and with a perfect domination of his pieces he makes Black's play look almost funny. A great game to watch and learn from.

1.e4 c5 As expected, a Sicilian...

2.♘f3 e6 Van Wely used to play the Najdorf more often, but he also often goes for a lot of different versions of the Paulsen or Sheveningen.

3.d4 cxd4 4.♘xd4 ♘c6 5.♘c3 d6 A rare move order in the recent games, usually Black goes for 5...Qc7 or 5...a6.

6.♙e3 ♘f6 In case of 7.f3 we would be back to the main lines, but Ivanchuk tries an interesting idea.

7.♙e2!? Lately in the Najdorf it becomes more and more fashionable to put the queen on e2 instead of the usual f4-Qf3. The queen on e2 has the advantage that White has the possibility of playing g4 and Bg2 and at the same time sometimes Nd5 or Nf5 are possible as well.

7...a6 Van Wely continues with the standard set up. Maybe an interesting try for Black could be to play 7... Bd7 and a quick Qa5 and Rc8, trying to save a tempo on the a6 move.

8.O-O-O ♙d7 9.f4 ♖c8 10.♙b1 This is a typical prophylactical move which we see in many different Sicilians.

10...♙c7?! Of course Black could have played 10...Be7 followed by short castle, but usually the queen is nicely placed on c7. On the other hand the Qc7 move is a bit slow, so in the current situation I don't think it was really needed.

11.♘b3 A preparation for the main idea of Qe2: to play g4. [White could have tried to play g4 immediately: 11.g4!? 11...♘xd4 12.♖xd4 and 12...e5! Now we can see why Ivanchuk decided to go back with 11. Nb3. 13.♖d2 ♙xg4 Black is winning a pawn, but things are far from clear. 14.♙g2 and I think Whites has excellent compensation for the pawn.]

11...b5 Once again Black plays a very standard move.

12.g4 Things are getting more direct now. White wants to play g5 next, so Black needs to act quickly.

12...b4?! just doesn't look right... [12...h5 doesn't help since after 13.g5 ♖g4 White has the cool 14.♙g1 with the deadly threat of playing h3 next.; But maybe the calm 12...h6 was the best way to go on.]

13.♘a4 Not only is the pawn on a6 hanging, but White also has another idea of playing Nb6 next.

13...e5? This was of course the idea of Van Wely when he played 12...b4?!, but it just doesn't seem to work out and in general pushing e5 is a wrong approach for Black.

14.g5! Great play by Ivanchuk. The sicilian is a very sharp opening and needs to be played energetically! I guess Black had clearly underestimated the complications we are entering now.

14...♙g4 15.♙g2 Now we can see Ivanchuk's plan.

15...♙xd1 This move is also forced.

16.♙xa6! This is the key move behind 14. g5, which you must see before playing 14.g5! The bishop on d1 is hanging, the knight on f6 as well and the rook on c8, so it is clear that White is getting some material back- but for the moment Ivanchuk is just a full rook down. [Black is doing fine after 16.gxf6? 16...♘d4! with a big pressure on the c2 pawn, with a very unclear position.]

16...♘d7 [16...♘g4 doesn't help because of 17.♙b6! It is very rare that in a Sicilian White is dominating on the queenside so much. 17...♙d7 18.♙xd1 with a winning position for White.]

17.♙xd1 White is only an exchange down and he has a pawn and a great initiative, so it is clear that he is much better.

17...♙a8 A logical move, but probably already almost losing the game. [Probably the best way to fight would have been to play 17...♙b8 but anyhow White has a great position after 18.♙e2! followed by Qc4. We can see a great domination by the white pieces.]

18.♙b5 ♙e7 [18...exf4 didn't help much, because after 19.♙xf4 ♙e7 White has a winning punch with 20.e5! and Black's position is falling apart.]

19.f5! Another very good strategic decision. There is no need for White to rush things, Black has almost no play at all and the idea of playing f6 in the right moment could be deadly.

19...♖b7 Hoping to get rid of the b5 bishop.

20.c4! Ivanchuk is playing great chess, using the fact that Black is not in good shape to play 20...bxc3, so White is securing a great position for the bishop on b5.

20...O-O [20...bxc3 didn't help either. 21.♘xc3 The white knight is taking the perfect d5 square under control. 21...O-O 22.f6 and the game is basically over. 22...♙d8 23.♖xd6 with a totally winning position for White.]

21.f6 White is starting the assault!

21...♙d8 22.♖xd6 and the second black pawn is gone... What an amazing domination by the white pieces! But already in a few moves it will get even worse...

22...♘cb8 23.♖g4 Not the most precise way to end the game, but a very practical move. White is attacking the d7 knight, which has no squares.

23...g6

24.h4 Ivanchuk starts to joke... [Why not take a piece with 24.♙xd7 24...♘xd7 25.♖xd7 ♖a6 26.♘bc5 White doesn't only have a winning position, but even a material advantage. 26...♖xc4 27.♖h3 and I guess the best Black can do is to resign.]

24...h5 Black is sort of fighting.

25.♖f3 and we now have a funny position where Black has no move which would not lead to a direct loss of some material. Amazing!

25...♙c7 Van Wely is still hoping for something...

26.♖xd7 ♘xd7

27.♙xd7 White has 3 pieces and 2 pawns for Black's both

rooks-which is already a material advantage- but the real bad thing is that the white pieces are totally dominating the game.

27...♖ad8 28.♘bc5 It was slowly time to resign, but Black keeps on making moves...

28...♔a8 29.♔d1 The white queen is going to take a great position on d5.

29...♔a7 30.♔d5 ♖a8 Black can practically not move...

31.♘d2 And again Ivanchuk does not hurry, he is going for the b4 pawn! :)

31...♖fd8 32.♘xb4 ♘a5 33.a3 ♔c7 34.♘c3 The second white knight wants to take a nice position on b5.

34...♘xb4 35.axb4 ♔a7 36.♔c2 and of course the white king is perfectly protected by the armada of white pawns and pieces.

36...♖ac8 37.♘b5 What a position!

37...♔a1

38.♘d6 What we can learn from this game is this really nice touch which Ivanchuk showed us with his domination play, and that usually a move like e5 is very wrong in a Sicilian for Black- don't try it in your own games! **1-0**

The K-Files. Accelerated Queen's Indian, 3.Nf3

GM Alexander Khalifman
FIDE World Chess Champion (1999)
Best rating: 2702

GM Alexander Khalifman continues his review of the Queen's Indian Accelerated. Here is a reminder on the contents of the series:

Part I (Issue #150). Refuting here and now 3.f3, etc.

Part II (Issue #151). Solid and classical 3.Nf3

III & IV (Issues #152-153). Good old central setup 3.Nc3

No Name Opening, Part II

(3) 1.d4 Nf6 2.c4 b6 3.Nf3 [A50]

1.d4 ♘f6 **2.c4** b6 **3.♞f3** It's a solid classical reaction. White doesn't pay attention to the opponent's move order tricks and invites him to play the Queen's Indian. It's possible, of course, but Black also has some other options.

3...♞b7 [3...e6 - Queen's Indian]

4.g3 The other moves (except 4. Nc3) don't create any problems. [4.e3 4...g6 Once again, Black can switch to Queen's Indian, but double fianchetto is also perfectly OK here. (4...e6) 5.♞c3 ♞g7 6.♞d3 (6.♞e2 6...O-O (6...♞e4!?)

7.O-O d5 8.cxd5 ♞xd5 9.♞d2 ♞d7= Bondarevsky - Taimanov USSR ch 1963) 6...d5 7.cxd5 ♞xd5 8.O-O O-O 9.♞xd5 ♞xd5 10.e4 ♞d7=; 4.♞g5 4...♞e4 nothing is wrong with 4...e6, but Black can play more ambitiously 5.♞h4 h6!? 6.♞c3 ♞xc3 7.bxc3 g5 8.♞g3 d6=; 4.♞c3 - 3.Nc3]

4...g6

In my opinion the only serious alternative to the classical 4...e6 (it's the last moment when Black can return to the Queen's Indian)

[4...e5 played by Alekhine and Botvinnik but... their opponents couldn't use Houdini for the preparation 5.dxe5 ♞g4 6.♞g2 ♞xe5 (6...♞b4+ 7.♞d2 ♞xd2+ 8.♞xd2 ♞xe5 9.O-O) 7.O-O! N Clear improvement on (7.♞bd2 7...♞xf3+ 8.♞xf3 ♞b4+ 9.♞d2 ♞xd2+ 10.♞xd2 O-O is very close to equal (Teichmann - Alekhine Berlin 1921)) 7...♞xc4 (7...♞xf3+ 8.exf3 ♞e7 9.♞c3 O-O 10.♞d5±) 8.♞c3 ♞c6 9.b3 ♞d6 10.e4= and White has a tremendous compensation for the pawn; 4...c5 5.d5 b5 Otherwise it's just an awkward Benoni, and after 5...b5 it's a quite strange Benko gambit. Still I can't believe that Black can afford such dynamic play, wasting time on b7-b6-b5. Not sure if the following lines refute it outright, but... 6.♞g2 g6 (6...bxc4 7.e4! N (the natural 7.♞c3 suddenly turns out to be a waste of time, and after 7...d6 8.O-O ♞bd7

9.e4 g6 10.♖a4 ♘g7 11.e5 ♗xd5 Black is fine) 7...♗xe4 (7...d6 8.O-O ♗bd7 9.♞e1 g6 10.e5±; 7...g6 8.♗c3 ♘g7 9.e5 ♗g4 10.♘f4 O-O 11.O-O d6 12.exd6 exd6 13.♞e1±) 8.O-O ♗f6 (8...d6 9.♞e1 ♗f6 10.♗c3) 9.♘g5 d6 10.♞e1 ♗bd7 11.♗c3 White has a fantastic compensation the natural 11...g6? loses immediately 12.♘xf6 ♗xf6 13.♞a4+ ♗d7 (13...♞d7 14.♗b5+-) 14.♗e4 ♞c7 15.♗f6+ ♞d8 16.♗g5!+-) 7.O-O ♘g7 8.e4! N the same idea 8...♗xe4 9.♞e1 ♗f6 10.♗e5 O-O 11.cxb5± it's definitely not the kind of position Benko players are dreaming about; 4...♘xf3 There is certain logical basis; Black intends to exploit the opponent's compromised pawn structure and to build a solid pawn center c6-d5-e6. However, b7-b6 doesn't belong here. If Black likes to play like this, he should better try something like 1.d4 d6 2.Nf3 Bg4. 5.exf3 e6 6.♘g2 d5 7.O-O ♘e7 8.f4 c6 9.b3 ♗a6 10.♗d2+= quite soon the white knight will arrive to e5 and Black will have to think if it was worth to play b7-b6 only to exchange the light-squared bishop two moves later (Aronian - Lysyj Tromso (rapid) 2013)]

5.♘g2 [5.♗c3!? might be a more practical move order as it reduces Black's opportunities and sets a nice positional trap 5...♘g7 (5...♗e4?! runs into 6.d5 ♗xc3 (in the game Romanishin - Kir.Georgiev Wijk aan Zee 1985 Black was so much upset about his previous move that he played 6...♗f6?! which is, of course, even worse - just losing two tempi 7.e4±) 7.♞d4! after the best 7...f6 8.♞xc3 c6 9.dxc6 ♗xc6 10.♘g2+= things are far from clear but Black's kingside structure is quite ugly) 6.d5 (now 6.♘g2 already can be met by 6...♗e4!?) 6...♗a6 7.♘g2 ♗c5 8.O-O O-O transposing to the main line]

5...♘g7 6.O-O O-O This position happened also in Black games of Carlsen, Grischuk and Morozevich despite none of them has played 1.d4 Nf6 2.c4 b6 so far. The reason is simple: the most popular move order to reach the position on the diagram is 1.Nf3 Nf6 2.c4 b6 3. g3 Bb7 4.Bg2 g6 5.O-O Bg7

6.d4 O-O. So, the following part might be quite useful also for the readers who are skeptical about the concept of NoName opening, but look for a reliable setup against 1.Nf3.

7.d5 In my opinion the only way to fight for something tangible. White gains space and tries to leave the opponent's light-squared bishop passive. The other moves seem to be pretty harmless.

[7.♗c3 The most popular and natural move. However, it never seemed to grant White even a symbolic advantage. 7...♗e4 8.♗xe4 (8.♘d2 8...♗xd2 9.♞xd2 c5 10.d5 d6= Stean - Diesen New York 1977; 8.♞c2 8...♗xc3 9.bxc3 (9.♞xc3 9...c5 10.♘e3 ♘xf3 11.♘xf3 ♗c6=) 9...d6= White's control on the center and pawn weaknesses compensate each other (Lisitsin - Savitsky Leningrad 1934)) 8...♘e4 9.♘e3 (9.d5 9...c6 10.d6 (10.♘h3 10...cxd5 11.♗g5 Varelle - Bordling France 1996 (11.cxd5 11...e6=+) 11...e6! 12.f3 ♘f5 13.g4 ♘f6±) 10...exd6 11.♞xd6 ♗a6= Szmetan - Rodriguez Buenos Aires 1990 ; 9.♘f4 9...c5 (9...d6 - 7.Bf4) 10.♞d2 cxd4 11.♗xd4 ♘xg2 12.♞xg2 ♞c8= Pedersen - Cummings Denmark 1978; 9.♘g5 9...c5 10.♞d2 cxd4 11.♗xd4 ♘xg2 12.♞xg2 ♗c6 (12...d5 13.♞ad1! dxc4 14.♗f5 ♞xd2 15.♗xe7+ ♞h8 16.♞xd2 ♞e8 17.♗d5+= Chatalbashev - Ashwin Albena 2013) 13.♗xc6 dxc6 14.♞ad1 ♞c7 15.♞d7 ♞e5! 16.♞xe7 ♞a5!=) 9...c5 10.♞d2 d6 The easiest way to equalise. 11.♘h6 ♗d7 12.♞fd1 ♗f6 13.♞ac1

♖c7= Radjabov - Kramnik Istanbul 2012; 7.♖c2 is strongly met by 7...c5 8.d5 b5! 9.cxb5 (9.♗c3 9...b4 10.♗d1 d6 11.e4 ♗bd7⇒ Nikolic - I.Sokolov Pula 1991; 9.e4 9...d6) 9...d6 10.e4 a6 looks like a good Benko version for Black, as e2-e4 has only weakened the important square d3. The recent top-level game confirmed this assessment: 11.b6 ♗bd7 12.♗d2 a5 13.♗c3 ♗xb6⇒ Nepomniatschij - Morozevich Russia ch 2014; 7.♞e1 Half-waiting move which is very popular now in a similar Queen's Indian position (with the black bishop on e7). However, here Black has no problems with the useful answer. 7...e6 (7...c5?! 8.d5 b5 is not recommended here: 9.e4 bxc4 (9...d6 10.e5) 10.♗c3± e4-e5 is coming (Yevseev - Pimenov, St.Petersburg 2011)) 8.♗c3 (8.♗g5 8...h6 9.♗xf6 ♖xf6 10.e4 d6=) 8...♗e4 9.♗xe4 ♗xe4 10.♗g5 ♖e8 11.♖d2 d6 12.♗h6 ♗d7= and Black is perfectly safe and solid here (Aronian - Carlsen Saint Louis 2014) ; 7.♗f4 Another small trick which wouldn't threaten Black if he reacts properly 7...d6 (7...c5?! 8.d5 b5 9.d6!) 8.♗c3 (8.d5 8...b5 9.♖b3 ♖c8 10.♖xb5 c6 11.dxc6 ♗xc6 12.♖b3 ♗bd7∞ gives Black excellent compensation as the bishop is misplaced on f4.) 8...♗e4 9.♗xe4 ♗xe4 This position might arise via the move order 7.Nc3 Ne4 8.Nxe4 Bxe4 9.Bf4 d6 (instead 9...c5! equalises immediately). So White avoided 9...c5, but is it such a big achievement?! 10.♖d2 ♗d7 11.♗h6 Guimard - Euwe Groningen 1946 11...♗f6 12.♗xg7 ♗xg7=]

7...♗a6 This is the most natural developing move. [7...b5 would be good if not 8.♖b3! and it's right time for Black to decide if his previous move was a sacrifice or a blunder. 8...♖c8 9.♖xb5 c6 10.dxc6 ♗xc6 11.♗c3 ♞b8 12.♖a4 ♗a6 13.a3 ♗g4 14.c5 and Black doesn't have enough for the pawn (Cheparinov - Salgado Spain 2013); 7...♗e4 is recommended by the engines, but from the human point of view it looks a bit too aggressive 8.♖c2 f5 (8...♗d6 9.e4 e5 10.b4 c6 11.♗bd2+=)

9.♞d1! A recent invention by Caruana. (9.♗bd2 leads to a fairly unclear position after 9...♗d6 10.e4 c6 11.♞d1 cxd5 12.exd5 ♗a6 Fridman - Mainka Senden 2002) 9...c6 (9...♗a6 10.♗d4) 10.♗c3! N A critical move. (10.♗d4 10...cxd5 11.cxd5 ♗xd5 12.♗xf5 Caruana - Robertson Bilbao 2014 could have led to completely unclear position after 12...gxf5 13.♞xd5 e6 14.♞d1 d5 15.♗d2 ♗d7 Black's strong center and active pieces compensate White's bishop pair.) 10...♗xc3 11.bxc3 ♗a6 12.♗d4 ♖c8 13.♞b1+= I like White's position more, but certainly further practical tests are required; 7...e6 8.♗c3 exd5 9.cxd5 ♞e8 10.♗d4 ♗a6 11.♗db5!?+=; 7...c6 8.♗c3 cxd5 9.cxd5 ♗a6 10.e4+= Budo - Alatortsev Leningrad 1932]

8.♗c3 9.♞c5 9.♞e1 The most unpleasant for Black in my opinion. The idea is simple: e2-e4 [9.♖c2 not the best square for the queen as black rook will soon arrive to c8 9...c6! 10.e4 cxd5 11.exd5 e6⇒ Norman - Tiviakov Guernsey 2013; 9.♗d4 the same plan: e2-e4 9...a5!? so this rare prophylactic move is better (9...e5 was played by Grischuk, Tiviakov and Kurnosov, but seems to be inaccurate. 10.♗b3 (10.♗c2!?) 10...d6 (10...♗xb3 11.axb3 a5 12.d6!? is a problem) 11.♗xc5! Very straightforward (but effective) way to proceed. 11...bxc5 12.a3 a5 (12...♗a6 Grischuk - Sargissian Khanty Mansiysk blitz 2013 13.b3 and it's no pleasure to play with the bishop on a6 (if it retreats, then b3-b4 follows)) 13.e4 and White intends to go for a5-pawn with something like a4 Nb5 Qe1 Bd2. Looks quite slow but works...) 10.e4 (10.♗f4 10...e5! this trick is a tactical basis of 9...a5 11.dxe6 (11.♗xe5 11...♗xd5 12.♗xd5 ♗xe5 13.♗xb7 ♗xb7 14.f4 ♗g7 15.e4 ♗c5⇒) 11...fxe6 12.♗xb7 ♗xb7 13.♖d2 ♗c5∞; 10.♗b3 10...♗xb3 11.axb3 d6⇒) 10...e5 11.♗b3 (11.♗db5 11...c6 12.♗a3 cxd5 13.exd5 ♗e8⇒; 11.♗c2 11...♗e8! an important manoeuvre 12.♗e3 ♗d6 13.♖e2 ♖e7∞ planning f7-f5) 11...♗xb3 12.axb3 d6∞ looks like very much playable King's Indian]

9...e6 [9...♘fe4 According to general principles when Black is lacking space piece exchanges are good for him. But in this concrete case it's combined with the massive loss of time and doesn't work properly. 10.♘xe4 ♘xe4 11.♚c2 ♘c5 (11...f5 12.♘g5 ♘d6 13.♙f4 with strong pressure (Ivanchuk - Robson Tromso 2013)) 12.e4 d6 13.♙e3 and it's difficult to create adequate counterplay]

10.e4 d6 11.♚c2 [after the logical 11.♘d4 (Castro - Alvarez Bogota 2014) 11...e5 leads to positions which are quite similar to the 9.Nd4 line.]

11...a5 12.♙g5 h6 13.♙e3 White's position is more pleasant to play, but Black also has some trumps (Sargissian - Vallejo Khanty Mansiysk rapid 2013)

David vs. Goliath

Peter Zhdanov

Chief Editor of Pogonina.com

In this special weekly column we will be looking at the most unexpected results that occurred last week. Players usually face opponents of a similar level. Considerably less frequent are situations when a significantly lower-rated player succeeds in beating a much stronger adversary.

The previous week has brought us 23 upsets. The number of moves ranges from 24 in WIM Alexandra Jule (2139) - FM Brice Le Roy (2290) to 73 in FM Peter Constantinou (2284) - Nail Bashirli (1963), 0-1. The highest-profile loss was GM Ivan Popov (2622) - Annirudha Deshpande (2157), 0-1. Elvin Bayramov (2051) has defeated two Goliaths in one week: FM Ulvi Sadikhov (2414) and CM Parvis Gasimov (2517). CM instead of GM is not a misprint: young Parvis (born 2000) has **famously improved his rating by 568 points over a 3-months period!**

The "hardcore" nomination goes to GM Kirill Stupak, who played Kh7 and resigned in the following position against FM Katashuk (2191). As you can see, White can give checkmate in one move with Qf7.

Top-10:

Kravchenko (1777) - Shemeakin (2266), 1-0, **489** points
 Dibusz (1593) - Juhasz (2074), 1-0, **481** points
 Kokeny (2086) - Erseki (1612), 0-1, **474** points
 Bayramov (2051) - Gasimov (2517), 1-0, **466** points
 Popov (2622) - Deshpande (2157), 0-1, **465** points
 Vernacki (2354) - Lukic (1953), 0-1, **401** points
 Badalian (1703) - Pedashenko (2085), 1-0, **382** points
 Eade (1858) - Reilly (2238), 1-0, **380** points
 Sevdemaliev (2505) - Asadli (2127), 0-1, **378** points
 Katashuk (2191) - Stupak (2557), 1-0, **366** points

Average gap: 428; White won 6 games, Black won 4 games.

You can view all the games in the accompanying pgn file.

If you have ever won a game against someone rated 300 points or above yourself, please send it to **peter@pogonina.com** for publication. Any additional information (a photo, annotations, etc.) will be appreciated.

Endgame section

(14) Ivanchuk, Vassily(2715)
- Jobava, Baadur(2727)

Wijk aan Zee,
2015.01.10

GM Csaba Balogh
Best rating: 2672

Jobava had an advantage at an earlier stage of the game, but he missed some tactical ideas after which White managed to equalize. Obviously in this 5 against 5 pawns and rook endgame the logical outcome would be a draw, but Black was probably disappointed about the spoiled chances and he continues playing for the win.

33...♖e6 Black pins his hopes to his symbolic edge because of the a6 passed pawn, but this should not be enough to win the game. [Naturally 33...♖c5 34.♖xa6 ♖xc3 35.♖b6 is a dead draw.]

34.♔f2 Both sides activate their king, which is a known principle in most of the endgames.

34...♔f8 35.♔e3 ♔e7 36.g4 White has a pawn majority on the kingside, therefore he advances his pawns there in order

to be able to create a passed pawn later.

36...♔d7 This is the only attempt for Black if he wants to continue playing for the win. He drives his king to b6 to support the advance of the a-pawn. Both players were in severe time trouble, which probably also affected Jobava to play ambitiously. [36...g5 was very logical to stop the advance of the pawns, although it does not change the logical outcome. 37.f4 gxf4+ 38.♔xf4 is still just a dead draw. If Black drives his king to b6, White always gets counterplay against the f7 pawn.]

37.f4 White is ready to push e5, followed by Ke4 and f5!

37...♖c6 38.♔d4 ♔c7 Jobava consequently follows his risky plan. Obviously if he keeps his king on e7 the game would end in a draw.

39.f5 ♖c4+ 40.♔d5 The last move before reaching time control! Generally in rook endgames it is very important to defend actively! Passively defending the c3 pawn would have given Black chances after Kb6 and a5. The white king must support his passer in the center. [40.♔e5!? was actually also strong, when Black has nothing better than retreating with 40...♖c6 (40...♔b6? is strongly met by 41.♔f6! ♖xe4 42.♔xf7 and White gets a very strong passed f-pawn in any case. 42...♖xg4 43.f6!)]

40...♔b6 Thanks to Jobava's hard efforts, we have reached a very interesting rook endgame with mutual chances. Although it is already rather White who has better chances. The a-passed pawn is still on a6, while on the other side, White is ready to push e5-e6 and his king is excellently placed to support the further promotion of the pawn. Probably at this point Jobava had also realized that he was overoptimistic about his chances, but it was very difficult to evaluate correctly in time trouble.

41.♖a3 Ivanchuk decides to protect his c3 pawn as Black cannot avoid e5-e6 anyway. [41.e5 right away was also possible. 41...gxf5 42.gxf5 ♖xc3 43.e6 fxe6+ 44.fxe6 ♖e3 Black has the upper hand here. He intends to give up his rook for the e-pawn and advance his passers with the support of his king. The single rook without the king cannot stop them. However with accurate play White can still hold the draw. 45.♔d6 b4 46.e7 a5

47.♖f2! This is very important! White wants to promote his pawn with his rook with the idea to keep the king closer to the queenside pawns. (47.♔d7? loses to 47...♔b5! 48.e8=♖ ♖xe8 49.♔xe8 a4—+ and the pawns promote more or less automatically.) 47...b3 48.♖f8! The perfect square for the rook, from where it supports his own pawn and also stops the b-pawn because of Rb8. 48...♔b5 (48...a4? is too slow, White wins after 49.e8=♖ ♖xe8 50.♖xe8 ♔b5 51.♔d5 Black cannot advance his pawns, because after a check on the b-file, his king gets squeezed to the a-file and Kc4 wins. 51...♔b4 52.♔d4+—; 48...b2? 49.♖b8+) 49.♖f5+ Another important motif in rook endgames! One can promote his pawns also by closing the key line. 49...♔c4 50.♖e5 ♖xe5 51.♔xe5 b2 52.e8=♖ b1=♖ 53.♖c6+ ♔b3! is the only move to save the queen. 54.♖b5+ ♔c2 55.♖xa5=]

41...a5 42.e5 ♖a4?? A terrible blunder! [42...♖xg4 was also suspicious because of 43.f6! (43.e6 is less accurate, because Black has 43...fxe6+ 44.fxe6 ♔c7! saying stop to the pawn and making a draw after 45.♖xa5 ♖g5+ 46.♔e4 ♔d6 47.♖a6+ ♔e7= 48.♖a7+ ♔xe6 49.♖xh7) ; Black should have played 42...gxf5 43.gxf5 ♖f4 44.f6 ♖f3! A very nice move! Black pins the rook and creates the threat of b4. At the same time he prevents the e6 idea as it is met by Rxf6 e7 Re6! 45.♔d6 b4

White must force a draw here by playing 46.cxb4!! Rxa3 47.bxa5+ e6 is coming after each move. 47...Rxa5 48.e6 fxe6 49.f7 Rf5 50.Qxe6 Rf2 51.Qe7 and the draw is inevitable. 51...Re2+ 52.Qd7 Rf2 53.Qe7=]

43.Rxa4! [Black resigned in view of 43.Rxa4 43...bxa4 44.Qc4! The white king stops the passed pawn. But of course, it is not the end of the story... 44...gxf5 45.gxf5 Qc6 It looks like White is in trouble. He soon gets into zugzwang and needs to move with his king, but then Kd5 wins the e5 pawn. However the truth is different: 46.Qd3! White simply wants to go towards the a-pawns. Black must play 46...Qd5

And here comes the brilliant point! 47.e6! fxe6 48.f6! A very nice breakthrough! Both sides have two passed pawns, but the white ones are promoting faster! 48...Qd6 49.c4! e5 (49...Qd7 loses to 50.c5 Qe8 51.c6+-; 49...a3 50.Qc2+- does

not change anything.) 50.c5+! Qe6 51.c6 a3 52.c7 Qd7 53.f7 a2 54.c8=Q+ Qxc8 55.f8=Q++- The resignation might look a bit premature, but on this level such things belong to the easy-to-calculate category. An undeserved loss for Jobava, but sometimes fighting spirit does not pay off properly.] **1-0**

(15) Saric, Ivan(2666)
- Aronian, Levon(2797)

77th Tata Steel GpA(1),
2015.01.10

GM Arkadij Naiditsch
Best rating: 2737

We are in the 1st round of Wijk aan Zee. For Saric it is one of first super tournaments he has participated in, so to immediately play the first round against the World Nr5 in not an easy task. The game reached an endgame already on move 10, where White got a minimal advantage. After a few not very accurate moves, White already has a very pleasant position. Black's pieces are passive and the white knight on c4 is perfectly placed. Still, it is very hard to create real winning chances out of a small edge.

18.f4! A very good decision by Saric. Of course it was possible to play Be3-f3-Rad1 with a small plus here, but Black would be solid too with f6 and maybe have the idea of playing Be7 and Nd6. Now the game is getting a bit more funny.

18...exf4 This move is a must.

19.♖xd6 ♜xd6 20.♗xf4 So White has the bishop pair and more advanced pawns on the queenside. White's idea should be to advance the pawns even more to create some weakness in the black pawn structure and make the bishop pair even more dominant.

20...♗e6 Preventing White from playing c4.

21.♖ad1?! I think this is clearly not the best. White's idea should not be to exchange the rooks, but to play for the c4 push. [The right move was 21.♖ac1! and Black cannot stop White from playing c4. 21...c6 22.c4 and White's advantage got a bit bigger. The next idea could be to play Kf2-Ke3 and maybe Red1. Black's position is very unpleasant here.]

21...♖d7?! A very logical move, but Black misses a nice tactical idea of White. [More solid would have been 21...♖ac8 22.♖d4 h6 with the idea of playing Ke7 next. Black's position is a little worse, but very solid.]

22.c4 Finally the c4 move is played!

22...♖ad8 Black still doesn't see the trick.

23.c5 ♜b5 The position looks like a draw- but only at first sight!

24. Rxd7? What a mistake by White! [What White and Black both missed was 24.c6! A beautiful "little" punch! 24...bxc6 (Of course Black cannot take the rook: 24...Rxd1?? 25.Rxd1 Rxd1 26.cxb7 Rxd8 27.Bxb5 and White is easily winning.) 25.Rc1! Another calm and very strong move. Black can't stop White from playing Rxc6 next and after that the a6 pawn is in big danger. We would clearly see the domination of the bishop pair here.]

24... Bxd7 Black doesn't give White another chance to play the c6 move.

25. Rd1 Bxe8! An accurate move after which the drawn outcome is almost sure because White can't do anything against Black playing Be6 next or Bc6, with the exchange of the rook.

26. Bc4

26... Bxe6 27. Rxd8+ Bxd8 and after the rooks are gone, to just have the bishop pair is not enough to win the game. The position is a draw.

28. Bxb5 axb5 Opposite colored bishops endgames are equal and it is not much fun to play on.

29. c6 bxc6 30. Be3 Bc8 31. Bc5 Bb7 32. Bf2 We just saw how important it is too keep the tension and fight for every resource, even when the position looks simple and very much like a draw. **1/2-1/2**

Chess and the City. Ben Oni.

WGM Elisabeth Paetz

Best rating: 2493

"And as her soul was departing (for she was dying), she called his name Ben-Oni"

(which means "son of my sorrow") (Genesis 35:18)

"Whenever I felt in a sorrowful mood and wanted to take refuge from melancholy, I sat over a chess board, for one or two hours according to circumstances. Thus this book came into being, and its name, Ben-Oni "Son of Sadness", should indicate its origin." (Aaron Reinganum)

About one year ago, on the 11th January 2014, the chess world was shocked by the news of the death of GM Vugar Gashimov, who passed away at the early age of 27.

Vugar was one of the most talented players of our time, peaking at number 6 in the world, but above all he was a kind soul, a good friend and a cheerful person.

He made Azeri history by winning the crucial game in the European Team Championship in Novi Sad 2009, which secured the gold medal for his team.

Vugar played his last tournament in Wijk An Zee 2012, before he was diagnosed the cruel disease which plagued him for the rest of his life and finally separated him from chess and his loved ones.

On the board Vugar was known for his daring style as shown by his (successful) efforts to revitalize the Benoni opening. It is a sad coincidence that the name of this opening bears the most distinctive features of his life: an extraordinary creativity and a gloomy fate.

I would dare to say that Vugar was a good friend of mine and I think that this video summarizes the enormous void that his untimely death has left in the hearts of those who had the luck to meet him.

Clash of the Titans

(16) Portisch, Lajos
- Smyslov, Vassily[E15]

Amsterdam Interzonal(8),
1964.05.29

GM Kamil Miton
Best rating: 2655

1.c4 ♘f6 2.d4 e6 3.♘f3 b6 4.g3 ♘a6

5.♞a4 is one of the options. White has many other moves:
[5.b3 ; 5.♞c2 ; 5.♞b3]

5...c6 Not the main line. The idea of this move is to transpose to Catalan structures after d5. The most popular move now is [5...♘b7 6.♘g2 c5! Black immediately fights for the center. 7.dxc5 (7.O-O 7...cxd4 8.♘xd4 ♘xg2 9.♞xg2 ♞c8 Black has a good version of the hedgehog structure with less pieces and a badly placed queen on a4. 10.♘c3 ♞b7+ 11.f3 ♘e7 12.e4 O-O 13.♘e3 ♞c8⇐) 7...♘xc5 (7...bxc5 8.♘c3 ♘e7 9.O-O O-O 10.♞d1 d6 11.♘f4) 8.O-O O-O 9.♘c3 ♘e7 10.♞d1 ♘a6 11.♘f4 ♘c5

12.♞c2 ♞c8 and we can find a lot of games in this position where objectively Black should equalize the position after reducing the material by playing Ne4 or pushing d5.]

6.♘c3 ♘e7 7.♘g2 O-O 8.♘f4 Because of the Bxb8 threat Black plays

8...d6!? [8...♞c8 9.O-O d5 10.♘e5 ♞b7 (10...♘xc4 This trick now works because of 11.♘xc4 b5 12.♘xb5 cxb5 13.♞xb5+—) 11.cxd5 cxd5 and now White can try the thematic plan with the idea to take control of the c-file by playing Rfc1 or because of the bad queen on b7 it is possible to break in the center with Re1-e4.]

9.♞c1 ♞c8 10.O-O ♘bd7 11.♞fd1 ♘b7

12.e4+= White has a clearly better position thanks to his space advantage.

12...♘h5 13.♘g5?! It was much better to keep more pieces on the board. [13.♘e3+=]

13...♘xg5 14.♘xg5 ♘hf6 15.♞a3 h6 16.♘f3 [16.♘xe6!? 16...fxe6 17.♞xd6 White has compensation and e5 is coming next.]

16...c5

17. ♖e1?! A very strange move in my opinion. Why not play the logical [17.d5 with the idea to limit the black bishop. The white queen is temporarily out of play but thanks to his space advantage White has a slightly better position.]

17...a6! with the unpleasant idea b5, so White is forced to take on c5.

18. dxc5 dxc5 19. ♖b3 ♖c7 20. f4

20...e5! Black is taking control over the dark squares.

21. ♘d5 [21.f5 21...b5! (21...♘b8 This typical plan of transferring the knight to d4 is too slow here. 22. ♘d5! ♙xd5 23. exd5 ♖d6 24. ♘d3 Nf2-g4-h4 is coming next with an unclear position.)

22. cxb5 c4 with Qb6-Ng4 next and Black has the initiative.]

21... ♙xd5 22. exd5 ♖d6 23. ♘d3 ♖fe8 24. ♖e1 exf4 25. ♘xf4 ♘e5 26. ♖c3

26...b5! Thanks to this tactical trick Black is going to open the b-file and create a weak pawn on c4.

27. b3 [27. cxb5? 27...axb5 28. ♖xc5 ♖xc5+ 29. ♖xc5 ♘f3+--+]

27...bxc4 28. bxc4 ♖ab8 29. a3 ♖e7 30. ♖e2 ♖be8 31. ♖ce1 ♘ed7 [31... ♘fd7!? with the idea Nb6.]

32. ♙h3! White is hoping to activate or to exchange his bad bishop.

32... ♖xe2 33. ♖xe2 ♖xe2 34. ♘xe2 ♖e5 35. ♖d3 [35. ♙xd7 35... ♖xe2! 36. ♙f5 ♖f8 and Black is better thanks to his better pieces.]

35... ♖a1+ 36. ♙f1 ♘g4 [36... ♘e5?! 37. ♖c3 and without the queens, White's chances to save the position are higher.]

37. h3 ♘ge5 38. ♖c3 ♖b1 39. ♘f4 [39. ♘c1!?]

39...♔e4! A strong move! Black puts the queen on the most active square.

40.♖f2 g5 [40...♟b6 just wins the pawn. 41.d6 (41.♙g2 41...♔f5) 41...♟c8+]]

41.♟h5 f5 Black is improving his position.

42.♔b3 [42.♙g2!? 42...♔d4+! is the more accurate move. (42...♔xc4

43.♟f6+! ♟xf6 44.♔xe5 ♔d4+ 45.♔xd4 cxd4 46.♙e2 ♟f7 (46...♟e4 47.g4) 47.♙d3 ♟h5 48.♙xd4 ♟xg3 49.♙e5 and White has counterplay thanks to his active pieces.) 43.♔xd4 cxd4 and White is not able to do anything. Black completely controls the position and after Kf7-Ke7-Kd6 or Kf7-Kg6 he should easily win the game.]

42...♔d4+ 43.♙g2 ♔d2+ 44.♙g1 ♟f7 Black is not in a

hurry. [44...g4 45.♙g2 ♔e1+ 46.♙h2 ♔e2+]]

45.♙g2 ♔e1+ 46.♙f1 ♔d2 47.♙g2 ♔e2 48.g4 f4 [48...fxg4 49.♔b1 ♙e8+ and the black king will escape to c7.]

49.♔b1 White is looking for his chances. Also interesting was [49.d6!? with the idea to activate the pieces somehow. 49...f3 50.♙f1 ♔d2 51.♟g3 ♔xd6 52.♟f5]

49...♔e3+ 50.♙h2 ♔d3 51.♔b7 ♔d2 52.♙g1 f3 53.♙f1 ♔e3+ 54.♙h1 ♔e1 55.♙g1 ♔e3+ 56.♙h1 ♔f2 57.♔b1 ♟g8 [57...♟xc4 58.♔h7+ ♙e8 59.♔g8+ ♙e7+ and Black is winning because the king escapes from the checks.]

58.♔a1 ♟f8 59.d6 ♟f7 Black is just waiting for a mistake and in the worst case Smyslov can always win the d6 pawn.

60.♔d1 ♙e8 61.♟g7+ [61.♔b1]

61...♙d8 62.♔b1 [62.♟f5 62...♟xc4+]]

62...♟xg4! The decisive blow at last!

63.hxg4 [63.♟e6+ 63...♙c8+]]

63...♔h4+ 64.♙g1 ♔g3+ and after 65.Kh1 f2 White won't be able to avoid mate. **0-1**

◇ Surprise section / study	32
◇ Solutions	33

Editorial Preface

And of course once again the whole chess world has its eyes on a little Dutch town called Wijk aan Zee.

After a bad start, when he lost to Wojtaszek, Carlsen won 6 games in a row! This is unreal, but it is a fact and he is now leading with a full point advantage and a score of 7.5/10. The 2-3rd places are shared by Vachier-Lagrave and Wesley So, both on 6.5/10. The two young players are playing attractive and fighting chess, which is very nice to watch.

At the end of the cross table we find Jobava, with a catastrophic result of 1.5/10, as well as Saric and Hou Yifan, both on 3/10.

All in all Wijk aan Zee is a very fighting tournament with almost no short draws and a lot of interesting games. A fantastic event to follow!

The B group sees a fight between Wei Yi and Navara, who are both on 8/10, an amazing score! It is going to be very exciting to follow who of those 2 players will qualify for next year's A group.

Now let's come to the upcoming events of the next few weeks:

The Grenke Chess Classics 2015, a round robin featuring Carlsen, Caruana, Aronian, Anand, Adams, Bacrot, Naiditsch and Baramidze are going to start on the 1st of February.

And the huge Gibraltar open, featuring many GMs over 2700, is going to begin already on 26th of January.

So a lot of chess fun is guaranteed in the next week and of course we should enjoy the end of Wijk aan Zee, as maybe some surprises are still to come... We wish you a lot of chess fun with the current issue.

Best wishes,

Arkadij Naiditsch & Csaba Balogh

Two best games of the past week

**(1) Caruana, Fabiano(2820)
- Carlsen, Magnus(2862) [B31]**

77th Tata Steel GpA(6.4),
2015.01.16

GM Csaba Balogh
Best rating: 2672

A very tough battle between the current World Nr.1 and Nr.2. The World Champion manages to outplay his rival in a very complex middlegame.

1.e4 c5 2.♘f3 ♘c6 3.♙b5 Caruana decides to avoid the open Sicilian and plays the recently popular Rossolimo variation.

3...g6 4.♙xc6 dxc6 In this system, White gives up his bishop pair in order to inflict some damage to the pawn formation. He intends to keep the structure closed to avoid the two bishops starting to work.

5.d3 ♙g7 6.h3 This is basically the initial position, where Black has a wide range of playable setups.

6...♘f6 7.♘c3 b6 8.♙e3

8...e5 This is practically the novelty. Well, to be honest

my personal opinion is that the World Champion mixed up something and this move is a blunder... [I guess, he wanted to go for the line with 8...O-O 9.♙d2 e5]

9.O-O Refusing the challenge... Of course it is easy to understand Caruana's logic, that a sacrifice in the opening played instantly by Carlsen should be sound and he searches for an alternative to continue the game with. [It would be interesting to know what Carlsen had in mind against 9.♘xe5! 9...♘xe4 Otherwise White is just a pawn up.]

10.♙f3! This is the key and suddenly the attack against the f7 pawn is very unpleasant! 10...f5 (10...♙xe5 simply leaves Black in a bad position after 11.♙xe4 f6 12.♙f4 O-O 13.♙xe5 ♖e8 14.O-O ♗xe5 15.♙xc6± without sufficient compensation for the pawn.) 11.♙f4! An important move to retain the advantage. (Black is fine after 11.dxe4 11...♙xe5 12.exf5 O-O 13.♙xc6 ♙xf5 The two bishops are working perfectly now. Black should get back the c2 pawn and equalize.) 11...♘xc3 (11...♙e7 12.dxe4 ♙xe5 13.O-O-O± is just an extra pawn for White.) 12.♙xc6+ ♙d7 13.♘xd7 There are some complications, but White ends up being better in the end. 13...♖c8 14.♙e6+ ♙e7 15.♙xe7+ ♙xe7 16.♙e5! The last important move and White saves his extra pawn. 16...♙xe5 17.♘xe5±; White can also play 9.♙d2 when Black does not have anything better than 9...♙d6 or 9... O-O, but both should

transpose to the normal 8...0-0 variations, therefore I cannot figure out the subtle point of starting with 8...e5. (9...h6 is a common idea in some other lines to prevent the trade of the bishops on h6, but here it does not seem to work because of 10.♘xe5 and after 10...♘xe4 11.♘xe4 ♘xe5 12.♙h6! ♙xb2 13.♚b1 ♙e5 14.0-0 followed by Rfe1 with a very strong attack!) 10.♙h6]

9...0-0 10.a3 A common plan in this variation. White would like to undermine the queenside with b4, which would yield him the upper hand in the center and some pressure on the a-file against the a7 pawn. [10.♘xe5 is already a different story. Black can play 10...♘xe4 and the f7 square is safe, so Qf3 makes no sense. White should take back on e4, but then after Bxe5 the exchanges of the central pawns favor Black, because it opened up the position for the two bishops. 11.♘xc6? does not work since after 11...♘xc3 12.♘xd8 ♘xd1—+ Black takes one more piece.]

10...♚e7! Preventing b4 and protecting the e5 pawn. [On 10...a5 a known reaction is 11.♘a4! refreshing the positional threat of b4, based on the new weakness on b6. 11...♘d7 parrying b4 by protecting the b6 pawn. 12.♚d2! looking into two directions. It supports b4 and also the trade of the bishops with Bh6.]

11.♚b1 A consequent continuation of the plan. It also made sense to play Qd2 and Bh6.

11...♘h5 Carlsen decides to launch his counterplay on the kingside with f5, making use of the fact that the white queen has gone to the other side of the board. [The prophylactic 11...a5!? also made sense now, because after 12.♘a4 ♘d7 it is not easy to execute the b4 break well and otherwise the queen gets a bit misplaced on b1.]

12.b4 f5 Black goes all in on the kingside! He basically admits

his positional defeat on the queenside and pins all his hopes to his attack against the g1 king. This idea is known in many lines of the King's Indian variation, but on the other hand it is quite atypical for Carlsen's style. [White is better after 12...cxb4 13.axb4 threatening to take on b6. 13...♙e6 14.♚a6 f5 15.♚a1! Refreshing the Bxb6 idea. Black should really do something now on the kingside, but it is unclear how he could break through. 15...fxe4 16.♘xe4 ♙xh3 (16...♚xf3 is promising at first sight, but after 17.gxf3 ♙xh3 18.♚e1 the white pieces seem to cover all the threats. I don't see any adequate counterplay for the exchange.) 17.♘fg5! ♙c8

18.♙xb6! This small combination wins material for White. 18...♙xa6 19.♙c5 White just wants to take on f8 and a6, while after 19...♚b7 20.♘d6!± followed by Qa2 check and Nf7.]

13.bxc5 f4 14.♙d2 bxc5! There was no way back, Black had to destroy his pawn structure on the queenside and hope that the counterplay with g5-g4 will be coming in time. The game becomes extremely sharp now. [Keeping the healthy structure with 14...♚xc5 allows White to enter a clearly better endgame after 15.♚b3+! sending the king a square further from the center. This is quite useful before trading the queens. 15...♙h8 16.♚b4! ♚xb4 17.axb4± with excellent prospects for White. He might double his rooks on the a-file or put pressure on the e5 weakness with let's say Na4 (threatening on b6), Bc3

and Nb2-c4.]

15. ♖b3+ [The alternative was 15. ♘a4 with the idea of getting the queen to c3. Black must launch his counterplay again with 15...g5! 16. ♖b3+ ♔h8 17. ♖c3 (Preventing the g4 idea with 17. ♘h2 is very risky. Black gets a very strong attack after 17...f3! 18. ♘xf3 ♜xf3! 19. gxf3 ♘xh3 20. ♜fe1 ♘f4 The white pieces are driven to the queenside, he can hardly defend his naked king like this. 21. ♜ab1 ♖f6—+ The direct threat is Ne2 followed by Qxf3 with an inevitable mate on g2.) 17...g4 18. hxg4 ♘xg4 and just like in the game, Black gets a very strong attack.]

15... ♘e6 16. ♖a4 Winning the c6 pawn would give a great square for the knight on d5, therefore Black must waste a tempo before launching his attack.

16... ♜ac8 17. ♖a5

17...g5! No choice! Black committed himself to this idea when he accepted getting doubled c-pawns. [The positional alternative was 17...c4 getting rid of one of the weaknesses, but Black is still left with many others. 18. ♘a4! threatening to win an exchange with Bb4, therefore Black must play 18...c5 19. ♘b2 cxd3 20. ♘xd3 and Bc3 is coming next with too much pressure on the e5 pawn.]

18. ♘a4 [Just like in the 15.Na4 line, preventing g4 with 18. ♘h2 is too slow. Black's attack breaks through after the

following exchange sacrifice: 18...f3! 19. ♘xf3 ♜xf3! 20. gxf3 ♘xh3 21. ♜fe1 g4! 22. fxf4 ♖h4—+ Black is crushing.]

18...g4 19. hxg4 [White could also have started with 19. ♖xc5 The queen is hanging and after the exchange the e6 bishop gets under attack, but after 19...♖f6 we will reach the game by transposition.]

19... ♘xg4 20. ♖xc5 ♖f6 Caruana was already quite down on time and it is really unpleasant to face such an attack.

21. ♘h2 [The alternative was 21. ♜fb1 with the idea to open an escaping route for the king to the center. Black must lead the attack precisely to get enough compensation. 21...♖g6 22. ♔f1 ♘g3+! A spectacular sacrifice, trying to open the f-file for the rooks. 23. ♔e1! Black can force a draw here by playing (White gets mated after 23. fxf3? 23...fxg3 24. ♔e2 ♖h5! 25. ♜f1 It seems like everything is under control, but the truth is...

25...♖h2! 26. ♖g1 ♜xf3! 27. ♜xf3 ♘xf3+ 28. ♔xf3 ♜f8+ 29. ♔e2 (29. ♔g4 29...h5+! 30. ♔g5 ♘f6+! 31. ♔g6 ♖h4—+ Mate is coming soon.) 29...♜f2+ and White must give up his queen to avoid getting mated. 30. ♖xf2 gxf2—+) 23...♘xe4!? 24. ♖c4+ (24. dxe4 24...♖xe4+ 25. ♔d1 ♖xa4 is the point.) 24...♘e6 25. ♖xe4 ♘f5 26. ♖c4+ Both sides are forced to repeat the moves. (26. ♖e2 is too dangerous after 26...♖xg2 Qh1, Bg4 or e4 is coming...) 26...♘e6 27. ♖e4 Black cannot play for more

with 27...♔xg2? because suddenly White saves himself by playing 28.♔e2! ♕d5

29.♖g1! ♔h3 30.♖xg7+! ♔xg7 31.♔xe5+- Rg1 is coming next and White is the one who mates first.]

21...f3! Carlsen usually plays positional games, but we can see that he plays perfectly even when it comes to tactics.

22.♖xg4 ♔g6 23.♔e7! A nice defense! White drops the queen to g5 to protect the g2 pawn. [23.♖e3 23...♖f4+- White cannot defend against Nxg2 or Ne2 and Qh5 mate.]

23...fxg2 24.♖fb1 ♔xg4 25.♔g5! ♔e2 26.♔e3 The only move again!

26...♔g4 27.♔g5 A very interesting moment! As we can see, Black could repeat moves with Qe2, but of course with such a king on g1 one should think about more. The most natural decision would be to keep the queens on board and trying to mate with Kh8-Rg8 somehow.

27...♔xg5!? An extremely deep decision! Black decides to not repeat the moves, but to swap the queens off the board. He must evaluate the consequences well, because the material is balanced, he must forget about giving mate and the g2 pawn might fall, the rook might invade on b7 and the knight is also just one move away from an excellent outpost on c5. However Carlsen believes that saving the pawn on g2 with Nf4 will give him chances to continue playing for the win. [It was quite natural to play something like 27...♔f3?! 28.♔xg2 ♔f7 keeping the queens and intending to mate with Kh8-Rg8. However the counterplay comes very fast: 29.♖c5 ♖c7 (29...♔h8 30.♖b7 is also good for White!) 30.♔h1! ♔h8 31.♖g1± White is a pawn up and he seems to consolidate.]

28.♕xg5 ♖f4 29.♕xf4? The decisive mistake. Caruana blunders the 31st move! [White should have parried the Nh3 threat by playing 29.♔h2 Black has the option to force a repetition with 29...♕f6 (Or he can continue pushing with 29...h6 30.♕h4 h5 with the idea of Bf6-Bg3 and h4! White is just in time to play 31.♖g1! ♕f6 32.♕g3 Black must lose a tempo on moving with his king, because after Bxf4 exf4 the g2 pawn is hanging with a check. 32...♔f7 33.♖ae1 and White holds, because he is ready to take on f4 and g2 as the a1 rook is not hanging anymore.) 30.♕h6! It is important to not allow the rook to the h-file. 30...♕g7 31.♕g5]

29...exf4 30.♔xg2 [30.c3? 30...f3—+ followed by Rf4-h4 is over.]

30...f3+ 31.♔f1

31...♖f4!! An amazing move! Black does not grab the exchange, but saves his bishop to help in different kind of mating ideas against the white king. It is a bit shocking, but White cannot avoid getting mated. [The automatic move for most of the players would have been 31...♙xa1 32.♖xa1 and start to think here. The game is about even, White plays Ke1-d2-e3 and brings his knight back to the game through c5. Rh1 perfectly stops the h-pawn and the e-pawn might give him excellent counterchances. The f3 pawn is also quite weak, or at least it is quite bad for Black to pin one of his rooks to the protection of that pawn..]

32.c3 [The alternative 32.♔e1 does not help. Black prevents the Kd2 idea by playing 32...♞d8!! This is the very subtle point of the previous move and Black continues haunting the king with Rh4! since Kd2 is now met by Rxe4! 33.♘c5 (33.♔d2 33...♞xe4 34.♘c3 ♙h6+ 35.♔d1 ♞h4—+ and mate is coming next! In such positions we can see that the bishop is better than the a1 rook, but still it is very hard to refrain from grabbing the exchange.) 33...♙c3+ 34.♔f1 ♞h4 35.♔g1 ♙h8—+ and Rg8 is coming with mate.]

32...♞d8!! The same idea as in the 32.Ke1 line. Black cuts the white king from his escaping route to the center of the board by attacking the d3 pawn.

33.d4 [33.♞d1 loses to 33...♞h4 34.♔e1 (34.♔g1 34...♞d6—+) 34...♙h6!—+ and mate on h1.]

33...♙h6 This is also good enough, but... [An even more beautiful win would have been 33...♙xd4!! 34.cxd4 ♞h4 35.♔e1 (35.♔g1 35...♔h8—+) 35...♞xd4—+ and mate on h1!]

34.♔e1 ♞xe4+ 35.♔d1

35...c5!! Extremely powerful play! One mistake would let the advantage slip away, but the most direct move always deprives White from consolidating and getting his rooks into play. [On the direct 35...♞e2 36.♞b2 holds.]

36.♔c2 [36.♟xc5 is already met by 36...♖e2 and Black penetrates on the 2nd rank. 37.♖b7 ♜de8—+ Rd2 is threatening with mate in 2.]

36...cxd4 37.♔d3 ♜e2 38.c4 [38.cxd4 also loses to 38...♜d2+ 39.♔c3 ♜2xd4 40.♟c5 ♟g7—+ The king is just too weak...]

38...♜xf2 [It was slightly more precise to send the king towards the center first with 38...♜d2+ 39.♔e4 ♜xf2—+]

39.♜d1 [White could have prolonged his loss for a while by trading rooks: 39.♖b2 39...♜xb2 40.♟xb2 but of course the outcome is out of question... 40...♜b8 41.♜g1+ ♟g7 42.♟d1 (42.♔c2 42...♜e8—+) 42...♜b3+—+]

39...♜e2 White resigned! A very exciting game! **0-1**

(2) Aronian, Levon(2797) - Jobava, Baadur(2727) [A56]

77th Tata Steel GpA(9.7),
2015.01.20

GM Arkadij Naiditsch
Best rating: 2737

It has been a very sad tournament for Jobava, who started with a very unlucky loss to Ivanchuk and continued often being too optimistic about positions where a draw would have been the expected result. The tournament has also been going anything but greatly for Aronian, who was on -2 at this point, Anyhow, in the current game White is showing excellent preparation with a long-term mating attack idea and precise play when it came to "taking the point". This game is an excellent example on how to play for "isolation of your opponent's pieces from the main action on the board".

1.d4 ♟f6 2.c4 c5 Jobava likes Benoni structures a lot and has already played a lot of games in them. It is a positionally dangerous opening for Black, but very dynamic and Jobava plays it excellently and has shown good results in it. This time, things will go very badly for Jobava though....

3.d5 g6 There are a lot of move orders as for example Black can start with 3...e6, but Jobava usually goes for 3...g6.

4.♟c3 ♟g7 5.e4 0-0 This move order is a big provocation for White to immediately push 6.e5, but things are very unclear after this move. Black is launching a fast attack with Ne8 and then d6, trying to crush White's center.

6.♗d3 A very safe move and in many lines the bishop is standing perfectly on d3.

6...e6 7.h3 This move might look slightly strange, but h3 is very tricky. In case of exd5 exd5 Black usually continues with d6 and in case the white knight is placed on f3- which is also usual- the h3 move is needed anyway because Black's idea is to play Bg4 and Bxf3.

7...exd5 8.exd5 a6 Jobava does not hurry with the d6 move and tries to threaten the immediate b5 first.

9.a4 A very consequent move. On one hand White is stopping Black's play with b5 but on the other hand a4 gives the b4 square up completely.

9...a5?! Very creative play by Black, but Jobava clearly underestimates the deep idea of White, which we will see already in the next few moves. [9...d6 10.♘f3 would lead to the usual position.]

10.♘ge2! This little move is actually very strong. It is clear that White's play has to be on the kingside, where he has more space and to develop the knight to f3 just doesn't make any sense. Usually the knight must go to f3 because Black plays d6 and Nbd7 with the idea of playing Ne5 next, but now it is obvious that after the a5 move Black is planning to get his knight to b4, so the knight will be perfectly placed on e2.

10...♞a6 Jobava follows his plan.

11.♗g5 This move looks a bit strange to me. Of course it is not a bad one, and the bishop is nicely placed on g5, provoking Black into playing h6 and making a weakness on the kingside, but why not just castle first?!

11...♞b4

12.♗b1 Of course White does not give Black a chance to play Nxd3. The white rook on a1 is looking like it is passively placed, but it can very quickly be activated via a3.

12...b6 In my opinion this is also a move into the wrong direction. Probably 12...d6 would have been a safer option.

13.O-O ♗a6 Jobava tries to provoke the b3 move, after which White would not have the idea of playing Ra3 anymore and the rook would have to stand passively on a1.

14.♞b5 A very logical move.

14...h6 Now White needs to decide whether to go to h4 or stay on the c1-h6 diagonal.

15.♗c1! In my opinion this is another great decision by Aronian. One can ask why not play 15.Be3, but the answer is easy: White is planning Ra3-Rg3 and an attack on the black king. Of course 15.Bh4 would not have been a bad option

either, but to keep the bishop looking at the black king is just too tempting.

15...♙xb5 16.axb5 ♘e8 Black is trying to make use the fact that the d6 move was not played and get the knight there, but again, the black king is now almost without defenders. Another very important key is that the black knight is standing nicely on b4, but all the white pieces are going "around" the knight, making its mission almost useless.

17.♖a3 Here comes the rook!

17...♘d6

18.♖g3! and of course White should not care about the c4 pawn any longer.

18...♘xc4 Considering his tournament position, can we blame Jobava for taking on c4 and risking getting mated? No we can't!

19.♘f4 All white pieces are joining in the attack!

19...♘e5 After this move Black does not even have any practical chances anymore. [The position was probably lost anyway, but it was worth it to try 19...♘xb2 20.♙xb2 (20.♖d2 also seems to be a good move. 20...♘c4 21.♖e2 and White is trying to get a similar position as in the game,

connected to Nh5 ideas. 21...♘e5 (21...♘d6 22.♘h5) 22.♘h5 and White's attack is very strong.; 20.♖g4 doesn't lead anywhere. 20...♖g5! A nice move! 21.♘xg6 ♖xg4 22.♘e7+ ♙h8 23.♖xg4 ♘d3 and the position is very unclear, since the black a-pawn can become very dangerous.) 20...♙xb2 How to continue that attack now?! 21.♖h5 (Another move that leads to very unclear play is 21.♙xg6 21...fxg6 22.♘xg6 ♙g7 and it is hard to say who is better here.) 21...♙g7

22.♘xg6! To see this kind of line from that far is actually not easy at all. 22...fxg6 23.♖xg6 ♖f7 24.♖h7+ ♙f8 and White now has the winning move 25.♙g6! The decisive factor once again is that the black knight on b4 is totally out of the game. 25...♖f6 26.♖e1 and White will mate very soon.]

20.♘h5! Now the game is basically over. The bishop on g7 is Black's main defender, and once it is gone, the position will collapse like a house of cards...

20...♖h4 [After 20...gxh5 21.♙xh6 ♘g6 22.♖xh5 White is winning as he has two ideas in mind, to play Bxg6 or f4-f5.]

21.♘xg7 ♙xg7 22.♖e1 Another nice move. White brings his other rook into the attack.

22...d6 23.♖e4 Black's position is on the verge of being lost.

23...♔d8? After this move the game is over. [A tougher defense would have been 23...♔f6 and now White has a couple of different moves, one of them being 24.♔d2 ♖h8 and now comes the very strong

25.b3! with the idea of playing Bb2 and f4. I don't see many chances for Black to survive the attack.]

24.♔h5 and the game is just over! On 24...Rh8 25.Rxe5 dxe5 26.Bxg6 is just mating. The conclusion of this game is simple: White went around the pretty looking knight on b4 and simply mated Black. A very constructive game from a positional point of view! **1-0**

The K-Files.

Accelerated Queen's Indian, ~~3.f3~~ 3.Nc3

GM Alexander Khalifman
 FIDE World Chess Champion (1999)
 Best rating: 2702

GM Alexander Khalifman continues his review of the Queen's Indian Accelerated. Here is a reminder on the contents of the series:

Part I (Issue #150). Refuting here and now 3.f3, etc.

Part II (Issue #151). Solid and classical 3.Nf3

III & IV (Issues #152-153). Good old central setup 3.Nc3

No Name Opening, Part III

(3) 1.d4 Nf6 2.c4 b6 3.Nc3 [A50]

1.d4 ♖f6 **2.c4** b6 **3.** ♘c3 ♙b7 **4.f3** Saemisch-style. This variation is quite dangerous for Black - but not because of what is supposed to be the main line! [4. ♖f3 The most popular and natural developing move. However, it doesn't pretend to refute Black's setup because it's possible to transpose to the Queen's Indian (4...e6). And in my

opinion this is the most reliable way. Enough is enough: the unconventional move order allowed Black to avoid Nimzo, Catalan and the main line of Queen's Indian with 4.g3. The alternatives, of course, do not lose instantly, but leave White with somewhat better prospects. 4...d5 (4...e6! leads to the Queen's Indian 4.Nc3 Bb7 line which is, however, not the subject of this article; 4...g6 5. ♖c2 The most dangerous move in my opinion. Now Black has a choice between unpleasant versions of the Gruenfeld and the King's Indian (5.d5 5... ♙g7 6.e4 d6 (6...O-O was the move order chosen by Shakhriyar Mamedyarov 3 times, but just in blitz... 7.e5 ♘g4 8. ♘g5! is very unpleasant for Black 8... ♖xe5 9.f4 h6 10. ♘h3 ♖ec6 11.dxc6 ♘xc6 12. ♙d3±) 7. ♙d3 (7. ♙e2 7...O-O 8.O-O e6!? 9. ♘d4 ♗e8 10.f3 Wang Hao - Mamedyarov Beijing blitz 2014 10... ♘h5±(10...c6)) 7...O-O 8.O-O e6 (8... ♘a6) 9. ♗e1 ♘bd7 10. ♙g5 h6 11. ♙d2 ♗e8 White has a space advantage, but Black's dynamic resources are not to be underestimated (Aronian - Mamedyarov Beijing blitz 2014); 5.g3 was analysed before in 3.Nf3 section) 5...d5 (5... ♙g7 6.e4 d6 (6...O-O 7. ♙e2 ♘c6 8.O-O) 7. ♙e2 O-O 8.O-O ♘bd7 9. ♗d1 ♗c8 10. ♙f1 What to say?! In my opinion it's a dream version of the Classical King's Indian for White. If somebody feels fine playing it with Black then it's probably better to start with 1.d4 Nf6 2.c4 g6 (Wojtaszek - Mamedyarov Beijing blitz 2014)) 6. ♙f4! The smartest choice. In Gruenfeld with Bf4 Black's counterplay is usually connected with the idea c5 dxc5 Qa5. In this "Neo-Gruenfeld" the black queen doesn't come to a5 - so he faces problems. 6... ♙g7 7.e3 O-O Gruenfeld - Reti Moscow 1925 8. ♗d1! N c6 9. ♙e2 ♘bd7 10. ♗b3+= Black's position is solid but quite passive - not exactly what one is aiming for.) 5. ♙g5! Only this active move puts 4...d5 in doubt

5...♖e4 this leads to rather unusual positions, but still is not enough to equalize (5...dxc4 6.e3 (6.e4 6...♗xe4 7.♗xe4 ♗xe4 8.♗xc4 ♗d5) 6...e6 7.♗xc4 ♗e7 8.O-O O-O 9.♖e2 ♗bd7 10.♖fd1+= gives White a very comfortable edge (Fernandez - Caputo Chivilcoy 1987); 5...e6 6.cxd5 exd5 7.♖a4+!? The immediate check seems to be even more promising than (7.e3 7...♗e7 8.♖a4+ c6 9.♗d3 O-O 10.O-O ♗bd7 11.♗e5+= Johnsen - Finjord Denmark 1993) 7...♖d7 (7...♗c6 the bishop is obviously misplaced here 8.♗xf6 ♖xf6 9.♖b3±; 7...♗bd7 8.♗e5±) 8.♗xf6 ♖xa4 9.♗xa4 gxf6 10.e3+= compared to a well-known Carlsbad endgame (1.d4 d5 2.c4 e6 3.Nc3 Nf6 4.cxd5 exd5 5.Bg5 c6 6. e3 Bf5 7.Qf3 Bg6 8.Bxf6 Qxf6 9.Qxf6 gxf6) here Black's light-squared bishop is much worse on b7 (Ward - Hunt England 2000)) 6.cxd5 ♗xc3 (6...♗xg5?! 7.♗xg5 e6 8.♗xf7! This is big difference with the seemingly similar Gruenfeld line 8...♖xf7 9.dxe6+ ♖xe6 10.e4± with a terribly strong attack (Nikolic - Djuric Bled 1991)) 7.bxc3 ♖xd5 8.g3!? N (8.♖c2 Gelfand - Djuric Yugoslavia 1997 8...♗d7 9.e3 e5!? is less clear) 8...e6 9.♗g2 ♖a5 10.O-O± and White's development lead is an important factor; 4.d5 logical approach. However, concrete lines prove that White is unable to preserve his strong center. Of course, Black has to play precisely. 4...e6 5.a3 This position is also quite important

for the theory of the line 1.d4 e6 2.c4 b6 3. Nc3 Bb7 4.a3 (5.e4 5...♗b4 6.♗d3 (6.e5 6...♗e4 7.♖g4 ♗xc3 8.a3 ♗f8 9.bxc3 ♖e7+) 6...♗xc3+ 7.bxc3 d6 (7...♖e7) 8.♗e2 ♗bd7 9.O-O ♗c5 10.♗g3 O-O White's pawn structure is seriously weakened and his kingside attack chances are rather unclear. Black is not worse at least (Bacrot - Mamedyarov Beijing blitz 2014)) 5...♗d6 Black doesn't have to hurry with exchange on d5 (5...exd5 6.cxd5 ♗d6 7.g3) 6.♗f3 (6.g3 6...♗e5 (6...O-O 7.♗g2) 7.♗d2 (7.♗g2 if White allows to spoil his pawn structure he must forget about the opening advantage 7...♗xc3+ 8.bxc3 O-O 9.♗h3 d6 10.O-O Kalantarian - Degraeve Issy 1995 10...♖e7!?+=) 7...O-O 8.♗g2 ♗a6 9.♗h3 exd5 10.cxd5 c6 11.dxc6 (11.♗f4 11...cxd5 12.♗fxd5 ♗xd5 13.♗xd5 ♗c6 14.♖b3 ♗c7) 11...♗xc6 12.O-O ♖e8 13.♖c1 ♗xg2 14.♗xg2 d5=) 6...O-O 7.g3 (7.♗g5 7...h6 8.♗h4 ♗e7! This nice retreat provides Black good game. 9.♗g3 d6 10.e4 ♗h5 with at least equal chances due to bishops' pair (de la Rocha - Forintos Cattolica 1994); 7.e4 7...exd5 8.exd5 c6 9.♗e2 (9.dxc6 This modest exchange promises White absolutely nothing 9...dxc6 10.♗e2 ♖c7 11.O-O ♗bd7= Bertok - Planinc Zagreb 1972; 9.♗g5 9...h6 10.♗h4 cxd5 11.♗e2 (11.cxd5 11...♖e8+ 12.♗e2 ♗a6 13.O-O - 9. Be2 13...♗c5∞14.♗d4 ♖c8 15.f4 ♗f8) 11...♗e7! and White's compensation for the pawn might be enough only to equalise (Franco Alonso - Edouard Spain 2013)) 9...cxd5 10.cxd5 ♗a6 11.O-O ♖e8 12.♗g5 h6 13.♗h4 ♗c5 Black pieces are active and it's perfectly unclear if the pawn on d5 is strong or weak 14.♗d4 ♗e5 (14...♖c8 15.f4 ♗f8) 15.♗c4 ♖b8 16.f4 ♗xd4+ 17.♖xd4 ♗fe4∞ Knaak - Planinc Warsaw 1979 18.♖ae1) 7...c6 8.♗g2 (8.dxc6 is too shy 8...dxc6 9.♗g2 ♖e7 10.O-O ♗bd7= Gyimesi - Plaskett Gibraltar 2003) 8...cxd5 9.cxd5

9...a6! This tricky move order solves the opening problems. (Both 9...exd5 10.g5+; and 9...xd5 10.g5+ leave Black under some pressure) 10.O-O (The ambitious 10.b5 10...b8 11.d6 is quite risky as well (11.dxe6 11...dxe6=) 11...c5 12.O-O a6 13.c3 d8 14.b4 e4 15.xe4 xe4 16.f4 f6 and the pawn d6 is gone. White will have some compensation of course but it's hard to believe that it will be enough for more than draw) 10...exd5 (10...xd5 is also quite playable 11.xd5 exd5 12.b4 c7 13.b2 e8= White has enough for a pawn but definitely not more (Blake - Galvin email 2012)) 11.h4 c7 12.e4 e5 13.xd5 fxd5 14.exd5 f6= and Black is not worse at least (Zalkind - Birnboim Israel 2013); 4.g5 4...e6 (4...g6 is an interesting alternative 5.f3 d5! this is necessary; otherwise it's just a fairly unpleasant version of King's Indian Saemisch 6.cxd5 (6.xf6 6...xf6 7.cxd5 xd5 8.e4 b7 9.c4 g7 10.ge2 O-O=11.O-O f5 12.exf5 c6 13.fxg6 hxg6) 6...xd5 7.e4 xc3 8.bxc3 g7 9.d2 d6!/? with standard Gruenfeld counterplay (Baetel - Vallejo Plovdiv 2008) 10.c4 c5) 5.e3 (after the active 5.e4 it's White who has to play carefully to maintain the balance 5...h6 6.xf6 xf6 7.f3 (7.a3 7...d6) 7...g5!? looks like a decent version of Trompovsky; 5.f3 leads to a Queen's Indian line where Black is doing well) 5...h6 6.h4 e7) 6.c2 (6.f3 Queen's Indian again) 6...h6 7.h4 c5 8.dxc5 bxc5 9.f3 d6 10.e2 bd7 11.O-O O-O= Karpov - Polugaevsky Bugojno 1980]

4...d5 In a certain sense the only move, Otherwise White gets strong center for free. [4...c6 5.d5 e5 6.e4 e6 7.f4 g6 8.e5 g8 9.f3+= S.Saric - Egorov Novi Sad 2014; 4...e6 5.e4 d5 6.cxd5 exd5 7.e5 fd7 8.f4 c5 9.f3+= Saemisch - Helling Berlin 1931]

5.cxd5 xd5

6.xd5!? It seems that this exchange (although by far less popular than the traditional 6.e4) is the only way to put Black under pressure. The idea is rather primitive: White keeps the c-file open to create pressure on c7. Looks straightforward but sometimes works with a strong effect. Black has to play very carefully after it. [6.e4 6...xc3 7.bxc3 This is the traditional treatment. White hopes that the strong pawn centre would be enough to provide him better chances. However, Black has different ways to create adequate counterplay. 7...e6 This is the most solid way to play. Some next moves for Black are more or less automatic. (Be7 O-O c5 Nc6, etc.) White has a certain choice (first of all - what to do with his light-squared bishop), but it's unclear if he can achieve something tangible. (7...e5 this leads in many lines to messy positions which are quite far from standard. It seems that everywhere Black has good counterchances 8.dxe5 (8.e3 8...d7 9.c4 D.Gurevich - Peptan Mermaid Beach 1998 9...h4+!? 10.g3 h5 11.h4 f5=; 8.c4 8...exd4 9.cxd4 h4+

10.g3 ♖f6 11.♗b2 ♘c6⇒) 8...♞xd1+ 9.♔xd1 ♘d7 10.♙f4 g6⌘ Debashish - Ikeda Kolkata 2012; 7...g6 The Gruenfeld setup seems to be risky here. However, up to now nobody has managed to refute it. 8.♙e3 (8.♙c4 8...♙g7 9.♘e2 O-O 10.O-O c5 transposes to a Gruenfeld line which is assessed as quite satisfactory for Black (Botvinnik - Smyslov World Championship match (6) 1954)) 8...♙g7 9.♞d2 O-O (9...♞d6 10.♙c4) 10.♞d1 (10.h4 10...c5 (10...h5?! 11.g4 hxg4 12.h5→) 11.h5 (11.d5 11...♞d6) 11...cxd4 12.cxd4 ♘c6 13.♘e2 ♞c8⇒) 10...c5 11.d5 Kozul - Valsecchi Zagreb 2012 11...♘d7!? 12.♙h6 ♙xh6 13.♞xh6 ♞c7∞) 8.♙e3 (8.♙b5+ 8...c6 9.♙a4 ♙e7 10.♘e2 O-O 11.O-O c5; 8.♙c4 8...♙e7 9.♘e2 O-O 10.O-O c5=; 8.♙d3 8...♙e7 9.♘e2 O-O 10.O-O c5) 8...♙e7 9.♙b5+ c6 10.♙d3 (10.♙a4 10...O-O 11.♘e2 c5 12.O-O cxd4 13.cxd4 ♘c6=) 10...O-O 11.♘e2 c5 12.O-O ♘c6 13.♞b1 (13.♞c1 13...♞c8 14.♞d2 ♞d7=) 13...cxd4 14.cxd4 ♘b4 15.♙c4 ♞c8 16.♙b3 ♙a6= Khairullin - Vallejo Khanty Mansiysk rapid 2013]

6...♞xd5 7.e4 ♞d7 I believe this retreat is the most accurate [7...♞d6 the idea to prepare e7-e5 looks tempting, however... 8.♙e3 e5 (8...g6 9.♞c2! ♙g7 10.♞c1 ♙xd4? 11.♞a4+) 9.♘e2 ♞b4+ 10.♞d2 (10.♔f2 10...♞xb2) 10...♞xd2+ (10...♘c6 11.d5 ♞xd2+ 12.♔xd2 O-O-O) 11.♔xd2+= the resulting endgame is not automatically equal: White has a better structure and more active pieces. 11...♙d6 12.♔c2 O-O 13.♞d1 a6 14.d5 ♘d7]

8.♙e3 This move is more or less compulsory. The alternatives usually lead to move transposition. [8.♘e2 8...e6 (8...g6 fianchetto is playable here although not necessary 9.♙e3 ♙g7 10.♘c3 O-O 11.♞d2 ♘c6 12.d5 ♘e5 13.h3 ♞e8⇒) 9.♘c3 ♘c6 (9...♙e7 10.♙e3+=) 10.♙e3 - 8.Be3; 8.♙c4 8...e6 (8...g6 9.♙e3 - 8.Be3) 9.♘e2 (9.♙e3 - 8. Be3) 9...c5 (9...♙b4+ 10.♔f2 (10.♙d2 10...♙xd2+ 11.♞xd2 O-O 12.O-O c5= Euwe - Tartakower Stockholm 1937) 10...O-O 11.♙e3+=) 10.♙e3 - 8.Be3]

8...e6 [8...g6 In this case I wouldn't recommend the Gruenfeld setup. 9.♙c4 ♙g7 10.♘e2 O-O 11.O-O ♘c6 12.♙b5 a6 13.♙a4+= and the pressure becomes extremely unpleasant]

9.♙c4 [9.♘e2 locks the bishop on f1. Black can use it by increasing the pressure on d4. 9...♘c6! N (9...♙b4+ 10.♘c3 O-O 11.a3 ♙xc3+ 12.bxc3+= Korobov - Simonian Kharkov 2007) 10.♘c3 (10.♞a4 10...♙e7 11.♘c3 O-O=) 10...♞d8 11.d5 (11.♙b5 11...a6 12.♙xc6 ♙xc6 13.O-O ♙e7 14.♞c1 O-O=) 11...exd5 12.exd5 ♘b4 13.♙b5 c6 14.dxc6 ♙xc6 15.♞xd7+ ♞xd7 16.♙xc6 ♘xc6 17.♔e2 ♙b4=]

9...c5!? N The point. Black has to improve the pawn structure as soon as possible. [9...♙b4+ 10.♔f2 O-O 11.♘e2 c5 12.dxc5 ♞c7 13.♞d6 ♞xd6 14.cxd6 ♙xd6 15.♞hd1+=; 9...♘c6 10.♘e2 ♘a5 11.♙d3 c5 12.♞d2+= Baron - Nabaty Benasque 2012]

10.♘e2 [in the endgame after 10.dxc5 10...♙xc5 11.♙xc5 bxc5 12.♞xd7+ ♘d7 13.♔f2 ♔e7= Black's better development and more active pieces compensate for the relative weakness of the pawn c5.]

10...cxd4 11.♞xd4 ♙b4+ 12.♔f2 O-O 13.♞xd7 ♘xd7 14.♘d4 ♘e5 Black has to look for a concrete solution. Quiet development would leave him under pressure as the bishop b7 is substantially limited by the White's pawn chain. [14...♞ac8 15.♞ac1 ♞fd8 16.♞hd1 ♘e5 17.♙e2+=]

15.♙e2 f5! Here it is! Seems to work fine.

16.♘xe6 fxe4 17.♘xf8 exf3 18.gxf3 ♞xf8⌘ Black's counterplay is perfectly sufficient to keep the balance.

David vs. Goliath

Peter Zhdanov

Chief Editor of Pogonina.com

In this special column we are reviewing the most unexpected results that occurred last week. Players usually face opponents of a similar level. Considerably less frequent are situations when a significantly lower-rated player succeeds in beating a much stronger adversary.

The previous week has brought us 22 upsets. The number of moves ranges from 20 in Anatoliy V. Andreev (1958) - Nikolay Georgiev (1639), 0-1 to 67 in Wojciech Reza (2212) - GM Kacper Piorun (2523), 1-0. The highest-profile loss was FM Katashuk (2191) - GM Nikita Maiorov (2596), 1-0. The player of the week is Wojciech Reza (2212) from Poland. His recent "victims" include a 2405, a 2523 and a 2567.

The "fatality" nomination goes to Aggelos Moshovakis (1419) for delivering an aesthetically appealing checkmate in the game against Fragiadakis E (1925):

Top-10:

Sideris (2048) - Mirzoev (2554), 1-0, 1-0, **506** points
 Moshovakis (1419) - Fragiadakis (1925), 1-0, **506** points
 Carstens Dobuchak (1816) - Puebla Arredondo (2288), 1-0, **472** points
 Berka (1724) - Volodin (2186), 1-0, **462** points
 Katashuk (2191) - Maiorov (2596), 1-0, **405** points
 Koleva (1666) - Gelemerov (2066), 1-0, **400** points
 Georgantas (1814) - Moshovakis (1419), 0-1, **395** points
 Nunez Donaire (1560) - Riquelme Abuffon (1934), 1-0, **374** points
 Izzat (2424) - Bayramov (2051), 0-1, **373** points
 Reza (2212) - Dragun (2567), 1-0, **355** points

Average gap: 425; White won 8 games, Black won 2 games.

You can view all the games in the accompanying pgn file.

The featured player this week is Francisco Restuccia from Argentina. His message (published below) sounds quite modest, while his feat is really impressive: Francisco has defeated none other than ex-Women's World Chess Champion GM Antoaneta Stefanova!

Hello Mr. Zhdanov.

I follow your column in CEWN "David vs. Goliath" and I dare send me an old game, if you think may be interested.

The game is my only "prowess like David" over 25 years to participate in open tournaments. The game started well for me, but at the critical moment I omitted the winning move (37.Qh4). But I could "resist" during the wild and mutual time trouble (both played only 30 seconds of increase since the move 40) and, when the position was heading for a draw, black lost for time.

Thank you for your interest in us, the fans. Best regards.

Francisco Restuccia
from Argentina

Restuccia, Francisco(2239)
- Stefanova, Antoaneta(2550) [C22]

46. ♖f5+! White wins the f7 pawn with check and gains an extra pawn. However the win remains very difficult, because of the opposite colored bishops and the limited material on the board.

46... ♔g7! The correct retreat! [46... ♔g6 is much worse, because it allows White to squeeze the black king to the 8th rank after 47. h5+! ♔g7 48. ♖xf7+ ♔h8 49. ♕d5 with excellent winning chances. The a-pawn is very far advanced and the black king might end up in a mating net.]

47. ♖xf7+ ♔g6 Black might hope for counterplay with Kh5. White cannot push the pawn at once because of Rxc4 followed by Ra4 and otherwise Bg1 blocks its way.

48. ♕d5 ♕g1 49. ♖f1! Radjabov realizes that the direct advance of the a-pawn is premature, therefore he delays this plan and tries to fight against the Kh5 counterplay. [49. a7? leads to a draw after 49... ♕xa7 50. ♖xa7 ♔h5!= (However winning the pawn with 50... ♖h3? loses, because out of the blue White can create a mate net by playing 51. ♔e5! ♖xh4 52. ♕e4+ ♔h5 53. ♖g7! Threatening with Bf3 mate. 53... ♖h2

54. ♕g2! A very unusual motif for trapping the rook! 54... ♔h4 55. ♔f4 ♔h5 (55... h5 56. ♖g6+- is zugzwang. Black must give up his rook and there is no stalemate.) 56. ♕f3+! (But not 56. ♔g3? because of 56... ♖h3+! and suddenly Black survives.) 56... ♔h4 57. ♖h7+- and mate is coming next.)]

49... ♕c5? This turns out to be a serious mistake. When the white king goes to e5, Black will miss the opportunity if checking along the h2-b8 diagonal. We should not blame Wojtaszek for this mistake, as it was very hard to foresee the drawback of this move... [The right move was 49... ♕a7 and the difference is that after 50. ♔e5 ♔h5! works now as Rf4 runs into Bb8!]

50.♔e5! A great move and very easy to blunder! Suddenly the black king finds himself in different kind of mating ideas!

50...♖a3 [50...♔h5 is now refuted by 51.♖f4! This is the reason why Bc5 was wrong, Black does not have Bb8 check. White is threatening with Bf7 mate and the only way to avoid it is to play 51...♔g6 52.♖f6+ ♔h5 (52...♔g7 53.♖c6 ♖e3+ 54.♗e4+- White promotes his a-pawn with the help of Rc7.)

53.♔f4! A highly spectacular haunt against the black king! Bf3 is threatening, followed by Rh6 mate. Actually Black cannot parry this simple idea... 53...♗e3+ 54.♔g3! is the point! White does not need to worry about discovered checks, because he has the Bf3 countercheck-mate in his pocket. 54...♗d4+ 55.♗f3+ ♖xf3+ 56.♖xf3+-;

50...♖e3+ is also bad because of 51.♗e4+ ♔h5 52.♖f4! and Black cannot defend against the threats of Kf6-Bg6 or Kf5-Bf3 mating ideas.]

51.♖f6+ ♔h5 [51...♔g7 is met by 52.♖c6 ♗f2 53.h5! taking control over the g6 square in order to squeeze the black king to the back rank with Rc7. Rg6 might also be decisive sometimes.]

52.♖f4! Very nice play by Radjabov! He again creates the mate threat of Bf7, which forces Black to retreat. The unfortunate placement of the c5 bishop and the a1 rook deprives him from a successful defense.

52...♔g6 [52...♖xa6 53.♗f7+ ♖g6 54.♔f5+-]

53.♖g4+! Finally, White's serious efforts bear their fruits. The black king is forced to run into the corner...

53...♔h7 [53...♔h5 loses to 54.♔f5!+- and the king is trapped! Bf7 wins next.]

54.♗e4+ ♔h8 55.♖g6! The huge advantages of having the king squeezed to h8 are the following: White does not need to worry about counterplay against the h4 pawn with Kh5. He can easily create mating ideas like, Rc6-Kf6-Rc8. The a-pawn is much more dangerous now, as if it reaches the 7th rank, White will always have the option of promoting it with a rook check on the 8th rank.

55...h5 Black decides to fix the pawn on h4 and hopes to win it with Bf2. On the other hand, the h5 pawn becomes much more vulnerable there, as it can be attacked by the bishop. [55...♗e3 is met by 56.h5 ♖a5+ 57.♗d5 It is extremely hard, probably even impossible to defend this position with Black. 57...♖a4 58.♖c6+- and White is threatening to mate after Kf6. If Black tries to prevent it, the a-pawn starts to run...]

56...Bc6! Asking the bishop to choose a diagonal. As we will see, there is no good square for it. The black king always gets into trouble.

56...Bf8 [56...Bf2 loses to 57. Qf6! Bg3 (57...Bxh4+ 58. Qf7+- and mate is coming from h6 or c8.) 58. Bg6 Bf3+ 59. Qg5+-; 56...Be7 57. Qe6 Bxh4 58. Qf7+- with an inevitable mate again.]

57. Qf6! Excellent play by Radjabov! He further squeezes the black king.

57...Qg8 [On 57...Ra1 the easiest is 58. Bd3! +- covering the f1 check and protecting the a6 pawn. Black cannot deal with the threats of Kf7 and Rc8. 58...Ra3 59. Bc8]

58. Bd5+ Qh7 59. Qf7 [Black resigned in view of 59. Qf7 59...Bb4 (59...Bg7 60. Be4+ Qh8 61. Bc8+-) 60. Be4+ Qh8 61. Bh6# It was fantastic to see how White managed to catch the black king by simply using the light squares and ignoring the dark ones.] **1-0**

(15) Saric, Ivan(2666)
- Van Wely, Loek(2667)

77th Tata Steel GpA(9.1),
2015.01.20

GM Arkadij Naiditsch
Best rating: 2737

When we look at the current position, it is hard to imagine that White was a clear pawn up and close to winning, but then Saric clearly overpushed in an already equal position and found himself in this double rook endgame. It is still very hard to say if this position is winning or just a draw. In case Black manages to win the g5 pawn and not let the white king take a safe position in front of the pawn, it should be enough for a win. On the other hand "all" White needs to do is to keep his king as close as possible to the g1 square.

80...Ra1+! A very strong move. Black is starting the right plan- to get the white king as far away as possible from the g-pawn.

81. Qe2 Re8+ 82. Qd3 Rd1+ using the fact that White cannot play Rd2.

83.♔c3 [White is just not in time (by one tempo) after 83.♚cd2 83...♚d8+ 84.♔c2 ♚8xd2+ 85.♚xd2 ♚xd2+ 86.♔xd2 ♔f4 87.♔e2 ♔xg5 The white king would need to jump to g3 now to keep the opposition and the draw. 88.♔f3 ♔h4 89.♔g2 ♔g4 90.♔f2 ♔h3 and Black is easily winning.]

83...♚c8+! Another good move. Black is still following the right plan, one rook needs to be exchanged and it is the right moment while the white king is far away from the g1 square.

84.♔b2 ♚xc2+ 85.♔xc2 To take on c2 with the rook of course makes no sense, as the white king has to get to g1 as quickly as possible.

85...♚d5 Black is collecting the g5 pawn. [Entering the pawn endgame would already lead to a draw: 85...♔xf2? 86.♔xd1 ♔f3 87.♔e1 ♔g4 88.♔f2 ♔xg5 89.♔g3 and White is in time.]

86.♚f6! Saric uses his best chance and this is to attack the g6 pawn and try to keep the black rook as passive as possible.

86...♚xg5 87.♔d3 ♚g4 Black is still on the right way. For those who learned rook endgames by heart, it is easy to know that this position is winning! But in case you are new to the position, things are far from obvious.

[87...♔g2 would also lead to a winning position. 88.♔e4 ♚g3 89.♔f4 ♔h3 and Black is winning by bringing his king to h4 and playing g5. 90.♚a6 ♔h4 followed by g5 with a winning position.]

88.♔e3 g5 89.♚g6 So what to do next? If Black could somehow move the rook from g4 without losing the g5 pawn, it would be an easy win, but how to do it...

89...♔g2 This move is not a bad one, but it doesn't change anything.

90.♚g7 White keeps on waiting and it is the best he can do.

90...♚g3+?? What a mistake by Loek Van Wely, when the win was so close! [90...♔h3! This strong move put an end to White's hopes... 91.♚h7+ (After 91.♔f2 91...♚g2+ 92.♔f1 g4 Black is entering a theoretically winning position by playing 93.♚h7+ ♔g3 94.♚a7 ♚b2 and Black is winning because White can't defend from Rb1 and Kh2 at the same time.) 91...♚h4 92.♚g7 g4 The black rook on h4 is horribly placed, but White cannot make use of it. 93.♔f2 (93.♔f4 didn't help, because of the nice and tricky 93...♚h8! 94.♚xg4 ♚f8+ 95.♔g5 ♚g8+ and Black is winning the white rook.) 93...♚h8 The black rook is coming back into the game. 94.♔g1 ♚b8

95. ♖g6 White can't do anything better than waiting. 95... ♔g3
 96. ♕f1 ♜b1+ 97. ♔e2 ♜g1! is the most simple way toward
 victory. 98. ♜g8 ♔h2 99. ♔f2 g3+ 100. ♔f3 ♜f1+ 101. ♔e2 ♜f7
 and we are in a theoretically winning position.]

91. ♔e4! White of course happily accepts the present. It is
 funny, but the position is already a draw.

91...g4 [Black also can't do much after 91... ♔h3 92. ♔f5 g4
 93. ♜h7+ ♔g2 94. ♜a7 and there is no way to improve the
 position for Black.]

92. ♜g5 and here as well we can see that Black cannot
 improve his position. In case of 92... Kg1 93. Kf4 leads to an
 immediate draw. A huge upset for the Dutch Van Wely, who is
 usually a very fighting player, but it seems like a lack of energy
 or maybe endgame knowledge clearly cost him half a point
 here... **1/2-1/2**

Chess and the City. Chess superstition, and it's obvious drawbacks...

WGM Elisabeth Pahtz
Best rating: 2493

That sportsmen are especially superstitious should not surprise us at all. Though how it's "practised" in the chess world, especially by men, is enough to make the mind boggle. I am sure no women player dared write about it, maybe because of shame, maybe because she was lucky enough not to experience it directly, who knows...

Why am I writing about this? Well, I thought it's about time!

Let's start with the harmless ways in which chess embraces superstition:

1. "The Winning Pen" The most boring item in our collection, nevertheless be sure it will be dealt with the moment one loses...
2. "Leave it alone", or in other words, don't move anything in your room! From personal belongings to food, chess players have a habit of keeping the status quo at home!
3. Sleep! As a true "German" you better obey the clock! Professional chess players like to make sure their routines are consistent.

4. Sex during a tournament: very serious male GMs may consider it as a huge loss of energy, however some of them take that reason as an excuse to hide their real intentions...

5. Lucky numbers: Even Kasparov strongly believed in lucky numbers during his professional time as a chess player. In his case he always hoped and expected to benefit from the number 13.

The above list is actually quite typical and it is hard to argue with most of the points as they are also seen in many other sports. Before discussing the negative side of superstition in chess, I would like to briefly mention a tournament which I visited about 5 years ago in Moscow. It was a tournament which was played in many different rooms and the phenomenon I observed was that, the closer you got to the rooms of the top boards, the more you could "feel" the change in "atmosphere"(!) Of course one should take into consideration that small rooms combined with lots of people will always leave a lack of oxidation, but the smell.... The smell was something I could honestly never forget, and I was desperately wondering how people could stand it especially if they were involved in a long game!...

The biggest problem in today's chess world is superstition about clothing. The so-called winning shirts/jumpers and socks hit are top of the list here. On underwear I am not in a position to comment since I have never had a chance, nor deeper wish, to test it out, but for the sake of mine and the dear reader's health I'd rather not delve into it on these pages!

"The root of all superstition is that men observe when a thing hits, but not when it misses." (Frances Bacon)

Clash of the Titans

(16) Nimzowitsch, Aaron
- Spielmann, Rudolf[C02]

San Sebastian(12),
1912.03.05

GM Kamil Miton
Best rating: 2655

1.e4 e6 2.d4 d5 3.e5 c5 4.♘f3 Of course the main move is [4.c3 4...♙b6 5.♘f3 ♘c6 Black's main idea in this structure is to create pressure on the weak d4 pawn. (5...♙d7 An alternative idea for Black is to exchange the limited bishop over the b5 square.) 6.♙e2 (6.♙d3 6...cxd4 7.cxd4 ♙d7 8.O-O ♘xd4 9.♘xd4 ♙xd4 10.♘c3 with compensation for the pawn.) 6...cxd4 7.cxd4 ♘ge7 8.b3 ♘f5 9.♙b2 ♙e7 10.O-O h5 with Bd7-Rc8-g6-Kf8-Kg7 and Black has no problems at all.]

4...♘c6 [4...cxd4 5.♘xd4 (5.♙d3 The pawn on d4 has no meaning. White plays a similar plan as in the game: 0-0-Re1-Nbd2-Nb3-Bf4.) 5...♘c6 6.♘xc6 bxc6 with this center Black can't be doing badly.]

5.dxc5 Objectively not the best move, but White is looking for a simple set-up. The position could still transpose to the main line after [5.c3]

5...♙xc5 6.♙d3 ♘ge7

7.♙f4!? An aggressive decision. White wants to be on time with developing the bishop to support the important e5 square, but after this move Black can win the pawn. [7.O-O 7...♘g6 8.♙e1 ♙c7 Black is very quick with his pressure on the e5 pawn and Bf4 doesn't work anymore. 9.♙xg6 fxg6 10.♙e3 ♙e7 Black keeps the bishop pair, otherwise White would get control over the dark squares. Potential plans for both sides are Nbd2-c4-Rc1 for White and 0-0-h6-g5-Bd7-Be8-Bg6 for Black.]

7...♙b6↔ 8.O-O ♙xb2 9.♘bd2 ♙b6 10.♘b3 White gets better development for the pawn sacrifice. [10.c4!? with the idea to activate the knight over c4 or e4.]

10...♘g6 11.♙g3 ♙e7

12.h4! A typical reaction against the knight on g6.

12...♔b4! Black is not afraid of White's initiative and tries to defend actively. [12...♘f8 13.h5 ♘d7 14.c4 dxc4 15.♙xc4=]

13.a4 White is preparing a trap, but it is too slow. [13.h5 13...♘f4 14.a3 ♔a4 15.h6=]

13...a6?! was not needed as Bb5 was not the threat. Black could have won a second pawn after [13...♘xh4 14.♘xh4 (14.♙xh4 14...♙xh4 15.c3 ♔g4) 14...♙xh4 15.c3 ♔e7+ and two pawns down is too much...]

14.h5 ♘h4 [14...♘f4?? 15.c3 and White wins the piece.]

15.♘xh4 ♙xh4 16.c3 ♔e7

17.♙h2?! I don't like this move because the bishop on h2 will be limited. More promising looks [17.♔g4 17...♙xg3 18.♔xg3 g6 19.h6+ and the dark squares are really weak.]

17...f5?! makes no sense. Black opens the position and activates the white pieces. More solid was for example [17...♔d8 with idea to get the bishop back to e7 and then play Bd7-Rc8 etc.]

18.exf6 gxf6

19.♘d4! There was nothing to do for the knight on b3.

19...e5 20.♙f5 [20.♘f5 20...♙xf5 21.♙xf5 ♔d8 22.♔b1 with Qb3 next and White has strong pressure over the weak light squares.]

20...♘xd4 21.♙xc8 ♔xc8 22.cxd4

22...O-O! The last call! It was time to escape with the king. [22...e4?? 23.♔g4+–]

23.dxe5 fxe5 24.♔xd5+ ♔f7 Fortunately for Black, White is forced to exchange queens.

25.♔xf7+ [25.♔xe5 25...♙xf2+ 26.♙h1 ♔c5!=]

25...♔xf7 26.♙xe5 ♔f5

27.f4! White advances the pawn and at the same time keeps the bishop on a strong position.

27...Rxb6 28.Rab1 White could also have played [28.Rac1 28...Rxc1 29.Rxc1 Rf5 and Black is on time with protecting the queenside. 30.g4 Rf7 31.Rg2 Rf6 32.Rxf6 Rxf6 33.Rg3 Thanks to his easy possibilities of improving the position with g5-Kg4-f5 etc, White keeps the initiative.]

28...Rf7 29.Rf2 [29.Rxb7?? 29...Rc5+--]

29...b6 30.Rf3 The white king slowly becomes a very strong piece.

30...Rb6 31.Rfd1 White improves the position with each move.

31...Rc4! Also a good move! Black defends actively.

32.Rd7

32...Rf7? It was more accurate to avoid the pin by playing [32...Rf8 33.Rb7 Rxa4 34.R7xb6 Rxb6 35.Rxb6 There is not much material left, but thanks to the very active white pieces, the position is very unpleasant for Black. 35...h5!? trying to prevent g4, but then White has 36.Rh6 h4 37.f5→]

33.a5?! White missed a winning chance: [33.Rf1! 33...Rxa4 34.f5! and Black is losing material: 34...Rf8 35.Rxe7 Rxe7 36.Rg7+--]

33...b5 After this move White has additional ideas of putting pressure on the a6 pawn with Rb7-Rb6. [33...bxa5 34.Rbb7 Black was probably afraid of this move. (34.Rf1) 34...Rf6 35.Rd6 Rce4 and Black is still fighting!]

34.Rf1 Rcc6 35.Rd4?! Again not the most accurate move. White could have limited the black rooks after taking control of the e6 square. [35.f5! 35...Re8 36.Rb7→]

35...Rhe6 36.Rh1 White is trying from the other side.

36...h6 37.Rb7

37...Rd6? This move allows White to improve his king, which will be the decisive factor in realizing his advantage. [37...Rc4 38.Rf5 b4→ and White is not able to play Ke4 or Kg4 because of Rxe5.]

38.Rf5 [38.Rf1 38...Rxd4 (38...Rf6 39.Rxe6 Rxe6 40.Rf4+--]

with f5 next.) 39.♖xe7+ ♔g6 40.♖b6 ♖xb6 (40...♖dd6 41.♖eb7 with the idea to get a winning pawn endgame after rook exchanges.) 41.axb6 ♖d6 42.b7 ♖b6 43.♖e6+!+-]

38...♖e6

39.♔e4! White improve the last and most important piece!

39...♖c4+ 40.♔f5 ♖c5 41.♖d1 b4 42.♖d8! ♖xa5 43.♖f8+!

♔xf8 44.♔xe6 with Rb8 next. 1-0

Editorial Preface

The great event in Wijk aan Zee came to an end. As probably expected by many, the winner's name is Magnus Carlsen. After a bad start, Carlsen quickly recovered and with a streak of 6 winning games he practically secured the 1st place.

4 players managed to be as close as possible to the winner, so just half a point behind we find: Maxime Vachier-Lagrave, Anish Giri, Wesley So and Ding Liren. All of these players are still under 25! The result of Caruana was a bit strange, as he had a great start but didn't play too well later on and even lost the last game to Vachier-Lagrave with the white pieces, to finish on just 7/13, clearly a result under his expectations.

In the B group the only 15-year old Chinese Wei Yi was just unstoppable! With an amazing score of 10.5/13 he secured his participation in the A group of Wijk aan Zee 2016. Following him by just half a point and also showing a great result is David Navara.

And in 3rd position, with 9/13, we find the American Samuel Shankland.

The Gibraltar Open has begun with some extremely strong GMs participating in it: Topalov, Nakamura, Svidler, Vitiugov, Harikrishna, Hou, Yu Yangyi, Wei Yi, Rapport. And this is just to name a few of them... This amazing field probably makes Gibraltar the strongest open in history, even beating the recent Super Open in Doha (with Kramnik, Giri, Mamedyarov etc).

In the first round there were not many surprises, as the favorites are winning most of their games, but already in a few days we will be able to see the great battles between the rating heavyweight players.

Next Monday the Grenke Chess Classics 2015 is also starting, so the World Champion will be back in action.

In the current issue you will find great games from Wijk aan Zee Super tournament, as well as many interesting news in the other sections.

Enjoy!

Two best games of the past week

(1) **Caruana, Fabiano(2820)**
- **Vachier-Lagrave, Maxime(2757)**
[B90]

77th Tata Steel GpA(13.2),
2015.01.25

GM Arkadij Naiditsch
Best rating: 2737

A great preparation with a deep positional pawn sacrifice, followed by great play in the middlegame and an exact finish-this is what Vachier-Lagrave will do to Caruana in the last round of Wijk ann Zee to share the second place. A great game to watch!

1.e4 c5 Vachier-Lagrave is mainly playing the Najdorf.

2.♘f3 d6 3.d4 cxd4 4.♘xd4 ♘f6 5.♘c3 a6 6.h3 This silent move is getting more and more popular. Already in the past rounds Caruana played 6.h3 against Hou Yifan and actually did not get much out of the opening. Later on the game went crazy and both had winning chances. The idea of 6.h3 is of course to play g4 next and then Bg2. Of course a move like 6.h3 can't be the reason people would stop playing the Najdorf, but it is a tricky move and it is not that simple for Black to prove that White is not doing better.

6...e5 Of course in case you are a Najdorf player you are playing the e5 move, as in case of a move like e6 we would be back to the Sheveningen, which is of course also a possible choice for Black.

7.♗de2 White wants to play g4 now followed by Bg2 and Ng3, with a clearly better position.

7...h5 and of course Black prevents White from it. We are still in one of the main lines which were often played on a high level.

8.g3 Caruana played this against Hou Yifan and continues playing it. Another main line here is 8.Bg5 followed by f4.

8...♙e6 Sometimes Black can play the position without Be6 and with Nbd7-b5.

9.♙g2

9...♘bd7 Black is not showing for the moment whether he wants to play b5 or not. [In my opinion it is too early for the b5 move: 9...b5 10.a4! A very typical move for this kind of position. 10...b4 11.♘d5 and I think White is slightly better.]

10.a4 Caruana probably wasn't sure if now b5 is already a threat or not. Usually the a4 move is of course the right choice, as White's play is usually on the queenside.

10...♙e7 11.O-O ♖c8 The beginning of a great idea which was clearly Maxime's preparation. Black does not castle, but keeps the idea of h4 and the attack on the white king in mind.

12.♙e3 It is hard to blame Caruana for playing the most natural move, but this move is getting him into trouble... [White could have played the more safe 12.b3 with a very complicated position.]

12...♖b6 Of course a move like Nb6 can only be played with a connection of playing Nc4 or d5 next, otherwise it doesn't make sense.

13.b3 A logical move. White should not let the black knight on c4 and of course a move like 13.Bxb6 would be a big positional mistake.

13...d5! What a great preparation by Black. At first sight this move makes no sense as White is going to be a full pawn up, but if we look a bit more at the position, we can discover that Black will have excellent compensation and actually the position is very hard to play for White.

14.♗xb6 White doesn't have a choice. [After 14.a5 14...d4 Black is just better.; 14.exd5 14...♖bxd5 also leads to a better position for Black.]

14...♗xb6 15.♖xd5 This is probably also the best move for White. [To leave the knight on c3 under the attack of the c8 rook doesn't make much sense. 15.exd5 15...♗f5 and Black is going to have great play on the c-file.]

15...♖xd5 16.exd5 ♗d7 So let us take a fresh look at the position. White is a clear pawn up but Black has the bishop pair and some chances to create an attack on the kingside. Of course White can't be worse here, but the position is very dynamic and every move counts. White's idea should be to

create play on the queenside as quickly as possible to make use of the extra pawn and Black will try to get his play rolling on the kingside.

17.c4 This move just can't be a bad one.

17...♕d6 Black is putting his queen to the right spot and preparing to play h4 or maybe f5.

18.a5?! The right positional choice, but it is already looking too slow. White should have done something about Black's counter chances on the kingside. [Maybe a move like 18.♕d2 with the idea of playing 18...f5 19.h4 could have been a possible option and the position would have remained very complicated.]

18...f5 Now h4 is already a dangerous threat.

19.♕d3 Another strange-looking move, but it is not that easy to find a move for White. [In case White would try to stop Black's play with 19.h4 19...g5 20.hxg5 h4 I would not like to be White here.]

19...h4 Of course. Black is trying to open the position as much as he can, especially since all the black squares are under the Frenchman's control. It is strange that White has done nothing wrong during the last 3 moves but his position is already very dangerous.

20.g4!? An interesting pawn sacrifice. White is trying to change the dynamic of the game and win control over the white squares. To wait for Black to play hxg3 is not a great option...

20...O-O! Black doesn't care about the g4 pawn g4 and prefers to target the white king's position with all he has. [Maybe Black could have played 20...fxg4 21.♖c3 O-O with probably also a better position for Black, but the move in the game is at least equally strong.]

21.♘c3?! and this move is almost losing the game. [White should have gone for the following very dangerous move: 21.gxf5 21...♙xf5 22.♙d2 and of course Black is going to attack the white king hardly, but it is still more or less unclear how the game would end. White's idea could be to just play Kh1-Rg1 and maybe Nc3 later and try to keep things together.]

21...e4! A strong move. Black is getting to White's king over the dark squares.

22.♙e3 ♘d8 Black wants to play Bc7 next, followed by Qh2 with probably just a mate. White is helpless against this simple plan. So Caruana tries entering a bad endgame...

23.♙xe4 A hard move to make, but what else should White have done?! [In case of 23.♖fe1 23...♙c7 24.♙f1 ♙h2 I don't see how White could escape the mate here...]

23...fxe4 24.♘xe4 White has 3 pawns for a piece and a nice knight on e4, but it is clearly not enough to say the position is equal. Black's bishops are controlling the entire board and White has a lot of target points in his structure. Black's advantage is obvious here.

24...♙f4 Another exact move of Black. There is no reason to give White a chance of playing f4.

25.♙xf4 ♖xf4 26.f3 White is trying to fix the pawn structure and to close the position.

26...♙e7 Black is ready to play Rcf8 and also to get a nice position for the bishop on b4.

27.♙f2 Now the game will end quickly. [27.♙g2 was a tougher move, but after 27...♙b4 28.♖f2 Black also has at least a few good plans. One of them is to play Rcf8 followed by Be8-Bg6, kicking out the knight from e4 and the other plan could be to prepare the b6 move in a good moment, to get a play over the b-file. I think Black's position should be close to winning here.]

27...♖cf8 28.♙e3 ♙e8! A strong move which was not really hard to find. Black wants to play Bg6 next.

29.c5 ♙b5 The most accurate move again...

30.b4 [30.♖f2 30...♖xe4+! 31.♙xe4 ♙xc5 and White is

immediately lost.]

30...Rxe4+! A nice way to end the game by force!

31.Kxe4 Re8! Black now has different mating ideas combined with just winning some material. The game is totally over.

32.Kf4 g5+ 33.Kf5 Kf7 with the idea of Bd3 mate next.

34.Re1 Bd3+ 35.Re4

35...Bf6 and mate in the next move! A great game by Vachier-Lagrave where we could see how dangerous the control over the squares can be, even when one is a pawn down. **0-1**

(2) Wei, Yi(2675)

- Haast, Anne(2352) [B48]

77th Tata Steel GpB(12.4),
2015.01.24

GM Csaba Balogh
Best rating: 2672

The winner of the Wijk aan Zee Challengers is the 15-year old Chinese Wei Yi! He was simply crushing through the field. It is worth looking at his brilliant victory in the penultimate round.

1.e4 c5 2.Nf3 e6 3.d4 cxd4 4.Nxd4 Nc6 5.Nc3 Kc7 The recently very popular Sicilian Paulsen variation.

6.Bb3 a6

7.Qf3 A relatively new alternative to the main lines with Qd2 and 0-0-0. The idea is to castle queenside here again and White often intends to play Qg3, offering the trade of queens after which Qxg3 hxg3 improves his pawn structure, opens the h-file for the rook and it usually yields a better and more easy to play endgame.

7...Nxe5 8.Qg3 h5 The young Dutch lady follows the path of her countryman Anish Giri, who played two interesting games with good results in the same tournament, but in the A group.

9.O-O-O h4 10.♖h3 b5 A standard Sicilian game. The black king stands in the center, therefore White launches a central attack with f4-f5 and Black looks for counterplay on the queenside.

11.f4 ♘c4 [11...b4 is a known counterattacking motif, but it makes no sense this time, because after 12.♞a4 the b6 square becomes vulnerable!]

12.♙xc4 ♜xc4 13.f5 White has already arrived, but the e6 pawn is well protected at the moment, he still needs to increase the pressure to execute a blow. It is time to finish the development for Black...

13...♙b7! A typical move in some Sicilian lines. Black delays the development of his kingside and brings his bishop and the a8 rook into the game. [Going for the a2 pawn with 13...b4 14.♞a4 ♜xa2 loses too many tempi. Black gives up the b6 square and the queen alone cannot create any serious threats. 15.♞b6 ♜b8 16.♞b3! Trapping the queen and securing the b6 square for the knight! Black is in trouble... 16...♞f6 17.fxe6 dxe6 18.e5+-]

14.♜hf1 e5! Anne Haast follows Giri's improvement over his own game. [In the first encounter against Radjabov, Giri had played 14...♜c8 and the game finished in a spectacular way: 15.fxe6 (However White could have achieved a very promising position after 15.♞f3! The knight is heading to e5, from where it attacks the two most critical targets on d7 and f7. Probably the only move is 15...f6, but to weaken the e6 square cannot lead to anything good either. 15...♞f6 (15...b4 is too slow 16.♞e5 ♜c7 17.fxe6+- and White is coming faster!) 16.♞e5 ♜c7 17.♞xd7! ♞xd7 18.fxe6+- Black collapses.) 15...dxe6

16.♜xf7 (16.♞f3 16...♞f6 is not the same anymore as in the 15.Nf3 line, because White cannot sacrifice on d7 followed by taking on e6!) 16...♜xf7 17.b3 Deflecting the queen from the e6 square. Fortunately for Black, he has 17...♙a3+! Black frees the f8 square for the king with an intermediate check. 18.♞b1 ♜xc3 19.♜xe6+ ♞f8

White had nothing more than forcing a perpetual check with 20.♜f1+ ♞f6 21.♜xf6+! gx6 22.♜xf6+ ♞g8 23.♜g6+ ♞f8 24.♜f6+ ♞g8 25.♜g6+ ♞f8 26.♜f6+ 1/2 Radjabov-Giri, Wijk aan Zee 2015]

15.♞b3 ♜c7 Black must cover the a5 square. [15...♞f6 Allowing Na5 leads to serious positional problems after 16.♞a5 ♜c7 17.♞xb7 ♜xb7 18.♙g5! White is going to take on f6 and install his knight to d5, which will dominate the entire

game. Black is positionally lost there, while 18...♗xe4 loses tactically to 19.♗xe4 ♖xe4 20.♖fe1+- and the e5 falls.]

16.♔b1 This is Wei Yi's improvement over the Saric-Giri game. Quite a deep idea, which was missed by Black in this game. [Saric played 16.♗g5 when Black had time to play 16...♖c8 17.♖f2 ♗e7! 18.♗xe7 ♔xe7! securing and excellent square for the knight on f6! 19.♖fd2 ♗f6 20.a3 ♖h6! With the idea to drive the king into safety with Kf8-g8. He could not do it with the rook on h8 because White had g4-g5, using the fact that Black cannot take en passant on g3. 21.♖e3 ♔f8 and Black was fine in Saric-Giri, Wijk aan Zee 2015.; The same series of tactical blows with 16.f6 fails right away, because of the hidden point... 16...♗xf6 17.♖xf6 gxf6 18.♗b6 and Black has 18...♗h6+! freeing the f8 square for the king! This is the point of playing 16.Kb1! 19.♔b1 ♖xb6 20.♖xd7+ ♔f8--+]]

16...♖c8? Black fails to recognize the differences and falls into the prepared trap!

[16...b4 was also wrong, because after 17.♗d5 ♗xd5 18.♖xd5 ♗f6 19.♖a5! deprives Black from his counterplay with a5-a4 and White wants to enter a good knight vs. bad bishop position with Bg5 and the d5 square is very weak! 19...♗xe4? tactically fails to 20.♖f3!; However Black should have played 16...♗f6! which was most probably Giri's preparation. He is already threatening to take on e4 and he seems to be doing well. 17.♗d5 It seems like White has nothing better than this, but I believe that if White cannot take with a piece on d5 and he is forced to change the structure with exd5, he cannot hope for an advantage. 17...♗xd5 18.exd5 ♖c8 19.c3 with mutual chances. Black might go for a balanced endgame with Qc4-g4 for instance.]

17.f6!! Opening the h3-c8 diagonal! A series of sacrifices are coming and Black loses because he cannot defend the d7 square.

17...♗xf6 18.♖xf6! Eliminating the defender of the d7 weakness!

18...gxf6 19.♗b6! Deflecting the other defender of the d7 pawn. Bh6 is not a check anymore thanks to 16.Kb1. Black has nothing better than

19...♖c6 20.♗a5! The haunt of the queen continues! The d7 square is still the key!

20...♖e6 21.♗xb7 White has won material. He gained two pieces for the sacrificed rook and all his pieces are standing very well. The knight is soon coming to d5 with decisive threats. Black must try to win back the material with Rb8, otherwise he is lost.

21...♖b8 [If Black includes the trade of the queens 21...♖xh3 22.gxh3 ♖b8 23.♗d6+! saves the piece and guarantees a winning endgame. 23...♗xd6 24.♖xd6+-]

22. ♘d5! This is the only way to victory!

22... ♖xb7 [Black loses in a beautiful way after 22... ♖xb7 23. ♘c7+! ♔e7 White could give a perpetual check with Nd5-c7, but he can play for more with 24. ♙c5+! d6

25. ♖xd6!! As simple as that! Black is more than a queen up, but he cannot avoid getting mated! 25... f5 trying to open an escaping route to f6 does not change anything... (25... ♖xb7 26. ♖d1# is quite a pretty mate!) 26. ♘d5+ ♔e8 27. ♘f6+ ♔e7 28. ♖c6# Another awesome mate!]

23. ♖c3! The only move to win again! White switches his queen to the queenside and creates the decisive threat of Qc8.

23... ♖c6 Other moves are also losing quickly: [23... ♖b8 24. ♘c7+-; 23... d6 24. ♖c6+ ♖d7 (24... ♖d7 25. ♖c8+-) 25. ♘xf6+-]

24. ♘xf6+! The firework continues!

24... ♔e7 [24... ♖xf6 25. ♖c8+ ♔e7 26. ♙c5+ d6 27. ♖xb7+ ♔e8 28. ♖c6+- and mate is coming in a few moves.]

25. ♙d8+! Not the only, but the most spectacular win!

25... ♔e6 [25... ♔xd8 26. ♖xc6+-]

26. ♖h3#! Mate! What a game! It will be very interesting to see Wei Yi participating in the A-group next year! **1-0**

The K-Files. Queen's Indian Accelerated, 3.Nc3 & Summary

GM Alexander Khalifman
FIDE World Chess Champion (1999)
Best rating: 2702

Brief summary: the NoName opening is, of course, no direct refutation of 1.d4 and no start of a new opening revolution at all. I wouldn't even recommend someone to make it the basis of your opening repertoire. However, it leads to unusual and mostly unexplored positions and might serve you quite well if you use it from time to time as a surprise weapon. So far the way to reach a clear advantage for White is not known.

Important: if you are a true fan of placing the bishop g7 and want to use this opening to reach relatively new Gruenfeld-type positions, then probably it's not worth trying. In most cases the dark-squared bishop fianchetto leads to a stable advantage for White. But a switch to Queen's Indian kind of positions works better. So it might be really poisonous when your opponent plays only Nimzo or Catalan with White.

I'm quite sure that this opening will become more popular in the nearest future and, so I am waiting for the new developments with great interest. The lines which have the best chances to become critical are in my opinion 3.f3, 3.Nc3

Bb7 4.Qc2 d5 5.Bg5 and 3.Nc3 Bb7 4.Qc2 d5 5.cxd5 Nxd5 6.Bd2.

(3) 1.d4 Nf6 2.c4 b6 3.Nc3 4.Qc2 [A50]

1.d4 ♘f6 **2.c4** b6 **3.** ♖c3 ♙b7 **4.** ♚c2 The main line of the whole opening since 1921 (Teichmann - Alekhine). For a long time this used to be a serious reason for Black to avoid playing 2...b6. However, modern theory shows that the assessment is far from clear. White's idea is quite simple: e2-e4. At the same time the square f3 is still available for the white knight.

4...d5 Certainly the strongest answer. Black has to fight for the center. [4...e6 was played surprisingly often, although after this the game usually transposes into an extremely dubious Nimzo line (4.Qc2 b6?!) 5.e4 ♙b4 6. ♙d3 c5 7.d5± Rubinstein - Janowski Marienbad 1925 The recent tries to put this evaluation under doubt were not convincing at all 7...b5]

5.cxd5 [5. ♘f3 This move order might be slightly more accurate than 5.cxd5, but in most cases leads to the same positions, so I decided to leave a more popular move as the main line. 5...e6

a) 5...g6 fianchetto is definitely not enough for equal chances here 6. ♙f4 (6.cxd5!? 6... ♘xd5 7. ♙d2 is another attractive line) 6... ♙g7 7.e3+= was analysed already in 4.Nf3 g6 5.Qc2 d5 move order;

b) 5...dxc4 6.e4;

6. ♙g5 (6.cxd5 6...exd5 (6... ♘xd5 is better - see 5.cxd5) 7. ♙g5 ♙e7 8.e3 O-O 9. ♙d3 h6 10. ♙h4 c5 11.O-O+= practice has

confirmed that this version of QGD is very pleasant for White)
6...♙e7 7.e3 (

a) 7.cxd5 ♘xd5 - 5.cxd5;

b) 7.♙xf6 ♙xf6 8.cxd5 exd5 9.g3 (9.e3 9...O-O - 7.e3) 9...O-O
10.♙g2 c5 11.♚d1 ♘a6 12.O-O ♙e7= and Black has no problem
at all (Preuschoff - Schwanbeck Germany 2009))

7...O-O This type of QGD position (when cxd5 exd5 is not
included) is just another story. Black is always able to take
on d5 with the knight and White can't keep the tension in the
centre in his favour. So Black's resources are good enough
to hold the balance. White has tried different ways here, but
without any great achievements 8.♙xf6

a) 8.O-O-O ♘e4 good moment for this typical manoeuvre
9.♙xe7 ♙xe7 10.♘xe4?! dxe4 11.♘d2 f5=+ Bobotsov - Pfleger
Bamberg 1968;

b) 8.cxd5 ♘xd5 9.♙xe7 ♙xe7 10.♘xd5 exd5 - 5.cxd5;

c) 8.♚d1 ♘e4!? 9.♙xe7 ♙xe7 10.♙d3 ♘d7=;

d) 8.♙d3 dxc4 9.♙xc4 c5 10.dxc5 Jianu - Nikolov Skopje 2011
(10.O-O-O 10...cxd4 11.♘xd4 ♙c8↑) 10...♙c7! 11.♙d3 ♙xc5
12.♙xf6 ♙xf6 13.♙xh7+ ♙h8=;

8...♙xf6 9.cxd5 exd5 10.♙d3 (10.O-O-O 10...c5! creating
active counterplay as soon as possible 11.h4 ♘c6 12.g4 cxd4
13.exd4 ♙d6↑ Peev - Radulov Varna 1968) 10...g6 When Black's
dark-squared bishop has no counterpart this move is no
serious weakening 11.O-O Bu - Danielsen Helsingor 2011 (11.h4
11...c5 12.h5 cxd4 (12...c4 13.♙xg6!) 13.exd4 ♘c6∞ Redzepagic
- Stojanovski Struga 1991) 11...c6!? 12.e4 ♘a6=; 5.♙g5!? was
played in less than 10 games, however - with 100% stats for
White and what is even more important it was played by
Botvinnik, Andnd and Mamedyarov. So this move has to be

taken seriously. In fact, it might be very critical. 5...dxc4
(5...♘e4?! is quite typical, but here it simply doesn't work
because of 6.♘xe4 dxe4 7.O-O-O± and the pawn e4 is just
weak; 5...e6 is a solid choice, but after 6.cxd5 exd5 7.e3 ♙e7
8.♙d3 White gets a good version of the Queen's Gambit
(Botvinnik - Chekhover Leningrad 1934))

6.e4!N has not been played yet, but in my opinion it's the only
(but quite dangerous) move which gives White chances for
opening advantage (neither 6.e3 6...a6 7.a4 Salgado - Garcia
Barbera 1997 7...♘bd7! 8.♘f3 b5 9.♙e2 e6∞; nor 6.♚d1 6...h6
7.♙xf6 exf6 8.e4 b5 9.♘xb5 ♙b4+ 10.♘c3 O-O= (Mamedyarov
- Anton Gujarro Qatar 2014) would promise something for
White) 6...a6! of course risky, but the most challenging move

a) immediate 6...♙xd4 7.♘f3 ♙c5 8.♙e3 ♙h5 9.♙xc4∞ looks
too provocative;

b) 6...e6 is rather solid, but not enough to equalize completely
7.♘f3 (7.O-O-O!? might be even stronger) 7...♘c6 (7...b5 8.d5!
h6 9.O-O-O and it's not clear whether Black will be able to
survive the opening phase) 8.♚d1 ♘b4 9.♙b1 ♘d3+ 10.♙xd3
cxd3 11.♙xd3 ♙e7 12.O-O O-O 13.♚fe1+= Annurudha - Kostenko
Tabriz 2014;

7.♙xc4 (7.d5 7...b5 8.♚d1 ♙d6 9.♘f3 ♘bd7 10.a4 h6 11.♙h4
e5 and Black has good counterchances) 7...♙xd4 8.♙d3 e6

9.♘f3 ♖c5 10.a3 h6 11.♙e3 ♗e7∞ looks very dangerous for Black, but still a pawn is pawn. Once more: 4.Qc2 d5 5.Bg5!? is a very serious try which needs more practical tests]

5...♗xd5 6.e4 [6.♘f3 is a good move order to avoid 6.e4 Nxc3 7.bxc3 e5. However, we'll see later that there is no special reason for White to avoid it. 6...e6

a) 6...g6 once again not the best moment for Gruenfeld-like play 7.♙d2!? (7.e4 7...♗xc3 8.bxc3 - 6.e4) 7...♙g7 8.e4 ♘f6 Wells - Adorjan Hungary 1995 9.♙c4 O-O 10.O-O+=;

b) 6...♗xc3 is quite playable 7.♗xc3 (7.bxc3 7...e6 (7...g6 8.e4 - 6.e4) 8.e4 - 6.e4) 7...e6 might look good for White as 8.a3 now leads to a well-known position of the Queen's Indian Petrosian and this move doesn't look necessary. But surprisingly it's not so easy to find a more useful move here. 8.a3 (8.♙f4 8...♙d6 9.♙xd6 cxd6=; 8.♙g5 8...♙e7 9.♙xe7 ♗xe7 10.♖c1 c5 11.dxc5 O-O∞) 8...h6= is well-known theory. Black doesn't have any problem;

7.♙g5 (7.e4 7...♗xc3 8.bxc3 transposes to the main line; 7.♙d2 - 6.Bd2) 7...♙e7 8.♙xe7 ♗xe7 9.♗xd5 exd5!? 10.♖c1 Kelecevic - Sahovic Yugoslavia 1980 (10.e3 10...O-O 11.♙d3 g6 12.O-O c5 13.dxc5 bxc5 14.♖ac1 ♖c8= Ragozin - Tartakower Saltsjobaden 1948) 10...c5! 11.dxc5 O-O 12.cxb6 axb6 13.a3 ♘c6 14.e3 d4∞; 6.♙d2 This move was played only once back in 1925. However, its positional basis is very solid. The similar setup has recently become very popular in Queen's Indian and Gruenfeld. Frankly speaking, before studying the NoName opening very seriously I believed that it is... OK, not the formal refutation, but the most dangerous White's weapon. And in fact it is, although I believe that there is a very narrow road for Black to solve the opening problems. 6...e6 (6...♗xc3 7.♙xc3 ♗d5 this kind of blockade is far from perfect 8.♘f3 ♘d7 9.♘d2! ♘f6 10.f3 e6 11.e4 ♗g5 12.♘c4+=; 6...g6 7.e4 ♗xc3

8.♙xc3 ♙g7 9.♘f3 O-O 10.♙c4 ♘d7 11.O-O e6 12.♖ad1 ♗e7 13.♖fe1+= it's definitely not the position Gruenfeld players are dreaming about) 7.♘f3 (7.e4 is not well-prepared yet 7...♘b4 8.♗a4+ ♗d7=; in the stem game White has chosen the modest 7.e3 and after 7...c5 8.dxc5 ♙xc5 9.♗xd5 ♗xd5 10.♘f3 O-O Black is OK (Zabodrocky - Reti Bratislava 1925))

7...♘b4! Black is using the fact that White didn't play a2-a3 in a rather strange, but effective way (now the standard 7...♗xc3 8.♙xc3 ♙e7 9.e4 O-O 10.O-O-O once more leads to the original Queen's Indian Petrosian where White has saved the tempo on a2-a3. In this case it's perfectly obvious that this detail is in White's favour as Black's queenside attack will develop much slower. (10.♖d1 10...♘d7 11.♙d3 ♖c8 12.♗e2 ♘f6; 10.♙c4 10...c5 11.d5 exd5 12.♙xd5 ♙xd5 13.♖d1 ♘c6 14.♖xd5 ♗c8 15.O-O ♗e6) 10...♘d7 11.♙b1 c6 12.h4→) 8.♗a4+ (8.♗b3 8...c5 is more or less the same) 8...♗d7 9.♗b3 (9.♗xd7+ 9...♗xd7 10.♖c1 c5= leads nowhere) 9...c5 10.a3 ♘4c6 black knights are looking weird but it's just temporary 11.dxc5 ♙xc5 12.♖d1 O-O 13.♙f4 ♗e7= and Nb8-d7-f6 with quite satisfactory position; 6.♗xd5 looks strange here 6...♗xd5 7.♘f3 e5!? (the quiet 7...e6 is also fine 8.e3 ♙d6 9.♙d3 ♘d7=) 8.dxe5 ♘c6 9.♙d2 O-O-O∞]

6...♗xc3 7.bxc3 e6 [The tricky 7...e5 was played first by Alekhine in 1921. However, in 2015 it looks rather dubious.

8.♘f3 exd4 9.♙c4 d3 10.♙xd3 (10.♖b3 10...♗f6 11.♘g5 ♙c5) 10...♙c5 11.O-O ♗e7 E.Atalik - Bok Iasi 2014 12.e5! ♙xf3 13.gxf3 ♘d7 14.♙f4!; 7...g6 once again the Gruenfeld setup doesn't solve the opening problems 8.♘f3 (8.h4!? is quite dangerous 8...♙g7 (8...h5 9.♘f3 ♙g7 10.♙c4±; 8...h6 9.h5 g5 10.f4!) 9.h5 e5 (9...O-O 10.hxg6 hxg6 11.♗d3; after 9...♘d7?! 10.h6 ♙f8 11.♙g5± Black's position looks ugly (M.Petrosyan - Jurcik Yerevan 2014)) 10.♘f3 ♘d7 11.♙b5 O-O 12.hxg6 hxg6 13.♙g5 ♗c8 14.♗d2→) 8...♙g7 9.♙b5+ A useful c heck. Black's choice is quite unpleasant: c7-c6 closes the bishop, so the counterplay with e7-e5 is not effective after it, but the knight on d7 will be quite passive. (now 9.h4 9...O-O 10.h5 c5 11.hxg6 hxg6 12.d5 ♘d7 is quite unclear (Korchnoi - van Geffen Dresden 2008)) 9...♘d7 (9...c6 10.♙e2 O-O 11.O-O c5 12.d5+= Jakobsen - Pedersen Denmark 1988) 10.O-O O-O 11.a4! (11.♙f4 11...a6 12.♙d3 Quinteros - Planinc Ljubljana 1973 12...e5! 13.♘xe5 (13.♙g5 13...♗e8) 13...♘xe5 14.♙xe5 ♙xe5 15.dxe5 ♗e7 16.f4 ♗c5+ 17.♗h1 ♗ad8) 11...a6 12.♙e2 e5 13.♙a3 ♗e8 14.d5+=]

8.♘f3 ♙e7 Kingside deve lopment is the top priority. Now 9.a3 would lead to another theoretical position of the Queen's Indian Petrosian. But once again it's perfectly unclear what profit can White get from this extra tempo. That's true, Black doesn't have such wide range of development plans that he has in position with a2-a3 played. But is it such a big problem?! [After 8...♘d7 9.♙d3 c5 the pawn sac 10.d5!? is very annoying 10...exd5 11.exd5 ♙xd5 12.O-O ♙e7 13.♗d1±]

9.♙d3 [9.♙c4 the pluses of this square for the bishop are not clear 9...c5 10.O-O cxd4 11.cxd4 O-O 12.♙b2 ♘c6 13.♗e2 ♗c8 14.♗fd1 ♘a5 15.♙d3 ♙f6∞; 9.♙f4 White tries to meet c7-c5 with d4-d5, but it doesn't promise much 9...O-O 10.♗d1 c5 11.d5 exd5 12.exd5 ♙d6∞; The most popular intermediate check 9.♙b5+ usually leads to the same positions 9...c6

10.♙d3 (10.♙c4 - 9.Bc4) 10...c5 - 9.Bd3]

9...c5 The accurate move order. [9...O-O 10.O-O c5 11.d5! exd5 12.exd5 h6 (12...♗xd5 13.♙xh7+ ♔h8 14.♗e1± Rohde - SOCRATES Boston 1994) 13.c4 ♙f6 14.♗b1± Kruppa - Simonian Kiev 2007]

10.O-O [10.♙b5+ 10...♙c6 11.a4 is an interesting approach which deserves further tests 11...a6 12.♙d3 (12.♙xc6+ 12...♘xc6 13.O-O O-O 14.♗d1 cxd4 15.cxd4 ♗c8=) 12...♙b7 13.O-O cxd4 14.cxd4 ♘c6 15.♗e2 O-O 16.♙b2 ♘b4 17.♙c4 ♗c8∞the black knight is quite annoying (Pashikian - Simonian Gyumri 2008)]

10...cxd4 [10...O-O 11.d5! - 9...O-O]

11.cxd4 O-O 12.♙b2 [Now 12.d5 doesn't work because of 12...♘a6! 13.♙b2 ♗c8 14.♗e2 ♘b4=+]

12...♘c6 Suddenly it turns that a2-a3 is a quite useful move for White.

13.♗e2 [13.a3 13...♗c8 14.♗e2 - 13.Qe2]

13...♗c8

14.♗fd1 [14.d5?! 14...♘b4; 14.♗ac1 14...♙f6 15.♗e3 van Ketel - Erwich Groningen 2001 (15.♙c4 15...♘a5 16.♙b5 ♗xc1 17.♗xc1 ♗b8) 15...♗d7∞and White's center is quite shaky;

Finally 14.a3 leads to one of the important positions for the theory of the Queen's Indian Petrosian. It was quite popular in 1980's and used to be assessed as highly dangerous for Black. However, recent research has proved that it's quite playable, although Black must pay enough attention to White's attacking prospects. 14...♙f6 15.♖ad1 ♘a5 (15...♘xd4? fails to 16.♙xd4 ♙xd4 17.♙b5!± Gelpke - Vogel Eindhoven 1981)
]

14...♘b4 15.♙b1 ♙f6 Clearly better than [15...♙a6 16.♖d2 ♘c6 17.d5↑Roghani - T.Vakhidov Dubai 2004]

16.a3 ♙a6 17.♖d2 ♘c6 18.♙c3 ♙c4∞ Black has enough counterchances.

19.♖c2 [19.♙a2 19...♙xa2 20.♖xa2 ♖d7]

19...g6

David vs. Goliath

Peter Zhdanov
Chief Editor of Pogonina.com

In this special column we are reviewing the most unexpected results that occurred last week. Players usually face opponents of a similar level. Considerably less frequent are situations when a significantly lower-rated player succeeds in beating a much stronger adversary.

The previous week has brought us only 18 upsets. The number of moves ranges from 14 in Cruz (1963) - FM Matsuura (2289), 1-0 to 74 in Sztokbant (2278) - Goncalves (1945), 0-1. The highest-profile loss was Smolich (2252) - GM Zhigalko A (2584), 1-0.

The "Finish him!" award goes to Patryk Wolaniecki (1473) for wrapping up the game in style vs. Michael Muecke (1829):

27. ♖xg6+ ♔xg6 28. ♔f5X The "blunder of the week" prize

goes to FM Matsuura (2289) for hanging a queen in one move against Cruz (1963):

13...dxc4?? 14. ♕xh7 1-0 Beware the zwischenzug!

Top-10:

De Graaf (1855) - Korolewicz (1388), 0-1, [467](#) points
 Szulic (1367) - Svec (1800), 1-0, [433](#) points
 Korolewicz (1388) - Von Keyserlingk (1779), 1-0, [391](#) points
 Wolaniecki (1473) - Muecke (1829), 1-0, [356](#) points
 Maghsoodloo (2421) - Pilvaieh (2075), 0-1, [346](#) points
 Sztokbant (2278) - Goncalves (1945), 0-1, [333](#) points
 Smolich (2252) - Zhigalko A (2584), 1-0, [332](#) points
 Sa (2026) - Bernardes (1694), 0-1, [332](#) points
 Pottker (2109) - Paveto (2437), 1-0, [328](#) points
 Hamidi (1963) - Firoujza (2291), 1-0, [328](#) points

Average gap: 365; White won 6 games, Black won 4 games.

You can view all the games in the accompanying pgn file.

If you have ever won a game against someone rated 300 points or above yourself, please send it to peter@pogonina.com for publication. Any additional information (a photo, annotations, etc.) will be appreciated.

Endgame section

(14) Jobava, Baadur(2727)
- Radjabov, Teimour(2734)

Wijk aan Zee,
2015.01.25

GM Csaba Balogh
Best rating: 2672

Radjabov was dominating the entire game, but after some wrong decisions he ended up in some difficulties and suddenly the white knights have excellent outposts on e4 and c4, attacking the weakness on d6.

45. ♖e4 ♜b2! A clever idea to put the rook to b4, from where it either controls the important c4 square or after the trade he obtains a very dangerous passed b-pawn which yields him counterplay. [45... ♜d3 was another defensive attempt, but it turns out to be inferior after White's precise play... 46. ♖e2! The only way to reach the c4 square with the knight. 46... ♜b3 47. ♖c4 ♜f8

48. ♜a1! with the idea of switching the rook to the kingside and invading along the h-file. An attempt to prevent it is 48... ♜h3 but then 49. ♜b1! ♖b4 50. a6! ♜h2+ The only move! Black tries to stop the pawn with Ra2. (50... ♖xa6 51. ♜b7+ Black finds himself in a mate net.) 51. ♖f2 This is a small achievement for Black. At least one of the active knight was forced to retreat, but the position remains quite bad... 51... ♖xa6 52. ♜b7+ ♖e8 53. ♖f3!± and the knight is coming back to e4!]

46. ♖c4 ♜b4! Even at the cost of the d6 pawn, Black sticks to his initial idea of creating his passed pawn.

47. ♜xb4 cxb4 48. ♖exd6 b3!? Black decides to give up his f7 pawn as well. This is probably not a mistake, but from a practical point of view 48... f6 seems to be more accurate. [48... f6 It looks natural to trade a pair of pawns. Black was probably afraid of 49. f5!/? White creates a passed pawn, but it proves to be insufficient because after 49... fxe5 50. fxe6 b3 51. ♖f5 b2 52. ♖d2 ♜f6 53. g7 ♜xe7 54. ♖xe7 ♖d6 Black soon eliminates all the pawns. The far advanced b2 pawn restricts the mobility of the white pieces. 55. ♖e4 is strongly met by 55... ♖c5+! and Nb3 next!]

49. ♖xf7 b2 50. ♖xb2 ♜xb2 51. ♖e5+ We have reached the critical moment where Black fails to find the only defense.

51...Ke7? [Surprisingly, Black could have gone for 51...Kxe5! 52.fxe5 Nc5! 53.Ke3 Ke7

It is quite understandable that Radjabov refused to enter this endgame. The three passed pawn should seemingly bring the victory for White, but the excellent placement of the c5 knight prevents White from making progress. Black simply intends to wait with Kd7-e7 and in case of the advance of one of the central pawns he is going to stay between them. Kd4 and Kd2 runs into Nb3 and the a5 falls. White has two winning attempts left: 54.Ke4 (The other option is 54.Ke2 with the idea to go around with the king and sidestepping the b3 square. Black must defend with 54...Kd7 55.Ke1

55...Na6! Suddenly the white king got too far away from the central pawns and the knight switches direction: 56.Ke2 Nb4 57.d6 Nc6 58.a6 Nxe5! 59.a7 Nc4+ 60.Ke3 Nb6 stops the pawns!) 54...Nb3+ 55.Ke4 White sacrifices his a5 pawn and hopes to promote the central ones with the support of the king. 55...Nxa5+ 56.Ke5 Nb3+ 57.Ke6 Nd4+ 58.Ke7

It seems like everything is going according to White's plan, but actually it is Black who is winning after the shocking: 58...Ne6+!! 59.Ke6 (59.dxe6 59...Kxe6+- Black collects all the pawns.) 59...Nxe5 60.d6+ Ke6 61.d7 Nf7+- wins.; 51...Ke6? did not work right away because of 52.Nc4+! Kxd5 53.Nxb2+-]

52.Nxe6+ Ke6 53.Ne5! The knight cuts the long diagonal and White is ready to advance his g-pawn.

53...♙xe5 [53...♙xd5 is simply refuted by 54.g6 ♔e6 55.g7+- as the knight also controls the f7 square.]

54.fxe5+ ♔xd5 [54...♙xe5 loses nicely to 55.g6! ♔f6 56.d6! ♖b8 57.a6!+- and one of the pawns promote.]

55.g6 ♔e6 56.♙g4 The rest is easy...

56...♖c7 57.♙h5 ♙xe5 58.g7 [58.♙h6+- was also winning on the spot.]

58...♖e8

59.g8=♔! The last accuracy, but of course to calculate such a thing on this level is very easy...

59...♖f6+ 60.♙g5 [Black resigned in view of 60.♙g5 60...♖xg8 61.a6+- and the pawn cannot be stopped.] **1-0**

**(15) Wojtaszek, Radoslaw(2744)
- Ding, Liren(2732)**

77th Tata Steel GpA(11.5),
2015.01.23

GM Arkadij Naiditsch
Best rating: 2737

After a quite turbulent game, we reached this interesting position. It is clear that White is at least equal, but does he have anything more than that?!

47.♔g4+ ♔f6 48.♔e6+ ♔g5 49.♔g4+ ♔f6 So after a few checks, White decides to continue the game.

50.♔xh4+ But now of course the black queen is coming into the game.

50...♙g5 51.♔e4! It is a good choice not to enter the endgame for White. Of course the 3 passed pawns could be very dangerous, but Black could also be very quick with creating a passed pawn on the queenside, and this pawn will run faster than the 3 white pawns.

51...♔e5 52.♔h4+ ♔g5 53.♔e4 ♔e5 and again after repeating the moves once, White tries to play on for a win.

54.♔c2 ♔e1+ A logical move, but maybe Black could have

played 54...Kg7 immediately to keep the queen on e5, but White would continue with 55.g3! followed by Kg2 and the white king would be safe on g2.

55. ♖h2 ♕g7 Ding Liren wants to weaken the white pawn structure as much as possible.

56. f3 It is clearly not a pleasure to play a move like f3, but it was the only way to protect the f2 pawn.

56... ♖e8 Black tries to place the pieces as actively as possible.

57. ♕f5? This is a serious mistake by White. Wojtaszek clearly underestimates the black chances in the endgame. [Maybe White should just have agreed that the position is around equal and make a draw after 57. ♗e4 57... ♖d8 58. ♗d5 ♖e8]

57... ♕e5+! and here comes the punishment! Ding Liren is perfectly right to enter this endgame where Black's chances are now already better.

58. ♕xe5+ ♖xe5 Black wants to play the simple Re1-Ra1 and attack the a4 pawn.

59. ♗e4 A very logical move. White is blocking the rook and preparing to push the kingside pawns.

59... ♖e6! Perfect play by Black! He needs to active the rook as soon as possible.

60. ♕g3 [It would have been worse to play 60.g4 60... ♖d6 61. ♗d5 a6! Not falling for the temptation of taking on d5... (61... ♖xd5? would not win for Black, but lose the game! 62.cxd5 c4 63.d6 ♕f7 64.g5 and the white pawns keep on running! 64...c3 65.d7 ♕e7 66.g6 c2 67.g7 c1=♕ 68.d8=♕+ ♕xd8 69.g8=♕+ with good winning chances for White.) 62.h4 b5 and the black pawns on the queenside are clearly faster than the white pawns on the kingside. Black is winning.]

60... ♖d6 61. ♗d5 It seems like White has blocked the black rook and the white king is getting to e5, but Black has something very nice in mind. ..

61... a5!! What a move! Black wants to play b5 next and White can't do anything against this plan. [61...a6 would have been a much worse choice for Black. 62. ♕f4 The white king is in time to stop Black's play. 62...b5 63.axb5 axb5 (Black is not

in time after 63...a5 64.♔e3 a4 65.♔d3 and the white king is easily stopping Black's a-pawn.) 64.♔e5 ♖b6 65.cxb5 ♖xb5 and only White can be better here, but most probably the position is a draw.]

62.♟b7? White has the idea of playing Ba6 and Bb5, holding both the a4 and c4 pawns, but it comes too late... [The best way to continue was 62.♟e4 and now Black has a lot of different options: 62...b5 (62...♖d4 63.♟d5 ♖d2 (63...b5 64.axb5 a4 65.b6 and White seems to be faster.) 64.♟c6 and White is fighting.) 63.cxb5 ♖d4 Black is getting the a4 pawn. 64.b6 ♖xa4 65.b7

65...♖b4 and here White has the amazing 66.♟c6! preventing Black from playing a4 because of Bxa4 and of course Black is still close to winning, but White can keep on fighting for a draw.]

62...b5 Now Black is creating a passed pawn and White cannot do anything about it...

63.cxb5 c4 64.♟e4 c3 Rd2-c2 is unavoidable.

65.♔f4

65...♖d2 What a sad loss for White, who clearly overpushed in a position where probably the best choice would have been to just make a draw. And clearly great play by Black, with the fantastic idea of playing a5-b5! **0-1**

Chess and the City. Good, Better, Gibraltar!

WGM Elisabeth Paetz
Best rating: 2493

The thirteen edition of what I would call THE most popular Open tournament of all time started just two days ago - Tradewise Gibraltar!

This is not just a tournament, it is one of the strongest Open tournaments of all time and has a very unique character. Besides having a wide range of side events, such as "Master Classes", "Team Blitz events" and the very famous "Battle of the sexes" (which was convincingly won by the weaker sex last year) etc. It is also the only tournament where Women have a double race. Since I am a woman myself, I obviously cannot admit that having a chance for winning a main prize, as well as an exceptionally large women's prize, is actually quite unfair. But it is not a secret in the Men's world that beauty actually HAS ITS PRICE! Over £15000 will be awarded to the highest place female in the Open. Is there any greater confession of love? No!

For me this year is actually quite special and different. For the first time in my life I am not participating as a player, but as live commentator!

GM Simon Williams, alias "Mr. h4", has been providing live commentary on this event for 3 years now, for the first 2 of which he was assisted by Irina Krush. However, this year she preferred to participate again, and the challenge of replacing her was offered to me. The picture below perfectly describes the result of this!

Last but not least I would like to give the following advice to all chess teachers: by all means have your pupils play through and enjoy this round one game, by Nakamura, but insist that they do not try to imitate it, unless they have his talent!

Clash of the Titans

1.c4 e5 2.♘c3 ♘c6 3.g3 g6 4.♗g2 ♗g7 5.d3 d6 6.♗d2 White could have played [6.♖b1 immediately.]

6...f5 7.♖b1 We have one of the typical positions in the English opening.

7...♗f6 [7...a5 Generally it is useful for Black to include the a5-a3 moves to open the a-file.]

8.b4 O-O [8...a6!? with the idea to open the a-file. 9.a4 O-O (9...a5!? 10.b5 ♗b4 This idea was used by Spassky.) 10.b5 axb5 11.axb5 ♗e7 transposes to the main plans.]

9.b5 ♗e7

10.♖c2 I'm not sure if this move was needed now.

10...h6 An useful move because Black is usually looking for counterplay on the kingside. A possible plan is g5-f5-Qe8-Qg6 or Ng6 etc...

11.e3 a6!? Black wants to open the a-file.

12.a4 [12.bxa6 This move normally makes no sense because White gets a worse structure, but it must still be checked. 12...♖xa6 with a small trap... 13.♖xb7!? A very interesting strategical sacrifice. (13.♗xb7? 13...♗xb7 14.♖xb7 ♖a8 15.♖b1 ♖b6 16.♖xb6 ♖xh1—) 13...♗xb7 14.♗xb7 ♖a7 15.♗g2

15...c6! A strong plan. Black is going to limit the bishop on g2 and fight for the center at the same time. 16.♗ge2 d5 17.cxd5 cxd5 18.O-O; 12.b6 This is a tricky idea but Black has the simple and strong 12...c6! (12...cxb6? is worse because of 13.♗a4 ♗d7 14.♗xb6! ♗xb6 15.♗a5 and White is much better thanks to the pressure on the b-file.)]

12...c5?! From a strategical point of view this move looks very ugly. The bishop on g2 becomes stronger now and the d5 square is weak. [12...axb5 13.axb5 c6 (13...g5 with the idea to create pressure on the queenside.)]

13.bxa6 [13.♗ge2 13...a5 14.O-O+= White always keeps the opportunity to push b6 and does not allow Black to close the position.]

13...♖xa6

14.♗ge2 [14.♖xb7!? was interesting too. 14...♗c6! Black plays for activity! (14...♗xb7 15.♗xb7 ♖a7 16.♗g2= The a-pawn and a strong bishop give White full compensation.) 15.♖b5 ♗b4 16.♖b1 e4∞ The black pieces become very active and White's problem is the king, which is still stuck in the center.]

14...♗c6 with the idea to bring the knight to b4.

15.♗d5 [15.♗b5 15...e4!? 16.dxe4 ♗xe4 (16...fxe4 17.♗c3! preventing Ne5.) 17.O-O with a slightly better position for White.]

15...♗xd5 16.♗xd5+ ♖h7

17.h4!? An original idea. White temporarily prevents g5. The most simple was [17.O-O+=]

17...♖e8! The queen on e8 helps with the f4 break, protects the knight on c6 and can attack the a4 pawn at some moment.

18.♖f1 [18.♗g2 with the idea to avoid Ne7, a plan we will see happening in the game. 18...f4 19.♗e4! f3 20.h5→ (20.♗c3 20...♗b4 21.♖xb4! cxb4 22.♗b5 ♗f5∞) ; 18.♖b5 18...♗a7; 18.O-O 18...g5 19.hxg5 hxg5 20.♖g2∞]

18...♗e7 19.a5 [19.♗xb7?? 19...♗xb7 20.♖xb7 ♖c6→+]

19...♗xd5 20.cxd5 From a strategic point of view the position is very interesting. Black has two bishops but on the other hand a limited rook on a6 and a weak pawn on b7.

20...♖f7 Let's check other ideas: [20...♗f6!? 21.♖c4 ♗d8 22.♖b5 b6 (22...♖f7 23.♖g2 ♖a7 24.♖hb1 g5↔; 22...♗c7 23.♖g2 ♖d8 24.♖hb1 (24.♖a1 24...b6↔) 24...♖a7 25.f4 ♖e8↔) 23.axb6 ♖xb6 (23...♖a1+ 24.♖g2 ♖xh1 25.b7! is an important trick, otherwise Black has Ba6.) 24.♖xb6 ♗xb6 25.♖g2 ♖f7 26.♖b1∞; 20...♖g8 21.♖g2 g5 is also interesting for Black.]

21.♖c4

21...f4!? **22.gxf4** According to the general rules, Black is going to open the position and activate his bishops, especially the light squared one.

22...♙g4 [22...exf4 23.e4 (23.♘xf4 23...♙e5 24.♙c3 and here Black doesn't need to hurry with taking on f4. 24...♙xf4 25.♖xf4 ♖xf4 26.exf4 ♖xf4 27.♖e1↑ and White has the initiative.) 23...f3 24.♘f4 ♖xa5! 25.♘e6 b5→]

23.♖g1 ♙f3 24.e4 exf4 25.♘xf4 [25.♖b5

This move was recommended by Alekhine, but now Black could maybe play 25...♙e5! 26.♖xb7 ♖a7 27.♖xf7+ ♖xf7 and the white pieces are very badly placed.]

25...♙e5 We will see that Black tried to solve his biggest problem of the limited rook on a6 by playing 26...Raa8, but here he missed a good chance... [25...♖xa5! A strong and nice move! 26.♘e6 (26.♖g3 26...b5! 27.♖c2 ♙h5 28.♙e3 ♙e5 29.♘h5 gxh5 30.f4

30...♙xf4! 31.♖f3 ♙xe3 32.♖xf7+ ♖xf7+ and the black pieces dominate the board.) 26...♙e2+ (26...b5 I'm not sure when exactly b5 is most accurate.) 27.♙xe2 ♖xf2+ 28.♙d1 b5 29.♘xf8+ (29.♖b3 29...♖xg1+ 30.♙c2 ♖g2 pinning the bishop.) 29...♙xf8 30.♖xb5 ♖xg1+ 31.♙c2 ♖a1 and the white king is under pressure.]

26.♘e6 ♖aa8 [26...♙e2+ 27.♙xe2 ♖xf2+ 28.♙d1 ♖xg1+ 29.♙c2+→]

27.♘xf8+? This move is premature! Objectively the knight on e6 can be even stronger than the rook! White could first play [27.♙e3! Simply protecting the f2 pawn and avoiding some tactical threats! 27...♖xa5 (27...♖fb8 28.♙xh6! A nice and unexpected move! 28...♙xh6 29.♖c1++→; 27...♙h5 28.f4!) 28.♘xf8+ ♖xf8 29.♖xb7+ ♙h8 30.♖b1! (30.♙e1 30...♖a1+ 31.♙d2 ♖xg1 32.♖b5 ♙f6! 33.♖b8 ♙d8 34.♖d7 ♙a5+→) 30...♖c8 31.♖b3 with the idea to exchange queens and White should win the game.]

27...♖xf8

28.♖b5? More accurate was [28.♗e3! and it is not easy for Black to develop his initiative now, for example 28...♗h5 29.♖e1 The idea is to escape with the king. (29.♖c2 The queen is back to defend the weak squares around the king. 29...♖f3 30.♖xb7+ ♖g8! We will see later why this move is more accurate than Kh8. 31.♗xh6 ♖h3+ 32.♖e1 ♖f3!? (32...♖f3!? deserves attention, with the idea Bc3. 33.♖b3 ♗d4 34.♖f1 ♖a8↔35.♖a3? ♖xa5!) 33.♖b3 (33.♖e2 33...♗c3+! just to force White to put the bishop on d2. 34.♗d2 ♗d4 35.♖d1 ♖g3 36.♖xg3 ♖f1+—; 33.a6 33...♖xd3 34.a7 ♗c3+ Now we see why it was more accurate to put the king on g8: White doesn't have Qxc3 check! 35.♗d2 ♖e3+! 36.fxe3 ♖xe3+ 37.♖f1 ♖e2#; 33.♖a4!! I analyzed this complex position without an engine, but with my friend, and there was only one great idea which we missed during our work. This move is just amazing! 33...♗c3+ 34.♖d1 ♖f7+ 35.♖c2 ♖xb7 36.♖xc3±) 33...♗d4 34.♖f1

34...♗e3!! (34...♗xf2+ 35.♖xf2 ♖xf2 36.♖xf2 ♖h1+ (36...♖xh4 is less accurate because of 37.♖b8+ ♖h7 38.♗g5!! A nice trick which immediately gives White a winning position.) 37.♖f1 ♖xh4+ (37...♖g2 38.♖b8+ ♖h7 39.♖f7+ ♖xh6 40.♖h8#) 38.♖d2 ♖h2+ 39.♖c1 ♖a2 40.♖b8+ ♖h7 41.♗d2 ♖a1+ 42.♖b1 ♖a3+ 43.♖c2 ♖a4+ 44.♖b2 ♖b5+ and Black has to fight for a draw.) 35.♗g5 (35.♖b8+ 35...♖h7 36.♖b2 ♗d4—) 35...♗xg5 36.♖b8+ (36.hxg5 36...♖e3+—) 36...♖g7 37.♖b7+ ♖g8 38.♖b8+ with perpetual check.) 29...♖f3 30.♖xb7+ ♖g8 31.♖d2 ♖e2+ 32.♖c1 ♖xf2 33.♗xf2 ♖xf2 34.♖h1 ♖g2 35.♖d1 (35.♖e1 35...♖f2 with a positionally drawn position. Once again we see how important it was to keep the king on g8, as in case king was on h8 White could play the amazing 36. Kb1!! 36...Qxe1+ 37.Qc1 now and after the queens exchange the a6 pawn will be decisive!) 35...♗xd1 (35...♗f4+ 36.♖b1 ♗xd1 37.a6 ♖f1 38.a7 ♗b3+ 39.♖b2 ♗e5+

40.d4!+- What a fantastic line!) 36.♔xd1 ♕f1+ 37.♔c2 ♕e2+ 38.♔b3 The most accurate. (38.♔b1 38...♕d1+ 39.♔a2 ♕a1+ 40.♔b3 and now Black can also take the pawn. 40...♕xa5∞) 38...♕b2+ 39.♔a4 ♕xb7 40.♕b5 ♕a8!

with a difficult to evaluate position. The a-pawn is very dangerous but Black has the defending idea c4-Bd4. You can try to analyze this position yourself if you want!]

28...♕xe4! 29.♕xb7 ♕xd3+ 30.♔g2 ♕e4+ 31.f3 [31.♔h3 is very risky because Black keeps the queens on the board after 31...♕f5+ 32.♔g2 ♕d7! 33.f4 ♕f5 34.♕b3 with very complex play.]

31...♕xf3+ 32.♔h3 ♕xd5 33.♕xf7+ ♕xf7 34.♕g1 ♕e6+ 35.♔g2 ♕f5 [35...♕d5+ Objectively a perpetual check was the best for Black.]

36.a6 White is pinning all his hopes to the a-pawn.

36...♕e4+ 37.♔h3 ♕g7 [37...♕a7 38.♕b7+ (38.♕b6→) 38...♕xb7 39.♕f7+ ♔g8 40.axb7 ♕a3+! 41.♔g2 ♕b3 42.♕e7 ♔f8 43.♕c7 d5 and Black is on time!; 37...♕xf1 leads to a very nice draw: 38.♕xf1 ♕d3 39.♕f7+ ♔g8 40.a7 ♔xf7 41.a8=♕

41...♕f1+ 42.♔g4 ♕e2+ with perpetual check!]

38.♕b6 ♕f5+ 39.♔g2 [39.♕xf5 only leads to a draw: 39...gxf5 40.♕b7 ♕xb7 41.axb7 d5 42.♔g2 ♔g6 43.♔f3 ♕b8! The only move. 44.♕f4 ♕a7 45.b8=♕ ♕xb8 46.♕xb8 ♔h5 and this position should be drawn.]

39...♕e4+ 40.♔h3

40...♕e7? The players were probably in time trouble! Black should have repeated moves. [40...♕f5+=]

41. ♘f4 leads to a drawish position by force. [41. ♖f8 41...c4 42. ♘f4 c3 43. ♘xe5 dxe5 44. ♔g3 ♜c7 preventing Rc8. 45. ♖f1 c2 with more or less equal chances.; 41. ♖e1! A strong move which could give White winning chances. 41...♘d5 42. ♘f4 and thanks to the a6 pawn White is better.]

41... ♖f7! 42. ♘xe5 ♜xf1 43. ♘xd6 ♜f3+ 44. ♔h2 g5 45. hxg5 hxg5 46. ♘xc5 1/2-1/2

Editorial Preface

And another great week of chess is behind us with 3 major events: the Tradewise Gibraltar Chess Festival, the Grenke Chess Classics and the Moscow Open.

Let's first come to the finished event in Gibraltar: What was one of the strongest opens in history (with Topalov, Nakamura, Svidler, Vitiugov, Jakovenko, Yu Yangyi and many more players over 2700 ELO) came to an end with the one player who started the tournament with 6/6 and finished on 8.5/10 taking it all, and that was Nakamura. The American didn't play the cleanest chess, but with his great passion and strong fighting spirit he looked for chances until the very end in all his games. A completely deserved tournament victory and Nakamura gets back the title of "best American player", which was briefly taken from him by Wesley So who had a great result in Wijk aan Zee. David Howell took clear second place with 8/10, which was a great surprise and probably his biggest tournament success so far.

Places 3-11 were shared by a group of players on 7.5/10, but on tiebreak the 3rd place went to Hou Yifan, who scored a great performance of 2772. It seems like there is another Judit Polgar on the rise...

In the Grenke Chess Classics only 3 rounds (out of 7) have been played. So far the biggest surprise of the tournament was probably that your commentator Arkadij Naiditsch beat Magnus Carlsen in an marathon 6-hour game (an endgame which you can find in this newsletter). Another upset is the result of Aronian, who had a bad start with 1/3 and even dropped out of the live Top 10 list. And to think that not so long ago Aronian was the clear number 2 with an ELO of 2830!

Moscow Open is a huge event with a lot of different

sections. Let us focus on the main section:

After round 5 Inarkiev is leading with a perfect score of 5/5, followed by Grachev, Nepomniachtchi, Mamedov and many more.

The Spanish number 1 Vallejo is on 4/5 and in a good position to try and catch the leader as soon as possible.

That's all from the major tournament news for the past week. We hope you enjoy our weekly chess material!

Two best games of the past week

(1) **Baramidze, David (2594)**
- **Naiditsch, Arkadij (2706) [A30]**

3rd GRENKE Chess Classic(4.1),
2015.02.06

GM Arkadij Naiditsch
Best rating: 2737

Before this game against my teammate I thought it would be great to get a wild position, as David is a strong player but a lack of practical play is visible in some of his games. He doesn't play too many games and from time to time he makes quite serious miscalculations. After a rare opening setup I was not happy at all with my position, but with the risky move 11.d4 Baramidze got himself into something he doesn't like too much: a crazy position. When things were probably already better for Black, but the position was still very sharp, White just made a huge blunder which cost him the game.

1.c4 This move came as a surprise to me. I had more expected 1.d4 and maybe 1.e4.

1...c5 David clearly also did not expect this, as my main moves on 1.c4 are 1... Nf6 or 1... e5.

2.g3 a set up with g3 is quite popular one

2...c6 3.g2 g6 Black has a lot of different ways to continue, but 3...g6 is a very solid try.

4.f3 g7 5.O-O Now I needed to decide whether to play 5...e5 or not. It is a very central line, where White usually continues with Nc3-Ne1-Nc2-Ne3, covering the d5 square. The position is close to equal but also very boring. I wanted to

have more dynamism in this game.

5...d6 6.Nc3

6...f5?! First I was quite happy with this try, but this move just makes little sense. The pawn is even sometimes better placed on f7. It was better to continue with 6...Nf6 or 6... Bd7 or 6...e5, with very usual play.

7.a3! An excellent reply by White. Of course the idea of b4 is standard, but it is very important not to move the d2 pawn too early, because in case Black goes Nf6 there is always d4.

7...a5 8.Bb1 Once again David is correctly waiting before moving the d2 pawn and prepares for the b4 break.

8...d7 A developing move and I also hope to maybe play a4 at some point.

9.b3! David is showing very deep understanding of the

position! At first sight b3 looks like an average move, but in fact it is a move which made me worry a lot. White's idea now is to play Ne1-Nc2 and b4, with a clear edge for White. What can I do to stop this?!

9...e5 Maybe not the best, but what else to play?! [For some time I was thinking about 9...f6 but White can still play 10.d4! e4 11.fxe4 fxe4 12.g5 fxd4 13.fxe4 and White's position is clearly better here. We can also see how useful the b3 move really is, as the white bishop is going to take a great position on b2.]

10.f5 Forcing my queen to take a passive position on b8.

10...Qb8

11.d4?! This move is really double-edged. There was no reason at all for White to play it. [After the logical 11.fxe1 11...f6 12.c2 O-O (12...d4? 13.cxd4 cxd4 14.fxb7 fxb5 15.fxa8 and White is an exchange up.) 13.b4 I think White's play on the queenside is quite serious and this is a rather unpleasant position for Black.]

11...cxd4 12.e3 Of course the idea to get some play in the center is the right one because of Black's bad development, but Baramidze probably missed my next move.

12...f6! This strong move turns the game around. [For a while I was thinking about 12...d3? but managed to find 13.e4! and because of my horrible development my position will fall apart.; Another option was to play 12...f6 13.fxa7 fxa7 14.exd4 e4 but now White has 15.fxe1 Of course things are not that clear here, but I had the feeling that White was going to continue with d5 and Be3-Nd4 and somehow I did not like my position too much.]

13.exd4?! I don't think this is the best practical choice. [During the game I mainly calculated 13.a4! It is very important to keep a good pawn structure. 13...d3 14.e4 the usual move 14...f6 15.exf5 gxf5 with a very complicated position.]

13...e4 14.f6 There is no better place for the knight.

14...h6 15.fh3 fxb5 16.cxb5 Now we can see why it was so important for White to play 13.a4. I would not have the d5 square for my knight now otherwise.

16...d5 17.f4 White needs to bring the knight into the game.

17...f6 Now it is all about whether I can hold my pawn structure in the center. In case I can, I will be clearly better. [It would be very bad now to be greedy: 17...c3? 18.fxc2 fxb1 19.fxg6 and because of my king's central position, White has

great compensation.]

18.f3!? After a long thought, Baramidze tries a very interesting move. Maybe it is really the best White has already. [In case of a passive move like 18.♖b2 18...♗xf4 19.♕xf4 O-O followed by g5 and d5, Black's pawns will start rolling on the kingside. I would say that White is already in quite some serious trouble.]

18...♗c3 I have to go for the exchange.

19.♖c2 ♕xd4+ It also looks very natural to win the d4 pawn and secure the bishop a great position on e5 for the future.

20.♔h1 Now I have 2 options...

20...♗xb1 I was not sure about this move but I hoped that being a rook up should give me some advantage. [Another move was 20...exf3 21.♕xf3 ♗xb1 22.♖xb1 and maybe 22...♖c8 but after 23.♕b2 the position is actually very wild. My king on e8 is experiencing big pressure and the white pieces are quickly joining the game.]

21.fxe4 is exactly the right way to play as White! [21.♖xb1 21...d5 and I think I can already say that Black is better now.; 21.♗e6 doesn't work because of 21...♖c8!]

21...♗c3 I need to keep being a rook up.

22.exf5 gxf5 We are in a funny position. Black is a full rook up, but because of the bad position of the king on e8 and everything sort of hanging, things are much more unclear than they look like at first sight.

23.♗g6?? What a terrible blunder by my opponent... [The right way to go on was 23.♕d2! This silent move is very strong. 23...♕e5 (23...♖c8 leads to a very unclear position. 24.♖d3 ♕e5 25.♖c1 ♖d7 26.♕xc3 ♖c8 and things are very wild...) 24.♕xc3 ♖c7 and maybe I can hope to be a bit better, but the main fight would still be ahead of me.]

23...♗xg6 24.♖xf5 and here comes the move that Baramidze missed:

24...♗e7 It wasn't too hard to find, but it simply wins the game.

25.♖f7+ ♔d8 Now I am already a rook and a piece up, which is just too much...

26.b6 ♖c8 27.♕xh6

27...dxe2 All in all it was an interesting game that came to an abrupt end because of a blunder of by my opponent and which brought me the tournament lead after round 4. **0-1**

**(2) Adhiban, Baskaran (2630)
- Nakamura, Hikaru (2776) [D20]**

Gibraltar Masters 2015(5.1),
2015.01.31

GM Csaba Balogh
Best rating: 2672

Nakamura started the Gibraltar Masters with 6/6. Let's see one of his spectacular wins.

1.d4 d5 2.c4 dxc4 The Queen's Gambit Accepted. Nakamura employs this weapon quite often recently.

3.e4 b5 Thanks to the French GM Romain Edouard, the following very interesting line connected with an exchange sacrifice came to the practice. Theory is just about to develop here. The two main lines are 3...Nf6 and 3... e5.

4.a4 c6 5.dxc3 a6 6.axb5 cxb5 7.dxb5 axb5! 8.Rxa8

8...Rxb7 This is basically the initial position of this variation. At first sight it is not clear what Black has got for the exchange, but things are not easy at all for White. The b5-c4 pawns are restricting the development of the white pieces and Black plans to set the central e4-d4 pawns under big pressure in the next few moves. White can retreat the rook to a2 or a1, actually

there are serious differences between those two. In most of the lines the rook is better placed on a2, but the drawback is that it stands in the Nc6-b4 tempo.

9.♖a1 e6 [On the direct 9...♗xe4 White could quickly undermine the queenside with 10.f3 ♗d5 11.b3!]

10.♘e2 [The alternatives are 10.f3 ; And 10.♘f3 ; 10.b3? now is obviously wrong because of 10...♗b4+ 11.♗d2 c3]

10...♗xe4 11.b3 [11.♘c3 is met by 11...♗c6 12.♗f4 ♘f6 Black already has a pawn for the exchange, a perfect pawn structure and the nice square on d5 for the minor pieces gives him excellent compensation.]

11...♗c6 12.♘c3?! This mistake already passes the advantage the advantage to Black! White tries to use, that the bishop cannot retreat to c6, but after having played b3, the c3 knight has lost it's stability. Black immediately makes use of it. [I have to admit, that I have also analyzed this opening and my preparation concluded, that White should go for 12.bxc4 12...♗b4 13.♘c3 ♘c2+ 14.♖e2 and here Black has nothing better than forcing a draw. He can do it in different ways, one of them is 14...♗xd4+ 15.♖e3

15...♗f6! White has to be careful which piece to take... 16.♗xe4! is the only move and Black has nothing better than (16.♗xd4 is wrong in view of the long and forced line

16...♗g4+ 17.♖xe4 f5+ 18.♖d3 ♘xf2+! 19.♖e3 f4+! 20.♗xf4 ♗c5+ 21.♖f3 (21.♖e2? 21...♗d3+ 22.♖e1 ♗xc3+--+) 21...♗f8+ 16...♗f5+ 17.♖e2 ♘d4+ 18.♖e3= with a repetition.]

12...♗b4! 13.♗d2

13...♗xc3! Very simple refutation of White's whole concept. Black creates an amazing dangerous protected passed pawn with b4-c3. All moves are coming with tempo.

14.♗xc3 b4 15.d5 White tries to complicate the matters, but it ends up badly for him. Other moves were hardly better either... [15.♗b2? is the worst in view of 15...c3 16.♗c1 ♘xd4--; 15.♗d2 15...c3 16.♗e3 ♘ge7+ followed by 0-0 and Nd5 is also great for Black!]

15...bxc3 16.dxc6 ♗xd1+ 17.♖xd1 [17.♗xd1 is not better either, because Black has the very strong intermediate move 17...c2! 18.♗c1 and he can already capture on 18...cxb3 because after 19.c7 ♖d7 simple stops the pawn.]

17...cxb3 Very picturesque position with such pawns for both sides, but the black ones are stronger. We dont meet often with such situations. White has to be careful to not surrender within a couple of moves.

18.c7! [18.♘b5 loses to 18...b2 19.c7+ ♔e7 20.♔e2 ♜f6—+ Black stops the c-pawn, while his own pawns are promoting.]

18...♔d7 19.♖a3! White finds the only way to stop the pawns.

19...b2 20.c8=♖+! White had to sacrifice his own triumph to eliminate the more important one on c3 with check!

20...♔xc8 21.♖xc3+ ♔d7 22.♘d3! There was nothing better again! White recaptures on d3 with check, therefore Black must promote his pawn right away.

22...b1=♖+ 23.♘xb1 ♘xb1 It seems to be all over, Black wins with decisive material advantage, however things are far from clear yet. White retains his chances to save the game by using the temporary misplacement of all black pieces...

24.♖b3! Attacking the bishop with tempo and the rook

invades to b8 next move, pinning the undeveloped pieces.

24...♘e4 25.♖b8 g5 A clever move! Black opens a path to g7 for his king to defend his pieces. He also keeps the option of defending with h6 and Bh7. [There was no time to grab more pawns with 25...♘xg2 White's counterplay is coming too fast after 26.♖g1 ♘f3+ 27.♔d2 g6 28.♖g3 ♘d5 29.♖c3! and the other rook also arrives to the 8th rank. Black does not have more than draw after 29...e5 30.♖cc8 f6 31.♖d8+ ♔c6 32.♖bc8+ ♔b7 33.♖b8+ ♔c6=]

26.♔e2 ♔e7 Heading to g7.

27.h4 In general it is good to trade pawns for the defensive side. Also the Kf6-g7 plan becomes more shaky now because of the checks on g4. [Black is in time after 27.♖c1 27...♔f6 28.♖cc8 ♔g7+ The knight is saved, but it is still not easy to finish the development. Perhaps something like, Bg6, f6, Bf7, followed by h5-h4-g4 and Rh5 might rescue the black pieces from the cage.]

27...gxh4 28.♖xh4

28...♘c6! We should never worry about Nakamura's resourcefulness in unusual position! He intends to rescue his pieces with Be8 and Nf6. [28...♘g6 is less clear because 29.♖c4 ♔f6 30.♖cc8 ♔g7 31.♖e8! preventing the f6-Bf7 idea and it is not obvious how Black could make progress.... Losing

one of the pawns, for instance f6, Rxe6 Bf7 in order to develop the knight next move leaves too limited material on board. Black could hardly win with the 2 minor pieces against the rook with only 2-2 pawns on the board, having them on the same side.]

29. ♖c4 [29. ♖g4 is also met by 29... ♕e8]

29... ♕e8! 30. ♖c7+ ♔d6?! A mistake which could have cost to a half point... [30... ♖f8 should have been played and Nf6 or Ne7 next move.]

31. ♖a7? Spoiling the chance. [It was very difficult to realize over the board, that the b5 square must be under the control of the rooks to avoid Bb5 in some lines! 31. ♖cb7! seems to save the game. Black has nothings better, than 31... ♘f6 (The hidden point is after 31... ♘e7 like it happened in the game, White has 32. ♖d8+! ♕e5 33. ♖bb8! and there is no check on b5, because White captures it with check!) 32. ♖xf7 should secure the draw for White fairly easily.]

31... ♘e7!! Brilliant idea! This is what Nakamura had in mind, when he moved his king to d6! In comparison to the Nf6 move, the f7 pawn is protected now! The hanging pieces are always saved by the tactical motif of Bb5 check.

32. ♖d8+ [32. ♖aa8 moves into 32... ♕b5+! and the bishop cannot be taken.; If White leaves from the b5 check, then

Black has 32. ♕e1 32... ♘c6 33. ♖a6 ♕c7 consolidating.]

32... ♕e5! 33. ♖b7 Realizing the importance of the b5 square, but it is too late... [33. ♖xe7 runs again into 33... ♕b5+ 34. ♖d3 ♖d8! winning the full rook otherwise White could have saved the rook endgame with 3 vs 2.]

33... ♕f6! Protecting the knight and creating the threat of Bb5 by leaving the 5th rank and avoiding capturing it with check.

34. ♖db8 [The usual problem again, that 34. ♖bb8 allows 34... ♕b5+!; If White leaves from the b5 check with 34. ♕e1 he moves into another tactical motif 34... ♕c6! 35. ♖xh8 ♕xb7 36. ♖xh7 ♕xg2—+]]

34... ♘g6 The rook is protected now and Black is ready to move his bishop.

35. ♖b6 h5 36. f3 ♕a4 37. ♖xh8 ♘xh8 With huge efforts Nakamura successfully rescued his pieces and saved all of his pawns. The rest is just the matter of technique. Black improves his position move by move, he has all the time to make progress...

38. ♕e3 ♘g6 39. ♖a6 ♕b3 40. ♖a5 ♕d5 41. ♖a7 e5 Slowly advancing the pawns.

42. ♖a5 ♕e6 43. ♖b5 h4 Fixing the one on g2. If White manages to trade it with g3 it is also not a disaster. Black

creates a passed pawn from his extra pawn and with the help of the minor pieces he slowly promotes it.

44.♖b1 ♔g5 45.♗b5 f6 46.♗b7 ♘f4 47.♕f2 ♘h5 48.♗b6 ♙f5 49.♗b8 ♙g6 50.♗b4 ♘f4 Black does not need to hurry...

51.♗a4 ♙f7 52.♗a7 ♔g6 53.♗a1 ♙d5 54.♗d1 ♔g5 55.♗d2 f5 [55...f5 White resigned. Let's see some illustrative lines what happens if White tries to resist a bit longer 56.g3 (56.♗d1 56...e4 57.fxe4 ♙xe4—+) 56...hxg3+ 57.♕xg3 and here the easiest plan to win the game seems to be 57...♕f6 58.♕f2 ♕e6 59.♕g3 ♕d6 protecting the bishop in order to free the knight. Black plays Ne6 next move, followed by f4, fixing the weakness on f3 and winning it with Nd4!]

0-1

David vs. Goliath

Peter Zhdanov
Chief Editor of Pogonina.com

In this special column we are reviewing the most unexpected results that occurred last week. Players usually face opponents of a similar level. Considerably less frequent are situations when a significantly lower-rated player succeeds in beating a much stronger adversary.

The previous week has brought us only 18 upsets - again! Nevertheless, the average gap between the ratings of the winners and the losers is relatively large - 445. The number of moves ranges from 22 in Rodriguez Alvarez (2122) - GM Lalith (2537), 1-0 to 78 in Battaglia (1690) - Gueci (2010), 1-0. The "Goliath of the week" title goes to the formidable-looking GM Denis Khismatullin (2673) who lost two games at the Dvorkovich Memorial. The Davids were FM Andrey Esipenko (2271) and FM Roman Oganisian (2304). In the next column we are expecting annotations to the Esipenko-Khismatullin game by the White player, one of the most promising Russian juniors, and his coach GM Dmitry Kryakvin.

"Check your facts" alert: when going over the latest TWIC I have taken note of two losses by GM Kevin Spraggett in the early rounds of Gibraltar Masters. However, my impression was that this wasn't really the case. After visiting the official site I have discovered that the results were indeed incorrect:

the Canadian GM won both games. Moreover, TWIC #1056 has been trying to convince me that Kevin has played two games against Pedro Godinho Marques in one tournament...In fact, such mistakes are quite widespread, so please make sure to consult the official sources of information when you stumble upon something supernatural. I am practicing what I preach, but occasional errors are inevitable.

Top-10:

Cretnik (2142) - Marn (1446), 0-1, [696](#) points
 Maltsevskiy (1760) - Osoblivi (2272), 1-0, [512](#) points
 Bayramov (2051) - Gasimov (2517), 1-0, [466](#) points
 Galmandakh (2240) - Motylev (2665), 1-0, [425](#) points
 Rodriguez Alvarez (2122) - Lalith (2537), 1-0, [415](#) points
 Drobnic (1915) - Vasiljevic (1507), 0-1, [408](#) points
 Esipenko (2271) - Khismatullin (2673), 1-0, [402](#) points
 Sevdimaliev (2505) - Asadli (2127), 0-1, [378](#) points
 Nemec (1808) - Kersic (2183), 1-0, [375](#) points
 Izzat (2424) - Bayramov (2051), 0-1, [373](#) points

Average gap: 445; White won 6 games, Black won 4 games.

You can view all the games in the accompanying pgn file.

If you have ever won a game against someone rated 300 points or above yourself, please send it to peter@pogonina.com for publication. Any additional information (a photo, annotations, etc.) will be appreciated.

Best rating: 2737

After a very turbulent game where I had very good winning chances- which I missed in time trouble- we are looking at an interesting endgame. The first question should be to ask who is better here? Black has 3 pawns for the piece and opposite colored bishops. From a strategical point of view White's position should somehow be better, let's say in case of a rooks exchange it is clear that White will be doing better by attacking the a5 pawn and the other black pawns, but on the other hand in case the black pawns start to move the position should just be a draw.

41.♖d1! I am not sure if this was the best move, but I liked the move a lot. My threat is simple, to play Rd4 or Nd4 next.

41...♖g4+ This is probably also the best.

42.♔f1 [In case of 42.♔h3 42...♖f4 I probably I probably don't have anything better than to go back to g2. 43.♔g2 (Of course not 43.♖d3? 43...g5) 43...♖g4+ and we are back in the same position.]

42...h3 I wasn't really sure if this move was really needed for Black. Of course it is great to have a passed pawn on h3, but on the other hand the h3 pawn could become a target and in case Black lost the h3 pawn the position should already be winning for White.

43.♖d3 with the simple idea of playing Nh2 next.

43...♟f6! A very strong move, using the fact that I can't take on d6. Black's idea should basically always be to play g5-g4 and connect the pawn structure, which I should of course avoid.

44.♘h2 I continue my strategy of playing against the h3 pawn. [In case of 44.♖xd6 44...♖f4 45.♖d3 g5 followed by g4 next, I think the position should be a draw.]

44...♖h4 45.♔g1! The beginning of a nice plan. First I need to move my king to free my knight from h2.

45...♟d4 46.♖f3 protecting the f2 pawn and at the same time playing against Black's idea of g5-g4 because now the f5 pawn is going to be hanging.

46...♔f6 47.♞f1 Now that the white king can easily stop the black h-pawn, it is time to bring the knight back into the game.

47...♙e5 48.♞e3 White already has the serious threat of playing Nc4 in a good moment.

48...♙g5?! The World Champion starts to go into the wrong direction... [Black can't wait any longer and really needs to act fast to prevent me from being in time with the Nc4 move. 48...h2+! Of course it is very risky to put the pawn on h2 as it can now easily be attacked but Black is getting active play for it. 49.♔h1 ♖d4! The black rook will take a great position on d2. 50.♙g2 ♙g5 avoiding all the tricks. 51.♞h3 d5 and of course Black still has a serious fight for equality, but objectively the position should probably be very close to equal.]

49.♔h1! and this is probably the winning move of the game! Calm but deadly... As is often the case in endgames, the silent Kh1 creates the deadly threat of Nc4. [49.♞c4? was premature since after 49...♞g4+ 50.♔h1 Black saves the game with 50...♔h4! defending the h3 pawn. The position should be around equal now.]

49...♙f6?! It is strange that Carlsen didn't seize his best practical chance... [Probably the best practical choice would have been 49...♞f4!? and now White has 3 different options:

50.♞xf4 (It is very hard to say if White can win the position after 50.♞xf4 50...♞xf2 51.♞c4 attacking the e5 bishop and the a5 pawn. 51...♙f4 52.♞xa5 g5 and my feeling tells me that Black should be able to save the game, even if things are still pretty unclear.; 50.♞g3+ 50...♔h4 51.♞xg6 ♞xf2 52.♞h6+ ♙g3 53.♞f1+ ♙g4 54.♞e3+ ♙g3 leads to a forced draw.) 50...♙xf4 and again we are in an endgame where it is very difficult to say if White is winning or not. .. 51.♙e8 There are of course many other possibilities. 51...g5 52.♙d7 We can clearly see how good it is for White that the bishops are not of the same color, as Black can't defend his pawns from a double attack. 52...♙f3 53.♙xf5 ♙xf2

54.♞c4 and once again only an in-depth analysis could clarify whether White really has enough for a full point here.]

50.♞c4 Now the a5 pawn is falling.

50...g5 Black doesn't have anything better than to try and create counterplay as quickly as possible.

51.♞xa5 g4 52.♞d3 f4 and I am in time for

53.♞c4 stopping Black from playing g3 just in time. Here I started to feel that a win over the World Champion was very very close...

53...Rc7 I have to push my a-pawn and avoid the g3 move at the same time. [53...g3 of course didn't work since after 54.fxg3 fxg3 55.♘xe5 g2+ 56.♙h2 White is easily winning.]

54.♘xe5 is maybe not the best, but from a practical point of view it is a very logical move. Now I don't need to care about the unpleasant g3 threat anymore.

54...dxe5 55.a5 It is time to push the pawn.

55...Rc7 The rook must be activated.

56.♖a3 This is a risky move at first sight, but before playing it I calculated the complications until the end and hoped to be right.

56...♖c1+ This is Black's only chance. To wait for a6 and to play Ra7 is clearly not an option because of Bc6-Bb7 and the black rook would be trapped on a7.

57.♙h2

57...♖c2 Black will win the f2 pawn.

58.a6 ♖xf2+ 59.♙h1 Black has a huge armada of pawns advancing but White is just faster.

59...g3 60.a7 The bishop from b5 covers the f1 square.

60...♖d2 [60...♖b2 61.♖a1 wouldn't change anything...]

61.♖a1 and the game is over. Black can't stop White from playing a8Q and after a line like 61.... Rh2 62.Kg1 Rg2 63.Kf1 Rf2 64.Ke1 h2 65. a8Q, the queen covers the h1 square. I can tell you guys that there is no better feeling than beating the World Champion in a difficult, 6-hour game! :) **1-0**

**(14) Nyback, Tomi (2603)
- Braun, Arik (2549)**German league,
2015.01.31GM Csaba Balogh
Best rating: 2672

The players have reached a study-like endgame. White has an extra pawn and a huge protected passed pawn on e6, but Black seems to create an unbreakable fortress. The white king is also a bit trapped, sometimes Rb3 check can be unpleasant.

44. ♖c6+! The only one and an excellent attempt to break through! White sacrifices his knight to create even more passed pawns.

44...bxc6? Wrong decision, most probably based on a miscalculation. [Black should have tried to keep the pawn structure with 44...♙f6! 45. ♖a3! my teammate Arik Braun was rightly afraid of this move and White saves himself from the b3 check, the knight endgame is winning and if Black leaves the 3rd rank, White can already invade on a8. (Black must be very careful after 45.e7 45...♖b3+! It is necessary to insert this check before catching the pawn with Kf7. (45...♙f7? right away moves into

46. ♘e5+! The desperado knight continues his journey! 46...dxe5 47. ♙xc5 ♙xe7 48. fxe5+-) 46. ♙a5 ♙f7= and White cannot make progress.) However Black has

45...♖f3! A great resource! Black keeps the 3rd rank under control and the rook cannot be taken because the f-pawn becomes unstoppable. The game remains unclear after all! (45...♖xa3? loses to 46. ♙xa3 ♘d3 White has other wins too, but a pretty one is 47.e7 ♙f7 48. ♘d8+ ♙xe7 49. ♘xb7 ♘xf4 50. ♘c5! ♙d8 51. ♘e6+! ♘xe6 52. dxe6+- and one of the pawns promote.)]

45.dxc6! White is winning now, but it still requires very good technique! It is very important to keep the rook on a2 to keep control over the a3 square. After the invading of the rook, Black could have the option of Rb3 Ka5 Ra3. [45. ♖a7+ leads only to draw after 45...♙e8 (But not 45...♙f6?? because

of 46.♖f7#) 46.dxc6 (46.♖a8+= White can also give perpetual check.) 46...♖b3+ 47.♔a5 ♖a3+ 48.♔b5 ♖b3+ Black survives with perpetual.]

45...♖b3+ [45...♔xe6 is refuted by

46.♖e2+! An important intermediate check to send the king away from the connected pawns... 46...♔f7 47.c7! And now, when Kd7 does not work anymore, White advances his pawn and in the same time opens a shelter for the king on c6 against the checks... 47...♖b3+ 48.♔a5 ♖a3+ 49.♔b5 ♖b3+ 50.♔c6+--]

46.♔a5 ♔d8 [The only refutation of 46...♔xe6 is 47.♖e2! pinning the knight and White is ready to advance his passed pawns... 47...♔f6 48.c7+--]

47.c7+! ♔c8

48.e7! Excellent play by White! He lures away the rook from the b-file to rescue his king from the edge of the board!

48...♔b7+ [48...♖e3 loses to 49.♔b5! Threatening with Ra8! 49...♔d7

50.c8=♖+! (But not 50.♖a8?? because of 50...♖b3+ and Ra3 next wins the rook and the game.) 50...♔xc8 51.♔c6! ♔b8 52.♖a7+-- (52.♔xd6 wins as well 52...♔b7+ 53.♔d7 ♔c5+ 54.♔d8 ♔b7+ 55.♔e8+-- White has too many passed pawns.)]

49.♔a6 ♔c5+ 50.♔a7 ♖e3 Black's clever idea to trap the white king with two checks seems to be successful! Kb5 does not work anymore and the e-pawn is also stopped. However Tomi Nyback finds another beautiful motif!

51.b7+! The key is again to rescue the king from the a-file and let the rook penetrate over a8!

51...♟xb7 52.♔b6! ♕d7 [52...♖b3+ 53.♔c6+- is over.]

53.♟xb7 ♖b3+ 54.♔a6 Unfortunately for Black, he cannot take any of the passed pawns...

54...♖e3 Black is already threatening with Kxc7 and Kb6 or Kb7 is met by a check on b3 and the rook goes back to e3. How could White make progress?

55.♖a5!! Another brilliant idea and Black runs out of defensive resources. White intends to play Kb7 because after Rb3 he already has Rb5.

55...♟xc7 [55...♖xe7 loses to 56.♔b7 ♖e8 57.♖d5 other moves are also good. c5 is coming next, while after 57...♖c8 58.♖xd6+!+- wins.]

56.♖e5! This is the point of the previous move and we can also see the reason why White has moved his king to a6 in move 54, to avoid getting mated after Ra3.

56...dxe5 57.e8=♔ The rest is clear!

57...exf4 58.♔xg6 ♖e5 59.c5 ♖d5 60.♔b6+ Black defended resourcefully and tried everything, but White's play was just amazing! **1-0**

Chess and the City. The Battle of the Sexes.

WGM Elisabeth Paehtz

Best rating: 2493

The Battle of the Sexes is THE highlight of the Gibraltar Chess Festival!

It was held for a third time in a row this year, and proves a bitter and merciless fight among the strongest men and women participants of the Master's tournament.

After a bitter defeat of the men's team in 2014 (lead by several-time winner of the Gibraltar Master tournament GM Nigel Short), it was time for revenge and in 2015, the men's team were true to their word.

(The women's winning Team of 2014) (from left to right: Cmilyte, Krush, Hoang, Sachdev, Tournament Organizer Brian Callaghan, Vojinovic, Paehtz, Zhukova)

(Strong but not strong enough - Team of 2014 lead by Team Captain Nigel Short)

Unfortunately, the team of Agdestein, van Kampen, Vachier, Dubov, Ganguly, Rapport back in 2014 turned out not to be competitive enough. Instead, the men sent out a much more serious and stronger team this year; but have a look yourself...

(From left to right: Nakamura, Wei Yi, Cheparinov, Ganguly, Svidler)

And their team captain...

(...Veselin Topalov)

Facing such opponents meant for a very tough upcoming match, so naturally we had to an alternative method of compensation...

Our new Team Captain Antoaneta Stefanova did not lose the moment of opportunity and requested a time bonus of an extra 2 minutes before the start of the fight. Taking into account that sport is involved, high heels could turn out to be a huge disadvantage, but obviously lacking such experience themselves the two male arbiters did not seem to be too convinced!

(Women's team in 2015 (from left to right: M.Muzychuk, Zhukova, Stefanova, Melia, Paehtz, Houska, Dronavalli, Sachdev)

Comparing both teams, I have to honestly admit that our chances were not too great this year, and eventually we had to face a bitter loss of 2,5 - 1,5.

Last but not least my last attempt of "I do not let you push the clock" cheating was applied, but this eventually did not help to change the final result. For more pictures about this great event, you too can have a look yourself at the official webpage of the Tradewise Gibraltar Festival 2015:

GM Kamil Miton
Best rating: 2655

1.e4 c5 2.♘f3 d6 3.d4 cxd4 4.♘xd4 ♘f6 5.♘c3 e6 6.♙e2 a6
7.O-O ♚c7 8.f4

8...♘bd7 Black had a few other options to develop the pieces, for example [8...♙e7 9.a4 O-O 10.♚h1 ♘c6 11.♙e3 ♚e8 and the game transposes to the main Sheveningen line.]

9.g4 This is a typical reaction. White very often plays g4 with idea to push g5 and then the knight from f6 needs the d7 square which is now occupied. More accurate was [9.♙f3 White temporarily stops the b5 move and the bishop is useful on f3 anyway. 9...♙e7 10.♚h1 O-O 11.g4 with better version than in the game.]

9...b5 10.a3 [After 10.g5 Black of course plays 10...b4!]

10...♙b7 11.♙f3 ♘c5 12.♚e2

12...e5!? This kind of move is very risk because now the d5 and f5 squares are available to the white knights. More solid was [12...♙e7 13.g5 Now black has the d7 square for the knight! 13...♘fd7 14.b4 Otherwise Black will play Nb6 with good play, when White will need to lose some time to regroup his pieces like Bg2-Rf3-Rh3 to put pressure on the black king after 0-0. 14...♘a4 15.♘xa4 bxa4 16.♙b2 ♚c8∞It is very important to take control of the c-file and the c4 square, otherwise White will play c4-Rac1.; 12...h6 13.g5 hxg5 14.fxg5 ♘fd7 15.b4 ♘e5!? is an interesting idea. Black gets a pawn and the strong e5 square for the piece, with for example this forced variation: 16.bxc5 dxc5 17.♘b3 c4 18.♘d4 ♚d8 19.♙e3 ♙c5 20.♚ad1 ♚b6 21.♚f2 ♚xd4 22.♙xd4 ♘xf3+ 23.♚xf3 ♙xd4+ 24.♚g2 ♚c7 25.♚xf7+ ♚xf7 26.♚xf7 ♚xf7 27.♚xd4 ♙e7 with a better endgame for Black.]

13.♘f5 [13.♘d5 was promising for White as well and after 13...♘xd5 14.exd5↑White gets the useful c6 square.]

13...g6 14.fxe5 [14.♘e3 14...exf4 (14...♙e7 is too slow. 15.g5! ♘fxe4 16.♘ed5+—) 15.♘ed5 ♙xd5 16.exd5+ ♙e7 17.♙xf4 Now the question is whether Black manages to get control over the dark squares in time. 17...O-O 18.g5! limiting the black pieces, stopping a potential Bf6 and forcing Black to put the

knight on e8, not d7. 18...♖e8 19.♗ae1! The black pieces are losing coordination. 19...♙d8 (19...♗a7 20.b4 ♖a4 21.♖xa4 bxa4 22.c4±)

20.♗xe8! ♗xe8 21.♗xe8+ ♖g7 22.♙e3 The bishop joins the attack. 22...♖d7 23.♖e4 with a huge initiative for White.]

14...dxe5 15.♖h6 The idea is clear, White is going to take advantage of the f-file which is weak and put pressure on the f7 pawn.

15...♖e6 A logical move and one of the ideas is to play Nf4 to close the f-file.

16.♙g2 ♙g7 [16...♖f4!? 17.♙xf4 exf4 18.e5 ♖d5! 19.♖xd5 ♙xd5 20.♙xd5 ♗c5+ 21.♗f2 ♗xd5 22.♗ad1∞]

17.♗xf6!? [17.♖d5 17...♖xd5 (17...♙xd5 18.exd5 ♖d4 19.♗f2

♗xc2 20.♙g5 ♗xf2+ 21.♗xf2 ♙xh6 22.♙xf6 O-O 23.d6 ♗ad8 24.g5 ♙g7 25.♙e7 White is not in a hurry with winning material and thanks to the strong bishops and the d6 pawn White keeps the pressure on.) 18.exd5 ♖d4 19.♗f2 f6 Black solves the problems with the f7 pawn and can escape with the king by castling queenside. The position is very complex.]

17...♙xf6 18.♖d5 ♗d8 [18...♙xd5 19.exd5 ♗b6+ (19...♖d4 20.♗f2 ♗a7 21.♙e3 (21.♗xf6 21...♖f3+ 22.♙f1 ♗g1+—) 21...♙h4 22.♗xh4 ♖f3+ 23.♙xf3 ♗xe3+ 24.♙g2 e4 25.♗f1 exf3+ 26.♗xf3 looks dangerous for Black.) 20.♙e3 (20.♙h1 20...♖d8 protecting the f7 pawn, with an unclear position.) 20...♖f4 21.♗f2 (21.♗e1? 21...♖xg2—) 21...♗c7 22.♗e1 O-O-O 23.♙b6

23...♙h4! 24.♙xc7 ♙xf2+ 25.♙xf2 ♖xc7 26.♖xf7 ♗df8 27.♖xh8 ♖d3+ 28.♙e2 ♖xe1 29.♖xg6 hxg6 30.♙xe1 ♗f4 31.h3 ♖d6 32.♙e2 g5± and Black should win.]

19.♗f2 White follows his plan to put pressure pawn on f7.

19...♖f4 20.♙xf4 exf4

21.e5 White could also play [21.♖xf4 21...♗d4+ (21...♗xd5 22.exd5 ♖b6+ 23.♔h1 O-O-O The king must escape. 24.♗xf7 ♗xb2 25.♖f1 ♖hf8 26.d6! with the idea Qe4 and the black king is still in some trouble. White has a strong attack.) 22.♔h1 ♗xd5 23.exd5 ♖f6 24.♖e4+ (24.♖c7 24...♖a7 25.♖c8+ ♖d8 26.♖e1+ ♖e7 27.♖xe7+ ♔xe7 28.♖b7+ ♖d7 29.d6+ ♔xd6 30.♗xf7+ ♔e7 31.♗xh8 ♗xh8 and being a pawn up will not be enough to win the game.) 24...♖e5 25.♖e1 f6 26.d6! ♖c8 27.♖d1 ♖xe4 28.♗xe4 ♗xb2 29.d7+ ♔e7 30.dxc8=♖ ♖xc8 The extra pawn and the bad knight on h6 give Black good practical chances.]

21...♗xe5?? The decisive mistake. Now the rook is joining the attack! Black should play [21...♗h4 22.♖d4 (22.♖c5 22...♖c8; 22.♗f6+ 22...♖xf6 23.exf6 ♗xf2+ 24.♔xf2 ♗xg2 25.♖e1+ ♔d7!]

26.♖e7+ ♔c6∞) 22...♖f8 stopping the e6 move. 23.♖d1 White has a strong initiative but Black is still in the game.]

22.♖e1 f6 Other moves didn't help either... [22...♗xd5 23.♖xe5+ ♗e6 24.♗c6+ ♔f8 25.♗xa8 ♖d6 (25...♖xa8 26.♖xe6 fxe6 27.♖d4 ♔e7 28.♖g7+ ♔d6 29.♗f7+ ♔d5 30.♖e5+-) 26.♖xf4 ♔g7 27.♗f3 f6 28.♖e4 ♖xf4 29.♖xf4 ♔xh6 (29...♖f8 30.g5+- with the idea Ng4.) 30.♖xf6 ♖e8 31.h4 and White is just a pawn up.; 22...♖d6 23.♖d4 O-O-O 24.♖xe5 ♖hf8 25.g5!± followed by Ng4, with good cooperation between the white pieces.]

23.♗xf6+- White is winning very simply now.

23...♖xf6 24.♖d4 ♔f8 25.♖xe5 ♖d8 [25...♖d8 26.♖e8+ ♔g7 27.♖e7+-]

26.♖f5+ gxf5 27.♖xh8+ ♔e7 28.♖g7+ ♔e6 29.gxf5+ 1-0

Editorial Preface

Magnus Carlsen wins his second Super Tournament in a row, scoring 4,5/7, the same as your commentator Naiditsch, and winning the tiebreak in the armageddon game with the white pieces. This exciting tiebreak has been analysed for you by Arkadij in the current issue.

The 3rd place was shared by Michael Adams and Fabiano Caruana, both on 4/7. Anand result of 2.5/7. And Aronian's 3.5/7 were both somewhat disappointing.

The Moscow Open was won by Invarkiev with a fantastic 8/9, which brings his ELO very close to 2700. The second place was shared by Korobov, Vallejo, Petrosian and Artemiov, all with 7/9.

The female section was won by Lei Tingjie with 8/9, 2nd place went to Goryachkina Aleksandra and 3rd to Mirzoeva Elmira with 7/8.

In the current issue you will also find the final report on the Gibraltar Open and very exciting articles by Khalifman and Zhdanov!

Already this week we will be able to follow another Super Event in Zurich, with the participation of Carlsen, Caruana, Nakamura, Aronian, Karjakin, and Anand.

Enjoy your "Top GM Secrets Nr 155"!

Six best games of the past week

GM Arkadij Naiditsch

Best rating: 2737

We are in the last round of Grenke Chess Classics 2015. I am on +2 and playing my game with White pieces against Aronian. Magnus Carlsen is having same points and playing White against Bacrot. Half a point behind us is playing Caruana with Black against Baramidze. In case of same points-there is a tiebreak for the first place. I started my game with a save opening where I quickly got a promising position, so after around 3 hours of play, I reached a rook endgame which I though is close to winning. As well the position of Magnus Carlsen been looking very promising against Bacrot. We went into short time trouble where I clearly missed good winning chances which made me very upset, cause I been almost sure that Magnus has meanwhile won his game, but... the World Champion has blundered away his winning position and agreed already shortly after move 40 to a draw. My position still remained a bit better, but it was just a draw, after another hour of trying I had to shake the hand with a draw offer. I been very upset not to win it but felt as well a bit happy about that in worse case I share the places 1-3 and still have my chances in the tiebreak. Caruana been doing very well against Baramidze and it looked like there is going to be a tiebreak with 3 players. After a short press conference, my wife and me desided to have a small snack to have more energy for the upcoming

match against the World Nr1 and World Nr2 and of course had the Caruana game running on our mobile phones. Caruanas game remained a rolercoaster between win and a draw, so finally, after over 6 hours of playing Baramdze held the draw-it ment a match against Magnus Carlsen for the first place. I been very excited and happy to compete with the best in a mini match out of 2 games with time control of 10m plus 2 second per move for the title of Grenke Chess Classics 2015. Meanwhile we had already 20 to 10pm, and the organizers had called me that the match with Carlsen will start at around 10pm. You can imagine, in case Caruana would have won his game how late the tournament might have finished -I would guess not earliar than 2am ! I think many top players are very scared of Magnus, for me it was pure excitement. I am not bad in rapid chess, but I am not good at all in blitz, so I though my best chances are in 10m +2 second rather than in case of 1-1 in blitz wih 5 min +2 second. So, let us take a look how the match would developed.

(1) Carlsen, Magnus (2865)
- Naiditsch, Arkadij (2706) [E11]

3rd GRENKE Classic TB(1),
 2015.02.08

The tiebreak has begun for me with a horrible game! I came out nicely out of opening, but started to make very bad desicion and ended up in totally hopeles endgame where I just had no moves. A terrible loss :)

1.d4 ♘f6 2.c4 e6 3.♘f3 ♙b4+ I like to play 3...Bb4, it is a save line where as Black You dont need to know too much theory

4. ♘bd2 [4. ♙d2 is the other main line]

4...b6 5.a3 Bacrot continued against me with 5.g3 but of course 5.a3 is one of the main moves

5...♙xd2+ 6. ♖xd2 first Qd2 is looking like a strange move, but the White bishop is going to take a nice position on b2

6...O-O 7.e3 ♙b7 in this line it is very important for Black to keep control over the e4 square

8.b4?! I don't think this move is the best, it gives to Black a direct play on the Queen side. Maybe more careful is 8.b3 or 8.Be2

8...a5! I think it is the right plan! [Another typical idea for Black is to play 8...♘e4 9. ♖c2 f5 but I think White is having a better play after 10. ♙b2 followed by Be2 and short castle with the idea of playing Ne1 and f3]

9. ♙b2 axb4 10.axb4 ♘e4 the knight's position on e4 can't be bad

11. ♖c2 ♖xa1+ 12. ♙xa1 now I had a lot of different options how to go on

12...♖e7 quite a logical move, it is not that simple for White to defend the b4 pawn in a nice way [but I had a better option 12...♘a6! using the moment that White can't play b5 13. ♙c3

(in case of 13.b5 13...♘b4 14. ♖b3 ♖a8 Black is great) 13...♖e7 and Black's position is a bit better]

13.c5 [maybe White could have tried 13.b5 13...♖b4+ 14. ♘d2 but in a rapid game it is looking like a risky try]

13...f5 very logical, gaining even more control over the e4 square

14. ♙e2 avoiding tricky with Ng5 of Black

14...♘c6 not a bad move, but clearly not the most practical one [14...♙a6 would have been a normal choice. With the exchange of bishops Black is requiring to have a normal position]

15. ♙c3! a very strong move and clearly the best way of defending the b4 pawn

15...bxc5?! I start to play in a wrong direction [much more simple was 15...♖a8 16.O-O ♖e8 with the idea of Ne7-Nd5 and I think position remains around equal]

16.dxc5 White needs to take with the d pawn to have a dangerous practical idea of playing b5 in a good moment

16...♖a8 [my initial idea was to play 16...♘xc3 17. ♖xc3 ♖f6 but I understood that after 18. ♖xf6 gxf6 19.b5 the endgame could be very dangerous for Black]

17.0-0 ♖xc3 What else to play?! To let White keep the bishop pair seemed to me to be a bad option

18.♔xc3 ♕f6?! and another move which maybe costs me already the game

19.♕d2! holding the b4 pawn and same time attacking d7 pawn and threatening the b5 move. Things start to look horrible for me

19...♖d8 what else to play ?!

20.b5 ♖e5 [20...♖e7 is looking as well very bad]

21.♖xe5 ♕xe5 22.c6 and from a promising position after the opening, I am already almost lost

22...♗c8

23.♖d1! another great move by Carlsen, forcing me to play d5 leaving my bishop dead on c8 forever

23...d5 24.♕d4 White is following its strategy

24...♕xd4 25.exd4 ♖f8 26.f4 and my bishop is out of the game. Position is totally lost and the rest doesn't need to be commented any longer. I been wondering after such a game if I can recover in the second one with White?!

26...♖e7 27.♖a1 g6 28.♖f2 ♖d6 29.♖a3 ♖f8 30.h4 ♖e7 31.h5 ♖g8 32.hxg6 hxg6 33.♖h3 g5 34.fxg5 ♖d6 35.♖h6

♖e7 36.♗f3 e5 37.♖h7+ ♖d6 38.dxe5+ ♖c5 39.♖xc7 ♖xb5 40.♗xd5 1-0

**(2) Naiditsch, Arkadij (2706)
- Carlsen, Magnus (2865) [C49]**

3rd GRENKE Classic TB(2),
2015.02.08

I needed to win this game, so all or nothing

1.e4 e5 2.♘f3 ♘c6 3.♙b5 ♘f6 4.♘c3 Lately I used to play 4 knights in couple of game, it is more tricky than it looks like :)

4...♙b4 one of the most solid moves

5.O-O O-O 6.d3 d6 7.♙g5 ♘e7 Usually Black is taking on c3 before playing Ne7

8.♖e1?! this move I played fast, because in the lines with Bxc3 bxc3 the Re1 move is usual, but now it is making not much sense

8...c6 9.♙a4 to go with the bishop on c4 would mean to get d5 at some moment

9...♘g6 10.♙b3 h6 my bishop has to leave the g5 square

11.♙d2

11...♙g4! excellent move, using that I cant play h3-g4

12.h3 ♙h5 so, the things are horrible pretty bad for me. I need to win the game and my position is looking everything else than good here. The only advantage is, there are a lot of pieces on the board and we are playing a rapid game-so many things can happen

13.g3! I think I am taking a good practical chance. I cant play the immediate g4, but I want to improve my King first to g2 and maybe then to have the idea of playing Rh1 and g4 somewhere [13.g4 13...♘xg4 14.hxg4 ♙xg4 and I can do nothing against Nh4-Qf6 of Black]

13...d5 very logical, but not sure from practical point of view the best choise. Maybe just Qd7 followed by Rae8 been safer for Black

14.♔g2 now Black is having again a lot of different options which is good in a long game, but in rapid sometimes it makes lose a lot of time

14...d4 not sure if this was the best Black could have done. I am still for Qd7

15.♘e2 my knight is going to g1! from where I will be able to play g4 in the future

15...♙xf3+ 16.♔xf3 ♙xd2 17.♚xd2 things are starting to get unclear. In case I will be in time now for Kg2 and f4 I can might be clearly better! My bishop on b3 could became a beast!

17...♞d7! good move. Black knight is going to c5 to take my bishop away

18.a3 as well a move which is needed [18.♞g2 18...♞c5 and probably White is not worse, but I cant be better eather]

18...♞h8 19.♞g2 ♞c5 20.♞a2 f5 Right now we both had already less than 2 minutes on the clock, and the position is very complicated

21.exf5 ♞xf5 22.♞f1 ♞f6

23.f4! a very good practical choise. Black is very active, but we should not forget how strong the bishop on a2 can became when position will be opened

23...♞f8 24.♞ae1 My oponent started to get really low on time

24...h5 instinctive move which is super logical, idea is playing

h4 next [to a better endgame for White would lead 24...exf4 25.♞xf4 ♞xf4+ 26.♞xf4 ♞xf4 27.♞xf4 ♞xf4 28.gxf4 ♞xf4 29.b4 followed by Re7 and being a pawn down probably I am having a better position]

25.♞f3 h4 a very tricky position to play just with under 30 seconds on the clock

26.g4 [26.fxe5 would have been of course stronger]

26...♞xf4+ 27.♞h2 but this has been my original plan

27...♞g5 [we both has missed the Black could play the 27...♞g5! with a very unclear play]

28.♞xf4 exf4

29.b4! I am taking over the game

29...♞d7 30.♞e6 ♞d8 31.♞e1! winning control over the e file and same time attacking the h4 pawn, the game is running on just 2 seconds increament

31...♞b5 32.a4 ♞b6 33.♞e7 I am going for the h4 pawn

33...♞f6 34.♞xh4+ [34.g5 would win the game in one move]

34...♞h7 35.♞e6 and the things are unclear again

35...♞f6 36.♞f5 ♞h6 37.♞e1 ♞d6 38.♞e8+ ♞f8 here we were already just banging the moves

39. ♖e7? a horrible move, but I have almost lost on time :)

39... ♜xe7 40. ♞xe7 ♜xb4 41. ♞e8 ♜f6 42. ♞xf4 and the position is again totally unclear

42... g6 43. g5 ♜f7 44. ♞h4+ ♖g7 45. ♙e4 ♜b2 46. ♖g3 ♜xc2 47. ♜f4 What a crazy game. Still things remain very unclear

47... ♜c5 48. h4 ♜a5 49. ♜xf7+ ♖xf7 50. ♜b8 and White is back on being better

50... b5 51. ♜b7+ ♖e6 52. axb5 cxb5 53. ♖f4 it is actually a very unpleasant position for Black to play with just few second left on the clock, and my situation been quite simple-I needed a win!

53... ♜a2 54. ♜xb5 ♜f2+ 55. ♖g3 ♜e2 56. ♜a5 so slowly I start to collect Blacks material

56... ♞d7 57. ♜a6+ ♖e7 58. ♙xg6 ♞e5 59. ♙e4 ♞xd3 60. ♙xd3 ♜e3+ 61. ♖f4 ♜xd3 62. h5 the pawns are running

62... ♜h3 63. h6 d3 64. ♜xa7+ ♖e6 65. ♜a6+ ♖f7 66. g6+ ♖e7 67. g7 d2

68. g8=♖ And I win this crazy fighting back. I am back into the match with been looking like almost lost for win. 2 blitz games are to come with a control of 5min +2 second per move. Here I though Carlsen should be a big favourite over me knowing his excellent blitz skills, but still I wanted to give the World Champion a good fight **1-0**

(3) Carlsen, Magnus(2865)
- Naiditsch, Arkadij(2706) [E11]

3rd GRENKE Classic TB(3),
 2015.02.09

So I am Black again in the first game of the blitz match

1.d4 ♘f6 **2.c4** e6 **3.♗f3** ♚b4+ **4.♗bd2** b6 and we do play the same opening cause I been sure that I could improve my play from the last game

5.e3 Carlsen is switching to other "usual" set up

5...♙b7 **6.♙d3** c5 it is important for Black to play the early c5 and cxd4

7.O-O cxd4 **8.exd4** now the Black bishop from b4 can go back to e7

8...O-O **9.a3** ♙e7 **10.b4** and again I think that to put the pawn on b4 is not the best. The right choise should be b3

10...a5! forsing White into playing b5

11.b5 d5 **12.♙b2** ♗bd7 and now we can see how unlucky is the position of the White bishop on b2

13.a4 ♖c8 **14.♖c1** dxc4 **15.♗xc4** ♗d5 I want to play Nf4 next

16.g3 covering the f4 square but the diagonal a8-h1 is very open now. First I been very happy with my position, and in a normal classical game I guess I would find the right way to continue, but in a blitz game it is important to take a fast desicion, and I didnt want to play N7f6 because of Nfe5. So what else to do?!

16...♗b4 not a bad choise. In case You dont know what to play-attack something!

17.♙e2 of course White cant give up his White squares bishop

17...♗a2 **18.♖a1**

18...♙xf3?! and this move is just a desaster. I totally forgot that White will place his bishop on c6 [18...♗b4 is giving to Black a normal play, maybe White got nothing better than to get back on c1 with his rook]

19.♙xf3 ♖xc4 **20.♖xa2** ♗f6 I need to get my knight on d5 as fast as possible

21.♙c6 ♗d5 first I been very scared to lose the exchange, but then I though that even if somehow White will manage to win the exchnage I will probably have some play because of my great knight ond5

22.♙e2 ♖b4 **23.♖d1** Magnus is bringing his pieces into the game-very logical, but missing my next move

36...Rb4 and the position is a total draw. Well, not a bad game for a blitz one and a clearly good start for me my holding with the Black pieces. The situation is getting more exciting. In case I win my White won I am could be the champion!
1/2-1/2

23...Rb3! it is funny, but White cant catch my rook which keeps on controlling the 3rd rank, and in case the rook cant be caught, I should be doing fine here

24. Kg2 Qd6 I am getting my Queen on b4

25. Rc2 Bb4 26. Bda1 White wants to play Ba3 next

26...Rc8 and I play the save Rc8 calculating that I seem not to lose any material

27. La3 as well it is hard to find anything better for White

27...Qc3 28. Qxc3 Rxc3 and the exchanges are forced

29. Lxd5 Rxa3 30. Rxa3 La3 31. Lxe6 fxe6 32. Rxa3 Rc4 I am winning back the pawn

33. Qf3 Rxd4 34. Rc3 Rxa4 35. Rc6 Qf7 36. Rxb6

(4) Naiditsch, Arkadij (2706)
- Carlsen, Magnus (2865) [C67]

3rd GRENKE Classic TB(4),
2015.02.09

And what a chance I had to win against the great Magnus Carlsen...when I look back now I feel a bit of pity not to have find the right continuation, but if we look at the sercumstances, I should clearly not be. It was already almost midnight, we both been very tired and to play on 2seconds per move is everything else then easy. Another fighting game ended in a draw

1.e4 e5 2.♘f3 ♘c6 3.♙b5 ♘f6 4.O-O ♘xe4 5.d4 ♘d6
6.♙xc6 dxc6 7.dxe5 ♘f5 8.♙xd8+ ♔xd8 The Berlin
endgame, Magnus loves it and I like it as well

9.c4!? it is a rare move which I already have played couple of
times

9...♔e8 10.♘c3 ♙e6 11.b3 ♙e7 12.♘e4 ♖d8

13.♙b2 all things been pretty normal till here, but my
oponent has spend already quite some time

13...h5 a usual move for Berlin, Black wants to get the rook
out of h8 over the h file

14.♖ad1 b5 what a risky desicion by Black! [I been expectin
more a move like 14...h4 but maybe White is doing a bit better
here after 15.♘fg5 but again it is really hard to say in Berlin
when it is really better and when not]

15.♘fg5 what can be more logical then to attack the e6
bishop!

15...♙xg5 16.♘xg5 a6 seems like Magnus has no clear plan
[maybe Black should have tried 16...bxc4 17.♖xd8+ ♔xd8
18.♘xe6+ fxe6 19.bxc4 ♔c8 20.♖d1 ♖d8 21.♖xd8+ ♔xd8 and
I dont know if White do have realistic chances of winning this
position, but what is sure, that Black has to defend here very
well and White is having no chances oflosing]

17.♙c3 c5?! and this is really looking already strange. The
pawn on c5 is just weak

18.♖xd8+ here I started to lose a lot of time not knowing
if I should play Ne4 immediately or later. This was stupid.
Time matters much more in a blitz game then to be perfectly
accurate

18...♔xd8 19.♖d1+ ♔e7 20.♘e4 bxc4 21.♘xc5 so it is easy
to see that White is doing much better here. The knight on f5
is out of game

21...cxb3

22.axb3 [first I thought that I might have the Bb4 but then I found that even after 22...b4 22...c8 the move Bb4 been not useful at all]

22...Rb8 Black is getting the rook into the game

23.b4?! [in any case I should have taken on a6 23.dxa6 23...xb3 24.Rb1 Bb6 25.dxc7 Bb7 and maybe Black got some drawing chances-but in any case White is a clear pawn up]

23...Rb6 Now Black's position is relatively safe again. From now on we both had under 1 minute on the clock

24.f1 I try to get my King into the center

24...c4+ 25.e1 b5 26.f3 King will be nicely placed on f2

26...h4 27.f2 c6 maybe Black wants to play somewhere a5

28.b2

28...e8! a very good move on such a short time. Black is planning to get the knight out over the e7 square

29.Rc1 having just few seconds, I decided that it is time to make a draw-and yes, I am not very experienced in playing blitz game, it has been not a great decision. I should have continued with keeping the position the way it is

29...e7 30.b3 I want to force a draw which is going very wrong

30...d5 31.Rxc6 xc6 how to defend the b4 pawn now

32.a3 what an ugly bishop on a3

32...f4 33.g3?! of course just a blunder

33...d3+ 34.e3 hxg3 35.hxg3 xe5 36.f4 probably I am already close to lost, but as well Magnus is having just some seconds

36...xf3 37.b2 f6 38.d4 e1 [38...e5 and probably nothing would save me any longer]

39.e3 d5 40.e2 g2

41.f2 suddenly the knight on g2 is almost caught

41...d7 42.c3 g6 43.f3 g5 44.xf6 xf3 45.xf3 e1+ 46.e2 securing the drawish outcome

46...c2 47.xg5 xb4 48.f4 and position is probably a draw because I will push my g pawn which will force Black King or Black Knight to get away from the Queen side

48...d5 49.d2 e6 50.d3 f6 51.c1 d5 52.g5 g4 53.c3 c5 54.b3 c6 55.a4 e5 56.a5 b7 57.h6 c6+ 58.a4 c4 59.g4 c8 60.g7 d7 61.f6 e6

62.g5 ♔f5

63.♔a3 my bishop is save on f6 and I can just keep on moving my King

63...♘e5 64.♔b4 a5+ 65.♔c3 a4 66.♙xe5 ♔xe5 67.♔xc4 ♔f5 68.♔b4 ♔xg5 A draw in a game where we both had winning chances. After a 7 hard games in classical chess sometimes it is hard to have a normal look at the blitz games where the ammount of mistakes is just incredibly high, specially when the game is getting tough 1/2-1/2

(5) Carlsen, Magnus (2865)
- Naiditsch, Arkadij (2706) [B91]

3rd GRENKE Classic TB(5),
2015.02.09

And we are in the armagedom game. Magnus made his guess and been lucky to chose the White color. Statistically White is having a great score. We are going to play a 6 min vs 5 min game, where "all I needed to do " is to hold a draw.

1.e4 This time no more 1.d4

1...c5 How to play an armagedom game?! To go for a save opening-which might mean suffering with a minute down and maybe a lost on time, or a fight in an unclear sharp position. I though the second is the right choise

2.♘f3 d6 3.d4 cxd4 4.♘xd4 ♘f6 5.♘c3 a6

6.g3 a popular line which I play couple of times myself with White

6...e5 7.♘de2 ♙e7 8.♙g2 O-O 9.O-O ♘bd7 a possible choise but a bit too passive one [9...b5 is probably the better way to go on]

10.a4 b6 11.♘d5! a very good positional desicion to me.

White is getting rid of the knight on c3 to put the other one there

11...♖xd5 12.♔xd5 ♖b8 13.♗c3 ♘f6 14.♔d3

14...♗e6!? quite a tricky move for a blitz game and maybe not a bad one from practical point of view. Can White take on a6?! this made Magnus lose almost a minute of thoughts

15.♔xa6! very strong play specially for a blitz game. White is sacrificing the exchange to dominate over the White squares

15...♔c7 16.♔e2 this has been the idea of White

16...♗c4 17.♔f3 ♗xf1 18.♗xf1 so I am an up, but in a very unpleasant position. Still I had around 1 minute less on the clock and in case I will do "nothing" White will slowly get the bishop to c4, or maybe play Bg5 and get the knight to d5 and it is not clear where my counterplay should be

18...d5!? of course this move just gives a pawn-but I must do something!

19.exd5 e4

20.♔f5! My oponent is playing a fantastic game keeping all the position closed which makes my moves very hard to play

20...♖bd8 21.♗f4 ♔c5 I am trying to get some active play

22.♖d1 ♔b4 the b2 pawn is hanging, but again White is finding the best

23.♗e5! another very very strong move.

23...♗c5? this loses immediately, but I just panicked not knowing what to do next [23...♔xb2 24.♗xe4 is losing as well immediately; maybe relatively the best was to play 23...♗d7 but the position is already clearly lost]

24.♗xf6 gxf6 25.♗xe4 ♔xb2

26.♗d3 White is clearly having a mating attack

26...♖fe8 27.♜xf6+ ♔f8 28.♜xh7+ ♔e7 29.♚e1+ what a position, it remind me a bit on our the first game of tiebreak

29...♔d6 30.♚f4+ ♔xd5 31.♜f6+ ♔c6 32.♜xe8 and it was all over. I have lost the match, felt very pity clearly having my chances in the 4th blitz game, but, I think I made a good fight to the World Champioin and can be very happy with my play. Magnus played a really fantastic armagedom game where we can see the full strenght and why Carlsen because last Year a double World Champion in Rapid and Blitz chess in Dubai. **1-0**

(6) Anand, Viswanathan (2797) - Baramidze, David (2594) [C95]

3rd GRENKE Chess Classic(6.4),
2015.02.08

GM Csaba Balogh
Best rating: 2672

Vishy Anand was out of form in Baden-Baden, but his win against Baramidze was still very inspiring.

1.e4 e5 2.♜f3 ♜c6 3.♞b5 a6 4.♞a4 ♜f6 5.O-O ♞e7 6.♚e1 b5 7.♞b3 d6 8.c3 O-O 9.h3

9...♜b8 Baramidze sticks to his favorite Ruy Lopez Breyer variation. He does not play any other openings and it makes the preparation very easy for his opponents.

10.d4 ♜bd7 11.♜bd2 ♞b7 12.♞c2 ♚e8 13.♜f1 ♞f8 14.♜g3 White follows the main line by executing the standard knight maneuver to the kingside.

14...g6 15.a4 The old main line has come back into fashion. There was a time when all the Breyer games continued with this 15.a4 move, then suddenly some sidelines like 15.b3 or 15.Bg5 became more popular, but since last year 15.a4 is back to the main focus.

15...♘g7 Baramidze deviates from his previous games with this relatively rare move. [Previously he was following the main line with 15...c5 16.d5 c4 but after his clear-cut defeat against Adams in the Dortmund Supertournament last year - which I have annotated in our newsletter - he decided to stop playing it.]

16.♘d3! The point of the previous 15.a4 move. White puts pressure on the queenside, namely on the b5 pawn, which forces an unfavorable decision for Black. Capturing the a4 pawn significantly weakens the pawn structure, especially the a6 pawn, therefore Black does not have anything better than c6, but it closes the b7 bishop, which was pressing the e4 pawn.

16...c6 17.♘e3 This is Anand's improvement over the previous Baramidze game, but it is not a novelty yet. We can already see the benefit of the Bd3 move, provoking c6, the bishop's most natural development to e3 was not possible before because of exd4 and on cxd4 the e4 was hanging. [Two days before our current game Carlsen played 17.♘g5 hoping to provoke an h6 weakening after which he intended to return to e3 and Qd2 could have come with a tempo, but Black could improve his knight with 17...♖f8 18.♙d2 ♗e6 It turned out to be Black who gained a tempo because of Bg5. 19.♘h6 ♗d7 20.♘c2 ♘xh6 21.♙xh6 ♙f6 22.♖ad1 ♖ad8 and the game was

more or less balanced, although Carlsen managed to outplay his opponent and later won the game... Carlsen-Baramidze, Baden Baden 2015]

17...♙c7 18.♙d2 exd4?! This seems to be a dubious decision to me! Giving up the tension and center so easily usually does not lead to anything good for Black... [Probably the best was 18...♗f8 but White was slightly better after the typical break on the queenside with 19.dxe5 dxe5 20.c4! in Adams-Golod, World Open 2011.; Another standard freeing break is 18...d5 but it does not solve the problems, because of 19.dxe5 ♗xe4 20.♘xe4! A clever move! White realizes that the knight is going to be a much more useful piece on e4 than the bishop. 20...dxe4 21.♗xe4 ♗xe5 22.♗xe5 ♘xe5 23.♗c5+= This is the point and White has a clear edge because of the poor bishop on b7!]

19.cxd4 c5

20.d5 The standard reply again. White locks the b7 bishop and gains some space advantage. There is a pressure again on the b5 pawn, which forces Black to make a committing decision. Pushing b4 leaves him without any counterplay and creates an excellent hole on c4, which will be occupied by the f3 knight, while pushing c4 like it happened in the game gives up the d4 square... [The alternative was 20.axb5 20...axb5

21. ♖xb5 but after Black's correct reaction the position gets too simplified... 21... ♗xe4 22. ♗xe4 ♖xa1 (But not 22... ♖xe4? because of 23. dxc5! and Black cannot take back on c5...) 23. ♖xa1 ♖xe4 24. ♖c1 Perhaps White is still better, but the game is much easier to play.]

20...c4 21. ♖c2 ♖ec8 Black would like to get counterplay with c3. [On 21... ♗c5 attacking the e4 pawn 22. ♖d4 is the strongest and after 22... ♗fd7 23. ♖xg7 ♖xg7 24. h4! (Or 24. ♗d4 is also good.)]

22. axb5 [22. ♖d4 is less clear now, because Black could play 22... ♗e5! 23. ♗xe5 dxe5 24. ♖c3 ♗d7 I still prefer White because of the protected passed pawn and the bad black bishops, but the game is much better.]

22...c3 Black has pinned his hopes to this tactical blow, but Anand had calculated one move further... [22... axb5 is also bad in view of 23. ♗d4! and it is hard to deal with the b5 pawn... 23... ♖a6 looks very ugly, White could strengthen his position with 24. ♖a2± doubling the rooks. It is important that Black is unable to push b4-c3 and otherwise his pawns are rather weak.]

23. bxc3

23... ♗xd5 Black continues his initial plan based on this deep tactical idea. He wants to take on Bxc3 then on a1 and the

c2 bishop is hanging behind. However it does not work... [23... ♖xc3 24. ♖d3+- is a healthy extra pawn.]

24. exd5 ♖xc3 25. ♖d1 ♖xa1 [25... ♖xe1 26. ♗xe1+- protects the c2 bishop and leaves White materially ahead.]

26. ♖xa1! Simple and strong! Black is going to miss his dark squared bishop around his king!

26...axb5 An intermediate move, but it does not change the key factors... [26... ♖xc2 loses to 27. ♖h6! ♖c3 (27... f6 28. ♖e7!+-)]

28. ♖e8+! The key move, which had to be foreseen very long ago by Anand. White wins decisive material. 28... ♖xe8 (28... ♗f8 29. ♖xf8+! Another deflection of the c8 rook and Black is already forced to accept it. 29... ♖xf8 30. ♖xc3+-) 29. ♖xc3+-]

27. ♖d4! White is able to hold the long diagonal!

27... ♖c3 is kind of admitting the opponent's great play. [27... ♖xc2 loses to 28. ♖h6 f6 (28... ♖c3 is the same as in the 26... Qxc2 line. 29. ♖e8+! ♗f8 30. ♖xf8+! ♖xf8 31. ♖xc3+-) 29. ♖e7 ♖c4 30. ♖e3! (30. ♖g7+? 30... ♖h8 31. ♗g5? also looks over and beautiful. White is threatening with mate on Nf7. Taking the knight loses to Rxh7 double check followed by Qg7 mate, but Black has a counterblow at his disposal... 31... ♖c1+!]

32. ♔h2 ♚xg5!—+ and suddenly Black wins!)]

28. ♖e4! ♚xd4 [28... ♚xc2 again loses to 29. ♗h6 f6

30. ♚xf6!! A brilliant blow! (Actually 30. ♗xf6+ is equally strong. 30... ♗xf6 31. ♚xf6 ♚c7 32. ♚e6+ ♔h8 33. ♚e8+—) 30... ♗xf6 31. ♗xf6+ ♔h8 32. ♚e7 and Black cannot prevent the threatening Rxh7 and Bg7 mates. 32... ♚c1+ 33. ♗xc1 ♚xc1+ 34. ♔h2+—]

29. ♗xd4 ♗xd5 30. ♗xd6 ♚c5 31. ♗6xb5 The game has simplified to this endgame. White has a winning position and the material advantage of two minor pieces against the rook will decide the game in the long term, but it requires patience and some technique...

31... ♚a2 32. ♗h6 Locking the king in order to create some tactical threats.

32... ♚a8 [If Black tries to prevent the back rank mate with 32... ♚c8 33. ♗c3! wins in a pretty way. The knight cannot be taken and after 33... ♚a5 34. ♗xd5 ♚xd5

35. ♗c6! Another nice move and Black cannot avoid the triple fork on e7! 35... ♔h8 (35... ♚xc6 36. ♚e8+ ♗f8 37. ♚xf8#) 36. ♗e7 ♚e8 37. ♗xg6+! is the final point!]

33. ♗d3 ♚d8 34. ♗g5 ♚a8 35. ♗e7 ♚cc8 36. ♗d6 ♚c7 37. ♗4b5 [37. ♗b5 was also possible to pin the black pieces to defend each other.]

37... ♚c6 38. ♗f1 White does not need to hurry, he can slowly improve his position and pieces. In my opinion, the only thing he should be careful about is to not allow the trade of a pair of rooks.

38... ♔g7 39. ♗g4!? With the idea of caging the king with g5. [39. ♗g5+— was also very strong and White invades with his rook to the 7th rank.]

39... f6 40. ♗g5 The human way to play. Anand weakens the black king by removing one of its main guards. [The computer sees a pretty win with 40. ♗d4 40... ♚b6 (40... ♚c7 loses to 41. ♗g2! ♗xg2 42. ♗e6+!—) 41. ♗b5! ♗e5

42. ♖e8+! From a practical point of view, when we have a technical win it is better to avoid going into such complications. The computer calculates everything and sees the win, but for a human brain it is better to avoid such a risk of a blunder given the many hanging pieces... 42... ♖f7 43. ♗xf6! ♜xb5 with the idea of deflecting the d4 knight to give Nf3 check, but White takes another piece: (43... ♖xe7 44. ♗xd5+-) 44. ♜xe5! ♜b1+ 45. ♖h2 ♜h1+ 46. ♖g3 ♜g1+ 47. ♖f4+-]

40... ♜b8 [40... fxg5 41. ♗xg5+- is over, the rook goes to e7 next.]

41. h4 [Another, more forcing win was suggested by the machine: 41. ♜d1! This was already possible to find also for a human... 41... ♗b3 (41... ♜c5 42. ♗f5+! gxf5 43. ♗xc5 ♗xc5 44. ♜xd5+-; 41... ♗e6 42. ♗d4+-)]

42. ♗f5+! gxf5 43. ♜xd7+- It is over, Bd6 is threatening with discovered check, winning the rook.]

41... h5 42. ♗h3 [42. ♜d1! was strong again, with exactly the same motifs as in the 41.Rd1 line.]

42... f5 43. ♗f1 After provoking the f5 move the structure became fixed, so Black cannot hope to reduce the material anymore. Thanks to the f5 and h5 moves the king became more exposed. Anand missed some direct wins, but he significantly improved his position in the last 15 moves.

43... ♖g8 44. ♜d1 ♗f3 45. ♜a1 It would be excellent to occupy the a2-g8 diagonal with the bishop to haunt down the black king.

45... ♗d5 46. f4 ♗c5 47. ♜d1 [47. ♗f6 was another win. White is threatening with Ra7 and for instance after 47... ♗e4 48. ♗xe4 ♗xe4 49. ♗e5 ♜d8 (49... ♜e8 50. ♗d6+-) 50. ♗d4+- wins very soon.]

47... ♗f3 48. ♗c4+ ♖h7 49. ♜f1 [49. ♜a1! was faster. Ra7 is a decisive threat. Black has no adequate defend against it, for instance after 49... ♜a6 50. ♜a6 ♗xa6 51. ♗d4! A double attack on the minor pieces... 51... ♗b7 52. ♗e6 The white pieces are just too well placed. Nf8 is coming next. 52... ♗b4 53. ♗f8+ ♖g7 54. ♗d7 ♜a8 55. ♗xb7+-]

49... ♗e4 50. ♜a1 ♗d3 51. ♗d4 [The last trick White had to be careful about was 51. ♜a7?? 51... ♜xc4! The b5 knight is hanging and Black survives. 52. ♗f6+ ♖g8 53. ♜g7+ is just a draw after 53... ♖f8 54. ♜f7+ ♖g8=; 51. ♗c3+- was winning.]

51... ♜c7 52. ♗xe4 fxe4 Both bishops are hanging, but Anand solves the problem tactically... [52... ♜xe7 53. ♗f6+ ♖g7 54. ♗xd3+-]

53. ♖f6! ♜cb7 [53... ♜xc4 leads to forced mate: 54. ♜a7+ ♔g8 55. ♜g7+ ♔f8 56. ♜e6+ ♔e8 57. ♜e7#; 53... ♜xf4 also loses after 54. ♖e5! and White takes more material. 54... ♜xc4 55. ♖xb8 ♜xd4 56. ♖xf4+-]

54. ♜e6! Now White can even allow the trade of the rooks, because the black king is too vulnerable.

54... ♜b1+ 55. ♜xb1 ♜xb1+ 56. ♔g2 A pretty mate in one move is threatening with Nf8.

56... ♜b8 57. ♔f1! Black ran out of useful moves. The rook must control the f8 square. White simply goes around with his king towards the e4 pawn.

57... ♜c8 58. ♖d5 ♜e8 [58... e3 59. ♔e2+-]

59. ♖e5! The last accurate move! White protects the f4 pawn in order to continue the journey with the king to e2-e3. [It was not too late to go wrong with 59. ♔e2? blundering the idea of 59... ♜xe6! 60. ♖xe6 ♜xf4+]

59... ♜c8 [59... ♜xe5 60. fxe5 ♜c8 61. ♔e2+- is totally hopeless.]

60. ♔e2 ♜c5 61. ♜xc5 ♜xc5 62. ♖xe4 The position has simplified and this kind of material disadvantage is already too much for Black...

62... ♜a5 63. ♔e3 ♜a3+ 64. ♔d4 ♜a5 65. f5+-1-0

The K-Files.

Nimzo 4.e3 0-0 5.Nge2 c6

GM Alexander Khalifman
FIDE World Chess Champion (1999)
Best rating: 2702

(7) Nimzo 4.e3 0-0 5.Nge2 c6 [E46]

1.d4 ♘f6 **2.c4** e6 **3.♗c3** ♙b4 **4.e3** 0-0 **5.♗e2** The Reshevsky system has been quite a poisonous weapon for a long time. Of course, its recent popularity is mostly connected with the game Carlsen - Anand (Moscow 2013) won by White in just 29 moves..

5...c6!? Both the classical 5...d5 and the modern 5...Re8 are solid enough. However, both don't equalise automatically so it's worth trying to look for some alternative. The text was first played back in 1963 but neither this game nor some following did attract much attention. Only after the game Tomashevsky-Zvjaginsev (Moscow 2010) this line became an object of intensive research but the practical material is still not enough for the final conclusions. The main idea of Black is not to meet cxd5 (after d7-d5) with cxd5 (which is possible but not necessary) but to provide the c7 square for his bishop. And it must be said that in most resulting structures it's just a perfect square for this piece. Certainly there is a problem

that White can use Black's 5th "half-move" to gain some space in the center but quite often it proves to be a double-edged weapon as we will see. Finally it must be said that Black has really excellent stats in this line so far. 65% in more than 100 games is really very convincing. Well, to be objective one must add that the average rating of the Black players was 100 points higher than their opponents, but still...

6.a3 ♙a5 **7.b4** Moving too many pawns before completing the development is always fairly responsible but if White plays for an opening advantage he has to do so. The alternatives are rather shy: [7.♖c2 7...d5 8.♗g3 ♗bd7 9.♙e2 (9.cxd5 9...exd5 10.♙d3 ♖e8 11.0-0 ♙c7= Wemmers - Cramling Gibraltar 2014) 9...e5 (9...dxc4 is another move order which usually leads to the same position. 10.♙xc4 e5 11.0-0 exd4 12.exd4 - 9...e5) 10.0-0 exd4 11.exd4 dxc4 (11...♖e8 12.cxd5 ♗xd5! (12...♙xc3 13.bxc3 cxd5 14.♙f4+= 13.♗xd5 cxd5 14.♙f3 ♙b6 (14...♗f6 15.♙g5+= ♙e6 16.♗h5±) 15.♖b3 ♗f8 (15...♙xd4 16.♙xd5+= +=) 16.♙e3 ♙e6=) 12.♙xc4 ♙c7 The black pieces are well-placed for the classical play against IQP. (12...♗b6 13.♙a2 ♗bd5 Sadorra-Narayanan, Queson City 2014 14.♙b1!?! 13.♙g5 (13.♙a2 13...♗b6 14.♙g5 - 13.Bg5) 13...♗b6 (13...h6 14.♙h4 g5?? 15.♖g6+) 14.♙a2 h6 15.♙xf6 (15.♙h4? 15...♖xd4±) 15...♖xf6= Dale - Bluebaum London 2014; 7.♗g3 Trying to develop pieces in a solid way without

defining the queenside pawn structure is premature. 7...d5 (7...c5!? Nc7-c6-c5 might look illogical but it works well: 8.♙e2 (8.d5 8...b5! This Bluemenfeld breakthrough is quite typical for different Nimzo lines. 9.dxe6 fxe6 10.cxb5 ♙b7=Black has nice compensation. It's not too obvious how White would complete his development.; 8.dxc5?! 8...♙xc3+ 9.bxc3 ♖a6=The ruined pawn structure speaks for itself.) 8...d5! (8...cxd4 9.exd4 d5 10.b4 ♙c7 11.c5 (11.♙g5!?) 11...e5 12.♙g5 ♖c6 13.♖h5± ♖xd4 14.♙xf6 gxf6 15.♖xd5±) 9.dxc5 (9.O-O 9...cxd4 10.exd4 dxc4 11.♙xc4 - 7...d5) 9...♙xc3+ 10.bxc3 ♖bd7 11.O-O ♖xc5=) 8.♙d3 (

a) 8.b4 8...♙c7 - 7.b4;

b) 8.♞c2 - 7.Qc2;

c) 8.♙d2 - 7.Bd2;

d) 8.cxd5 8...cxd5N is the easiest way to equalise. (8...exd5 9.♙d3 ♞e8 10.O-O ♖bd7 11.f3 c5 Nyback - Rusev Warsaw 2013 12.♙c2!?+= and Black is under some pressure.) 9.♙d3 ♖c6 10.O-O e5=) 8...dxc4 (8...c5!?) 9.♙xc4 c5 (9...♖bd7 10.O-O e5 is also good enough.) 10.O-O (10.dxc5 10...♙xc3+ 11.bxc3 ♞xd1+ 12.♞xd1 Nagy - Horvath,A Hungary 2013 12...♙d7!?+=) 10...cxd4 11.exd4 (11.♖ce4?! (Wemmers - Tkachiev Gibraltar 2013) This pawn sac is too adventurous. 11...♙b6 12.exd4 ♙xd4=+) 11...♖c6 12.♙e3 ♙b6 and the white knight seems to be misplaced on g3 in this IQP structure (Martynov - Smirnov,P St, Petersburg 2011).; 7.♙d2 7...d5 8.♖g3 ♖bd7 9.cxd5 (9.b4 9...♙c7 10.f4 ♖b6 11.c5 ♖c4 12.♙xc4 dxc4 13.O-O Gonzalez - Ortiz Cuba 2014 13...b6 and Black has enough dynamic resources.) 9...exd5 10.♙d3 ♞e8 11.O-O ♙c7 12.♞c2 ♖f8 13.f3 h5!? and Black's play is already easier (Dubov - Andreikin Russia ch 2012).]

7...♙c7 8.♖g3 White intends to complete his development first. However. Black has enough time to prepare adequate counterplay in the center. [8.d5 is ambitious but not well

enough prepared yet... 8...d6 This modest move might be the most ambitious as the following lines show: (8...exd5 9.cxd5 cxd5 10.g3 ♖c6 11.♙g2 ♙e5 12.O-O d6 (12...♞e8?! 13.f4 ♙xc3 (13...♙c7 14.♖xd5 ♖xd5 15.♙xd5 ♙b6 16.♖c3+=) 14.♖xc3 d4?! 15.exd4 d5 16.f5!+= Ipatov - Yu Yangyi Kocaeli 2013) 13.f4 ♙xc3 14.♖xc3 ♖e7=) 9.♖g3 (

a) 9.e4? 9...a5! 10.b5 (10.♙b2 10...axb4 11.axb4 ♞xa1 12.♙xa1 ♖a6+ 13.♞b3 exd5 14.cxd5 (14.exd5 14...♞e8 and the game is more or less over.) 14...♙b6! (14...cxd5) 15.♖g3 (15.♖f4 15...♙xf2+! 16.♞xf2 ♞b6+ 17.♞e2 (17.♞e1 17...♞e3+ 18.♖fe2 ♖xe4-+) 17...♞e8-+) 15...♖g4 16.♖d1 ♖xb4+ (16...cxd5+)) 10...cxd5 11.cxd5 ♙b6+ 12.♖g3 exd5 13.♙g5 (13.♖xd5 13...♖xd5 14.exd5 ♞e8+ -+) 13...h6 14.♙f4 ♞e8 15.♙e2 dxe4+;

b) 9.g3 (Gu - Nicolas Zapata Al Ain 2013) looks the most natural but after 9...♖bd7! the c4 pawn becomes vulnerable. 10.dxc6 (10.♙g2 10...♖e5 11.dxc6 bxc6 12.♖d4 d5=+) 10...bxc6 11.♖d4 ♙b7 12.♙g2 ♖e5=+) 9...a5!? As we already mentioned, "Moving too many pawns before completing development is always fairly responsible". 10.b5 (10.♙b2 10...exd5 11.cxd5 cxd5 12.♖xd5 ♖xd5 13.♞xd5 axb4 14.axb4 ♞xa1+ 15.♙xa1 ♖c6!) 10...cxd5 11.cxd5 exd5 12.♖xd5 ♖xd5 13.♞xd5 a4! 14.♙e2 ♙e6 15.♞xb7 ♖d7=; 8.♙b2 8...d5 9.♖g3 - 8.Ng3; The most ambitious and critical 8.e4 will be analyzed in part 2.]

8...d5 planning e6-e5.

9.♙b2 [9.f4 preventing e5 and hoping to use the space advantage but due to White's poor development this idea doesn't work properly. 9...♖bd7 10.c5 is logical but... (

a) 10.♙d3 10...a5 (10...dxc4 11.♙xc4 ♖d5 12.♙d2 a5 - 10...a5) 11.♙d2 dxc4 12.♙xc4 ♖d5 White's weaknesses are an important factor. 13.♖ce4 (13.b5 13...♖7b6 14.♙d3 ♖xc3 15.♙xc3 ♖d5 16.♙d2 cxb5 17.♙xb5 ♙d7 18.♙xd7 (18.♞b1 18...♙d6 19.a4 ♙b4+) 18...♞xd7 19.O-O f5!+=) 13...♞e7

14.O-O ♖7b6 15.♗d3 axb4 16.axb4 ♖xa1 17.♞xa1 ♖xb4 White doesn't have enough compensation for the pawn (Vlasenko - Khismatullin Taganrog 2014).;

b) 10.♗e2 10...dxc4 - 10.Bd3)

10...e5! =+ 11.♗e2 A sad necessity... (11.dxe5 11...♖xe5!±; After 11.fxe5 11...♖xe5! 12.dxe5 ♗xe5→ White is in trouble. 13.♗b2 ♖g4 14.♞f3 ♖e8 15.♗e2 ♗xc3+ 16.♗xc3 ♖xe3± Costachi - Doros Romania 2014) 11...exd4 12.exd4 h5! Typical and strong. 13.O-O (13.♖xh5 13...♖xh5 14.♗xh5 ♖e8+ 15.♗e2 a5±; 13.♗xh5 13...♖xh5 14.♖xh5 a5 15.b5 ♖e8+ 16.♖e2 ♖f6 17.♖g3 cxb5 18.O-O b6±) 13...h4 14.♖h5 (14.♖f5 14...♖xc5 15.♖xg7 ♖ce4± Guthrie - Hamitevici London 2013) 14...g6 15.♖xf6+ ♖xf6=+; 9.cxd5 doesn't promise anything. 9...exd5 (9...♖xd5!±; 9...cxd5) 10.♗d3 ♖bd7 11.O-O ♖e8 Lobersil - Roberson London 2014 12.f3 a5 13.b5 c5 14.a4 b6±; 9.c5 9...e5 10.♗e2 Novik - Palliser Finland 2012 10...g6!? 11.O-O h5± and Black's play is quite clear.]

9...♖bd7 10.♗d3 Now Black has a wide choice of attractive options. [10.f4 Once again te tries to prevent e6-e5 but Black also has another possibility to create counterplay: 10...♖b6 A nice positional idea which is typical for the whole variation. 11.c5 ♖c4 12.♗xc4 (12.♗c1?! A strange decision. White will have to exchange on c4 anyway. 12...b6 starting immediate

action in the center. 13.♗xc4 dxc4 14.O-O ♖d5 (14...a5!? 15.b5 ♖d5 16.♖ge2 ♗d7=+) 15.♗d2 (15.♖xd5 15...exd5± Richardson - Grachev London 2013) 15...f5=+ 12...dxc4 13.O-O (13.♖h5 13...♖d5 Berczes - Medvegy Hungary 2013 14.♞f3 ♞h4+ 15.♖g3 b5±) 13...♖d5 14.♞e2 b6± In this unusual structure Black has enough counterchances.; 10.♖c1 is usual for these structures. White tries to save the tempo in case of an exchange on c4. 10...♖e8 and Black does the same. 11.♗e2 (11.♞b3 11...e5! =+ 11...♖b6!? (11...dxc4 12.♗xc4 e5 (12...♖b6!? 13.♗d3 e5 14.dxe5 ♖g4± is also quite good for Black.) 13.♞b3 ♞e7! The most reliable. Now Black has no problem at all as the concrete lines show it's White who has to play accurately to hold the balance. (13...exd4 14.♗xf7+ ♖h8 15.♖d1∞ is somewhat crazy (Duzhakov - Ponkratov Izhevsk 2014).) 14.d5 (

a) 14.♖ce2 14...♖b6 15.dxe5 ♖g4! 16.e6 ♖xc4 17.♖f5 (17.exf7+ 17...♞xf7 18.♞xc4 ♗e6—+) 17...♞xe6 18.♖xg7 ♞d5 19.♞xc4 (19.♖xe8 19...♞d2+ 20.♖f1 ♗e6—+) 19...♞xg2 20.♖xe8 ♞xf2+ 21.♖d2 ♞xe3+ 22.♖e1 ♗e6 23.♖f6+ (23.♞d4 23...♞xd4 24.♗xd4 ♞xe8=+ 25.h3 ♖e5=+) 23...♖xf6 24.♞h4=;

b) 14.O-O 14...exd4 15.exd4 ♖b6=+;

c) 14.♖f5 14...♞f8 15.O-O ♖b6=+ 16.dxe5 ♗xe5 17.♗d3 ♗e6=+ 14...♖b6! 15.dxc6 bxc6 16.♖a4 (16.O-O 16...a5 17.b5 a4 18.♞a2 ♖b8=) 16...♖xa4 17.♞xa4 ♗d7 18.♞a6 (18.♞b3 18...a5 19.O-O axb4 20.axb4 ♖eb8=) 18...♖eb8 19.O-O ♖b6 20.♞a5 ♖b7=) 12.c5 ♖c4 13.♗xc4 dxc4 14.♖ce4?! (14.O-O 14...b5±) 14...♖xe4 15.♖xe4 b5 16.cxb6 axb6 17.♖xc4 ♞d5 18.♞c2 (18.♞g4 18...♖h8± (18...♞xc4?? 19.d5+—; 18...♗d8±)) 18...♗a6 19.♖xc6 ♖ec8± and Black's compensation is clearly more than enough.; 10.♞c2 (Rodshtein - Zontakh. Legnica 2013) White chooses an Anti-Meran setup. But his knight is a bit misplaced on g3 and Black can try to use it immediately.

10...h5!? (10...g4!? is also interesting. 11.g2 (11.O-O-O 11...f6) 11...f5! 11.g3 (11.O-O-O 11...a5 12.b5 h4!) 11...a5 12.b5 (12.O-O 12...g4 13.h3 gxe3 14.fxe3 g3 =+) 12...e5 playing all over the board, which is quite typical for the whole line. Black is at least not worse here.; 10.cxd5 10...exd5 makes little sense with the bishop on b2.]

10...b6!? [10...e5 aiming for IQP structure. This might be the most solid way. 11.O-O (11.cxd5 11...exd4 12.exd4 e8+=+ 13.g2 gxd5 14.gxd5 cxd5 15.O-O b6 16.c1 16...g4 17.f3 g5+=+ (17...d7+=+)) 11...dxc4 12.gxc4 b6 13.d3 exd4 14.exd4 d6 15.c1 e6+=+ (15...h5!?) 16.c2 (16.e1 16...c4 17.a1 b5 =+) 16...c4!+=+ with a nice positional plus.; 10...dxc4 11.gxc4 a5 (11...e5!? ; 11...b6!? 12.d3 e5 13.ce2 a5=) 12.b5 c5!? 13.O-O (13.dxc5 13...xc5=) 13...b6 14.a4 b7=]

11.c5 c4 12.gxc4 [12.c1?! 12...e5+=+]

12...dxc4 13.O-O [13.f4 13...d5 14.d2 b5+=+ 15.O-O It looks like White protected all weaknesses, but what about b4? 15...a5 16.ce4 (16.e4 16...xf4 17.f4 gxf4 18.f4 axb4 19.axb4 xa1+ 20.xa1 xd4+ 21.f2 e5+) 16...axb4 17.axb4 d7 and Black enjoys a comfortable positional advantage. His knight on d5 is rock-solid because Black can always secure its position with f7-f5.; 13.e2 going for the pawn, but Black

gets excellent compensation: 13...b5 14.cxb6 axb6 15.xc4 b7= 16.O-O g4! Once again knight is misplaced on g3. 17.h3? gxe3+]

13...b6 14.e4 bxc5 15.bxc5 b8 16.b1 e5 Finally breaking White's centre. Black is at least not worse.

David vs. Goliath

Peter Zhdanov
Chief Editor of Pogonina.com

In this special column we are reviewing the most unexpected results that occurred last week. Players usually face opponents of a similar level. Considerably less frequent are situations when a significantly lower-rated player succeeds in beating a much stronger adversary.

The previous week has brought us an incredible number of upsets - 41. However, I have to admit that most of them feature relatively low-rated players. The number of moves ranges from 6 in Akkok (1866) - Celik (1518), 0-1 to 79 in Doven (1503) - Akkok (1866), 1-0.

How does one lose in 6 moves? Here is the answer. I wonder how one can play THAT badly unless the game was not a hoax or something:

Akkok, D (1866) - Celik, Eda (1518) [D00]

Turkish Cup 2015 Manavgat TUR (10.117),
06.02.2015

**1.d4 d5 2.♔d3 ♘f6 3.♘f3 e6 4.♘a3 a6 5.♙g5 c5 6.♔b5+
axb5 0-1**

In terms of high-profile upsets one has to mention GM Jones (2671) - IM Watson (2319), 0-1: those chess writers are good for something! Also, GM Reinderman (2590) succumbed to Van der Put (2201).

Top-10:

Doven (1503) - Uysal (2053), 1-0, [550](#) points
Mikuz (1795) - Trplan (1285), 0-1, [510](#) points
Soysal (2339) - Karaahmetoglu (1837), 0-1, [502](#) points
Sari (1462) - Koksai (1870), 1-0, [408](#) points
Akkok (1866) - Sari (1462), 0-1, [404](#) points
Lokman (1648) - Gyokbulut (2047), 1-0, [399](#) points
Reinderman (2590) - Van der Put (2201), 0-1, [389](#) points
Doven (1503) - Sarikaya (1889), 1-0, [386](#) points
Altunbay (1550) - Kaplan (1935), 1-0, [385](#) points
Kocyigit (1391) - Benk (1774), 1-0, [383](#) points

Average gap: 432; White won 6 games, Black won 4 games.

You can view all the games in the accompanying pgn file.

Like I have promised in the previous issue, this column will introduce to you FM Andrey Esipenko.

Reminder: if you have ever won a game against someone rated 300 points or above yourself, please send it to peter@pogonina.com for publication. Any additional information (a photo, annotations, etc.) will be appreciated.

FM Andrey Esipenko. Live rating: 2354. Born March 22, 2002. Titles won in junior chess: European Champion (2012), European vice-Champion (2013), Russian Champion (2014). Absolute champion of Novocherkassk. Most notable results include victories over GM Denis Khismatullin, GM Sanan Sjugirov, GM Ernesto Inarkiev and draws with GM Sergei Tiviakov, GM Pavel Smirnov and ten other grandmasters.

FM Andrey Esipenko and his coach GM Dmitry Kryakvin kindly agreed to annotate Andrey's recent win against GM Denis Khismatullin:

(8) Esipenko, Andrey (2271) - Khismatullin, Denis (2673) [A87]

Vladimir Dvorkovich Mem(7.12),
2015.01.24 [DK]

Good afternoon! My name is Andrey Esipenko. I live in Novocherkassk city of the Rostov region in Russia. However, I am playing for the Anatoly Karpov's Centre (Tyumen), where my clubmates and coach GM Dmitry Kryakvin live. By the way, I admire Karpov's games a lot. At a certain point I have read a few books written by the XII World Champion, which has helped me win the European Junior Championship'12. Other than that I lead the normal life of a 12-year old. I go to school, watch movies, play tournaments and occasionally beat grandmasters. I am specifically grateful to my friends and sponsors from the consulting company A DAN DZO for supporting me in this quest. At the Dvorkovich Memorial in Taganrog in January I was lucky to defeat the future winner of Moscow Open'15 GM Ernesto Inarkiev and the bronze prize winner of the last Russian Superfinal GM Denis Khismatullin.

1.d4 f5

During preparation I have dedicated more attention to the Slav and Nimzo. Nevertheless, the fact that my opponent has won an important game against Pavel Ponkratov in Russian Cup'14 with the Dutch didn't escape my attention. Therefore, I more or less knew the main line of this variation.

2.g3 ♘f6 3.♙g2 g6 4.♘f3 ♙g7 5.O-O O-O 6.c4 d6 7.♘c3 ♖e8 Crossroads. The game Ponkratov - Khismatullin continued [7...c6 8.b3 a5 9.♙b2]

8.d5 a5 9.♘d4 ♘a6 10.b3 ♙d7 11.♖b1 The game Postny - Pruijssers, 2014, continued with [11.♙b2 11...♘c5 12.♖c2 c6 13.♖ad1 ♖c8 14.♖b1 g5 15.a3 ♖h5], but such a twist of events was totally unacceptable to me. After having studied the profile of Khismatullin, I realized that most losses of the eminent

grandmaster come from overlooking a certain tactical shot in a complicated tactical struggle. Hence, I decided to try to put pressure on him as soon as possible.

11...♘c5 12.a3 c6 13.b4 axb4 14.axb4 ♘fe4 15.♗xe4 ♗xe4 16.♙b2 The theory ends here, so both players are on their own. An alternative is [16.♖d3 16...cxd5 17.cxd5 ♖f7 18.♙e3 ♖xd5 19.♗xf5 ♖xd3 20.exd3 ♗c3 21.♗xe7+ ♖f7 22.♖be1 ♙e6 23.♙g5 with sharp play in Mikhalevski - Zhang, 2002.]

16...♖a2 The Dutch is a strange opening. I have no idea what makes people go for such positions with a hole on e6. However, when analyzing with an engine it's not easy to find an advantage for White. That's why 1...f5 is gaining popularity. White has to act quickly here.

17.c5!? ♖f7! A very strong and cold-blooded move. Any capture of the pawn would give me a long-lasting initiative: [17...cxd5 18.♖b3; 17...dxc5 18.bxc5 ♗xc5 19.♗b3 ♖xb2 20.♖xb2 ♙xb2 21.♗xc5 ♙h8 22.♖a4 ♙f6 23.♖d1] Khismatullin is not in a hurry, just like Kaa from the cartoon about Mowgli. White should do something about the pawn on d5 now; the Rubicon has been crossed.

18.dxc6 bxc6 19.f3 ♗f6 [Very interesting is to sally with the queen - 19...♖c4 After 20.♗xc6 ♙xc6 21.♙xg7 ♖xg7 22.fxe4 ♙xe4 23.♖f4!? d5 we have a position of dynamic equilibrium on the board. The grandmaster is trying to restrain my bishop on g2 and not allowing any simplifications.]

20.b5 cxb5 [I was a bit surprised here, because I have been expecting 20...♗d5 21.♗xc6 (21.bxc6 21...♖xb2 22.♖xb2 dxc5) 21...♗e3 (21...♖xb2 22.♖xd5) 22.♖d3 ♗xf1 23.♙xg7 ♖xg7 24.♙xf1 ♙xc6 25.bxc6 dxc5 26.f4 with such a pawn on c6 White shouldn't lose, but I believed that it was quite logical to transfer the knight to the weak square e3. Now White obtains a serious trump in the form of a powerful passed pawn.]

21.c6 ♙e6 22.♗xe6 ♖xe6 23.♖d3 f4 [Once again, I failed to anticipate this move! The knight is not going to the coveted square. 23...♗d5 24.♖xb5 ♗e3 25.♖fc1 ♖c8 26.♙xg7 ♖xg7 27.♖b2 with a balanced position.] A return sacrifice of a pawn is a responsible step to make, but in the line 24.Qxb5?! Nh5 25.Bxg7 Kxg7 26.g4 Nf6 it is a pain to look at the bishop on g2, while after 24.gxf4 Nh5 25.Bh3 Qxh3 26.Qb3+ e6 27.Qxa2 Nxf4 28.Rf2 Qh4 Black can always repeat moves if he wants to. That's why I had to do something drastic to free my bishop.

24.e4! [24.♖xb5 24...♗h5 25.♟xg7 ♔xg7 26.g4 ♗f6; 24.gxf4 24...♗h5 25.♟h3 ♖xh3 26.♖b3+ e6 27.♖xa2 ♗xf4 28.♚f2 ♖h4]

24...♚c8 [After 24...fxe3 comes 25.♟h3; an equal endgame occurs after 24...fxg3 25.hxg3 ♗h5 26.♟xg7 ♔xg7 27.♖d4+ ♖f6 28.♖xf6+ ♟xf6 29.♟h2 ♚c2 30.f4]

25.♟xf6 [25.♖xb5 25...♗h5 26.♟h3 ♖xh3 27.♖d5+ ♟f8 28.♖xa2 fxg3 29.♟xg7+ ♟xg7]

25...♟xf6 26.♖d5 ♖xd5 27.exd5 Exchange of queens has dramatically changed the situation on the board. The pawn on c6 is very strong; White's bishop will soon paralyze Black's rook; the only resort for Black is that he is keeping an extra footman. **♟d4+ 28.♟h1 ♚a5 29.♚fe1 ♚c7 30.♚e4 ♟c3 31.♟h3 fxg3 32.hxg3**

32...♟f7? [Time trouble. A single mistake spells doom for Black. Maybe Denis didn't like...32...b4 because of 33.♟d7 ♟f8 34.♚f4+ ♟g7 35.♟e6, but the king escapes after 35...h5. Now an unexpected assault of the White rook is winning.]

33.♟e6+ ♟e8 34.♚c4! ♟e1 [Such simple lines as 34...b4 35.♚xc3 bxc3 36.♚b8+; 34...♟f6 35.♚cb4 are easy to calculate, but even the trick in the game doesn't save Black.]

35.♟g2 ♚a2+ 36.♟h3 ♟a5 37.♚xb5 The pawn has been regained. The Black monarch is on the brink of execution.

♟f8 38.♚b8+ ♟g7 39.♚g8+ ♟f6 40.♚f8+ ♟g7 41.♚f7+ ♟h8 42.♚c1 ♚b2 All the roads lead to Rome here, but I have chosen the

most aesthetically attractive one, in my opinion, - White's king is paying a visit to the Black colleague. Gone are the days when the king and the bishop had to vegetate on g1 and g2. Now they are the key factor behind White's upcoming victory.

43.♟g4 ♟d2 44.♚a1 h5+ 45.♟h4 and Black resigned due to **♚b8 46.f4 ♚d8 47.♟g5 ♚g8 48.♟h6 1-0**

Special thanks to Peter Zhdanov for the offer to annotate a game of mine for the Top GM Secrets newsletter. As a conclusion, I would like to add that when you are playing a GM rated nearly 2700, it is vital to have no fear. You can beat anyone as long as you struggle for the initiative with all your might.

Best rating: 2672

Black seems to be completely fine. He has a nice center and active minor pieces. The only temporary drawback of his position is the misplacement of his e6 rook, however it allows White to grab the advantage with extremely powerful play...

30. ♖f5! Very well played! Actually the position is very concrete and Carlsen starts to use his tactical skills to gain a positional advantage. Suddenly Black faces a difficult problem, he has many moves and none of them seem to be adequate. [Black is slightly better after the simple retreat 30. ♖e2 30... ♖e8 Black consolidates and is ready to overtake the initiative by pushing e4 followed by Ne5-d3.; The reason why the f-knight had to go to g5 can be seen in the line 30. ♖e5 30... ♖e8 31.g3 ♖xh3+! and the f3 knight is hanging.]

30... ♖e7 [A nice tactical point is to meet 30... fxe4 by

31. ♖xd5! ♖xd5 32. ♖xe6 ♖e8 and White wins serious material with 33. ♖b3!+- Black cannot survive the pin on the diagonal.; 30... ♖ee8 moves into 31. ♖d6 ♖e7 32.g3; 30... ♖c6 is similar to the game. White again plays 31.g3!]

31.g3! The main point of the previous move! White uses the fact that the black pieces are tied to defend each other.

31... ♖xe4 [Probably the best defense was 31... fxe4 32.gxf4 ♖b6 33.fxe5 ♖xe5 34. ♖xe4 White has won a pawn, but at least Black managed to keep his active pieces and he might hope for sufficient compensation. 34... ♖g7+=]

32. ♖xe4 fxe4 [32... ♖xh3+ is even worse, because it leaves Black with a horrible structure after 33. ♖xh3 fxe4 34. ♖g5!± White could have recaptured the e4 pawn right away, but it is much better to occupy this excellent square with the knight. Despite the material equality, White can claim a serious advantage because of the two

weaknesses on e5 and b5 and the excellent placement of his pieces.]

33.gxf4 ♖f8 [Black loses material after 33...exf4 34.♙xe4! ♜de8 Black was forced to leave the pin on the d-file but it simply costs him a pawn. 35.♙xf4±]

34.♞xe4 ♜xf4 The material is balanced, but the b5 pawn is extremely weak. Carlsen continues the game with extreme precision. It is tempting to go for the pawn directly with Rd5, but it allows Black to create counterplay. He rather fixes the weakness first to be able to win it in better circumstances...

35.b4! Rd5 and Nd6 are real threats now. [35.♙d5 is strongly met by 35...b4! 36.cxb4

36...♞f6! forcing the simplification to a rook endgame, where Black keeps excellent chances to survive. 37.♞xf6+ ♜xf6 38.♙dxe5 ♜xe5 39.♙xe5 ♜f4! It is important not to allow the rook to come behind the b-pawn. For instance Rf3? Re3 followed by Rb3 is over. 40.♙b5

♞g7! It looks clever to leave the back rank to avoid the cutting of the king with Rb7. White cannot avoid losing the b2 pawn anyway. .. 41.♞g2 ♜d4 followed by Rd3 and b3 next move. If White tries to activate his king with Kf3-e4 the dropping of the h3 pawn gives Black strong counterplay with the h-passer.]

35...♞f6 Baramidze aims for a rook endgame, but Carlsen correctly refuses this option.

36.♞d6! The fall of the b5 pawn creates very dangerous connected passed pawns for White!

36...♜f3 37.♞xb5 ♜xh3 38.c4! The material is still balanced, but the quality of the pawns decides the outcome. The b- and c-pawns start to advance and Black cannot really stop them.

38...♜h4 [38...♜b3 runs into 39.♞d4! and Nc6 next!]

39.♞d6 ♞h5 [On 39...♞e8

40.♙e4! is a key move to save the pawns along the 4th rank. (Sometimes such pawns automatically decide the game, but here White loses one of them... 40.♞xe8? 40...♜xe8 41.♙c1 ♜c8=) 40...♜xe4 41.♞xe4+— and the pawns continue marching.]

40.b5 ♞f4 Black pins his hopes to active counterplay against the exposed king, but he is lacking the pieces to create something serious. White can easily neutralize the threats of the knight and rook.

41.b6 ♜g4+ 42.♞f1 ♜h4 43.f3! Simple and strong. White parries

the mate threat.

43...♖h1+ 44.♔f2 ♜h2+ 45.♔g1 [Sacrificing an exchange with 45.♔e3 was also good enough. 45...♘g2+ 46.♔d3 ♘xe1+ 47.♞xe1+- and the passed pawns are unstoppable.]

45...♞c2 Nh3 is threatening now, but White has many convincing winning moves to parry this single threat. [45...♞b2 loses to 46.♞b1 ♘h3+ 47.♔h1 ♘f2+ 48.♔g2+- and there are no more checks.]

46.♔h1 [46.b7? is wrong because of 46...♘h3+ 47.♔h1 (47.♔f1?? 47...♞f2#) 47...♘f2+ 48.♔g1 ♘h3+=]

46...♘h3

47.♘e4! The last exact move! White prevents Nf2 and now the only question that remains is what happens if Black captures the unprotected pawn, but it is also refuted directly...

47...♞xc4 48.♞d8+! ♔g7 49.♞b1! [and Black resigned in view of 49.♞b1 49...♞b7 50.♘d6+- and the pawn promotes. Perfect technique by Carlsen!] **1-0**

Chess and the City. Good Bye Gibraltar

The most amazing open tournament of all time has finally come to an end. It was convincingly won by one of the favorites Hikaru Nakamura with an astonishing score of 8.5 /10.

One of the crucial rounds of the tournament. After losing his last three games vs. Topalov Nakamura was seeking a bloody revenge and eventually managed to succeed.

This did not only secure him a substantial gain of 16 rating points, but he will also regain his place as the highest ranked player of the USA on the next list.

One of the most impressive performances came from the current women's world champion Hou Yifan, she agreed to play despite participating in the well-known tough event in Wijk aan Zee of 13 rounds immediately before. Throughout the tournament she showed great play and was even close to defeating David Howell in the last round to secure herself second place outright. Eventually she finished in 3rd-11th place and was rewarded not only with the first women's prize of over 15000 pounds, but also earning a substantial sum in the main price category.

In order to give more honour to that fantastic open tournament, the team of Chess Evolution and I agreed on a small quiz which give 1 special book reward sent by Chess Evolution to the winner.

But let us start the quiz:

1. How many times has the Tradewise Gibraltar Chess Festival taken place?
2. Who among the main Organizers has the nickname "the fox"?

3. Which female participant is the strongest rated one playing for the first time in 2015?
4. Which other female participant had to spend some additional days at Gibraltar in 2013 due to a Visa problem?
5. Which two participants at the Gibraltar Festival of 2015 are sponsored by Red Bull?
6. Who is the creator of the Gibraltar Chess Tournament?
7. Which Top Grandmaster is known by the name of "Prince Charming"?
8. Which other Top GM being called "The finest"?
9. What is the favorite move of the commentator Simon Williams (related to the nick name I gave him)?
10. Last but not least, which super GM agreed his participation for 2016?

Please send the answers to the following address (chessnewsletter@yahoo.com) within 2 weeks after the publication of the newsletter. We will draw one winner and reward him/her with a book price, which will be posted to his/her address.

1.e4 c5 2.♘f3 ♘c6 3.d4 cxd4 4.♘xd4 e6 5.♘c3 ♖c7 6.♙e3 a6 7.♙d3 b5 8.♘xc6 ♖xc6 [8...dxc6 9.a4! ♙b7 (9...♖b8) 10.axb5 cxb5 11.♘xb5→]

9.♙d4?! Probably with the idea to avoid Bc5, but it looks a bit strange. White usually plays for example: [9.O-O 9...♙b7 10.♖e1 with the idea to use some Nd5 tricks. 10...♘f6 11.a3 ♙d6 12.♙d4 e5 13.♙e3 ♙c5 14.♖f3 ♙xe3 15.♖xe3 ♖c5 16.♖f5 ♙f8 17.♖g3 h6∞1/2-1/2 Macieja,B-Anand,V/New Delhi/Teheran 2000/CBM 080 (26)]

9...♙b7 10.♖e2

10...♘e7 This was Taimanov favorite setup in the Sicilian, with a pawn on d7. [10...♘f6 11.♙xf6 gxf6 12.♘d5 O-O-O!]

13. ♖xf6 ♕g7=]

11.f4 b4 The other idea was to bring the knight to c6:
[11... ♖c7 12. ♖f2 (12. ♕e5 12... d6 13. ♕xb5+ ♕c6! → Duda)
12... ♖c6 13. ♕b6 ♖b8∞]

12. ♖b1 ♖g6

13. ♖f2 White had two other options: [13. ♖f1!? This move looks most logical to me because the rook on f1 is useful; 13.g3 13... e5!? 14.fxe5 ♕c5 15. ♖f2 ♖c8! Milton 16. ♕xc5 ♖xc5 17. ♖xc5 ♖xc5 18.a3 with the idea to create pressure on the queenside, but Black is on time after 18... ♖xe5! 19.axb4?? ♖xd3+ 20.cxd3 ♖c1+ →]

13... ♕d6 14. ♕e3 [14. ♕xg7 14... ♖xf4! 15. ♕xh8 ♖xd3+ 16.cxd3 ♖c1+ →; 14.g3 14... e5=]

14... O-O 15. ♖d2 ♖ac8 looks natural but might not be necessary. An alternative was [15... a5 with the idea to put pressure on the c2 pawn after Ba6.]

16.h4!? A very aggressive move, but White could put his king into safety after the simple [16.O-O-O∞]

16... ♖c7

17.e5 [17.g3 just to limit the black pieces a bit, but now Black can launch some aggressive play over the center: 17... f5!? Friend 18.O-O-O fxe4 (18... ♖e5 19.fxe5 fxe4 20.exd6 ♖a5 21. ♖xf8+ ♖xf8 22. ♖xe4 ♖xa2 23. ♖hf1+ ♖g8 24. ♖c5±; 18... e5?! 19.exf5 exf4 20. ♕b6!) 19. ♕xe4 (19. ♖xe4 19... ♖e5! 20. ♖xd6 ♖xd3+ 21. ♖xd3 ♕xh1 22. ♖xc8 ♖xc8 23. ♖d4 a5 with for example d5-Be4 next and Black is clearly better.) 19... ♕xe4 20. ♖xe4 ♕e7∞]

17... ♕c5 18.h5 ♕xe3 19. ♖xe3 ♖e7

20. ♖c4 [20. ♖e4 20... ♖f5 21. ♖f2 d6!? Duda (21... f6!? Friend- with the idea to destroy the white center and activate the pieces. 22.exf6 ♕xe4 23. ♕xe4 (23.fxg7 23... ♖xg7 24. ♕xe4 ♖xf4∞) 23... ♖xf6 24.O-O-O ♖c4! → 22.exd6 (22.g4? 22... dxe5

23.gxf5 exf5—+) 22...♖xd6 23.♖xd6 ♖xd6 24.O-O-O ♖c5 and Black doesn't have any problems here.]

20...♖f5 21.♖d2 ♖d5 22.♖e3 [22.♖xf5 22...♖xc4]

22...♖xe3 23.♖xe3 ♖c5 Instead of defending a slightly worse endgame White decides to create some pressure against the black king.

24.♖g3 h6 25.♖h4!?

25...♖g1!? Taimanov accepts the challenge. Objectively better for Black was the simple [25...♖h8 26.♖g4 ♖c4! (26...♖g8) ; 25...f5 26.exf6 ♖xf6 27.♖g4 ♖f7 is also fine for Black.]

26.♖d2 [26.♖e2!? was an interesting alternative. 26...♖xc2+ (26...♖xa1 27.♖g4 ♖h8 28.♖xg7 ♖xc2+ An amazing move! 29.♖xc2

29...♖e4!! We missed this on the board and it was shown to us by the engine. 30.♖xe4 ♖xb2+ 31.♖e3 ♖c1+ 32.♖e2 ♖b2+ 33.♖f1 ♖c1+ 34.♖f2 ♖d2+ and White is not able to avoid perpetual check because after 35.♖g1? ♖d4+; 26...♖xg2+ 27.♖xg2 ♖xg2 28.♖g1 ♖d5 29.♖hg4 g6! 30.hxg6 f5 31.exf6 ♖xf6 32.g7 ♖c4!=+ to avoid Bh7. Black is better because the g7 pawn can be weak.) 27.♖xc2 ♖c4+ 28.♖d2 (28.♖f3 28...♖xa1 29.♖g4 ♖f1+ 30.♖e3 ♖e2+ 31.♖d4 ♖xc2—+) 28...♖d4+ 29.♖c1 ♖g1+ 30.♖d1 ♖c8 31.f5! There is no useful check now, but Black plays 31...♖c5! Duda - to have a check on d5 after Kd2. 32.♖xc4 ♖xc4+ 33.♖d2 exf5 and Black is better.]

26...♖d4? After deep analysis we can objectively say that this is a mistake. Black should have forced the draw after: [26...♖xc2+ 27.♖xc2 ♖d4+ 28.♖d3 ♖f2+ 29.♖d1 (29.♖c1?? 29...♖e1+) 29...♖g1+ with perpetual check.]

27.f5 [27.♖e1 to prevent Be4 but then after 27...f5! 28.exf6 ♖xf6 Black is fine.; 27.♖g4 27...♖e4! 28.♖xg7+ ♖h8+ and the queen and rook are badly placed on the g-file.]

27...♖xc2+ 28.♖xc2

28...b3+ Black could also play [28...♖c8+ 29.♖d1 (29.♖d2 29...♖xb2+ 30.♖e3 ♖xa1 31.f6 ♖c1+ is less accurate. (31...♖g1+ 32.♖e2 ♖xg2+ 33.♖xg2 ♖xg2 34.♖g4 ♖d5 35.♖xg7+ ♖h8 (35...♖f8 36.♖h7+—) 36.♖xf7 ♖xa2 37.♖h7+

♔g8 38.f7+ ♔f8 39.♖h8+-) 32.♔f2 (32.♔e2?? 32...♖g5 33.♖g4 ♖xh5+-) 32...♖d2+ 33.♔g1 (33.♕e2 33...♖g5 34.♖g4 ♖f5+ 35.♖f4 ♖g5=) 33...♖c1+ 34.♔h2 (34.♕f1 34...♖xg2+ 35.♖xg2 ♕xg2 36.♔xg2 gxf6 37.exf6 a5 and it is not easy to evaluate this position.) 34...♖g5 35.♖g4 ♖xh5+ 36.♖h4 ♖g5 37.♖g4=) 29...♖g1+ (29...♖xb2 30.♖b1+-) 30.♖e1 ♖xg2

31.♕e2 (31.♖xb4 31...♕f3+ 32.♕e2 ♖c5→; 31.♖e3!± A perfect place for the queen! We overlooked this defending idea on the board, but it was shown to us by the engine.) 31...♕b3+! or Bxa2!? - Milton 32.axb3 ♖d5+ 33.♖d2 ♖xb3+ 34.♔e1 ♖g3+ 35.♔f1 ♖xh4 36.♕f3∞(36.♖xa6 36...♖c1+! Friend)]

29.♔d1? Lutikov overlooked a winning variation! He could play [29.axb3! 29...♕xb3+ 30.♔d2 (30.♔xb3 30...♖b8+ 31.♔c2 ♖xb2+ 32.♔d1 ♖xa1+→) 30...♖xb2+ 31.♔e3 ♖xa1 32.f6 and now the white king needs to escape from the checks. 32...♖g1+ 33.♔e2 ♖d1+ 34.♔f2 ♖d2+ 35.♔g1 ♖c1+ 36.♕f1 ♖g5 37.♖g4 ♖xh5 38.♖xg7+ ♔h8

The whole line was based on the following amazing move: 39.♖h7+! ♔xh7 40.♖g7#]

29...♖g1+ 30.♖e1 Once again an interesting option was to give the rook: [30.♔d2 30...♖xa1 31.♖g4 (31.f6 31...♖xb2+ 32.♔e1 ♖xg2 33.♖xg2 ♕xg2 34.♖g4 bxa2 35.♖xg7+ ♔h8 36.♖h7+=) 31...♖xb2+ 32.♔d1 ♖a1+ (32...♔h8 33.♖xg7 ♕e4?! Milton 34.♕e4 ♖d4+ 35.♕d3 bxa2 36.♖h7+! ♔xh7 37.f6+ ♖xd3+ 38.♖xd3+ ♔h8 39.♖a3! Otherwise Black would have Rb8.; 32...bxa2 33.♖xg7+ ♔h8 34.♖h7+! nice. 34...♔xh7 35.f6+) 33.♔d2 ♖xa2+ 34.♔e3 ♖xg2 35.♖xg7+ ♔h8 36.♖xg2 ♕xg2 37.♖xg2 exf5 Black has many pawns, but they are quite weak so this should be a draw.]

30...♖xg2 31.♖f1?! [31.axb3! Friend 31...♖xb2 (31...♕xb3+ 32.♔c1 ♖c8+ 33.♔b1 ♖c2 34.♖xa6 ♖xb2+ 35.♔c1

35...♖c2+ 36.♔b1 leads to a nice perpetual check! -Friend)

32.♖c1 ♟xb3+ 33.♟c2 ♖c8 34.♞h2 ♖c5! Duda- Once again the rook is activated over the 5th rank.]

31...♟f3+! 32.♖e1 ♞xb2 33.♞b1 ♞xe5+ 34.♖f2 bxa2 Black grabs a lot of pawns. The position is winning for him but he still needs to play accurate moves.

35.♞e1 ♞f6 36.♖g3

36...♟g2?! looks nice but better was [36...♞g5+ 37.♖h3 ♟d5—+ with the plan to activate the rook over the b-file.]

37.♞g1 [37.♞xg2 37...a1=♞ 38.♞xa1 ♞xa1=+ with chances for White.; 37.♞f2!?]

37...exf5 38.♞d4 [38.♟xf5 38...♟c6 Rb8 is coming and with a weak king and the unpleasant pawn on a2, White's position is very bad.; 38.♞e3 38...♟c6 39.♞d4 ♞b8 40.♞f4 ♞b3 Friend]

38...♞g5+ 39.♖h2 [39.♖f2 was more accurate compared to the game, so that there would be no check on h5. 39...♟c6 (39...♟e4 40.♞hxe4 fxe4 41.♞xe4 and there is no check on h5.) 40.♞g1

doesn't work because of the nice 40...a1=♞! 41.♞xa1 ♞g2+ 42.♖e1 ♞e8+ 43.♖d1 ♟f3+ 44.♖c1 ♞e1#]

39...♟e4! 40.♞hxe4 fxe4 41.♞xe4 ♞xh5+ 0-1

Editorial Preface

And the Zurich Chess Challenge 2015 is already behind us. 6 Top Grandmasters were playing a round robin in blitz, rapid and normal chess.

Anand can celebrate a great comeback, as after not having a great showing in Baden-Baden he managed to consolidate and take clear first place with 3 draws and 2 wins over Nakamura and Aronian. Second place went to Nakamura, who also won 2 games, against Karjakin and Caruana, but he lost to Anand.

In the blitz section Aronian was unstoppable and Vladimir Kramnik was the strongest one in rapid.

In the overall standings, Anand and Nakamura scored the same amount of points, so an armaggedon game was needed to decide the overall winner. Nakamura was Black and a draw would have been enough, but he even managed to win the game in convincing style.

All in all it was a great event to watch and in the current issue you will find some commented games taken from it.

Another super event has begun and that is the FIDE Grand Prix, in which Grischuk, Giri and many other Top Grandmasters are participating.

The biggest surprise so far is the excellent start of Tomashevsky with 3.5/4. His games were a bit strange, as it seems like he only wants to play a calm game and has nothing against a draw, but people keep on trying to look for trouble and Tomashevsky shows no mercy in punishing them.

After round 4 nothing too dramatic has happened, but the fight for the first places is probably going to be between Tomashevsky, Grischuk, Giri and Mamedyarov. A lot of excitement is still awaiting us!

We hope you enjoy the current issue.

With best chess wishes,

Arkadij Naiditsch & Csaba Balogh

Play GM Arkadij Naiditsch for Free

At Grenke Chess Classic-2015 the German #1 Arkadij Naiditsch defeated the World Chess Champion Magnus Carlsen in classical chess, drew the rapid and blitz mini-matches 1-1 each and succumbed only with Black in Armageddon. Now you have a special opportunity to experience a similar challenge and to **face GM Arkadij Naiditsch in a two-game blitz match**. Free of charge!

Conditions of the Match

In one game you get White against GM Naiditsch; in the other you play Black.

The time control is 5 minutes/game for each of the opponents.

Venue: Chess.com, PlayChess, ICC, or any other major chess site of your choice.

Cost of participation: **FREE** for winners of the Top GM Secrets lottery (see below).

Eligibility for the Top GM Secrets Lottery

On **March 15** a drawing of lots will be held among **all the active subscribers of Top GM Secrets**. **Three prizes** will be offered. The winner may either claim the prize for himself/herself, or transfer it to a different person. Basically, **each subscription valid on March 15 is a lottery ticket**, so the more subscriptions you and your friends possess, the higher the chances of winning one or more of the prizes. The winners will be announced in the March 21 issue of Top GM Secrets. Good luck!

Two best games of the past week

(1) Jobava, Baadur (2696)
- Mamedyarov, Shakhriyar (2759)
[A01]

Tbilisi FIDE Grand Prix(5),
2015.02.20

GM Arkadij Naiditsch
Best rating: 2737

The latest results of Jobava have been anything but great and after a very bad event in Wijk aan Zee, he continued playing in the same way in the Grand Prix, often going for irrational openings combined with overly aggressive play. This might work in an open tournament, but when you are playing against the best in the world, usually such play is getting punished. Anyhow, in the current game, after a very strange opening, Black got at least equal play, but maybe he wanted too much too quickly and Mamedyarov took a risky decision. The game got very hectic but Black seemed to keep a clear advantage, until Mamedyarov made a blunder which allowed Jobava to get on the top. A funny game to watch...

1.b3 Well...

1...f6 2.f3 2...b2 g6 Personally I like this setup for Black a lot.

3.f3 c3 To play 3.Bxf6 is of course not an option. Black would just be better.

3...g7 4.d4 Baadur already played a few games with this setup, which looks very strange to me. What is the idea of putting the bishop on b2 and then playing d4? I don't get it...

4...c5 Black uses the fact that White cannot take on c5 because of Ne4.

5.e3 cxd4 6.exd4

6...d5! A very good move. Now the bishop on b2 is "dead".

7. d2 White is planning to castle queenside- what else to do?!

7...c6 8.O-O-O a5 This move looks a bit too rushed to me. Why not immediately play 8...Bf5 with the idea of just playing O-O and doubling on the c-file. Maybe Qa5 will be a useful move in the future, but maybe not...

9.f3 preparing the g4 push and protecting the e4 square.

9...h5 not allowing g4 and sometimes Bh6 could be a threat.

10.b1 f5 Black wants to play Nb4 next.

11.d3!? A very good practical decision. White decides to sacrifice a pawn and get an active position rather than playing a move like 11.a3?! and be clearly worse after for example O-O followed by Rfc8.

11...xd4?! A very principled move, but there was no reason for Black to play it. [After the simple 11...xd3 12. dxd3 O-O Black's position is at least equal and I would clearly prefer to be Black here.]

12. dge2! Maybe Mamedyarov underestimated this strong answer of White, but on the other hand White had nothing else to play. [In case White would try to recover the pawn with 12. fxf5?! 12... dxf5 13. dxd5 Black has the strong answer 13... cxd5! entering a clearly better endgame. 14. cxd5 dxd5 15. bxd5 fxb2 16. cxb2 dxe3 17. bxd2 d8 and this endgame looks very unpleasant for White.]

12... dxe2 [Another option for Black seems to be 12... fxd3 but now White can play for the initiative after 13. dxd4 fxa6 14. fhe1 All the white pieces are in the game, the black bishop is badly placed on a6 and the position is very unclear.]

13. cxe2

13... d7! An excellent move by Mamedyarov! The black bishop will be passive on d7, but it will hold everything

together. [13... fxd3 14. bxd3 and White is threatening to play Nxd5 next.]

14. fhe1 Typical Jobava! All or nothing... [White could have chosen a safer way by playing 14. f b5!? 14... fxb5 It seems like Black doesn't have anything better. 15. cxb5+ cxb5 16. dxb5 and Black cannot hold the d5 pawn. The position is around equal for example the simple 16... O-O and the game would probably end in a draw in this endgame.]

14... e6 It looks like Black's position is protected, but Jobava of course had something in mind before playing 14. Rhe1.

15. ffxg6!? Not very good, but very inventive play! The position is very crazy now.

15... fxg6 Of course Black has to take the piece.

16. dxd5 This is also the only move.

16... dxd5 17. ffxg7 So, where to put the rook now?! On g8 or h7?

17... ffg8?! Maybe Mamedyarov stopped being serious about the game or maybe he just miscalculated something, but I cannot understand why he didn't go to h7. [It seems like the right choice was 17... fh7! and if White tried to do same as in the game 18. cxe5 Black now has the very strong 18... cf7!! and the black king can escape to g8 after 19. bxd5 cxd5 20. cxf6+

♔g8 and this was all not possible in the game.]

18. ♖e5 is probably White's best chance.

18... ♖xg7? This is already a blunder. Black had several good options here: [A very hard move to play was 18... ♔f7 19. ♖xd5 We are entering a long forced line now. 19... ♖xd5 20. ♖f6+ ♔e8 21. ♖xg6+ ♔d8 22. ♖f7 ♔c7 23. ♖e3! Of course Black always has Rxg7 or other options, but for a human such a position can look very dangerous and unclear.; 18... ♖c7! seems to be very strong. 19. ♖b2 (19.c4 just leads to a lost endgame. 19... ♖xe5 20. ♔xe5 ♘e7 and I don't see any hope for White.) 19... O-O-O! The only move, but it is very strong. 20. ♔e5 ♖a5 and maybe White has some play for the piece, but I think his position should be close to lost in the long-term.]

19. ♖xd5!! Black had clearly missed this counterblow... [19. ♖xg7 was losing on the spot as after 19... ♘c3+ 20. ♔b2 ♘xd1+ 21. ♖xd1 O-O-O White has no compensation at all.]

19... ♖b4 controlling the f8 square and keeping an eye on the e1 rook.

20. ♖d6 preventing the black queen to joining the defense.

20... ♔f8 Another only move.

21. ♖ed1 [The very tempting-looking 21. ♖e4 doesn't bring much either. 21... ♖b5 The only move. 22. ♖d4 ♔e8 23. ♖xe6 with a very unclear position.]

21... ♔c6?! Another unlucky decision... [21... ♔e8 looks much tougher. 22. ♖xe6 ♔f7 23. ♖d7 ♔g8 Black wants to play Rf8 next and it seems like everything is okay, but White has the amazing

24. ♖xf7! ♔xf7 and again White needs to find 25. ♖d5!! which is very difficult during a practical game. 25... ♔f8 26. ♖e4 and because of his dangerous attack, White has good winning chances.]

22. ♖1d4? and White gifts the game back... [22. ♖d8+ was winning. 22... ♖xd8 23. ♖xd8+ ♔e8 (23... ♔e7 loses to 24. ♖d4; Maybe what both players missed is that after 23... ♔f7 White needed to find 24.c3!! The black queen cannot keep control over both the f8 and f4 squares any longer. 24... ♖e7 25. ♖f4+ ♖f6 26. ♖f8+ ♔xf8 27. ♖xf6+ and White is easily winning.)]

22... ♖b5 The right move.

23. ♖d8+ ♖xd8 24. ♖xd8+ ♔e7 25. ♖d6+ The position seems to be a draw now...

25... ♔f6 26. ♖d4+

26...♔f7?? and Mamedyarov is the last one to blunder. [After the correct 26...♔e7 27.♚d6+ (If White wanted too much with 27.♚h8? Black is winning after 27...e5! 28.♚d8+ ♔e6 and the black king is perfectly safe on e6.) 27...♔f6 and this seems to just be a draw.]

27.♚f4+ Now the game is just over.

27...♔e7 followed by mate with 28.Qf8. A very exciting game, even though it had quite a few mistakes in it, and clearly a very important point for Jobava! **1-0**

(2) Anand, Viswanathan(2797) - Aronian, Levon(2777) [D97]

4th Zurich CC Classical(2.3),
2015.02.15

GM Csaba Balogh
Best rating: 2672

Anand has a terrible personal score against Aronian, but in this game he takes a nice revenge. It would be very interesting to know how long his preparation lasted, perhaps it was until he reached a completely winning position. In any case, Vishy wins a very nice game.

1.d4 ♘f6 2.c4 g6 3.♘c3 d5 A surprise by Aronian. He only occasionally employs the Gruenfeld defence, but recently everyone faces serious difficulties about how to play for and edge against it...

4.♘f3 ♗g7 5.♚b3 Anand sticks to his amazing preparation, which he did before the World Championship match against Carlsen. He got a very promising position there in this 5.Qb3 system.

5...dxc4 6.♚xc4 O-O 7.e4

7...♘a6 Aronian follows the game against Carlsen and the old main line used in so many games successfully by Kasparov.

However recently all the experts are trying different setups like 7...a6 or 7...Nc6.

8.♘e2 c5 9.d5 e6 10.O-O exd5 11.exd5 The initial position of the 7...Na6 system.

11...♖e8 The other main line is 11...Bf5, but they often transpose to each other.

12.♖d1 The main line, but at the same time the deviation from the Anand-Carlsen WCC game from last year November. White supports his main triumph, the d5 passed pawn, which sometimes becomes extremely strong when it starts to advance. [The Anand-Carlsen game continued with the rare 12.♘g5 Arkadij commented it in detail in a previous issue of our newsletter.]

12...♘f5 Black usually pins his counterplay to the Ne4 move, which opens the diagonal of the g7 bishop, which is often threatening with tactical ideas like Nxc3 followed by Re4 or just the positional plan of a Nd6 retreat. The knight could become the ideal blockader of the passed pawn.

13.d6 Everything is still known with hundreds of games in the database. White has in mind to play Ng5 sometimes or Qb3, attacking the b7 pawn and threatening Bb5 or Bc4.

13...h6! The correct answer. Black has to take control over the g5 square. [Many players have fallen into the opening trap of 13...♗e4 which is strongly met by 14.d7! ♖e7 15.♗xe4 ♖xe4

16.♘g5! We can clearly see the strength of the d7 pawn. White comes out with a big advantage from the complications. One important line is 16...♖xd7 17.♖xd7 ♖xc4 18.♖xb7! ♖a4 19.♖d1± with a big advantage for White. Suddenly the black pieces are poorly placed and the king is getting very vulnerable. One direct threat is Rxa7 because after Rxa7 Rd8 Bf8 Bh6 wins.]

14.♘e3 This is the new direction prepared by Anand. [Almost all the games continued with 14.♘f4 14...♗d7 even such classical ones as Karpov-Kasparov from their World Championship match back in 1987.]

14...♗g4! Aronian tries to point out the drawback of the previous move with the most direct answer. [14...♗e4 is again met by 15.d7! ♖e7 16.♗xe4 ♘xe4 (16...♖xe4 17.♖d5 is too strong! The b7, c5 and a6 are hanging. This is one of the points of the 14.Be3 move, as the e2 bishop is hanging now.) 17.♖d6! and Rad1 next. The d7 pawn paralyzes the black pieces.]

15. ♖f4

15... ♗xc3! This is the tactical point of the previous knight move! If Black gives up his favorite bishop, there must be serious reason to do it. The point is that the bishop has moved into the Re4 fork. The Gruenfeld players must be good in creativity and very strong in calculation, which in general fits perfectly both Anand's and Aronian's style.

16. bxc3 ♖e4 Black wins a piece, but the game goes on. Obviously Anand had to be prepared for all these things...

17. ♖b5 ♖xf4 18. ♖xb7 Black is a piece up, but his pieces are totally disorganized. He must try to consolidate in the next couple of moves...

18... ♖a4 The human move, indirectly protecting the a6 knight. [The machine shows a brilliant variation, which seems to lead to a forced draw 18...c4!! 19. ♖xa6

19... ♗d3!! 20. ♗xd3 ♖xf3! Of course it is impossible to find these ideas over the board. Black eliminates the main defender of the king and Qh4 is coming next move with a scary attack... 21. gxf3 (21. ♖xc4 21... ♖h4 comes anyway.) 21... ♖h4! There is nothing else left to do for Black, he sacrifices all his pieces... 22. fxf3 ♖xg4+ 23. ♖f1 ♖h3+ 24. ♖e1 White might try to avoid the perpetual check by moving the king towards the center, but he cannot escape from it... 24... ♖e8+ 25. ♗e2 (25. ♖d2?? 25... ♖xd3+ 26. ♖c1 ♖xc3+ 27. ♖b1 ♖b8+—) 25... ♖g4! A subtle move, when Black is a rook and bishop down! It is important to protect to c4 pawn to stop the white queen from joining the defence. 26. f3 ♖g1+ 27. ♖d2 ♖g5+ and White is forced to agree a draw with 28. ♖e1= (28. ♖c2?? loses to 28... ♖xe2+ 29. ♖b1 ♖f5+ and mate on c2!)]

19. d7! This position was clearly part of Anand's preparation. The lines show that in case of Black's perfect reply the game is balanced, but obviously to play such a sharp position over the board is quite impossible for a human, so it is a good practical choice for Anand to opt for this position. Black is still a piece up, but his pieces are misplaced and the d7 pawn keeps many tactical resources at White's disposal. [19. ♗xa6? right away was wrong in view of 19... ♖b8! and White cannot save his a6 bishop. 20. ♖c6 (20. ♖xa7 20... ♖a8—) 20... ♗d7!—+ is the point and the bishop falls.]

19... ♗e4 [The alternative was 19... ♗c7 saving the knight, but White has strong counterplay here as well after 20. h3! ♗f6

21. ♖e5! creating the threat of Nc6 and Qb3, with a double attack on a4 and f7! 21... ♗xd7 22. ♖xf7! Black must accept the sacrifice. 22... ♔xf7 (Other moves are much worse, for instance 22... ♜f8 23. ♗d6+- wins for White. Too many pieces are hanging. The c7 knight, the f5 bishop and then the d7 knight and also Qb3 check.) 23. ♜b3+ ♔g7 24. ♜xa4+= The position has simplified and White's prospects are better. He is already doing fine materially and the black knights remain disorganized.]

20. ♜b3 ♗c6? A blunder which causes the loss of the game for Black. [The only move was the ugly 20... ♜a5 protecting the pieces on the a-file. 21. ♗d2

attacking many pieces again. The g4, the e4 are hanging directly and Nc4 is threatening to trap the rook. Black

is forced to sacrifice to survive this tension somehow... 21... ♗xg2! Surprisingly Black survives the complications in all the lines. 22. ♗c4 (22. ♗xg4 22... ♜g5; 22. ♔xg2 22... ♜h4) 22... ♜b8 23. ♗xa5 ♜xb3 24. axb3 ♗e5 25. ♔xg2 ♗b8 and Black eliminates the d7 pawn and solves most of his problems. These are all computer lines and it is very hard to understand what is going on for us...]

21. ♜d6! The rook joins the game with decisive power. Black has no good way to deal with the hanging of the c6 bishop because the a4 rook must also be protected. Rxd6 is an additional threat.

21... ♗xd7 [21... c4 22. ♜d1! +- is over. The c6 and the a4 are hanging and after 22... ♗b5 23. ♜d5!+- wins because of the Rxd6 check threat.; 21... ♜b8 22. ♜d1 leads to the same problems as the 21... c4 line. 22... ♜b6 23. ♜xc6! ♜xc6 24. ♜xa4+-]

22. ♜ad1! +- As simple as that! Black cannot solve problems despite his extra piece. Even Qxa4 is a threat.

22... ♜b8 23. ♜xd7 ♜xb3 24. axb3 ♜a2 The material is balanced, but the weakness of the black king and the misplacement of the a6 knight decides the game...

25. ♖c4! ♜f8 **26.** ♜7d6! The final blow! White wins as not just the a6 knight is hanging, but Rxd6-Rxd4 is also in the air.

26... ♔g7 **27.** ♜xa6 ♜xf2 **28.** ♜e1 What a great game by Anand!
1-0

The K-Files.

Nimzo 4.e3 0-0 5.Nge2 c6 8.e4

GM Alexander Khalifman
FIDE World Chess Champion (1999)
Best rating: 2702

(3) Nimzo 4.e3 0-0 5.Nge2 c6 8.e4 [E46]

1.d4 ♘f6 2.c4 e6 3.♘c3 ♙b4 4.e3 O-O 5.♘e2 c6 6.a3 ♙a5 7.b4 ♘c7 8.e4 The most ambitious and dangerously straightforward plan. White is trying to gain as much space as possible. Black has to react very precisely just to avoid full suffocation. However, pawns don't move back and if Black succeeds in undermining the opponent's center, then he can easily regain the initiative. The serious problem I faced analyzing this line is the lack of practical material (just 20 games so far). The same is true about the whole system with 5...c6 but in the other lines the structure is quite usual so it's easier to play, just considering well-known strategical patterns. After 8.e4 the situation becomes completely different so an accurate knowledge is extremely valuable here.

8...d5 This natural move seems to be the best. [8...e5 was not tried yet and there is a good reason for it: 9.dxe5 (9.d5 is good enough to secure some advantage. 9...d6 10.♘g3 - 8...d6) 9...♙xe5 10.f4 Simple and good. 10...♙c7 (10...♙xc3+ 11.♘xc3 a5 12.b5+= (12.♙b2 12...axb4 13.axb4 ♖xa1 14.♙xa1 d6 15.♙e2 ♘a6∞ is less clear.) 12...♘xe4 13.♘xe4 ♖e8 14.♙e2 ♖xe4 15.O-O d6 16.♖d3 ♖e8 17.♙b2 and White has more than enough for the sacrificed pawn.) 11.♘g3 and White will complete the development with a comfortable positional advantage. (11.e5 is too active. 11...♘e8 12.♙b2 d6∞) 11...a5 12.b5 d6 13.♙e2+=; 8...d6 It was a real shock for me to find out that this modest move has so far brought 85% for Black. OK, 10 games is not the most reliable number but still.. . However, it's mostly a coincidence and this massive success has little to do with the opening results. White has a comfortable choice of lines which promise him a nice positional advantage. Maybe not too much, but it is quite pleasant to play. 9.♘g3 This is the best plan. (

a) 9.g3 It was mentioned already in part 1 that a fianchetto combined with b2-b4 always has a certain drawback as the c4 pawn becomes vulnerable. The same is true for this line. 9...e5 10.♙g2 a5 11.♖b1 (11.b5 11...♘bd7 12.O-O exd4 13.♘xd4 ♘e5↗) 11...exd4 12.♘xd4 ♘bd7 13.O-O axb4 14.axb4 ♘e5 x c4 15.♖b3 (15.c5 15...dxc5 16.bxc5 ♖e7 17.f4 Vasilov - Ivanov, S Izhevsk

2010 17...♗g4! 18.♖ce2 ♜xc5⌚) 15...♗b6 16.♖ce2 c5 17.bxc5 ♗xc5=;

b) 9.h3 9...a5 10.b5 e5 11.g4 ♖bd7 12.♗g2 Granda - Ly Pavlodar rapid 2015 12...♖b6!? and once again c4 is a target. 13.dxe5 dxe5 14.c5 ♜xd1+ 15.♙xd1 ♖c4†)

9...a5 (9...e5 doesn't change too much as a7-a5 seems to be useful for Black anyway. 10.♗e2 (10.dxe5 10...dxe5 11.♜c2+=; 10.d5 10...a5 11.♜b1 - 9...a5) 10...exd4 (10...d5?! 11.cxd5 cxd5 12.♗g5± Lercel - Polyakov Krakow 2014) 11.♜xd4 a5 12.♜b1 - 9...a5) 10.♜b1! (10.b5 10...e5 and whatever White plays here, the c5 square gives Black good counterplay. 11.♗e2 (

a) 11.dxe5 11...dxe5 12.♗e3 ♗e6 13.♗e2 ♜xd1+ 14.♜xd1 g6=;

b) 11.d5 11...cxd5 12.cxd5 ♗b6 13.♖a4 (13.♗e2 13...♗d4 14.♗b2 ♖bd7=) 13...♗d4 14.♗b2 ♗xb2 15.♖xb2 ♖bd7= Matheson - Sukandar Queenstown 2012;)

11...exd4 12.♜xd4 ♖bd7 13.♜b1 ♖c5 14.O-O a4 15.♗e3 ♜e8∞ This position is complex, but I believe that Black has enough dynamic resources.) 10...axb4 11.axb4 e5 and now White has a very pleasant choice between 3 options which lead to some positional advantage. The structures are quite different so in my opinion it's just a matter of taste. I would most probably go for 12.d5, but I don't claim that this is the most promising move. 12.d5 (

a) 12.dxe5 12...dxe5 13.♜c2 ♜e7 14.♗e2 ♜d8 15.O-O g6 16.♗g5 ♖a6 17.♜b2+=;

b) 12.♗e2 12...exd4 (12...♗b6 13.♗e3+=; 12...d5 13.cxd5 cxd5 14.♗g5 dxe4 15.d5±) 13.♜xd4 c5 (13...♗g4 14.O-O ♗xe2 15.♖gxe2+=) 14.bxc5 ♖c6 15.♜e3 dxc5 16.O-O ♖d4 17.f4†)

12...♗b6 13.♗e2 ♗d4 This bishop looks stronger than it really is. 14.♗d2 cxd5 (14...♖a6 15.O-O ♗d7 16.♗d3+=;

14...♖bd7 15.O-O ♜e8 Tay - Sukandar Incheon 2013 16.♗d3 ♖f8 17.♖ce2+=) 15.cxd5 ♜b6 16.O-O ♗d7 17.♗d3 ♖g4 18.♗e1 ♜a3 19.♖ce2+=; 8...a5!? I don't see any problem for Black in the main line but still this new move might be a good alternative. Black tries to define the queenside structure before starting action in the center. 9.e5 This is the critical independent line. However, after (

a) 9.b5 9...d6 10.♖g3 e5 is a favorable version of the 8...d6 line.;

b) 9.♜b1 9...axb4 10.axb4 d5 The open a-file is good for Black in another setup. 11.e5 ♖e8 (11...♖fd7!? 12.cxd5 exd5 13.f4 ♜e7) 12.c5 f6 13.f4 - 8...d5;

c) 9.♗g5 9...d6 and it's not clear what the bishop is doing on g5.) 9...axb4 10.exf6 bxc3 11.fxg7 ♜e8 12.♖xc3 d5! 13.♗d3 ♜h4 14.g3 ♜h3 15.♗f1 ♜f5↔Black has nothing to worry about.]

9.e5 The other moves don't create any problem for Black. [9.♗g5 9...h6 10.♗h4 (10.♗xf6 10...♜xf6 Gu - Medina China 2013 11.e5 ♜e7 12.c5 f6⌚) 10...g5 11.♗g3 ♖xe4 12.♖xe4 dxe4 and White has yet to prove that he has enough for the pawn. ; 9.♖g3 9...e5!†and the center opens in Black's favor.; 9.cxd5 Opening the diagonal for the black passive light squared bishop is obviously illogical. 9...exd5 10.e5 and now, besides the two moves which transpose to the main lines, Black has a tricky resource: 10...♖g4!? (10...♖fd7 - 9.e5; 10...♖e8 - 9.e5) 11.h3 ♖h6 12.♗xh6 gxh6 13.f4 f6 14.♜d3 ♜e7 and Black's dynamic resources (a7-a5 first of all) fully compensate the weakened pawn structure. White also has certain problems completing the development. 15.♜c1 (15.♖g3 15...fxe5 16.fxe5 ♖d7 17.♗e2 ♖xe5! This is a typical piece sacrifice in this structure. 18.dxe5 ♗xe5—+) 15...a5 16.b5 fxe5!? (16...a4!?) 17.fxe5 ♜xa3∞]

9...♞f7!? looks a bit ugly but it works. First of all Black is ready to move this knight further to b6 and c4 and if White prevents it with c4-c5 then the typical knight sacrifice on e5 is very interesting in many cases. [Zvjaginsev's 9...♞e8 is also quite playable. The piece sac on e5 is not Black's main idea anymore, but it is still possible in some lines. But the passive knight on e8 might surprisingly soon become active after f7-f6 f2-f4 g7-g5! with the following Ne8-g7-f5. 10.c5 is of course the critical move. (

a) 10.♞g3 was chosen by Tomashevsky in the stem game and it looks quite logical. However, the forced 10...f6 11.f4 a5 12.♞b1 (12.b5 12...fxe5 13.fxe5 ♞d7⇒) 12...axb4 13.axb4 fxe5 14.fxe5 ♞h4 gives Black excellent counterplay as the white king is stuck in the center. 15.♙e3 ♞d7 16.♞h5 ♞xh5 17.♞xh5 ♞a3 18.♙d2 ♞xe5! Even in the endgame this idea might work! 19.dxe5 ♙xe5♞ and despite his extra piece, it's White who has to play accurately to hold the balance. (Tomashevsky - Zvjaginsev Russia ch 2010);

b) 10.cxd5 10...exd5 11.f4 f6 12.g3 g6⇒)

10...f6 11.f4 a5 12.♙e3 (12.♞b1 12...axb4 13.axb4 ♞d7 14.g3 fxe5 15.fxe5 ♞xe5! Once again! 16.dxe5 ♙xe5 17.♞b3 ♞f6 18.♞d1 b6!♞; 12.b5 12...b6⇒) 12...g5! ⇒Black must play aggressively, otherwise the opponent's space advantage will tell. (The quiet 12...b6?! 13.g3 ♞d7 14.♙h3 ♞e7 15.O-O± led to a clear white advantage. (Kotanjian - Rausis Beirut 2014)) 13.g3 axb4 In my opinion it's the perfect moment for this liquidation. (After 13...gxf4 14.gxf4 ♞g7 Khachiyan - Molner USA 2014 15.b5!/? b6 16.♞g1 ♞h8 17.♙h3↑ might be unpleasant for Black, although this position is still very complicated.; 13...♞g7 14.b5!/? gxf4 15.gxf4 - 13...gxf4) 14.axb4 ♞xa1 15.♞xa1 ♞g7♞ In my opinion this is the key position for the whole 9...Ne8 line and it is extremely complicated and hard to assess. I

believe that White's space advantage and Black's active piece counterplay must be somewhat balanced but only practical tests can confirm or deny this.]

10.♞f4 A logical response. White prevents f7-f6 but Black has another (not obvious at all) way to undermine the opponent's center. [10.c5 looks tempting but now the piece sac on e5 works perfectly. Not immediately, of course. 10...a5! 11.♙e3 (11.b5 might be the best, but it looks strange as it allows Black to open queenside even without sacrifices. 11...b6 12.cxb6 ♞xb6=+) 11...axb4 12.axb4 ♞xa1 13.♞xa1 f6 14.f4 fxe5 15.fxe5 ♞a6 16.♞b2 ♞xe5! This is almost the dream version of the typical sacrifice 17.dxe5 ♙xe5♞ and White's position is close to collapsing...; 10.cxd5 10...exd5 (10...cxd5 is playable but slightly worse the other capture. 11.♞f4 ♞c6 12.g3 ♙b6 13.♞ce2+=) 11.f4 was played in 2 games However, after the best 11...♞e7! once again it's White who has to be extremely careful. The knight sacrifice on e5 is in the air in many different lines. (11...a5 Pardo Simon - Aroshidze Barcelona 2013 12.b5+=; 11...♞b6 Greet - Bremner England 2014 12.♞g3 f6 13.♙d3+=) 12.g3 (12.♞g3 12...f6 13.♙e2 fxe5 14.fxe5 ♞xe5!/? 15.dxe5 ♙xe5 16.♙b2 ♞h4♞) 12...f6 13.♙g2 fxe5 14.fxe5 ♞xe5 15.dxe5 ♙xe5 16.♙b2 ♞d7♞]

10...a5 [The immediate 10...c5 is also playable although it seems that opening the a-file first is slightly more accurate. 11.bxc5 ♙a5 12.♙d2 ♞c6 13.♞b5 a6 14.cxd5 exd5 15.♞d6 ♞xd4 16.♙b4♞ is a critical line. Black most probably has enough dynamic resources but knight on d6 is rather annoying.]

11.♞b1 The alternatives don't promise any advantage either. However, it may be the right time for White to reduce his ambitions. [11.♙b2 11...axb4 12.axb4 ♞xa1 13.♙xa1 ♞e7 14.♞b1 ♞a6 15.b5 ♞b4↑; 11.♞a2!/? looks quite artificial but it

might be the safest choice. 11...axb4 12.axb4 ♖xa2 13.♗xa2 c5!
Anyway! 14.bxc5 ♕a5+ 15.♕d2 ♗c6 16.cxd5 ♗xd4 ♖Black has
enough for the pawn, but not more.; 11.b5 11...c5!↑]

11...axb4 12.axb4

12...c5! This is a very important tactical resource which justifies the whole setup. Without this move, White would just be comfortably better.

13.bxc5 [13.dxc5 13...dxc4 14.♕xc4 ♗xe5=+ is just fine for Black]

13...♕a5 14.♕d2 [14.♕b2 14...♗xc5! is another tactical trick.]

14...♗c6 15.cxd5 This is new and not very dangerous for Black. [However, 15.♗b5 might only be dangerous for White. 15...dxc4 (In the game Grotnes - Schmitt diel Gausdal 1992 Black just went too far with 15...♗g5?! 16.♕xa5 ♖xa5 17.♗d2±) 16.♕xc4 (16.♗c2 16...♕xd2+ 17.♗xd2 b6=+) 16...♗xd4! Of course this tactical trick is easy to miss over the board. 17.♗xd4 ♗xe5 18.♗b3 ♗xc4 19.♕xa5 ♗xa5 20.♗xd8 ♖xd8 21.♖a1 e5 22.♗e2 ♕e6 23.♗xa5 ♖a6± and Black wins the piece back.]

15...♗xd4 16.♗b5 ♗xb5 This move was chosen as the main line just to show that Black has everything under control. [In fact the alternative 16...♗xc5!? 17.♗xd4 ♗e4= leads to crazy

complications which might be in Black's favor.]

17.♕xb5 exd5 18.O-O ♗xe5 19.♕xa5 ♖xa5 20.♗xd5 ♕f5=
The queenside pawns will be exchanged soon. Game over.

GENERAL CONCLUSIONS: At the moment it looks like 5.. .c6 is a perfectly sound way to meet the Reshevsky System. Its positional basis is quite healthy. The most critical line must be 6.a3 Ba5 7. b4 Bc7 8.e4 but as the concrete variations show it's perfectly unclear whose chances are preferable there (especially in the line 8...d5 9.e5 Nfd7). It would be interesting to see how the top-level players would fight with it as so far it didn't happen.

David vs. Goliath

Peter Zhdanov
Chief Editor of Pogonina.com

In this special column we are reviewing the most unexpected results that occurred last week. Players usually face opponents of a similar level. Considerably less frequent are situations when a significantly lower-rated player succeeds in beating a much stronger adversary.

The previous week has brought us an anti-record quantity of upsets - only 12. The number of moves ranges from 25 in GM Akesson (2451) - Winfridsson (2080), 0-1 to 67 in Hamidi (1963) - Sheykhhasani (2337), 1-0. The highest-profile loss was GM Mirzoev (2556) - Asgari (2193), 0-1.

The "desire to win" nomination goes to FM Stefan Beukema (2345) for desperately fighting with White against Rolf Corstenjs (1897) and allowing Black to deliver mate on the board. By pure coincidence, it is also the most shocking upset of the week, featuring a 552 points rating difference:

Top-10:

Al Mousawi (1688) - Al Othman (2240), 1-0, [552](#) points
 Beukema (2345) - Corstjens (1897), 0-1, 1-0, [448](#) points
 Al Othman (2240) - Alamiri (1812), 0-1, [428](#) points
 Papin (2515) - Zeynalov (2121), 0-1, [394](#) points
 Hamidi (1963) - Sheykhhasani (2337), 1-0, [374](#) points
 Horbing (2080) - Brynell (2452), 1-0, [372](#) points
 Stauskas (1971) - Germanavicius (2343), 1-0, [372](#) points
 Akesson (2451) - Winfridsson (2080), 0-1, [371](#) points
 Mirzoev (2556) - Asgari (2193), 0-1, [363](#) points
 Czumbel (1775) - Kiss (2103), 1-0, [328](#) points

Average gap: 400; White won 5 games, Black won 5 games.

You can view all the games in the accompanying pgn file.

If you have ever won a game against someone rated 300 points or above yourself, please send it to peter@pogonina.com for publication. Any additional information (a photo, annotations, etc.) will be appreciated.

Endgame section

(14) Kramnik, Vladimir(2783)
- Nakamura, Hikaru(2776)

Zurich, 2015.02.15

GM Csaba Balogh
Best rating: 2672

16. ♖xd5! Kramnik finds a nice tactical blow to win material. Black has different ways to continue the game, but in all of them he ends up being materially down. The question is in which one he retains the best drawing chances?! Nakamura shows a perfect solution... [Some positional improvement like 16.e3? with the idea of playing Ne2, trading the dark squared bishops and ending up with an isolated pawn on d5 and a good knight against the poor bishop, which would be perfect for White, but Black counters this with active counterplay... 16...d4! 17.exd4 ♖f3! 18.♖e1 ♜xd4=+ Black grabs the advantage as the bishop pair starts to rule.]

16... ♖xb2! [The alternative was 16... ♜xd5 17.♜xd5 ♖xd5 18.♖xf6 ♖e6

simplifying to a position where Black is a pawn down, but there are opposite colored bishops on the board. As long as White can keep at least a pair of rooks on the board, he will maintain winning chances. In the best case Black can trade only one pair of rooks, therefore he is doomed to long-term suffering.]

17. ♜xb2 ♖xd5 18.e4 This is the point of the temporary piece sacrifice and White wins back the material.

18... ♖xe4! An excellent decision! Nakamura gives up his queen, but the arising rook and bishop endgame against the queen, without a single weakness, guarantees Black a relatively easy draw. [18... ♖c5 would have been wrong in view of 19. ♜d2 White increases the pressure on d5. 19... ♜d6

20. **Rxc1!** A subtle move, which leaves White with a healthy extra pawn. White trades the rooks before taking the bishop, using the fact that Black still cannot leave the pin on the d-file. (20. **exd5** 20... **Rd8** is less clear.) 20... **Rxc1** 21. **Qxc1±**

19. Rxd8 Rfxd8 In general I would say that White should aim for trading a pair of rooks, because the black one might get too active within a few moves. White cannot create any weaknesses as after putting the pawn to a6 everything is perfectly protected. The light square bishop is very strong as it not only protects the queenside, but also creates different kind of back rank threats against the king, having it locked to g1.

20. b4 [20. **Rc1??** is a blunder because of 20... **Rxc1+** 21. **Qxc1** **f3!**—+; 20. **Re1** is strongly met by 20... **Rc2!** (20... **f6** is also safe, but why not activate the rook if it works tactically...)]

21. **Qa3** looks like a double attack on e4 and a7, but the point is (21. **Qe5** 21... **f6**) 21... **Re2!** using the weak back rank again and after for instance **Rf1** Black simply plays **a6** and holds with the active pieces.; 20. **Qe2** was perhaps the best attempt. 20... **f6** 21. **Rd1**

We have reached an interesting moment. Should Black trade the rooks or it is better to keep them on the board? Both probably lead to draws, but the easier one seems to be 21... **Re8!** (21... **Rxd1+** 22. **Qxd1** **Re8** 23. **f3** **h5** 24. **Qf2** **g6** 25. **Qd4** **a6** 26. **a4** **Re6** Compared to having 3 rooks on the board, here at least White manages escape with his king, but the win should not be possible. Black has built up the ideal fortress. The bishop is perfectly placed on c6, keeping the queenside pawns together, while the rook and the king will cover the kingside. White might have some attempts to make progress with h3-g4-f4-f5, but with a good defense such tries can easily be neutralized...) 22. **Qg4** **Rc7** with **Rce7** and **h6** next. By having both rooks on board, White's possibilities are much more limited because of the potential counterplay against the white king.]

20...a6 21.a4 Rc4! The draw is getting very close after Black activates his rooks!

22. Re1 [22. **b5** is met by 22... **Rxa4!**]

22...h6! The last safety measure is to open the back rank!

23.♔e5 ♘c6 24.b5 This was the entire idea of Kramnik when he advanced the queenside pawns. He wanted to send the bishop away from the ideal h1-a8 diagonal to make the b7 pawn more vulnerable. However Black is perfectly prepared for these actions and he reaches a draw by force after...

24...♖e8! 25.♔xe8+ [25.♔a1 25...♖xe1+ 26.♔xe1 axb5 27.axb5 ♘xb5= leaves both sides with zero winning chances.]

25...♘xe8 26.♖xe8+ ♔h7 27.♖e7 f6 White cannot even reach a 3 against 2 rook endgame, which would also be a dead draw, but Black has time to save all his pawns...

28.a5 ♖a4 29.♖xb7 ♖xa5 30.b6 Because of the rule that the players cannot agree a draw before move 40, they continued the game with some unnecessary moves...

30...♖b5 31.♔f1 a5 32.♔g2 a4 33.h4 h5 34.♖b8 ♔g6 35.b7 a3 36.♖a8 a2 37.♔h3 ♖xb7 38.♖xa2 ♖b3 39.♔g2 ♖b5 40.♖e2 ♖a5 1/2-1/2

**(15) Aronian, Levon(2777)
- Kramnik, Vladimir(2783)**

4th Zurich CC Classical(3.1),
2015.02.16

GM Arkadij Naiditsch
Best rating: 2737

Straight from the opening White had a decent advantage, and he was even very close to winning the game between moves 30 and 40, but Kramnik managed to escape into a clearly worse endgame, but maybe a holdable one.

41.♘e3 Of course the g4 pawn should be taken.

41...a4! A very strong move! The b2 pawn should be fixed.

42.♘xg4 ♖d8! Another great decision by Black. First one could ask himself why play Rd8 at all, but we will already see during the next few moves what Vladimir had in mind. Before that, let us take a look at what would happen in case Black forced the pawn exchange on the queenside. [42...a3 43.bxa3 ♖xa3 Now White has a lot of different options, but let's say White plays 44.♖b7 If we now exchanged the light pieces, of course the rook endgame would be a draw, but the presence of the white knight makes the defense for Black

anything but simple. White wants to put his knight to f5 by just playing Ne3-Nf5, then support it with g4 and maybe f4 and start walking with the king. The position should be a draw, but it is extremely unpleasant to defend such an endgame, which gives White good practical chances to hope for a full point.]

43. ♖a5 It is hard to say if this was an inaccuracy by White, but it looks very logical.

43... ♜d4 44. ♘e3 and now Kramnik's plan is getting visible...

44... ♜d2! Black's main idea is to exchange the light pieces before taking the b2 pawn.

45. ♘f1 What else to play?! [After 45. ♜xa4 45... ♘d4! The white knight has no good square to go to and of course the rook endgame is a simple draw. 46. ♘g4 This is White's best try. 46... f5! and Black is just in time: 47. ♘h6+ ♖h7 48. ♘xf5 ♜xf2+ 49. ♖h3 ♘xb2 and of course to just have the extra g3 pawn is not enough to win the game. The position is an easy draw.]

45... ♜d4 Black defends the a4 pawn and asks White "what's next?".

46. ♜b5 ♘f8 Black continues defending very precisely and the threat now is to play Rb4.

47. ♘e3 It is difficult to find anything better for White.

47... ♜b4 and Black's plan is coming true.

48. ♜g5+ [48. ♜xb4 would lead to a draw. 48... ♘xb4 49. ♘d5 ♘c5 If White could avoid exchanging the a4 pawn against the b2, the position would be winning, but a3 is coming next. 50. ♘c3 a3 51. bxa3 ♘xa3 and this endgame is already not that difficult to hold, but of course White still keeps some minimal winning chances.]

48... ♖h7 49. ♜h5+ ♖g8 50. ♜a5 We are sort of back to the position from which we started, only now Black is already in time to force a drawing endgame.

50... ♜xb2 Now Kramnik takes the pawn, but only because he has the Bc5 move.

51. ♜xa4 ♘c5 and once again the knight is under attack.

52. ♘d1 is the only move to immediately avoid a draw. [52. ♘g4 52... f5 doesn't work for White either.]

52... ♜d2 53. ♜a1 White managed to exchange the queenside pawns, but the cost is a terrible position of the knight on d1. The position is a draw and Kramnik shows us how.

53... ♖g7 54. ♖f1 ♖g6 It is never wrong to bring the king into the action zone.

55. ♜b1 [55. ♖e1 55... ♘b4 doesn't lead anywhere.]

55...f5! The last precise move. The black pawn is excellently placed on f5 and sometimes Black just wants to play f4 and exchange the pawn.

56.♔e1 ♖c2 The white knight is still caught on d1.

57.♖b8 ♔f6 All Black needs to do is keep on waiting.

58.♖h8 ♘b4+ 59.♔f1 and of course Kramnik could have continued with a passive defense, but he finds a forced draw:

59...♖d2 60.♘e3 ♘c5 The knight has no more square.

61.♖h6+ ♔g5 followed by Bxe3, with an easily drawn rook endgame. What we can learn from this endgame is not to hurry with entering a dangerous position, but rather try and reach an easy to defend position. Such things can often save a lot of time and half points. **1/2-1/2**

Chess and the City. To change or not to change, that is the question

WGM Elisabeth Paehtz
Best rating: 2493

Changing federations is also gaining more and more popularity in the chess world. Whether this is because of a change of living place or rather a disappointment with one's own federation or any other personal reasons is eventually of course up to the player. Some years ago FIDE naturally invented "new payment rules" to prevent an inflation of changes, but it did not seem to stop most of the players to get infected with that "life threatening" epidemic.

In this newsletter however I do not want to discuss the new rules, but rather list some recent and crucial examples among famous players who decided to undergo that procedure.

I do not want to judge anyone regarding this matter as I perfectly understand how difficult it is nowadays to make a decent living out of chess. It is not a secret that most changes are usually connected to financial benefits, some to immigration into a new country and some could even be related to political backgrounds, but we do not want to dig any deeper here.

Last year the case of the Ukrainian player Katerina Lagno

made it to the news as the organizing team of the Tromsø Olympiad refused the Russian women team the right to participate as they handed in their team line-up way past the deadline. The reason for that delay was the request of the former top Ukrainian player to change to the Russian Federation.

If I remember correctly, the reason for this delay was a dispute between both federations. You do not need to be a chess expert to understand that the decision of such a great player will eventually weaken the old team and strengthen the new one, and especially in the case of Russia and Ukraine this could be crucial in international team events. I am not sure about the reasons behind her transfer; all I basically know is that one of her parents is actually Russian and the other Ukrainian.

Indirectly connected to this case is another girl from Ukraine, the current top Ukrainian player Anna Muzychuk. If I am not mistaken, she first changed federations from Ukraine to Slovenia in 2003-2004. At that time, I believe the reason for that change was maybe connected to the fact that she was not being selected for the National Ukrainian Women's Team in her teenage years.

Last year she eventually decided to go back to her roots, thus strengthening the Ukrainian Women's team and finally reuniting with her younger sister Mariya, who has been part of the Ukrainian national team since 2010.

In the men's section I believe Alexei Shirov is the most famous example. The number one of Latvia served his country in the chess Olympiads in 1992 and 1994, before moving to Spain and changing to their federation. Like Anna he eventually decided to go back to his roots and has represented Latvia again since 2012.

Since we have mentioned some very famous players, we should not forget to mention the most popular federation as well. The US Chess Federation should be the top federation regarding changes. Almost every year new chess players are moving across the ocean to start a student scholarship and eventually also a new career as an American chess player.

Here we have to name the very famous example of the young and extremely strong Wesley So, who is originally from the Philippines. His case is a good opportunity to introduce the above-mentioned compensational fees. Since he is a player rated over 2700, the amount he was supposed to pay to his old federation was hitting the incredible sum of over 50.000 US-Dollars. The alternative choice is to take a 2-year break from any national or international chess events. Wesley eventually became a member of the American Federation in October 2014.

Last but not least I will get back to our greatest talent of 2014, Alexander Ipatov, alias "the window cleaner". If I am not mistaken, he is the only player who also changed federations two times, but with the difference of always representing someone new. The Grandmaster who was born in Lvov changed from Ukraine to Spain and nowadays represents the Turkish Chess Federation.

Those who I left out I deeply apologize but perhaps your examples have not been heart breaking enough to be remembered by the general chess public.

Clash of the Titans

(16) Averbakh, Yuri L
- Tal, Mihail [A76]

URS-ch25, 1958

GM Kamil Miton
Best rating: 2655

1.d4 ♘f6 2.c4 e6 3.♘c3 c5 4.d5 exd5 5.cxd5 d6 6.e4 g6 7.♗e2 ♗g7 8.♘f3 O-O 9.O-O ♖e8 [9...♗g4 Nowadays this move is the most promising for Black. After exchanging the knight on f3 White will not be able to create the typical e4-e5 break in the center.]

10.♞c2 [10.♘d2 is the main move.]

10...♘a6 [10...♗g4 11.h3 ♗xf3 12.♗xf3 ♘bd7 Black gets control over the important e5 square and now his idea is to get the initiative on the queenside, over b5 or c4-Nc5 etc.]

11.♗f4 [11.a3 11...♘c7⇄]

11...♘b4 Tal stayed true to his style and took the decision to immediately complicate the position.

12.♞b1

12...♘xe4!? Black sacrifices the knight for two central pawns and to activate his pieces. Objectively it is not completely correct but from a practical point of view it is enough. The complex fight based on tactical variations has just begun.

13.♘xe4 ♗f5 14.♘fd2 ♘xd5

15.♗xd6?? Averbakh immediately makes a decisive mistake... In this critical position he had better options: [15.♗g5 is the most logical move, as White escapes with tempo. 15...♞d7 (

a) 15...♞xg5? 16.♘xg5 ♗xb1 17.♗c4! ♗h6 18.♗xd5 ♗xg5 19.♘f3+-;

b) 15...♞b6

16.g4 A logical move, just to solve the problems with the pin.

(16. ♖c4 looks promising for White as well. 16... ♗xe4 17. ♖xb6 ♗xb1 18. ♖xd5 ♖xe2 19. ♖axb1 ♖e5 20. ♖f6+ ♔h8 21. f4± and White is a safe piece up.) 16... ♗xe4 17. ♖xe4 ♗xb2 18. ♗c4 ♗xa1 19. ♗xd5 and the white pieces are very active.)

16. ♗d3 (16. ♗f3 16... h6 17. ♗h4 ♖b4 (17... g5?! 18. ♗g3 g4 19. ♗e2 only weakens the black structure.) 18. ♖d1 (18. a3 18... d5 19. axb4 dxe4 20. ♖xe4 cxb4 21. ♖e1∞) 18... g5 19. ♗g3 g4 20. ♖xd6 gxf3 21. ♖xf3∞ White doesn't need to win the exchange as the knight on d6 is very strong.) 16... h6 17. ♗h4 Black is not able to immediately play 17... Nb4 or Nb4 because of the 18. Nf6 trick: Bxf6 and then 19. Bxf5! 17... ♖c6 18. ♗g3 ♖b4 (18... ♖ad8 19. ♖xd6 ♗xd3 20. ♖xd3 ♖xd6 21. ♗xd6 ♖xd6 22. ♖fe1+=)

19. ♖f6+ ♗xf6 20. ♗xf5 gxf5 21. ♖xf5 The black king is a bit weak, which is why the position is completely unclear.; 15. ♗g3 15... ♗h6!?

a) 15... ♖f6 16. ♗d3 ♖xe4 17. ♖xe4 c4 18. ♗c2 ♗xe4 19. ♗xe4 d5 20. ♗f3 ♖d7 21. ♖d1 d4

22. b3!± looks very strong! Now Black is not on time with his c4-d3 setup.;

b) 15... ♖d7!? 16. ♗d3 ♖b4 17. ♗xd6 ♖c6 It looks like the white pieces lost coordination.;

c) 15... ♖b4 16. a3 ♖c6 17. ♗xd6 (17. ♗d3

17... c4 A nice idea. 18. ♖xc4 d5 19. ♖cd6 dxe4 20. ♖xe8 exd3 21. ♖xg7 ♖xg7 22. ♖c1 f6 The strong d3 pawn gives Black full compensation.) 17... ♗xe4 18. ♖xe4 ♖xe4 19. ♖xe4 ♖xd6 20. ♖ad1 ♖d4 21. ♗c4 We already saw this kind of position.)

16. ♗b5 (16. f4 16... ♗g7∞) 16... ♗xd2 17. ♗xe8 ♖xe8 18. ♖d1 (18. ♖xd6 18... ♗xb1 19. ♖xe8 ♗d3 20. ♖fd1 ♖xe8 21. ♖xd2 c4∞) 18... ♗xe4 19. ♖xd2 ♖c6 20. f3 ♗f5 21. ♖ad1 ♗e6 with complex play.]

15...♟f6! After this simple move, which was overlooked by Averbakh, Black will win a pawn by force. White probably expected [15...♙xe4 16.♞xe4 ♞xe4 17.♞xe4 ♞xd6 18.♙c4 ♞d8 19.♞ad1 ♙d4 Black has one pawn and a strong bishop for the exchange. Of course White is better but Black has good drawing chances.; 15...♞xd6? 16.♞xd6 ♙xb1 17.♞xe8 ♞xe8 18.♙b5+-]

16.♙f3 ♞xe4 17.♞xe4 ♙xe4 18.♙xe4 ♞xd6+ 19.♞c2 [19.♙xb7 19...♞ab8]

19...♞e7 20.♙f3 ♞ae8 21.♞ad1 ♙d4 22.a4 b6 23.b3 Because of the opposite colored bishops White's idea is to get a structure which doesn't allow Black to take advantage of his extra pawn. The problem for White is that thanks to his active pieces, Black is simply going to play for an attack on the kingside!

23...♞e5 24.♞d2

24...h5! A strong technical move. Black is going to weaken the white king.

25.♞e2 ♞xe2 26.♙xe2 The exchange of one pair of rooks doesn't help White to avoid trouble.

26...h4 27.♞h1 [27.h3 weakens the h2-b8 diagonal. 27...♞f4 28.♙c4 ♞g7 preventing Qxg6. 29.♞d3 f5 (29...♙e5 30.g3)

30.♞f3 ♞xf3 31.gxf3 ♞f6 32.♞g2 ♞g5 33.♞d1 ♞f4 The black pieces are perfectly placed, but how to improve the position? g5-g4 still does not guarantee a win.]

27...♞f4 28.g3 ♞f6 29.♞d1 ♞d8 30.♙g4 [30.♞d3 30...♞d5+ (30...♙xf2?? 31.♞xf2; 30...♞g7)]

30...♙xf2+- 31.♞e2

31...♞d2! 32.♞e8+ [32.♞xd2 32...♞c6+]

32...♞g7 33.gxh4 ♞d4 34.♙h3 ♞d3 35.♙g2 ♞d1 0-1

Editorial Preface

Dear Friends! With the current issue Nr. 157, we celebrate the 4th year of the newsletter! Big thanks to all of you for staying with us and we promise you for the forthcoming year, that we will do our best to provide you with chess satisfaction!

The month of February ends with a surprising result in the FIDE Grand Prix event in Tbilisi.

Evgeny Tomashevsky won the tournament with a 1.5-point lead, which makes him the current Grand Prix leader. With an amazing result of 8/11 and a performance of over 2900, he made a big name for himself with a safe and positional style, combined with a strong sense of punishing the mistakes of his opponents.

Second place went to Jakovenko with 6.5/11 and 3rd to Radjabov with 6/11.

The results of the favorites Grischuk, Giri , Mamedyarov and Vachier-Lagrave was a big surprise, as they didn't really participate in the fight for the first places.

In the currently underway European Individual Championship in Jerusalem, Israel and the top seed Navara continues showing great form and is on 3.5/4. However, the actual leader on 4/4 is Korobov, a very fighting and aggressive player, who was pushing hard in his games and with a bit of luck and help of his opponents is now the deserved leader.

There are also many other top favorites who began their event well and are on 3.5/4 or 3/4. The tournament promises to be very exciting during the next 7 rounds and in the next issue you will be able to find a few of the best games from this event.

For now we hope you enjoy the current issue of Top GM Secrets Nr 157.

With best wishes,

Arkadij Naiditsch & Csaba Balogh

Two best games of the past week

(1) Radjabov, Teimour (2731)
- Grischuk, Alexander (2810) [B97]

Tbilisi FIDE Grand Prix(6),
 2015.02.21

GM Csaba Balogh
 Best rating: 2672

A crushing miniature victory by Radjabov over Grischuk. The game is extremely important from theoretical point of view, the variation played in the game was considered to be closed as Black is completely fine, but White's novelty opens a new area...

1.e4 c5 2.♘f3 d6 3.d4 cxd4 4.♘xd4 ♘f6 5.♘c3 a6 The Sicilian Najdorf. The 6.h3 system is the most popular nowadays, but Radjabov turns back to the previous main line.

6.♗g5 e6 7.f4 ♖b6 8.♔d2 ♖xb2 The "Poisoned pawn variation" was the petline of Bobby Fischer. Obviously there were a lot of development since then with the help of the computers, but the line is still alive.

9.♖b1 ♔a3 10.e5 h6 [The other main line starts with 10...dxe5 11.fxe5 ♘fd7 12.♘e4 with thousands of games.]

11.♗h4 dxe5 12.fxe5 g5 Black has other options too, but this was considered to be the best by the latest theory.

13.♗g3 A rare move. [Most of the games continued with 13.exf6 13...gxh4 14.♗e2 but the concrete computerish line lead to good positions for Black... 14...♔a5 15.O-O ♘d7 16.♗h1 ♖g5 17.♖f4 e5 18.♘d5 exd4 19.♖xd4

19...♔d8 Theory starts somewhere here with hundreds of games in the database. Arkadij has recently commented in the newsletter the Duda-Wojtaszek game which also went like this.]

13...♗h5 14.♘e4 ♘d7 [We usually reach the game's position from the following moveorder... 14...♖xa2 15.♖b3 ♘d7]

15.♖b3 ♖xa2

16.♗e2 I have found some correspondence game for this

position where the black players have correctly found the right defenses. Without some homepreparation it is quite impossible to play this position over the board, it is not an accident that one of the best players of the World also loses the thread and collapses quickly... [Some dozens of games continued with 16. ♖c3 but Black is considered to be fine after 16... b6 or 16...b5.]

16... ♘c5? After a long think, Grischuk fails to find the best defense. After Radjabov's perfect reaction, this move turned out to be the decisive mistake. [16... ♘xg3 17.hxg3; The critical move is 16... ♖a1+! 17. ♕d1 The h5 knight is not hanging, this is already a big achievement, but of course Black must find further only moves because White is threatening with 0-0... (The point is after 17. ♖f2? 17... ♘xg3! works! 18. ♘xg3 (18. ♖xa1 18... ♘xe4+-; 18.hxg3 18... ♖xh1+-) 18... ♖xd4+= 19. ♖xd4 ♘c5+ Black ends up with material advantage!) 17... ♘c5! Another only move! The computer gives the evaluation of close to winning for Black, but of course in such a sharp position it is easy to find resources for both sides. As we go deeper into the lines, the advantage is slowly evaporating... 18. ♘xc5 ♘xg3! (18... ♘xc5 19. ♘f2 followed by 0-0 looks scary for Black. The h5 knight gets out of the game.) 19.hxg3 ♘xc5 20.c3

Probably Radjabov's analysis have started somewhere around here. It will be interesting to follow the development of this line... White is threatening with 0-0 and Bh5 next. White's position is much easier to play over the board because of the safer king and the attacking potentials, but of course homepreparation and memory are playing the main role in such situations...A possible development of the game is 20... ♖a5 (20...b5 21.0-0 ♖a7 Protecting the f7 pawn against the Bh5 idea 22. ♖h2 I would never want to be Black here despite the machine's support...) 21.0-0 ♖c7 is possible. (21...0-0? runs into 22. ♖d3! and Bc2 next. The king is actually weaker on g8 then on e8.) 22. ♘h5 ♖f8 with mutual chances. Further analysis required.]

17. ♘c3!! A great intermediate move, which wins the h5 knight. Of course, Grischuk has anticipated this move, but he missed something later...

17... ♘xb3 [17... ♖a1+ loses simple to 18. ♖b1 and the h5 falls.]

18. ♘xb3! As simple as that! Two pieces are hanging and there is no check on a1 for Black...

18... ♘b4 [18... ♘xg3 was objectively better, but also quite bad after 19. ♘xa2 ♘xh1 20. ♖f1± and the knight is trapped in the corner.]

19. ♘h5 ♖b2 Grischuk has pinned his hopes to this resource, but it does not save Black...

20.0-0 ♖xc3 [If Black protects his f7 pawn with 20...0-0 White can simple secure his material advantage with 21. ♘e1+- ♘xc3 Black cannot keep the queens on board with such a weak king, but now it runs into different problems... 22. ♖xc3 ♖xc3 23. ♘xc3+- and Bb4 is coming next, winning the f7 pawn and the game.]

21. ♖xf7+ ♔e7

22. ♔f2! This is the key move, which had to be foreseen before 17. Nc3! White manages to save the queen and launches an enormous attack against the naked e7 king. Qf6 is threatening.

22... ♔d7 [22... ♖f8 is met by 23. ♔f6+ ♔d7 White has several wins at his disposal. An easy one is 24. ♖xe6+ ♔c7 25. ♖f7+- followed by e6 next with a crucial discovered check]

23. ♖b6 23.Qf6 was also good, but probably this one finishes the game even faster.

23... ♖f8 24. ♖e1! A subtle retreat and Black resigned as the b4 falls! **1-0**

**(2) Tomashevsky, Evgeny (2716)
- Kasimdzhanov, Rustam (2705)
[E90]**

Tbilisi FIDE Grand Prix(9),
2015.02.25

GM Arkadij Naiditsch
Best rating: 2737

Tomashevsky is the man of the hour at the Grand Prix in Tbilisi. Playing very solid, safe, and positionally excellent chess, he is having what is probably the best result of his career. In the current game we will see the power of slow-positional play in quite a sharp position. After the opening it seemed like Black had quite comfortable play, but in fact Kasimdzhanov's position was very dangerous. Step by step White managed to develop all his pieces and take control over the very important white squares, which suddenly made Black resign, when just a couple of moves ago everything seemed to be fine. A really nice game to watch and learn from.

1.d4 ♖f6 2.c4 g6 Kasimdzhanov plays a lot of different openings and usually has great preparation, as he was Anand's second for about 6 years.

3. ♖c3 ♖g7 4.e4 d6 5. ♖f3 O-O 6.h3 The King's Indian with 6.h3 is very fashionable nowadays and Tomashevsky very regularly plays this line.

6...e5 7.d5 ♖h5 The most principled line. Black sometimes continues with 7...a5 or 7...Na6 but White's idea of playing g4-Be3 and Nd2 brought great results in the past.

8.g3 f5 Black's idea is simple, to get play in the center as quickly as possible.

9.exf5 gxf5

10. ♖h4!? A very interesting and rather rarely played move.

10... ♖f4 The black knight is going to g6, which is very logical.

11. ♗d2 ♕e7 Black is clearly in his preparation, but I am not sure about this move at all. Maybe the queen's position on e7 is good, but maybe not. For me it is hard to tell why Black did not start with 11...Na6 immediately.

12. ♕c2 ♖a6 A very usual plan for Black.

13.a3!? This is a very interesting move! Now the black knight can never jump to b4, and what is also very important is that in case of Nc5 White always has the b4 push.

13... ♗d7?! and this logical move is maybe already a heavy mistake... [Black should have calculated the following lines better... 13... ♖c5! It is the last chance to place the knight to a good position on c5. 14.O-O-O (14.b4? doesn't work right now, because of the amazing

14...e4!! 15.bxc5 ♖d3+ and now it is already Black who is winning! 16. ♕e2 f4 with a mating attack.) 14...a5 The position is very unclear. It is very important for Black to be in time to secure his knight on c5.]

14.O-O-O ♖h8 15. ♕b1 Both players play prophylactical moves in order to get ready for the action in the center.

15... ♖ae8 16. ♖e1 threatening to play Bxf4.

16... ♕f6 17. ♖g1 Now Black already needs to count with White's gxf4 in a good moment and his main idea of playing c6 or Nc5 doesn't seem to work.

17... ♖g6 Black continues choosing safe moves. [I think that Black should have tried a pawn sacrifice with 17... ♖c5 18.b4 ♖e4 19. ♖xe4 fxe4 20. ♕xe4 c6 and maybe White is still better here, but the position is very very sharp. I think it was a good practical chance to at least fight for 3 results.]

18. ♖xg6+ ♕xg6 [After 18...hxg6 19.h4! White is able to put his bishop to g5 next, with a clearly better position.]

19.f3! Another very strong move. Now a move like Nc5-Ne4 is never possible and White also prepares to start the fight over the light squares with g4.

19...c6 Logical but maybe too slow. [Black clearly should have tried to complicate matters with 19...e4! and even if White has a lot of different moves here, and maybe Black's position is just worse after 20.Bg2, it was still Black's best chance.]

20.g4 The game starts to become a bit sharper...

20...cxd5 21.cxd5 White just wants to play Bd3 and it is very unclear what to do next for Black.

21...Rc8 [21...e4? doesn't work: 22.fxa6 bxa6 23.gxf5 Rxf5 and here comes the typical but great sacrifice: 24.Rxg7! Rg7 25.Rg1+ Kh8 26.Nxe4 followed by Bc3, with a winning position for White.]

22.f3 White is following his plan.

22...Nc5 23.fxf5 fxf5 24.gxf5 Rxf5 25.Rxf5 Rxf5 Let us take a fresh look at the position. Black managed to reach an endgame which seems to be quite unclear, but in fact his position is on the verge of being lost! The g7 bishop is very bad and in case White will be able to place his knight on e4, the game could immediately be over.

26.Rg3! Another great move by White. The idea is to play Reg1 next followed by Be3, chasing the black knight away from c5 to be able to play Ne4.

26...Nb3?! Kasimdzhanov is losing the game without a fight... [Black should have tried to play 26...f6 27.Rg1 and now maybe something like 27...a6 avoiding Nb5 and of course Black's position is really bad, but the game still goes on...]

27.f3 Now the white knight is getting to e4.

27...Nd4 28.Ne4 What an amazing domination of the white pieces.

28...Rd8 29.Reg1 It is already impossible to defend the g7 bishop in a nice way...

29...Rf7

30. ♖g5 White will play Bxd4 and Ne6 next and the game will be over. It seems like Tomashevsky has done nothing "too special" to win the game, but in fact his concept was brilliant with a long-term plan of controlling the light squares and of course Black helped to fulfill the plan a bit by playing too passively. **1-0**

The K-Files.

The ancient treasure, shining again or...?

GM Alexander Khalifman
FIDE World Chess Champion (1999)

Best rating: 2702

It's not very often that you start studying some trendy opening line and find out that the first game was played... in 1620(!). In fact I can't remember if something like this happened to me before. But this is the case: 1.d4 d5 2.c4 dxc4 3.e4 b5 was played in Greco - NN (Italy 1620). However, this fact didn't impress modern players too much: 3...b5 was supposed to be a greedy amateurish move which contradicts the basic opening principles. So the line was a very rare guest in grandmasters (and even in masters) games. The exceptions like Dlugy and Miles could do nothing to change the reputation (both grandmasters were known more for their adventurous style than for their solid opening preparation).

The first appearance of 3...b5 on 2700+ level was very special: it was played in 2006 by Kramnik in his match against Deep Fritz (yes, exactly the game when Vladimir blundered mate in one). But it still looked more like a trick against the computer's opening library (the game transposed to a Slav sideline quite soon and Black solved the opening problems successfully) rather than some analytical breakthrough.

Well, these 2 facts (1620 and mate in one) already make this line remarkable but almost everybody still remained quite skeptical. At this moment it was already clear that Greco's "refutation" 4.a4 c6 5.axb5 cxb5 6.b3 (slightly improved by ECO in the 20th century as 4.a4 c6 5.b3) was not really deadly dangerous, but the new main line 4.a4 c6 5.axb5 cxb5 6.Nc3 (invented by Yermolinsky in 1993) still was a real problem for Black.

The a new era started in March 2014, when the talented German junior Alexander Donchenko played the new and interesting version of the rather typical exchange sacrifice. Annotating the game Adhiban - Nakamura in CEWN 154, Csaba Balogh gives the credit to Romain Edouard but with all respect to the creative French grandmaster, Donchenko played it 2 months earlier. This "new old" exchange sacrifice leads to very fresh, unbalanced and dynamic positions, so in the following months 3...b5 was tested by a group of grandmasters led by Hikaru Nakamura.

The very idea of 3...b5 is quite banal and primitive: Black just defends the gambit pawn. White can't ignore the fact that the c4 pawn disturbs his normal development. So White tries to destroy the opponent's pawn chain and as I already mentioned, he did it with great efficiency until March 2014.

Finally it must be said that this line is quite important for the opening theory nowadays because

- 1) Black is doing quite well recently in the QGA without 3.e4.
- 2) The classical alternatives after 3.e4 seem to be under certain pressure recently.

So let's have a closer look at the concrete lines.

(3) QGA 3.e4 b5 [D20]**1.d4 d5 2.c4 dxc4 3.e4 b5**

4.a4 In a certain sense this reaction is just necessary. Delaying it gives Black some additional options. [4.b3 is met by the standard reaction 4...e5! 5.dxe5 (5. d3 d6=+; 5.d5 d6 6. c2 Ovod - Madl Germany 2009 6...c5! 7. d3 c6+ 5...cxd1+ 6. cxd1 c5 7. d3 g4=+; 4. d3 Of course Black can play 4...c6 and it is hard to find another move than (Another way is 4...a6 5.a4 b7 transposing to the system 3. Nf3 a6 4.e4 b5 5.a4 Bb7, which is nowadays assessed as fully satisfactory for Black. The following lines confirm it. 6.axb5 (

a) 6.b3 e6 7.bxc4 (7.axb5 axb5 8. Rxa8 a8 9.bxc4 xe4! 10. bd2 Beil - Krnavek Olomouc 1975 10...b4=+) 7...bxc4 8. xc4 (8. d3 b4 9. d2 d6 10.e5 d5 11. c1 dxc3 12. xc3 c5!+= Ivanov,S-Salov,V/S-Peterburg GM 1997) 8...xe4 9.O-O b4! 10. d5 d7=+ Andruet - Semkov Bulgaria 1985;

b) 6. d3 e6 7.axb5 axb5 8. Rxa8 a8 - 6.axb5)

6...axb5 7. Rxa8 a8 8. d3 e6 Giving back the extra pawn and equalizing comfortably. (8...c6 This greedy move is rather risky. 9. g5!? h6 10. h4 b6 (10...d7 11. e2 g5 12. g3 e6 13.O-O) 11. e2 e6 12.O-O Knaak - Chekhov Leipzig 1986

12...b4!?∞) 9. dxb5 (9. g5?! 9...e7 10. xe7 dxe7 11. c2 Riegler - Meister FRG 1990 11...d7!? 12. e2 O-O 13.O-O f5+ 9...xe4 10. xc4 d6 This is the most accurate move order. 11.O-O c6 12. d3 xf3 13. xf3 xd4 White's compensation is enough to hold the dynamical balance, but nothing more.) 5.a4 (5.b3 5...cxb3 6. xb3 d6 7. d2 e6=+ Sondermann - Heinicke Dortmund 2001) ; 4. d3 Now Black can also transpose to the main lines, but he has an independent option which promises good chances. 4...a6 (4...c6 5.a4 - 4.a4) 5.a4 b4 (5...c6 - 4.a4) 6. d2 (6. a2 6...b7 7.f3 e5! 8. xc4 exd4 9. b3 e7+ Gulko - Dlugy Philadelphia 1988; 6. d1 6...b7 7.f3 e5! 8.d5 c6+ Korchnoi - Huebner Cologne rapid 1984; 6. d5 6...e6 7. d3 b7 8.f3 d6=+ Jagstaidt - Delanoy Geneve 2001) 6...e6 7. d3 c5+]

4...c6 [The alternative 4...b7 doesn't impress at all. 5.axb5 xe4 6. d3 b7 7. d3 d6 8. xc4 e6 9.O-O The b5 pawn seriously limits Black's development and is not easy to remove. 9...e7 10. d5 O-O 11. e1 d7 (11...a6 12. dxf7 xf7 13. xe6; 11...c5?! Ribli - Nikolic Reykjavik 1988 12. e3! cxd4 13. xd4±; 11...h8 Bacrot - Lazarev France 1998 12. d3! d7 13. h3→) 12. d6 xc6 13.bxc6 d6 14. a6±]

5.b3 This straightforward attempt to destroy Black's pawn chain is once again well met with the standard reaction [5. d3 leads to a Slav with 3.Nc3 dxc4 4.e4 b5 5.a4, which was extremely popular about 5 years ago (nowadays White mostly tries 4.e3). 5...a6 The modern trend. Black invites the opponent to exchange on b5, thus returning to the main line. The alternatives don't seem to be dangerous. (

a) 5...b4 This is the traditional main move which was played in about 700 games. Today's assessment is that it's quite playable for Black but deep knowledge is required of course;

b) 5...e5? Strangely enough this move was tested on a

serious level a lot of times. However, this move is simply bad and the reason was shown in the very first game. 6.axb5! (6.♘f3 6...exd4 7.♙xd4 ♙xd4 8.♘xd4 b4 9.♘d1 ♙a6+= Kasparov - Huebner Belfort 1988) 6...exd4 7.♙xc4 dxc3 (7...♙e6 8.♙xe6 fxe6 Moller - Enevoldsen Buenos Aires 1939 9.♘ce2 e5 10.f4±) 8.♙xf7+ ♖e7 9.♙b3± Timman - Balshan Jerusalem 1967 9...♙d3 10.bxc3 ♙xe4+ 11.♘e2 ♘f6 12.♙a4±)

6.♘f3 (6.axb5 6...cxb5 - 5.axb5; 6.♙g5 6...h6 7.♙h4 ♘f6 The important detail here is that the bishop is on c8, so e4-e5-e6 is not a threat yet. 8.axb5 cxb5 9.♘f3 ♙b6∞ White has to prove that his compensation for a pawn is enough.) 6...e6! Practically forcing White to take the exchange. (6...♙b7 7.♙g5!? h6 8.♙h4 Here this anti-Moscow gambit play is quite unpleasant. 8...g5 (8...♙b6 9.♙e2 e6?! 10.♘e5±) 9.♙g3 ♘d7 10.♙e2∞ e6 11.d5 cxd5 12.exd5 exd5 13.♘xd5) 7.axb5 (7.♙g5 7...♙e7 8.♙xe7 ♘xe7 9.axb5 cxb5 10.♘xb5 axb5 11.♙xa8 ♙b7∞) 7...cxb5 8.♘xb5 axb5 9.♙xa8 ♙b7 10.♙a1 - 5.axb5; 5.♘f3 will be examined in Part 2.; The most critical is 5.axb5 - Part 3]

5...e5 [5...♘f6 is playable but not completely enough to equalize. 6.e5 (6.axb5 6...cxb5 7.bxc4 e5 8.♘f3 exd4 9.♙d3) 6...♘d5 7.bxc4 (7.axb5 7...cxb5 8.bxc4 bxc4 9.♙xc4 e6 10.♘f3 - 5.Nf3 e6 6.axb5 cxb5 7.b3) 7...bxc4 8.♙xc4 e6 9.♘f3 ♙a6 10.♘bd2+= and there are still some problems to solve here. (Ledger - Karkanaque Plovdiv 2010)]

6.dxe5! The only critical line. Now it's not so easy for Black to find the best defense over the board. [After 6.♘f3 it's White who has to play accurately. 6...♘f6 (6...exd4!?) 7.axb5 (7.bxc4?! 7...♘xe4 8.♙d3 ♙b4+ 9.♖f1 ♘f6± Goganov - Stevic Aix-les-Bains 2011) 7...♘xe4 8.♙xc4 ♙b4+ 9.♙d2 (9.♖f1 9...0-0∞) 9...♘xd2 10.♘bxd2 exd4 11.♙e2+ ♙e7=; 6.axb5 6...cxb5 (6...♙b4+ 7.♙d2 ♙xd4 8.♙xb4 ♙xa1 9.♙xc4∞); 6.bxc4 6...♘f6! 7.♘f3 - 6.Nf3]

6...♙xd1+ the best [6...♙b4+ 7.♙d2 ♙xd2+ (7...♙c5 8.♘f3; 7...♙d4 8.♙xb4 ♙xa1 9.♙a5! f6 (Agostini - Bologni Italy 1995) is dubious because of 10.♘e2 ♘d7 11.e6 ♘b6 12.♙c3 ♙a2 13.♘d4∞) 8.♙xd2 (8.♘xd2 8...c3 9.♘df3 ♙xd1+ 10.♙xd1 b4+=) 8...♙xd2+ 9.♖xd2 ♘d7 (Parligras - Luther Kozloduy rapid 2013) and now after 10.axb5!? cxb3 11.♘f3+= this unusual structure promises White some advantage: Black's queenside pawns are all weak.; 6...♙a5+ This tactical trick suggested by Houdini doesn't look healthy. 7.♙d2 b4 8.♙xc4 (8.♙f4 8...c3 9.♙c4 ♙c5 10.♘f3 ♙a6) 8...♙xe5 9.♙a2 ♙xe4+ 10.♘e2 ♙xg2 11.♙g1 ♙f3 12.♙g5→and despite the extra pawns, it becomes clear that it's impossible to play a game of chess with a single piece, even if it's the queen.]

7.♙xd1 This complicated endgame (it is probably more to the point to call it a queenless middlegame) is quite difficult to play for both sides. My intuition tells me that Black must have enough counterchances but it's not easy to prove it over the board. However it must be added that both sides have weaknesses, so it's not like White is playing without any risk.

7...♙c5! Development is a top priority. [The natural 7...cxb3 might be inaccurate. 8.axb5 and this structural change works in White's favor. 8...♙c5 (

a) 8...♘d7 9.♘d2 (9.f4 9...cxb5) 9...♘xe5 10.♙b2 ♘g4 11.♘h3+=;

b) 8...cxb5 Wang - Juhasz Budapest 2012 9.♗xb5+ ♕d7 10.♖c3+= and White's lead in development might soon become the most important factor.)

9.♖f3!? (After 9.f4 9...♗h6 10.h3 O-O 11.♖f3 ♜d8+ 12.♖bd2 ♕e3!⇒ Black has good counterplay.) 9...♗xf2 10.♖bd2 cxb5 (10...♖e7 11.♖xb3 O-O 12.♗a3 ♜e8 13.♜c1) 11.♗xb5+ ♕d7 12.♗c4↑ might be a problem. White's pawn structure is destroyed, but his pieces are very active.]

8.♖f3 [8.bxc4 8...b4 This is the key idea. Of course a pawn is a pawn, but the queenside structure now clearly favors Black. 9.f4 Vogel - McPherson corr 2006 9...f6! and Black either destroys the opponent's pawn center or gets the f6 square for his knight; with good compensation in both cases. 10.♖f3 (10.♖d2 10...fxe5 11.fxe5 ♖e7♞; 10.exf6 10...♖xf6 11.♖d2 O-O♞; 10.♗b2 10...fxe5 11.♗xe5 ♖f6 12.♗xf6 gxf6 13.♖d2 ♕e3 14.g3 ♖a6♞) 10...fxe5 11.♖xe5 ♕d4 12.♜a2 ♗xe5 13.fxe5 ♖h6♞; 8.axb5 8...♕d4! 9.♜a5 ♗b6 10.♜a1 ♕d4=]

8...♖e7 and now precise play from both sides leads to equal endgames or just an immediate draw. Sorry, but I don't feel like overloading the text with them. Here is one possible (but not the craziest) line: [There is no time for 8...♗xf2 9.axb5 cxb3 (9...cxb5? is just bad because of 10.♖c3±) 10.♖bd2 transposing to the 7...cxb3 line.]

9.axb5 cxb5 10.♖a3 O-O 11.♖xb5 ♜d8+ 12.♗d2 [12.♖e1 12...cxb3 13.♖c7 ♖bc6 14.♖xa8 ♖b4 15.♗c4 ♖c2+ 16.♖e2 ♖xa1 17.♖c7 ♗g4 18.e6 ♖f8 19.♗b2 ♖c2 20.exf7 ♖d4+ 21.♖f1 ♗xf3 22.gxf3 ♜c8=]

12...cxb3 13.♖c7 ♗g4 14.♜b1 a5! 15.♖xa8 a4 16.♗b5 ♗xf3+ 17.gxf3 ♗b4 18.♗xa4 ♜xd2+ 19.♖c1 ♜c2+ 20.♖d1 ♜d2+=

David vs. Goliath

Peter Zhdanov
Chief Editor of Pogonina.com

In this special column we are reviewing the most unexpected results that occurred last week. Players usually face opponents of a similar level. Considerably less frequent are situations when a significantly lower-rated player succeeds in beating a much stronger adversary.

The previous week has brought us only 13 upsets. In fact, the initial version of the column also had a few games by GM Tkachiev and GM Fressinet, but those were blitz matches from the French Blitz Chess Championship, not to mention that some of the pgn's look quite ambiguous.

The number of moves ranges from 25 in Grebeniuk (2188) - GM Bernadskiy (2525), 1-0 to 62 in FM Gholami (2325) - Mammadov (1877), 0-1. The highest-profile loss was GM Alekseev (2679) - Kazakovskiy (2354), 0-1, although the final position in the pgn doesn't spell any trouble for White; all I know is that Black did win the game according to the official site.

The "There and back again" nomination goes to FM Parviz Gasimov aka "I have earned 568 rating points over three months". He has become a frequent guest of ours, even though his journey back is slower (K=10) than his way uphill (K=40). This time Gasimov (2497) got checkmated by Ahmadi

(1982) in 30 moves:

Top-10:

Ahmadi (1982) - Gasimov (2497), 1-0, [515](#) points
 Gholami (2325) - Mammadov (1877), 0-1, [448](#) points
 Vorontsov (1727) - Kuba (2164), 1-0, [437](#) points
 Thanki (2061) - Swayams (2480), 1-0, [419](#) points
 Nieto de la Cruz (2178) - Arribas Lopez (2537), 1-0, [359](#) points
 Grebeniuk (2188) - Bernadskiy (2525), 1-0, [337](#) points
 Soozankar (2258) - Gholami Orimi (1925), 0-1, [333](#) points
 Alekseev (2679) - Kazakovskiy (2354), 0-1, [325](#) points
 Ghaffarifar (1882) - Bagheri (2188), 1-0, [306](#) points
 Cao Armillas (2113) - Bento Iglesias (1809), 0-1, [304](#) points

Average gap: 378; White won 6 games, Black won 4 games.

You can view all the games in the accompanying pgn file.

If you have ever won a game against someone rated 300 points or above yourself, please send it to peter@pogonina.com for publication. Any additional information (a photo, annotations, etc.) will be appreciated.

(14) Vachier Lagrave, Maxime (2775)
- Tomashevsky, Evgeny (2716)

Tbilisi GP,
2015.02.23

GM Csaba Balogh
Best rating: 2672

We are facing an unusual endgame. The three minor pieces are known as a worth of a queen and now in an opened position due to the two bishops it is even better. White tries to hold the draw with rook and three pawns. Unfortunately for him the black pieces are in perfect harmony, while the white pawns are vulnerable. Tomashevsky shows excellent technique and collects all the pawns one by one.

39...♞d2! Not the only move, but Black shows the importance in the quality of the pawns. He could have taken on g3 first, but then the king gets closer to the protection of the central pawns. White can grab a fourth pawn now, but the doubled h-pawn cannot be caunted as a healthy pawn and it also divides the pawnchain into two islands which will make them more vulnerable. Nf1 is threatening, White is forced to

take the pawn.

40.gxh4 [40.g4 also drops the e4 pawn as after 40...♞c4+ the rook cannot stay on the e-file because it moves into a knight fork either on f1 or on f3.]

40...♞c4 41.♞g2+ ♔h6 42.♞g3 Vachier knows that he cannot hold his pawns for long, therefore he escapes with his king from the corner where it is threatened by different kind of mating nets. [42.e5 loses quickly to 42...♞f1+ 43.♞g1 ♞c5+ 44.♞h1 ♞d5+ there is no stalemate and after any pawn moves Ne3 wins.]

42...♞f1 Black could have taken on e4 right away, but Tomashevsky tries to trap the rook first.

43.♞h2 ♞d3 Nf1 is the main threat.

44.♞g4 ♞xe4

45.♞f5 White knows that he cannot keep his pawns for long and he goes with his king to the middle of the board where it is going to be the most difficult to deliver the mate.. When the pawns are off the board, Black's winning strategy will be to squeeze the white king to the edge of the board. Black cannot grab any direct benefits from the discovered checks with a knight move.

45...♞d6 The minor pieces are cooperating perfectly.

46.♖g2 ♘h5 It is time to collect another pawn.

47.♖g8 ♘g5+ [47...♙xh4 48.♖h8+ ♔g3 was equally good. There are many different ways to eliminate all the pawns.]

48.♙f6 ♘h7+ 49.♙g7 ♕xf4 50.♖a8 ♕e5+ 51.♙f7 ♙xh4 52.♖a4+ ♔h5 [Of course not 52...♙xh3?? because of 53.♖a3]

53.h4 [On 53.♖a5 Black unpins himself with 53...♘g5+ after which he can already remove his bishop.]

53...♕b2 54.♖f4 ♕c3 55.♙e6 ♕e1 56.♖f3 ♕g6 57.♖f1 The days of the h4 pawn are counted, but Tomashevsky uses a very good practical technique, that he improves his pieces first before he grabs the material. The reason is to avoid the 50 moves draw rule according to which if there is no capture or pawn move throughout 50 moves the game is drawn. Therefore Black starts to squeeze the white king to the edge of the board and takes on h4 a bit later to win some time for the countdown from 50.

57...♕b4 58.♖f4 ♘f8+ 59.♙d5 ♕e7 60.♖f1 ♕c2 61.♖g1 ♕b3+ 62.♙e4 ♘g6 63.♙f5 ♕d8 64.♙e4 ♕e6 65.♖d1 ♕e7 Black is not in hurry now, he can do whatever he wants.

66.♖a1 ♕c8 67.♖a5+ ♙xh4 So the pawn is taken, Black has 50 moves to mate his opponent. I thought the win should be quite trivial, but actually Black must do some efforts to

bring home the full point. We can see the importance of the 2 bishops as well, if Black had two knights and a bishop White could always threaten with sacrificing the rook for the bishop and the game is drawn with single two knights. Now the rook sacrifices for one minor piece never works.

68.♖a1 ♙g5 Black needs to use all his pieces to haunt the white king.

69.♖g1+ ♕g4 70.♖g2 ♕c5 71.♖g3 ♘f4 72.♙e5 ♕f2 73.♖a3 ♕h3 [73...♕f5 is also possible to squeeze one line on the king with Ng6 next move.]

74.♖a5 ♕g2 Tomashevsky decides to control the h1-a8 and g1-a7 diagonals with his bishops and squeeze the king towards e8.

75.♖a3 ♘e2 76.♖a5 ♕g3+ 77.♙e6+ ♙g6 The first success, the king has been pushed one rank closer to the edge and Black is threatening with Nd4 check to squeeze another line.

78.♖a6 [78.♖a4 prevents Nd4, but moves into 78...♕h3+ forcing the king to move to the 7th rank as Kd5 moves into Nc3!]

78...♘d4+ 79.♙e7+ ♙g7 80.♖a1 ♕h3 Black makes progress slowly but surely. He again controls with his bishops the escaping routes of the king.

81.♖h1 ♕g4 82.♖g1 ♘e2 83.♖f1 ♕f4 Bring the pieces closer to each other in order to cooperate more efficiently is another very good strategy!

84.♖d1 ♘c3 85.♖d3 [85.♖d4 is met by 85...♕g5+ and Kd6 does not work. 86.♙e8 ♕f5—+]

85...♘e4 [85...♕e5! was easier. White is in a kind of zugzwang. For instance 86.♖d2 loses to 86...♕f6+ 87.♙e8 (87.♙d6 87...♘e4+—) 87...♘b5!—+ with an inevitable mate

on c7 or d6.]

86.♔d8 ♖c5 87.♚d5 ♜e4 [The machine recommends 87...♜b7+ 88.♔e7 ♜c1! with the idea, that White must control the g5 square and if he does it by 89.♚b5 ♜a3+ 90.♔e8 ♜d6+ wins.]

88.♚d3 ♜g5 89.♔e7 [89.♔e8 was slightly more resistant 89...♜f7 90.♚b3 ♜g5 91.♚b7

91...♔g8! threatening with Nd6 mate and the knight cannot be taken because of Bh5. Without the rook it would be a stalemate now, therefore White should try sacrifice his rook... 92.♚b6 ♜f5! Black is threatening now with Ne5 followed by Bg6. Unfortunately Rg6 Bxg6 frees the d7 square for the king, but White can try (92...♜e5?? 93.♚g6+! is a draw!) 93.♚e6 ♜h4! setting White into zugzwang. The rook must control the d6 square, but then he must free the e5. 94.♚h6 Another stalemate trick, but the easiest refutation is (94.♚a6 94...♜e5—+ and Bg6 next.) 94...♜d7+! 95.♔xd7 ♜xh6—+]

89...♜f7 White is getting squeezed more and more. The end is near...

90.♚d4 ♜g5+ 91.♔e8

91...♜e5! and White resigned in view of the threatening mate on h5! Very good technique by Tomashevsky who needed only 25 moves to deliver the mate. **0-1**

(15) Mista, Aleksander(2597)
- Erdos, Viktor(2615)

German Bundesliga 2014/15,
2015.02.22

GM Arkadij Naiditsch
Best rating: 2737

Is this a winning or a drawn endgame?! The answer is hard to tell at first sight... In case White would somehow manage to put his rook behind the h-pawn the position would of course be winning, but right now the black rook is feeling quite free on the h-file and in case the white king would go to g3, the c3 pawn could be under attack.

57. ♖c2! Mista starts with the right move. White needs to bring his king to d3, as on b3 he is just badly placed.

57... ♜h6 Black can't do much, so he needs to keep on waiting.

58. ♕d3 ♕f5? Black allows White a nice trick. [The best chance for Black was to keep waiting on the h-file. 58... ♜h8] Now White has several ideas, but probably the most logical one is to try the same as in the game, as other plans like bringing the king to g3 don't make much sense as Black would put his rook on c8 and king on f5, with good drawing chances.

59. c4 bxc4+ 60. ♜xc4 and now it is very important for Black not to miss the chance of bringing his rook to the h-file to attack the white pawn from behind.

60... ♜d8+! (No better is 60... ♜g8 61. ♜c5+ ♕d6 and now White has the very strong 62. ♜g5 (62. ♜a5 62... ♜g4 is just a draw.) 62... ♜f8 63. h5 with very good winning chances.) 61. ♕c2! preventing the black rook to get to the h-file over the d1 square. (61. ♕c3? would probably lead to a draw. 61... ♜d1 62. h5 ♜h1 63. ♜c5+ ♕d6 and the very active black rook is saving the game: 64. ♜a5 ♕c7 65. ♕d3 ♕b6 66. ♜f5 ♜h4 It seems like White can't win the game any longer... 67. ♕c3 ♜h3+ 68. ♕c4 ♜h4+) 61... ♜g8 and now White is just in time with 62. h5! with the idea to play Rh4. 62... ♜g2+ 63. ♕b3 ♜h2 It seems like the position is close to a draw, but White has a very nice winning move:

64.♖c6! and Black cannot defend the position any longer.]

59.h5! An excellent move, using the right moment that Black cannot take on h5.

59...♔g5 avoiding Rh4. [A rather easy calculation shows that White is winning after 59...♖xh5? 60.♖d5+ ♔g6 61.♖xh5 ♔xh5 62.♔d4 ♔g5 63.♔c5 ♔f5 64.♔b6 ♔e4 65.♔xa6 ♔d3 66.♔xb5]

60.♖d5+ ♔f4 61.c4 Now the h5 pawn is saved and the black king is cut off on the 4th rank, clearly c4 is the right move.

61...bxc4+

62.♔xc4 All White needs to do now is to get his king to a5 and Black can't stop White from realizing this.

62...♖c6+ 63.♔b3 ♔e4 64.♖c5 very safe play

64...♖h6 Now White has 2 options...

65.♔a4! This is the right choice, as there is no need for White to think about the other tempting idea... [65.♖c4+ 65...♔d5 66.♖h4 Fixing the black rook on h6 looks great, but in fact it is not that useful right now. 66...♔d6 67.♔c4 ♔e5 68.♔c5 ♔f5 and the white king cannot get to the a6 pawn because the rook on h6 has the 6th rank under control.]

65...♔d4 66.♖g5 ♔c4 Once again Mista shows great rook

endgame skills!

67.♖g6! ♖xh5 68.♖xa6 Black can't stop White from playing Rc6 and b5, which means his position is just lost.

68...♖h8 69.♖c6+ ♔d5 70.b5 In case Black would have the king on d7 it would be a draw with the famous idea of playing Rc8!, winning the c-file, but now that the king is on d5 Black's position is just hopeless.

70...♖a8+ 71.♔b4 ♖a1 72.♖c2 ♔d6 73.b6 ♔d7

74.♔b5 followed by b7 and Kb6. What a great technique by Mista, even if Erdos made things a bit too easy for White... **1-0**

Chess and the City. This pen is cursed...

WGM Elisabeth Paehtz
Best rating: 2493

Some time ago I remember I was writing an article about superstition. I am myself actually not very superstitious however I tend to exchange the so-called lucky pen once I suffer a loss, especially when it is a bitter one.

Last weekend we played in German Bundesliga in Berlin and I found myself as so often without any writing tool. I asked my team mate David Baramidze if he could help me out. He handed me a black pen and so the story began...

I played on Saturday against an IM from Spain. In the first 4 hours I could say I played a very nice game, outplayed my opponent totally until I found myself in a winning endgame. Probably due to a lack of energy and nervousness I somehow lost control over the game and had to throw in the towel a few hours later. Fortunately my team could still win the match and I did not need to feel guilty but nevertheless sank in sadness and in the "I wanna kill myself mood."

Our team composition last weekend from left to right: Oleg Boguslavskyy, me, Sabino Brunello, Rainer Buhmann, Team captain Blerim Kuci, Ivan Saric, Dennis Wagner, David Baramidze and Richard Rapport

The next morning I returned the pen to David, since obviously I did not plan to give it another try. This time I went for a blue pen and managed to win the game. Our team succeeded in another victory however suffered again a single loss but this time by our team mate Ivan Saric from Croatia. The actual point about this loss was that also Ivan was in need of a pen before the game and again it was David who was so kind to borrow him one - and of course it was the very same pen.

The question I am now wondering about is if this is just a funny (or rather sad) coincidence or if there is really something we could call fate, luck or more often bad luck. Actually I have no idea, but what I know for sure is that this was the very last time to borrow a pen from David, especially when this pen is black and cursed.

In my next newsletter I will reveal the results of the Gibraltar test and after that the team of Chess Evolution should announce a winner, in case there is any...

5...♗g4 [Nowdays the best reaction is 5...b5]

6.♗xc4 e6 7.h3 ♗h5 8.O-O

8...♗e7 [8...♘bd7!? to avoid Ne5.]

9.♞b3 This is not the best square for the queen as White had possibilities to create two other setups which give him slightly better positions: [9.g4 9...♗g6 10.♘e5 ♘bd7 11.♘xg6 hxg6 12.♞f3 or; 9.♞e2 with the thematic idea to get a better center after Rd1-e4.]

9...♞b6 [9...♗xf3 10.♞xb7!]

10.♘e5 ♘bd7 [10...♘fd7!? The idea of this move which deserves attention is to save the light-squared bishop. 11.♘d3!?

11.♞xb6?! A bad decision. This exchange improved Black's structure. White should have played [11.g4 11...♗g6 12.♘xg6 hxg6 13.♞g2 ♞c7 14.♗d2 O-O-O 15.♞ac1!→There are no tactical threats on g4 or h3 yet because the king will escape over f3-e2.; 11.♘xd7 11...♘xd7 (11...♞xb3?? 12.♘xf6+; 11...♞xd7? 12.♞c2) 12.e4

12...e5! A typical fight for the center. (12...♞xb3 13.♗xb3 O-O 14.♗e3 Black's position is very solid but on the other hand White has the better center and his idea is to play against the bishop on h5.; 12...♞xd4 13.♗e3 ♞d6 14.♞xb7 O-O

15.♞fd1! ♗xd1 16.♞xd1 ♘c5 17.♞b4 (17.♞xd6 17...♘xb7 18.♞d7

♖a5+ 17...♜ab8 (17...♜b8 18.♜a3 ♜b6 19.b4+–) 18.♜a3 ♜e5 19.f4 ♜h5 20.♙e2 ♜h4 21.♙xc5 ♙xc5+ 22.♜xc5 ♜xb2 23.♜e3 and White is better.) 13.dxe5 (13.d5!?) 13...♙xe5 14.♙e3 ♜xb3 15.♙xb3 f6 (15...♙d3?! 16.g4 ♙g6 17.♜ad1 ♙xb2 18.♜d2±)]

11...axb6 12.♙xd7 White again had the chance to get the advantage of the bishop pair. [12.g4 12...♙g6 13.♙xg6 hxg6 14.♙g2 b5 15.♙e2]

12...♙xd7 13.♙d2 [13.g4 13...♙g6 14.f4 b5 15.♙xb5 cxb5 16.♙xb5+ ♙d8 17.f5 exf5 18.gxf5 ♙h5+]

13...b5= 14.♙d3 [14.♙b3 White's idea now is to take the center and limit the black bishop after f3-e4, so Black plays 14...♙g6 15.a4 (15.f3 15...♙d3!) 15...♙d3 (15...b4 16.♙a2 ♙e4 17.♙xb4? (17.♙e1!) 17...♙xb4 18.♙xb4 ♙d2+ 16.♜fc1 bxa4 (16...♙c4 17.♙xc4 bxc4 18.a5! ♙b4 19.♙e4±) 17.♙xa4 ♜a6 (17...♙c7 18.♙c5 At least White gets some active play here.) 18.♙c5+ ♙xc5 19.♜xa6 (19.dxc5) 19...bxa6! (19...♙xa6 20.dxc5 ♙e4 21.♙e1 f5 22.f3 ♙f6 23.♙g3±) 20.♜xc5 ♜b8 21.♜c3 ♙e4 22.♙c1 ♙d5 and Black is on time, so White is forced to exchange the bishop!]

14...♙g6 15.♙xg6 hxg6 16.♜fc1 ♜a6=+ [16...b4 17.♙e2 ♜a6 18.b3 ♜ha8 19.♜c2 ♜a3 20.♙c1= White can try Rab1-Rbb2-Nd3 next.]

17.a3 ♜ha8

18.♙a2? Another weak move which gives Black the opportunity to blow on a3. [18.♜ab1]

18...♙d5?! Janowski decided not to play [18...♙xa3! 19.bxa3 ♜xa3 20.♜c2 ♙d5 with the idea b4. 21.♜b2 ♙b6 and White's position is very unpleasant because it is hard to solve the problems with the pin.]

19.♜ab1 f5 20.♙f1 ♜a4 21.♙c3

21...♜c4!? A brave decision by Janowski. He is going to sacrifice the exchange to complicate the position.

22.b3 [22.♙e2]

22...♜xc3 23.♙xc3 ♜xa3 24.♙e1 ♙f6 [24...♜a2 25.♜a1 ♜b2 26.♜cb1 ♜c2=]

25.♙e2 e5 26.dxe5 ♙xe5 [26...♜a2+ 27.♙d3 ♙xe5 28.♜c2+=]

27.f4 ♙d6 [27...♙f6 28.g4 b4 It was more logical to keep the bishop on this diagonal.]

28.♙c3 ♜a2+ 29.♙f3 ♙c5 [29...♙a3 30.♜d1±]

30. Rxd1! ♔e6 **31. Rxd3** A nice rook improvement by Capablanca.

31... ♙f8 [31... ♙f7 32. ♙e5+=]

32. ♙e5 b4 Maybe it was not necessary to put the pawn on b4. [32...g5!?]

33. Rxc1? A strange move, which I cannot understand. I think it was more logical to play [33. Rxa1!? to exchange or activate the rook.; Or 33. Rxe1! with the idea to open the position over e4. 33...g5 34. e4 ♘xf4 (34...fxe4+ 35. Rxe4 gxf4 36. ♙xg7+ ♙f7 37. ♙xf8 ♙xf8 38. Rxd5 cxd5 39. Rxf4+ ♙g7 40. Rxb4+-) 35. exf5+ ♙xf5 36. g4+ (36. Rxd7 36... ♙c5) 36... ♙g6 37. ♙xf4 gxf4 38. ♙xf4+-]

33...g5 34. g4 [34. ♙d4!? 34...gxf4 35. exf4 ♖xg2 36. Rxe1+ ♙f7 37. Rxe5 g6? 38. Rxd5+-]

34...g6 35. e4

35...fxe4+?! A wrong decision. It was better to keep the e-file closed! [35...fxg4+! 36. hxg4 ♘xf4 37. ♙xf4 gxf4 38. ♙xf4 ♙h6+ (38... Rxa5! A nice move! Black has very good drawish chances as he is controlling the dark squares.) 39. g5 Rf2+ 40. ♙g3 ♙xg5 41. Rxc6+ (41. Rxc5 41... Rxd2) 41...bxc6 42. ♙xf2 and here White has winning chances.]

36. ♙xe4 Rxe2+ [36... Rf2 37. Rf3 Rxe2+ 38. ♙d3 Rf2 39. Rxe1! and White has the initiative.]

37. ♙f3 Rf2 38. ♙g3 Rxe2 [38...gxf4+ 39. ♙xh2 (39. ♙xf4 39... Rxf3+!) 39... ♙xe5 is too optimistic. 40. Rxe1+ ♘e3 41. Rxd7±]

39. h4 gxh4+ [39...gxf4+ 40. ♙xf4

40... Rg2+! 41. ♙f3 ♘xf4 42. ♙xf4?! (better is 42. Rxe1+!±) 42... ♙d6+ 43. Rxd6+ (43. ♙g5 43... ♙e7+!=) 43... ♙xd6 44. Rf1 with complex play but Black is not worse. (44. ♙g5 44...b5±) 44... ♙e6 (44... ♙d5 45. h5 gxh5 46. gxh5 ♙d4 47. h6 Rg8 48. h7 Rf8±) 45. h5 gxh5 46. gxh5 ♙f7 47. h6 ♙g8 and Black is on time.]

40. ♙xh4 ♙e7+ [40... Rf2+ 41. ♙g3 (41. ♙g5?? 41... ♙f7+-) 41... Rxe2 42. ♙f3 Rf2 43. Rxe1 Rf3+ 44. ♙e4 Rf4 and it is not easy to improve White's position.; 40...g5+!? 41. ♙xg5 ♙e7+ 42. ♙h6 The only square, otherwise Black has Rxe5! 42... ♙f8+

43.♔h7 The only square again. 43...♖h2+ (43...♕f7 44.♖h1) 44.♕g8 ♕h6 45.♖xd5!± avoiding the mate threats.]

41.♕g3 g5 42.♕f3 ♖h2 43.♖e1 ♖h3+ 44.♕e4 ♖h4 45.fxg5
White also keeps an advantage after [45.f5+ 45...♕f7

46.♕g3 (46.♖xd5!? A nice and interesting idea! 46...cxd5+ (46...♖xg4+ 47.♕f3+-) 47.♕xd5 ♖xg4 48.♖h1! with the idea to avoid counterplay from the second rank. (48.♖c1 48...♖g2 49.♖c7 ♖d2+ 50.♕d4 ♕f8⇒) 48...♖h4 (48...♕f6 49.♖h7+ ♕g8 50.♖xb7 ♕xe5 51.♕xe5+- The king is going to g6.) 49.♖c1

49...♖h6! The only way to defend is to take control of the 6th rank. (49...♖h3 50.♖c7 ♖d3+ 51.♕e4+- with f6 next.) 50.♖c7 ♕e8 51.♖xb7 g4⇒ 46...♖h3 (46...♖xg4+ 47.♕f3 ♕f6 48.♖e6+- The rook on g4 is dead and Rxf6 coming.) 47.♖g1 (47.♕f3?

47...♕d6 48.♕g2 ♕f4+ 49.♕xf4 ♖xd3 50.♕xg5 ♖g3+) 47...♕c5 48.♖g2 ♕f6+ 49.♕f3 ♖h1 50.♕e5 and White is clearly better.]

45...♕xg5 [45...♖xg4+ 46.♕f3 ♖xg5 (46...♕f5 47.♖xd5 cxd5 48.♕b8+-) 47.♕f4+ ♕d7 48.♖xe7+-]

46.♕f3 [46.♕g3 46...♖h3 (46...♖xg4+ 47.♕f3+ ♕f5 48.♖e5+-) 47.♖f3 ♕d2 48.♖ef1±]

46...♖h3+ 47.♕g3+ ♕d7 [47...♕f7!? Why not keep the king closer to the g pawn!? 48.♕g2 ♕f4+ 49.♕xf4 ♖xd3 50.♕xg5 ♖xb3 51.♖e7+ ♕g6 52.♕e3 ♖c3 53.♕f3 b5 and I suppose Black shouldn't lose this position.]

48.♕g2 ♖h7 49.♖e5 ♕f6

50.♖exd5+!? An interesting decision. Capablanca changes the character of the position, which from a practical point of view is a typical way of dealing with the position. [50.♖f5 50...♕e6]

50...cxd5 51.♖xd5+ ♕e8 52.♖b5 ♖d7! [52...♕c3 53.♕d6]

53.♖xb4 ♕f7 54.♖b6

54...♙d4 Janowski nicely regroupes his pieces.

55.♖d6 Both players were probably not sure about the evaluation of the bishop endgame, but objectively it is drawish. [55.♖b5 55...♙g6 56.♙f3 and White can try for a very long time here.]

55...♖xd6 56.♙xd6 ♗g6 57.♙f3 ♙f6 58.♙f4 ♙f7 59.♙e4 ♙e6 60.♙e3 ♙e7 61.g5 ♙d8 62.♙f4 [62.♙d3 62...♙f5 (62...♙d5 63.g6 ♙e6 64.♙d4) 63.♙c4 ♙c7 64.♙c5 ♙d8 65.♙d6 ♙a5 White is trying to attack the b-pawn. 66.♙d7 ♙c3 67.♙c7 b5 68.♙c6 b4 with a similar position as in the game.]

62...♙c7+ 63.♙g4 ♙e5 64.♙h5

64...♙f7 Black cannot allow White to bring his king to h7.

65.♙h6 ♙g8 66.♙b6 Fixing the pawn on b7.

66...♙c3 67.♙g6 ♙d2 68.♙f6 ♙c3+ 69.♙e6 ♙d2 70.g6 ♙c3 71.♙d5 ♙d2 [71...♙g7?? 72.♙d4+-]

72.♙d4 b5! Kc5 was not a threat anyway because of Ba5.

73.♙e4 b4 74.♙e3 ♙c3 75.♙d3 ♙e1 Now to improve the position White is forced to exchange the g- for the b-pawn.

76.♙d2 ♙f2 77.♙e4 ♙c5 78.♙d5 ♙e7 79.♙c4 ♙g7 80.♙xb4 ♙d8 81.♙c3+ ♙xg6 82.b4 ♙f5 [82...♙f7 83.♙d5 ♙e8 is not the correct plan as White is winning now after 84.♙c6 ♙h4 85.b5 ♙f2 (85...♙d8 86.b6 ♙g3 87.b7 ♙e8 88.♙a5 ♙b8 89.♙c7 ♙a7 90.♙b5 ♙d7 91.♙a6+-) 86.♙a5 ♙e3 87.♙b6 ♙d2 88.♙f2 ♙a5 and this diagonal is too short... 89.♙c5 ♙d8 (89...♙d8 90.♙b6+ ♙xb6 91.♙xb6 ♙c8 92.♙a7+-) 90.♙d6+- with Bc7 next.]

83.♙d5

And here in a drawish position Janowski unexpectedly resigned!!! He didn't know the defensive method which half a century later a 17-year old Bobby Fischer used in his game against Taimanov! To get the answer as to how to make a draw you can check the game Taimanov-Fischer, Buenos Aires 1960. **1-0**

Editorial Preface

The 16th Individual European Championship is one round away from the end. After 10 rounds Evgenij Najer leads with the amazing score of 8/10, beating Korobov in round 10 with the white pieces.

The second and third places are shared by David Navara, who is playing a very solid event and showed a few great games like against Nepomniachtchi, and Dennis Khishmatulin, who won a crazy game against Eljanov in round 10.

So we will witness the showdown on Sunday, after a rest day on Saturday.

Meanwhile Alexei Shirov managed to organize an amazingly strong rapid event in Yurmala, Latvia, which starts tomorrow. A lot of GMs will participate in it, with names such as Karjakin, Mamedyarov, Gelfand, the recent Grand Prix winner Tomashevsky and many more.

There is a friendly match between China and India under way, but both teams are not playing even close to their best line-ups.

The traditional open of Capelle-la-Grande 2015 is lead by Kotronias with 6/7. A lot of strong GMs are following him with 5.5/7 and one of them is the top seed of the tournament, Li Chao from China, with an ELO of 2720.

As always we hope you enjoy this week's chess material!

Best wishes,

Arkadij Naiditsch & Csaba Balogh

Two best games of the past week

(1) **Nepomniachtchi, Ian (2714)**
- **Howell, David W L (2663) [A29]**

16th ch-EUR Indiv 2015(8.1),
2015.03.04

GM Arkadij Naiditsch
Best rating: 2737

Ian Nepomniachtchi is one of the most interesting players in the world. He had tournaments in which he was not spending more than 20 minutes for the whole game, and lately has had a lot of very successful events in normal chess, as well as in rapid and blitz. Usually he is playing original and strange chess, which is not easy to play against, especially since Ian usually pushes his opponents into time trouble. In the current game it seems like Black could reach a normal position out of the opening, but in fact things were very tricky and White clearly kept the better overview over the position, which slowly brought him domination and later on a decisive material advantage.

1.c4 Ian likes to start a lot with the first 1.c4

1...e5 Lately Howell has been showing great results as we can see on his ELO. He is also quite strong in theory, so he picks the very main 1...e5.

2.♖c3 ♜f6 3.♜f3 ♜c6 4.g3 There are a lot of different moves orders and tricky lines here.

4...d5 [4...♙b4 is the other main line.]

5.cxd5 ♜xd5 6.♙g2 ♜b6 This is a very usual move. If we look at the position, we have a line from the Sicilian dragon with

reversed colors.

7.a3 White is quickly trying to make the b4 move work, as in combination with the bishop on g2 the b5 threat will have some value.

7...♙e7 8.b4

8...♙e6 Black is preparing to answer Nd4 after White's b5.

9.O-O a5 It is clear that Black is still in his preparation and of course it is nothing new. Black is forcing White to play b5 to play Nd4.

10.b5 ♜d4 11.♖b1 protecting from Bb3 and threatening to play Nxe5. [Of course White should not play 11.♜xe5? 11...♙b3 12.♙e1 ♜c2 and Black is winning.]

11...♜xf3+ 12.♙xf3 ♖b8 This is a very safe way to protect the b7 pawn, but of course now the rook is passively placed on b8.

13.d3 O-O 14.♙b2 White's idea is clear, to start his play on the queenside, where he has a bit more space, and put pressure against the c7 pawn with Qc2-Rfc1. Black's play should usually be on the kingside.

14...f5 A very logical move.

15.♙g2 I am not sure that this move was really immediately needed, although of course a prophylactical decision like Bg2

is not bad. [15. ♖c2 seems to be the best move here.]

15... ♗d6 Black is overprotecting the c7 pawn and putting his bishop to a slightly more active position.

16. a4 Black would most probably play Qe7 next anyway, so there is no reason to avoid playing a4.

16... ♕e7 [In my opinion maybe it would make sense for Black to put his queen on h5 now: 16... ♕e8 17. ♖c2 ♕h5 and maybe one idea could be to start some attack on the inside with Rf6 next.]

17. ♖c2

17... ♕f7 Clearly a useful move, taking more control of the d5 square and threatening to play Bb3.

18. ♗c1 defending from Bb3 and White is now switching to the idea of playing f4 somewhere. In principle Black's position is looking quite nice, but we should not forget about the b7 pawn which makes the black rook take a passive position on b8.

18... ♗d7 So far Black is playing a good game. The knight is going to take a good position on f6.

19. f4 and White is starting some action.

19... ♖h8?! Black is clearly missing White's idea... [Why not play 19... ♗f6 avoiding all the white tricks. 20. e4 Of

course White has other moves as well, but I guess this was Nepomniachtchi's idea. 20... fxe4 Black of course has a lot of different options too, but here comes the most crazy one. 21. f5 White is trying to reach a positional advantage. 21... ♕h5! 22. fxe6 ♗g4 The threat of playing Qxh2 and Bc5+ makes the piece sacrifice very exciting. The position is very unclear.]

20. fxe5 ♗xe5 and here comes the move that clearly Black has missed:

21. ♗e4! This move is not that hard to find, but very very important. White is now getting one of the black bishops, which will give him a clear positional plus.

21... ♗b4?! The intention of not giving away the dark squared bishop is right, but again Black is missing White's next move... [More solid seems to be 21... ♗d5 to at least try and exchange the g2 bishop. 22. ♗xd6 cxd6 23. e4 gives White a clear plus.]

22. ♗f4! White is not interested in easy solutions and wants to win the game on the spot! [The simple 22. ♗g5 22... ♕e7 23. ♗xe6 ♕xe6 would give White some advantage, but the move in the game is much stronger.]

22... ♗g4 The c7 pawn is going to fall and there is not much to do about it, so Howell decides to try his chances in the tactics.

25...♙d7? This move just loses... [The only way to go on was 25...♖xc7 26.♙xc7 and now the very strong 26...♙a2!! with the idea of b3-b2-b1, which is probably what Ian missed when he played 24. Rxb4?!. 27.♙xb8

27...♖bc8!? This move loses without a fight... [Black should at least have tried to create some mess with 27...♖be8!?

28.♗xb7 ♘e3 and of course White is winning here with several moves, but at least there are some practical chances left.]

33...♖h2 34.b7 Black doesn't have any threats at all.

34...♖g4

35.b8=♔ We just saw a great game by White where we have to admit some level difference between the young Russian and the English man. Anyhow, the game showed us a lot of different ideas of the opening and the positional idea of White to maintain the pressure on the b7 pawn as long as possible to disturb the development of the black rook. **1-0**

(2) Vitiugov, Nikita (2735) - Aleksandrov, Aleksej (2603) [D38]

16th ch-EUR Indiv 2015(3.14),
2015.02.26

GM Csaba Balogh
Best rating: 2672

Nikita Vitiugov won an unusual game, where he decided the outcome of the middlegame with a king march to the middle of the board!

1.d4 ♘f6 2.c4 e6 3.♘f3 d5 4.♘c3 ♙b4 Aleksandrov plays his pet line, the Ragozin defense.

5.cxd5 exd5 6.♙g5 ♘bd7 7.♔c2 The most common move by far is 7.e3.

7...c5 [7...h6 8.♙h4 g5 9.♙g3 ♘e4 was played by some top GMs recently.]

8.g3 One of the points of the 7.Qc2 setup. White would like to fianchetto his bishop and get a Tarrash defense structure, where the g2 bishop will push the d5 isolated pawn. The question is if White will have enough time to execute this plan or if Black can create his counterplay within the next few moves... [8.a3 or 8.dxc5 are all more common than the text move, but they are not necessarily better...]

8...h6 Black unpins himself by making use of the previous 8.g3 move. Now the bishop cannot hold the pin because after g5 it cannot return to g3 anymore...

9.♟f4 ♚a5 The novelty. [Just a few months earlier, Aleksandrov played in a rapid game 9...♞e4 10.♟g2 ♞df6 11.O-O O-O

Vitiugov has most probably planned an improvement at this moment: 12.♞xe4! is the computer's recommendation. (Black was doing fine after 12.dxc5 12...♞xc3 13.bxc3 ♟xc5 14.♞ad1 ♚e7= with equality in Bartel, Marta-Aleksandrov, Wroclaw 2014) 12...dxe4 13.♞d2 ♟xd2 (13...cxd4 14.♞xe4 leaves Black with a very weak target on d4.) 14.♚xd2 ♚xd4 (14...cxd4 15.♟e5 wins back the pawn and the two bishops, and especially the very strong dark-squared one guarantees an edge for White.) 15.♚xd4 cxd4 16.♞fd1 ♞d8 17.♟e5+= White wins back the pawn and enters a pleasant endgame with a slight edge. 17...d3? is wrong in view of 18.♟xf6 gxf6 19.♟xe4± winning a pawn.]

10.♟g2 ♞e4 Principled and typical play by Black! He spares an important tempo by delaying castling and quickly puts pressure on the c3 knight as long as the king is on e1.

11.♞c1! An excellent decision in connection with the next move! Black does not really have a choice, if he wants to be consequent he must accept the pawn sacrifice on a2.

11...♚xa2 The queen is not in danger of getting trapped because Black plans to take on c3 followed by trading queens.

12.♞d2! This is the point! White unpins himself and opens the diagonal of the g2 bishop, which starts to put very strong pressure on the d5 pawn.

12...♟xc3 [12...♞xc3 is much worse, because the d5 pawn falls after 13.bxc3 ♚xc2 14.♞xc2 ♟a5 15.♟xd5 winning back the sacrificed pawn and the white pieces remain much more active. Nc4 is coming.]

13.bxc3 ♚xc2 14.♞xc2 Black faces a difficult decision. The e4 knight is hanging and he has many possibilities to deal with it, but all of them have their drawbacks. Taking on d2 seriously strengthens the power of the g2 bishop while the other moves have concrete problems...

14...♞xd2 [14...f5 with the idea of cementing the e4 knight, however White could strongly reply with 15.c4! exploding the fortress of the key knight on e4! 15...♞xd2 (15...cxd4 16.cxd5 ♞df6 17.♟e5+= The bishops start to work effectively.) 16.♚xd2 dxc4 17.♞xc4 cxd4 Despite the fact that White is temporarily two pawns down he is better. The reasons for this are the

extremely well-placed bishop pair, the undeveloped black pieces and weak black pawns, which will start to fall one after another... 18.♖b1 ♘b6 19.♗xd4+= Black still cannot finish the development of the queenside because of the b7 pawn. He is obliged to suffer.; 14...♞df6 is also logical to keep the knight on e4, but White wins back the pawn after 15.♞xe4 ♞xe4 16.f3! ♞f6 17.dxc5+= The bishop will securely guard the c5 pawn from d6 and the one on g2 will be activated later over the f1-a6 diagonal after playing Kf2, Ra1 and e3.]

15.♔xd2! The queens are off, therefore to bring the king to the middle of the board is less risky. It is more important to bring the h1 rook to the game as soon as possible.

15...♞b6 Black decides to defend actively and gives back his extra pawn. [The alternative was 15...cxd4 16.cxd4 ♞b6 but White has more than enough compensation here as well after 17.♖a1 (17.♖c7 also looks good.) 17...O-O 18.♖ca2 a6 19.♔e1! leaving from the c4 check and White intends to attack the b6 knight - the defender of the d5 pawn - with Rb1 after having successfully provoked the a6 move. Black cannot save his pawn because after 19...♞e6 20.♖b2+= the b7 falls and it will give a nice edge for White as the black pawns remain weak and the two bishops continue doing their great job.]

16.dxc5 ♞c4+

17.♔d3!! The second step of the brave king, which is heading to the middle of the board. It will play a very important role in protecting the c5 pawn and attacking the d5 pawn. Somehow Black is lacking the pieces to be able to create any serious threats against it. [Black is completely fine after the less brave retreat 17.♔c1 17...♞e6 18.♖d1 ♖c8! The c5 is pawn equally weak as the d5 pawn now and it is already Black who has the initiative because after 19.♞xd5 ♖xc5 20.♞xb7 ♖a5 suddenly the white king gets into trouble.]

17...♞f5+ Black tries to haunt down the king with the most direct moves. [Now on 17...♞e6 18.♔d4! is very strong. White wants to take on d5 as the pin with Rd8 can be safely neutralized by e4 or if the knight moves away from c4 the bishop can be placed on d6. The game could continue with 18...♖d8 19.♖a2 a6 20.♖b1 ♖d7 21.♞d6 White has other good options too, but this seems like the best one. He prevents castling and attacks the d5 pawn and after 21...♞xd6 22.cxd6 ♖xd6 23.♖xb7 O-O 24.♖a7± White ends up with an extra pawn.]

18.e4! using the fact that the c4 knight becomes unprotected if Black takes on e4.

18...♞h7

19.♔d4! Of course! Vitiugov leaves from the pin, his rook still

remains in the diagonal, but he is threatening with Re2 or Ra2 and then the d5 pawn simply falls.

19...♖a5 [19...g5 is the other option, but it fails too: 20.♔xd5! The amazing story of the king continues! 20...♖a3 (20...gxf4 21.♔xc4± with an healthy extra pawn for White.) 21.♖a2 ♖b5 (21...gxf4 22.♖xa3±) 22.♔c4!± White saves his material advantage!]

20.♔xd5! The king continues his journey! The reason why it is possible is the placement of the c5 pawn and the d6 bishop which will ensure the safety of the white king against the black rooks, while the minor pieces are not well placed to create adequate counterplay.

20...O-O-O 21.♗d6 b6 Black continues his logical play, but that day nothing worked. He tries to undermine the bishop and prepares to bring back his knight to b7, but White has a strong reply again!

22.♖a1! ♖b7 [22...f6 with the idea of Bg8 check loses to 23.♖xa5! bxa5 24.♖b2!+- and suddenly the black king is the one who gets mated. Bh3, c6 or Kc6 are all deadly threats.]

23.♖xa7 bxc5 24.♗h3+! The easiest!

24...f5 25.e5! With his previous check on h3 White has provoked the closing of the h7 bishop. The rook is not hanging anymore and Black gets mated after Rb2 or Kc6. Black resigned! Despite this very nice victory, I don't recommend to march so bravely with your king, as usually it does not lead to anything good. **1-0**

The K-Files.

QGA 3.e4 b5 4.a4 c6 5.Nf3

GM Alexander Khalifman
FIDE World Chess Champion (1999)
Best rating: 2702

(3) QGA 3.e4 b5 4.a4 c6 5.Nf3 [D21]

1.d4 d5 2.c4 dxc4 3.e4 b5 4.a4 c6 5.♖f3 Another shift to a Slav sideline, this time 3.Nf3 dxc4 4.e4 b5 5.a4. This is far less popular than 3.Nc3 dxc4 but there is enough practical material here too. Also here it must be added that in the move order 1.d4 d5 2.c4 c6 3.Nf3 dxc4 the most dangerous move is 4. e3.

5...e6 The best move. Now the game once again transposes to another line, 1. d4 d5 2.c4 e6 3.Nf3 dxc4 4.e4 b5 5.a4 c6. Black has good chances to hold the balance but he has to play carefully. [5...♗g4 was played by Nakamura (in rapid) but doesn't look very healthy. Black needs this bishop at home because the white squares are rather weak. 6.axb5 cxb5 Markos - Wilhelmsson Copenhagen 1997 7.♖c3! ♔d7 8.d5♗; 5...♖f6 6.axb5 cxb5 7.♖c3 a6 (7...♗b7 8.e5 ♖e4 Sachdev - Danielian, E Moscow 2005 9.e6!?1) 8.e5 ♖d5 9.♖xb5 axb5 This version of the exchange sac is definitely weaker than the main line. 10.♖xa8 ♗b7 11.♖a1 e6 12.♗e2 ♖c6 13.O-O ♖a5 14.♗e3 ♗b6 15.♖d2+= OK, it's not a technical position yet, but Black's compensation is clearly not enough.; 5...♗b7 leads

to interesting complications but doesn't solve the problems. 6.b3! e5 (6...♘f6 7.e5 ♘d5 Bacrot - Dao Thien Hai Batumi rapid 2001 8.e6!↑) 7.axb5 cxb5 8.bxc4 exd4 (8...♙xe4 9.c5±) 9.cxb5 ♘f6 10.♙d3+=; 5...a6?! This seemingly standard move just turns out to be a loss of time. 6.b3! ♘f6 7.axb5 cxb5 8.bxc4 ♙xe4 9.♙d3 ♙b7 10.cxb5±]

6.axb5 [6.b3 can create problems only for White. 6...♙b4+ 7.♙d2 ♙xd2+ 8.♖xd2 cxb3 restricting the opponent's possibilities. (8...♘f6 usually leads to the same position but also allows 9.e5 (After 9.axb5 9...cxb3 - 8...cxb3) 9...♘e4 10.♖f4 with unclear play.) 9.axb5 ♘f6 10.♘c3 O-O 11.♙d3 Mainka - Loeffler Germany 1994 (11.♘e5 11...♙b7 12.f3 Beliavsky - Bacrot Albert 1999 12...♘fd7! 13.♘xd7 ♘xd7 14.♖b1 c5±) 11...♙b7!? 12.e5 ♘d5 13.♘e4 cxb5 14.♘d6 ♖e7+=; After 6.♘c3 Black can play 6...a6 (Both 6...♙b4; and 6...b4 are also playable but require certain knowledge.)]

6...cxb5 7.b3 This is the most dangerous and critical subvariation. It was tested many times on the top level and it is enough to say that the list of players who played it with Black includes Kasparov, Karpov and Ivanchuk. So it's quite surprising that the most precise defence was played only in a couple of games and remained quite unnoticed.

7...♘f6 The best and safest move in my opinion. [7...♙b7

This is supposed to be the main line. However, in my opinion it leaves Black under certain pressure. 8.bxc4 ♙xe4 (8...bxc4 9.♙xc4 ♙xe4 10.O-O±)

9.♙bd2!? In my opinion this move is more promising than the natural 9.cxb5. (9.cxb5 9...♘f6 10.♙e2 ♙e7 11.O-O ♘bd7! is an important improvement by Rublevsky. (The normal developing move 11...O-O allows White to create strong pressure after 12.♘c3 ♙b7 13.♘e5!↑Anand - Karpov Las Palmas 1996) 12.♘c3 (12.♘bd2 12...♙d5 13.♘c4 ♖c7= Shipov - Vorobiov Moscow 2003) 12...♙b7 13.♘e5 (13.♙f4 13...O-O) 13...♖c7 (13...♙xe5 14.dxe5 ♘d7 15.♙f3↑Tregubov - Yakovich Samara 2000) 14.♘c6 (14.♙f3 14...♖xc3 15.♙xb7 ♖xa1 16.♙xa8 O-O= Bacrot - Kharlov France 2001) 14...♙xc6 (14...♙d6 15.g3 O-O 16.♙f3 a6) 15.bxc6 ♖xc6= and White's initiative is only enough to hold a draw. (Krasenkov - Rublevsky Polanica Zdroj 1998)) 9...♙b4 (The point of White's tricky move order is that after 9...♙b7 10.♖b3! ♘f6 11.♖xb5+ ♖d7 Bareev - Semkov Vrnjacka Banja 1987 12.c5!?± the pawn structure is clearly favorable for White.) 10.cxb5 (10.♙e2 10...bxc4) 10...♘e7 (10...♘f6 11.♙e2 O-O 12.O-O ♙d5 Bocharov - Kotsur Abu Dhabi 2004 13.♖a4!? ♙e7 14.♙a3+=) 11.♙e2 O-O 12.O-O ♙b7 13.♙a3 ♙xa3 14.♖xa3+= The queenside structure b5 vs a7 together with the fact that the b5 pawn is very safe makes Black's task fairly unpleasant.; 7...♙b4+

is close to equal but not exactly. 8.♔d2 ♕xd2+ 9.♖bxd2 ♗c6 10.bxc4 ♖xd4 11.cxb5 and now both 11...♗e7 Bacrot - Lautier Paris rapid 2002 (and 11...♗f6 Dautov - Raetsky Seefeld 1997 12.♗c4 ♗xf3+ 13.gxf3 O-O 14.b6!+=) 12.♖a4 ♗xf3+ 13.♗xf3 O-O 14.♖xd8 ♖xd8 15.♕e2+= leave Black struggling. With an accurate defence he must hold a draw most probably, but defending this kind of position is not easy at all.]

8.bxc4 [8.e5 is only looking for trouble. 8...♗e4 9.bxc4 ♕b4+ 10.♖bd2 (10.♕d2 might be better. 10...♗xd2 11.♖bxd2 ♗c6 12.♕d3 ♗xd4 13.O-O ♕xd2 14.♖xd2 O-O=) 10...♗c6 11.♕d3 ♗c5+= van der Werf - van den Doel Leeuwarden 2001]

8...bxc4!? This rare move solves all the problems. Of course Black will have to play some precise moves afterwards but it's not like suffering in a long endgame. [8...♗xe4 9.c5! A smart trick which is of course underestimated even by the best engines. 9...♕xc5 10.♕xb5+ ♕d7 11.♕xd7+ ♖xd7 12.dxc5 ♖xd1+ 13.♖xd1 ♗xf2+ 14.♖e2 ♗xh1 15.♕f4+= Once again it's easier for Black to hold a draw than to win for White, but is this a good reason to go for such a position right from the opening? (Bacrot - Arencibia Havana 1998)]

9.♕xc4!? This pawn sacrifice is the most dangerous attempt to refute Black's setup. But the following lines show that defensive resources are quite enough. [9.e5 9...♗d5 (9...♗e4 (Cvitan - Lane Cappelle la Grande 1995) is a bit too provocative. 10.♖bd2!? ♕b7 11.♕xc4 ♕b4 12.O-O ♗xd2 13.♕xd2 ♕xd2 14.♖xd2!) 10.♕xc4 ♕b4+ 11.♕d2 (11.♖bd2 11...O-O 12.O-O a5= Le Bourhis - Rausis Creon 1999) 11...a5 12.O-O O-O 13.♕xb4 ♗xb4 14.♗c3 ♕a6= The remaining material leaves White no realistic chance for a kingside attack, so Black has nothing to worry about.; 9.♗c3 may lead to a funny drawish line: 9...♗c6 (9...a5!?) 10.♖a4 ♕d7 11.♖xc4 ♗a5 12.♖a4 ♖b8 13.♕d3 ♗b3 14.♖c4 ♗a5 15.♖a4=]

9...♗xe4 10.O-O ♕e7 11.♖e1 [The direct approach 11.d5 only leads to simplifications after 11...O-O 12.♕a3 (12.♖e1 12...♗f6 13.dxe6 ♕xe6 14.♕xe6 ♖xd1 15.♕xf7+ ♖xf7 16.♖xd1 ♗c6=) 12...♕xa3 13.♖xa3 Yermolinsky - Stefanova Honolulu 1997 13...♗f6 14.dxe6 ♕xe6 15.♕xe6 fxe6=]

11...♗f6 [11...♗d6 12.♕b3 and d4-d5 is a very unpleasant positional threat.]

12.♗e5 O-O 13.♖f3

13...♕b4! An important trick which leads to rather tricky lines but Black is OK everywhere. [After the natural 13...♗d5 14.♗c3 ♗b6 15.♕d3→White has more than enough for the pawn.]

14.♖xa8 [14.♕d2 14...♕xd2 15.♗xd2 ♗d5 16.♗b3 (16.♖ab1 16...a5) 16...♖d6=]

14...♕xe1 15.♖xa7 ♕d7 16.♕d2 [16.♕a3 16...♖e8 17.♖b7 ♗c6! 18.♗xd7 ♕xf2+! 19.♗xf2 ♗g4+ 20.♖g3 ♖g5=]

16...♕xd2 17.♗xd2 ♗c6 18.♖c5 ♖c8 19.♕a6 ♖a8 20.♗b3 ♗e4 21.♖c2 ♗xe5 22.dxe5 ♖b8=

David vs. Goliath

Peter Zhdanov
Chief Editor of Pogonina.com

In this special column we are reviewing the most unexpected results that occurred last week. Players usually face opponents of a similar level. Considerably less frequent are situations when a significantly lower-rated player succeeds in beating a much stronger adversary.

The previous week has brought us only 13 upsets - again! So far the devil's dozen is a regular visitor of our column.

The number of moves ranges from 19 in Faure (1893) - FM Dijkhuis (2278), 1-0 to 99 in Bochkarev (2076) - GM Bok (2587), 1-0. The highest-profile loss was GM Postny (2647) - IM Birnboim (2347), 0-1. The rating difference is exactly 300 points.

As usual, we pay a special humorous tribute to people who are not afraid to get checkmated. Here's the final position of the Carrozza (1669) - Engl (2034) game:

Top-10:

Bochkarev (2076) - Bok (2587), 1-0, [511](#) points
 Gabison (1760) - Slonimskij (2176), 1-0, [416](#) points
 Tenev (1332) - Iliev (1735), 1-0, [403](#) points
 Leriche (1919) - Saada (2319), 1-0, [400](#) points
 Faure (1893) - Dijkhuis (2278), 1-0, [385](#) points
 Rusek (1798) - Obermayr (2170), 1-0, [372](#) points
 Estremera Panos (2373) - Deues (2007), 0-1, [366](#) points
 Carroza (1669) - Engl (2034), 1-0, [365](#) points
 Levin (1869) - Gershkovich (2227), 1-0, [358](#) points
 Yaniv (1579) - Lukovski (1932), 1-0, [353](#) points

Average gap: 393; White won 9 games, Black won 1 games.

You can view all the games in the accompanying pgn file.

If you have ever won a game against someone rated 300 points or above yourself, please send it to peter@pogonina.com for publication. Any additional information (a photo, annotations, etc.) will be appreciated.

Black is a piece up, but the h1 corner square does not fit to the color of the g7 bishop. This makes the win more difficult technically. The question is if Black should trade rooks or not?

44...♖xd3+? It's amazing, but the game seems to be drawn after this exchange. [Black should have kept the rooks on the board, followed by slowly improving his position by bringing the king to the game... 44...♖a7 45.♖e4 ♖g8 46.h3 ♖f7 followed by Ke6 and Bf6 and start squeezing down the white king. 47.g4 Black could also keep his pawns on the board with h4, but there is an even stronger direct solution as well: 47...♖a4+! 48.♖f3 ♗h6—+ forcing the g5 move, which is a fatal weakening of the pawn structure.]

45.♖xd3 ♖g8 46.♖e4 At first sight Black is completely winning as he simply brings up his king and White is unable to trade pawns because f5 is met by g5 and g4 by h4. However the truth is different...

46...♖f7 47.♖f3 White intends to push g4 as it cannot be taken because after Kxg4 h4-h5 is coming inevitably and trades off the last standing pawn. [Trying to reach the game's position in a different move order by playing 47.f5 fails to do the job, because Black can answer with 47...g5 48.h3 ♖e7! 49.♖d5 (White has no time to play 49.g4 because Black reaches the d6 square with the king. 49...hxd4 50.hxd4 ♖d6—+ and the king goes to e5 next move and soon catches the g4 pawn.) 49...g4! This is the key! Black separates the f5 pawn from the others... 50.hxd4 hxd4 51.♖e4 ♗h6! prevents Kf4! The rest is just a matter of technique. 52.♖e5 ♖f7! 53.f6 Otherwise Black plays Kf6. Now he must prevent Kf5 with 53...♖g6 54.♖e6 ♗g5 55.f7 ♗h6 56.♖e7 ♖f5 57.f8=♖+ ♗xf8+ 58.♖xf8 ♖e4—+ wins.; However 47.h3 is also strong. 47...♖e7 (47...♖f6 48.g4) 48.♖d5 will transpose to the game.]

47...♖f6 [47...♖e6 does not work because of 48.g4 h4 (48...hxd4+ 49.♖xd4= and h4-h5 next.; 48...♖d5 49.f5=)

49.f5+! leaves Black with a single h-pawn, which is not winning with the dark squared bishop. 49...gxf5 50.gxf5+ ♖xf5 51.♖g2 and the king goes into the corner and reaches the well-known theoretical draw... 51...♖g4 52.h3+ ♖f4 53.♖h2 ♖f3 54.♖h1 ♖g3 55.♖g1 ♖xh3 56.♖h1= White just passes on g1-h1 and Black cannot squeeze it out from there because it always ends in a stalemate.]

48.h3 [48.g4 48...h4 49.h3 is equally good as it transposes to the game.]

48...♙f8 49.g4 h4 [49...hxg4+ 50.♖xg4! (50.hxg4? also looks good at first sight, but Black wins after some subtle maneuvering:

50...♖e7! Black must go around with the king and he must sidestep the f5 check to save his last pawn... 51.♖e4 ♖d6 Compared to the game, Black has reached the 6th rank with

his king and from now on the squeezing goes more or less automatically... 52.♖d4 (52.g5 52...♖e6—+; 52.f5 52...g5—+) 52...♙g7+ 53.♖e4 ♙b2—+ White finds himself in zugzwang. Kd5 is coming next.)]

50.♖e4 [50.f5 50...g5 51.♖e4 is again a transposition to the game.]

50...♙b4 51.f5 g5 White has done a great job since the initial position of our game. He has set all his pawns on light squares where the bishop cannot attack them. Black has managed to save the g-pawn, but surprisingly it is not enough to win. Let's see the reasons...

52.♖d5 White keeps the king in the cage, does not open a path towards the h3 pawn.

52...♖e7 53.♖c6! It is very important that the king cannot be allowed to d6 or e5! White must always control these two squares and he will hold the draw...

53...♙a3 54.♖d5 ♖d7 55.♖e5 Black would like to go around with his king, but suddenly White finds his counterplay in Kf6! [Let's just demonstrate the win if Black reaches the d6 square with the king: 55.♖e4?? 55...♖d6 56.♖d4 ♙b2+ 57.♖e4 ♙f6—+ The king is forced to retreat and Black gets to the h3 pawn.]

55...♙b2+ The king cannot be allowed to get to f6. [55...♖c6 also leads to a draw after 56.♗f6 ♘c1 57.♗g6 ♖d6 58.f6 ♗e6 59.f7 ♙a3 60.♗xg5=]

56.♗d5 ♙g7 57.♗c5 White has a very easy task. He simply needs to control the d6 and e5 squares...

57...♙e5 58.♗d5 ♙b8 59.♗c5 ♙c7 60.♗d5 ♙d6 Black finally managed to set his opponent into zugzwang, but it is still not enough because suddenly the bishop gets misplaced on d6 as it occupies the king's ideal place...

61.♗e4 ♙f4 [61...♖c6 would be the thematic squeezing, but it allows quick counterplay again: 62.f6! The black king got too far away from the kingside... 62...♗d7 63.♗f5 ♙f4 64.♗g6 ♗e8 65.♗g7 ♙e5 66.♗g6= forces the draw.]

62.♗d5 White occupies the right square again and keeps the black king in his cage, far from the d6 square.

62...♗e7 63.♗c6 ♗f7 64.♗d5 ♗f6 Now Black tries to break through along the e5 square, but White has enough squares for his king to prevent this idea..

65.♗e4 ♙e5 66.♗d5 ♙b2 67.♗e4 ♗f7 68.♗d5 ♗e7 Black tries again along d6, but we already know what happens...

69.♗c5 ♗d7 70.♗d5 ♙f6 71.♗c5 ♙d8 72.♗d5 ♙b6 73.♗e5 ♗e7 74.♗d5 ♙c7 75.♗c5 ♗d7 76.♗d5 ♙d6 We have already

seen this position 16 moves ago...

77.♗e4 ♙a3 78.♗d5 ♗e7 79.♗e5 ♙b2+ 80.♗d5 ♗d7 81.♗c5 ♙e5 82.♗d5 ♙b8 83.♗c5 ♗e7 84.♗d5 ♗f7 85.♗c5 ♗f6 86.♗d5 Black admitted his opponent's brilliant fortress and agreed a draw. This endgame could be very useful to remember... **1/2-1/2**

After an interesting game where White missed a clear win in time trouble, we are in a strange endgame. Black is an exchange up, but White has 2 pawns for it and the bishop pair. Is the position equal or does White still keep some winning chances? We will find out during the next moves...

44.♘c3 A very logical move. White puts his bishop to a better square and bxc5 bxc5 and Ba5 could also sometimes be possible in a good moment.

44...♙f3 Black enters a very forced line. [44...♖ef7 was a safer option in my opinion. Now Black wants to exchange the rooks after which the position should just be a draw. 45.♙e1 It seems like there is no other move that White can play to avoid Rf2 next. 45...♖g4 getting the white rook to a passive position on h2. 46.♖h2 and I can't believe that White really has any objective chances to play for a win with such a passive rook

on h2.]

45.♖g6 is probably the best practical chance for White. The position is getting very sharp.

45...♙e4! A very strong move! The white bishop on d3 is sort of controlling a lot of important squares and needs to be exchanged, so the white king gets in big danger, being attack by both black rooks.

46.♙xe4 ♖exe4 47.♖xb6 White already has 3 pawns but now the bishop on c3 gets lost.

47...♖f2+ 48.♙b3 [48.♙d3 is not better since after 48...♖xh4 Black has the double threat of playing Rf3 and Rh3.]

48...♖f3? What a mistake when the draw was that close! Black chooses the wrong rook to put on the 3rd rank.

[48...♖e3! would lead to a draw as it avoids the move in the game. 49.bxc5 ♗ff3 Now we have a similar position to the game, but the white rook is badly placed on b6. 50.♖d6+ White already has to force a draw: (To continue playing for a win would be a dangerous decision for White, since even though the white pawns are very dangerous, Black is a rook up! 50.♖b4 50...♗xc3 51.♗b7+ (51.c6+ 51...♖d6 doesn't lead anywhere for White.) 51...♖c8 52.♗h7 ♗b3+ 53.♖a5 ♗fc3 and maybe the position is still a draw, but White can definitely not win.) 50...♖c7 51.♗c6+ ♖d7]

49.♗f6!! This is what Sutovsky missed and here is the difference to the 48... Re3 line:

49...♗h3? A bad decision usually doesn't come alone... [Black should have tried 49...♗xf6 50.♗xf6 ♗e3+ and now White would have a difficult choice: 51.♖b2 is clearly the best, but a difficult move to find. (The very natural 51.♖a4 leads to an amazing draw: 51...♗e4 52.h5 It seems like there is no way to stop White's h-pawn, but Black has a draw here!

52...♗f4!! winning a decisive tempo by chasing the white bishop from the f6 square. 53.♗g5 ♗xc4 54.h6 cxb4! Black is just in time! 55.axb4 (55.h7 55...bxa3+ 56.♖xa3 ♗c8 57.♗f6

♖d6 with a draw.) 55...♗c3 followed by Rh3 or Kf6 with a draw.) 51...♗f3 52.♗g5 ♖d6 and White keeps good winning chances, but Black is still fighting for a draw.]

50.bxc5 Now the game is over...

50...♗ee3

51.c6+ This is the difference to the rook on b6: Black has no more Kd6 move.

51...♖c7 52.♖b4 ♗xc3 53.♗f7+ The most simple win.

53...♖b8 The white pawns are just too strong.

54.♗f8+ ♖c7? Another move after which Black needs to resign on the spot instead of keeping the game going a bit longer. [It is never too late to resign a game, so Black should have fought on with 54...♖a7! 55.c7 ♖b6 With the idea of mating the white king with the rooks. 56.c8=♖+! Sometimes a promotion to a knight is enough to win the game... 56...♖b7 and of course White has different options here and the position is winning, but Black can still hope for a miracle.]

55.♖c5! Now it is the black king who gets mated...

55...♖hd3

56.d6+ This was an interesting endgame were clearly Black could have done better but White's 49. Rf6!! move was easy to miss. Sutovsky maybe thought that he has a draw with any of the rooks moves. Chess is sometimes a very very exact game!

Chess and the City. Time to speak "Tacheles"

WGM Elisabeth Pahtz
Best rating: 2493

About 4 weeks ago I published a quiz about the Gibraltar Festival and here come the answers:

1. How many times has the Tradewise Gibraltar Chess Festival taken place?

This year the Gibraltar Chess Festival celebrated its 13th edition!

2. Who among the main Organizers has the nickname "the fox"?

"The foxy Stu, the foxy Stu makes all the women's wishes come true" - Stuart Conquest is not only well known as "the fox" but also quite popular for supporting Women Chess together with the inventor of the tournament, Brian Callaghan!

3. Which female participant is the strongest rated one playing for the first time in 2015?

Lilit Mkrtchian from Armenia is the strongest rated women player who participated for the very first time in 2015!

4. Which other female participant had to spend some additional days at Gibraltar in 2013 due to a Visa problem?

The Chinese player Ju Wenjun was the "unlucky" one who had to spend some additional time in Gibraltar as she was in need of an English transit visa for her departure. Nowadays she travels through Malaga - I wonder why...:)

5. Which two participants at the Gibraltar Festival of 2015 are sponsored by Red Bull?

If you looked carefully at the pictures you would have seen Hikaru Nakamura with his Red Bull drink during every one of his games. The second "participant" (who was not participating as a player but rather as a broadcaster) is Tania Sachdev, who has been sponsored by the energy drink company for three years now.

6. Who is the creator of the Gibraltar Chess Tournament?

As already mentioned above this is Brian Callaghan!

7. Which Top Grandmaster is known by the name of "Prince Charming"?

Prince Charming was the nickname I gave to the very charming David Howell from England!

8. Which other Top GM being called "The finest"?

"The finest" was actually invented by my colleague Simon Williams and goes to another English Top Grandmaster, Gawain Jones!

9. What is the favorite move of the commentator Simon Williams (related to the nick name I gave him)?

Simon Williams is known as "Mr g4"!

10. Last but not least, which super GM agreed his participation for 2016?

This is no other than the great Vishy Anand!

If anyone answered all answers correctly, he or she will be contacted in the next couple of days. In any case I will let you know about it in my next newsletter.

Last but not least I would like to mention that I was lucky enough to sneak into the Women's World Championship which will start on the 17th of this month. My first opponent will be the Georgian Woman Grandmaster Meri Arabidze. My next newsletters will naturally concentrate on that championship!

1.c4 ♘f6 2.♘c3 g6 3.e4 d6 4.d4 ♙g7 5.♙e2 O-O 6.♙g5
Averbakh plays the system which was named after him.

6...c5 7.d5

7...♙a5 [7...b5 leads to Benko structures.; 7...e6 leads to Benoni structures.]

8.♙d2 [8.♙d2 8...a6! A typical move. 9.♘f3 b5↗10.cxb5 axb5 11.♙xb5 ♘xe4! 12.♘xe4 ♙xb5 13.♙xe7 ♖e8—+]

8...a6 9.a4 Compared to the 8.Qd2 line now Black is not able to play b5.

9...e5?! A strange decision. Black have mixed up a few plans. Better was [9...♙c7 with the idea to go back to the

plans with e6. 10. Nf3 (10. Bf4 10... Qa5 11. Qd2 b5 12. cxb5 axb5 13. Bxb5 Bb6) 10...e6 11. dxe6 (11. O-O 11... exd5 12. exd5 (12. cxd5 12... Re8) 12... Bf5 with the idea Ne4 .) 11... Bxe6 (11... $\text{fxe6}!$?) 12. Bf4 Bd8 13. O-O Nc6 14. $\text{Nd5}+=$ and White has the advantage.]

10.g4! A strong and typical move in King's Indian structures. White is going to take space and fight against the thematic f7-f5 plan. At that time ideas like this were not well-known.

10... Ne8 11.h4 f5?! is premature in my opinion. First Black should improve the queen which is very badly placed, far away from the kingside. [11... Qd8 12.h5 and now we can check the original idea, connected with closing the position on both sides: 12...a5!? (12...b6 13.a5! to keep possibilities of playing on the queenside.; 12...g5 13. Nh3 h6 14.a5! Of course, otherwise Black plays a5 with a funny drawish position.) 13. Nh3 Otherwise Black will play g5 and close the position again. (13.g5 13...f5!? 14. exf5 Bxf5 (14... gxf5 and it is not easy for White to create some advantage only on one side.) 15.h6 Bh8 16. f3 e4! $\Rightarrow$) 13...h6?! preparing g5, but after 14. hxg6 fxg6 15.g5 h5

16. Bxh5 ! gxh5 17. Qxh5 Qd7 18. f3 ! preventing Qg4 , White has a strong attack.]

12.h5 The alternative for White was to open the position after [12. gxf5 12... gxf5 13. exf5 (13. Nf3 13... f4 14. Ng5 Nf6 15. Ne6 Bxe6 (15... Bf7 16. Nb5 Qb6 17. $\text{a5}+-$) 16. dxe6 Nc6 with typical complex play.) 13... Bxf5 14. Nf3 XQa5 14... Nf6 (14... h6 to prevent Ng5 but it looks a bit slow. 15. Bg1 Kh7 16. Ne4 ! White is going to take control of the light squares! 16... Qd8 17. Ng3 Bg6 18. h5 $\rightarrow$) 15. Ng5 Qd8 16. Be3 $\rightarrow$ with the idea to play Ne6 at some moment.]

12...f4 Black is trying to close the position but it is already too late. [12... Qd8 13. hxg6 hxg6 14. gxf5 gxf5 15. Nf3 with Qc2 - O-O-O and a simple attack.]

13.g5! Qd8

14. Bg4 ! This move is not just played because the g5 pawn

is hanging, but it is generally good for White in King's Indian structures to exchange the light squared bishops.

14...♖c7 15.♗xc8 ♜xc8 16.♘f3 [16.h6 16...♗h8 17.a5 and because the bishop on h8 is "dead" White is kind of a piece up and the position is simply winning for him.]

16...♘c6! What an amazing move by Spassky! He understood that strategically his position is lost and decides to change the character of the position. [16...♞e8 to keep the option Bf8 after h6 but then 17.hxg6 hxg6 18.♘h4 ♖f7 19.♘xg6!+-]

17.dxc6 bxc6 White is piece up and objectively his position is just winning, but Black gets the opportunity to play over the b-file and Ne6-Nd4 as well.

18.♘h4 ♜e8 [18...♞e6 takes the knight's square.]

19.hxg6 hxg6 20.♞g4 ♜b8 21.♘d1 [21.♘f5? 21...gxf5 22.exf5 ♞d7+-]

21...♘e6 22.♞a3 An original maneuver to join the h-file.

22...♘d4↔

23.♞ah3 ♜f7 24.♗c3 White wants to exchange the strong knight.

24...♞fe8 25.♞3h2 I don't understand this move...

25...♞xc4 26.♘xg6 ♞e6 [26...f3 doesn't help as White mates first: 27.♞h8+ ♗xh8 (27...♖f7 28.♞d7+ ♖xg6 29.♞1h6+ ♗xh6 30.♞xh6+ ♖xg5 31.♞g7+ ♖f4 32.♞h4#) 28.♞xh8+ ♖g7 29.♞d7+ (29.♞h7+ only leads to a draw. 29...♖xh7 30.♞h5+ ♖g7 31.♞h6+ ♖f7 32.♞h7+ ♖e6 33.♞h3+=) 29...♖xg6 30.♞h6+ ♖xg5 31.♞g7+ ♖f4 32.♞h4#]

27.♗xd4? White missed a winning chance after [27.♞h8+! 27...♗xh8 28.♞xh8+ ♖g7 (28...♖f7 29.♗xd4 with the king on g7 White doesn't have this move.)

29.♞h7+! (29.♞xb8 29...f3! and Black is winning because of the weak e2 square! 30.♞b7+ ♖xg6 31.♞f5+ ♘xf5 32.exf5+

♔xg5 33. ♕d2+ ♖f6! —) 29... ♖xh7 and now White is winning by force like in a puzzle: 30. ♖h5+ ♖g7 31. ♖h6+ ♖g8 32. ♖h8+ ♖f7 33. ♖h7+ ♖e8 34. ♖g8+ ♖d7 35. ♖f7+ ♖c8 (35... ♖d8 36. ♕a5+ —)

36. ♖e7+! The queen on c4 is hanging in case of Rxe7. 36... ♖b7 37. ♖d5+ ♖a8 38. ♖c7+ ♖b7 39. ♖xe6+ —]

27... ♖xg6 28. ♖f5 [28. ♖d7 28... cxd4 29. ♖h8+ ♕xh8 30. ♖h7+ ♖f8 31. ♖xg6 (31. ♖xh8+ 31... ♖g8 —) 31... ♖b4+! A very important check to protect the d6 pawn. 32. ♖f1 ♕g7 33. ♖f5+ (33. ♖h7 33... ♖b7 and Black easily defends the position.) 33... ♖e7+ with defensive ideas of Qc4+ Qe6/Qf7.]

28... ♖e6 29. ♖xe6+ ♖xe6 30. ♕c3

30... d5 31. **f3 ♖b3** Objectively White is winning but Black

still keeps easy practical play, thanks to the strong central pawns and the bad white pieces.

32. ♖h3 [32. ♖d2 32... d4 (32... c4 was more accurate.) 33. ♖d3 White gives back the piece to change the character of the position. 33... dxc3 34. ♖xc3 ♖d6+ 35. ♖c2! (35. ♖c4 is risky. 35... ♖b4+ 36. ♖xc5 ♖dd4 —)]

32... c4 33. ♖d2 ♖g6 34. ♖g1 d4 35. ♕a5 White has a passive knight and rooks and his pawns are also very weak, so it is not easy to improve the position.

35... ♕f8

36. ♖g4 [36. ♕c7 36... ♕b4+ (36... ♖e6 Volodia) 37. ♖c2 d3+ This move is risky because it gives the c3 square away. 38. ♖c1 ♕c5 39. ♖g2 ♕d4 (39... ♕e3+ 40. ♖xe3 fxe3 41. ♕xe5 d2+ 42. ♖c2+ —) 40. ♕a5 ±]

36... ♖d6 [36... ♕b4+ 37. ♕xb4 ♖xb4 38. ♖gh4 White finally gets activity. (38. ♖h6) 38... ♖xg5 39. ♖h8+ ♖f7 40. ♖3h7+ ♖g7 41. ♖xg7+ ♖xg7 42. ♖h5 ♖f6 43. ♖h6+ ♖g5! Volodia. with the idea to bring the king to g3. 44. ♖xc6 ♖h4! ? —]

37. ♖c2 White didn't fall for the trap. .. [37. ♕c7! 37... c3+! 38. bxc3 (38. ♖c2 38... d3+ 39. ♖xb3 c2 —) 38... dxc3+ 39. ♖c2

39...♖d3+! 40.♔c1 c2--]

37...♖d7 38.g6 ♖db7 39.♙e1 [39.♖g5 39...♙g7∞; 39.♙d8 with the idea Bf6 but when the white bishop moves away from the e1-a5 diagonal Black gets tactical ideas: 39...d3+ 40.♔c1 (40.♙c1

40...d2+! 41.♙c2 (41.♙xd2 41...♖d7+) 41...♖xb2+ 42.♙xb2 ♖xb2+ 43.♙d1 c3 44.♙e2 ♖b1--+) 40...♖xb2+ 41.♙xb2 ♖xb2+ 42.♙e1 (42.♙c1 42...♙a3--+) 42...c3 43.g7 ♖b1+! 44.♙f2 ♙c5+ 45.♙g2 ♖g1+--]

39...c5 Advancing the central pawns and getting possibilities of attacking the g6 pawn from b6 in the future.

40.♖gh4? More accurate was [40.♖g2! with the idea Kc1-Rc2! 40...♖d3 with the idea Rbb3. (40...c3 41.bxc3 ♖a3 42.♙d3 ♖xa4 43.♙b2 ♖a2 44.♖hh2± White gets control over the light squares.) 41.♙f2 (41.♙c3 41...dxc3 42.♙xc3 ♙g7 43.♖g5 ♖e7 44.b3 ♖e3! Volodia 45.bxc4 ♖e2+↗) 41...♖db3 (41...♖e3? 42.♙g4 ♖xe1 43.♙f6+ ♙g7 44.♖h7+ ♙xf6 45.♖xb7+--)]

40...♙g7 Now the white rooks are very limited.

41.♙a5

41...c3! ↑ Black overtakes the initiative.

42.bxc3 ♖a3 43.cxd4 exd4 [43...cxd4!? was the alternative to keep the passive rooks on the h-file.]

44.♖xf4 ♖a2+ [44...c4 45.♖f7! ♖a2+ 46.♙c1 ♖a1+ 47.♙c2= (47.♙d2!?)]

45.♔d3 ♖b1 Black already has the initiative, so now White must play very accurately. The easier option for Black was [45...c4+ 46.♔xc4 ♖xa4+ 47.♔d3 ♖xa5 48.♖f7 ♖b1 49.♖h1 (49.♔c2 49...d3+!)]

46.♖h1

46...♖xa4! Once again Spassky does not hurry with recapturing the piece! He wants to play for activity. [46...♖aa1? 47.♖f5! ♖xd1+ 48.♖xd1 ♖xd1+ 49.♔e2 ♖c1 50.♔d2 ♖c4 51.♔d3 ♖xa4 52.♖xc5 ♖a3+ 53.♔e2±]

47.♔c2?! Probably more accurate was [47.♔d2 47...c4+ 48.♔e2 (48.♔c2 48...d3+) 48...♖a2 49.e5! A strong move which helps White activate his rook with tempo. 49...♔xe5 50.♖e4 c3 51.♔xc3 ♖xd2+ 52.♔xd2 dxc3+ 53.♔c2 ♖xh1 54.♖xe5=]

47...♖b5

48.e5? White could try to save the position after [48.♔c7

48...c4 49.♖f5 (49.e5 49...♖a2+ 50.♔c1 d3—+) 49...♖a2+ 50.♔c1 ♖a1+ (50...d3 51.♖xb5 axb5 52.e5! That's why White should play 48. Bc7, not 48. Bd8. 52...b4 53.♔b1∞) 51.♔c2 (51.♔d2 51...♖bb1) 51...d3+ 52.♔d2 ♔d4! 53.♖xb5 axb5 looks bad for White.]

48...d3+ is the most practical way, but Black could probably win after [48...♔xe5 49.♖e4 c4 50.♖xe5 ♖xe5 51.♔b6 ♖e2+ 52.♔b1 ♖b4+—+ or; 48...♖bxa5 49.e6 c4 50.e7 d3+ 51.♔d2 ♖a2+ and White is losing the e-pawn.]

49.♔xd3 ♖xf4 50.♔c3 ♖xf3+ 51.♔e4 ♖g3

52.♔f4! [52.♔f5 52...♖b1—+]

52...♖xg6 53.♔e3 The tide has turned, but Averbakh also understands that his last chance lies in active play.

53...♖b8 54.♔f5 ♖f8 55.♖h5 Objectively Black should win but we will see that it is not an easy task.

55...♖e8 [55...♔f7 with the idea of activating the king. 56.♔e4 ♔e6 57.♔xg7+! ♖xg7 58.♖h6+ ♔e7 59.♖xa6 with a draw.]

56.♔e4 White is trying to hold the position thanks to his active pieces!

56...♖g1 57.♖h3 ♔f8 [57...a5 58.♔xg7 ♔xg7 59.♔xa5 should

be an easy draw.; 57...♖e1? 58.♙xe1 ♖xe5+ 59.♚f4 ♖xe1 60.♖g3]

58.♚d5 ♖d1+ [58...♖d8+ 59.♘d6 (59.♚e4 59...♖g4+ 60.♚e3 ♚f7 and Black's task is easy here as the king goes to e6.; 59.♚c6 59...♖g6+ 60.♚c7 ♖d1+ The white pieces lost coordination and Black can try to bring the king to e6.) 59...♖d1+ 60.♚xc5 ♙xd6+ 61.exd6 ♖1xd6 (61...♖8xd6--) 62.♖h8+ ♚f7 63.♖xd8 ♖xd8 64.♚b6 ♖d6+ 65.♚b7 ♚e6 66.♙a5 ♚d5 67.♙b6

67...♖d7+! 68.♚xa6 ♚c6 White is in zugzwang and not able to bring the king to the a8 corner.]

59.♚e4 ♖c1 60.♚d5 ♖d1+ 61.♚e4 ♖d7 Black has no idea how to convert his material advantage. [61...♚f7 62.♖h7+ ♚e6 63.♖a7+]]

62.♘h6+!? [62.♖g3+ 62...♚f7 63.♖f3 ♚e6 64.♖g3 threatening Rg6.]

62...♙xh6 63.♖xh6 ♖h7 [63...♖a8 64.♖c6=]

64.♖g6+ ♚f7 65.♖f6+ ♚e7

66.♖c6 White could also make a draw after [66.♖xa6 66...♖h4+ 67.♚d5 ♖d8+ 68.♖d6! (68.♚xc5?? 68...♖c8+ 69.♖c6 ♖xc6+ 70.♚xc6 ♖c4+--+) 68...♖c8 69.♖e6+ (69.e6?? 69...♖h5+ 70.♙e5 ♖d8 71.♖xd8 ♚xd8 72.♚d6 c4--+ The c-pawn will promote.) 69...♚f7 70.♖f6+=]

66...♚d7 67.♖xc5 ♖h6 68.♚d5 ♖b6 69.♙a5 ♖b5 70.♖xb5 axb5 71.e6+ A nice move, but not the only one. [71.♚c5= ; 71.♙b4 71...♖c8 72.e6+ ♚e8 73.♙c5= (73.♙d6?? 73...♖d8 with Rxd6 next.)]

71...♖xe6 72.♚c5 ♖e5+ 73.♚b6

And Black is not able to improve his position without losing the b-pawn, so the position is drawish. What a great game by Aberbakh (who is the oldest alive grandmaster nowadays!) and Boris Spassky. My first coach, the Russian Vladimir

Shiskine, told me that when he worked for the magazine "Sahmatna Nedela" (which doesn't exist anymore) Boris Spassky was the official main editor. One time Volodia asked the former World Champion about this game and Spassky answered "Yes I remember, I was young then and didn't understand chess at all". :-) I think we cannot agree with this! :-) At least he had the necessary skills to change the character of the position... **1/2-1/2**

Editorial Preface

And the winner of the 16th European Individual Chess Championship is Evgeny Najer! The Russian GM was clearly not the favorite with a rating of 2634, but he showed strong and aggressive play and clearly deserved the gold medal with a fantastic score of 8.5/11.

The 2nd place was shared by 3 people: Navara, Bartel and Khismatullin, all with 8/11.

It was a very exciting event with a great fighting last round. In the current issue you will find a few games from the event.

The China-India match ended with a 18-14 victory of China, but again we have to say that both teams didn't play with their best line-ups.

The rapid event "Vladimir Petrov Memorial" was won by Ivanchuk with 9/11. Age doesn't seem to affect the chess legend. 2nd place went to Karjakin and 3rd to Gelfand.

The main organizer of the event, Alexei Shirov, can probably call the tournament a full success, as the average of the Top 10 in the event was higher than the average of the Top 10 in the European Champion which was running at the same time!

In Iceland, the very strong Reykjavik Open has begun, with Mamedyarov, Navara, Eljanov as top seeds. After the first rounds all the favorites are doing well.

The next few weeks seem to be a bit calm when it comes to top chess events, but anyhow there are a lot of opens underway with the participation of Top GMs.

We hope you enjoy the current issue of "Top GM Secrets"!

Two best games of the past week

(1) Najer, Evgeniy (2634)
- Korobov, Anton (2687) [B29]

16th ch-EUR Indiv 2015(10.1),
2015.03.06

GM Csaba Balogh
Best rating: 2672

The European Champion of 2015 is Evgeny Najer from Russia! He was showing great chess during the entire course of the event! We are in the very important penultimate round, when he manages to beat his Ukrainian rival and takes a half point lead ahead of the field, which held out in the last round...

1.e4 c5 2.♘f3 ♘f6 Najer is known to be an excellent theoretician and Korobov tries to lead the game to a less explored territory. However this strategy sometimes backfires, because after White was familiar with the subtleties, Black ended up in an inferior and difficult position...

3.e5 ♘d5 4.♘c3 ♘xc3 [4...e6 is the other main move of this line.]

5.dxc3 ♘c6 6.♙f4 The e5 pawn stands perfectly and that is the key of the position! White enjoys some space advantage because of it and it also restricts the mobility of the black pieces. It is not easy to develop them adequately. The bishop is excellently placed on f4 because it prepares the undermining ideas like d6 or f6.

6...e6 7.♙c4 h6 8.♙e2 White wants to castle queenside. Black cannot launch any dangerous attack there and the rook will be ideally placed on the opened d-file. There was no need to prevent g5, because it seriously weakens the structure, White would quickly get a grip on it with h4.

8...♙c7 9.♙g3 A prophylactical move against the space grabbing move f5 to have the bishop protected to enable to take it en passant.

9...b6 10.O-O-O ♙b7 Black continues the development and intends to castle queenside as well.

11.♙d2! Simple and strong! White doubles his rooks on the opened file, puts pressure on the backward d7 pawn and prevents Black's undermining plans with d6 or d5.

11...O-O-O 12.♙hd1 ♙b8 13.♙a6! I like the trade of the light

squared bishops a lot. The black one was well placed on the the long diagonal and it also guards the king, while the white one was not doing much on c4. Another idea to improve could have been Bd3-c4, but Bd3 would have temporarily closed the d-file, which allows Black to free his position with d5 exd6 Bxd6.

13...♘e7 14.h4! Another strong positional move! Quite typical at this pawn structure. White grabs space on the queenside with h4-h5 against which Black cannot defend. h5 would give up the g5 square, while g6 weakens the h6 pawn after Bf4 and Qe3.

14...♖a8 15.♖b1 In the Sicilians it is always useful to place the king to b1. White leaves from the potential Bg5 ideas after pushing h5. It is important to mention that White keeps the tension of the light squared bishops, he invites Black to take on a6 but after Qxa6 he cannot kick out the annoying queen with Qb7 or Qc8 because it costs to the d7 pawn.

15...♔c8 Black forces the exchange, but at least White had won a tempo with his patient play..

16.♘xb7+ ♔xb7

17.h5! Thanks to the advance of the pawn to h5, Black suddenly got two more backward pawns on g7 and f7 (next to the d7), which can be attacked quickly by Qe4-g4-f4.

17...♖hg8 18.♔e4 This position is a disaster, especially for such an active player like Korobov. Black is lacking any active plans and he is obliged to suffer without any useful moves..

18...f5 Searching for some counterplay, but it does not change anything about the evaluation of the position. [Waiting with 18...♖b8 would have strongly been met by 19.♔h7! threatening with Rxd7!; Preventing Qh7 with 18...♖h8 A strong plan is 19.♘h4 ♘xh4 20.♔xh4± trading the bishops. Now even the dark squares are vulnerable. White could continue with Qf4 and after Rhf8 Rd3, followed by Nd2-c4-d6 and rook to g3 or f3. Black collapses soon.]

19.exf6 ♘xf6 [19...gxf6 is more logical to build the center, but it has a drawback as well, namely the h6 pawn becomes very weak after 20.♔e3! ♖h8 (20...♘f8 loses nicely to 21.♔xe6!+- using the disconnection of the black rooks.) 21.♘h4!+- and Ng6 next.]

20.♘d6 [20.♘h4!? looked quite strong as well, trading the bishop which keeps the black position together. 20...♘xh4 21.♘xh4±]

20...♖ge8

21.♖d3! Very well played positionally again! White cleans the d2 square for the knight from where it is heading to its final destination of d6.

21...e5 It is very difficult to suggest something clever for Black. In a bad position all moves are bad.

22.a4 [22.♘d2 should have been played right away.]

22...♞e6 [Black could have had a sudden chance to create some complications with 22...♘b4!? although it does not solve the problem, but at least it causes White some headache, that perhaps he has missed this move... 23.♞e3 (On 23.♞xb7+ 23...♙xb7 24.cxb4 e4 is the point and suddenly it is not so clear.) 23...♞xe4 24.♞xe4 ♘c6 25.♘d2± White keeps his big positional advantage. He plays Rg4 and Ne4 next, but trading the queens seems to easen Black's defensive task a bit.]

23.♘d2! ♞de8 24.f3 Najer does not decide yet to install the knight to e4 or c4. One looks better than the other... [24.♘c4 was also possible because 24...♘a5 does not work concretely: 25.♞xb7+! ♘xb7 (25...♙xb7 26.♘xa5+ bxa5 27.♙xc5) 26.♙c7!+- A nice move which wins the d7 pawn!]

24...♘a5

25.b4 A very logical move again! All the white pieces are excellently placed. The position asks for widening the initiative by opening a new front. It is clear that Black is not prepared to treat this problems with his poor rooks on the e-file and the with the bishop on f6. [25.♞d5+- was also very

strong to keep the queen on the board and further strengthen the position with Qe2 and Ne4, executing the final blow a bit later.]

25...♞xe4 26.♘xe4 ♘c4 [26...cxb4 27.♙xb4+- wins the d7 pawn.]

27.♙a2! A strong prophylactic move before opening the b-file too prematurely. [27.bxc5?! 27...bxc5 28.♙xc5? would have dramatically changed the position after 28...♞b8+! and suddenly the white king gets under an enormous attack... 29.♙c1 (29.♙a2 loses on the spot to 29...♞b2+ 30.♙a1 ♞a6+-) 29...♞a6± Black overtakes the initiative.]

27...♞c8 Korobov decides to sacrifice a pawn in his cramped position and hopes to find counterplay with his nice knight on c4. [27...cxb4 28.cxb4 followed by Kb3 looks horrible as well.]

28.bxc5 bxc5 29.♙xc5 ♞b8? [The last chance was 29...♞ec6! 30.♙f2 d6 but White retains a big advantage after 31.♞b1± However, Black can at least continue fighting, whereas in the game it was not possible. The extra pawn with the doubled c-pawns are not a decisive advantage yet. White's advantage rather lies in his superior pieces.; 29...♞a6 30.♞xd7 ♞b8 31.♙b4 ♞xa4+ 32.♙b3]

30.♞b1! White trades the active rook which could have created some counterplay and the d7 pawn becomes

undefendable, which means the end of the game. With a single rook and the knight Black is unable to create any serious threats...

30...♖xb1 31.♔xb1 ♖a6 32.♔a2!? Najer does not want to give any chance and frees his king from the back rank. [However there was nothing wrong with 32.♖xd7 32...♖xa4 33.♕f8+-]

32...d6 33.♕xd6 ♖xa4+ 34.♔b3 ♘b6 35.♕f8 ♖a1

36.c4! The last accurate move! White starts to advance his passed pawn and suddenly it is not easy at all to stop it.

36...♖b1+ 37.♔a2 ♖h1 38.c5 ♘c4 39.c6 ♔b8 40.♖c3 Black resigned! [40.♖d7+- was also over.; 40.♖c3 40...♘b6 41.c7+ ♔c8 42.♘d6+ ♔d7 43.c8=♖+ ♘xc8 44.♖xc8!+- (But not 44.♘xc8?? because after 44...e4! 45.♖c4 e3 suddenly it is completely unclear.)] **1-0**

(2) Bartel, Mateusz (2631) - Nepomniachtchi, Ian (2714) [B51]

16th ch-EUR Indiv 2015(11.3),
2015.03.08

GM Arkadij Naiditsch
Best rating: 2737

We are in the last round of the ECC and both players are on a score of +4 which is enough to qualify for the World Cup, but knowing Bartel and Nepomniachtchi we could be sure we would get a fighting game instead of a short draw. The young Russian was leading the tournament for quite a while, but a loss to Navara dropped him back so he could only fight for the 2nd-3rd placed with a win. To play Bartel is never easy, as we sometimes see the Polish player lose to anyone in 20 moves with White, or he can have great games and win against almost anybody.

1.e4 c5 A sign that it is going to be a fighting game!

2.♘f3 d6 3.♕b5+ Maybe a sign that Bartel is happy with a draw?! 3.Bb5 is counted as a very safe move, but it seems to give Black more or less equal play.

3...♘c6 [3...♕d7 is the main reply here.]

4.O-O ♕d7 5.♖e1 a6 6.♕xc6 is a rather rarely played line, much more popular is 6.Bf1.

6...♕xc6 7.d4 cxd4 8.♘xd4 It is never great to give away a bishop in the Sicilian, but White sort of gained a tempo. Of course according to theory Black is OK here.

8...♕d7 is a very rare move. The usual reply here is 8...Nf6 or 8...Rc8.

9. ♘g5! A good reply by Bartel! Black can't get the knight from g8 that easily into the game now. [In case White would continue with the simple 9. ♖c3 9... ♗f6 10. ♘g5 Black would be in time now to develop with 10...e6 and his position is very solid.]

9... ♗f6 I am not sure about this move at all. [Maybe Black should have tried something "crazy", which actually would perfectly fit Ian's style. 9...h6 10. ♘h4 g5 11. ♘g3 Of course it looks very dangerous to weaken the pawn structure that much when the king is still on e8 and the pieces are still undeveloped, but Black has the bishop pair, something we should not forget about. 11...h5! The key move! (After the usual 11... ♘g7 12. ♗c3 followed by Nd5 or Nf5 or even e5. White is better.) 12.h3 e5! playing against the g3 bishop. The position is very complicated.]

10. ♘xf6 Of course White takes the chance to give Black a "bad" pawn structure.

10...gxf6 11. ♗c3 We often see this kind of structure in the Rauzer, but somehow now it looks like White is at least a few tempos up. In case Black would manage to develop and maybe castle kingside, things would be fine, but White is very active now and will have direct threats already in couple of moves from now.

11...e6

12. ♕h5! The white queen is perfectly placed on h5, also preventing Black from playing Qa5 himself.

12... ♘g7?! Black is looking for trouble. Now the d6 pawn is also getting weak. [Black could have tried to activate his rook over c5: 12... ♖c8 but White has the very interesting 13. ♗f5!? ♖c5 and the second knight is joining the attack. 14. ♗d5!? None of the knights can be taken and I guess that because of Black's very poor development we could say that White at least has a strong initiative.]

13. ♖ad1 White brings the last piece into the game and the white rooks can always be transported to the nice g3 square over the 3rd rank.

13... ♖c8?! and after this logical move Black's position is just lost! [It is already not that simple to find a "good defense" against White's Nf5, but maybe Black could have tried 13... ♕c7 14. ♖d3 (Whites can also consider playing 14. ♗f5 14...exf5 15.exf5+ ♕f8 16. ♖e7! ♕xe7 17. ♗d5+ ♕d8 18. ♗xc7 ♕xc7 19. ♕xf7 ♖hg8 and we have a strange position, with queen against rook+2 bishops, but both bishops are passive and the black king is still under attack. It is quite sure that White is not worse, but it is hard to tell if he is better!) 14... ♕c5 Black's position is still very dangerous, but at least things are not that clear.]

14. Nf5! Bartel doesn't miss his chance for this typical tactical blow.

14... exf5 Black has no choice but to take on f5.

15. exf5+ Kf8 and here comes the move that Black probably missed:

16. Ne4! White wants to play Nxd6, attacking the f7 pawn and the rook on c8.

16... Kc6 It is already hard to give Black any advice... There is no good way to defend from Nxd6.

17. Nxd6 Kc7 At least Ian found a way not to get mated on the spot.

18. Rxc8 Kxc8 White has a rook and 2 pawns against the black bishop pair, where the g7 bishop is more looking like a pawn. White is clearly close to winning here.

19. Rd4 Kc7 20. Qd1 Rd8 is a deadly threat.

20... Kh6 21. h4! Stopping Black from playing Kg7 because of Qg4 check and the threat of playing Rd8 followed by Qg4.

21... Ka5 Black is looking for chances, attacking the f5 pawn and making the rook on e1 feeling observed.

22. Rd8+ Bartel continues his good play and it is easy to see why, as a win would give him a chance to get a place on the

podium!

22... Kg7 23. Kg4+ Kg5 Now that the bishop on g5 is pinned White is simply collecting the material.

24. Rdd1! So far Bartel played a perfect game! The bishop on g5 can't be rescued and it seems like the game is almost over.

24... h6! I can't say that Black has any chances to save the game, but from a practical point of view this is clearly the best chance. At least the rook from h8 gets into the game and the black king on g7 has a safe position.

25. a3 Bartel continues choosing the most safe moves. Why give the a2 pawn away?! :)

25... Kc7 26. Kg3 protecting the h2 square, just in case.

26... Ka5 and again the f5 pawn is under attack, so White needs to think about what to do next.

27. f4?! From a practical point of view this is clearly a bad decision. The white king's position is getting very open now and there was no reason at all for such risky action. [After a simple move like 27. hxc5 27... hxc5 28. Re7 White is a full exchange up! 28... Kxf5 29. Kb3 Kg6 The black queen is getting to h5 which looks dangerous, but in fact it is just nothing. 30. Rd4 Kh5 31. f3 and Black doesn't have anything more than one check on h1. White is totally winning.]

27...♔c5+ Black is planning a very nice tactical blow...

28.♖e3 Of course it is not pleasant to put the king on the h-file after which hxg5 would already not be a threat anymore.

28...♗xg2! and this is clearly the move Bartel missed. The bishop on g2 can't be taken!

29.fxg5 The bishop on g5 has to be taken sooner or later... [29.♔xg2? 29...♗xc2+ and Black is winning the d1 rook.]

29...hxg5 The g2 bishop is still untouchable.

30.hxg5! Bartel shows great nerves and exact calculation in such an important game! The white king is totally "naked" but the black king is also getting under attack now.

30...♖h1+ It is hard to say if White calculated it all or if he was just a bit lucky, but Black is losing by force now, if White finds the only move... [In case of 30...♗e4 31.gxf6+ ♔xf6 White can enter a winning endgame after 32.♗d6+ ♗xd6 33.♖xd6+ ♔xf5 34.♖d4 and some technique is still needed to win the game, but objectively the position is of course winning.]

31.♔xg2

31...♗c6+ Black is fighting ! [31...♖xd1 32.gxf6+ ♔xf6 33.♗h4+ leads to mate in a couple of moves.]

32.♖f3! The only winning move!

32...♖xd1 [Now Black can't play 32...♗xc2+ because the rook on h1 is hanging. 33.♔xh1]

33.gxf6+ ♔xf6 White is only a pawn up, but now it is Bartel who starts to mate his opponent's king.

34.♗h4+ ♔g7 35.f6+! Once again the only winning move for White! It was not too hard to find this one, but to see all this before playing 30. hxg5 is everything but easy...

35...♔g8 [White is also easily winning after 35...♔g6 36.♗g4+ ♔h6 37.♗g7+ ♔h5 38.♗xf7+]

36.♗g3+ ♔f8 Maybe somebody else would just play 37. Qg7 followed by Qg8 here, with a win of the f-pawn, but not Bartel! He finds a very beautiful mating idea!

37.♗b8+ ♗e8

38.♖h3! Black has no defense against Rh8. What a beautiful mating idea!

38...♞d2+ 39.♚f3 We just saw a great game by Bartel and of course clearly not the best game of Nepomniachtch, who was practically lost after just 14 moves! Anyhow, this win gave Bartel the bronze medal and good prize money, while Nepomniachtchi was very lucky to take one of the last places to qualify for the World Cup 2015 in Baku. So it was actually a happy end for both players! :) **1-0**

The K-Files.

QGA 3.e4 b5 4.a4 c6 5.axb5

GM Alexander Khalifman
FIDE World Chess Champion (1999)

Best rating: 2702

(3) QGA 3.e4 b5 4.a4 c6 5.axb5 [D20]

1.d4 d5 2.c4 dxc4 3.e4 b5 4.a4 c6 5.axb5 cxb5 6.♘c3 The main critical line of the whole system was invented by Alex Yermolinsky in 1993. Suddenly the b5 pawn is not so easy to defend. [6.b3 Together with the exchange on b5 this is not dangerous for Black. Even more - in some lines it's quite unclear who is playing for advantage. 6...e5 (6...a5 This move was played already in 1620. It's great to know it but not to repeat. 7.bxc4 b4 8.♘f3 (8.d5 8...e6 is not so clear. Greco - NN Italy 1620) 8...e6 9.c5 ♘f6 10.♘e5!± and Black's passed pawns are not important at all.) 7.bxc4 This move is actually an exchange sacrifice. The quiet and sound alternative is (

a) 7.♘f3 exd4 8.bxc4 (8.♞xd4 8...♙d7 9.bxc4 ♘c6 10.♞d1 ♙b4+ 11.♙d2 ♙xd2+ 12.♘bxd2 b4↔) 8...b4 - 7.bxc4;

b) 7.dxe5 ♞xd1+ (7...♙b4+ 8.♙d2 ♙c5 is recommended by the engines on moderate depth. However. White has the strong response 9.♘c3! b4 10.♘a4 ♙d4 11.♙xc4 ♙xa1 12.♞xa1±) 8.♞xd1 ♘c6 This is why the exchange on b5 was not in time. Black has absolutely no problem now. 9.♘f3 ♙g4

10.bxc4 ♖xe5 11.♗d2 bxc4=;

c) 7.d5?! ♗f6 and somehow there is no convenient way to defend the e4 pawn. 8.♞f3?! Mamedyarov - Nakamura Dubai blitz 2014 (8.f3 Gritus - Becko Slovakia 2010 8...♗xe4!—+) 8...♗c6!! 9.dxc6 ♗g4—+ OK it was only blitz but still it doesn't happen everyday when top grandmaster gets such a bad position with White in just 8 moves.)

7...b4!? In fact this position is a very special one. Frankly speaking I can't remember any other theoretical line where the 7 first moves were played by pawns only!!!

(After 7...♗b4+ 8.♗d2 ♞xd4 9.♗xb4 ♞xa1 Gartner - Vegh Budapest 1997 10.cxb5 White's compensation wouldn't be underestimated but at the same time it's hard to believe it can be enough for more than equal chances because White is not well-developed yet. 10...♗e6 (10...♞d4 11.♞xd4 exd4 12.♗f3) 11.♗f3 ♗d7 12.♗e2 ♞b2∞) 8.♗b2 exd4 9.♗f3 Kasparov - Bankers Trust London simul 1993 and now Black had to find the strong maneuver 9...♗e7! 10.♗d3 ♗ec6 11.♗bd2 a5=]

6...a6! and this is the move which has given a new start to the whole system. Well it must be said that it was played before but not in connection with the correct plan. [6...♗d7 This was the old main line. However, it doesn't look very impressive.

7.d5! In my opinion the most promising way. It's not so easy for Black to complete his development now. (7.♗f3 is the most popular move. But after 7...e6 8.♗e2 ♗f6 (8...♗b4 9.O-O ♗e7 10.d5 O-O 11.dxe6 fxe6 12.♗e5 Thomsen - Cipka corr 2008) 9.O-O ♗b4! (worse is 9...♗e7 10.d5!± Yermolinsky - Zaltsman St.Martin 1993) 10.♗g5 h6 11.♗xf6 ♞xf6 12.♗e5 Tonoian - Guliyev, N Moscow 2012 12...♗xc3 (12...♞d8) 13.bxc3 a6∞ it's quite clear that White has compensation for the pawn but is it enough for an advantage?) 7...a6 (7...e5 gives back the gambit pawn but doesn't solve the problems. 8.dxe6 ♗xe6 (8...fxe6 9.♗xb5! ♗b4+ 10.♗c3± Scharrer - Tennstedt Bad Woerishofen 2013) 9.♞xd8+ ♞xd8 10.♗xb5 ♗b4+ 11.♗d2± and Black's weaknesses are difficult to defend. Wang - Lakdawala Los Angeles 2010) 8.b3! N This is of not a human decision but it doesn't become weaker because of this. (8.♗f3 8...e6 9.♗e2 ♗c5 10.O-O ♗e7∞ is less clear.) 8...b4 (8...e5 9.bxc4 b4 10.♗a4 ♗xa4 11.♞xa4+ ♞d7 12.♞a5 ♗f6 13.♗f3 ♗xe4 14.♗e3±) 9.♗a4 c3 10.♗e3 The protected passer on c3 looks great. However, it doesn't help Black to develop his kingside, and this is a huge problem. Black is already in real trouble as the following lines show. 10...e6 (10...♗xa4 11.♞xa4 e5 12.dxe6 ♞xd1+ 13.♞xd1 fxe6 14.♗f3±; 10...♗f6 11.♗b6 ♞a7 12.♗c4 ♞b7 13.e5±) 11.♗b6 ♞a7 12.♗f3 ♗f6 13.♗e5±; 6...♗b7? is simply bad. 7.♗xb5 ♗xe4 8.♗f4 (8.♞g4 8...♗c6) 8...e5 9.dxe5± Ress - Ovcjak corr 2013 9...♗b4+ 10.♗d2 ♞e7 11.♗c3 ♗c6 (11...♞xe5 12.♞e2+—) 12.♗f3]

7.♗xb5 White has to accept the challenge. The modest positional play doesn't promise anything. [7.d5 7...♗b7 8.♗f3 e6 9.♗g5 ♗f6=+]

7...axb5 8.♞xa8 ♗b7 This idea has already become quite standard, especially after Topalov's spectacular wins in Chebanenko Slav in 2006. However, in that game White's dark-squared bishop was placed on h4 or exchanged. So the

idea Bf8-b4+ was something like a direct threat. Here Black's ideas are rather different and engines are not very optimistic about the compensation. So it took time to understand that this line might be really playable.

9.♖a2!? I wouldn't say it's a clear improvement on the traditional 9.Ra1 but in my opinion this unusual retreat promises a clear advantage for White without serious risks and from a practical point of view it's preferable. The rook looks a bit strange here as it invites the knight to jump to b4 with tempo. However, the Nb8-c6-b4 maneuver is not so universally useful for Black and also White is intending to play b2-b3 as soon as possible after which the rook is quite good on the 2nd rank. This move was never played in OTB chess yet and a few correspondence games couldn't clarify the evaluation so far. [9.♖a1 This natural move was played almost automatically before but it may be not the strongest. 9...e6 The key move which gave a new life to the whole system. (9...♙e4?! was played in the only game where this position happened before 2014. Ammann - Costa Switzerland 1993 However, it is met by the nice tactical refutation 10.f3 ♙d5 11.b3± e6 12.bxc4 bxc4 13.♙xc4! ♙b4+ 14.♖f2 ♙xc4 15.♞a4+ ♗d7 (15...♞d7 16.♞xb4 ♞xd4+ 17.♙e3 ♞xa1 18.♞xb8+ ♗d7 19.♞b7+-) 16.♗e2 ♙xe2 17.♞xb4 ♗e7 18.♖xe2 O-O 19.♙g5 and Black's compensation for the exchange is clearly not enough.) 10.♗e2!? is a very interesting new move by Adhiban although he completely misplayed some next moves. (

a) 10.♗f3 Here the knight doesn't attack the important squares e4 and d5, so Black gets sufficient compensation after 10...♗f6 11.♙e2 (11.e5 11...♙xf3 12.gxf3 ♙b4+ 13.♙d2 ♗d5 is OK for Black as well.) 11...♗xe4 (11...♙b4+ 12.♙d2 ♙xd2+ 13.♞xd2 ♗xe4 Mamedyarov - Kasimzhanov Baku 2014 14.♞e3+= is less accurate in my opinion.) 12.O-O ♗c6 (12...♞d5 13.b3!?) 13.♙e3 ♞d5 Heimann - Godena

Ruzomberok 2014 and now (13...♙b4!?) 14.♗e5!? ♗xe5 15.dxe5 ♗c3 16.♙f3 ♗xd1 17.♙xd5 ♗xe3 18.♙xb7 ♗xf1= leads to a drawish endgame.;

b) 10.f3 The most natural and popular move. 10...♗c6 is more solid and leads to "human" play. (The hyperadventurous 10...f5 leads to big complications. 11.♗h3!? was successfully tried in Shirov - Sulskis Finland 2015 but its consequences are not clear after (

b1) 11.exf5 ♗c6 (11...♗e7 is less accurate. 12.♖a7!? It's a good moment for counter-sacrifice! 12...♞b6 13.♞xb7 ♞xb7 14.fxe6± Gharamian - Cornette Nimes 2014) 12.fxe6 ♗ge7 is absolutely crazy. Despite White's massive material advantage the assessment is far from clear.;

b2) 11.g3!? is another interesting setup. 11...♗c6 (11...fxe4 leads to a long forced line which is quite favorable for White. 12.♙g2 ♗f6 13.fxe4 ♙b4+ 14.♙d2 ♞xd4 15.♙xb4 ♞xb2 16.♙d2 c3 17.♞c1 ♙xe4 18.♙xe4 ♞xd2+ 19.♞xd2 cxd2+ 20.♞xd2 ♗xe4+ 21.♖e3 ♗d6 22.♗f3+=) 12.♗e2 ♗a5 13.♙g2 ♗b3 14.♞b1 ♙b4+ 15.♗c3 ♞b6 and Black has certain compensation for the exchange.)

11...fxe4 12.fxe4 ♗f6 13.♗g5 ♗c6 (13...♙b4+?! was played in the above-mentioned game. 14.♙d2 ♙xd2+ 15.♞xd2 O-O 16.♗xe6 ♞e7 17.♗xf8+-) 14.♗xe6 ♙b4+ 15.♙d2 ♞e7 16.♙xb4 ♗xb4 17.d5 ♗xe4) 11.♗e2 (11.♙e3 wasn't tested yet most probably due to 11...♙b4+ 12.♖f2 f5! 13.d5 f4! 14.♙xf4 ♙c5+ 15.♖e1 (15.♙e3 15...♙xe3+ 16.♖e3 ♞b6+ 17.♖d2 exd5 18.exd5 ♗d4+) 15...exd5 16.♞xd5 ♞b6 and White faces serious problems.) 11...♙b4+! A real improvement played by Edouard. (

b1) 11...♗f6 Now Black doesn't have the important resource f7-f5 so his compensation might disappear step by step. 12.♙e3 ♙b4+ 13.♖f2 O-O 14.b3± Parligras - Thesing Germany

2014;

b2) 11...♖a5 Moving knight to b3 is an interesting positional idea but it turns to be too slow. 12.♗c3 ♕b4 (12...♞b6? is simply bad because of 13.♗xb5! ♞xb5 14.♞a4 ♞xa4 15.♞xa4 ♗c6 16.♕e3 ♕d6 17.♕xc4± and White even managed to lose this endgame in Goganov - Tabatabaei Moscow 2015.) 13.♞f2 ♞b6 14.♕e3 (14.♗xb5 14...♞xb5 15.b3 ♗xb3 16.♞b1 ♞a5 17.♕xc4 ♗xc1 18.♞xc1 ♗e7) 14...♗b3 15.♞a2 ♗e7 16.♗xb5 ♞xb5 17.♞c2 O-O 18.♞xc4 ♞b6 19.♞b5 ♞xb5 20.♕xb5± and although this position is not that bad for Black as in Goga's game it's still very unpleasant.)

12.♕d2 (

b1) 12.♞f2 f5 with the white king on f2 it might be called the typical reaction. 13.exf5 (13.♗f4 13...fxe4 14.♗xe6 ♞d7 15.d5 ♗d8) 13...♗ge7 14.fxe6 ♗f5 and it's rather White who is in danger.;

b2) 12.♗c3 ♞b6 13.d5 ♗d4

12...♗ge7 Still keeping f7-f5 in mind. 13.b3 (13.♕xb4 13...♗xb4 14.♗c3 ♞b6 15.♗xb5 at this moment doesn't promise any advantage. 15...♞xb5 16.♞a4 ♞xa4 17.♞xa4 ♗c2+ 18.♞f2 ♗xd4 19.♕xc4 O-O (19...♗ec6 20.b4) 20.b4 ♞b8 21.♞d1 e5=) 13...O-O 14.bxc4 bxc4 15.♕xb4 leads to the long and forced line shown by GM Deviatkin in his deep annotations to the above-mentioned game. (

b1) In the game Javakhishvili - Edouard Gibraltar 2015 White went clearly wrong with 15.♞f2?! 15...f5! 16.♗f4? ♞xd4+ 17.♕e3 ♞b2+ 18.♕e2 fxe4±;

b2) 15.♞c1!? This tricky move might be critical although it's still unclear what exactly White intends to do to develop his kingside. 15...♞b6 16.♞b1 ♞b8 (16...♕a6 17.♞f2 ♗e5 18.♗f4 ♞xd4+ 19.♕e3 ♞d6 20.♞d1) 17.♞f2 ♕a6∞)

15...♗xb4 16.♗c3 ♗ec6! 17.♕xc4 ♗xd4 18.O-O ♗bc2 19.♗b5 ♗xa1 20.♗xd4 ♞b6 21.♞xa1 ♞a8! 22.♞c3 ♞d8 23.♞d1 e5 24.♞b3 ♞xb3 25.♕xb3 ♞xd4 26.♞xd4 exd4 27.♕c4 ♞f8= and Black will hold this endgame easily.) 10...♕xe4 is the only critical answer. The alternatives don't impress at all. (

a) 10...♗c6 11.d5 exd5 12.exd5 ♗b4 13.♗c3±;

b) 10...♗f6 11.f3 ♕b4+ (11...♗c6 12.♕e3 ♕b4+ 13.♞f2±) 12.♞f2 O-O 13.b3±)

11.♗c3N This is the move to play although its main idea is not so easy. (11.b3 This is good with the rook on a2 but now 11...♗c6! 12.f3 (12.♗c3? 12...♕b4 13.♕d2 ♕xc3 14.♕xc3 b4± and White is already in trouble. Adhiban - Nakamura Gibraltar 2015) 12...♕d5 (12...♗b4 is entertaining but not completely sound. 13.fxe4 ♗d3+ 14.♞d2 ♕b4+ 15.♞e3±) 13.bxc4 bxc4 14.♞a4 ♕b4+ 15.♕d2 ♕d6∞ gives Black reasonable compensation.) 11...♕c6 (11...♕b4 12.♕e2! and Black's compensation is far from enough in all lines. The white knight is perfectly placed on c3 and the other pieces are quite active. 12...♗f6 (

a) 12...♕xg2 13.♞g1 ♕c6 (13...♕e4 14.♞g5!±) 14.♞xg7±;

b) 12...♗e7 13.O-O ♕c6 (13...♕xc3 14.bxc3 O-O 15.♕a3±) 14.♕f3 O-O 15.♕xc6 ♗bxc6 16.♗xb5±)

13.O-O ♕xc3 (13...♕c6 14.♕f3 O-O 15.♕xc6 ♗xc6 16.♗xb5) 14.bxc3 ♗d5 (14...O-O 15.♕g5±) 15.♞d2 O-O (15...b4? 16.cxb4 c3 17.♕b5+) 16.♞e1 ♞c7 17.♕a3±) 12.♕e2! Here this resource is far from obvious. At the first moment it's not so difficult to understand what for White is giving the very important pawn. However, the roles are changing quickly. White's pieces become active and it's now Black's problem how to complete the development. 12...b4 (12...♕b4 - 11...Bb4; After the immediate 12...♕xg2?! 13.♞g1 ♕c6 14.♕f3± Black gets

even bigger problems.; Rejecting the pawn doesn't look good: 12...♙d6 13.♙f3±) 13.♘b1 ♙xg2 14.♖g1 and now wherever the black bishop would retreat White has a strong initiative. The material is about equal but it happens that Black has other problems. 14...♙c6 (14...♙d5 15.♘d2 c3 (15...♘e7 16.♘xc4 g6 17.♘e5±) 16.bxc3 bxc3 17.♙b5+ ♙c6 18.♙xc6+ ♘xc6 19.♘e4± and White is ready for a decisive attack. 19...♘xd4 (19...♖xd4? 20.♖a8+-- 20.♖a4+-- 15.♘d2 c3 (15...♖c7 16.♘xc4 ♖xh2 17.♖f1±) 16.bxc3 bxc3 (16...♘f6 17.♖b3 g6 18.♘f3 ♙d6 19.♙h6±) 17.♘c4 ♘e7 18.♖b3 ♘f5 19.♖xc3 ♖xd4 20.♙b2 ♖xc3+ 21.♙xc3 f6 22.♘e3± Despite the limited remaining material Black still has to solve the development problems. And his chances to do it are not very high.; The counter-sacrifice 9.♖xb8 9...♖xb8 10.f3 e5 11.b3 ♙b4+ 12.♙f2 as seen in Atalik,S - Pancevski Serbia 2014 can't be dangerous for Black after 12...♖d6! 13.bxc4 (13.d5 13...f5±) 13...♙c5↑]

9...e6 At the first moment it's difficult to understand what Black's compensation for the exchange is. White has a healthy structure and the development is about equal. However, then it becomes clear that the compensation is quite serious. It looks like White has to defend the e4 pawn but the only reasonable way to do it (f2-f3) weakens his kingside and doesn't help the pieces to develop. [9...♙xe4?! is not recommended. 10.f3 ♙d5 11.b3! cxb3 12.♙xb5+ ♘d7 13.♖a6±]

10.♘e2! Moving to an absolutely unexplored zone. In fact this move is a good solid practical choice. With the best defense Black can keep drawish chances but most probably nothing more. White just gives the central pawn in order to organize the important breakthrough b2-b3 as soon as possible. [10.f3 White would like to play b3 without giving the important central pawn. So Black has to do something about it. 10...f5!? N might be an improvement. Now

the play becomes totally chaotic. (10...♘c6 11.b3! seems to be the most dangerous. The critical line is (After the natural 11.♘e2 11...♙b4+ 12.♙d2 ♘f6 13.♙xb4 ♘xb4 14.♖a3 O-O 15.♖d2 ♘c6 16.♖a1 ♖b6 17.♖d1 ♖d8=Black gets good compensation.) 11...♙b4+ 12.♙f2 ♙c5 and now White has a choice: 13.bxc4! looks more promising and after (After 13.♘e2 both 13...f5 (and 13...e5 14.bxc4 exd4=Silva - Kerr corr 2002) 14.bxc4 fxe4=lead to absolutely crazy unbalanced positions where Black's counterchances are not to be underestimated.) 13...♙xd4+ 14.♙e1 b4 15.♖a4+= Black has some compensation but it doesn't look enough as his pieces are not perfectly coordinated.) 11.exf5 (11.♘h3 This is quite strong with the rook on a1 but after 11...fxe4 12.fxe4 ♘f6 13.♘g5 ♘c6 14.♘xe6 ♙b4+ 15.♙d2 ♖e7= it becomes clear that the rook's position on a2 also has certain drawbacks. 16.♙xb4? ♘xb4 doesn't work.) 11...♘c6 12.fxe6 We have a really weird position. White has a huge material advantage and it's still hard to understand what for. So it's quite amazing to see how quickly Black's seemingly undeveloped pieces come into play and create dangerous threats. When both sides play the best moves there are some crazy drawish lines but it's rather White who has to play precisely. 12...♘ge7 (Or even 12...♘h6!? 13.♙xh6 gxh6 14.♘e2 ♙b4+ 15.♘c3 ♘xd4=) 13.b3 ♘d5 14.♘e2 ♘cb4 15.bxc4 ♘xa2 16.cxd5 ♙b4+ 17.♙d2 O-O=]

10...♙xe4 This must be the critical move. [10...♘c6 is met by the strong 11.♘c3! (11.f3 - 10.f3) 11...♘xd4 12.♙e3 e5 13.♖a7! ♖d7 14.♙xd4 exd4 15.♖h5! Once again it's White's turn to sacrifice material. He gets very strong initiative for it. 15...dxc3 16.♖e5+ ♘e7 17.bxc3 ♖c6 18.♙e2 ♙c8 19.O-O ♖b6 20.♖a8 ♖c6 21.♖b8±; Black can force the opponent to play f2-f3 with 10...♘f6 11.f3 but now he doesn't have the important resource f7-f5 anymore. 11...♘c6 (11...♙b4+ 12.♙f2 ♘c6 13.b3 O-O 14.bxc4 bxc4 15.♙e3±) 12.b3!? The basic idea. Now

Black can win the exchange back but this leaves White with an extra pawn and a solid position. 12...♖b4 13.♔d2 ♗d3+ (13...♕a5 14.♙f2 ♕e7 15.bxc4 bxc4 16.♗c3 O-O 17.g3±) 14.♔xd3 cxd3 15.♕xd3 ♕b4+ 16.♗c3 O-O 17.♕e2 ♕a5 (17...♕c7 18.♕d2 ♔d8 19.♗xb5 ♕c1+ 20.♕d1 ♕xd2+ 21.♕xd2 ♕c6 22.♕e2 ♕b6 23.O-O±) 18.♕d2 ♕a1+ 19.♗d1 ♕xd2+ 20.♕xd2±]

11.b3 With the rook on a2 it works fine. The annoying construction b5-c4 is finally destroyed. [Here 11.♗c3 11...♕c6 12.♕e2 b4 13.♗b1 ♕xg2 14.♔g1 ♕d5∞ leads nowhere. So as we can see in some lines the rook's position on a2 has serious drawbacks.]

11...♗f6 seems to be the best answer. Black gives the pawn, which leaves him once again a plain exchange down. However, he completes the development and hopes to create some pressure. The alternatives lead to some kind of one-way street where the best Black can hope for is the endgame with 4 pawns vs. 3 pawns on one side and an exchange down. But even this is not guaranteed. [11...♕d5 12.bxc4 ♕xc4 - 11...Bd3; 11...♗c6 is good enough with the rook on a1 but now after 12.bxc4 ♗b4 13.♔d2 bxc4 14.♗c3± the difference becomes clear.; 11...♕d3 12.bxc4 ♕xc4 13.♔a8! This pin is very annoying. Now it's not so easy for Black to exchange the b5 and d4 pawns. (13.♔b2 13...♗f6 14.♗g3 ♕xf1 15.♗xf1 ♗c6 16.♔xb5 ♕b4+ 17.♕d2 ♕xd2+ 18.♗xd2 ♗xd4 19.♔b2 O-O+= Some accuracy is required but objectively this must be a draw.) 13...♗f6 14.♗g3 ♕xf1 15.♗xf1 ♕d6 16.♗e3 O-O 17.O-O ♕c7 18.h3 ♕c6 19.♕f3±; 11...♕b4+ 12.♕d2 ♕xd2+ 13.♔xd2! Once again White is not satisfied with the massive pawn exchange which might happen if he takes on d2 with the queen. (13.♕xd2 13...cxb3 14.♔b2 ♗c6 15.♗c3 ♕c2 16.♕xb5 ♗e7 17.♕a4 O-O 18.♕xb3 ♕xb3 19.♔xb3 ♗xd4 20.♔b2+=) 13...♕a5 (13...♗f6 14.bxc4 bxc4 15.♕a4+ ♗bd7 16.♕xc4±) 14.♕c1 ♕d5 15.♗c3 ♗e7 16.♔a2 ♕b4 17.bxc4 bxc4 18.♕e2

O-O 19.O-O+= Black played all the best moves and is close to exchange the c4 and d4 pawns, which makes his drawish chances fairly reasonable. But... was it worth it?]

12.bxc4 bxc4 [12...♕b4+ 13.♕d2 ♕xd2+ 14.♔xd2 - 11...Bb4+]

13.♕a4+ ♕c6 [13...♗c6 may seem tempting as Black tries to attack pawn d4 as soon as possible. But his piece construction is rather shaky and White can use it with precise play. 14.♔b2! ♕e7 15.f3 (After the most natural 15.♗c3 15...O-O! 16.♗xe4 ♗xe4 17.♕xc6 ♕a5+ 18.♙d1 ♗c3+ 19.♙c2 ♗a4 20.♕xc4 ♕a8! Black gets a strong attack.) 15...♕d5 16.♗c3 and now Black has several opportunities but none of them promises him enough compensation. Of course converting the material advantage into a full point wouldn't be so easy for White but still... 16...♕d7 is probably the best. (

a) 16...O-O 17.♗xd5 exd5 (17...♕xd5 18.♕xc4±) 18.♕xc6 ♕a5+ 19.♙d1 ♕a1 20.♕b5 ♕a3 21.♔b1 ♕xd4+ 22.♕d2 c3 23.♕d3 ♕a4+ 24.♕c2 ♕xc2+ 25.♙xc2 cxd2 26.♙xd2±;

b) 16...♕a5 17.♕xa5 ♗xa5 18.♔b8+ ♕d8 19.♙f2±) 17.♕xc4 ♕xc4 18.♕xc4 O-O 19.♕e3+=]

14.♕xc4 ♕d6 15.♕a3 The dark-squared bishops' exchange is useful for White to limit the opponent's counterplay. [After 15.♗c3 15...O-O 16.f3 e5! 17.dxe5 ♕xe5 18.♕d3 ♕b7 Black's counterplay is quite annoying.]

15...O-O 16.♕xd6 ♕xd6 17.♕c5 ♕xc5 [17...♕d8 18.f3 ♕d5 19.♔b2± and it's not easy to develop adequate counterplay.]

18.dxc5 ♔c8+= Black's chances to save this endgame are good enough but still he has to work for it. SOME CONCLUSIONS Well in general one can use this old line 3.e4 b5 in rapid chess and/or as a surprise weapon but my intuition tells me that it's not 100% correct from a theoretical

point of view. The only problem is the main line but it's really serious. For White players there are two attractive options and both of them still require practical tests. The basic choice is between 9.Ra1 e6 10.Ne2 and 9.Ra2 e6 10. Ne2. Somehow I still doubt which of them must be preferred. Most probably it's a matter of taste. With the rook on a1 White plays for the initiative but any inaccuracy might cost dearly. The second option just oppositely secures him from any strategical risk but in some lines Black's drawing chances are quite high.

David vs. Goliath

Peter Zhdanov
Chief Editor of Pogonina.com

In this entertaining column we are reviewing the most unexpected results that occurred last week. Players usually face opponents of a similar level. Considerably less frequent are situations when a significantly lower-rated player succeeds in beating a much stronger adversary.

The previous week has brought us 24 upsets. Finally an improvement in quantity!

The number of moves ranges from 23 in Gorodetzky (2210) - GM Kogan (2555), 1-0 to 75 in Kochavi (1607) - IM Chubar (2066), 1-0. The highest-profile loss was GM Melkumyan (2673) - Kraus (2190), 0-1. In fact, Ohad Kraus (born 1995) defeated yet another strong GM -Vladimir Potkin (2605) - as Black. Westreich (1929) prevailed over GM Mikhalevski (2559) with the Black pieces. Now that's a shocking 630 rating points gap!

IM Sipila (2425) gets a special mention for allowing Pogonian (2124) to brutally checkmate him:

Top-10:

Mikhalevski (2559) - Westreich (1929), 0-1, **630** points
 Melkumyan (2673) - Kraus (2190), 0-1, **483** points
 Kochavi (1607) - Chubar (2066), 1-0, **459** points
 Lindstaedt (1446) - Bruening (1891), 1-0, **445** points
 Kali (2089) - Barnaure (2508), 1-0, **419** points
 Potkin (2605) - Kraus (2190), 0-1, **415** points
 Manakova (2318) - Iliagiev (1926), 0-1, **392** points
 Amellal (1953) - Bellahcene (2436), 1-0, **383** points
 Bengherabi (2145) - Haddouche (2524), 1-0, **379** points
 Kali (2089) - Kanmazalp (2457), 1-0, **368** points

Average gap: 437; White won 6 games, Black won 4 games.

You can view all the games in the accompanying pgn file.

If you have ever won a game against someone rated 300 points or above yourself, please send it to peter@pogonina.com for publication. Any additional information (a photo, annotations, etc.) will be appreciated.

(14) Akopian, Vladimir (2660)
- Ipatov, Alexander (2592)

16th ch-EUR Indiv 2015(11.17),
2015.03.08

GM Arkadij Naiditsch
Best rating: 2737

In the current endgame Black is clearly better, even if there are equal pawns on the board. The strong e4 pawn, the weak a4 pawn as well as a very active king give Black good chances for the full point.

51...♔b4! Logical and strong. Getting a passed pawn can't be wrong.

52.g4! An excellent decision by Akopian. White is not only exchanging a pawn, but also making the e4 pawn a weakness. [52.♖g5 52...♖f7 and White will still need to play g4 sooner or later.]

52...fxg4 What else to do?! [To take the pawn on a4 on the spot just leads to a draw: 52...♔xa4 53.gxf5 ♔b3 The a-pawn

is still very strong, but White is in time to save the game. (The idea of being tricky and try to cover the a-file with a rook is not helping much: 53...♔b4 54.f6! White is securing a passed f-pawn. 54...gxf6 55.♖xf6 a4 56.♖a6 ♖b5 57.♔e3 ♖a5 58.♖xa5 ♔xa5

59.f5 and we are entering a drawish queen endgame. 59...a3 60.f6 a2 61.f7 a1=♖ 62.f8=♖ with a draw.) 54.f6! It is very important for White to get rid of the g7 pawn. 54...gxf6 55.♖xf6 a4 56.♖a6 a3 57.♔e3 and the passed f-pawn secures the draw.]

53.hxg4 ♔xa4 54.♔e3 This is not the most exact play, but still enough to make a draw. [White could have won a tempo by first playing 54.♖a6! not allowing Black to immediately play Kb3-a4. 54...♔b4 55.g5 a4 56.♔e3

56...a3 Black doesn't have anything better than trying to push

the a-pawn as far as possible. 57.f5 ♔b3 58.f6 Not giving Black any chance for some tricks. 58...gxf6 59.gxf6 a2 60.♔xe4 and as we can see the game ends in a clear draw: 60...♔b2 61.♔f5 a1=♔ 62.♖xa1 ♔xa1 63.♔e6]

54...♔b3 55.f5 a4

56.f6? What a mistake by Akopian! [56.♖a6 would still lead to a draw. 56...a3 57.g5 a2 58.f6 gxf6 (No better is 58...g6 59.♔xe4 ♔b2 60.♔e5 and Black can even lose the game!! 60...a1=♔ 61.♖xa1 ♔xa1 62.♔e6 and White is winning because Black cannot do anything against the upcoming f7 move!) 59.gxf6 ♖f7 Now all White needs to do is to check the black king. 60.♖b6+ ♔c2 61.♖c6+ ♔b2 62.♖b6+ with a draw.]

56...gxf6 57.♖xf6 a3 Now White is just not in time!

58.g5 ♖a7! The winning move! [A mistake would be to rush with 58...a2? 59.♖a6 ♖b5 Black is trying to attack the g5 pawn. 60.g6 ♖g5 61.♖b6+ (61.♔xe4? of course loses to 61...♖xg6) 61...♔c2 62.♖c6+ ♔b2 63.♖b6+ with a draw again.]

59.♖b6+ [This is probably what Akopian missed. 59.♔xe4 59...a2 60.♖f1 and it seems like the position is a draw, but in fact Black is winning in 1 move!

60...♖g7! It is funny, but White has no ways of defending the g5 pawn, except by crossing the f-file with his king. 61.♔f5 ♖f7+ and the f1 rook is getting lost.]

59...♔c4 60.♖b1 White manages to stop the a-pawn, but the position is already lost.

60...♖g7 The most precise move. Black's idea is that in case the white king goes to f4, Black has e3.

61.♖c1+ ♔b3 62.♖b1+ ♔c3 63.♖c1+ ♔b2 64.♖c5 White is trying the already known idea of checking on the b-file and this would work in case the white rook was placed a bit more far than on the 5th rank, but it is not the case because the g5 pawn needs to be protected.

64...a2 65.♖b5+ ♔c3 66.♖a5

66...♔b3 and White cannot continue checking the black king with Rb5 because of Ka4.

67.♔f4 e3 and the e-pawn plays its key role.

68.♖b5+ [68.♔xe3 68...♖xg5 69.♖xg5 a1=♔ and we are entering a theoretically winning position.]

68...♔a4 and there are no more checks...

69.♖b8 ♖a7 A sad end for White to lose a drawn position, but once again we could see how complicated rook endgames are and that it is very easy to miss a move which could totally change the evaluation of the position. **0-1**

**(15) Sjugirov, Sanan (2678)
- Lupulescu, Constantin (2626)**

European Championship,
2015.03.05

GM Csaba Balogh
Best rating: 2672

We are in the last move of the time trouble. White is a pawn up, but in rook endgames it is often not enough to win the game, especially when the defensive side has such an active rook like the one on c2!

40.♖b3 A very tricky move to conclude the time pressure. White already had the forthcoming pawn endgame in mind and he keeps the calculation part for after the 40th move, when he receives the extra time... [40.♖f3+ 40...♔e6 White cannot make progress. The rook is passively defending the pawns on the second rank and Black is going to play Ra3 next, restoring the material balance.]

40...♖xf2 [Black could have avoided all the complications by starting with 40...♔f6!? and only after 41.♖b7 (41.♔e3 41...♖c5 forces the white rook to go into passive defense from a3 after which he does not retain any more winning chances...) 41...♖xf2 42.♖xa7 ♖xg2

Eliminating the queenside. This kind of endgames are rather risky for White. Black has enough time to collect the h2 pawn and the rook returns behind the a-pawn. Black starts to push his own pawns afterwards and if White works hard to promote his passer with the support of his king Black will sacrifice his rook at some point and promotes his own pawns because the white king gets too far from them...

41. Rf3+!? This was the idea of the young Russian GM. He hopes that the more active position of his king (being close to the a7 pawn) will yield him adequate winning chances.

41... Rxf3 42. gxf3 This kind of pawn endgames require poor calculations. Black has numerous ways to continue the game, but some of them lead to a draw and some are losing. Surprisingly the Romanian GM fails to save the game...

42... Ke6 Naturally, Black brings his king closer.

43. Kc5 Kd7?! The first inaccuracy, although the game remains a draw. Black has blocked the way to the a7 pawn and he is in time to protect it against Kb5-a6 with Kc7-b8, but a serious drawback is that he gave up the d5 square from where White can decide later to go towards the queenside or the kingside... [The easiest draw was 43...g5 44. Kc6 and basically all moves are leading to a draw now. The point is that when the white king collects the a-pawn, the black king must squeeze it to the corner from where it cannot escape... One possible move is 44...a6 45. Kb6 Kd6 46. Kxa6 Kc6!]

Locking the king to the a-file from where it cannot escape, therefore the draw is inevitable... 47. Ka7 Kc7 48. a6 h5 49. h3 h4 50. Ka8 Kc8 51. Ka7 Kc7=; 43...Ke5 is the same as 43...g5. 44. Kc6 g5 (Black is too slow with 44...Kf4?? 45. Kb7 The a-pawn is too far advanced, White wins the race with many tempi...) 45. Kb7 Kd6! Changing the direction again! 46. Kxa7 Kc7= with the same draw as in the 43...g5 line.]

44. Kd5! Black most probably forgot about this move and he collapsed right away. He is already facing a difficult calculation problem... [44. Kb5 44...Kc7 45. Ka6 Kb8= is safe for Black. Even if he gets into zugzwang, he can wait with Ka8...]

44... Kc7?? The losing mistake, Black fails by one tempo... Let us examine the alternatives. [Waiting with 44...Ke7 was

the best, knowing the fact that losing the a-pawn is not really a threat... 45.♔e5 (45.♔c6 45...g5 46.♔b7 ♔d6 47.♔xa7 ♔c7 is a draw as we already know.) 45...♔d7 46.f4 ♔e7 47.f5 a6 48.♔d5 ♔d7= Black holds the draw by keeping the opposition!; 44...g5? loses after 45.♔e5 ♔c6 46.♔f6 ♔b5 (46...h6 transposes to the game.) 47.♔xg5 White promotes the h-pawn faster.; 44...g6 is another way to hold the draw! Black wins a very important tempo in the pawn race. In order to create a passed pawn White must capture both kingside pawns, while with the pawn on g7 it is enough to take that pawn and he can already advance the f-pawn... 45.f4 ♔c7 46.♔e6 ♔c6 47.♔f6 ♔b5 48.♔g7 ♔xa5 49.♔xh7 ♔b5 50.♔xg6 a5 51.f5 a4 52.f6 a3 53.f7 a2 54.f8=♔ a1=♔ Black will suffer for at least 50 more moves, but with correct defense the game is drawn...]

45.♔e6 ♔b7 46.♔f7 g5 [46...♔a6 is too slow. 47.♔xg7 ♔xa5 48.f4+- Black loses the decisive tempo by freeing the path for the a-pawn...; 46...g6 47.♔g7 ♔a6 48.♔xh7 ♔xa5 49.♔xg6+- transposes to the game...]

47.♔f6 h6 [47...♔a6 48.♔xg5 ♔xa5 49.f4+-]

48.♔g6 ♔a6 49.♔xh6 ♔xa5 50.♔xg5 ♔b5

51.h4! Perhaps Lupulescu forgot about this move, he thought in his pre-calculations that White has to push his f-pawn

when they promote at the same time... [However the point is that after 51.h4 51...a5 52.h5 a4 53.h6 a3 54.h7 a2 55.h8=♔+- White promotes first and at the same time he controls the a1 square.] **1-0**

Chess and the City. La Dolce Vita

WGM Elisabeth Paetz
Best rating: 2493

As I mentioned at the end of my previous newsletter, the Women's World Championship is going to start soon. Therefore, careful preparation is naturally needed, chess wise as well as emotionally. After some extensive chess and sports preparation I decided to spend my last week of "freedom" in my new (since 2012) home city of Rome. Rome is a wonderful, historic city with many sights, great food and sunny weather. This set up is both tempting and ideal, before facing a heart-beating, nervous, lottery-like a knock out system.

In my favorite restaurant "L'Archetto"

However, as a German moving to Italy, this bears several risks, which a true punctual German like myself may easily underestimate. And when we speak about punctuality we get to one of the most crucial aspects about living with Italians: punctuality in Italian "puntualità" is a word which does not seem to exist with many Italian people, or it has a totally different definition. Puntualita could mean everything up to 1-2 hours delay. It took my quite a while to learn this definition with my dearest Italian boyfriend! After a while I realized that everything starting in 20 minutes or more shall be multiplied by three, and anything sooner than that could be delayed by a multiple of 4 or 5. Once I understood this, I realised that there was no longer any point in being upset or fighting over it. But of course, this being Italy, there are other frustrations too. "Bureau crazy" is more appropriate than "bureaucracy" as, in Italy, it is a process which requires nerves, patience and the ability to just accept it. Just yesterday I encountered "bureaucrazy" at its finest while trying to change foreign currency in the city centre.

In Germany, for instance, you can enter any bank of your choice and fix this issue in less than 5 min. In Italy you a) need a lot of time to empty your pockets and get rid of all the metal, and b) cannot just change money at any bank you like, but instead only the one you are registered with. So, being a foreigner, the bank option is therefore already lost, since you usually don't like the idea of putting your money in an account abroad. The relief of seeing an exchange office was music to my ear... except... of course I should have been aware of the Italian method of calculation and its surprising drawbacks. The exchange office usually requires a commission of approx.5 percent, which sounded, looking at the window from outside, not that terrible. With great hope and enthusiasm I finally entered the office. But, before

handing over my 140 pounds I decided to ask how much Euros I may expect in exchange. According to my calculation it should be about 140 pounds x 1,3 which is about 180 Euros. The answer of the guy at the office desk was slightly different, and he finally came up with 147 Euros. I just couldn't believe my ears, try as I might to figure out his rate or imagine a dramatic increase on the Euro stock market! Did he really believe I was that dumb? Holding back my anger, I ran out of the office. Even today I am still wondering how they could get away with that sort of robbery! Of course, eventually I must confess that these frustrations make me laugh in a positive way, and it is actually nice to get away from a too-strict, disciplined and boring country like Germany, when compared to a lively and hot tempered one such as this. Italy is a lovely place and always worth a visit. For me it is the very best way to prepare for a chess tournament as you've got everything you may be longing for : warmth, excellent food and very friendly people.

Editorial Preface

The surprise winner of the Reykjavik is Erwin l'Ami, who started with an amazing 8.5/9 and won the tournament with a round to spare. This result is clearly the biggest success in his career so far. The 2nd-3rd places were shared by Eljanov and Libiszewski, both with the very good score of 8/10. The results of Mamedyarov, who finished on "only" 7.5/10, and Navara, who finished on 7/10, were both very big surprises. Both players could clearly not be happy about it.

The Women World Cup has begun with all the top females participating, with the notable exception of Hou Yifan.

Most of the favorites have made it to the 2nd round, but there were a few surprises as well. A lot of the matches were decided in the tie-breaks where most of the higher rated players showed better nerves.

Clearly the next matches are going to be even more exciting and not even a single match seems to have a huge favorite.

In the German Bundesliga the club of OSG Baden-Baden is very close to win the 10th consecutive title, as they already have a 2-point advantage over Bremen with just 2 rounds to go.

As usual we hope you enjoy this week's newsletter!

The three lucky winners who will get a chance to play a 2 game blitz match against GM Arkadij Naiditsch are Top GM Secrets subscribers Giovanni Di Girolamo, Sándor Balogh and Walther Leitzke. Congratulations!

Arkadij Naiditsch & Csaba Balogh

Two best games of the past week

(1) Svidler, Peter (2729)

- Ragger, Markus (2661) [C65]

BL 1415 SG Solingen - OSG Baden
Baden(13.1), 2015.03.15

GM Arkadij Naiditsch
Best rating: 2737

After a disappointing result at the Grand Prix, Peter Svidler is back with a great win against the Austrian Nr1. In a very popular line of the Berlin, Svidler shows great preparation and a very interesting piece sacrifice. The position actually looks very complicated, but under big pressure Black makes a mistake with 22...Nd5? which basically decides the game.

1.e4 e5 2.♘f3 ♘c6 3.♙b5 ♘f6 4.d3 This is one of the main moves besides 4.0-0, but Black actually has a very decent score against it. I can only recall Magnus Carlsen still showing excellent results with White.

4...♙c5 5.c3 avoiding the Nd4 line. [5.0-0 5...♘d4 is the other main line which is counted as very close to equal.]

5...0-0 6.0-0 d6

7.♘bd2 White is preparing 3 different ideas: 1) to play Re1-Nf1-Ng3 2) to play d4 at some point 3) to play b4 followed by Nc4 and exchange the black bishop.

7...♘e7 Ragger also shows that he is well-prepared and goes for what is currently the most solid line. Black's idea is simple, to play Ng6 and then d5 somewhere. The idea of playing c6 followed by Bb6-Bc7 and d5 is quite typical.

8.d4 exd4 9.cxd4 ♙b6 Now White should try to be as solid as possible and Black starts to play against the center.

10.♖e1 Another very logical move. Black often goes for the d5 push and it is helpful to have the rook on e1.

10...♙g4 11.h3 ♙h5 Bxd4 can sometimes be a threat and White can also not play 12.Nf1-Ng3 because of 12...Bxf3 13. Qxf3 and Bxd4.

12.♞b3 White is leaving the pin, but of course the question is what White wants to do next?! Could he want to push e5 or maybe just play Nc4 with idea of playing Nxb6?

12...d5 Black picks the most direct reply. I think another option could be to play 12...Bg6 or 12...Nc6 first.

13.e5 ♘d7 It all looks a bit passive for Black, but in fact the position is very unclear. Black wants to play c5 next and then maybe Nc6 and get great play against the white center.

14.a4!? Svidler played this move very quickly, so I think it must still be his preparation and indeed a move like a4 seems to be at least very interesting! The threat is simply to play a5 next.

14...a6 This is clearly the main reply. [14...c5? 15.a5 and White has a big advantage since Black can't take the a5 pawn because of Bxd7.]

15.♠d3 This is clearly the best place for the bishop, but what is White planning to do after c5?!

15...c5

16.g4!? This very interesting piece sacrifice was clearly Svidler's idea, which started with 14.a4!?. Now things are getting very complicated.

16...c4 I would have done the same. A piece is a piece... [In case of 16...♠g6 17.♠xg6 hxg6 White has the very strong 18.♠g5! with the double idea of playing Qg3-Qh4 and e6. Black's position looks very dangerous.]

17.♠xc4 White still follows his plan. [I think that after 17.♠a3 17...cxd3 18.gxh5 Black seems to get active play with 18...♠c6 19.♠xd3 ♠c8 with the idea of Nb4-Nc2. I think the position is very unclear.]

17...dxc4 18.♠xc4 Black is a piece up for just 2 pawns, but his pieces are quite disorganized.

18...♠g6 Of course Black needs to save his piece.

19.♠g5! A great move which is a must! If White didn't have it, I guess Black would just be better. Now the threat is simple, to win the piece with Nxb6 and Bxe7. Black also needs to pay attention to the fact that White can push e6 at any moment!

19...♠a7 Probably the best move, as other ways of defending seem to be worse.

20.♠a3 White forces Black to open his whole position. [20.♠d6!? also looks very interesting. 20...♠b8 Black has other choices, but we just take a look at one line. 21.e6 seems to be most direct, but White also has many other silent moves, as for example 21.a5!?. 21...♠f6 22.exf7+ ♠xf7 Now the line is pretty forced. 23.♠xf7 ♠xf7 24.♠e5 ♠d5 25.♠xd5 ♠exd5 26.♠xf7 ♠xf7 and probably we could evaluate this endgame as close to equal.]

20...f6 The only move to defend the knight on e7. [20...♠e8 21.♠d6 and White is just winning.]

21.exf6 gxf6 22.♠h6 with a double attack against the f8 rook and the knight on e7.

22...Nxd5?! This logical move probably costs Black the game. [Black should have tried the more strange-looking 22...Nc6 but if we think from a general point of view, this move is not that hard to find, since Black has 2 pieces for a rook, which means that the 2 pieces should attack something of White and with this move we attack the d4 pawn. 23. Qxf8 Nxf8 24. Nd6 and I still believe that Black's position is at least very dangerous, but things are objectively unclear after forexample 24...Kd7 with Rd8 next.]

23. Nd6! White doesn't take back the exchange on f8, but threatens a much more unpleasant move, as after Nxb7 or Qb3 the rook from f8 can still not move anywhere.

23...Kb6?! Black aims to enter an endgame, but it is just lost! [23...Kb8 doesn't help, because for example 24. Nh4!? seems to give White a clear advantage.; But maybe Black should have tried a crazy move like 23...a5!? with the idea of playing N7b6 next and try to keep the knight's position on d5 safe. White is better here, but the position would remain complicated.]

24. a5 This move is too easy to miss.

24...Kb4 25. Kxb4 Nxb4 and here comes the strong

26. Re7! Black's problem is still the very bad coordination of his pieces and we should not forget that even after taking the

rook on f8 White would have a small material advantage.

26...Kad8 27. Nxb7 White already has 3 pawns and both black rooks are hanging. The game is coming to an end...

27...Nd5 A strong knight on d5 is not enough to hold things together.

28. Rg7+ Kh8 In an already winning position, Svidler continues playing great moves.

29. Rxc1! Because Black is still paralyzed, White brings the last piece into the game.

29...Rg8 30. Nxd8 and finally it is time to collect some material.

30...Rxc7 31. Qxg7+ Kxg7 32. Nc6 The bishop on a7 can't be defended so Black has nothing left but to resign. A great game by Svidler! Amazing preparation followed by very nice play and an accurate finish. This is what a perfect win looks like! :)

1-0

**(2) Motylev, Alexander (2680)
- Balogh, Csaba (2658) [A20]**Schachbundesliga,
2015.03.15GM Csaba Balogh
Best rating: 2672

I managed to win a nice game in the German Bundesliga.

1.c4 A surprise t in the first move. My opponent is a huge theoretician and plays only 1. e4, probably this was the first time in his life when he tried the English opening. The reason should be that in the last two games I lost with Black my opponents were playing 1.c4.

1...e5 2.g3 ♘f6 3.♙g2 c6 4.d4 [4.♘f3 is the other main line.]

4...♙b4+

5.♘c3!? A tricky sideline. This move has always worried me a lot despite having been played only in a few games, therefore I dedicated serious attention to it in my earlier preparations. [Usually the games continue with 5.♙d2 5...♙xd2+ 6.♙xd2 and here Black can choose between 6...d6 (or 6...e4)]

5...♙a5 6.♘f3 The novelty of the game. It is quite rare to see one in the 6th move nowadays. [I mainly focused on the following line: 6.dxe5 6...♙xc3+ 7.bxc3 ♙xc3+ 8.♙d2 ♙xe5 where White has sacrificed a pawn, but he might get very dangerous compensation on the dark squares.]

6...e4 7.♘d2 d5 I was happy that my opponent started to think after this most logical move... [White had only prepared for the greedy 7...♙xc3 8.bxc3 ♙xc3 but he gets more than enough compensation after 9.♙b1 The point is that 9...♙xd4? is wrong because of (9...d5) 10.♙b2 ♙d6 11.♙xf6 ♙xf6 12.♘xe4±]

8.♙c2 White was already afraid of taking twice on c3.

8...O-O 9.O-O ♙g4 It was difficult to judge where the light squared bishop should develop. Be6 and Bf5 also had their points, but I thought it could be annoying to put pressure on the e2 pawn. I thought that White was going to undermine the e4 pawn anyway with f3, but even then the bishop stands well on g4.

10.f3 [10.♘b3 would have been met by 10...♙a6! forcing the decision in the center and keeping an eye on the e2 pawn.]

10...exf3 11.♘xf3 An ambitious, but risky recapture. Ambitious because White would like to grab the initiative by playing quickly Ne5 and risky because if Black manages to parry the direct threats, White might end up with a backward e2 weakness. [Objectively it was better to play 11.exf3 11...♙h5 12.♘b3 ♙a6 13.cxd5 cxd5 14.♙f4 ♘bd7= with a balanced game.]

11...♘bd7! Preventing Ne5 with a useful developing move. [11...dxc4 Giving up the initiative for a pawn was not recommended in view of 12.♘e5 (12.e4 followed by e5 is also possible.) 12...♙e6 13.♘e4 ♘xe4 14.♙xe4 White wins back the pawn and keeps some edge.]

12.cxd5 cxd5 13.h3 [13.♘e5 suggested itself to me, but it did not work directly because of 13...♘xe5 14.dxe5 ♙c5+! Black pins the c3 knight with tempo. 15.♙h1 ♘e4 and Black is fine. Giving up the g2 bishop, leaving the white king so exposed, should not come into consideration.]

13...♙h5 I wanted to keep the pawn structure and consolidate the e4 square with Bg6. [13...♙xf3!? was also very promising. It is illogical to give up the two bishops and strengthen the pawn formation, but the move has a direct point... 14.exf3 ♖ac8 15.♙d2 ♙b6 16.♙e3 (16.♙d3 16...♘e5!) 16...♘e5! and Nc4 is coming next, a move that is not easy to deal with.]

14.♘h4 This is a standard idea in many openings. White would like to grab the bishop pair, but playing g4 is another weakening in front of the king, just as 13.h3 was in the previous move.

14...♖fe8! Fortunately there was time for this improving move. The final goal is to install a knight to e4 and being able

to take back with a piece.

15.g4 ♙g6 16.♘xg6 hxg6 17.♙d2 Threatening to play g5, winning the d5 pawn. [The direct point was 17.g5 runs into the intermediate move 17...♙xc3! after which Black manages to put his knight to e4! 18.bxc3 (18.♙xc3 18...♙xc3 19.bxc3 ♘e4+; 18.gxf6? 18...♙xd4+) 18...♘e4+]]

17...♙b6 Leaving from the pin and provoking another weakening.

18.e3 [There was a small tactical trick that White could not defend the d4 pawn with 18.♙d3 because of 18...♘e5!]

18...♖ac8 Bringing all the pieces into the game. [18...♙xc3 was also good. 19.♙xc3 (19.bxc3 19...♘e4) 19...♘e4 20.♙xe4 ♖xe4 also with an undisputable advantage because of the exposed king and the good knight versus the bad bishop.]

19.♙b3 ♙xc3 20.♙xc3 [20.bxc3 was even worse. The holes on e4 and c4 are going to be occupied by the knights very soon... 20...♙d6! freeing the b6 square for the knight. 21.♙xb7? loses the queen after 21...♖b8 22.♙xa7 ♖a8 23.♙b7 ♖eb8]

20...♙c6! A very important move to keep the queens on the board, which makes the white king more vulnerable and at the same time Black has protected his d5 pawn and prepares

to bring his other knight to b6-c4. [20...♖xe3 would have spoiled the advantage because of 21.g5! ♖xb3 (21...♗e4 22.♖xd5) 22.axb3 ♗e4 23.♖xa7! White restores the material balance and he equalizes.]

21.♗a5!? A clever positional move. White prevents the Nb6-c4 plan and tries to provoke the b6 move, which would deprive Black from his plan of improving the knight. [21.♖ac1 21...♗b6+]]

21...♖a6! Simple and strong! Black needs the b6 square for his knight, therefore he sends away the bishop...

22.♗b4 ♗b6 The d5 pawn is safely protected and the knights are ready to occupy their ideal outposts.

23.♖ac1 ♖xc1 24.♖xc1 ♗c4 A very nice position. I am big fan of the two bishops, but in this particular case, they are clearly dominated by the knights on e4 and c4!

25.♗f1 White aims to get rid of one of the knights, but he leaves his king alone without his main defender.

25...♖e6! A positional pawn sacrifice! Black centralizes his queen and forces the trade of the f1 bishop after which the g1 king becomes heavily vulnerable.

26.♗xc4 dxc4 27.♖xc4 A critical position. Black has various promising options, but only one of them leads to a clear

advantage...

27...♖e4! with the idea of playing Qf3! [27...♗e4 also looked good with the intention of playing either Ng5 or Qf6, but White has the only move 28.♖c1! followed by Rf1 and he is alive.; 27...♗d5 also looked very strong, but White survives after the following tactical blow: 28.♖c5! ♗xb4 29.♖e5! An intermediate move to avoid the loss of the e3 pawn! 29...♖c6 30.♖xb4=; 27...♖d5 28.♖c7 forces the trade of the queens because of the f7 pawn.]

28.♖c7 ♖e6 [28...♗d5 was actually also winning, but it required much more calculation than the text move. 29.♖d7

29...♖f3! is the point and the attack leads to mate with the queen and the rook. 30.♖xd5 (30.♖xd5 30...♖g3+ 31.♗f1 ♖xe3+) 30...♖xe3+ 31.♗g2 ♖e2+ 32.♗g1 (32.♗g3 32...♖e3+

33. ♔h4 ♚f2+ 34. ♔g5 ♚f6#) 32... ♚d1+ 33. ♔h2 ♚e2+ White is forced to sacrifice his queen with Qg2, but of course it is also hopeless... 34. ♔g3 ♚g1+ 35. ♔h4 ♚f2+ 36. ♔g5 ♚f6#]

29. ♙e1 White desperately tries to bring a defender, but it is too late...

29... ♘d5 30. ♚c8+ ♔h7 31. ♙f2 Allowing Nxe3 would have been the end of the game.

31... ♚f3! Refreshing the Nxe3 threat.

32. ♚c2 [32. ♚xb7 32... ♚f6!—+; The best practical chance was 32.e4 32... ♚xe4 33. ♚xb7 but is also loses after (33. ♚g3 33...g5—+) 33... ♚b1+! 34. ♔g2 (34. ♔h2 34... ♚e2—+) 34... ♘f4+ 35. ♔g3 g5! 36. ♚a8 ♚d3+ 37. ♚f3 ♚f1—+ White gets mated.]

32... ♘xe3 33. ♙xe3 ♚xe3 34. ♚f2 ♚d1+ White resigned as he loses his queen after Re1 or Re2 in the next move. **0-1**

David vs. Goliath

Peter Zhdanov
Chief Editor of Pogonina.com

In this entertaining column we are reviewing the most unexpected results that occurred last week. Players usually face opponents of a similar level. Considerably less frequent are situations when a significantly lower-rated player succeeds in beating a much stronger adversary.

The previous week has brought 32 upsets, providing us plenty of chess content to enjoy.

The number of moves ranges from 22 in Ingason (1880) - Babijczuk (1549), 0-1 to 84 in Baldvinsson (1945) - Niemann (2275), 1-0. The highest-profile loss was FM Bisby (2321) - GM Movsesian (2665), 1-0.

How did White defeat the ex-top 10 super GM?

White to move

A special respect goes to Henrik Carlsen (1986), Magnus Carlsen's father, who defeated FM Dagur Ragnarsson (2347) at Reykjavik Open. Bottom line: don't mess with the Carlsens!

Top-10:

Moller (1806) - Foisor (2279), 1-0, [473](#) points
 Kruglyak (1775) - Mai (1320), 0-1, [455](#) points
 Ragnarsson (1497) - Klausen (1937), 1-0, [440](#) points
 Sigurdsson (1767) - Kristjansson (1335), 0-1, [432](#) points
 Starosciak (1304) - Steingrimsson (1720), 1-0, [416](#) points
 Valdimarsson (1889) - Wahlbom (2278), 1-0, [389](#) points
 Le (2025) - Pham Chuong (2397), 1-0, [372](#) points
 Valtysson (1974) - Loos (2337), 1-0, [363](#) points
 Carlsen (1986) - Ragnarsson (2347), 1-0, [361](#) points
 Bisby (2321) - Movsesian (2665), 1-0, [344](#) points

Average gap: 405; White won 8 games, Black won 2 games.

You can view all the games in the accompanying pgn file.

Solution of Bisby-Movsesian: The encounter lasted only two more moves after 30.Nd5! Ra5 31.Bf6 (31.Ne7+ is mate in 5, but the game continuation is good enough as well) 1-0

If you have ever won a game against someone rated 300 points or above yourself, please send it to peter@pogonina.com for publication. Any additional information (a photo, annotations, etc.) will be appreciated.

Endgame section

(13) Quesada Perez, Yuniesky (2637)
- Rajdeep, Sarkar (2268)

Kolkata Open,
2015.03.16

GM Csaba Balogh
Best rating: 2672

The material is balanced, but the doubled c-pawns can hardly be regarded as two healthy pawns, therefore White should have realistic chances to play for an advantage. However the Indian player finds a brilliant idea to save the game... Surprisingly, those c-pawn are going to save the day.

47...♖d6! At first sight, it seems like Black simplifies to a lost pawn endgame...

48.♗xd6 ♖xd6 49.g3 [White is too slow with 49.♖g4 49...♗e5; 49.♗f4 49...♗e6

50.g3 (50.e5 50...♗d5! and the g6 pawn gets a key role by preventing White from playing Kf5!)]

49...hxg3 [But not 49...g5? because after 50.gxh4 gxh4 51.♖f4 ♗e6 52.e5 ♗d5 White already has 53.♗f5!+—]

50.♗xg3 g5 A very strange move! Black gives a full tempo and White promotes his pawn first in the race, however it is not enough for the win... [50...♗e5 was actually a much simpler draw, but in this case the game would not make it into our newsletter! :) 51.♖f3 g5 52.♗e3 (52.♗g4 is too slow. 52...♗xe4 53.♗xg5 ♗d3 54.h4 ♗xc3 55.h5 ♗b3 56.h6 c3 57.h7 c2 58.h8=♖ c1=♖+) 52...♗f6= and Ke5 back next holds the draw.]

51.♖g4 ♗e5 52.♗xg5 ♗xe4 53.h4 ♗d3 54.h5 ♗xc3 55.h6

55...♗d2! The only move! [55...♗b3 loses to 56.h7 c3

57.h8=♔ c2 58.♔a1+- and the pawns are stopped.; 55...♔b2 56.h7 c3 57.h8=♔+- pins the pawn.]

56.h7 c3 57.h8=♔ c2 Surprisingly, this position is a draw! Without the c5 pawn we would have the famous theoretical draw due to the stalemate idea. This will be shown in the 62.Qxc5 line. One could think that the c5 pawn is actually an ill pawn, which prevents Black from playing for the stalemate motif. However it controls the very important d4 and b4 squares and without those White is unable to squeeze the king to c1 to win time in order to bring the king closer...

58.♔b2 ♔d1 59.♔b3 ♔d2 60.♔a2 ♔d1 61.♔d5+ ♔c1 Finally Black is not threatening to promote his pawn, which gives White a free tempo to improve his king. [61...♔e2 was equally good, as it will lead to the same lines.]

62.♔f4 [62.♔xc5 This is the famous draw. The queen wins against the b2-d2-e2-g2 pawns, however the weaker side holds with the a2-c2-f2-h2 pawns because of some stalemate ideas...

62...♔b2 63.♔b4+ ♔a2 64.♔c3 ♔b1 65.♔b3+ ♔a1!= Not Kc1, after which the king comes closer. The pawn cannot be taken because of the stalemate and the game is drawn...]

62...♔b2 63.♔e5+ ♔b1 64.♔e4 ♔b2 White is simply unable to get that position after 65.Qb3 in the 62. Qxc5 line, where Ka1 Qxc2 is not a stalemate because of the c5 pawn. Without the check on b4, White cannot make progress.

65.♔e2 ♔b1 66.♔b5+ ♔a2 67.♔a4+ ♔b2 White should play Qb4 Ka2 Qc3 Kb1 Qb3, but it simply does not work. Therefore this entire endgame with the c2-c5 pawns is a draw!

68.♔b5+ ♔a2 69.♔c4+ ♔b2 70.♔e2 ♔b1 71.♔d3 ♔b2 72.♔d2 ♔b1 73.♔d3 ♔b2 74.♔b5+ ♔a2 And a draw was agreed! It can be very useful to remember such things. **1/2-1/2**

**(14) Gupta, Abhijeet(2625)
- Abdumalik, Zhansaya(2379)**

Reykjavik Open 2015(9.8),
2015.03.17

GM Arkadij Naiditsch
Best rating: 2737

The young and talented Abdumalik was defending her bad position already for quite a while and it is still unclear if it is a draw or a win for White. The g7 pawn can't be taken and the white a-pawn could also become very dangerous. On the other hand, the material is equal, and "all" Black needs to do is to give up her knight for the 2 pawns to get a draw.

50...♖b2? It is very ical to defend the c4 pawn and at the same time to prevent White from playing a4, but this is a losing move. [A better try was 50...♖f2+ 51.♔d5 ♖d1! This move makes a4 impossible because of the fork on c3. 52.♔xc4 and now Black has time for 52...♔g6! and again the move a4 is not possible because of Nb2. 53.♔b4 ♖b2 with quite some drawing chances.]

51.♔d5? White misses a forced win. [The right choice was 51.♔c6! The threat is to play Nf5 and Black can't take with on

g7. 51...♔xg7 52.♖f5+ and Black is losing material or getting mated on the next move. 52...♔f7 53.♖h6+ with an easy win for White.]

51...♖d1 Black switches back to the right plan.

52.♔xc4 ♔g6 53.♔c5 White is trying to be fast with the a-pawn, a4 is a deadly threat now.

53...♖c3! A strong move, attacking the a2 pawn and at the same time preventing White from playing a4.

54.a3 and Black finally has time to take the g7 pawn.

54...♔xg7 55.♔xg7+ The position is still unclear! As we all known, it is sometimes very difficult for the knight to stop the a- and h-pawns from promoting.

55...♔xg7 56.♔b4 White forces the black knight to move, which could make the a4 move possible.

56...♖d5+?! This move still holds the draw, but Black had a much more precise way of achieving it with accurate calculation. [56...♖a2+! A risky move to play, but everything is working. 57.♔b3 ♖c1+ 58.♔c4 The black knight is out of the game, but the black king is just in time to save it. 58...♔f6 59.a4 ♔e6 60.♖e4 ♔d7 61.a5 ♔c7 and the position is a draw.]

57.♔c4 ♖b6+ 58.♔b5 ♖d5 It seems like White can't improve the position but Gupta finds a way.

59. ♖e4! taking the c3 square under control, so the a-pawn is running.

59... ♔g6?! This is the wrong direction. [Much better was 59... ♔f7 60. ♔c6 but now of course Black had to see the saving idea 60... ♜f6! which is not an easy move to find! Of course the pawn endgame is just a draw. 61. ♜c3 ♔e7 62. a4 ♔d8 The black king tries to reach the a8 square. 63. ♔b7 and now again Black needs to find

63... ♜e8! 64. a5 ♜c7 Just in time! Now the position is a draw.]

60. ♔c6! and Black is lost!

60... ♜e3 This move loses on the spot. [60... ♜f6 was not working any longer because of 61. ♜c3 and there is no way to stop White from playing a4-a5-a6-a7-a8Q.; 60... ♜e7+ was probably the best try, even if it is still losing. 61. ♔d6 ♜c8+ 62. ♔c7! White still needs to do a bit of work. 62... ♜e7 63. a4 ♜d5+ 64. ♔c6 ♜b4+ 65. ♔b5 ♜d5

66. ♔c5 all white moves are pretty natural and not that difficult to find, but Black could still hope for a mistake. 66... ♜c7 67. a5 ♜a6+ 68. ♔b6 ♜b4 69. ♜c3 followed by Kb5 and White is winning.]

61. a4 ♔f5 62. a5 Black can't stop the a-pawn so Zhansaya tries to play against the queen.

62... ♜c2 63. ♔c5 ♔xe4 64. a6 ♔d3 65. a7 e4 66. a8=♔ If the black pawn was on e3 the position would be a draw, but the pawn is only on e4... **66... e3 67. ♔f3 ♔d2**

68. ♔d5+ and in case of 68... Kc3 the finishing move is 69. Qd1 and the black pawn is stopped. A sad end for the only 13-year old girl who was fighting so well and already had a draw on the board but could not calculate precisely enough. Knights endgames are always very tricky, especially when one side has a passed a- or h-pawn. **1-0**

Chess and the City. Sochi

WGM Elisabeth Paetz

Best rating: 2493

Finally the Women's World Championship, in Sochi, has started! I actually didn't expect to participate, as I failed to qualify in either of the last two European Championships. But, as we all know, 'hope springs eternal in the human breast'!

Thanks to the refusal of the current Women's World Champion Hou Yifan, to participate, I stepped in as a reserve player due to my rating. I suppose she declined as she is anyway eligible to play the World Championship Match at the end of the year. Her opponent will be the winner of this championship in Sochi.

It is the fifth time I have flown here, and as far I remember it was almost always connected with problems. Sochi is a region in the caucasian area of Russia, and a very foggy area too. Almost all my flights in the past were therefore cancelled, delayed or even re-directed to Krasnodar, a neighbouring city of Sochi. This time, however, everything went quite smoothly, and we (my coach and I) managed to arrive without any troubles. Sochi is also well-known as a Russian resort. It is quite popular among rich people, and is ideal for swimming in the black sea, or even skiing in the mountains. Our hotel is

actually located in a mountainous area, and a lot of people come here for skiing. I must admit that the venue is the best I have ever seen, for a world championship - nice hotel, excellent food and a very nice and comfortable playing hall.

My first opponent is, as I mentioned before, the Georgian Woman Grandmaster Meri Arabidze. After we tied 1-1 (two draws) in the classical section, we will face a tiebreak tomorrow. For anyone curious, you can have a look at the pairing tree, below.

World Women's Chess Championship Sochi 2015 General Pairings

As the knock-out system is quite thrilling, it is no surprise that there have been some upsets already. Gaponenko beat her stronger rated compatriot, Natalia Zhukova, and Arakhamia Grant beat the former European champion of 2012, Hoang Thrang. In my next newsletter I'll add some pictures from the Championship. Let's hope I'll still be found somewhere on the pairing tree below:)

Clash of the Titans

(15) Smyslov, Vassily
- Petrosian, Tigran V[E15]

URS, 1967

GM Kamil Miton
Best rating: 2655

1.d4 ♖f6 **2.c4** e6 **3.g3** ♗b4+ **4.♗d2!?** More popular is [4.♗d2 which leads to many different structures. 4...♞e7 (4...♗e7 5.♗g2 d5 transposes to the Catalan.; 4...c5 5.♗xb4 cxb4 with a solid position for Black as well.; 4...a5 5.♗g2 O-O 6.♗f3 d5 transposes to the Catalan.)]

4...c5 A typical fight for the center. [4...d5 5.♗g2 is more tricky than 5.Nc3. Now 5...dxc4 is not possible because of 6.Qa4! 5...O-O! 6.♞c2!]

5.dxc5 ♗xc5 **6.♗g2** ♖c6 **7.♗gf3** b6 [7...O-O! 8.O-O! d5! fighting for the center. 9.cxd5 (9.a3 9...a5) 9...♗xd5 White should try to get an advantage thanks to the powerful Catalan bishop on g2 but on the other hand the black pieces are very active in the center. (9...exd5 10.♗b3 White has a typical slightly better position.) 10.♞c2 ♗e7 11.a3 ♗d7 with Rc8 next and Black has counterplay.]

8.O-O ♗b7 **9.a3**

14.e4! White must be on time, otherwise Black will play d6-Nbd7-Rc8 with good play. 14...d6 15.e5 dxe5 16.♘xe5 ♙xg2 17.♙xg2± and the c6 square is very weak.]

12.♙b1! The beginning of a great plan which is based on deep strategical understanding.

12...h6 preventing the unpleasant Ng5.

13.♖d1 [13.e4?! 13...d6 with complex play.]

13...♙c7

14.♘e4! Smyslov is going to exchange an important defender.

14...♘xe4 15.♙xe4 f5?! This move seriously weakens the black position. [15...♖fd8 looks more solid. 16.♙g4 ♘f8 17.♖ac1 White is better anyway, but at least Black didn't play

f5.]

16.♙d3 ♖cd8 17.♖ac1 d6

18.♙b3! Smyslov immediately creates pressure against the black structure.

18...♙h7 [18...♘f6 19.c5 (19.♘xf6 19...♖xf6 20.c5 bxc5 21.bxc5 d5 22.e3+=) 19...♘xb2 20.cxd6 ♖xd6 21.♙xb2 ♖xd1+ 22.♖xd1 ♖d8

23.♖c1! and White keeps some advantage because of the weak e5 square.]

19.c5! The white pieces are perfectly placed for concrete action.

19...dxc5 [19...d5!? 20.♙e3 (20.b5 20...♘a5±; 20.cxb6 20...♙xb6 21.e3!? and White is probably better here. A simple

plan can be to play for a blockade on the e5, d4 and c5 squares.) 20...bxc5 21.♖xe6 c4 Then position is complex because White can't play 22.♗xd5?? ♕c8--]

20. ♖xe6 ♖c8

21. ♖b3! Of course the white queen is needed for the attack. [21.♖xc8 21...♕xc8 22.♗xd8 ♗xd8 23.♗e1 with the idea to put pressure over the c-file, but then Black plays 23...♗d4! 24.♕xd4 ♗xd4 25.bxc5 (25.♗d3 25...♕a6!) 25...♕xc5 26.♗d3 ♕a6 27.♗xc5 bxc5 28.e3 ♗d3 Black is on time with his counterplay. 29.♗xc5 ♗xa3 30.♗xf5?? ♗a1+-]

21...♗xd1+ 22. ♖xd1

22...cxb4?! I don't like this move. Why open the c-file and give White active play? Black could have played the solid [22...♖e6 just to prevent Qb3.]

23.axb4 ♗d8 [23...♖e6 24.b5 ♗a5 25.♗d4±; 23...♕xb4 24.♗e5 (24.e4 24...f4! (24...fxe4?? 25.♗g5+! hxc5 26.♖h5+ ♕g8 27.♕xe4+-) ; 24.♗h4!? 24...♕c5 25.♗xc5 bxc5 26.♖d6 ♖e8 It looks like Black should consolidate his position soon.) 24...♕c5 25.♗d3 ♗d8 (25...♗d8 26.♖c2! 26.♗xc5 bxc5 27.♖d6! ♗f7 28.♖xc5 ♖xc5 29.♗xc5 ♕xg2 30.♕xg2 with a very unpleasant endgame for Black.)

24. ♖b3

24...♕xb4? The decisive mistake. Black could still fight after [24...♖d7 25.b5 ♗a5 26.♖f7 ♕c5 27.♖h5→White is clearly better.]

25. ♗h4! The black pieces are too far away from the kingside! White is simply winning because of the weak black king.

25...♕f8 26. ♕h3 1-0

Editorial Preface

The Women's World Cup continues being extremely exciting and we already have the first semi-finalist, Harika Dronovalli. The Indian player won her match 1.5-0.5 against one of the biggest surprises of the tournament, the Georgian Meri Arabidze, who played a really fantastic event, eliminating V. Cmilyte in the previous round.

Mariya Muzychuk won her first game against Koneru, who started the event with straight 6 wins, but lost her second game, so tomorrow we are going to have a very exciting tiebreak. Pogonina lost her first game but managed to win the second one confidently, so she will also play a tiebreak against Zhao Xue. The match between Anna Muzychuk and Pia Cramling ended with two draws. This means that we will see a total of 3 tiebreak matches tomorrow!

The traditional Aeroflot Open is back after a 2-year break, with Mamedyarov and Nepomniachtchi as top seeds. As usual the Top GM group is very strong and the first place qualifies for the super event in Dortmund, so we are back to the same structure as before.

The Polish National Championship is also under way, but of course the non-participation of Wojtaszek makes it much weaker. It is too early for now to say anything about the outcome, but Kacper Piorun had a fantastic start with 3.5/4.

In the current issue, beside our usual columns, we are commenting on a few exciting games from the Women's World Championship knock-out from Sochi.

Enjoy!

Two best games of the past week

(1) **Anand, Viswanathan (2797)**
- **Nakamura, Hikaru (2776) [D37]**

4th Zurich CC Classical(4.2),
2015.02.17

GM Csaba Balogh
Best rating: 2672

We always comment the best games of the week, but this time I make an exception. One of our readers had a special request to comment the following Anand-Nakamura game. He called it as a positional masterpiece, with which I fully agree.

1.d4 d5 2.c4 e6 3.♘c3 ♗e7 4.♘f3 ♘f6 Nakamura plays the Queen's Gambit, one of the most solid openings nowadays against 1.d4. He wanted to neutralize Anand's amazing preparation, that he did for his WC match against Carlsen.

5.♗f4 O-O 6.e3 ♘bd7 7.c5 ♗h5 The modern way of dealing with this opening. Black gets rid of the strong f4 bishop in compensation for the space disadvantage on the queenside and the center. [Anand won a game against Carlsen in their match last year more or less out of the opening, where Black chose the other main line: 7...c6 8.♗d3 b6 9.b4 a5 10.a3 ♗a6 11.♗xa6 ♖xa6 12.b5 cxb5 13.c6 ♖c8 14.c7 b4 15.♘b5 I have commented this game in detail in a previous issue of our newsletter. Anand-Carlsen, Sochi 2014]

8.♗d3 ♘xf4 9.exf4 b6 10.b4 White must hold his c5 pawn and the space advantage at any cost, otherwise if he was forced to take on b6, axb6 followed by c5 Black would overtake the initiative.

10...a5 11.a3 c6 Black would like to trade his poor bishop on c8, but Ba6 was not possible right away because of b5 and c6 catching all the pieces on the queenside. There is no time to prevent this positional idea with Qe2, because the a1 rook needs protection.

12.O-O ♖c7 13.g3 ♗a6 We are still following hundreds of games. White has a fragmentary advantage thanks to his space advantage, but Black stands without any weaknesses and around 90% of the games ended in a draw. However as we will see in this game, some small positional inaccuracies might let this invisible edge grow to a significant one.

14.♖e1 Threatening to play f5, but of course it is easy to parry this idea by leaving the pin.

14...♗f6 15.♖g2 This is the novelty, although it does not change the character of the game and the plans employed in the other games remain valid here as well.

15...♗xd3 Nakamura rightly declines the challenge of complicating the game... [At first sight, Anand blundered the tactical idea of 15...bxc5 16.bxc5 ♘xc5 but of course it was all prepared at home... 17.dxc5 ♗xc3]

18. ♖xh7+! White wins back the pawn, but if Black rejects to take the piece both rooks are going to be loose. 18... ♔h8 (18... ♖xh7 19. ♖c2+ ♔g8 20. ♖xc3+= This is a kind of positional dream, where the knight is going to dominate the bishop when it establishes itself on d4 or on e5. The bishop on a6 seems to be nice, but actually it does not do anything and White can simply maneuver with his pieces by ignoring the light squares.) 19. ♘h4! Opening the queen's path to h5. 19... ♕xa1 (19... ♖xh7 20. ♖c2+ ♔g8 21. ♖xc3+= leads to the same as before. White will bring back his knight to the center in two moves.; 19...g6 20. ♕xg6! fxg6 21. ♘xg6+ ♔g7 22. ♘xf8 ♖xf8 23. ♖xe6 is complicated, but the numerous pawns and the exposed king gives more than enough compensation for White.) 20. ♖h5 g6 21. ♕xg6+ ♔g7 22. ♖h7+ ♔f6

White has a beautiful winning move here: 23. ♕f5!! creating

the threat of Rxe6 and the queen is hanging on c7. 23... ♖ac8 protects the queen. (23... ♖h8 loses to 24. ♖xe6+! fxe6 25. ♖xc7 exf5 26. ♖xc6+- and everything falls.) 24. ♖h6+ ♔e7 25. ♘g6+! fxg6 26. ♖xe6+ ♔d7 (26... ♔d8 27. ♖xf8+-) 27. ♖f6+ gxf5 28. ♖g7+- with mate to follow...]

16. ♖xd3 ♖fb8 Black prepares for the opening of the queenside and he brings his rooks to the open files. [16... ♖a7 serves the same purpose. Black keeps the tension on the queenside and doubles his rooks first before taking on b4 to win the fight for the a-file.]

17.h4 ♖a7 Another way of fighting for the a-file. Black would like to get two rooks for his queen, which is usually considered to be advantageous. [17...h6 was better to avoid the tactical break which could have happened in the game. The reason why h6 is preferable to g6 will be explained after the 18th move.]

18. ♘e2 Anand was familiar with all the ideas, as he clearly deeply studied this type of position. The game perfectly shows the deepness of this move... [However both players seem to have missed a nice tactical blow with

18.f5! The point is that after 18...exf5 19.b5! White actually weakened the d5 pawn with his last two moves! (19. ♖xf5? blunders the small tactic of 19...bxc5 20.bxc5 ♘xc5!) 19... ♖b7

20.bxc6 ♖xc6 21.♖xf5 and the d5 falls, which leads to the collapse of Black's position. 21...bxc5 22.♗xd5 cxd4 23.♖ac1 ♖d6 24.♖c7±]

18...g6 This move was criticized by Anand in the post-game analysis. As he explained, this move leaves the d7 knight without a future. It can never come to the game because the white pawns are controlling all its squares. The only path to improve it was through f8-g6-e7-f5, but this does not work anymore. This shows again how familiar the ex-World Champion was with all the nuances. [Therefore Black should have played 18...h6 to keep the g6 square free for the knight.; On the direct 18...axb4 19.axb4 ♖xa1 20.♖xa1 ♖xa1 21.b5! is very strong and White creates a c6 passed pawn, which will cause Black serious headache to deal with.]

19.♖ab1 A standard move in this line! White cannot hold the a-file for long, he allows the queen to invade, but this does not bring much for Black.

19...axb4 20.axb4 ♖a2 21.♖ec1! These are the usual moves in this line to neutralize the invasion of the black rooks. White is threatening to break through over b5 to create a c6-passer now.

21...bxc5 22.bxc5 h5?! It looks natural to fix the structure, but it turns out to be a serious mistake. [Black should have aimed for simplifications with 22...♖xb1 23.♖xb1 ♖b8 White has a symbolic advantage, but I doubt that it could be enough to win the game. Now the knight might join to the game through a6. There is only one weakness on c6, but it should not be enough to create something real.]

23.♗e5! The right moment to change the pawn structure! White takes back with the f4 pawn, which will be followed by Nf4 and thanks to the previous h5 move, there will be very dangerous threats on g6!

23...♗xe5 Black did not want to end up with his poor knight, but the bishop is not better either. Nakamura thought that it would at least save him from the attack with Nf4. [The key line continued with 23...♗xe5 24.fxe5 ♖xb1 25.♖xb1 ♖b8 26.♖xb8+ ♗xb8 but it is not the same as before, because of 27.♗f4! threatening to take on g6 or e6 and if Black tries to strengthen his structure with 27...♖g7

28.g4!! is suddenly a crusher! 28...hxc4 29.h5 g5 (29...gxc4 30.hxc4+ ♔f8 31.♕h7 Black cannot save himself against the two attacking pieces... 31...♖d7 32.♕h8+ ♔e7 33.♖g7 Mate is threatening on e8 and after 33...♖f8 34.♕h4+! ♔d7 35.♕f6+- the f7 pawn falls.) 30.♖xe6+! fxe6 31.♕g6+- and h6 wins. This line was seen by both players and it explains why Nakamura took on e5 with the knight.]

24.fxe5 ♕g7 Black managed to save himself against the Nf4 ideas, but now his queenside becomes much more vulnerable!

25.♖b6! White immediately uses the fact that the knight disappeared from d7! White wins the fight for the b-file with this excellent positional move, because the c6 pawn is under attack and taking on b6 creates a too strong passed pawn which will be supported by the heavy pieces from behind...

25...♖c8 [25...♖xb6 26.cxb6 The c6 pawn is hanging. 26...♕a4 27.b7 ♖b8 28.♖b1±]

26.♖c3 Anand consequently drives all his pieces to the queenside and focuses on the c6 weakness.

26...♕a7 27.♖cb1 ♕d7 Black goes into passivity with all his pieces, but it was very difficult to suggest anything better. [27...♖ab8 is strongly met by 28.♖a6! ♕c7 29.♖bb6! followed by Na2-b4, putting maximum pressure on the c6 pawn.]

28.♖1b4 In a few moves it all becomes clear! The knight is going to a4-b6.

28...♕h6 29.♖a4! ♕d8 30.♖a6! Vacating the b6 square for the knight and opening the path for the other rook to invade the 7th rank. In the meantime, White keeps an eye on the c6 pawn to tie down the black pieces.

30...♕g7 31.♖b7 ♖xa6 32.♕xa6 g5 The only chance! Black cannot hold the queenside for long, he must try to find counterplay with some desperate attempts. However Anand neutralizes it in a beautiful fashion...

33.♕e2! An excellent positional move, which forces the locking of the kingside.

33...g4 34.♕a6 There is no threat on h4, so the queen returns to its ideal square on a6.

34...♔g8 Nakamura continues resisting resourcefully. He pins his hopes to the Qh7-e4 counterplay, but Anand remains precise...

35.♘b6 ♖f8 36.♘d7 ♔h7 [36...♖a8 loses as well after 37.♖a7! which does not allow any counterplay along the a-file. The queen and knight will collect the c6 pawn anyway. The only hope remains in the counterattack, but it fails by one tempo.. . 37...♖xa7 38.♔xa7 ♔h7 39.♘f6! controls the e4 square. 39...♔d3 40.♔a8! There is no perpetual and Black gets mated. 40...♔f3+ 41.♔g1 ♔d1+ 42.♔h2 ♔g6 43.♔g8+ ♘g7 44.♔h7#]

37.♘xf8 ♔e4+ 38.♔h2 ♔xf8 39.♖b8+ ♔g7 40.♔c8 ♔g6 41.♔h8! 41.Qg8 Bg7 was not clear, but now the rook is coming to g8 and decides the game. A Karpovian game! **1-0**

(2) Koneru, Humpy (2581) - Galliamova, Alisa (2484) [D45]

WCh Women 2015(3.1),
2015.03.23

GM Arkadij Naiditsch
Best rating: 2737

The Women's knock-out World Championship with 64 participants combined almost all the best female players with the exception of the current World Champion Hou Yifan, for who there is actually almost no reason to participate in women events any longer as she has around 100 points more than the Nr2. Koneru, who took a short break from chess because of her marriage and seems to now be back to crush her oponents with extreme confidence. The current game is the first one from the 3rd round. After the opening it seemed like Black got a pleasant position and wanted clearly more than to just "play safe" which brought the game to a complicated stage where Koneru clearly kept a better overview and with strong play decided the game in her favor.

1.d4 d5 2.c4 c6 Alisa Galli amova has been one of the best women players for an extremely long time. Lately she has not been playing many games, but when she is playing we can still see her very good understanding of chess. It is just that from time to time she lacks energy or some miscalculations are preventing her from showing top results.

3.♘c3 ♘f6 4.e3 The Slav with 4.e3 is not the most ambitious opening for White but it is an attempt to go for a long-term game without much theory.

4...e6 5.♘f3 ♘bd7 6.♔c2 This is a tricky move in a well-known position. The idea is not to lose a tempo on the

regular 6.Bd3 dxc4.

6...b6 Usually Black plays 6...Bd6, with thousands of games played before.

7.♘d3 ♘b7 8.O-O ♘e7 It is always hard to tell where to place the black bishop, to d6 or e7.

9.b3 The white bishop is going to b2.

9...dxc4!? An interesting move. Black is not trying to be solid with moves like O-O, Rc8 and c5 but starting dynamic play on the spot.

10.bxc4 c5 Of course this move is connected to the idea that otherwise White would just play e4 with a better position.

11.♘e5 A pretty logical move, but I am not sure that this was the best possible way to continue for White. [Maybe White should be not afraid of Bxf3: 11.♖d1 with the direct threat of playing d5 next. 11...♘xf3 12.gxf3 cxd4 13.exd4 O-O Black's position is looking solid. 14.♙e2 In exchange for the bad structure on the kingside White has the bishop pair and nice central pawns. I think that White is better here.]

11...cxd4 Very direct play. [11...O-O was another option.]

12.exd4 ♘xe5 13.dxe5 ♘d7 So now we have a very interesting position. In case Black is able to play Nc5 and maybe O-O it would only be her who could be better, but of

course in case it doesn't work out the black king will remain dangerously placed on e8.

14.♘f4 protecting the e5 pawn and at the same developing a piece, which can't be bad.

14...g5 Black is starting a very risky-looking plan, but this was probably the best choice. [Another option could have been 14...♘c5 15.♘h7 ♙d4 (15...g6 of course loses to 16.♘xg6 fxg6 17.♙xg6+ ♔d7 18.♖ad1+ and White is winning.) 16.♘e2 ♙d7 and Black wants to castle queenside or play Qc6 with some play, but White is probably better here, although the position is far from clear.]

15.♘g3 h5 Black continues hunting the white bishop.

16.h3 h4 17.♘h2 g4!? A very interesting move. [In case of 17...♘c5 18.♘e2 it is hard to say what to do next for Black. To castle kingside looks very dangerous and to castle queenside is simply impossible because White prevents it with Rd1. 18...a6 preventing Nb5. 19.♖ad1 ♙c7 and the position is still complicated, but White should somehow be better position because of the position of the black king on e8.]

18.♘e4?! Now Black is fine. White should have taken the pawn on g4. [To win a pawn is usually a good idea if you don't see a direct loss.. 18.hxg4 18...♘b4! is probably Black's best chance. In case White is in time to play Be4 it is hard to

imagine Black getting any compensation for the pawn. (18...h3 19.♙e4 hxg2 20.♙xg2 The white king is feeling safe on g2. 20...♚c7 21.♙xb7 ♚xb7+ 22.♚e4 and White is clearly much better.) 19.♙e4 White has many other moves, but then Black can play h3 next with strong play on the kingside. 19...♙xc3 20.♙xb7 ♙xa1 21.♚xa1 ♚b8 and maybe White is a bit better but the position is very unclear.]

18...♙xe4 19.♚xe4 gxh3

20.♙b5?! This move was clearly not needed. [20.gxh3 20...♚c8 21.♚fd1 ♚c7 with a fighting position.]

20...♚b8? This move is really hard to explain. The black rook belongs to c8 and not b8. [Why not simply win a pawn?! 20...hxg2 21.♚fd1 ♚c8 Black's position looks very dangerous, but it is probably just fine. 22.♙xa7 ♚c5 and I think it is already White who needs to be careful here.]

21.gxh3 a6?! Another unlucky decision. [Black should have hurried with 21...♙c5 and now no matter where the white queen will go Black should continue with Qd3!, bringing the queen into the game.]

22.♙d6+ ♙xd6 23.exd6 Now Black is already in some trouble. Material is equal but the black king remained in the center. White's advantage is obvious.

23...♚g5+ 24.♙h1 White has a lot of different plans, like dominating on the g-file or trying to push f4-f5.

24...♚c8 25.♚ae1! A strong move! Now f4-f5 is a heavy threat.

25...♙d8 Black decides to keep her king on d8, which is probably the best choice in the current situation.

26.♚g1 ♚c5 Black attacks the c4 pawn and wants to exchange queens with Qc6.

27.♚f4! Another great move by Koneru, who spots the weakness on f7 which is hard to defend.

27...♚f5 There was no better way to defend the f7 pawn.

28.♚xf5 exf5 Black has exchanged the queens which is very good, but she also destroyed her pawn structure and now the white rooks will be able to enter the 7th rank.

29.♚e7! ♚f8 30.♙f4 The white bishop is going to h6 to chase the black rook from f8.

30...♚xc4?! and it seems like this is already the losing move. [In this difficult position Black should have played the precise 30...♚c6! attacking the d6 pawn. 31.♙h6 ♚h8 32.♚xf7 ♚xd6 of course Black's position is very bad, but the fight for a draw would continue.]

31.♙h6 ♚h8 32.♚xf7 Now that the d6 pawn is alive,

everything is falling apart.

32...♔c8 [It is already too late to try and get the d6 pawn:
32...♖c6 33.♕f4]

33.♖g7 What a domination of the white pieces!

33...♘c5 [33...♖d8 34.♕g5 and it is over.]

34.♕e3 Another accurate move. White does not hurry as she knows that the game is almost over and places her pieces perfectly.

34...♖d8 [34...♘e6 35.♖g6 and the black knight has no more good squares...]

35.♕xc5 ♖xc5

36.♖a7 threatening mate on a8.

36...♔b8 37.♖gb7+ ♔c8 38.d7+ and Black needs to give her rook which means the end. A great game by Koneru! Even if things were looking "simple" her play was really strong and very precise. **1-0**

The K-Files.

Breaking the Symmetry I - 5.e3

GM Alexander Khalifman
FIDE World Chess Champion (1999)

Best rating: 2702

(3) Breaking the Symmetry I - 5.e3 [D71]

1.d4 ♘f6 2.c4 g6 3.g3 c6 4.♗g2 d5

The symmetrical Gruenfeld is a long-time headache for the players who prefer to fianchetto the kingside bishop against the Gruenfeld and the King's Indian. Black's setup is extremely solid and passed many tests on the highest level. So it seemed that it was hardly possible to find new interesting way for White at the early stage. But Vladimir Kramnik once again proved that nothing is impossible by playing a novelty on move 5(!!!). And not just a novelty, but a completely new and

independent plan. What is even more valuable is the fact that it was played in a very important moment (the penultimate round of London Candidates, London 2013 vs/ Boris Gelfand). In the following period this idea was tested by many top players including Kramnik's archrival Veselin Topalov and just recently by Shakhriyar Mamedyarov but the assessment is still far from clear.

5.e3 White's idea is understandable: he plans to develop the knight to e2 where it doesn't limit the activity of the fianchetto bishop. The drawbacks are also rather obvious: the c4 pawn becomes vulnerable and the important e5 square is not kept under enough control. So what is more important? Black has 2 main answers: just completing the development as if nothing happened (5... Bg7) or immediately accepting the gambit (5... dxc4).

5...♗g7 Development first of all. This is quite solid but maybe not enough to equalize completely. [An ultra-creative move like

a) 5...♗f5 6.♘e2 ♔d7 7.b3 ♗h3 aims for an early kingside attack but is Black's development advanced enough for this? 8.♗xh3 ♔xh3 9.♘f4 ♔f5 10.O-O ♘bd7 11.f3! Suddenly the black queen becomes a target. 11...dxc4 12.bxc4 ♔a5 13.♔b3 e5 14.♘d3 O-O-O (Rodshtein - Nepomniachtchi, Legnica 2013) would lead nowhere if White reacted precisely. 15.♘a3! (15.♘c3!?)

b) 5...b5 trying to define the queenside structure immediately. 6.cxd5 (The less committing 6.b3!? might be an option.; 6.c5 6...e5 is fine for Black.) 6...cxd5 7.♘c3!? (7.♘e2 7...e6 8.♘d2 ♗b7 9.♘b3 ♘bd7 10.♗d2 a5∞ (Loetscher - Krassowizkij, Austria 2014) and White can't use the weakened c5 square so straightforwardly.) 7...a6 (Of course not 7...b4 8.♔a4+) 8.♘ge2 (The ambitious 8.e4 8...dxe4 9.♘xe4 ♘xe4

10.♟xe4 ♖a7∞ doesn't promise anything.) 8...♟b7 9.♞f4 e6 10.♞d3 ♞bd7 11.O-O In this situation the weakened c5 square is quite sensitive. White has certain pressure. After the natural 11...♟d6△12.b4 ♞b6 (12...O-O 13.a4+=) 13.f3+= the e3-e4 idea is quite annoying.;

c) The most critical answer 5...dxc4 will be examined in part 2.]

6.♞e2 O-O 7.O-O The standard moves are played and now Black must do something to develop his queenside.

7...b6 is the most popular move. [

a) 7...dxc4 8.♞a3 ♞bd7 9.♞xc4 transposes to the 5...dxc4 line but it's not the most favorable version for Black.;

b) 7...♞bd7 Dobrov - Khusenkhojaev, Varna 2014. As usual in this structure the black knight is a bit misplaced on d7 when White exchanges pawns on d5. 8.cxd5!? cxd5 9.♞bc3 e6 10.a4 a5 11.b3 b6 12.♟a3 ♖e8 13.♞b5+=;

c) 7...♖e8 8.b3 ♞bd7 See the note from the previous line. 9.cxd5!? (White shouldn't postpone this exchange: 9.♟b2 9...e5 10.cxd5 ♞xd5 11.e4 ♞c7 12.♞c2 Popilski - Aharon, Jerusalem 2015 12...exd4!? 13.♞xd4 ♞e5⇒) 9...cxd5 (9...♞xd5 10.e4 ♞c7 11.♞bc3 e5 12.d5+=) 10.♞bc3 e6 11.a4+=;

d) 7...♟a6 8.b3 (With the knight on a6 it's a different story

and now the exchange doesn't promise much: 8.cxd5 8...cxd5 9.♞bc3 b6 Black has enough time to develop his pieces comfortably and can strongly meet the opponent's action in the center. 10.f3 ♟b7 11.e4 dxe4 12.fxe4 e5 13.d5 ♞e8∞) 8...b5 9.♞d2!? (There is no reason to decentralize the knight. 9.♞a3 Wen - Wan, China 2013 and it becomes obvious after 9...bxc4 10.bxc4 ♞b4⇒) 9...♟f5 10.♞f3+=;

e) 7...e6 8.b3 (Another option is 8.♞d2 8...♞bd7 9.b3 b6 10.♟b2 ♟a6 Davila - Cardenas Carbajal, Panama City 2013 and now 11.♞f4!?+= prevents Black's counterplay in the centre.) 8...♞bd7 9.♞bc3 (after 9.a4 9...e5 10.♟a3 ♖e8 11.cxd5 ♞xd5 12.♞d2 exd4 13.♞xd4 Harikrishna - Salgado Lopez, Doha 2014 13...a5!? 14.♞e4 ♞b4 15.♞d6 ♖e7 16.♞d2 ♞e5= Black is fine.) 9...b6 But the exchange on d5 works once again when the black knight is on d7: 10.cxd5!? (When the white knight is on c3 10.♟a3 10...♖e8 11.♖c1 Edouard - Konopka, Wroclaw 2014 White has to be worried about the c4 pawn all the time. 11...a5!? 12.♞f4 (12.e4 12...♞xe4 13.♞xe4 dxe4 14.♟xe4 ♟b7 15.♞c2 ♞c7=) 12...♟a6 13.♞d3 b5 14.cxb5 cxb5=) 10...exd5 (The other option 10...cxd5 11.♟a3 ♖e8 12.♞b5 ♟a6 13.♞d6 ♖f8 14.e4+= doesn't solve the problems either.) 11.b4 A pawn minority attack is very typical for this structure. 11...♟b7 12.b5 c5 13.♞f4 cxd4 14.exd4+=;

f) 7...a6 8.b3 b5 9.♞bc3 (9.♞d2!? is also interesting.) 9...♟b7 10.♞f4 e6 11.♞d3 ♞bd7 Edouard - Fedorovsky, Munich 2015 and now White would start regrouping his pieces. 12.♟a3!? ♖e8 13.♖c1 ♖c8 14.♖e1 ♟a8△15.cxb5 cxb5 16.♖e2 ♞b6 17.♖ec2+= trying to use the c5 square.;

g) 7...a5 White should try to keep the tension in the center with 8.♞f4!? (Here the exchange 8.cxd5 8...cxd5 9.♞bc3 e6 10.b3 ♟d7 11.♟a3 ♖e8 12.♞d3 ♞a6 13.♖fc1 ♞b4= Zhao Xue - Howell, Auckland 2015 doesn't make much sense since the

black pieces are quite active.) 8...dxc4 9.♘a3 ♘d5 10.♘xc4 ♘xf4 11.gxf4+;

h) 7...♙f5 8.b3 intending 9.Nbc3. (8.♘d2 Le Quang Liem - Troff, Saint Louis 2013 8...♘bd7!? 9.b3△ e5) 8...b5 9.cxb5!? (Otherwise Black has no problems: 9.♘d2 9...♘bd7 10.a4 bxc4 11.bxc4 e5 12.♙a3 ♖e8= Wang Yue - Dominguez, Beijing 2014) 9...cxb5 10.♘bc3 b4 (10...a6 11.♙a3+=) 11.♘a4 ♘bd7 12.♘f4 e6 13.f3+= and the black bishop is not very comfortable on f5.]

8.b3 ♙b7 [Before White puts the knight on c3, attacking c4 doesn't bring the desired results:

a) 8...♙a6 9.♘d2 ♘bd7 10.♙b2 ♖c8 11.♘f4!? (Otherwise Black would prepare e7-e5 in a certain moment. 11.♖c1 11...b5 12.c5 b4 13.a3 bxa3 14.♙xa3 e5= Adhiban - Paragua, Manila 2013; 11.a4 11...♖e8 12.♖e1 e5 13.a5 b5 14.cxd5 ♘xd5 15.♘e4 ♖e7= Bhat - Popilski, Durban 2014) 11...e6 12.♖e1+= with a comfortable positional edge.;

b) 8...a5 9.♘f4 ♙a6 10.♘d2 e6 11.♖e1 (11.a4 was played by Topalov but after 11...♘bd7 12.♙b2 ♖c8 13.♖c1 ♖e7 14.♖c2 ♖fd8 15.♖a1 c5!= Topalov - Kamsky, Thessaloniki 2013 Black was just in time with efficient counterplay.) 11...♘bd7 12.♙b2 (12.♙a3 12...♖e8 13.e4 dxe4 14.♘xe4 ♘xe4 15.♙xe4 ♖c8 16.♖c1 b5=) 12...♖c8 (12...b5 13.♖c1 bxc4 14.bxc4 ♘b6 15.♙f1+=) 13.♖c1 ♖e8 (After 13...♖e7 14.e4 must be considered seriously. 14...dxe4 15.♘xe4 ♘xe4 16.♙xe4+=) 14.♖c2+= Once again Black doesn't have active counterplay and his defensive task is quite unpleasant.]

9.♘bc3 [The active move of the rook pawn is not exactly in time because of 9.a4 9...a5 10.♙a3 ♖e8 11.♘bc3 e6 12.♖c2 Yuffa - Villegas, Pardubice 2014 12...♘a6∞aiming for the b4 outpost.; However if White is worried about the necessity to sacrifice the pawn he can also develop his pieces in a more conservative way: 9.♙b2!? 9...♘bd7 10.♘f4 e6 11.♘d2+=]

9...♘bd7 [If Black tried to use the weakness on c4 by playing 9...♙a6 Topalov would most probably sacrifice this pawn: 10.♙a3 dxc4 11.e4 cxb3 12.♖xb3∞]

10.a4!? [Black is well-developed now and the typical 10.cxd5 10...cxd5 11.♘f4 e6 12.♙a3 (12.♘b5 12...♘e8 13.♙a3 ♙a6 14.♙xf8 ♙xb5 15.♙xg7 ♙xf1 16.♖xf1 ♖xg7=; 12.a4 12...♘e4=) 12...♖e8 13.♘b5 (13.♖c1 13...a6=) 13...♙a6= doesn't promise anything.]

10...♖e8 11.♙a3 e6

12.♖c1 [But now once again the exchange is worth a look: 12.cxd5 12...exd5 (12...cxd5 13.♘b5 ♙f8 14.♖c1+=) 13.b4+=]

David vs. Goliath

Peter Zhdanov
Chief Editor of Pogonina.com

In this entertaining column we are reviewing the most unexpected results that occurred last week. Players usually face opponents of a similar level. Considerably less frequent are situations when a significantly lower-rated player succeeds in beating a much stronger adversary.

The previous week has brought 26 upsets - not bad at all!

The FM Reichmann (2279) - Bachlerner (1959) encounter turned out to be a 13 move miniature. The Horvath (2013) - IM Moser (2453) game lasted 84 moves.

The highest-profile upset of the week was Lewtak (2301) - GM Kovalenko (2661), 1-0. Another notable victim was GM Ortiz Suarez (2625) who went down against CM Puranik (2264).

Time for the "fatalities", i.e., checkmates on the board. The first one is from Skettos (1428) - Markidou (1783):

The second one is courtesy of Davidsson (1454) - Kruglyak (1775):

Top-10:

Carraro (2099) - Fuentes (1570), 0-1, [529](#) points
 Babijczuk (1549) - Hald (2069), 1-0, [520](#) points
 Lournagaray (1535) - Roman (2006), 1-0, [471](#) points
 Echeguren (1737) - Sanchez Sandoval (2193), 1-0, [456](#) points
 Horvath (2013) - Moser (2453), 1-0, [440](#) points
 Nguyen Dang Hong Phuc (2047) - Padmini (2454), 1-0, [407](#) points
 Skettos (1428) - Zacharoplastis (1801), 1-0, [373](#) points
 Barbosa (2501) - Le Kieu Thien Kim (2138), 0-1, [363](#) points
 Puranik (2264) - Ortiz Suarez (2625), 1-0, [361](#) points
 Lewtak (2301) - Kovalenko (2661), 1-0, [360](#) points

Average gap: 428; White won 8 games, Black won 2 games.

You can view all the games in the accompanying pgn file.

If you have ever won a game against someone rated 300 points or above yourself, please send it to peter@pogonina.com for publication. Any additional information (a photo, annotations, etc.) will be appreciated.

GM Csaba Balogh
Best rating: 2672

White is a pawn up but as we know, in rook endgames the defensive side always has a chance to hold, especially in such cases when all the pieces are ideally placed. The king is close to the passed pawn and the rook is behind the pawn and it is ready to counterattack the c3 pawn if the white king goes for the d6. White's only winning attempt could be to trade the h6 pawn for the d6, cut the black king away from the c-pawn and promote it with the help of the king. However with the best defense, Black holds the draw rather comfortably.

52...♖d2? Black was rightly afraid of the Rd8 idea, but he should have prepared for it in another way. Irina Krush punishes this mistake with very nice technique! [The most natural 52...♗g6 was also the best. Black obviously does not want to take the h6 pawn, because he loses the pawn endgame afterwards, but he frees the rook to protect the d6

and counterattack the c3 pawn. 53.♖g8+ (53.♖d8 53...♖d2 54.♗b5 ♖d3 55.c4 ♖d4= holds easily, as Black can take on h6 next and hurry back to the pawn. White cannot make progress.) 53...♗f7 54.♖g7+ ♗f6 55.♖d7 ♗e6 56.♖h7 ♗f6= 57.♖h8 ♗g6 We have reached our initial position.]

53.♖g8! Cutting the king and threatening to promote the h-pawn. Black is forced to go back to the h-file!

53...♖h2 54.♖d8! A great move! White lures the king away from the h-pawn.

54...♗e5

55.♖h8! Compared to the initial position, the king has gone to e5, getting unprotected against the threatening check after pushing h7!

55...♖h4+ [It is too late to go back because after 55...♗f6 56.h7! ♗g7 (Trying to save the d-pawn with 56...♗e7 loses to the typical trick 57.♖a8!+-) 57.♖d8 ♗xh7 58.♖xd6 the king is too far away from the c-pawn... 58...♗g7 59.♗b5 ♗f7 60.c4 ♗e7 61.c5+- will be the same as the game.]

56.♗b5 ♗d5 Black tries to hide the king from the checks in front of the d-pawn. [56...♗f6 is the same as before. White wins after 57.h7 ♗g6 58.♖d8+-]

57.h7 ♖h5 58.♗b6 [The most direct way to win was 58.c4+

58...♔d4+ 59.♔c6 (59.♔b4 is probably the easiest and it transposes to the game.) 59...♖h6 (59...♔xc4 60.♔xd6 ♔d4 61.♔e6 ♔e4 62.♔f6 ♔f4 63.♔g6 ♖g5+ 64.♔h6+- and the rook goes away from h8 next move.)

60.c5! Not necessary (60.Kb5 Rh5 61. Kb4 transposes to the game), but very instructive. White wants to destroy the shelter of the black king. 60...dxc5+ 61.♔b5 ♔c3 Otherwise Rd8 and h8Q. 62.♔xc5 ♖h1 (62...♖h5+ 63.♔d6 ♔d4 64.♔e6 ♔e4 65.♔f6 ♔f4 66.♔g6 ♖g5+ 67.♔h6+-) 63.♔d5 ♔d3 64.♔e5 ♔e3 65.♔f5 ♔f3

How to make progress now? Black hides his king by following his opposition in the same line. Kg6 is met by Rg1 check forcing the king back to the f-file and the rook also returns to h1. 66.♖f8! Nice tactics even with such a limited material on board! 66...♖xh7 67.♔g6+-]

58...♖h6 59.c4+ ♔d4 [Black cannot sacrifice his rook for the h-pawn, because the white king is too close to the d-pawn... 59...♔xc4 60.♖c8+ ♔b4 61.h8=♖ ♖xh8 62.♖xh8+-]

60.♔b5 ♖h5+ 61.♔b4 ♖h1 62.♖d8! Very unfortunate situation for Black. She is forced to take on h7, but then Rxd6 not only takes the pawn with check but also cuts the king away from the c-pawn.

62...♖xh7 63.♖xd6+ ♔e5 64.c5 The rest is easy. Black cannot put up any kind of resistance. White keeps the king cut, advances the pawn slowly and wins with the help of bridge-building at the very end.

64...♖b7+ 65.♔a5 ♖b1 66.♖d2 ♔e6 67.c6 ♔e7 68.c7 ♖c1 69.♔b6 ♖b1+ 70.♔a7 ♖c1 71.♔b7 ♖b1+ 72.♔c8 ♖b3 73.♖e2+ ♔f6 [73...♔f7 Here comes the so called bridge-building with 74.♖e4! ♖b1 75.♔d7 ♖d1+ 76.♔c6 ♖c1+ 77.♔d6 ♖d1+ 78.♔c5 ♖c1+ 79.♖c4+-]

74.♖e8 ♔f7 [74...♖b1 loses to 75.♔d7 ♖d1+ 76.♔c6 ♖c1+ 77.♔b6 ♖b1+ 78.♔a5+- and the king comes in zigzag on the a- and b-files.]

75.♖e4 Black resigned, she did not want to go through the 73...Kf7 line. **1-0**

**(15) Harika, Dronavalli (2492)
- Kosteniuk, Alexandra (2529)**WCh Women 2015(3.3),
2015.03.25GM Arkadij Naiditsch
Best rating: 2737

We are in the 3rd round and in the 1st rapid game. Things in the match were quite crazy from the beginning, as first Kosteniuk lost her white game, then recovered with a great win with Black in classical chess. In the current game, things were around equal all game long until Black started to play inaccurately in the rook endgame, so we finally reached this interesting endgame with a pawn up for White. White's idea is pretty simple, to put the rook on a8 and start running to b5 with the king, but it is hard to realize because Black always has Kg5 after White's Ra8. Let us take a look at how things developed in the game.

42...♖a4? The first move into the wrong direction. Black should not have chosen a passive strategy. [42...g6! would have been the correct way to act. Black needs her king to become more active. 43.fxg6 (In case White would try 43.♖e4 43...♖xg2 seems to give Black an easy draw. 44.♖f7 ♖g5

45.♖g7 White is trying to win some tempo but losing the f5 pawn. 45...♖e2+ 46.♖d5 ♖xf5 47.a7 ♖a2 48.♖c6 g5 49.♖b7 ♖f4 and Black is clearly in time to make a draw.) 43...♖xg6 44.♖a8 might be White's best chance. (44.♖e4 44...♖xg2 Now in comparison to the game the f-pawn can start advancing. 45.♖c7 ♖a2 46.a7 f5+ and the f-pawn starts to run. 47.♖d5 f4 48.♖c6 f3 49.♖b7 f2 50.♖c1 ♖b2+ with an easy draw.)

44...♖f5! It is very important for Black to activate his king. 45.♖e3 White's only chance is to run to the a-pawn and hope to be fast enough. (45.a7 leads to a dead drawn position. 45...♖a3+ 46.♖e2 ♖f4 47.♖d2 f5 now White's only chance is to run with his king to h5. 48.♖c2 ♖a1 49.♖b3 ♖a5 50.♖b4 ♖a1 51.♖b5 ♖b1+ 52.♖c6 ♖a1 53.♖d6 ♖a6+ 54.♖e7 ♖a5 55.♖f6 ♖a6+ 56.♖g7 and just when the white king crosses the g-file, the black king can enter the h2 square. 56...♖g3 57.♖h7

57...♔h2 and once again the position is a dead draw.)
45...♖xg2 46.♔d4 ♜g3 Black wants to collect the h-pawn so White is forced to change the place of her rook. 47.♞c8 ♞a3 48.♞c6 ♔f4 and the black king is going for the h3 pawn. 49.♔c5 ♞xh3 50.♞xf6+ ♔g5 with an immediate draw.]

43.♔e3! The white king starts marching in direction of the a-pawn.

43...♞a2?! Not the best once again... [Once again the right move was 43...g6]

44.♔d4! Harika shows no mercy! Black is in big danger. White's plan of playing Ra8 and getting the king to b5 is becoming a reality.

44...♞xg2?! This is the losing move. Now White is in time to win the game. [Let us take a look at what would happen in case Black would continue waiting... It would lead to crazy complications! 44...♞a1 45.♔c5 ♞a2 (45...♞c1+ is basically the same as 45...Ra2, except that Black has the worse position of the rook on the 1st rank. 46.♔d5 ♞d1+ 47.♔c6 ♞c1+ 48.♔b7 ♞b1+ 49.♔c8! ♞a1 50.♞a8 Another important move!

Now the white king is going to hide on a7. 50...♔g5 51.♔b7 ♞b1+ 52.♔a7 ♔xf5 Black wins the f5 pawn but it is too late. 53.♞b8 followed by Rb2-Kb6-a7 and White is easily winning.) 46.♔b6 ♞b2+ 47.♔c7 ♞c2+ 48.♔b8 (To run to g8 leads to nothing more than a draw: 48.♔d8 48...♞a2 49.♔e8 ♞a1 50.♔f8 ♞a3 51.♔g8 ♞a1 White can't improve her position any longer, so the g7 pawn must be taken. 52.♞xg7 ♞xa6 53.♞g6+ ♔h5 54.♔g7 White is going for the f6 pawn, but Black has a very nice drawing idea: 54...♞a7+ 55.♔xf6 ♞a6+ 56.♔g7 ♞a7+ 57.♔g8 ♞a8+ 58.♔h7 White is 2 pawns up and Black seems to be lost- but no!

58...♞h8+!! 59.♔xh8 with stalemate!) 48...♞a2 49.♞a8 ♔g5 Now Black collects both the f5 and g2 pawns. 50.♔b7 ♞b2+ 51.♔a7 ♔xf5 52.♞b8 ♞xg2 It seems like White should be winning somehow, but how?! 53.♞b4 cutting the black king. (53.♞b5+ 53...♔f4 54.♞b4+ ♔f3 and it is unclear how White can win this position.) 53...♞a2 54.♔b6 g5 55.a7 Black's position is on the verge, but maybe things just work out for her. 55...♔e6! A very important move! White wanted to play Rb5+ and Ra5 and it is also important for Black to keep her king as central as possible to give the white king a "shoulder block".

56. **Rb5** (56. **Rc4** 56... **f5** 57. **Rc6+** **Qf7** 58. **Rc5** **Rxa7** 59. **Qxa7** **Qf6** 60. **Qb6** **g4** seems to be a draw as well.) 56... **Rxa7** 57. **Qxa7** **f5** 58. **Qb6** **g4** 59. **Qc5** and Black needs to find the only defence: 59... **Qe5!** keeping the white king away from reaching the f2 square. The position is a draw.]

45. Rc7 Now Black is lost...

45... Ra2 46. a7 The problem is that the black king is still passive on h6!

46... Qg5 47. Rxg7+ Qxf5 48. Qc5 and White has all the time in the world...

48... Qf4

49. Rg4+! Another accurate move! White is securing to get the h4 pawn and can thus be 100% sure to win the game.

49... Qe3 50. Qb6 f5 [50... **Rb2+** 51. **Qa5** **Ra2+** 52. **Ra4** and it is over.]

51. Rxh4 Qf3 52. Rh8 Now of course it is too simple to mess up...

52... Qg3 53. a8=Q Rxa8 54. Rxa8 Qxh3

55. Rf8 and the white king is easily in time to come back to e3 and stop the f-pawn. We can conclude that from the beginning the position should be a draw but Black has to act actively and later on the position might still be a draw but from a practical point of view it is closer to be lost. **1-0**

Chess and the City. One man's meat is another man's poison...

WGM Elisabeth Paetz
Best rating: 2493

This is a phrase which we are pretty much facing at the ongoing Women's World Championship. That chess is compared to other sports is quite cruel in a way that it is much easier to blunder when you are extremely close to a win. However the resulting emotions, relief or joy, can be heartbreaking or euphoric for different people at the same time...

After I already got kicked out of the tournament in round one, I have the pleasure (or some may rather call it a punishment) to comment on the games of my dear colleagues together with GM E. Miroshnichenko from Ukraine.

Only 8 more players are still in the tournament. But let me give you a small summary of the happenings so far.

I would say that the classical games went in a more or less normal way, whereas the tiebreak matches are in some cases even comparable to a horror scenario and the heart attack risk is very high for any coach involved. Daulyte, Hoang Qian and Ushenina are so far the most tragic victims of this tournament. Certain people believe that luck does not exist in chess and that may be actually true to some extent, however missing a game because of a mobile phone setting error is what I would call luck or bad luck, depending from which angle you look at it.

The current situation in this tournament has not left too many surprises so far, apart from one exception. My first round opponent Meri Arabidze is still in the tournament! In her last match she managed to eliminate another favorite, Victory Cmilyte, and she is now facing India's second highest ranked player Harika Dronavalli.

Apart from these two, some of the top favorites are still in the tournament, such as Humpy Koneru, Anna Muzychuk and her younger sister Marya, Zhao Xue and let's not forget one of the strongest woman players of the past decades, Pia Cramling from Sweden.

Impressions of this great championship can be found under:

Editorial Preface

The Women's World Championship is coming to an end. The two finalists are Natalija Pogonina from Russia and Mariya Muzychuk from Ukraine. Both players were fighting very hard to reach the final stage of the event. The score is 1.5-0.5 to Muzychuk, but the final consists of 4 classical games. Despite being behind, Natalija Pogonina must still feel confident, since she passed the last three(!) rounds after losing the first game of the match, but she always equalized in the second and went through in the tiebreak.

The very strong Aeroflot Open in Moscow is also coming to its conclusion. Before the last round the sole leader is Ian Nepomniachtchi with the amazing score of 6.5/8. Three young GMs, Ivan Bukavshin, Daniil Dubov and Lu Shanglei are just half a point behind him.

The US Championship has just started. We expect a huge fight for the first place between Hikaru Nakamura and Wesley So. They have already shown their intentions to the field by getting off to a great start with 2/2. However the field is full of very talented young players, who can cause surprises at any moment and obviously one should never forget about the reigning champion, Gata Kamsky.

As usual we wish you a lot of fun with the current issue! Enjoy!

Two best games of the past week

(1) **Zvjaginsev, Vadim (2658)**
- **Bok, Benjamin (2587) [C44]**Aeroflot Open A 2015(3.11),
2015.03.29GM Csaba Balogh
Best rating: 2672

Vadim Zvjaginsev was always a very resourceful player with extraordinary imagination in unusual positions. He is also known for his creative opening play...

1.e4 e5 2.♘f3 ♘c6 3.g3 Obviously this move cannot create real problems for Black, it rather aims at avoiding a theoretical battle.

3...♙c5 Black keeps the structure closed. [An alternative is 3...♘f6 attacking the e4 pawn and after 4.Nc3 or 4.d3, d5 leads to a completely different game.]

4.♙g2 d6 5.O-O

5...f5 A highly ambitious move. The point is that in positions with Nf6 and O-O a standard idea is to play something like h6 and Nh7 followed by f5. Black would like to execute this plan,

but in a much better version because he is sparing 2 tempi. The drawback is clearly that Black opens the center too fast, while his king is still in the middle of the board. White has two moves to make use of it, otherwise Black develops with Nf6 and O-O and he is completely fine. [More normal was to finish the development with 5...♘f6 and O-O.]

6.exf5 ♙xf5

7.b4!! A brilliant resource, extremely creative play! Zvjaginsev follows the principle that he must open the center on the king. He wants to play d4, but first he lures one of the minor pieces to b4 in order to make the real plan more effective.

7...♙xb4 It is important to keep the knight on c6 to keep the position together. It protects the e5 square after White plays d4. [The black pieces become much more confused after 7...♘xb4 8.d4! This is a position which is impossible to calculate before 7.b4, one must have the intuition that White's compensation should be more than enough. The following lines seem to confirm it. 8...♘xc2 (8...♙b6 9.dxe5 ♘xc2 10.♘h4! This is a recurring motif in this game. The bishop does not have a square to protect the c2 knight and after 10...♘xa1 11.♘xf5 it is clear that things will end up badly for Black. The king faces an enormous attack and the knight

is also trapped in the corner.; There is a nice line after 8...exd4 9. ♖xd4 ♙xd4 10. ♔xd4 ♘xc2 11. ♔xg7 ♙f6

It all looks perfect for Black. He manages to trade queens and the a1 rook is caught, but suddenly the dark squared bishop becomes a hero. 12. ♙b2! ♔xg7 13. ♙xg7 ♘xa1 14. ♙xa1! taking the knight first and the rook remains trapped on h8.) 9.dxc5 ♘xa1 10. ♙b2 ♘c2 11. ♘h4! The same idea again. The bishop cannot defend the c2 knight anymore. An attempt to replace it with the queen, for instance 11...♔d7 is refuted by 12.c6! bxc6 13. ♘xf5 ♔xf5 14. ♙xc6+--]

8.d4 ♘ge7 Black must focus on quickly finishing the development. [8...exd4 9. ♖xd4]

9.c3! It is important to open the diagonal to b3 and a4 for the queen. This is the only way to gain some direct benefits before Black can castle.

9...♙a5 10.d5 [The alternative 10. ♔b3 to prevent castling also looks pretty interesting, although after 10...♔d7 with the idea of Be6 11.dxe5 d5 followed by 0-0, Black seems to be alright.]

10...♘b8 11. ♔a4+ c6 Black saves the piece, but he critically weakens his pawn chain, which allows White to organize his counterplay.

12. ♙g5! Developing with tempo and pinning the knight. Black must delay castling with another move, because White could take on e7 and then on a5.

12...♙b6 13. ♘h4 Very concrete chess! White wants to achieve the maximum as long as the king is still on e8.

13...0-0 Finally Black castles, but losing the light squared bishop is a very sad scenario for him. The power of the g2 bishop increases heavily by this and the pressure on the c6 pawn increases even further. But of course Black is still a pawn up, since the 7th move... [13...♙d7 could have been met by 14. ♔b3! keeping the king in the center. White could strengthen his position with Nd2-c4. 14...c5? locks the position and lets Black castle next move, but this move is a positional disaster after 15. ♘a3! and Nc4. The black pieces and his pawn structure are just terrible.]

14. ♘xf5 ♔xf5 15. ♔h4 The most natural move to keep the annoying pin alive, but perhaps it was not objectively the best. [The simple 15. ♙xe7 15...♔xe7 16. ♘d2 seems to give White a pleasant edge. Black has difficulties with finishing the development of his queenside. The only way to do it is by giving back his extra pawn 16...♘d7 but now he ends up in a worse position after 17.dxc6 bxc6 18. ♔xc6 ♔af8 19. ♘e4+= The e4 knight is extremely strong. It attacks the target on d6 and protects the weakness on f2.]

15...♖f7 16.a4 Another natural positional move! White would like to weaken the light squares with a5-a6. [16.♘d2 16...h6 17.♙xe7 ♖xe7 18.♙xe7 ♖xe7 will lead to more or less to the same as the game after a4. Nc4 is answered by Bc5.]

16...h6 17.♙xe7 ♖xe7 18.♙xe7 ♖xe7 It is a huge relief for Black to finally unpin himself and simplify the position a bit, but the danger is far from over... His queenside is still undeveloped and he is very vulnerable on the light squares.

19.a5 ♙d8 Too passive. [Black should have played 19...♙c5 20.♘d2 Black should not suffer anymore and return his extra pawn for further simplifications... (Black was probably afraid of 20.a6 but actually he holds after 20...b6! and on 21.dxc6 ♖c7 Black has just enough time to take on c6 and leave from the pin with his a8 rook.) 20...♘d7! 21.dxc6 bxc6 22.♙xc6 ♖c8 23.♙d5+ ♔f8 24.♘e4 White seems to still be in control, but after 24...♘f6! Black trades the knights and he should be able to hold the draw with the opposite colored bishops.]

20.♘d2! Black has probably underestimated this simple positional move. White delays playing a6, but he intends to improve his position with Nc4, Rfb1 and only in a better moment to push a6. [On the direct 20.a6 Black had planned to reply with 20...c5! which is why he did not put his bishop to c5 in the previous move. White still has very nice compensation

after axb7 Rxb7 and Nd2, but it is not the same as in the 13... Bd7 line, because the position got simplified a lot!]

20...♖c7 Black protects his c6 pawn in order to develop his b8 knight! [20...a6 21.♖fb1 is also unpleasant.]

21.♘c4 ♙e7 Black wants to protect everything, but he blunders a beautiful idea... [21...♘a6 was the only move, although White has a clear plus here as well. 22.♘d6±]

22.♘b6!! This fantastic tactical blow finishes the game right away! The rook is trapped on a8.

22...axb6 23.axb6 ♘a6 [23...♖xa1 24.bxc7+- White promotes to a queen next move.]

24.dxc6 bxc6 25.♖xa6 [Finishing the game in style! Black resigned in view of 25.♖xa6! 25...♖xa6 (25...♖cc8 26.b7!+-) 26.bxc7 ♖a8 27.♖b1+- (Or 27.♙h3+- The 7.b4 and 22. Nb6 moves were really adorable.)] **1-0**

**(2) Pogonina, Natalija (2456)
- Cramling, Pia (2495) [B28]**

WCh Women 2015(5.2),
2015.03.30

GM Arkadij Naiditsch
Best rating: 2737

We are in the 2nd game of the semi-final of the World Championship in Sochi. Pogonina lost her first game for the 3rd time in a row and needs to win the current game to equalize and play the tie-break tomorrow. It is very difficult to bounce back once after losing the first game, to make it twice is already exceptional, but to manage 3 comebacks just deserves a lot of respect. So let us take a look at how Natalija very confidently made the 3rd comeback a reality!

1.e4 c5 Cramling doesn't pick the safest opening when all she needed was a draw.

2.♘f3 a6 and this move is even harder to understand. Usually we see such openings in opens, during the first rounds, when a stronger player is trying to beat a weaker one.

3.♗e2 A normal move, but the main ones are 3.c4 and 3. c3 which both seem to bring White nice play.

3...e6 4.d4 cxd4 5.♗xd4 ♘f6 6.♗c3 and we are back to the main lines.

6...♗b4 Black is going for a very risky line. [6...d6 and we are in the very main position.]

7.e5 Of course! Natalija needs to win so she is going for a very sharp line.

7...♞d5 8.O-O White is sacrificing a pawn to get much better development.

8...♞xc3 9.bxc3

9...♗e7 The safest choice. [The game Giri-Vitiugov continued with 9...♗xc3 10.♗a3! White gives an exchange to keep the black king in the center. 10...♔a5 11.♗d6 The e5 pawn needs to survive. 11...♞c6 12.♞xc6 dxc6 13.f4 ♗xa1 14.♔xa1 Black is an exchange and a pawn up, but White's position is better here! The very dangerous position of the black king and the very bad bishop on c8 give White more than just compensation for the lost material.]

10.♗f4 O-O 11.♔d3 This is nothing new and clearly evaluated as better for White.

11...b6 Black's intention to develop the bishop to b7 is right. [Of course it would be a relieve for Black to be able to play d6, but it just doesn't work: 11...d6? 12.exd6 ♗xd6 13.♞xe6! and White is winning.]

12.♗f3 Quite a logical move, but White also had another alternative: [Why not first play 12.♔g3 with the simple threat of playing Bh6 next. 12...♔h8 13.♗d3 and I think White's play on the kingside could become very dangerous.]

12...♖a7

13.♗e4! In my opinion this is a very strong move. White is weakening Black's pawn structure for the future.

13...g6 [To play 13...h6 14.♖g3 looks too dangerous for Black.]

14.♖fd1 White is bringing all her pieces to the center.

14...♗b7 Black can breathe a bit better after the bishop from c8 has been exchanged.

15.♗xb7 White wants to have the a6 pawn under attack, but maybe it was more simple to play 15.Rab1 with clear pressure.

15...♖xb7 16.♖ab1 White's idea is to prevent Black from playing Nc6 now.

16...♖c8?! A very strange move... [It was much more natural to play 16...♖c7 with the idea of playing Rc8 or Nc6 next. Black's position is almost OK.]

17.a4 A nice positional move. White stops Black from even dreaming about playing b5 one day.

17...♖c5 A natural move, but it allows a great maneuver...

18.♞b3! A very strong move! The white knight is going to take a fantastic position on e4 and now we can see how important the 13.Be4! move was, since the f6 and h6 squares are now very weak.

18...♖c7 19.♞d2 ♞c6 The black knight is out and White has to protect the e5 pawn.

20.♖g3 White continues playing for Ne4. [White could have won a pawn, but I think the position would be very close to a draw after 20.♖xa6 20...♖a7 21.♖b5 ♖a5 and White probably doesn't have anything better than to play 22.♖xb6 ♖xb6 23.♖xb6 ♖xa4 with a slightly better, but close to equal endgame.]

20...♖c8?! Too passive... Black had to look for fast counterplay. [20...b5! would have been the right choice. 21.axb5 ♖xb5 Exchanging one pair of rooks will make the defense a bit more easy. 22.♖xb5 axb5 23.♞e4 ♖a8 24.h4 and White still has some initiative, but Black is on a good way to equalize.]

21.♞e4 ♖d8 Black is trying to go into a passive defense, but it is usually a bad choice...

22.♗g5! Strong and logical! After the exchange of the black bishops the dark squares are becoming even weaker.

22...♗xg5 23.♞xg5 ♞a5 Black is trying to get her knight to c4, but from there it will not help on the kingside either. [White is doing better even after 23...♖c7 24.♖d6 ♞e7 25.♞e4 The domination on the dark squares is really scary!]

24. ♖e4 [24. ♖h4!? was maybe even stronger, provoking Black into playing h5, which could make White's play on the kingside even more efficient. 24...h5 25. ♖f4 ♖e7 26. ♖e4 ♖c4 27. ♖d3 and the black king is in big trouble!]

24... ♖c4 25. ♖d4 The white rook will very soon be able to act on the 4th rank.

25... ♖g7 26. ♖e1 All the white pieces are now in the attack and it is still unclear where Black's counterplay is.

26... h6 defending from a possible Ng5 move or Nf6 and Rh4.

27. h4! Exactly the right answer! White is securing her king from getting mated on the 1st rank somewhere in the future and she is also threatening to play h5 in a good moment.

27... ♖c7 I think this move was made out of despair. Black should have played the immediate 27...b5 and hope not to get mated.

28. f4 Now the e5 pawn is even more secured than it was before.

28... b5 Black's play comes too late...

29. h5! using the fact that Black can't take the a4 pawn.

29... ♖d8 [In case of 29...bxa4 White is winning with the silent move 30. ♖h4! and the game is over because Black has no

decent defense against the upcoming Qf6.]

30. axb5 Now White has all the time in the world again.

30... axb5 31. ♖g4! Pogonina really plays a fantastic game! With this silent move White is preparing the deadly threat of playing Rd3-Rg3 next. Black has no defence against it!

31... ♖e7 Other moves would not help much already.

32. ♖d3 Rg3 is coming...

32... ♖g8 33. ♖f6 ♖h8 34. ♖g3 and the g6 pawn can't be protected any longer. The game is over.

34... d5 35. hxg6 fxg6 36. ♖xg6+ ♖f8 White is a pawn up and the black king is under a huge attack. The game will not last much longer.

37. ♖a1! Precision until the end. The threat of Ra8 is finishing the game immediately.

37... ♖a7

38. ♖d7+ and of course Black cannot play 38... Qxd7 because of 39. Qf6 and Qxh8! Pogonina made it real, a 3rd comeback in the mini matches is done! This is really an extraordinary achievement of which Natalija can be very proud. The next day, to make things perfect, she won her rapid match 1. 5-0.5 and went into the final where she will face Marya Muzychuk.

1-0

The K-Files. Breaking the Symmetry II - 5.e3 dxc4

GM Alexander Khalifman
FIDE World Chess Champion (1999)

Best rating: 2702

(3) Breaking the Symmetry II - 5.e3 dxc4 [D71]

1.d4 ♘f6 2.c4 g6 3.g3 c6 4.♗g2 d5 5.e3 dxc4 Black accepts the sacrificed pawn and it's not easy for White to win it back.

6.♞e2 This is Kramnik's move. Now White is always ready to meet Be6 with Nf4. [However it might happen that the alternative 6.♞d2 invented by Edouard in August 2014 is the most critical line. 6...♗e6 can be played here since the knight can't jump to f4 yet. (

a) 6...c5 Black gives a tempo but pretends to clear the matters in the center as soon as possible. 7.♞xc4 (7.♞gf3

7...♞c6 8.♞xc4 ♗e6 (8...cxd4 is the playable alternative. 9.♞xd4 ♞xd4 10.exd4 ♗g7 11.O-O O-O∞) 9.♞a4 ♗g7 10.♞fe5 ♗d5 11.♞xc6 bxc6 12.O-O Edouard - Gledura, Hastings 2015, and now 12...♞d7!? 13.dxc5 ♞xc5 14.♞c2 ♗xg2 15.♞xg2 ♞d3 16.♞xd3 ♞xd3 17.e4 O-O-O= would allow Black to defend his queenside weaknesses with the king.) 7...cxd4 8.exd4 ♗g7 9.♞e2 O-O 10.O-O ♞c6 11.d5+= with a typical Gruenfeld structure and some edge for White.;

b) 6...b5 7.♞e2 White intends to open the c-file with b2-b3 and obtain good compensation for the pawn. 7...♞d5 (After 7...♗g7 8.b3 cxb3 9.axb3 ♞ White's play is easy.) 8.O-O a5 (8...♗g7 9.b3 c3 10.♞e4 b4 11.a3 ♞a5 12.♞b1 ♞) 9.e4 ♞b6 10.b3 cxb3 11.axb3 ♗g7 Dvirnyy - Salgado Lopez, Jerusalem 2015 12.♞f3!? O-O 13.♗f4=)

7.♞e2 ♗h6 This maneuver is known from some Gruenfeld-Bg5 lines. 8.♞c2 b5 9.O-O O-O 10.b3 cxb3 11.axb3 a5 12.♞f3!? (12.e4 allowed Black to solve his queenside development problems. 12...♞a6! 13.♞xc6 ♗d7 14.♞c2 ♞b4 15.♞b1 ♞c8 16.♞f3 ♗xc1 17.♞xc1 ♞xc1+ 18.♞xc1 ♞c7= Mamedyarov - Navara, Reykjavik 2015) 12...♗f5 (12...♞d5 13.♗d2= The black knight is still sleeping on b8.) 13.♞d1 ♗e4 14.♞c3 ♗d5 15.♞c2=]

6...♞bd7!? The most accurate move order. Black plans to defend the c4 pawn with the knight, thus avoiding the weakening b7-b5. [

a) 6...♞d5?! 7.O-O b5 looks suspicious because of 8.a4! ♗b7 (8...b4 9.e4 ♞c7 10.♗e3 ♗a6 11.♞d2±) 9.b3 cxb3 10.axb5 cxb5 11.♞xb3 ♞d7 (11...a6 12.♞ec3 e6 13.♞xd5 ♗xd5 14.♗xd5 ♞xd5 15.♞xd5 exd5 16.♞c3±) 12.♞bc3 ♞xc3 13.♞xc3 ♗xg2 14.♞xg2 a6 15.♞xb5 ♗g7 16.♞c3± Navara - Hammer, Tromsø 2013;

Immediate b) 6...b5 is more logical but after 7.O-O (7.a4

7...b4 8.a5 ♖a6∞) 7...a5 (7...♙g7 8.a4 b4 9.a5+=; 7...♙b7 8.a4 b4 9.♗d2 ♙a6 10.e4∞; 7...♙a6 8.b3∞) 8.b3 cxb3 9.axb3∞ White has full compensation for the pawn.;

After c) 6...e5 7.O-O (7.dxe5?! 7...♙xd1+ 8.♙xd1 ♗g4±) 7...exd4 8.♗xd4∞ the white pieces only become more active.;

d) 6...♙g7 This was Gelfand's choice in the very first game with 5.e3 6.Ne2. 7.O-O allows Black to return to the plan with Nb8-d7-b6. (7.♗a3!? is more precise. 7...e5 8.♗xc4 exd4 9.♗xd4 O-O 10.O-O ♙e7 (10...♗bd7 11.b3 ♗b6 12.♙a3 ♗xc4 13.bxc4+=) 11.b3 ♗d8 12.♙a3 c5 13.♙e1 ♗a6 14.♙a5 ♗d5 15.♗ad1 ♙g4 16.♗f5 ♙xf5 17.♗xd5 ♗xd5 18.♙xd5+= Greenfeld - Semprun Martinez, London 2014 White's pieces are more active.) 7...O-O (7...♗bd7!? - 6...♗bd7) 8.♗a3 (The other way to attack the pawn 8.♗d2 after 8...b5 only brings White additional problems. 9.a4 (The standard 9.b3 9...cxb3 10.axb3∞ gives White certain compensation.) 9...♗d5 10.axb5 cxb5 11.♗c3 ♙b7 12.♙f3 (12.♗xb5?! 12...♗xe3! 13.fxe3 ♙xg2 14.♙xg2 ♙d5+ 15.♙f3 ♙xb5 16.♗xc4 (16.♙xa8 16...♗c6 17.♗xa7 ♗xa8 18.♗xa8+ ♙f8 19.♗f3 f6=+) 16...♗d7+= Michalik - E. Hansen, Dubai 2014) 12...e6 13.♗xb5 ♙c6 14.♗a3 ♗b6=) 8...♗bd7 (8...♙e6 9.♙c2+=) 9.♗xc4 Now e5 is under firm control. 9...♗b6 (9...♗d5?! only makes things worse. 10.b3 a5 Kukhmazov - Vastrukhin, Voronezh 2014 11.e4 ♗5b6 12.♗e3 e5 13.♙b2± The black knights are obviously misplaced now.) 10.b3!? So this developing move is preferable in my opinion. (The retreat 10.♗a5 allows Black to prepare the freeing e7-e5. 10...♙c7 (10...♗bd7 The other move 11.b4 e5 12.♙b2 ♙e7 13.b5 cxb5 14.♙b3 b4 Gajewski - Aabling Thomsen, Reykjavik 2013 15.a3!+= doesn't bring the desired results as White is far ahead in development.) 11.b4 (11.♙c2 11...e5 12.♙d2 ♗e8∞) 11...e5 12.dxe5 ♙xe5 13.♗d4 So it's better to start the action on the kingside immediately. 13...h5!± (The solid 13...♗e4 14.♙c2 ♗e8 15.♗b1 (15.♙a3 Kramnik - Gelfand, London

2013 15...h5!± M. Krasenkow) 15...♗d5 16.a3 ♙e7 17.♙b2 h5 18.♗bd1 ♗df6 (18...h4? 19.♗dxc6+-) 19.f3 ♗g5 20.e4+= Edouard - Petr, Tromso 2014 gave White some advantage.)) 10...♗e8 (After 10...c5?! 11.♙a3 cxd4 12.♗xd4 ♗xc4 13.bxc4 ♙c7 14.♗c1 a6 15.c5 ♗d8 16.c6± Ding Liren - Ganguly, Doha 2014 Black's position is close to collapse.) 11.e4!? (Otherwise Black is fine. 11.♙b2 11...♗xc4 12.bxc4 e5=; 11.♙a3 11...♗xc4 12.bxc4 e5 13.d5 cxd5 14.cxd5 Zoler - Roiz, Legnica 2013 14...e4±) 11...♗xc4 12.bxc4 e5 (After 12...c5?! 13.e5 ♗d7 14.f4 ♗b6 15.dxc5 ♗xc4 16.♙xd8 ♗xd8 17.♗b1± White's pressure is increasing.) 13.d5+= The strong pawn center gives White some advantage.]

7.O-O [After 7.♗a3 7...♗b6 8.O-O (as 8.♙c2 doesn't work because of 8...e5!? 9.dxe5 ♗g4±) 8...♙g7 we just have a move transposition.]

7...♙g7 This is the critical position (or at least one of them). White has a choice and it's still hard to say which way to go.

8.a4 [After 8.♗a3 8...♗b6 9.♙c2 O-O if White wants to play for an advantage he must play in true gambit style. 10.e4 (In case of 10.♗xc4 10...♙f5 11.♙c3 ♗fd5 12.♙b3 ♙e6 13.♗xb6 ♗f4 14.♙d1 ♗xe2+ 15.♙xe2 axb6= Black has absolutely no problems.) 10...♙e6!? (10...♗e8 is weaker. 11.♗xc4 ♙g4 12.♗a5! ♗d6 13.♗d1+= Potkin - Timman, Wijk aan Zee (B) 2015) 11.♗d1 (11.♗f4?! 11...♙xd4 12.♗xe6 fxe6 13.♗d1 ♙c5=+) 11...♙c8

(11...♖h5∞) 12.♖f4 ♗d8 13.♞e2 ♖e8 14.♙e3 ♖d6∞ White certainly has some pressure for the pawn but it's quite hard to break through.; The situation is about the same after 8.♞c2 8...♖b6 9.e4 O-O (9...e5 is quite risky: 10.dxe5 ♖g4 (After 10...♞d3? 11.exf6!! ♞xc2 12.fxg7 ♗g8 13.♖bc3+- the black queen is trapped after Rd1-d2 or Rd1 Nd4.) 11.♞d1 ♞e7 12.f4 f6 13.exf6 ♙xf6 14.e5 ♙f5 15.♞c3 ♞c5+ Ding Liren - Sethuraman, Hyderabad 2015 16.♞d4! ♖xe5 17.fxe5 ♙xe5 18.♙e3+=) 10.♞d1∞]

8...a5 9.♖a3 ♖b6 10.♞c2 O-O 11.e4 ♖e8 [When the moves a4 a5 are included White doesn't have to meet 11...♙e6 with the prophylactical Rd1. 12.♖f4! ♙c8 (12...♞xd4 13.♙e3 ♞d8 14.♖xe6 fxe6 15.♞ad1 ♞c7 16.♖xc4 ♖xc4 17.♞xc4 ♞c8 18.♙h3±) 13.♞d1 ♖e8 14.♙e3 ♖d6 15.b3!? cxb3 16.♞xb3∞]

12.♖xc4 ♙g4!? But here we see the drawback of including a4 a5. In a similar position without this inclusion (see 8.Na3 Potkin - Timman, Wijk aan Zee (B) 2015) there was a great square on a5 for the white knight. Now it's not available. [12...♖xc4 was played before. 13.♞xc4 e5 Yuffa - Sarana, Taganrog 2014, but after the correct answer 14.dxe5! ♙xe5 15.♙e3 ♙xb2 16.♞ad1 ♞c7 17.♙c5± White could reach a clear advantage.]

13.♙e3 [13.f3 13...♖xc4 14.♞xc4 ♙e6 15.♞d3 ♖d6∞ with good counterplay.]

13...♖xc4 14.♞xc4 ♙xe2 15.♞xe2 ♙xd4 16.♞fd1 e5 [Black also has the more complicated opportunity to play 16...c5 17.e5 ♖g7 18.♞ac1 ♖e6 19.♙h6 ♗e8 20.♙xb7 ♗b8 21.♙c6 ♗xb2 22.♞c2 ♗b6∞]

17.♙xd4 exd4 18.♞c4 ♖g7 19.♙h3 ♞e7 20.♞xd4 ♗fd8 21.♞ad1 ♗xd4 22.♞xd4 ♗e8 23.f3 ♖e6 24.♙xe6 ♞xe6= The chances are equal. SOME CONCLUSIONS Of course the plan with e3 is no refutation of the Symmetrical Gruenfeld.

But it is completely playable and leads to quite fresh and unexplored positions. If Black doesn't accept the sacrifice his position is fairly solid but still a bit worse. If Black accepts the pawn White must be ready to play in gambit style but he has a good positional basis for it. The most critical line which we will probably see in top games in the future seems to be 5... dxc4 6.Nd2!?

David vs. Goliath

Peter Zhdanov
Chief Editor of Pogonina.com

In this entertaining column we are reviewing the most unexpected results that occurred last week. Players usually face opponents of a similar level. Considerably less frequent are situations when a significantly lower-rated player succeeds in beating a much stronger adversary.

The previous week has brought 19 upsets.

The Puppi Lazo (2022) - IM Dolezal (2457) encounter turned out to be the shortest win - 34 moves.

The Vinal Gutierrez (2100) - Arocena Uria (1692) confrontation lasted 92 moves.

The highest-profile upset of the week was GM Perunovic (2632) - FM Dinev (2317), 0-1.

Recently I have been playing in the PriFO Championship - a qualification event for the Russian Top League. In Round 3 81-year old Viktor Marsak (1944) has defeated Anton Yatsenko (2403). The former has earned 51 rating points in the tournament! This remarkable feat got me thinking once again about how pathetic I and other young guys sound when we start lamenting about aging, health issues, tiredness, etc.

Another upset has occurred on the next board to me. Alexey Smirnov (2492) lost in 19 moves with White against Maxim

Semenov (2072). The Goliath was quite disappointed and has even left the score sheet on the table. I could have taken the piece of paper and copied the notation, but have somehow decided that it would have been inappropriate. Unfortunately, I doubt that the games will make it to the database, because the organizers have been trying to sell printouts of the games to the participants instead of providing everyone with the pgns. This is something I haven't seen in a while.

Top-10:

Farnault (2007) - Andres Gonzales (2515), 1-0, [508](#) points

Bayo Milagro (1996) - Chabanon (2491), 1-0, [495](#) points

Davidsson (1454) - Klausen (1937), 1-0, [483](#) points

Todorovic (2388) - Kuruz (1913), 0-1, [475](#) points

Vaitkevicius (1930) - Butnorious (2377), 1-0, [447](#) points

Puppi Lazo (2022) - Dolezal (2457), 1-0, [435](#) points

Markovski (2011) - Dourerassou (2438), 1-0, [427](#) points

Gountras (2005) - Arsovic (2428), 1-0, [423](#) points

Vinal Gutierrez (2100) - Arocena Uria (1692), 0-1, [408](#) points

Zuloaga Erauskin (1625) - Felizes (2017), 1-0, [392](#) points

Average gap: 449; White won 8 games, Black won 2 games.

You can view all the games in the accompanying pgn file.

If you have ever won a game against someone rated 300 points or above yourself, please send it to peter@pogonina.com for publication. Any additional information (a photo, annotations, etc.) will be appreciated.

Best rating: 2672

A very interesting endgame with unbalanced material. White has 4 pawns, but all of them are separated. The most dangerous one is on d6, but it is well blockaded by the rook and the king is also close enough to stop it. After all we could think that Black is winning, and he really is, however one of the most natural moves, which actually happened in the game, spoils the full point.

63...♖b8? The b-pawn is the one which stands the most far away from the black king and it can be supported by the white one, therefore it is very natural to eliminate it. However it allows White to survive... [63...♔f7 was the most natural of the winning moves. Black would like to place his king in front

of the d-pawn. Only the 64.f5 line is critical, any other moves are losing quickly... The most tricky attempt is 64.f5! (

a) 64.♔c6 64...♔e8 65.♔c7 ♖f7+! 66.♔c8 (66.♔c6 66...♖xf4+!) 66...♗d7+ wins;

b) 64.d7 is another bad try, as Black easily refutes it by playing 64...♔e7 65.♔c6 ♖xf4 66.♔c7 ♗d4+;

c) 64.b4 is slightly more stubborn, but it also loses fairly easily. Black continues his initial plan with 64...♔e8! 65.b5 ♔d7 66.♔e5 ♖h8 67.f5 ♖xh2 68.f6 ♖h5+! cutting the white king. 69.♔f4 ♖xb5 70.f7 ♖b8+ and Rf8 next wins.)

64...♖b8! (64...♔e8? does not work anymore after pushing the pawn to f5, because the white king can occupy a very active position with 65.♔e6! ♖h8

66.f6 ♖xh2 67.f7+ ♔f8 68.d7 ♖d2 Black is stalemated, but White would get into zugzwang. However here comes the role of the b-pawn: 69.b4! White simply wants to advance it and Black has nothing better than to force a draw with 69...♖e2+= giving checks and if the king hides in front of the b-pawn, the rook goes back to d2.) 65.♔c6

Black has only one winning move here and very precise calculation is required to find it! 65...♖c8+! (65...♖xb3? leads to a draw after 66.♔c7! ♜c3+ 67.♔d8! It is very similar to the game. White advances his pawn to d7 and then he starts to push the h-pawn. The rook will be forced to catch it, but it allows the white king to leave from d8... 67...♜h3 68.d7 ♜xh2 (68...♜c3 69.h4=) 69.♔c7 ♜c2+ 70.♔d6! ♜d2+ 71.♔c7 ♔e7 72.f6+!= This is the key and White promotes his pawn.) 66.♔d7 (66.♔b7 66...♜c3 67.b4 ♔e8—+) 66...♜c5! This is very important! Black must eliminate the f5 pawn with the rook in order to avoid the f6 check at the end, which we had seen in the 65...Rxb3 line. We will see that keeping the black king on f7 is another essential factor for winning the game... 67.♔d8 ♜xf5 68.d7 ♜d5!—+ and Ke6 next, or after Kc7, Ke7 wins.]

64.♔c6 ♜xb3 [64...♜c8+ is not the same as before because after 65.♔d7! Black cannot attack the f-pawn with the rook! 65...♜c3 66.f5 It is important to control the e6 square to play Kd8 and advance the d-pawn. 66...♜c5 (66...♜xb3 67.♔d8= and again d7 is coming next with the same ideas which we have already seen in the 63...Kf7 - 65...Rxb3 line.; 66...♔xf5 67.♔e7 ♜e3+ 68.♔f7= and d7 next or after 68...♜d3 69.♔e7=) 67.♔d8 ♜xf5 68.d7 ♜d5 This was the winning plan in the 63...Kf7 line, but here comes the huge difference as to why the black king should stay on f7. White saves the game now by

playing 69.♔e8! ♜e5+ 70.♔f8 ♜d5 71.♔e8=]

65.f5!! Black probably blundered this move when he played 63... Rb8 and White now saves by miracle. The point is that White wants to play Kc7 and d7, when the pawn could be stopped by Rd3 and Ke7. However after pushing the pawn to f5, White will have the opportunity to lure the king away with f6 and promote the d-pawn. [65.♔d7 65...♜f3—+]

65...♜c3+ 66.♔d7! The only move again! [66.♔b7 loses to 66...♜c5! 67.h4 ♜xf5 68.d7 ♔e7—+]

66...♔xf5 [66...♜c5 67.♔d8 ♜xf5 fails again, because the king stands badly on f6. White holds after 68.d7 ♜d5 (68...♔e6 69.♔e8!=) 69.♔e8!=; Trying to correct the mistake and place the king to f7 fails also by one tempo in very unlucky circumstances. 66...♔f7 67.♔d8 There is no time to execute the winning technique, which we had already seen in the 63...Kf7 lines by playing 67...♜c5 68.d7 ♜xf5 69.♔c7 ♜c5+ 70.♔d6! and the rook turns out to be too close. If it was anywhere else on the c-file, he could give a check from below followed by Ke7, but now it does not work...]

67.♔e7! ♜e3+ 68.♔f7 ♜h3 69.d7 ♜h7+ 70.♔e8 ♔e6 The last well-known trick. White cannot promote a queen because of the mate on h8, but...

71.d8=♖+! and the rook against knight is an easy theoretical draw.

71...♔f6 72.h4 ♖xh4 1/2-1/2

**(15) Harika, Dronavalli (2492)
- Muzychuk, Mariya (2526)**

WCh Women 2015(5.1),
2015.03.31

GM Arkadij Naiditsch
Best rating: 2737

We are in the first rapid game and throughout the game White has been trying to put some pressure. So we finally landed in this queen endgame, which looks close to equal at first sight, but in fact things are looking very bad for Black.

45.h4! A great move! Black is in zugzwang.

45...♔d6 This move loses a pawn, but Black couldn't defend her pawns for much longer anyway. [45...♔g6 also loses a pawn: 46.♔h8+ ♔h7 47.♔f8+! ♔g6 48.♔d6+ and the b6 pawn is lost. 48...♔g7 49.♔xb6 and White has an easily winning position.]

46.♔h8+! Now White is collecting the h5 pawn.

46...♔g6 47.♔g8+ ♔f6 48.♔g5+ ♔e5 49.♔xh5 In the queen endgames the rules are similar to pawn endgames, so almost all positions with a pawn up are winning, but there is of

course a much bigger practical chance for tricks if the queens are still on the board.

49...♔d3 50.♔h8+ Now White will also win the b6 pawn.

50...♙e6 51.♔h6+ ♙f7

52.♔xb6 at the same time protecting the f2 pawn.

52...♔f3+ 53.♙h2 ♔e2 Black has nothing to do but wait.

54.♔e3 ♔d1 55.♔f4 ♙e6 56.♔h6+ ♙e7 57.♔g7+ ♙e6

58.♔g8+ ♙f6 59.♔f8+ ♙e6 60.♔e8+ ♙f6 61.♔c6+ ♙f7

62.♔c7+ ♙g6 After a lot of checks White takes the a5 pawn and everything seems to go smoothly for Harika...

63.♔xa5 ♔xb3 64.♔b5 ♔a2 65.♔b6+ ♙f7

66.a5 If this was not a rapid game I guess Black would just

resign, but here where the stakes are so high-an entry ticket to the final of the WCC- usually resignation comes very late.

66...e3 Exchanging the e-pawn for the a-pawn, which is maybe the best chance for Black to go on.

67.♔xe3 ♔xa5 68.♔f4 ♙g6 All White needs to do now is to push her h-pawn.

69.♔g5+ ♙f7 70.♔h5+ ♙f6 71.♔h6+ ♙f7 72.h5 ♔c5 73.♔f4 There were more simple ways of winning, but White is trying to be as safe as possible.

73...♙g7 74.♔g5+ ♙f7 75.♙g1 ♔d5 76.♔g6+ [It is hard to say why White did not just play 76.h6]

76...♙e7 77.♔g7+ ♙e8 78.♔g6+ ♙e7 79.♔g5+ ♙f7 80.h6 Finally...

80...♔d1+ 81.♙g2 ♔d5+ 82.♙h2 In a totally lost position, Black is trying her best chance and is at least threatening something...

82...♔f3

83.♔e3?? What a shocking error! White is trying to be more than safe, ultra safe, and suddenly the game is already a draw! [83.♔g7+ would lead to an easy win since after 83...♙e6 White just needed to calculate that after 84.h7 ♔xf2+ 85.♙h3 ♔f1+ 86.♙h4 ♔h1+ 87.♙g5 ♔c1+ 88.♙g6 the white king easily

escapes from the checks, so White is winning because of h8Q next.; 83.♔f4 would lead to a winning pawn endgame. 83...♚xf4 84.gxf4 ♔g6 85.♔g3 ♔xh6 86.♔f3 ♔h5 and now White needs to find

87.♔e2! (87.♔e3 87...♔g4 88.f3+ ♔g3 is just a draw.) 87...♔h4 88.♔d3 ♔g4 89.♔e3 ♔h4 90.♔d4 and the pawn endgame is easily winning. 90...♔h3 91.♔e5 ♔g4 92.f3+ ♔xf3 93.♔xf5]

83...♚xe3! What a shock! White is 2 pawns up in a pawn endgame, but the position is a draw.

84.fxe3 ♔g6 85.♔g2 ♔xh6 86.♔f2 ♔h5 87.♔f3 ♔g5

88.♔f2 White just cannot make any progress.

88...♔h5 89.♔g2 ♔g4 90.♔f2 ♔h5 91.♔g1 ♔g5 92.♔h2 ♔h5 93.♔h3 ♔g5 94.♔g2 ♔g4 95.♔f2 ♔h5 96.♔f3 ♔g5

So, what do we learn from this shocking game which maybe cost Harika the WCC title? That it is never too late to make a mistake and it is clearly better to focus once and calculate things until the end than to all the time try and avoid complications, even if the position is winning! **1/2-1/2**

Chess and the City. Miss "Tactics" versus Miss "Come back"

WGM Elisabeth Paehtz

Best rating: 2493

After more than 2 weeks we have eventually reached the final stage! Miss Tactics, alias Marya Muzychuk, versus Miss Come back, alias Natalija Pogonina, will face each other in a match of 4 games for the Women's World Championship title of 2015! The winner of this match will not only be rewarded with 60000 Dollars but will also have the pleasure of a Duel versus the current World Champion, and first ranked women in the world, Hou Yifan from China.

The way to the finals was a long and tough one which both of them mastered perfectly, although in slightly different styles. While Marya shot herself to the final in a very tactical and tricky manner, Natalia went the "you can have the first win" way, which I specially admire as it must be psychological very tough to always come back after losing the first game of a match. Since the quarter finals, Natalja managed to always level the score in game 2 followed by smashing her opponents in the rapid encounters. Her first victim was Marie Sebag, followed by Zhao Xue and finally Pia Cramling.

For Marya it was totally based on tactical superiority. Her first crucial match of this tournament she won in convincing style in the classical encounters versus former Women's World Champion Antoaneta Stefanova. For the semi-finals, however, she had to face probably her toughest opponent - Humpy Koneru from India, who was not only the first seed in this tournament but had a perfect score of 6/6 up to that moment. Frankly speaking, Marya was pretty much outplayed in every single game in that match, except in the area of tactical resourcefulness. Eventually that very important aspect of chess led to her not only knocking out Humpy from the semis, but also her next and last Indian victim, Harika Dronavalli, from the final.

If we take a look at the upcoming match, certain question may arise. Who of these two still has enough energy to go through that final battle? While Natalija "only" played three tiebreaks, Marya only managed to avoid them once, and that was in her match versus Stefanova. The next aspect may be the age advantage. Marya is 8 years younger but I would not say less experienced than Natalija. However, in rapid games I personally think that the younger you are, the better you seem to handle your nerves. For both players it looks to me like they are quite capable of keeping their nerves under control, otherwise they wouldn't be where they are right now. Last but not least remains the "home advantage", which I would say does not really affect chess players in comparison to other sports. However, for Natalija, as a Russian, it should be a little easier psychologically. On the other hand, Marya will have her lovely older sister by her side.

GM Kamil Miton
Best rating: 2655

1. $\text{g}3$ d5 2. d4 $\text{g}6$ 3. c4 e6 4. $\text{g}c3$ c5 5. cxd5 $\text{g}xd5$ [5...exd5 leads to Tarasch structures.]

6. e4 $\text{g}xc3$ 7. bxc3 cxd4 8. cxd4 $\text{g}b4+$ 9. $\text{g}d2$ $\text{g}xd2+$ 10. $\text{g}xd2$ O-O This system is still interesting. White has an advantage in the center but Black doesn't have any weaknesses and after some exchanges he looks very solid. Arkadij Naiditsch in his game against Vishy Anand proved that is not easy for White to break this system.

11. $\text{g}c4$ [11. $\text{g}c1$ This tricky move recently became very popular. The idea is not to show where the bishop will be develop.]

11... $\text{g}d7$ 12. O-O b6 13. $\text{g}ad1$ $\text{g}b7$ 14. $\text{g}fe1$ Both sides developed their pieces to optimal squares.

14... $\text{g}c8$ In one of my games I tried to play according to the idea which we will see in this game. [14... $\text{g}c7$ 15. $\text{g}b3$ $\text{g}d6$ 16. d5 exd5 (16... $\text{g}c5$? 17. dxe6 $\text{g}xd2$ 18. exf7+!) 17. e5! (17. exd5 to evaluate recapturing on d5 is always difficult as sometimes the d-pawn can be strong, but in many cases it is simply attacked by the black pieces.) 17... $\text{g}c7$ 18. $\text{g}d4$ This is the point, White sacrifices the pawn- even two pawns! It helps him create pressure against the black king. (18. $\text{g}xd5$ 18... $\text{g}xd5$ 19. $\text{g}xd5$ $\text{g}c5$ Here Black has no real problems.) 18... $\text{g}xe5$ 19. $\text{g}f4$ $\text{g}ae8$ (19... f6 20. $\text{g}e6\pm$) 20. $\text{g}a4$

20... b5! A strong move based on good calculation. (20... $\text{g}e7$ 21. $\text{g}f5$ $\text{g}e6$ 22. $\text{g}g3$ g6 (22... f6 23. $\text{g}c1$ and unfortunately the black queen has no square on the 7th rank!) 23. $\text{g}c1$ $\text{g}b8$ 24. $\text{g}d4$ $\text{g}e7$ 25. f4 and Black lost a piece.) 21. $\text{g}xb5$ $\text{g}e7$ 22. $\text{g}f5$ $\text{g}e6$ 23. $\text{g}g3$ g6 24. $\text{g}c1$ $\text{g}b8$ 25. $\text{g}d4$ $\text{g}e7$ 26. $\text{g}f5$ (26. f4 and now compared to the line with a pawn on b6 Black has 26... a6! with counterplay over the g1-a7 diagonal.) 26... $\text{g}e6$ 27. $\text{g}d4$ $\text{g}e7$ 28. $\text{g}f5$ $\text{g}e6$ 1/2-1/2 Miton,K-Volokitin,A/Lublin POL 2009]

15. $\text{g}b3$ White can also play [15. $\text{g}d3$ 15... h6 16. $\text{g}b1$ White is preparing his attack. 16... $\text{g}e8$ 17. $\text{g}e3$ A typical move.

17...♔c7 18.e5 ♘f8 19.♘e1! ♔e7 20.♖g3 ♗h4 21.h3 with the idea Rg4. 21...f5 22.exf6 ♗xf6 23.♘d3 ♖ed8 24.♘f4→and the white pieces are nicely regrouped for the attack. 24...♖c5 25.d5 g5 26.h4 ♖c4 27.♘h5 ♗e5 28.hxg5 ♖xd5 29.♘f6+ 1-0 [Radjabov,T-Van Wely,L/Khanty Mansyisk RUS 2005]

15...♘f6 [15...♗f6 This logical move is preparing Rfd8 and not allowing Qf4, but now White once again has the following thematic idea: 16.d5

16...exd5 (16...e5 Thanks to the strong pawn on d5 and the limited bishop on b7 this structure is usually better for White.) 17.e5! ♗g6 18.♘d4 ♘c5 19.♙c2 ♘e4 20.♗f4 The white pieces get strong activity. 20...f6 21.e6 ♗g5 22.♗xg5 fxg5 23.e7 ♖fe8 24.♙a4 ♖xe7 25.f3 and soon White will convert his advantage of being a piece up. 1-0 [Ding Liren-Jovanic,O/Cappelle-la-Grande FRA 2014 (34)]

16.♗f4 ♗c7 17.♗h4 The white queen is ready to support the attack. [17.♗xc7 17...♖xc7 This endgame is usually very safe for Black. 18.d5 exd5 19.exd5 ♖d7 ♗d5]

17...♖fd8

18.♖e3?! A logical move. White is going to activate the rook over the 3rd rank but he also has another idea... [18.♘g5! 18...h6 Otherwise White would play e5. 19.♘xe6 fxe6 20.♙xe6+ ♔h8 21.♙xc8 ♖xc8 22.f3 White has a rook and two pawns for two pieces but the most important factor is the strong central pawns d5-e4-f3, which will limit the black pieces. 22...♗c2 23.♗f2! just to avoid counterplay against the a2 pawn. White is better.]

18...b5 Black starts creating counterplay on the queenside. [18...h6 19.♘e5→]

19.♖de1 White still had the idea Ng5-Nxe6! [19.♘e5 was probably less accurate. 19...a5 20.♖g3 ♘xe4 (20...♙h8 21.♗g5 ♖g8

When four pieces attack the king, one's intuition usually says

that there should be a fatal blow somewhere! 22. ♖xe6! fxe6 23. ♗g6+ hxg6 24. ♖h3+ ♖h7 25. ♖xh7+ ♔xh7 26. ♖h4# 21. ♖g4 ♗d6 (21...a4 is too slow. 22. ♖h6 g6

23. ♖xg6+! hxg6 24. ♗xg6 fxg6 25. ♖xe6+ ♖f7 26. ♖xg6+-- 22. ♖f6 ♗e8 Not an easy plan to find! Black brings the knight to e8 to protect the g7 pawn. (22... ♗f5 23. ♗xf7!) 23. ♖h6 ♖d5+ and Black manages to avoid getting mated.]

19...a5 20.a4 b4?! This move gives White some important time. More accurate was [20...bxa4 21. ♖xa4 h6 with an unclear position.]

21.d5! All the white pieces are placed well so it is the right moment for the break!

21...exd5 [21...e5 22. ♖g3 followed by the unpleasant maneuver Nh4-Nf5.]

22.e5 Thanks to this typical idea White gets the strong d4 square for the knight and also the d5 pawn disturbs the black pieces from getting active.

22...♗d7 [22... ♗e4 This jump to the center was more logical but Black was probably afraid of 23.e6 (23. ♖xe4 23... dxe4 24. ♗g5 h6 25. ♗xf7 ♖d5--+) 23...f5 (23... fxe6 24. ♖xe4 dxe4 25. ♗g5 h6 26. ♗xe6 ♖c3 27. ♗xd8+ ♖xb3 28. ♗xb7 ♖d5 and now there are problems with the knight, so Black gets practical counterplay. 29. ♖e7 e3 30.f3 (30.fxe3 30... ♖c2--+) 30...b3-- 24. ♗d4

24... ♖e5! (24...g6 25.f3 ♖b6 26. ♗xf5 gxf5 27.fxe4 fxe4 28. ♔h1 ♖xe6 29. ♖xe4+-- 25.e7 ♖e8 26. ♗b5 (26. ♗xf5 26... ♔h8∞) 26... ♖xe7 27.f3 ♔h8 28.fxe4 dxe4 The material is equal but the white pieces are very active.]

23. ♖g5

23... ♗f8? The decisive mistake! Black could have saved the game after [23... h6 24. e6 hxc5 25. exf7+ ♔xf7 26. ♖e7+ ♔g8 27. ♗xg5 ♗c3 28. ♗xd5+ ♗xd5 29. ♗xd5+ ♔h8 30. ♗h5+ ♔g8 31. ♗f7+ ♔h8 32. ♖7e3 and it looks like White is simply winning but after 32... ♗f6 33. ♖h3+ ♗h7 34. ♖xc3 bxc3

the c-pawn is so strong that it gives Black enough counterplay! For example: 35. ♗b3 c2 36. ♖c1 ♖d1+! 37. ♖xd1 c1=♗=+]

24. ♗xh7! The final blow!

24... ♗xh7 [24... ♗g6 25. ♗h5 ♗f4 26. ♗g4 ♔xh7 27. ♗xf4+-]

25. ♖h3 ♗c1 26. ♗xh7+ ♔f8 27. ♖e3! and Black has no more counterplay over the first rank.

27... d4 28. ♗h8+ ♔e7 29. ♗xg7 ♖f8 30. ♗f6+ ♔e8 31. e6!
After 31... dxe3 then 32. exf7 Kd7 33. Be6+ White wins the queen. **1-0**

Editorial Preface

Mariya Muzychuk from Ukraine is the new Women's World Champion! She could win her final match over 4 normal games against Natalia Pogonina with the score of 2.5-1.5 winning her second game and drawing the other 3. It was a very exciting match to watch and the tension was maintained until the last seconds of the 4th and final game.

We congratulate Mariya on this great achievement, especially considering the fact that the situation in her birth country is everything else than being comfortable.

We also have to underline the great success of Pogonina who could recover 3 times in a row from a loss in the first game, before reaching the final table.

The traditional Aeroflot is back and has a winner as Ian Nepomniachtchi scored 7/9 and showed great fighting play! 2nd place went to Dubov with 7/9 too, but his play was much more "solid". With this great victory Ian has qualified for the Super Tournament in Dortmund, which will take place in June.

In the US Chess Championships Nakamura is leading with 6/8, followed by Robson with 5.5/8. It is strange to see Wesley So on just 4.5/8 after his great results in the past tournaments. But there are still 3 rounds to go and a lot can happen.

In the female group Nemcova is leading with 6.5/8, followed by Krush with 6/8.

In the biggest German open, the Neckar Open, nobody could stop the rush of the Li Chao, who scored a fantastic 8.5/9.

At the moment the Dubai Open is also under way with a lot of strong GMs.

As usual we wish you a lot of chess fun and we can already be excited about two upcoming super events: the super tournament in Shamkir (with Carlsen, Caruana etc) and the World Team Championship in Yerevan.

Two best games of the past week

**(1) Matlakov, Maxim (2693)
- Bok, Benjamin (2587) [A34]**

Aeroflot Open A 2015(9.11),
2015.04.04

GM Csaba Balogh
Best rating: 2672

The next game demonstrates well the power of the two bishops in an open position!

1. f3 c5 2. c4 f6 3. c3 d5 4. cxd5 xd5 5. d4 xc3 6. bxc3 g6 The game started like an Anti-Gruenfeld, but Matlakov decided to transpose to the main line.

7. e4 The main alternative to avoid the classical main line is 7. e3 with the idea to strengthen the d4 pawn against which Black is going to focus all his pieces.

7... g7 8. e3 a5 9. d2 c6 10. Rb1 The most common move is 10. Rc1, but Matlakov must have his reasons to choose this variation as he is the second of Peter Svidler, one of the biggest Gruenfeld experts.

10... cxd4 [The subtle point of Rb1 is to provoke 10... a6 because of the Rb5 threat of winning a pawn and now White switches his rook to 11. Rc1 overprotecting the c3 pawn in order to push d5. 11... cxd4 12. cxd4 xd2+ 13. xd2 and here the pawn on a6 significantly weakens the queenside pawn structure, especially the hole on b6, which can be occupied by the bishop after pushing d5.]

11. cxd4 O-O 12. d3 g4 Black uses the standard Gruenfeld plans and exerts maximum pressure on the d4 pawn.

13. xa5 [13. xb7? is wrong because of the tactical trick 13... xf3 14. gxf3

14... h5! with a double-attack on f3 and d4. White cannot protect both with 15. e2 because Black takes on d4 anyway: 15... xd4! 16. xd4 fd8+ wins back the piece with excellent prospects.]

13... xa5

14. e2! Without the queens on board, White does not need to worry about getting mated and in general in endgames the king stand better in the center, from where it participates more in the battle.

14...♖ad8 The queens are off, but Black should continue playing in the spirit of the opening and create his counterplay against the center.

15.d5 f5 Consequent play and the reason why Black put his a-rook to d8. [The other principled alternative was 15...e6 with the same idea of undermining the central pawns. White probably tries to consolidate with 16.♖b5 b6 17.h3 ♘xf3+ 18.♙xf3 playing for a small edge due to the pair of bishops.]

16.♖hc1! White brings his last unemployed piece to the game and tries to lock the a5 knight out of the game by taking the c4 square under control. [16.♘xa7 is premature in view of 16...fxe4 17.♘xe4 ♖a8 18.♘c5 ♘c4 and the counterplay gets too strong.]

16...e6 Black seems to do everything well, or at least his play looks very logical to me.

17.h3 ♘xf3+?! Very strange, but this is wrong. Black completely destroys the center and even temporarily wins a pawn, but somehow the white pieces become too active and dominant. [17...exd5 18.hxg4 fxe4 seems to solve the opening problems. 19.♘xe4 dxe4 20.♘d2 White wins back the pawn and the game becomes drawish.; Or 17...fxe4 18.♘xe4 exd5 should also be completely fine.]

18.gxf3 fxe4 19.fxe4 exd5 20.♖b5! dxe4 21.♘xe4 b6 22.♖c7! Knowing the computer's evaluation and the time consumption of Matlakov, I would not be surprised if this was all analyzed at home. The two bishops are working extremely well, they control the entire board and the active rook on c7 soon restores the material balance, as Black cannot protect his a7 pawn.

22...♖h8 [22...♖f7 drops an exchange after 23.♘d5! ♖xd5 24.♖c8+!; 22...♘d4 It would be another positionally justified decision to trade the bishop pair, but it is tactically refuted by 23.♘d5+]

23.♖d5! Another subtle move! Black has left from the Bd5 check and was intending to play Bd4. White trades a pair of rooks to limit Black's chances for sufficient counterplay. The a7 pawn cannot run away. [23.♖xa7 was premature because it allows the knight to join the game... 23...♘c4]

23...♖fe8 24.♖xa7 ♘c4 25.♖xd8 ♖xd8 26.♘g5 ♖e8

27.♘e7! Restricting the mobility of the black pieces. The bishops are just temporarily pinned, but Bc6 is coming next. There are two very important factors which guarantee White's edge: Black cannot trade any of his minor pieces and there are

pawns on both sides of the board, especially the b6-a2 pair of pawns are playing an important role.

27...♖d6 [27...♙f8 does not work because after some defensive moves the black king finds himself in a mating net... 28.♙f6+ ♔g8 29.♙d3 ♖e5+ 30.♙d4 ♙c5+ 31.♙c3+- and Bd5 is coming next.]

28.♙c6 ♖c8 29.♙xe8 ♖xa7 30.♙d7! Trapping the knight on a7! White cannot win it, but it is enough that the black pieces are tied to defend each other while White can improve his position step by step!? Despite the very limited material on the board I would evaluate White's winning chances to be much better than Black's drawing ones.

30...♙d4 31.f4 ♔g7 32.♙d3 ♙f7 33.♙d8 Obviously White is not interested in trading the bishops.

33...♙f2 34.a4! Black's pieces are totally paralyzed. The knight cannot move. The bishop is forced to protect the b6 weakness. The king is also kind of trapped in a cage.

34...h5 35.♙e4 ♙c5 Black cannot do anything better than waiting with his bishop on the g1-c5 diagonal and watch how White is making progress.

36.h4 [A very nice winning plan was suggested by the computer: 36.♙e5 36...♙e3

37.♙d5! Setting Black into zugzwang! Any of his moves allow a huge improvement for White... Black must control the d6 square, otherwise the king's invasion is decisive. It did not work right away because of Bxf4, but if the bishop moves from e3 it already does the job... 37...♙xf4 (37...♙c5 moves into 38.a5!; 37...♙f2 38.♙d6+-; 37...♙g7 38.♙e6+-) 38.♙xb6 ♙b8 Black is even more busted than before, but it still requires some technique to convert the advantage. One way to win is 39.h4 ♙f6 40.♙d8+ ♙f7 41.a5! Slowly advancing the pawn to a6, meanwhile depriving Black from any kind of counterplay... 41...♙g3 42.♙e6+ ♙g7 43.♙b6 ♙b8 44.♙d7 ♙f6 45.♙d8+ ♙f7 46.a6 Here we are again, but the pawn is a square ahead... 46...♙g3 47.♙b6 ♙b8 48.♙c5! The final part of the plan. White simply trades bishops and traps the a7 knight... 48...♙f6 49.♙d6 ♙xd6 50.♙xd6 ♙g5 51.hxg5+ ♙xg5 52.♙c7 h4 53.♙b6+-]

36...♙f2 37.♙d5 ♙e3 38.♙g5 Kd6-c7 is the threat again. The only way to avoid it is

38...♙c5 39.♙d8 [39.a5 It is strange that White did not advance his pawn to a6. Matlakov chose another way to improve his position...]

39...♘e3 40.♙e5 ♘c5 41.f5 White opens a path towards the h5 pawn.

41...gxf5 [Otherwise 41...♘f2 42.f6+- and Be6 is decisive.]

42.♙xf5 ♘e3

43.♘f6 Here is another zugzwang! Black can only move with his bishop, but it either allows Kg5 or Bd4!

43...♘c5 [43...♘d2 is not better either. 44.♘e6+ ♙f8 45.♘d4 ♘a5 46.♘d5 ♖c8 47.♙g5 is similar to the game.]

44.♘e6+ ♙e8 45.♙g6 ♘e7 [The only move was 45...b5! 46.a5 ♖c6 47.♙xh5 ♖xa5 48.♙g6 ♖c6 49.h5 ♘e3 50.h6 ♘xh6 51.♙xh6]

According to the 6 pieces tablebase, in case both sides play the best moves, White mates in 69 moves. As far as I know, two

bishops are winning against the knight, but in case of the best defense, the defensive side can prolong his defeat for more than 50 moves until losing his knight, which will allow him to claim the draw by the 50 moves rule.]

46.♘f7+ ♙d7 47.♙g7! White takes the h5 pawn with the bishop and he keeps the black king away from the h-pawn with his own king.

47...♘b4 48.♘xh5 b5 49.♘g4+ ♙e8 50.h5 bxa4 [50...♘d2 51.a5+-]

51.♘d7+! Not the only win, but definitely a very nice final blow! White deflects the king from the f8 square to avoid h6-Bf8 and sacrificing the bishop. There is no way to stop the h-pawn.

51...♙xd7 52.h6 Black resigned! A great positional performance by Matlakov! **1-0**

**(2) Holt, Conrad (2530)
- Nakamura, Hikaru (2798) [E90]**ch-USA 2015(1.1),
2015.04.01GM Arkadij Naiditsch
Best rating: 2737

We are following the US Championships and Nakamura is back. For some years there was not really a concurrent for him, but now that Wesley So is just a few points behind him, the tournament is getting very exciting. Basically before the event probably most of the spectators would think- just like me- that it was going to be a fight between Nakamura and So for the first place, which is why it could be very important to score the best possible results against the "lower rated" opponents in the event. In the current game, Nakamura picks KID, which is not a big surprise, and then the game is getting very sharp. Things were looking everything but great for Black, but Hold could not hold the pressure, chose the wrong track where and got punished with a mating attack.

1.d4 ♘f6 2.c4 g6 3.♘c3 ♙g7 4.e4 d6 Nakamura plays a couple of different openings with Black, but one thing is sure: he clearly plays most of his games for a win, rather than choosing a safe opening where the drawish outcome could be the most probable one.

5.♘f3 O-O 6.h3 This is a very modern line with a lot of games played. The idea of White is simple, to play g4 and stop Black from playing the usual f5 move.

6...e5 7.d5 ♘h5 is one of the main moves for Black.

8.g3 ♘a6 [8...f5 is the other try here.]

9.♘d2!? I like this move a lot. White's ideas are to stop Black from playing f5 immediately because of exf5 and the knight on h5 is hanging and at the same time to prepare to play b4 after Black's Nc5.

9...♔e8 preparing the f5 move.

10.♙e2 chasing the knight back.

10...♘f6 11.h4! Another very good move by White! Holt doesn't wait for Black to play Nd7 and f5, but launches his own play on the kingside, using the fact that the white rook is still on h1.

11...♘d7 Not a pleasant move to play as it lets White push h5, but what else to do?! To play 11...h5 is clearly not a move for a KID player and White still has the positional threat of playing a3-b4-Nb3-Be3 with total domination.

12.h5 Of course!

12...f5 Rather than going for a a passive strategy, Nakamura looks for complications, thus taking into account that he is playing for 3 results and might just lose the game.

13.hxg6 Before taking on f5, White opens the h-file, which is very logical.

13...hxf6 14.exf5 It seems like Black can't take back on f5 and of course this was not his plan anyway.

14...♘f6 This is clearly the best move and it was obviously planned before playing 11...Nd7. [After 14...gxf5 15.♙h5 ♔e7 16.♙g6 White's play on the kingside is very dangerous.; And of course it is always wrong for Black to take with the rook since after 14...♖xf5? 15.♘de4 White's domination is obvious.]

15.fxg6 Why not take another pawn?! Personally I think that to take some material is generally the right decision in case there is nothing concrete to be afraid of. White also had another, more calm option of playing 15.Nb3, blocking the black knight on a6 followed by Bg5 and maybe 0-0-0. I guess White's position should also be clearly better.

15...♔xg6 I am not sure about this move at all. [I think the best practical chance was to play 15...e4!? Anyway this move has to be played sooner or later and Black avoids the strong Nf3. 16.♘f1!? getting the knight to a great position on e3. 16...♔xg6 17.♘e3 White is a clear pawn up but Black has some play after 17...♘c5 and we are in a quite typical position for the KID. White is probably better, but from a practical point of view the position is very complicated and the game is going for 3 results.]

16.♘f3! So far Holt played a perfect game! I guess Nakamura underestimated the strength of the white knight on h4 who will perfectly defend the position of the white king.

16...♘b4 Black tries to put some threats around the c2 square.

17.♘h4 ♔h7 Nc2 is still a dangerous threat.

18.♙f1! A very strong move, avoiding the Nc2 idea and at the same time leaving the white rook on a perfect position on h1. Now White is very close to stabilize his position which would mean being a clear pawn up.

18...♙f5!? Nakamura is also looking for his chances and plays the most unpleasant move for Hold. The game gets very tactical. All black pieces are in the attack, but White's structure continues looking very safe.

19.♙g1 It was a hard decision whether to play Kg2 or Kg1, but why actually to go to g2 where the king can sometimes be checked from e4.

19...♙c2

20.♔d2?! After some fantastic moves Hold starts to "shake". [Why not just play 20.♔f1 with the idea of playing Ng2 next or just Be3. I believe White should be better here.]

20...♖e4 Black's try doesn't lead anywhere because of the great move 21.♗g4! Of course all this is not easy to see and things remain very complicated, but when you play the KID you must be ready for a hard fight.]

20...♖e4 Now the move Ne4 is already much more effective.

21.♖xe4 ♕xe4

22.♗f1? and this move is already clearly a big mistake based on miscalculation. [White should have continued with 22.♖g2 22...♗d3 23.♗h5 and although White's position looks dangerous at first sight, in fact most of the tactics work for him. Nakamura would not have had an easy time here finding the right way to continue the game.]

22...♗d3! Clearly White blundered this great reply of Black.

23.♗h3 [Holt probably missed that after 23.♕xb4 23...♗xf1 White can't take the f1 bishop because the rook on h1 is hanging.]

23...♖c2 24.♗e6+ ♕f7 The black knight wants to go to d4 and e1. White's position is already looking just bad!

25.♖f5? A mistake rarely comes alone and this move is just losing. [White could have fought with 25.♕d1 25...♖xa1 26.♗e3 with the idea of playing Qh5 next. Of course now things are looking reversed, and it is already White who needs to be lucky to survive, but there are clearly some practical chances to make things complicated for Black.]

25...♖e1 Black doesn't miss his chance...

26.♖e7+ Nothing helps any longer... [26.♖h4 would lead to a beautiful mate: 26...♕g2+ 27.♖xg2

27...♖f3#]

26...♕f8 27.♖g6+ ♕e8 and White needs to resign as there is no way to defend from Qg2 or Nf3 next. Would it be right to say that Nakamura got a bit lucky- I don't think so.

In fighting chess it is always easy to find a mistake after the game, but during the game things are much more complicated and it is hard to take the right decisions. **0-1**

David vs. Goliath

Peter Zhdanov
Chief Editor of Pogonina.com

In this entertaining column we are reviewing the most unexpected results that occurred last week. Players usually face opponents of a similar level. Considerably less frequent are situations when a significantly lower-rated player succeeds in beating a much stronger adversary.

The previous week has brought 30 upsets, including a few high-profile ones.

The number of move ranges from 30 in WGM Abrahamyan (2322) - WIM Wang (1901), 0-1 to 76 in FM Dehmelt (2246) - GM Ortiz Suarez (2625), 1-0.

Three more 2600+ GMs have succumbed to amateur players: GM L'Ami (2605) - FM Van Dijk (2273), 0-1; Tabada (2238) - GM Kuzubov (2667), 1-0; FM Saeed (2200) - GM Safarli (2641), 1-0. Also notable is former top-10 GM Epishin (2563)'s loss to Al Hageri (2115).

Especially impressive is the result of the game between IM Chudinovskih (2263) and Mazouz (1595). The stronger player had White and, on paper, was supposed to win his game blindfolded, drunk, in blitz mode and using his left hand only. However, the lower-rated female player prevailed!

Top-10:

Chudinovskih (2263) - Mazouz (1595), 0-1, [668](#) points
 Jarque Megias (1952) - Cifuentes Parada (2461), 1-0, [509](#) points
 Muller (2057) - Zhao Zong Yuan (2558), 1-0, [501](#) points
 Henderson de la Fuente (1753) - Jimenez Almeida (2244), 1-0, [491](#) points
 Torres Fernandez (1916) - Valmana Canto (2390), 1-0, [474](#) points
 Kollari (2110) - Kurecki (1658), 0-1, [452](#) points
 Al Hageri (2115) - Epishin (2563), 1-0, [448](#) points
 Tanev (1366) - Stoyanov (1812), 1-0, [446](#) points
 Saeed (2200) - Safarli (2641), 1-0, [441](#) points
 Tabada (2238) - Kuzubov (2667), 1-0, [429](#) points

Average gap: 486; White won 8 games, Black won 2 games.

Our featured player of the week is [Nicolas Skettos](#) from Cyprus. According to him, he is the author of 5 David vs. Goliath upsets. Below is the most recent one and, by coincidence, the one with the largest rating difference - 432 points. Black misplayed the opening pretty badly, and White converted the extra material rather smoothly:

(1) Skettos Nikolas (1525)

- Abatzidis, Stelios (1957) [B22]

ch-USA 2015(6.3),
2015.04.07

GM Arkadij Naiditsch
Best rating: 2737

This simple looking endgame is actually very complicated. Is it a win or still a draw? We are going to find out during the next moves...

55. ♖d8 White is planning to play Rd3 and Re3 with the idea of pushing the e-pawn, thus freeing the white king from g5. [55.e5? would lead to an immediate draw after 55... ♜f8! 56. ♖e6 ♜e8 and White is losing the e-pawn, which means an easy draw.]

55... ♜e1 [55... ♜f8 56. ♖d6 and the pawn on g6 is hanging.]

56. ♜d4 ♜e2 Black starts the passive defense. [Black can't keep the king on g5. 56... ♜f1 57. ♖d3! Now the threat is Re3.

57... ♜e1 58. ♖f4 and we are back to a similar position as in the game.]

57. ♖f4 The white king is going to take a good position on e5.

57... ♖g8 58. ♖e5

58... ♖f7 Black has nothing better than bringing his king to f7-f8 because to stay passive on h7 would mean that the e-pawn would just march through.

59. ♜d7+ ♖f8 White has done the best he could to place his pieces to perfect positions, but what's next?!

60. ♖d5 A good choice. White is preparing the e5 move after which Ke6 is possible at some point.

60... ♜a2 61. ♖e6 Of course 61.e5 was possible too.

61... ♜a6+ 62. ♜d6 ♜a8 63.e5 ♜b8 So the white pawn is on e5, but still it is quite unclear how to actually win the game.

64. ♜c6! A very good idea! White needs his rook on the c-file to be able to play Kd7 at a good moment and protect from the checks on the a-file with Rc7.

64... ♜d8 65. ♜c7 ♜a8 66. ♖d7 The threat is to play e6 next.

66...Re8! The only defense. White still can't put his pawn to e6.

67.Ke6 [67.e6? would lead to a draw since after 67...Re7+ 68.Ke6 Black just enters the pawn endgame: 68...Rxc7 69.Kxc7 Ke7 with a draw.]

67...Rd8+ 68.Rd7 Ra8 69.Ke5 White has shown no winning plan so far, so Onischuk is going for a second attempt...

69...Ra5+ 70.Ke6 Ra8 We have this position already...

71.Rf7+ Kg8 72.Rc7 Kf8 This one as well.

73.Rc6 Finally White finds the right spot to target the g6 pawn...

73...Rb8? and this move just loses on the spot. [We would be back to a similar position as in the game after 73...Rd8 74.Ra6 Rb8 75.Ke5 White is attacking the g6 pawn but it is only a secondary threat, as the main idea is to finally play e6. 75...Kf7 76.Ra7+ Kf8 77.e6 and we are back to a similar position as in the game.]

74.Ke5 was not the best. [74.Ke7! was winning on the spot. 74...Re8 trying a similar defensive idea as before, but now White has 75.Re6! The winning move! Protecting the e5 pawn and at the same time winning the g6 pawn. 75...Ra8 76.Rxg6 Ra7+ 77.Ke6 and White is easily winning.]

74...Kf7 75.e6+ So White finally played e6!

75...Kf8 76.Rc7! A good move. The white rook is greatly placed on c7 and soon we will see why.

76...Ra8 Black can't do much but keep on waiting.

77.Ke6

77...Rd8+ [77...Rb8 was losing too. 78.Ke7 Re8 79.Rc4! Now there is already nothing Black can do. 79...Re7+ 80.Ke6 Re8 81.Rf4+ The black king is being cut off. 81...Kg8 82.e7 Ra8 and White is easily winning after 83.Ra4!]

78.Rd7 Ra8 79.Rf7+ Kg8 80.Rc7 Kf8 81.Rf7+ Kg8 82.Rb7 Kf8 Onischuk decided to repeat the position a couple of times before going for the correct

83.Ke7! Re8 and now we do know how White should win and of course Alexander doesn't miss it:

84.♖b1 The right move!

84...♖e7+ 85.♔d6 ♖e8 86.♖f1+ ♔g8 87.♔d7 Just as winning as 87.e7.

87...♖a8

88.♖c1 and Black can't avoid Rc8 next. The e-pawn is a queen. So the conclusion of this endgame is simple: White is winning and the game perfectly showed how. Bring the king to d6, the rook to the 7th rank and play e5-e6 when possible.
1-0

**(14) Rapport, Richard (2709)
- Khalifman, Alexander (2613)**

Aeroflot Open,
2015.04.02

GM Csaba Balogh
Best rating: 2672

We are facing a very instructive practical endgame, which can be very useful to remember for our own games. The 2 vs 1 rook endgames are fairly easy theoretical draws if the pawns are on the same side. If the black king was on b8 we could speak about this case, however the huge difference is that the black king is far away from the pawn and by approaching towards it he must always count on trading the rooks, thus entering into a seemingly suspicious pawn endgame. Our co-author, the Ex-World Champion Alexander Khalifman, solves this difficult situation by perfect understanding of the position!

48...♔d8!! The most natural move! Black would like to move the rook along the 7th rank and continue the journey with the king towards the a7 pawn to secure the draw. The question is what happens if White forces the trade of the rooks. Black had to evaluate the arising pawn endgame accurately...

49. ♖h8+ ♕c7 50. ♖h7+ ♕b6 51. ♖xb7+ ♕xb7 This endgame is a draw, but without knowing about it one must be really scared of losing.

52. ♕e5 ♕c6! It is very l to go forward with the king, provoking the a2-a3 move to win a crucial tempo and to avoid getting into zugzwang in some positions. The following 52... Kb8 line demonstrates the point. [52... ♕b8? 53. ♕d6 ♕b7 54. ♕c5 ♕c7 55. ♕b5 ♕b7 56. b4

Here is a zugzwang! Black must allow the white king to occupy the a6 square. 56... ♕b8 (Touching the a-pawn is never good. It just makes the pawn more vulnerable. 56... a6+ 57. ♕c5 ♕c7 (Black cannot force the b-pawn to capture on a5. White wins after 57... a5 58. b5!+—) 58. a4 ♕b7 59. ♕d6 ♕b6 60. a5+ ♕b5 61. ♕c7 ♕xb4 62. ♕b6+— Black misses one tempo to squeeze the king to the a-file.) 57. ♕a6 ♕a8 58. b5 ♕b8

Here we can see the importance of each tempo. If the pawn was on a3, the game would be drawn. However, White wins the crucial tempo with 59. a3! ♕a8 60. a4 ♕b8 61. a5 ♕a8 62. b6 axb6 63. axb6 ♕b8 64. b7!+—]

53. ♕d4 ♕b5 54. a3 [54. ♕c3 54... ♕c5 forces one of the pawns to move if White wants to make progress.]

54... ♕b6! Black starts waiting now. He only moves with his a-pawn if it forces a draw. Lets say after 55. b4 a5. Otherwise it is obligatory to keep it on a7 to save the game.

55. ♕d5 [White cannot make progress if he tries frontal opposition: 55. ♕c4 55... ♕c6 56. ♕b4 ♕b6]

55... ♕b5 56. ♕d6 ♕b6 57. a4 ♕b7 58. ♕d7 [58. ♕c5 is another line where we can see the importance of provoking all the white pawn moves... 58... ♕c7 59. ♕b5 ♕b7

The only thing that Black must calculate here is the position with the white king on a6 and then White advances his pawns to b6 axb6 axb6 and in this situation he should play Ka8! 60.b4 (If 60.♔a5 60...♔b8 61.♔a6 ♔a8 62.b4 ♔b8 63.b5 ♔a8 64.a5 ♔b8 65.b6 axb6 66.axb6 ♔a8= and draw!) 60...♔a8! By accurate calculation we come to the right conclusion! (60...♔b8? loses now, because of 61.♔a6 ♔a8 62.b5 ♔b8 63.a5 ♔a8 64.b6 axb6 65.axb6 ♔b8 66.b7+; 60...♔c7 is also good. It transposes after Ka6 Kb8.) 61.♔a6 ♔b8 62.b5 ♔a8 63.a5 ♔b8 64.b6 axb6 65.axb6 ♔a8!= and Black holds!]

58...♔b8! The only move! Black must prevent the white king from getting behind his pawn! [58...♔b6? loses to 59.♔c8! a5 (59...♔c6 60.♔b8 ♔b6 61.b4+–) 60.♔b8 ♔c5 61.♔b7 ♔b4 62.♔b6 ♔xb3 63.♔xa5 ♔c4 64.♔b6+–]

59.♔c6 [On 59.♔d8 Black only waits with Kb7-b8. 59...♔b7; I just want to demonstrate another drawing idea with the line 59.♔d6 59...♔c8 59...Kb7 is more natural of course, but it is still a draw. 60.♔c6 ♔b8 61.b4 ♔c8 62.b5 ♔b8 63.a5 ♔c8 64.b6

I wanted to reach this position where 64...axb6 65.axb6 Kb8 66. b7 wins again. But Black has two different ways to make a draw: 64...♔b8 (64...a6 is another well-known theoretical draw. Black only waits on the b8-b7 and if necessary c8 squares and White cannot make progress because 65.b7+ ♔b8 66.♔b6 is stalemate!) 65.b7 a6!= and White is forced to stalemate his opponent with Kb6.]

59...♔c8 60.♔c5 ♔c7 61.♔b5 ♔b7 62.♔a5 ♔b8! We already know that Black must calculate if the king should go to a8 or b8. With the white pawn on a3, 62...Ka8 would have been the drawing move!

63.♔b4 [63.♔a6 63...♔a8 64.b4 is the usual draw after 64...♔b8 65.b5 ♔a8 66.a5 ♔b8 67.b6 axb6 68.axb6 ♔a8 69.b7+ ♔b8 70.♔b6=]

63...♔c8 64.♔c5 ♔c7 65.b4 ♔b7 66.♔d6 ♔b6 67.♔d7 ♔b7 68.a5 ♔b8 69.♔c6 ♔c8 70.b5 ♔b8 71.b6 axb6 72.axb6 ♔c8 73.b7+ ♔b8 74.♔b6 A very instructive endgame! **1/2-1/2**

Chess and the City. The 15th Woman World Champion!

WGM Elisabeth Paehtz

Best rating: 2493

After 3.5 weeks the Women's World Championship has finally come to an end. It was won by the 22 year old Marya Muzychuk from the Ukraine. In a match of 4 games "Miss Tactics", alias Marya Muzychuk, managed to prevent "Miss Come back", alias Nataliya Pogonina, from achieving that important final comeback. She beat her Russian opponent convincingly 2.5 :1.5.

The way to the final for both girls was both tough and spectacular. On their way they had to face not only a lot of world class opponents, but also had to endure several nerve thrilling tiebreaks. Some may wonder why big favourites such as Koneru, Ju Wenjun, Anna Muzychuk and even Stefanova failed at early stages. Well, the answer may be that a knock-out system with only 2 games leads to psychology playing a much more dominant role.

If I look back at this tournament and have to pick the player who showed the highest quality of chess, it is without a doubt the top seed and world number 2 Humpy Koneru, from India. She scored 7/8 in her classical matches, gaining substantial

rating points, and yet was eliminated because of several unfortunate tactical black-outs at decisive moments.

The former World Champion Hou Yifan skipped her participation, mainly because she was already committed to play a tournament in Hawai, which, by the way, she succeeded in winning. In autumn this year there will be a match between her and Marya Muzychuk, over 10 games. The place and date has yet to be announced, but rumour has it that it may be in Lvov, the hometown of both Muzychuk sisters.

Some may think that it will be a one-sided affair, but Marya's tactical skills could prove quite a handful for the Chinese Superstar. Time will tell, and with this newsletter we have finally come to an end of Sochi 2015!

Best rating: 2655

1.e4 e5 2.♘f3 ♘c6 3.♙b5 a6 4.♙a4 d6 5.O-O ♘f6

6.c3 White can also immediately fight for the center with [6.d4!? 6...exd4 (6...b5 7.♙b3 ♘xd4 8.♘xd4 exd4 9.c3 (9.♙xd4 9...c5—+ with c4 next.) 9...dxc3 10.♘xc3 White's compensation is not enough.; 6...♙d7 7.d5 ♘b8 8.♙xd7+ ♘bxd7 9.♙e1 and White didn't lose time for c3-c4.) 7.♘xd4 ♙d7 8.♙xc6 bxc6 9.♘c3 ♙e7 10.♙e1 O-O Thanks to his space advantage and a better structure White has a stable advantage but on the other hand with two bishops Black is very solid. The next plan could be c5-Bc6-Re8-Bf8 etc.]

6...♙d7 7.d4 ♙e7 [7...♘xe4 Without development this looks dangerous for Black, for example after 8.♙e1 ♘f6 9.♙xc6

♙xc6 10.dxe5 dxe5 11.♙xd8+ ♙xd8 12.♘xe5 ♙e4 13.♘d2 (13.f3 13...♙c5+ 14.♙f1 ♙f5! and Black is fine because of the trick with check on d3.) 13...♙e7 14.♘xe4 ♘xe4 15.♙h6! gxh6 16.♙xe4 and the black structure is worse.]

8.d5 ♘b8

9.♙c2?! I don't like this move. Generally in King's Indian structures the exchange of the light squared bishops is useful for White. [9.♙xd7+ 9...♘bxd7 10.♙e1 O-O 11.c4 ♘e8 12.♘c3 g6 with Ng7-f5, but without the bishop on c8 it is harder for Black to create pressure on the kingside.]

9...♙g4 Other plans were also promising for Black: [9...a5 10.h3 O-O 11.c4 ♘a6 12.♘c3 c6 13.♙e3 cxd5 14.cxd5 (14.exd5 This recapture is rare but in some cases interesting. 14...♙c8 15.♘d2 ♘e8 16.a3 f5 17.f3 with very complex play where White is going to play over b4 and Black is looking for the initiative on the kingside.) 14...b5 (14...♙b8 with the typical ideas b5-Rc8-Bd8-Bb6.) 15.♘xe5! dxe5 16.d6 b4 17.dxe7 ♙xe7 18.♘d5↑ and White is better.]

10.c4 ♘bd7 [10...O-O 11.h3 ♙xf3 12.♙xf3 and the main task is to do something with the weakest piece, the bishop on e7. 12...c6 (12...♘e8 13.g3 ♙g5 14.♙xg5 ♙xg5 15.h4 ♙e7 16.♘c3 ♘d7 17.♙g2 Black managed to exchange bishops but White has more space and after Nd1-Ne3 White can nicely prevent

plans with f5.) 13.♙e3 ♘bd7 14.♞d2 knight on d2 should be more flexible. 14...♚b8! followed by the typical maneuver Bd8-Bb6. The position is equal. 15.♖ab1

15...♙d8 16.dxc6 bxc6 17.b4! ♙b6 18.c5±]

11.h3 ♙h5 12.♞c3 O-O 13.g4 ♙g6 [13...♞xg4!? 14.hxg4 ♙xg4 15.♚g2! White needs to hurry with his king evacuation. (15.♚d3?! 15...♞c5 16.♚e3 f5 17.exf5 ♚e8!→) 15...f5 16.exf5 ♚e8 17.♖h1! ♙xf5 18.♙xf5 ♖xf5 19.♖h3 White should consolidate his position.]

14.♚e2 ♞e8 [14...h5!? looks risky. 15.♞e1 (15.g5? 15...♞h7 16.h4 f6±) 15...hxg4 16.hxg4 ♞h7∞ and White needs a lot of time to create an attack over the h-file.; 14...h6 15.♞h4 ♞h7 16.♞f5 ♙g5! 17.♚g2 ♙xc1 18.♖axc1 ♙xf5 19.exf5 ♚h4 and it is not easy for White to improve his position.]

15.♙d2

15...h6 16.♚g2 ♙h7 The beginning of a wrong plan. Black should be looking for counterplay on the queenside. [16...c6∞]

17.♖h1 g5?! Black wants to close the position but this idea is artificial. [17...♙g5 18.♞xg5 hxg5 19.h4! gxh4 20.g5→; 17...c6 was still correct.]

18.h4 f6 19.♞d1 ♖f7 20.♞e3 ♞f8 21.♞f5 [21.h5 is not needed but even here without space Black's position is very unpleasant. 21...♚h8 22.b4 ♖g7 23.♙b3 ♙g8 24.♖hc1 ♞d7 25.♞e1± with Nd3-c5 next.]

21...♙xf5 22.gxf5 [22.exf5± also looks good for White. The next plan could be Be3-Nd2-Ne4 -b4-c5, as well as ideas of playing over the h-file.]

22...♖h7 23.♖ag1 ♞g7 24.♚f1 [24.♙a4!? is an interesting option to prevent Qe8. 24...♞h5? 25.hxg5 hxg5 26.♞xg5+→]

24...♚e8

25.♞h2! ♞h5 Black is also trying to activate his pieces.

26.♞g4 ♞f4 27.♚f3 ♚g7 [27...h5 28.♞xf6+ ♙xf6 29.hxg5→ should be decisive.]

28.hxg5 [28.♙xf4 28...exf4 29.♞xh6 ♖xh6 30.hxg5 ♖xh1 (30...fxg5 31.♖xh6 ♚xh6 32.♚c3! ♚h5 33.♚h8+ ♞h7 34.♚xa8 ♙f6 followed by Be5-g4, with an objectively unclear position

in a practical game.) 31.♖xh1 fxg5 32.♔h3 ♕f6 and the black king will escape.]

28...hxg5 29.♖xh7+ ♖xh7 30.♖h1 ♔h8 31.♖h6 ♔f7 32.♕d1
A good move because at some moment the white bishop can be activated over h5.

32...♖g8

33.♔b3! It is time to play on the other side!

33...b6 [33...♖b8 with the idea to not weaken the light squares but then White plays 34.♕xf4 exf4 35.♖g6 threatening Nh6.]

34.♔a4 ♕f8 [34...a5 35.♔d7+—]

35.♔xa6!? White wins a pawn but now Black gets rid of the bishop, which was the weakest piece, so maybe from a practical point of view it was better to play [35.♖h1 35...a5 36.a3± and the bishop on f8 is still "dead".]

35...♕xh6 36.♖xh6 ♔g7 37.♖xg8 ♔xg8 38.♔c8+ ♖f8 39.♕xf4 An important move, otherwise Black will get counterplay after activating the queen. [39.♔e8 39...♔h8 40.♕xf4 ♔h1+! 41.♔e2 gxf4—]

39...exf4 40.♔e8 taking control over the h5 square to prevent Qh6-Qh1. [40.♕h5!?]

40...g4↪ It looks like Black gets some counterplay.

41.♔h5

41...f3 limiting the bishop, but maybe more promising was [41...g3!? 42.♔g4 ♔xg4 43.♕xg4 gxf2 44.♔xf2 ♖d7! 45.b4 ♖e5 46.♕e2 ♔f7 47.a4 ♔e7 48.a5 bxa5 49.bxa5 ♔d7 and Black is on time! I have no idea who is better now!]

42.♕a4 White is looking for chances to activate his bishop.

42...♖h7 43.♕c2 ♖f8?! This is a typical psychological moment, where for almost the whole game Black defended a very bad position and now when he gets practical chances they don't feel dangerous and he makes a mistake. [43...♔g5 44.♔xg5+ ♖xg5 45.♔g1 ♖h3+ 46.♔h2 ♖xf2 47.♔g3 ♖h3 (47...♖h1+ 48.♔xg4 f2 49.♕d3+—) 48.♔xg4 ♖g5 49.♕d3 ♔f8 50.b4 ♔e7 51.a4 ♔d8 and in case the white king will come to Kh5-Kg6, then Black will play f2 and Nxe4!]

44.e5! A great idea! In the end, the worst piece will deliver the decisive blow!

44...dxe5 [44...fxe5 45.f6 ♖xf6 46.♖xg4+ ♔f7 47.♘e4±]

45.d6! c5 [45...cxd6 46.c5! and White sacrifices pawn number three! (But not 46.♘e4 46...♘d7 47.♘d5+ ♔f8∞) 46...d5 47.cxb6 ♖b7 48.♖xg4+ ♔f7 49.♘b3 ♘d7 50.♖xf3 ♘xb6 51.♖h5++-]

46.♘e4 ♖d7 47.♖h6 1-0

Editorial Preface

First we have some good news for you, from the next issue the super GM and good friend of ours, Etienne Bacrot, is going to join us with his weekly "young and talented" section, commenting on the best game of the week from an U-18 player.

Let's come to the finished events:

The very strong Dubai Open came to an end with 6 players sharing the first place- all with 7/9. The best after tie-break were Solak, Howell and Fedoseev.

Hikaru Nakamura easily won the US Championship with the solid score of 8/11- 5 wins and 6 draws- while Robson came second with 7.5/11. It was a very good tournament for the young US player. 3rd place went to Wesley So with 6.5/11 who lost a total of 4 games, which is more than in the previous 100 games he played!

In the womens' section as expected Irina Krush made her way to the title with 8.5/11, followed by Paikidze and Nemcova on 7.5/11.

Today sees the start of the super tournament in Shamkir, which features Caruana, Giri, So, Anand, Kramnik, Vachier Lagrave, Mamedyarov, Adams and Mamedov. What an amazing line up! We are clearly going to see great games!

In just 3 days from now, the World Team Championship is going to begin in Yerevan and we can also expect a lot of top players to represent their countries. Csaba Balogh, one of your commentators, is participating for the team of Hungary.

As usual we hope you enjoy our weekly online magazine!

Two best games of the past week

(1) **Fedoseev, Vladimir (2674)**
- Solodovnichenko, Yuri (2584)
[B90]

17th Dubai Chess Open(5.2),
 2015.04.11

GM Arkadij Naiditsch
 Best rating: 2737

One of the best young Russian talents Fedoseev once again shows his good tactical skills. After the opening, the game is quickly getting into a very random position with a lot of different tactical motives. Being a bit greedy, Solodovnichenko is taking a pawn which he should not have taken and is getting under many different pins and threats, eventually just losing the game on the spot.

1. ♖f3 c5 2. e4 and we are back into a Sicilian.

2...d6 3.d4 ♘f6 Sometimes Black uses this move order, but personally I could never understand what he is trying to avoid...

4. ♘c3 [4.dxc5 4... ♘xe4 is considered OK for Black.]

4...cxd4 5. ♘xd4 a6 So we are in a Najdorf.

6.h3 e6 is not the main move but clearly an option. [6...e5 is the very main move.]

7.g4 White takes space on the kingside, which is the idea behind the h3 move.

7... ♘e7 8. ♘g2 ♘fd7 We are still following theory. Black's idea is to put his knight on e5 as quickly as possible.

9. ♘e3 White is preparing to castle queenside, which is also

very typical.

9... ♘e5 planning to play Nc4 next as it is very good for Black to exchange his knight against the e3 bishop if possible.

10. ♖e2 preparing to castle queenside, play f4 and defending from Nc4.

10...b5!? A very risky but maybe good move! [Another risky try was 10...g5 which is a typical idea too, but here it doesn't seem to work. 11.O-O-O ♘bd7 12.h4! breaking Black's pawn structure on the kingside.; 10... ♖c7 seems to be the most normal move.]

11.b3 To play such a move somehow doesn't feel right. [Maybe White could have played 11.f4 11... ♘c4 12.O-O-O and yes, it is pity to give up the e3 bishop, but White's development is clearly compensating for it.]

11... ♘bc6! A good choice! [11... ♖c7 12. ♖d2 would not bring much to Black.]

12.O-O White changes his strategy because it is clearly too risky to castle queenside now. [12. ♘xc6 12... ♘xc6 13.O-O-O ♖a5 is looking risky for White.]

12... ♘xd4 Black is planning an interesting idea. [But after the simple 12...O-O I can't imagine White's position being better here. The b3 move clearly doesn't fit well and Black will

always have good play on the c-file.]

13. ♖xd4

13...g5!? In many Sicilians the idea of playing g5 is very typical, but usually the g5 move is played to stop White from playing f4-g5. Now that White has castled kingside though, the g5 move is not really needed although it still deserves attention. I think that once again simply castling kingside would give Black pleasant play.

14. ♖d2 Quite a tricky move. White is not only preparing to push f4 somewhere, but also planning to get his knight to h5, with a clearly great position.

14... ♖b7 15. ♘e2 h5! Once again Solodovnichenko makes the right choice, as opening the h-file is clearly good for Black who can even think about castling queenside in the future.

16. f3 is probably already the best.

16... ♖h7 A very deep move, but I think it was not really needed. [In case of 16... ♖c7 White could play 17.a4 starting some play on the queenside. Of course Black is not even close to being worse, but the position is very unclear.; 16...hxc4 looks nice, checking with what White is planning to take on g4. 17.fxg4 ♖c6 just defending from a4. In my opinion Black is at least equal here.]

17.c4!? White is trying to open the position to make use of the fact that the rook on h7 might be out of the game. [17.a4 also looks solid for White.]

17...bxc4 18.bxc4 and here comes the first mistake by Black:

18... ♘xc4? There was no reason at all for Black to enter such a dangerous line. [Why not simply play 18...hxc4 19.fxg4 ♖c8 and I don't see how White could use the fact that the black king is placed on e8.]

19. ♖b4! A strong move, double attacking on b7 and c4.

19... ♖c7 20. ♖ac1 White is trying a funny idea. [Another logical move was 20. ♖ab1 20... ♖b8 and Black's position is looking very dangerous, but maybe White doesn't have anything better than being "unclear". 21. ♖fc1 (21. ♖a7 21... ♖a8 22. ♖d4 would lead to a draw.) 21...d5 22. ♖b3 and things are very complicated.]

20...d5 21. ♖b1!? This is what Fedoseev had been planning, now the rook on h7 is hanging!

21... ♖h6 The best move.

22. ♘c3 The position is getting more and more messy. White's pawn down is compensated by the bad position of the black king on e8 and the rook on h6.

22... ♖d8 Not the best move. [Black should have tried

22...♘c5 as exchanging the black bishops is good for Black.
 23.♘xc5 ♖xc5+ 24.♔f2 ♘c6 and things remain very complex, but it is hard to imagine Black being worse here.]

23.exd5 Now the position is getting even more open.

23...♞d2? A blunder... [Black had a strange, but quite powerful move: 23...♞f8!? trying to make the king's position a bit safer. 24.♞d3 exd5 25.♔fe1 White has some play for the pawn, but I think Black is just better here after 25...♘c5 and pawn is a pawn.]

24.♞e4! Clearly this is the move that Solodovnichenko underestimated.

24...♞xb1?! Another mistake... [Black could still have returned with his knight. 24...♞c4 but now White already has moves like 25.f4!? and the fight is very unclear.]

25.♖xc7 Now Black is losing material.

25...♘xd5 The only move.

26.♘e3! An excellent reply. White is threatening to play Rxe7 and Bxg5 or just to win the knight on b1. The game is basically over.

26...♘xe4 27.fxex4 The white threats remain.

27...♘d6 Other moves were not any better.

28.♖xf7 hxf4 This move makes the win too easy for White. [Black could have fought on a bit after 28...♘f4 29.♘xf4 gxf4 30.♖1xf4 ♞c3 but of course White's position is close to winning.]

29.e5! with the deadly threat Bc6. So, another typical game in the Sicilian where things are very unclear until somebody makes a calculation mistake. What is clear from the current game is that a move like b3 is not the right choice to go on for White, while Black's move g5 was interesting even if not needed. **1-0**

(2) Troff, Kayden W (2532) - Nakamura, Hikaru (2798) [A62]

ch-USA 2015(8.1),
2015.04.09

GM Csaba Balogh
Best rating: 2672

Nakamura has convincingly won the US Championship. Let's examine one of his victories.

1.d4 ♘f6 2.c4 e6 3.♘f3 c5 4.d5 exd5 5.cxd5 d6 6.♘c3 g6
Recently it is extremely hard to win a game, especially with the black pieces because everybody is very well prepared in the openings. Nakamura shows his intention right in the beginning of the game. The Benoni defense is considered to be a bit risky, but very sharp opening and it was exactly what he needed to outplay his young GM opponent.

7.g3 ♗g7 8.♗g2 O-O 9.O-O The initial position of the g3 system. This position arises more often from the King's Indian defense. A huge line with a lot of theory.

9...♖e8 10.♖e1 White wants to occupy the center with e4.

10...a6 Black tries to ground on the queenside, which must be prevented with a4, but it creates some holes in the white camp. These are all standard ideas.

11.a4 ♘bd7 12.e4 ♘g4 Transferring the knight to it's ideal square on e5.

13.♘d2 A typical manoeuvre to drive the knight to c4. If White could play Nc4, Bf4 and a5, he would achieve the maximum of this opening, but of course, Black also has his triumphs. [It is not advisable to occupy the center with the pawns by playing 13.h3 13...♘ge5 14.♘xe5 ♘xe5 The trading of the pair of knights favors Black, as he is lacking of space, therefore the maneuvering with his pieces inside his camp will be more easy. If it was his move, he could play c4, establishing a knight on d3, while after 15.f4 ♘c4! with strong pressure on the h8-a1 diagonal. The g7 bishop is very strong now and if White kicks out the knight with Qd3 for instance, Na5 could come with a new direction to occupy the hole on b3!]

13...♘ge5 14.♗f1 White has to establish control over the d3 and c4 squares to prevent Black's counterplay.

We can see the point why White wants to keep all knights on board. Now the one on e5 is nice, but is threatened by getting trapped by f4! Nakamura plays another typical move, which helps him to keep his knight on e5! [Preventing Nd3 with a developing move is inferior 14.♗c2 is strongly met by 14...c4! preparing to install an annoying knight to d3 15.♗f1 comes too late, because Black gets too big activity after

15...Nc5! The knight cannot take on c4 because of Nf3 and after 16. Bxc4 Bh3! followed by Rc8. All black pieces are standing perfectly which clearly worth the value of a pawn. White cannot play like this.]

14...g5! Black starts his fight for the dark squares on f4 and e5. If it was his move, he would push g4, creating eternal outpost for the knight on e5 by preventing f4 forever.

15.h3 White prevents g4 and would like to push f4 later at some point after some preparation. [15.f4 right away was premature, because the white pieces are not supporting well the center. Black could quickly get his counterplay with 15...gxf4 16.gxf4 Bg6 17.Bf3 (17.Bc4 is strongly met by 17...Bd4+! 18.Bh1 Bf6 with pressure on all the pawns and threatening with Bg4 or Ng4.) 17...Bf6 forcing White to push f5, but it gives up the e5 square.]

15...Bf6 Black continues fighting for the dark squares.

16.Bh5 Troff tries to show the drawback of the g6-g5 move, namely, that it has weakened the h5 and f5 squares. The plan is to drive the c3 knight to f5 through d1-e3. Nakamura was familiar with this positional ideas of the opening and he makes an excellent preparation for this plan.

16...Bh6! With the intention of playing Qg7, Nf6 and g4. The knights are occupying the f6-e5 squares (closing the a1-h8 diagonal), but the bishop finds another great diagonal to stay on! [On the natural 16...h6 to strengthen the g5 pawn, the plan of the game is much more efficient. 17.Bd1! and Ne3 next.]

17.Bd1 White consequently follows his plan.

17...g4?! A tempting move, which was seriously criticized by Nakamura himself. [Black should have followed his initial idea with 17...Bg7! 18.Bd3 Bf6 19.Bd1 g4! and he is doing very well.]

18.Bd3! [Of course not 18.hxg4? because of 18...Bxd2 19.Bxd2 Bf3+ 20.Bg2 Bxd2--]

18...Bxe3 19.Bxe3 Bg7! Freeing the f6 square for the knight. The queen looks kind of trapped on h5, but it finds an unusual way to come back to the game.

20.hxg4 Bxg4 20...Nf6 could be a transposition.

21.♖c3? [It is very deep and hard to foresee, but White should have overprotect his e4 pawn in order to be able to leave the d2 square with his knight and finish the development (ideally Nc4 and Bf4). If Black cannot do anything concrete against it, his position simple becomes much worse. 21.♖e2! The plan executed in the game does not work properly now, because after 21...♟df6 White needs find some artificial moves 22.♙h1! ♜e5 23.♙g2! leaving from the Rh5 threat and intending to play Nc4! 23...♜h5 24.♟f3! White protects everything and Bf4 is coming next. Despite his strange queen on g2, White is much better.]

21...♟df6 22.♙h1

22...♜e5! Very nice attacking idea by Black. He drops his rook to the h-file. In comparison with the 21.Re2 line, White has problems with his e4 pawn and he cannot get his knight

ideally to c4 or f3.

23.♙f3 Leaving from the Rh5 tempo. [Now on 23.♙g2 23...♜h5 and Rh2 is coming next. Nf3 does not work this time because the e4 is hanging.; 23.f3? loses nicely to 23...♜h5 24.♙g2 ♜h2 trapping the queen.]

23...♟d7 Bringing the rest of the pieces to the game! The other rook also arrives to the e-file, putting pressure on the e4 target. [It was easy to go wrong with some premature moves like 23...♙h6? 24.♙g2 Black has moved into different motifs with discovered attack on the queen after jumping away with the knight. 24...♙h5 25.f3! pushes back the black pieces 25...♟h6 26.♟c4 and suddenly Black collapses.]

24.♙d3? A blunder, but it was difficult to play the position. [The critical line was 24.♜b3 but it strongly met by 24...♜ae8! 25.♜xb7 ♙g6! with huge compensation for the sacrificed pawn. All black pieces are standing well. Here is one line to illustrate their power 26.♜b6 attack the d6 pawn, but suddenly after

26...♟f5!! Black gets a very strong attack. 27.exf5 (27.♜xd6 27...♙h5 28.♙g2 ♟xe4) 27...♜xf5 28.♙h1 ♜xf2-- White will be punished for his undeveloped pieces.; It is easy to understand, that White did not want allow the black rook penetrate on the back rank after 24.♟c4 24...♜xe4 25.♟xd6

♖e1 threatening with Rxf1 and Nh2.]

24...♖h6! Nakamura does not let the opportunity slip away and he makes use of his opponent's mistake.

25.♗g2 [25.♗f3 is simple met by 25...♖h5! leaving from the attack and White cannot protect his e4 pawn!]

25...♖h2+ 26.♖f1

26...♗xf2! A well-calculated sacrifice gives Black a winning advantage.

27.♖xf2 ♗h3! 28.♖f1 White is threatening to solve the problems with Qh1, forcing the trade of the queens and preserve his extra piece, but a decisive blow was prepared by Black before sacrificing on f2 a couple of moves ago. [28.♖f3 loses to 28...♗g4+ 29.♖f1 ♖h1+! 30.♖e2 ♖xg2+ 31.♖xg2 ♗xg2+ with material advantage and better position.]

28...♖xe4!! 29.♗xe4 [29.♖h1 refuted nicely by 29...♗g4+ 30.♖f3 ♗xg2+ 31.♖xg2 ♗e5+ 32.♖f2 ♖e2+-- wins the queen.]

29...♗xe4+ 30.♖e3 [The point is after 30.♖f3 30...♖xg3+! 31.♖xe4 ♖e8# is a nice mate in the middle of the board.]

30...♗xg2 31.♖f4 ♗xc3 It is all over now. Even materially Black is ahead, but the main problem is the king on e3, which cannot survive for long.

32.♖g5+ ♖f8 33.bxc3 ♖e8+ 34.♖f2 ♗h1+ White resigned in view of Qg2 mate next move. A very nice win by Nakamura!
0-1

The K-Files.

Blumenfeld Gambit - part 1

GM Alexander Khalifman
FIDE World Chess Champion (1999)

Best rating: 2702

(3) Blumenfeld Gambit - part 1 [E10]

1.d4 ♘f6 2.c4 e6 3.♘f3 c5 4.d5 b5!? The Blumenfeld Gambit is a relatively unexplored area in modern opening theory. Generally it is supposed to be rather incorrect but the clear ways to prove this are not perfectly clear.

5.dxe6 The classical approach is that the only way to refute the gambit is to accept it. Of course, this is not an universal truth but in this case it looks quite reasonable. The alternatives (5.Bg5 first of all) are solid enough but after them it's only about some positional advantage. So, why not grab a pawn?!

5...fxe6 6.cxb5 d5

7.♘c3 This move is preparing e2-e4 to undermine Black's pawn center. Until a certain moment in February 2007 it was considered like a refutation of the gambit, until Black found an excellent idea. Or...?! [7.♘f4 An interesting idea. Now White's dark-squared bishop is quite active in the center. However, it might be missing on the queenside, which Black has to prove with precise play. 7...a6 This is the best reaction. Black starts with active play on the queenside immediately. (

a) 7...♘d6 8.♘xd6 (8.e3 doesn't promise much because of 8...♘xf4 (8...O-O (Akimov - Ovechkin Ekaterinburg 2008) allows White to return to the main line.) 9.exf4 a6 10.♘bd2 O-O 11.a4 (11.♘e2 11...axb5 12.♘xb5 ♖b6 13.a4 ♘d7= 14.♘xd7 ♘fxd7) 11...♖c7 12.g3 ♘bd7 13.♘g2 axb5 14.axb5 ♖xa1 15.♖xa1 e5 and Black is just in time. 16.fxe5 ♘xe5 17.O-O ♘xf3+ 18.♘xf3 ♘d7=) 8...♖xd6 9.♘bd2 O-O (9...e5?! 10.e4!± This is in fact White's key idea in this opening.) 10.e3 a6 (10...♘bd7 11.a4! a6 (11...e5 12.e4!) 12.b3 - see 10...a6.) 11.a4 ♘bd7 12.b3!? N White is fighting for a tempo, which is a standard idea in many openings. He is waiting for a6xb5 to take back with his bishop from f1. This approach might seem risky but it works. (12.♘e2 12...axb5 13.axb5 ♖xa1 14.♖xa1 e5 and Black has adequate counterplay. (Delemarre - Peralta Vlissingen 2007)) 12...axb5 (12...h6 trying to prepare e6-e5 and preventing the response e4 dxe4 Ng5. However... 13.♖c1!? White still has useful moves. 13...e5 14.e4 dxe4 15.♘c4+ ♖h8 16.♘h4 ♖d8 17.♘f5 ♖c7 18.O-O ♘f8 19.♘g3 axb5 20.axb5 ♖a5 21.♖c2 ♘e6 22.♖e1 ♘d4 23.♖c1 and White is ready to take on e4, when Black's weaknesses will be really sensitive.) 13.♘xb5 ♘a6 14.♘xa6 ♖xa6 15.♖e2 ♖fb8 16.♖xa6 ♖xa6 17.♖e2+= and Black's compensation is not enough here.;

b) 7...♖a5+?! is dubious because of 8.♘c3! (8.♖d2 8...♖xb5 9.e4 ♖b7 10.exd5 exd5 11.♘c3 ♘e7 12.O-O-O Lindgren - Thoren Ulmel 1997 12...O-O! 13.♘xd5 ♘xd5 14.♘c4

♙e6 15. ♙xb8 ♖axb8 16. ♙xd5 ♙xd5 17. ♖xd5+ ♖xd5 18. ♖xd5 ♙f6 19. b3 c4 20. bxc4 ♖fc8 21. ♗d2 ♖b2 22. ♖e1 ♖xa2 and Black's active counterplay is enough to make a draw.) 8...a6 (8...d4 9. ♖a4 ♖xa4 10. ♗xa4±) 9. ♙d2 ♖b6 10. e4!± Lysyj - Fang China 2014;

c) 7...♙e7 8.e3 O-O 9. ♙e2 a6 Romanko - Schuurman Plovdiv 2008 10. O-O axb5 11. ♙xb5+= and once again Black's compensation is not obvious.)

8.e3

c4!? (8...♖a5+?! (Sokolov, I - Savchenko, B Dubai blitz 2014) is quite senseless now. 9. ♖d2 ♖xd2+ (9...♖b6 10. ♗c3 c4 11. bxa6 ♗xa6 12. ♙e2+= with an extra tempo for White compared to 8...c4.) 10. ♗bxd2 c4 11. b6 ♗bd7 12. ♙e2 ♗xb6 13. O-O and although Black managed to win the sacrificed pawn back White is far ahead in development and ready to undermine the opponent's center.) 9. bxa6 ♙b4+! N An important intermediate check. Now the white knight can't jump to c3 where it belongs. (9...♖b6 10. ♖c1 just to avoid Nb8-a6(c6)-b4 with tempo. (10. ♗bd2 10...♗c6 11. ♖c2 ♙xa6 12. a3 ♙e7 13. ♙e2 ♗d7!± with good counterplay. (Giorgadze - Kacheishvili, Tbilisi 2007)) 10...♙xa6 11. ♙e2 ♙b4+ 12. ♗c3 O-O 13. O-O ♗bd7+= Markus - Wojtaszek, Heraklio 2007) 10. ♗bd2 (10. ♗c3 10...♖a5 11. ♖c2 ♗e4±) 10...O-O 11. ♙e2 ♙xa6 12. O-O

♗bd7± and Black has adequate compensation for the pawn.; 7. ♙g5 Some ideas this move are quite similar to 7. Bf4, but at the same time White prevents 7... a6. However, the bishop's position on g5 has some drawbacks as well and Black is able to find good resources. 7... ♗bd7 This quiet developing move is the best reaction. (

a) 7...h6 doesn't improve the kingside structure for Black. 8. ♙h4 (8. ♙xf6 8...♖xf6 9. ♗c3 ♙b7 10. e3 ♗d7± with good compensation for the pawn. (van Hoolandt - Mehmeti, Tromso 2014); 8. ♙f4!?) 8...♙e7 Evdokimov, Alexander A 2558 - Bocharov, Dmitry 2602. RUS Cup rapid final 2013.0-1 (After 8...♗bd7?! 9. ♖c2 clearly shows the drawbacks of h7-h6. 9...♖a5+ Sjudahl - Popov, V Sweden 2007 10. ♗bd2! ♗f7 11. e3 ♙d6 12. ♙d3 ♖f8 13. O-O±) 9. e3 O-O 10. ♙e2 (10. ♗bd2 (Evdokimov - Bocharov Hanty Mansiysk rapid 2013) is not precise because of 10...a6 11. a4 c4∞) 10...a6 11. O-O axb5 12. ♙xb5 ♙a6 13. ♗c3 ♙xb5 14. ♗xb5 ♗c6 15. a4+= intending b2-b3 and stopping Black's pawn mass. Black doesn't have enough for the pawn.;

b) 7...♖a5+?! is not worth trying as almost always is the case in this opening. 8. ♖d2 ♖b6 (8...♖xb5 9. e4 ♖b4 (9...♖b7 10. exd5 exd5 11. ♙d3 ♙e7 12. O-O O-O 13. ♗c3± and the black pieces are certainly misplaced.) 10. ♖xb4 cxb4 11. exd5 exd5 12. ♗bd2+=) 9. ♙xf6 gxf6 and White has a pleasant choice between and 10. e3 (10. e4!? N 10...dxe4 11. ♗h4 ♗d7 12. ♗c3 ♙b7 13. O-O-O ♗e5 (13...O-O-O 14. ♙c4±) 14. ♙e2 ♙g7 15. f4 exf3 16. ♗xf3 ♖d8 17. ♖xd8+ ♖xd8 18. ♖xd8+ ♗xd8 19. ♗xe5 fxe5 20. ♙f3 ♙xf3 21. gxf3 with a somewhat better endgame.) 10...♗d7 11. ♗c3 f5 12. a4 ♗f6 13. ♙e2 ♙d6 14. O-O ♙d7 15. ♖fd1+= Korchnoi - Vallejo Pons, Gibraltar 2011;

c) 7...♙d6 8.e3 (8.e4 8...♗bd7! = - 7...Nbd7) 8...O-O Mikhalev - Dragnici, Goa 2006 9. ♗c3 ♗bd7 10. ♙e2 ♙b7 11. O-O+= ♙h8!?

Here the prophylaxis is useful. (11...♖e8 12.a4! h6 13.♙xf6 ♗xf6 14.a5 ♜d8 15.a6 ♙a8 16.b6! axb6 17.♖b3±; 11...♖e7 12.♙h4 e5 13.♗d2 e4 14.♗b3+= Now White's dark-squared bishop is cementing his kingside. 14...♙c7 15.♞c1 ♞ad8 16.♗a4! Now Black's pawn center is just a weakness. 16...c4 17.♗d4±; 11...h6N 12.♙h4 g5 13.♙g3 ♙xg3 14.hxg3 ♗g7 15.♖c2 e5 16.♗d2 ♖e7 17.♞ad1 ♞ac8 18.♗a4! e4 19.♖c3!+= and White is clearly better.) 12.a4 ♙c7 13.♙h4 e5 14.♗d2 e4 (14...d4 15.♗ce4±) 15.♗b3 ♗e5 16.♙g3 ♖e7 17.a5±;

d) 7...♙e7 8.e3 O-O (8...♗bd7 9.♗c3 ♙b7 10.♙e2 O-O 11.O-O - 8...O-O) 9.♗c3 ♙b7 10.♙e2 ♗bd7 11.O-O+= intending to move the a-pawn. Black has no clear plan. 11...♖c7 12.a4! e5 13.a5 d4 14.♙c4+ ♗h8 15.♗e2! += ♙xf3 16.gxf3 h6 17.♙xf6 ♞xf6 18.♖d3! ♞af8 19.♖e4 ♞xf3 20.b6! axb6 21.a6+-;

e) 7...a6?! doesn't work here because of 8.e4!±)

8.e3 (8.e4 Of course Black doesn't have to destroy his pawn center. 8...♙d6! N (

a) 8...dxe4?! 9.♗fd2 ♙b7 10.♗c3 ♖c7 11.♗c4 ♗b6 Sjoberg - Ingbrandt Sweden 2012 (11...♙e7 12.♙h4! O-O 13.♙g3± and White is clearly better.) 12.♖b3!±;

b) 8...h6 is premature as the following forced line proves: 9.♙xf6 ♖xf6 10.exd5 ♖xb2 Al Hantouti - Abdel Razik Beirut 2007 11.dxe6! N ♖xa1 12.exd7+ ♙xd7 13.♙c4 O-O-O 14.O-O ♖b2 15.♖d5 ♗c7 16.♗e5 ♙e8 17.♖e4→)

9.♙d3 h6 d5 is not threatening anymore, so now this move works. 10.♙xf6 ♖xf6 11.exd5 exd5 12.O-O O-O (12...♙b7 13.♞e1+ ♗f7∞) 13.♙c4 (13.♙c2 13...♖f7 14.♗c3 ♙b7 15.♖d3 ♗f6∞) 13...dxc4 14.♖d5+ ♞f7 15.♖xa8 ♗b6 16.♖e4 ♙b7∞ is dangerous only for White.) 8...c4!? preparing the annoying Bb4+. 9.♙e2 (9.♗d4 Krejci - Jenc Klatovy 2007 9...♙b4+ 10.♗c3 ♖a5→) 9...♙b4+ 10.♗bd2 (10.♗c3?! 10...♖a5 11.O-O

♙xc3 12.bxc3 ♗e4=) 10...O-O 11.O-O a6 12.bxa6 ♙xa6∞ and Black's counterplay is good enough.; 7.♗bd2 looks a bit passive. Yes, in many lines this square is the best for this knight but here White just defines its position too early. 7...a6! (

a) 7...♖a5?! looks tempting but is met by the strong 8.e4! ♗xe4 9.♙d3 ♗f6 10.♗g5 ♙d6 Bojchev - Dvirnyy, Herceg Novi 2008 and now 11.O-O White could use his development lead. 11...O-O 12.♗de4! A nice tactical surprise! 12...dxe4 13.♗xe4±;

b) 7...♙b7 This "standard" move is just asking for trouble. 8.e4! (8.b3!? is also worth attention.) 8...dxe4 (8...♗xe4? 9.♗xe4 dxe4 10.♖xd8+ ♗xd8 11.♗e5± is fairly bad for Black.) 9.♗g5!? (9.♗e5!+=) 9...♖d5 10.f4! Very strong trick (10.♗h3 10...♗bd7 11.♙c4 ♖f5 12.♗f1 ♗b6→Tovmasian-Vetoshko, Lviv 2012) 10...e3 (10...exf3 11.♗gxf3± Black has many weaknesses.) 11.♗c4 h6 12.♗f3 ♖xd1+ 13.♗xd1+= winning the e3 pawn with a huge advantage.;

c) 7...c4!? deserves attention as well.)

8.e4 (8.bxa6 8...c4! ∞ As we could already see, this resource is very important for the whole opening system. 9.e4 ♗c6 10.♙e2 ♙c5 - see 8.e4.; 8.e3 8...c4! 9.bxa6 ♙d6 10.♙e2 O-O 11.O-O ♙xa6 12.♗b1 ♖c7 13.♗c3 ♗bd7 14.h3 ♗c5∞ with a dream position for Black. All his pieces are on excellent squares.) 8...c4! and Black has no problem at all. It's White now who has to be careful. 9.bxa6 ♗c6! preventing b4 might be a more accurate move order. (9...♙c5 10.♙e2 Rychagov,A - David. Paleochora 2010. (10.b4!?) 10...O-O 11.O-O ♙xa6+= and Black's pawn center is too strong.) 10.♙e2 ♙c5 11.O-O O-O+=; 7.a4 Not the best time for prophylaxis. White must think about his development first. 7...a6! (7...♙d6 was played more often but the immediate action is more convincing.) 8.♗c3 might be the relatively best, although

Black has enough dynamic resources as the following lines show. (8.e3 Rodkin - Rotstein, J Gladenbach 1999 8...c4! forcing White to do something about his b5 pawn. 9.bxa6 (9.♖c3 9...axb5 10.♗xb5 ♖e4! 11.♙e2 ♙b4+ 12.♙d2 ♗xd2 13.♗xd2 ♙d7 (13...♙a5!?) 14.♗c3 O-O 15.O-O ♗a6 16.♗f3 ♗c5=+ and Black is slightly better already.) 9...♗xa6 10.♙e2 ♗c5= and now it's clear that the "prophylactical" move a2-a4 just seriously weakened White's queenside.) 8...axb5 (8...d4 9.♗b1 axb5 10.e3 and Black faces certain problems.) 9.♙f4 (9.♗xb5 9...c4=) 9...bxa4 10.e4 ♙e7 11.exd5 exd5 12.♙b5+ ♙d7= 13.♙xd7+ (13.♗xd5 13...♗xd5 14.♙xd5 ♙xb5 15.♙xa8 O-O!) 13...♙xd7 14.♙xb8 ♗xb8 15.♗e5 ♙d6 16.♙xa4+ ♖f8 17.f4 g6 18.O-O ♖g7=; 7.g3 will be examined in part 2.; 7.e3 - part 2.]

7...♗bd7! This is an important move. The alternatives allow e2-e4 with great effect. [7...♙d6? only helps White to destroy the opponent's center. 8.e4!± Lahav - Romm, Tel Aviv 1989; 7...a6?! 8.e4! d4 (8...♙e7 Bitan - Neelotpal, Dhaka 2009 9.exd5 exd5 10.♙g5 and Black's pawn center transformed into a serious weakness. 10...d4 11.♙xf6 ♙xf6 12.♗e4 O-O 13.♙c4+ ♖h8 14.O-O+=) 9.e5! ♗fd7 (9...♗d5 10.♗xd5 ♙xd5 11.♙c2± Handler - Martinez Caldas Novas 2011; 9...dxc3 10.♙xd8+ ♖xd8 11.exf6 gxf6 12.bxc3± Jovanic - Cebalo, Sibenik 2007) 10.♗e4 ♙b7 11.♗eg5 ♙d5 12.♙d3 ♙e7 Uliashov - Volkov, Ukhta 2009 (12...c4 13.♙xh7 ♙b4+ 14.♖f1+-) 13.O-O±; 7...♙b7 The old main move which was first played by Maroczy in 1922. However, it fails to stop e2-e4. 8.e4! d4 9.e5 ♗fd7 10.♗e2! N A sign of the computer era. This strong move was first played in a Man - Machine game. The point is very logical: White is not afraid of exchanging on f3 as his light-squared bishop will dominate the board after it. 10...♙c7 (10...♙xf3 11.gxf3 ♗xe5 12.♙g2 ♗bd7 13.f4 ♗f7 14.b4!± This is another typical idea for this line. Black is close to collapse.) 11.♗f4 (11.♙c2!?)

11...♗xe5 12.♗xe6 ♙d6 (12...♗xf3+ 13.♙xf3! ♙a5+ 14.♙d2 ♙xd2+ 15.♖xd2 ♙xf3 16.gxf3+- RYBKA - Flores, Santiago 2006) 13.♗xe5 ♙xe6 14.♙f4 ♗d7 15.♙c4 ♙f5 16.♗c6±; 7...♙e7 8.e4! d4 9.♗a4!? This is a quite fresh and promising approach. White is ready to sacrifice his central pawn for some tempi and the possibility to attack the opponent's weakened center. (The standard 9.e5 leads to a fairly unclear endgame after 9...dxc3 10.exf6 ♙xd1+ 11.♖xd1 ♙xf6∞ Neurohr - Migl, Germany 1988) 9...O-O (9...♗xe4 10.♙d3 ♙d5 11.O-O ♗d7 12.♗e1 ♗df6 13.♙c2 ♙b7 14.♙f4 O-O 15.♗e2± Black's central construction is very shaky.) 10.♙d3 ♗bd7 (10...a6 11.b6 ♗bd7 12.♙b3± Miroshnichenko - Jianu, Bucharest 2008) 11.O-O ♗g4 (11...♙b7? 12.♗g5! and e6 is a big problem.) 12.b3 12...♙c7 13.h3 ♗xf3 14.hxg4 ♗f8 15.f4±; 7...d4?! stops e2-e4 but clearly spoils the structure. 8.♗a4 ♙a5+ 9.♙d2 ♙xb5 10.e3± and Black's center is in ruins. (Sadler - Ansell, London 1994)]

8.e4 d4 A very critical moment for this line and maybe for the whole opening. The traditional 9.e5 leads to very sharp play but fails to create problems. So the knight's retreat to a4 (similar to the 7...Be7 line) might be an improvement although it's quite difficult to make any conclusions so far and more practical tests are required.

9.e5 [9.♗a4!? 9...♙b7 (9...♗xe4 10.♙d3 (In the only game played so far Black was OK after 10.b4 10...c4! 11.♙xc4 ♙xb4+ 12.♖f1 ♗df6∞ Karolyi, T - Csiszar, Hungary 2010) 10...♙a5+ 11.♗d2 ♗ef6 12.O-O ♙b7 13.b4! cxb4 14.♗e1 ♙d5 15.♗f3±) 10.♙d3 ♙d6 11.O-O O-O 12.♙e2+= and Black's center is quite unstable.]

9...♗g4 10.♗g5 [10.♗e4 10...♙b7!± An important improvement which was first played in the game Ehlvest - Alekseev, Moscow 2007. (10...♗dx5 11.♗xe5 ♗xe5 12.♙h5+

15...♗f6 16.♗b2 ♔d5=

David vs. Goliath

Peter Zhdanov
Chief Editor of Pogonina.com

In this entertaining column we are reviewing the most unexpected results that occurred last week. Players usually face opponents of a similar level. Considerably less frequent are situations when a significantly lower-rated player succeeds in beating a much stronger adversary.

The previous week brought us only 11 upsets.

The number of move ranges from 32 in Bergsson (2101) - GM Gretarsson He (2456), 1-0 to 121 in Ahmed (1960) - FM Yousry (2304), 1-0. The latter game featured a rather weird endgame with White having a rook+bishop+two "f" pawns vs Black's two bishops.

The most notable results were GM Zhao Jun (2621) - Zhu Y (2288), 0-1 and FM Saeed (2200) - GM Perunovic (2632), 1-0. Also worth mentioning is the loss of one of the best female chess players in the world GM Valentina Gunina (2528) to an amateur Chinese player Zhu Jiner (1989).

Top-10:

Gunina (2528) - Zhu (1989), 0-1, [539](#) points
 Bergsson (2101) - Gretarsson (2456), 1-0, [455](#) points
 Saeed (2200) - Perunovic (2632), 1-0, [432](#) points
 Kristinsson (2160) - Petursson (2532), 1-0, [372](#) points
 Olafsson (2213) - Eliasson (1858), 0-1, [355](#) points
 Maquieira (1734) - Jaunooby (2183), 1-0, [349](#) points
 Ahmed (1960) - Yousry (2304), 1-0, [344](#) points
 Pavlovic (2478) - Jicman (2137), 0-1, [341](#) points
 Wang (1901) - Melekhina (2235), 1-0, [334](#) points
 Zhao Jun (2621) - Zhu (2288), 0-1, [333](#) points

Average gap: 385; White won 7 games, Black won 3 games.

You can view all the games in the accompanying pgn file.

If you have ever won a game against someone rated 300 points or above yourself, please send it to peter@pogonina.com for publication. Any additional information (a photo, annotations, etc.) will be appreciated.

Endgame section

(14) Onischuk, Onischuk (2665)
- Naroditsky, Daniel (2633)

US Championship,
2015.04.09

GM Csaba Balogh
Best rating: 2672

Seemingly Black just survives the difficulties with his a8 bishop, because the d4 pawn is hanging and he is threatening to free his position with e5 or c5. However Onischuk finds a brilliant idea with which he manages to win the game in style...

37.c5!! A positional pawn sacrifice! The key is to lock the bishop to a8 even in the cost of some material. [After some natural move like 37...dxc5 Black holds the draw easily by playing 37...c5 (37...e5 is also possible.) 38.♙xa8 ♖xa8 39.dxc5 ♖xd3 40.♖xd3 ♖c8= He takes on c5 next move and the draw is logical outcome.]

37...♖xd4 38.♖xd4 ♖xd4 39.♖b3! Forcing the black rook back to passivity. The only way to avoid Rb8 and losing the bishop is Rd8.

39...♖d8

40.a6! Excellently played! The bishop is trapped on a8 until the end of the game. Black cannot do anything better, than waiting, while White slowly improves his position.

40...♙f8 41.♙e4! Putting the bishop to a more active square, freeing the king's path towards the center and vacating the 3rd rank for the rook for further maneuvering.

41...f5 Opening the position just hastens the defeat. The only chance would have been to attempt to build a blockade, but it could hardly be succesful. [On 41...♙e7 42.♖h3! is the most precise. White wants to penetrate along the 7th rank after which it is not easy to deal with the g7 pawn. 42...f5 (Black cannot hope for activity, because after 42...♖d4 43.♙f3! the rook is forced to retreat to the 8th rank in view of the threat of Rh8!) 43.gxf6+ ♙xf6 44.♙f3 followed by Ke3 and Rf3-Bg6, with similar ideas to the game, trying to trade rooks and enter into a winning bishop endgame.]

42.gxf6 gxf6 43.♖h3 ♙g8

44.♖d3! The most brutal move! Black is forced to trade rooks, otherwise Rd7 wins in the spot, but the arising endgame is completely hopeless with the dead bishop on a8 despite the healthy extra pawn!

44...♖xd3 45.♗xd3 f5 Black tries to push his defensive line a rank forward. [Keeping the pawn structure and waiting with 45...♖f7 does not change anything. White wins after 46.♗c4 pinning the black king to the e6 pawn, ensuring the penetration of the white king along the kingside. 46...♖e7 47.♖f3 ♖f7 48.♖g4 ♖e7 49.♖h5 ♖f7 50.♗b3+- zugzwang. Kg6 is coming next.]

46.f4 White opens the path for his king to e5!

46...♖g7 47.♖f3 ♖f6 48.♖e3 e5 [48...♖f7 leads to the same after 49.♖d4 ♖f6 50.♗c4+- zugzwang. Ke5 wins next move.]

49.♗c4! Onischuk cuts the black king from the c5 pawn. It is essential for keeping the a8 bishop locked.

49...e4 [49...exf4+ 50.♖xf4 ♖g6 51.♗e6 ♖f6 52.♗c8+- followed by Bb7 wins. Of course there was nothing wrong with taking on f5.]

50.♖d4 [Black resigned in view of getting into zugzwang again... 50.♖d4 50...♖g6 51.♖e5 e3 52.♗e2 and taking on f5 next followed by coming back to collect the e3 pawn as well. Very nice lesson by Onischuk who basically has played this entire endgame with an extra piece.] **1-0**

**(15) Kuzubov, Yuriy (2667)
- Solak, Dragan (2607)**

17th Dubai Chess Open(6.4),
2015.04.11

GM Arkadij Naiditsch
Best rating: 2737

This is the game which brought Solak what is probably one of his biggest successes of his chess career, taking first place at the very strong Dubai Open. Black's position seemed to be close to lost for a long time until this interesting rook endgame appeared. White is a pawn up and Black's pawns look to be in danger, especially the pawn on h6, but, Solak finds a great way to complicate things and even after a few mistakes by his opponent to win the game!

46...d4! Black uses his only chance. The idea of the d4 move is not to push the pawn, but to get the king to the e4 square.

47.♖g6 What can be more logical than to take the e6 pawn?

47...♔c6 Black's only chance.

48.♖xe6+ ♔d5 White is already 2 pawns up, but things are much more complicated than they seem. The black king on

e4 will support the movement of the d-pawn while the white king on h2 is not doing anything.

49.♖e8 Not a bad move, but maybe not the most precise. [Why not continue with 49.♖xh6 49...♔e4 and now White would have to find the very strong 50.♖d6! A nice tactic which gives White a clear advantage. 50...♖xd6 51.exd6 ♖c8 (Black can't stop the white pawn after 51...♔xd3 52.d7) 52.♖d1 ♖d8 Now White has a couple of moves, but I think that after the simple 53.♔g3 ♖xd6 54.♔f2 White's chances to win the game are excellent.]

49...♔e4 The white rook on d3 is under attack and to go back to d2 is not an option because of Ke3.

50.e6! White finds the best move, the e-pawn starts to be dangerous as well.

50...♖g7 and Black also plays the best move. To let White play Rg3 would end up badly for Black.

51.♖d2? This is a serious mistake. [White had to play 51.♖g3 51...♖xg3 52.♔xg3 and now we are in a crazy position! White is a full 2 pawns up and has a strong pawn on e6, but the d4 pawn almost cannot be stopped. Things are very complicated here. 52...♖c7 (Black is losing after 52...♔e3 53.♖f8! and the f5 pawn is falling. 53...♖c7 54.♖xf5 followed by Re5+ with an easy win.) 53.♖d8 (53.♔f2 53...♖c2+ just leads to a draw.) 53...♖e7

54.♖d6 The black rook is blocked on e7, but here comes the king! 54...♔e3 with the simple idea of playing d3-d2-Ke2 and queen. Of course Black can never be better here, but if White is winning or not is really hard to tell, especially in a practical game. White's idea here is to play Kh4 followed by g4.]

51...♔e3 Of course! Winning a clear tempo and getting the white rook to a passive position on b2.

52.♖b2 d3 Now it is already White who is risking to lose the game, as Black just wants to play d2.

53.♖d8 There is no other way to stop Black from playing d2.

53...♖c2 Offering the rook exchange and attacking the g2 pawn.

54.e7? and White makes another mistake. [

54.♖xc2! This move is just impossible to calculate during a practical game. 54...dxc2 55.♖c8 ♔d2 and here comes the key move: 56.g4!! This is not the hardest part to find, but the position that will appear in a couple of moves is the nut to break. 56...c1=♔ Black doesn't seem to have anything better. (56...♖e7 57.gxf5 leads us back to the main line.; 56...fxg4 57.f5 ♖e7 58.♔g3 Here White is just winning.) 57.♖xc1 ♔xc1 58.gxf5 Now Black has 58...♖e7! and it seems like he managed to stop all the white pawns. The king from c1 also has enough time to

get back to d6 after which the game is over, butno! 59.♔g3 ♔d2 60.♔g4 ♔e3 and

61.f6! The e6 pawn has to be sacrificed. 61...♖xe6 62.♔f5 ♖e4 63.f7 ♖xf4+ 64.♔g6 ♔f3 The black king is going for the h5 pawn. 65.♔g7 ♔g4 66.f8=♔ ♖xf8 67.♔xf8 ♔xh5 68.b5 ♔g5 69.a4 h5 70.a5 h4 71.b6 axb6 and of course

72.a6! getting the h1 square under control. 72...h3 73.a7 h2 74.a8=♔ and White is winning. To calculate this line from the beginning is almost impossible and as we saw just a tempo decides about win or loss.]

54...♖xe7 Now Black has taken the main enemy and the d-pawn is still alive.

55.♖b3 is White's only chance to stop the d3 pawn from moving.

55...♖d2 56.b5? The long-term idea is to play a4-a5 and create a passed pawn, but now Black is winning by force. [White had to play 56.♖d6 with the idea of having Rg6 after Black's Rg7. Black is better here, but White has good chances to survive.]

56...♖g7 attacking the g2 pawn which cannot be protected any longer.

57.♗e8+ [White was probably planning to play 57.♔h3 but Black can still take the g2 pawn. 57...♖xg2 58.♖bxd3+ ♖xd3 59.♖xd3+ ♔xd3 60.♔xg2 We are in a pawn endgame where Black is winning.

60...♔c4 61.♔f3 ♔xb5 62.♔e3 and Black has the only 62...♔c4! (62...♔a4? Now it is White who has good winning chances! 63.♔d4 ♔xa3 64.♔e5 ♔b3 65.♔xf5 a5 66.♔g6 a4 67.f5 a3 68.f6 a2 69.f7 a1=♔ 70.f8=♔ and White is pushing for a win.)]

57...♔f2 Now the g2 pawn is falling and White's position is totally lost.

58.b6 ♖xg2+ 59.♔h3 ♖g3+ 60.♔h4 Of course Black could have played Kg2 immediately.

60...♖g4+ 61.♔h3 ♖g3+ 62.♔h4 ♔g2 and White can't stop the mate on h3. A very lucky win by Solak, but we have to admit that he used his practical chances well and the winning decisions for White were anything but easy. Once again we can only see how complicated rook endgames are. **0-1**

Chess and the City. Not all that glitters is gold

WGM Elisabeth Paehtz

Best rating: 2493

German mentality is well known for its precision, punctuality and planning, or, as we call it in our language, "Ordnung". Today was a day where I really wonder what is left from that mentality. I remember some time ago I wrote an article about Italian clichés, about their interpretation of timing, or bureaucracy. Indeed I must confess that this article today is entirely based on frustration, but sometimes the best therapy for overcoming bad emotions is to write about them.

This morning I had a flight from Rome to Munich - so far so good. The day was already spoiled by an extremely early wake up, but that should not lower one's mood as this decision you basically make beforehand, when you choose that particular flight. I arrived at the airport to find the flight would be delayed by 15 minutes, which even sounded quite good by Italian standards! I was relieved that it wasn't worse than that. Those 15 minutes, however, quickly changed into 45, and eventually into 1,5 hours, which assured that my day was to be a "scheisse" one. Arriving in Munich and sprinting to my connecting flight to Hamburg was sure to be hopeless, as Germans never seem to fail when it comes to punctuality. Arriving at the Airberlin desk the kind lady booked me for a

connection 2 hours later, and even made sure that my luggage would also be transferred onto it. After an exhausting day I finally arrived in Hamburg, relieved and happy about my cheerful upcoming evening with friends... Baggage check, bags get claimed, but no sign of mine; people get fewer and fewer, as well as my hopes of spotting my mozzarella and Italian cheese equipped German luggage... Of course this may all sound very familiar to many of you, and if you are a frequent flyer with Air France you would barely bat an eyelid, but by German standards, their "Ordnung" and their pre-check on your schedule really makes you wonder what caused such an incident. Going to 'lost and found,' they assured me that my "dearest love" was left by itself in Munich, and promised me a late evening delivery to an address of my choice. Now it is 10 pm, no luggage, no hint of it, and finally it's time to call it a day...

1.g3 d5 2.♘f3 c5 3.♙g2 ♘c6 4.d3 e5 5.O-O and we have a King's Indian with a tempo up.

5...♙d6 6.e4 [6.c4 6...d4 7.e3 leads to Benoni structures.]

6...d4 7.♘bd2 ♘ge7

8.c4 I think this is a strange move. It seems more logical to immediately prepare a plan with f4 or play [8.♘c4 8...♙c7 9.a4 O-O 10.c3 ♙e6 An important move otherwise White will play cxd4-cxd4 and the strong b4! 11.cxd4 cxd4 12.♙d2 (12.b4? 12...♙xc4) 12...a6 13.b4 b5 and Black is better.; 8.♘h4 like in the game without losing time.; 8.♘e1 also with the idea to play f4.]

8...f6 In my opinion it was more accurate to play [8...h6 9.♘e1

(9.♘h4 and compared to the game now Black has the strong 9...g5!) 9...g5! with the typical plan of getting more space and preventing f2-f4. 10.♙f3 with the idea of exchanging bishops over g4, but now comes 10...♙h3! with Qd7 next and Black is on time to avoid Bg4.]

9.♘h4 ♙e6 [9...g5!? 10.♙h5+ ♔d7 11.♙h3+ (11.♘f5 11...♙c7∞) 11...♙c7 12.♙xc8 ♙xc8 13.♘g2 ♙e6 The king is safe on c7 and the position is unclear.]

10.f4

10...exf4 Black could not hurry with this move, for example [10...O-O 11.f5 ♙f7 12.♙f3! A logical idea to exchange the limited bishop. 12...♙h8 (12...♙e8 preventing Bh5, with a6-b5 next.) 13.♙h5 ♙g8 14.♘g6+! ♘xg6 (14...hxg6?? 15.♙xg6 and Black is not able to avoid mate.) 15.fxg6 h6 16.♙g4 and here I think White can try to create an attack on the kingside with Bf5-g4-h4 etc...; 10...♙d7 is more flexible because Black keeps the option of castling queenside. 11.f5 ♙f7 12.♙f3 O-O-O∞]

11.gxf4 ♙c7 [11...♙d7 12.e5! White sacrifices a pawn to activate his pieces. 12...fxe5 13.fxe5 ♘xe5 14.♘e4 O-O-O 15.♙f4↑with initiative.; 11...♙c7 In general it is an interesting idea to get the e5 square after f5, but unfortunately White has 12.♙h5+ with Qxc5 next.]

12.e5! fxe5

13.f5! This is a very famous idea, typical for King's Indian structures, where White gives the pawn in order to activate the bishop and create a blockade on e4.

13...♟f7 14.♞e4 [14.♞g4!? The idea of this move order is to stop 0-0-0 (because of f6) but Black can play 14...e4!? with exactly the same idea! Now Black gives the pawn to activate his pieces and gets an useful square on e5. 15.♞xe4 ♟xh2+ 16.♞h1 ♟e5 17.f6 but the black king is still in the center and White has the initiative.]

14...0-0-0 15.♞g4 ♟b8 16.♞xg7 Thanks to the strong knight on e4 White's advantage is clear, but Black can look for some counterplay because the queen on g7 is not placed safely.

16...♟h5 threatening Be2. [16...♞df8!?]

17.♞f2 [17.♞xd6 was suggested by the engine but exchanging the very strong knight on e4 for a limited bishop is unhuman. 17...♞xd6 18.f6 ♞c8 19.f7 with Bh6 next and it looks like the f-pawn is too strong.]

17...h6 Now the queen will not escape to h6, so it looks like Black is preparing a hunt for the white queen! [17...♞b4!?]

18.♟d2 [18.♞f6 to prevent Rg8 but now comes

18...e4! We already saw this idea. 19.♟xe4 (19.♞xh5 19...e3 20.♞f1 ♞dg8 and the white queen will be mated. 21.♞f7 ♞d8 22.♞f6 ♟e5—+) 19...♞hg8 20.♞xg8 ♞xg8 21.f6 ♞xg7+ 22.fxg7 it is unhuman but the g7 pawn is very dangerous.]

18...♞dg8 19.♞f6 ♞c8 threatening Be7 and the white pieces lost a bit of coordination.

20.♞g6 ♟xg6 21.fxg6

21...dxe7 It looks like even if black won the g6 pawn White should have compensation since he is controlling the light squares.

22.♔f7? looks active but gives Black important tempi. [22.♔f5 22...dxe7 23.♔e2 ♖8e7 24.♔h3 ♖xg6 25.♖xc5 ♕g5! Thanks to this strong move Black gets the active f4 square for the knight.; 22.♔f3! 22...♔xg6 23.♔h1 with compensation, maybe followed by a3-b4 next.]

22...♖d8 23.♔f5 ♕h4 24.♔f3 ♖e7 In three moves the black pieces have been nicely improved.

25.♔h3 ♖xg6 26.♖f6 I suppose that White played this move to avoid Bg5 ideas.

26...♖xf6 27.♔xf6

27...♔e7 [27...e4! From a practical point of view I like this

move. 28.dxe4 ♖c6 and thanks to the pawn sacrifice Black gets three things: a strong blockading square on e5, a strong passed pawn on d4 and the bishop on g2 is limited.; 27...♔g7 28.♔af1 ♖h4∞]

28.♔af1

28...♖f4?? What an amazing blunder! It is very strange that Black expected only Bxf4, but now White is winning after an easy tactical trick:

29.♔6xf4! exf4 30.♕xf4+ and the king cannot escape because of Qc8 mate! **1-0**

Editorial Preface

And once again Carlsen seems to be unstoppable. After 7 rounds he has scored an amazing 5.5/7 and is a full point ahead of Anand, who with 4.5/7 is also playing an excellent tournament. Third-fourth place is shared by Caruana and So. It has been a very interesting tournament so far with a lot of decisive games and great fighting chess. We are commenting on a few games from this event in our current issue.

In the World Team Championship China and Ukraine are leading with 8/10 (where teams get 2 points for a win and 1 point for a draw), followed by Israel and Cuba with 7/10. Now the question is: where is the Russian team? And the answer is, Russia started with 2 losses, followed by 2 draws and 1 win, which is clearly a very disappointing result.

Hungary, the team of your weekly commentator Csaba Balogh, is doing not that well either with 4/10, but Csaba has a very good 50% score.

In the Women's section Georgia is leading with 9/10, followed by Russia with 8/10 and China with 7/10. As usual, we wish you a lot of chess fun with our current issue!

Best wishes,

Arkadij Naiditsch & Csaba Balogh

Two best games of the past week

(1) So, Wesley (2788)
- Giri, Anish (2790) [A10]

Vugar Gashimov Mem 2015(1.5),
2015.04.17

GM Arkadij Naiditsch
Best rating: 2737

A fight between these two youngsters is always very interesting, especially since both players are very different. Giri, who has been on the top already for a couple of years now, is very safe player with HUGE preparation, often playing forced lines with some interesting idea in them. Wesley So is very different. His rise to the Top 10 just came recently after showing amazing results, but his latest tournament, the US Championships, went anything but successfully. Wesley is also usually well-prepared, but he plays much more creative and fighting chess than Giri, often trying to outplay his opponents in unclear position. In the current game, I guess both players were quickly out of the book because of a very strange opening, where So clearly outplayed his opponent and basically rushed through Black's defense lines...

1.c4 g6 Sometimes the move order can be tricky, especially if some player wants to avoid the Gruenfeld.

2.e4 I guess So wants to avoid it...

2...e5 Already on move 2 we are in a rather rare position.

3.d4 Clearly the most logical move! White is fighting for the center.

3...f6 4.dxe5 This is already a very rarely played

continuation. [In most of the top games White continued with 4.f3]

4...xe4 5.d3 b4+ A very logical reply, but maybe not the best. [I think Black could just continue with 5...c5 6.f3 d6 exchanging the e5 pawn. I think the position should be close to equal here.]

6.f1! A great move! Usually it is a bad idea not to castle, but right now White is gaining a few very important tempi to put Black under a lot of pressure.

6...c5 Again the most simple move, but I think it is only the second best. [6...d5!? could lead us to a very crazy position where White has a lot of options, such as 7.f3 or 7.Qc2 or 7.Qe2.]

7.f3 Simple and strong. White wants to continue with Bg5.

7...e6 [In case of 7...xd3 8.Qxd3 Black would try to develop the pieces normally with 8...c6 but White is clearly better after 9.g5 e7 10.xe7 Qxe7 11.c3 followed by Nd5 with a big advantage.]

8.a3 White is preparing to play Nc3.

8...e7 Another unclear decision. Maybe it was better for Black to play Bf8-Bg7 to at least cover the dark squares.

9.c3 The white knight is going to d5, where it will stand

perfectly.

9...d6 Of course the d6 move has to be played, but if we look at Black's first 9 moves, we can wonder if everything went as expected... And it clearly did not.

10.exd6 ♟xd6 11.b4 White is gaining space on the queenside and preparing to play Bb2.

11...♟f8 [Black would also be in a very dangerous position after 11...O-O 12.♟b2 ♞d7 13.h4! Now it is actually very useful for White that the rook is still on h1. 13...♞f6 14.h5 with a very dangerous attack.]

12.♞e2 A creative move. [An easier plan was 12.♟b2 12...♟g7 13.♞c2 O-O 14.♞d1 and White's advantage is clear to see.]

12...♟g7

13.♟g5!? A very interesting approach, especially since Black already made 5 moves with his bishop!

13...♟f6?! and this clearly put Black in a very difficult position. [I think Giri should have continued with 13...f6 and although it looks very ugly, it is still better than 13...Bf6?!. 14.♟d2 O-O 15.h4 This might be what Black was afraid of, but actually he is not doing that badly here. 15...♞c6! with the idea of playing Nd4 or Ne5 next keeps Black alive. The position is better for White, but things are not that clear at all.]

14.♟xf6 ♞xf6 15.♞d2 Now we can see that Black is very undeveloped, as well there are big problems arising on the dark squares.

15...O-O 16.♞e1 White is preparing to play Ne4 next or h4.

16...♞d8 Black wants to play Nf4.

17.♞d1!? Another very interesting move by White! [17.g3 followed by h4 or just Kg2 with a clear advantage.]

17...a5 Black is looking for some counterplay.

18.h4! Exactly the right choice! Black's play on the queenside is very slow, the direct attack on the black king looks really scary and we finally see the rook on h1 coming into action!

18...axb4 19.axb4 ♞d7 Black tries to bring some pieces over to the kingside.

20.h5 ♞f6 21.c5 White is playing for mate and doesn't care about winning some material. [Another option was 21.♞c1 21...♞d6 (21...♞e7 22.♞d5! ♞xd5 23.cxd5 ♞g7 24.hxg6 fxe6 25.♞e1 and Black is just lost because of the open h-file.) 22.hxg6 fxe6 23.♟xg6 ♞f4 24.♟c2 with a clear pawn up in the endgame.]

21...b6 [Maybe Black should have taken a risk and played 21...♞xh5 Now White has a lot of choices. 22.♞xh5 (To a better but yet somewhat unclear position would lead 22.♞h6

22...♖a1! A strong move! 23.♖xa1 ♕xd3+ 24.♗e2 b6! and of course White is clearly better, but Black is fighting.) 22...gxh5 23.♕h6 Now things are forced. 23...f5 24.♗xf5 ♕xd1+ 25.♗xd1 ♖xf5 26.♗e3 ♖a1+ 27.♗e1 and White is also much better here, but having 2 rooks gives Black clear chances in a practical fight.]

22.hxg6 fxg6 23.♕e3 Now Black needs to take care about a lot of different threats!

23...♕e7 The only move.

24.♗c4 A very logical move. The pin on the e-file is forever!

24...bxc5

25.b5! A strong move! White is threatening to play Re1 and it is very unclear how to defend against it.

25...♖b8? Under big pressure Giri makes a mistake. [Black should have tried 25...c6!? and at least the fight is not over. 26.bxc6 ♗a6 getting rid of the nasty bishop on c4. 27.♕e2! but the white queen takes its place! 27...♗xc4 28.♕xc4 and of course White continues being much better, but Black could fight on with 28...♖ac8]

26.♖e1 ♖b6 and here comes the move that Giri probably blundered:

27.♗a4! The white knight is getting to c5 with tempo!

27...♖d6 28.♗xc5 Now there is no way to hold the pressure on e6 any longer.

28...♗g4 Black launches the last attack as there are no chances to hold the piece on e6.

29.♕e4 A very safe and solid move.

29...♗xf2 30.♕xf2

30...♖d2+ One check is all that Black has.

31.♕g3 ♖xf3+ White is a rook up and the knight on e6 is still hanging! A very clean win by So, playing very creatively and not letting the black pieces entering the game.

32.gxf3 1-0

(2) Balogh, Csaba (2655)
- Ortiz Suarez, Isan (2625) [B51]10th World Teams 2015(1.1),
2015.04.19GM Csaba Balogh
Best rating: 2672

I managed to win a nice game. I must be grateful to my friend and teammate GM Viktor Erdos, who just showed me this line before the game.

1.e4 c5 2.♘f3 d6 3.♙b5+ ♘d7 I played several games on 4.0-0 and 4.c3, but thanks to Viktor I went for the old main line...

4.d4 cxd4 5.♙xd4 a6 6.♙xd7+ ♙xd7 7.c4 The general idea is to get a slightly more pleasant position due to the space advantage. Black has many different setups here and my opponent chose one of the main ones.

7...e5 [An alternative is 7...♘f6 8.♙g5 e6 9.♘c3 ♙e7 which happened in the first Carlsen-Anand World Championship match in 2013.]

8.♙d3

8...h6 A good prophylactical move if Black just wants to

finish the development with Nf6, Be7 and 0-0. The point is to save the f6 knight to cover the hole on d5, which is the only big minus in Black's position. On the direct Nf6, White could play Bg5 followed by Nc3, taking on f6 at some point and occupying the d5 square with the knight. [8...b5 is the main line, which leads to very sharp positions. Probably my opponent was surprised about my 4. d4 decision and he wanted to avoid my preparation in the complications.]

9.♘c3 ♘f6 10.0-0 ♙e7 11.♙d1 0-0 [11...♙c8 is more circumspect, although I like White's position after 12.b3 0-0 13.a4 followed by Ba3, with pressure on the backward d6 pawn.]

12.c5! A very nice tactical idea, which was suggested by Viktor! From a positional point of view, it is not advisable to trade the c-pawn for e5, as first of all it helps Black to get rid of his weakness on d6 and it also opens the position for the two bishops. However White has something different in mind!

12...dxc5

13.♙xh6! This is the point! White wants to open the g-file before taking on e5 in order to give a discovered check on g3. [If White starts with 13.♘xe5 13...♙e6 14.♙g3 Black could play 14...♙b8! and on 15.Bf4 or 15.♙xh6? ♘h5! works!]

13...♙c7 [Black cannot accept the sacrifice with 13...gxh6

because of 14. ♖xe5 ♗g4 (14... ♗e6 15. ♖g3+- wins the queen now!) 15. ♖g3 ♖b8 16. ♖d5+- (16. h3+- also wins.)]

14. ♗g5! And the positional idea of the entire plan of c5 connected with Bxh6 becomes clear now. White has eliminated the h6 pawn, therefore he can get rid of the f6 knight, which dramatically weakens the d5 square. White is ready to occupy it right away.

14... ♗e6 15. ♗xf6 ♗xf6 16. ♖d5 ♗xd5 17. exd5! White changes the character of the game. The single d-file with the d5 hole would not be enough to seize the initiative, but the well-supported d5 passed pawn will do the job! The difference between the two minor pieces will also become a real factor, as the bishop passively stands behind his own pawns, while the knight might occupy the e4 or c4 squares. We will see in many lines that the missing of the h7 pawn makes the black king very vulnerable!

17... ♖ad8 [17...e4 would be the positional move to bring the bishop to life, but it does not work tactically because of 18. ♖xe4 ♗xb2 19. ♖g5! g6 20. ♖h4+- and Black is in trouble.]

18. ♖d2! Transferring the knight to its ideal outpost. Black cannot create a blockade now on the d6 square with his heavy pieces. [18.d6 It is premature to aim for some direct benefits, because Black has the intermediate move 18...e4!

and suddenly he is alive.]

18... ♗e7 Black dreams about the position where he can play Bd6 and f5-e4, but he lacks one tempo to execute this plan. [18...e4 has the same refutation as before: 19. ♖xe4 ♗xb2 20. ♖g5 g6 21. ♖h3+- and f5 prevents the mate, but allows Ne6.]

19. ♖e4! Supporting the d6 break! The knight is also ready to jump to g5 if the bishop goes to d6.

19... c4 The only move! [19...f5 loses to 20.d6! fxe4 21. ♖c4+- leaving the pin with check and the queen falls.; 19... ♗d6 loses nicely to 20. ♖f6+! gxf6 21. ♖g3+ ♖h7 22. ♖h4+ ♖g7 23. ♖g4+ ♖h7 24. ♖d3+- and Rh3 mate next.; I was hoping that my opponent lays a trap with 19... ♖d7 but it loses to 20.d6! ♗xd6

21. ♖f6+! leads to forced mate after (21. ♖xd6? 21... ♖fd8 would have been Black's idea.) 21... gxf6 22. ♖g3+ ♖h7 23. ♖h4+ ♖g7 24. ♖g4+ ♖h7 25. ♖d3+-]

20. ♖h3! The only way to maintain the advantage! The key is again the h7 square, connected with the sacrifice of d6 Bxd6 Ng5. It looks like quite a simple threat, but actually it is very difficult to deal with it. [The alternative was 20. ♖ac1 but I was afraid of the endgame after 20... cxd3 21. ♖xc7 f5! 22. ♖xe7 fxe4 23. ♖xe5 ♖fe8 24. ♖xe8+ ♖xe8 and despite being a pawn

down, Black should be able to hold.]

20...♖d7 [20...f5 was again strongly met by 21.d6! ♗xd6 22.♗g5 g6 23.♗e6+- winning an exchange.; The only move was 20...♗d7 but it was e that my opponent did not want to suffer in a terrible endgame after 21.d6! ♗xh3 22.gxh3 ♗h4 23.♖ac1 b5 24.♖d5± with a big advantage. The d6 passed pawn is very strong. Nc5 is a threat and the queenside pawns are vulnerable, or White can open a new front with b3 and penetrate with the rook on the c-file.]

21.d6! Being familiar with all the motifs, it was already very easy to calculate the winning line.

21...♖fd8 [21...♗xd6 loses to 22.♗g5!+-; 21...♗d8 is refuted by 22.♖d5! ♗xd6 Now the queen controls the g5 square, but the pin on the d-file is fatal. 23.♖ad1+-]

22.♖d5! White already had a pleasant choice, but I managed to find the most precise way to win. White already threatens to take the queen or the bishop, because there is no back rank problems anymore. [The alternative was 22.♗g4 protecting the d1 rook and threatening to take the queen. The only move is 22...♖xd6 (22...♗xd6 23.♗f6+-) 23.♗xd6 ♗xd6 and this position must be winning, but here Black at least has a pawn for the exchange.]

22...♖xd6 [The point is that after 22...♗xd6 23.♖ad1! Black cannot escape from the pin. Ng5 is coming next, against which Black has no adequate defense since f6 allows Qe6. 23...♗c6 24.♗g5+-; 22...♗c6 23.dxe7 ♗xd5 24.exd8=♗+- wins a piece.]

23.♗xd6 ♖xd6 24.♖xe5 This is the difference to 22.Qg4. Black does not even have a pawn for the exchange. [24.♖ad1 was also winning.]

24...♖h6 [24...♖d3 25.♖e3+-]

25.♖h5! [It was important to not blunder 25.♗e3 25...f6! and suddenly Black is fine... 26.♖xe7 ♗xh2+ 27.♗f1 ♗h1+ 28.♗e2 ♗xa1=]

25...♖xh5 26.♗xh5 g6 27.♗e2 ♗f6 I thought that this endgame is dead won, but it still requires some technique. The black bishop is very active on f6, pushing the b2 pawn and he wants to create a passed pawn with b5-b4-c3. White cannot create any direct threats, therefore he must convert the advantage slowly.

28.♖d1 ♗g7 29.g3 Opening the back rank.

29...♗c6 The black pieces are standing perfectly, they control all the invading squares on the d- and e- files.

30.h4! with the idea to expose the king with h5, or send the bishop away with g4-g5.

30...b5 31.♖d2 [I think it is very important to not include the 31.a3 31...a5 pair of moves, because after b4-axb4-axb4 the queenside gets eliminated, which might have a relevance in the endgames.; 31.h5 was possible. 31...g5 (31...gxh5 32.♗xh5 ♗xb2 33.♖d8 will be decisive.) 32.♗g4 followed by Rd7 also looks very dangerous.]

31...b4 32.♖c2 I tried to the happenings on the queenside to start my plans on the kingside.

32...c3 33.bxc3 bxc3 34.♗d3 The c-pawn is blockaded, but White needs to activate his pieces to win the game. In the next few moves, White improves his pieces.

34...a5 35.♖e2! ♗c5 36.♗e4 Black has reached the maximum, he cannot improve his position anymore, he can only sit and wait and hope that the presence of the c3 pawn will prevent White from making progress.

36...♔g8 37.♔g2 ♕g7

38.g4! White has also done all the necessary preparations and now it is time to decide the game by advancing the kingside pawns, where White is materially ahead.

38...♕g8 [38...♕xh4 loses to 39.♖e5+! ♖xe5 40.♗xe5+- and the rook stops the pawn from c5. Here we can see the importance of keeping the two a-pawns on the board. After the white king goes to d3, he will collect the a5 with the rook.]

39.g5 ♕g7 40.f4! Bringing all the pawns to execute the final break with h5 or f5. The white king is well protected by the heavy pieces, so there is no need to worry about it getting exposed...

40...♗d4

41.h5! The decisive blow! White gives back some material,

but he exposes the king which runs into a deadly attack against the heavy pieces.

41...gxf7 42.g6 ♔g7 43.gxf7 ♕f6 [43...♔xf7 44.♖e8+ ♔g7 45.♗e7+-]

44.♖e8! [Black resigned in view of 44.♖e8 44...♗d5+ (44...♗f8 45.♔h2!+- is the same, Rg2 wins next.) 45.♔h2 ♖xf7 46.♗g2+- wins.] **1-0**

The K-Files. Blumenfeld Gambit - part 2

GM Alexander Khalifman
FIDE World Chess Champion (1999)
Best rating: 2702

(3) Blumenfeld Gambit - part 2 [E10]

1.d4 ♘f6 2.c4 e6 3.♗f3 c5 4.d5 b5!? 5.dxe6 fxe6 6.cxb5 d5

7.g3 A fianchetto is very solid against various gambits, first of all because it secures the king's castle position. Here it's solid too. But at the same time it does little to stop Black's pawn center. And what might be even more important is that the b5 pawn is now rather unprotected which means that after the standard a7-a6 White in most cases will have to take on a6 immediately thus opening queenside lines for the opponent. These reasons promise Black good counterplay if he plays precisely.

7...a6! Here this breakthrough is quite necessary so the best way is to start with it. [7...♙b7?! Weakening the e6 pawn at this moment looks extremely dubious. And in fact it is. 8.♙h3! 8...♚b6 (8...a6? Akshat - Huerga, Badalona 2014 9.♘g5 e5 10.e4!+- White's key idea in different Blumenfeld versions (to meet e6-e5 with e4!) works perfectly here.) 9.O-O ♙e7 10.♘g5 ♙c8 A sad confession... 11.♘c3± (11.♚d3±) ; 7...♙d6 Postponing a7-a6 has certain drawbacks as we will see. If Black tries to play without it at all it's even worse. 8.♙g2 (8.♙h3 is quite possible but it's not the way to exploit Black's inaccurate move order. 8...a6!? might also be the most accurate move here. (8...O-O 9.O-O a6 (Banikas - Bayram, Istanbul 2003) allows the interesting complications 10.♘c3!? (10.bxa6 - 7...a6) 10...d4 (10...♚e8 11.e4±) 11.♘g5 dxc3 12.♙xe6+ ♙xe6 13.♘xe6 ♚b6 14.♘xf8 ♙xf8 15.♚b3+ ♙h8 16.bxc3 axb5∞and consequences are far from clear.) 9.♘c3?! (9.bxa6 - 7...a6) 9...d4=+) 8...O-O (8...a6 9.♘c3! is the big difference between this move order and 7...a6! (

a) 9.bxa6 - 7...a6;

b) 9.b6 The idea is similar to a Benko Gambit but here we have a different structure in the center so it doesn't promise anything. Black just wins back the pawn with good play. 9...♘c6 10.O-O Villavicencio - Krivoshey, Spain 2007 10...♚xb6 11.♘c3 preparing e2-e4. 11...♚b8 Necessary prophylaxis. (After 11...O-O 12.e4! White's idea works fine.) 12.e4 d4 13.♚e1! exploiting the bishop's vulnerable position on d6. 13...e5 14.♘d5 ♚d8↔)

9...axb5 (9...d4? is now simply bad because of 10.♘xd4 cxd4 11.♚xd4+-) 10.♘xb5 ♙e7 (10...♚a5+ 11.♘c3 O-O 12.O-O± doesn't promise enough compensation either. Once again: despite various similarities it's not the Benko Gambit and the black queen is often misplaced on a5. (Nedilko -

Wojciechowski, Warsaw 2009)) 11.a4 O-O 12.O-O ♖c6 13.♗f4+= (13.b3!?+= Pacher - Hrabusa, Slovakia 2010)) 9.O-O ♗b7 (

a) 9...a6 10.♖c3 is quite similar to 8...a6 9.Nc3!;

b) 9...♗e7 10.♖bd2N might be even stronger. Black can't do anything against e2-e4 (10.♗g5 gives White a solid advantage after 10...♗b7 (10...h6 11.♗xf6 ♗xf6 12.♖c3 ♗b7 Kukula - Abergel, Wroclaw rapid 2014 13.♖d2 13...♖d7 14.e4 d4 15.e5 ♗xe5 16.♗xb7 dxc3 17.bxc3±) 11.e4! dxe4 12.♖fd2 e3 13.♗xb7 Mueller - Pakhomov, Zaragoza 2013 13...♗xb7 14.♗xf6 ♗xf6 15.fxe3 ♗e5 16.♗xf6 ♗xf6 17.♖c3±) 10...e5 (10...♗b7 - 9...Bb7) 11.♖g5 h6 12.♖de4! dxe4 13.♖xe4 ♖xe4 14.♗xe4+-)

10.♖bd2 Once again White prepares e2-e4 and Black can't do anything against it. First of all because of the annoying b5 pawn. The following lines clearly show why a7-a6 is necessary against the fianchetto setup. 10...♖bd7 (

a) 10...h6?! 11.e4! ♖bd7 (11...dxe4 Burmakin - Salvador, Rome 2007 12.♖h4± and White's advantage is obvious.) 12.♖h4 ♗e8 13.exd5 exd5 14.♖c4! This is one more typical tactical trick which is often used in the Catalan and Queen's Indian. In this structure it brings even greater effect. 14...♗c7 (14...♗f8 15.♗d2) 15.♖f5 and Black's position is extremely unpleasant.;

b) 10...♗e7 11.e4± Hummel - Westerkamp, Groningen 2003) 11.e4! ♗b6 Roski - Gustavsson, Germany 1993 (11...dxe4 12.♖g5 ♗e7 13.♖dxe4±) 12.a4 a6 (12...♗c7 13.exd5 exd5 14.b4! cxb4 15.♗b2 a5 (15...a6 16.a5 ♗xb5 17.♖b3± White has given back the sacrificed pawn and sacrificed one more but Black is in deep trouble because his pieces are terribly misplaced. 17...♗c6 18.♖fd4 ♗d6 19.♖f5 ♗e6 20.♖bd4 ♗f7 21.♗c1 ♗e5 22.f4 ♗xd4+ 23.♗xd4+-) 16.♗c1±) 13.♗h3! (13.♗e1 13...♖g4) 13...♗fe8 14.♗e1+=; 7...♗a5+?! An interesting but

insufficient try. Black doesn't succeed in winning back the pawn and his queen on a5 is far from well-placed. 8.♖c3! The alternatives (which for some strange reasons are quite popular) just give back the pawn and don't create problems. 8...d4 (8...♗b7 9.♗d2 with the obvious threat Nxd5. 9...♗b6 (9...d4 10.♖d5 ♗d8 11.♖xf6+ gxf6 (11...♗xf6 12.♗g2 ♖d7 13.O-O ♗d6 14.b4+- Another typical way to destroy Black's center.) 12.e3± (12.♗h3±)) 10.♗h3! pointing out once again that Black's light-squared bishop should better remain on c8 until a certain moment in this line. Otherwise e6 becomes pretty sensitive. 10...d4 (10...a6? 11.♖a4 ♗xb5 12.O-O± with a huge advantage.) 11.♖a4 ♗xb5 12.♗xe6 ♗a6 13.♗h3 ♗d6 14.O-O O-O 15.♗c1 ♖e4 16.b3±) 9.♗a4! ♗b6 (9...♗xa4 10.♖xa4 ♗b7 (10...♗d7 11.e3±) 11.♗h3 11...e5 12.O-O ♗d6 (12...e4 13.♖g5+-) 13.♖g5 ♖bd7 14.f4! e4 15.♖e6 ♖f7 16.b4!± and the seemingly strong black pawn center falls into ruins at once.) 10.♖b1! ♗b7!? (10...♗d7 11.♖a3 a6 12.♖e5 (12.♗h3!? deserves attention as well.) 12...♗b7 13.♖xd7 ♖bxd7 (The greedy 13...♗xh1 is just bad because of 14.♖xb8 ♗xb8 15.bxa6+ ♖f7 16.♖c4+- ♖d5 17.♖e5+ Lombardy - Formanek, New York 1986) 14.f3 ♗e7 15.♗h3 ♖f7 16.O-O ♗hb8 17.bxa6 ♗xa6 18.♗c2±) 11.♖a3 ♖bd7 12.♗h3! The same idea once again! (12.♖c4 12...♗d8 13.♗g5 ♖b6 14.♖xb6 axb6 15.♗c2 ♗e7 16.♗xf6 ♗xf6 and Black has enough compensation. (Potpara - Antipov, Athens 2012).) 12...a6 It's necessary to do something against the Nc4 threat. 13.O-O ♗e7 14.♖d2! But still... 14...♗d5 15.bxa6 ♗xa6 16.♗c2+= Black's center is blocked. He doesn't have enough for a pawn.]

8.bxa6 [8.♖c3?! 8...axb5 9.♖xb5?? ♗a5+ 10.♖c3 d4+-]

8...♖c6!? In my opinion this is the most flexible move order. The knight belongs here anyway and the best position for the Bf8 is not clear yet. [8...♗xa6?!]

as we have seen already is inaccurate due to 9.♗h3! and Black's development plans are seriously damaged because of the problems with the e6 pawn. 9...♗b6 10.♗b3 ♗xb3 11.axb3 ♗d6 12.♗xe6 ♗d8 13.O-O ♗e8 14.♗f5 ♗xe2 15.♖c3 ♗e7 16.♗d1+- Gupta - Babujian, Yerevan 2006; 8...♗d6 9.♗h3 (9.♗g2 9...O-O 10.O-O ♖c6 - 8...Nc6) 9...O-O 10.O-O ♖c6 11.♖c3 ♗xa6 leads to the 8...Nc6 line but in this situation Black's bishop would be slightly better placed on e7.]

9.♗g2 [9.♗h3

9...♗xa6!? 10.O-O ♗e7! This is the best square for the bishop in this line. (

a) 10...♗d6 This square seems to be the most active but it's kind of an optical illusion as the bishop has little prospects on b8-h2 diagonal and at the same time it's rather vulnerable here (mostly due to Nc3-b5 but also e2-e4 might be the case). 11.♖c3 O-O Zaja - Cebalo, Zagreb 2007 12.a4 (12.b3 12...♗e8 13.♗b2 ♗h5 14.♗g2 d4 15.♖b5 ♗e7 16.♖d2 ♖e5) 12...♗e8 13.♖b5 ♗b8 14.♗e3+= and Black has certain problems as the typical operation 14...♗h5 15.♗g2 ♖g4 16.♗xc5 ♗xf3 faces the cold-blooded response 17.h3!+-;

b) The fresh example from the grandmaster practice was the over-ambitious 10...e5?! 11.♗xc8 ♗xc8 12.♗g5 e4 Korobov - Ponkratov, Moscow 2015 and now 13.♖h4 ♗e7 14.♖c3 d4 15.♗xf6 gxf6 16.♖d5± would have been the most convincing way to underline Black's structural drawbacks.)

11.♖c3 O-O Todorovich - Djokic, Vrnjacka Banja 2012 12.b3 ♗e8 13.♗b2 ♗h5 and Black's kingside initiative becomes quite dangerous in combination with the central pawns being ready to advance. 14.♗g2 d4 15.♖a4 e5 16.h4 h6↑]

9...♗d6 [9...♗e7!? It might happen that the setup with the bishop on e7 and rook on a6 is quite promising also against the traditional fianchetto. However, there is not much practical material for serious conclusions. 10.O-O O-O 11.♖c3 ♗xa6 12.♗g5 (12.♗f4 Toth - Rogers, Reggio Emilia 1984 12...♖h5 13.e3 c4!?)) 12...h6 13.♗xf6 ♗xf6 Anastasian - Hertneck, Baden-Baden 1996]

10.O-O O-O 11.♖c3 The alternatives give Black good chances. [11.b3 The double-fianchetto seems to be quite slow against Black's growing initiative. 11...♗xa6 12.♗b2 ♗e8 This is a less risky and more traditional way to increase the pressure. White's task is not easy here either. (12...e5!? (Stefanova - Muzychuk, A Khanty Mansiysk blitz 2014) and Black's central pawns are ready to force White's pieces to retreat to the last

ranks. The critical line is 13. ♖g5! ♗d4 14. ♖e1 (14.e3 14... ♕e2! 15. ♖c1 ♕xf1 16. ♖xf1 ♗g4 17. ♕xd5+ ♖h8 18. ♗f7+ ♖xf7 19. ♕xf7 ♗f3+ 20. ♖g2 ♖d7±) 14...h6 15. ♕xd4 cxd4 16. ♗e6 ♖b6 17. ♗xf8 ♖xf8∞ and even the computer is not very happy about White's chances despite his huge material advantage. The black pieces are well-coordinated and the central pawns look threatening.) 13. ♖e1 ♖d8 14. ♗bd2 (14. ♖c1?! 14...e5! 15. ♕a3 e4 16. ♗g5 ♗d4 17. ♗c3 ♖h5 18.f4 h6 19. ♗h3 ♕xe2 20. ♖d2 ♕f3 21. ♖f1 ♗g4+ Essing - Odendahl, Germany 2008) 14...e5 The most straightforward way to obtain enough counterchances. (

a) 14... ♕c7!? An interesting maneuver. The black bishop goes to b6 and f2 becomes a real target. 15. ♖c2 ♕b6∞;

b) 14... ♗g4?! was tried successfully in the spectacular game Georgiev, Kir - Nisipeanu, Fuegen 2006. However, this ambitious idea didn't pass the analytical control. 15.h3! (15.e4?! 15...d4! 16.h3 ♗xf2! 17. ♖xf2 ♖g6→) 15... ♗xf2 16. ♖xf2 ♗d4 (16... ♖g6 17.g4! h5 18.gxh5 ♖g3+ 19. ♖g1 ♖xf3 20. ♗xf3 ♖f8 21. ♖f1+→) 17. ♗f1! is the most reliable move. (Jianu - Cioara, Romania 2007) (In the above-mentioned game White could still pretend for an advantage after 17.g4 17...h5 18.g5 ♖f7 19. ♖g1!) 17... ♖g6 (17...e5 18. ♖g1 ♖g6 19. ♖c1 ♖h8 20. ♖d2 ♗xf3+ 21.exf3 ♕xf1 22. ♖xf1 ♖xg3 23.f4+→) 18. ♕xd4 cxd4 19. ♖g1! (19. ♖xd4 19...e5 20. ♖g4 ♕c5+ 21.e3 ♖xg4 22.hxg4 e4∞) 19...e5 20. ♖d2± and the extra piece must play its role finally.)

15.e4 It's absolutely necessary to stop e5-e4 at any cost. 15... ♗b4 (15...d4!? 16. ♕f1! ♕xf1 17. ♖xf1 ♖h5 18. ♗h4 ♖xd1 19. ♖fxd1 ♖a8∞) 16.exd5 ♗d3 This position is extremely complicated. The point is that Black is not hurrying to win the exchange in many cases. 17. ♖c2 (17. ♖b1!? 17... ♗xe1 18. ♖xe1 ♗xd5±) 17... ♖h5! (17... ♗xe1? 18. ♖xe1± Malakhatchko

- Cebalo, Basel 2007) 18. ♗h4 ♗g4 (18... ♕c7 19. ♗c4 ♗xe1 20. ♖xe1 ♗xd5 21. ♗xe5 ♗e3 22.fxe3 ♕xe5 23. ♕xe5 ♖xe5 24. ♕e4∞) 19.f3 ♗gf2 20. ♗c4 ♕xc4 21.bxc4 e4 22.f4 ♖xf4 23. ♖xe4 ♗xe4 24. ♖xd3 ♖xh4 25.gxh4 ♖xh4 26. ♖xe4 ♕xh2+ 27. ♖h1 (27. ♖f1?? 27... ♖f8+→) 27... ♕f4+=; 11. ♕g5 11... ♕xa6 12. ♗c3 - 11.Nc3; 11. ♗bd2 In this line the white knight is badly misplaced because of 11... ♕xa6 12. ♖e1 c4! ∞ and Black's pressure becomes really annoying. The standard 13.e4? runs into (13.b3? A sign of panic. 13...c3 14. ♗b1 ♗e4 15. ♕e3 ♖a5 16. ♖f1 ♕c5 17. ♗e1 ♕xe3 18.fxe3 ♖xf1+ 19. ♖xf1 ♖c5 20. ♗c2 ♖f8+ 21. ♖g1 ♖f2+ 22. ♖h1 ♕xe2 23. ♖e1 ♕d3→ Cernousek - Navara, Prague 2009; 13. ♗b1 might be the relatively best, which tells enough about the value of 11.Nbd2 plan... 13... ♕c5! 13... ♕c5 14.exd5?! Odnorozhenko - Oleksienko, Alushta 2011 (14. ♕h3 14... ♖h8!?±) 14... ♕xf2+! 15. ♖h1 (15. ♖xf2 15... ♗g4+→) 15...exd5→]

11... ♕xa6 12. ♖e1! The only way to create some problems. [12. ♕g5 12...h6 13. ♕xf6 ♖xf6 14. ♗xd5!? doesn't promise any advantage but it might be the right moment to forget about it. (14. ♖c1 14... ♖h8 15.b3 Lputian - Babujian, Yerevan 2008 15...g5!?∞ and Black's pressure is very unpleasant.) 14...exd5 15. ♖xd5+ ♖h8 16. ♖xc6 ♕xe2 17. ♗h4 ♕xf1 18. ♖xf1 Cruz - Santos, Spain 2011 18...g5 19. ♗f5 ♖xf5 20. ♖xd6 ♖f6 21. ♖e7 ♖f7= and it's difficult to avoid the logical drawish outcome for both sides.]

12...♖b8!? **N** This is the new and critical move. Black simply improves his rook's position and at the same time he removes it from the dangerous long diagonal. All moves tested before were not enough because of various tactical tricks. [12...♗e5?! 13.♗g5! ♜e7 14.f4 ♗c4 15.e4+- Perez - Coll, Barcelona 2011; 12...♗g4? 13.♗xd5+- ♜xg3 14.hxg3 exd5 15.♜g5 ♜d7 16.♖c1 h6 17.♜f4 c4 18.♗d4 ♗e7 19.♜h3 g5 20.e3 ♜c8 21.f3 gxf4 22.♜xg4+- Rajkovic - Nestorovic, Belgrade .2007; 12...d4 13.♗g5! ♜d7 14.♗ce4 ♗xe4 15.♗xe4 ♜e7 16.♜g5±; 12...♜c7 13.♜h3 d4!? In true gambit style but... (13...♖ae8 14.♗g5 ♗d8 (14...♜c8 15.e4! promises more than the obvious exchange. (15.♗b5 15...♜b8 16.♗xd6 ♜xd6 17.e4 e5!∞) 15...♗d4 16.♜e3±) 15.e4! h6 16.♗f3 ♗xe4 17.♗xe4 dxe4 18.♗d2+=) 14.♜xe6+ ♗h8 15.♗d5 ♗xd5 16.♜xd5 ♖ae8 Babula - Krejci, Pardubice 2011 17.♗g5!±2 pawns are most probably too much.]

13. ♕g5!? [13. ♖g5 13... ♔e7! (13... ♔d7 is asking for trouble as White's bishop comes to the same diagonal. 14. ♕h3 ♔fe8 15. ♖xd5! 15... ♖xd5 16. ♔xd5 exd5 17. ♕xd7 ♖d4 18. ♕xe8 ♔xe8 19. e3 ♖c2 20. ♕d2+= and the bishop's pair is enough only for some drawing chances here.) 14. e4 (14. ♖xd5 14... exd5 15. ♕xd5+ ♖xd5 16. ♔xd5+ ♔h8 17. ♔xc6 ♕b7∞ is fairly dangerous for White as the black light-squared bishop dominates the important diagonal. Despite the 2 extra pawns

it's White who has to be extremely careful as the following computer line shows. 18. ♖a4 h6 19. ♖h4 ♜e8! 20. ♜h3 ♜e7 21. ♜c4 ♜f6 22. ♜e3 ♜xb2 23. ♜f4 ♜xa1 24. ♜xa1 ♜d8 White played many strong (and far from obvious) moves to reach this position where he is still not perfectly safe although a draw is the most probable result here.) 14...d4 15. ♜d5! (15.e5 is not dangerous here. 15... ♜xe5 16. ♜ce4 ♜xe4 17. ♜xe4 h6⇒) 15... ♜e8 (15...exd5 16.exd5 ♜e5 17.f4+=) 16.b4!? is the most dangerous attempt. 16...d3 17.e5! ♜xe5 (17... ♜xe5 18.bxc5±) 18. ♜c7 ♜xc7! 19. ♜xe6 ♜d4 20. ♜xe8 ♜fxe8∞These weird complications led to an extremely chaotic position which is difficult to play for both sides. Its objective assessment must be about balanced.; The forced sequence 13.e4 13...d4 14.e5 dxc3 15.exf6 cxb2 16. ♜xb2 ♜xb2 17. ♜xe6 ♜xf6 18. ♜xf6 ♜xf6 19. ♜d5+ ♜h8 20. ♜xc6 ♜f8∞gives Black no reasons to worry.]

13...♖e5 Removing the knight from a shaky position, preparing h7-h6 and defending from e2-e4 at once. Not bad for one move! [The immediate 13...h6 is dubious because of 14.♙xf6 ♖xf6 (14...♖xf6 15.e4! (15.♘xd5 15...exd5 16.♖xd5+ ♔h8 17.♖xc6 ♙xg3 18.♖xc5 ♙d6∞) 15...d4 16.e5±) 15.♘xd5! exd5 16.♖xd5+ ♔h8 17.♖xc6± and with the bishop on g2 White's king is well-protected. Black's compensation is not enough.; 13...♖xb2 14.e4!+=]

14. ♖xe5 ♜xe5 With a very complicated position where the strong center and active pieces give Black good compensation for the pawn.

David vs. Goliath

Peter Zhdanov

Chief Editor of Pogonina.com

In this entertaining column we are reviewing the most unexpected results that occurred last week. Players usually face opponents of a similar level. Considerably less frequent are situations when a significantly lower-rated player succeeds in beating a much stronger adversary.

The previous week brought us just 5 upsets. This is an all-time anti-record.

The number of moves ranges from 27 in IM Plenkovic (2410) - Vukalovic (1954), 0-1 to 59 in Altschuler (2089) - IM Eggleston (2424), 1-0. In fact, 20-year old Jason Altschuler (2089) defeated two experienced IMs in one tournament; the second Goliath was IM Kopylov M (2440). This is quite an achievement for a player of Jason's rating.

Top-5:

Ladisis (1982) - Jovanic (2474), 1-0, [492](#) points
 Plenkovic (2410) - Vukalovic (1954), 0-1, [456](#) points
 Kopylov (2440) - Altschuler (2089), 0-1, [351](#) points
 Altschuler (2089) - Eggleston (2424), 1-0, [335](#) points
 Manjunath (1689) - Martinez Llamas (1998), 1-0, [309](#) points

Average gap: 389; White won 3 games, Black won 2 games.

You can view all the games in the accompanying pgn file.

To compensate for the low number of upsets, I decided to annotate a rollercoaster duel between IM Plenkovic (2410) and Vukalovic (1954). Black quickly found himself in a hopeless position, but seized the opportunity to exploit his opponent's carelessness and to turn the tables.

Plenkovic, Z.(2410) - Vukalovic, Z.(1954) [C44]

1.e4 e5 2.♘f3 ♘c6 3.d3 I personally believe that people who play such openings deserve to be punished :)

3...♘f6 4.♙e2 d5 5.♘bd2 dxe4 prematurely releasing the tension in the centre [5...♙c5 6.O-O O-O=]

6.dxe4 ♙c5 7.O-O O-O 8.c3

8...a6?! [8...a5= is the main move. The idea is obvious - to grab some space on the queenside and to prevent b4.]

9.b4+= ♙a7 10.♙c2 [10.a4N deserves attention here. For example 10...♙g4 11.h3 ♙h5 (11...♙xf3 12.♙xf3+= White gets two bishops and is clearly better) 12.♙c2 ♖e8 13.♖e1+= with the standard idea Nf1-Ng3]

10...♔e7 [10...♘h5 looks preferable. Yet another standard idea of rerouting the knight to f4.]

11.a4 In this position Black has tried a number of moves

11...♖e8N [11...♙g4 ; 11...b6 ; 11...♖d8 ; 11...♘h5N Maybe Black has to execute the same plan even after losing a tempo on Qe7. What else is there to do?]

12.♘c4 ♙e6 13.♙a3

13...♙xc4? Why give up a bishop? [13...b5! 14.axb5 (14.♘cxe5?! 14...♘xe5 15.♘xe5 ♖d6 16.♘f3 ♘xe4! =+ Black must have overseen this witty resource. Now if 17.♖xe4?! then 17...♙c4 18.♘e5 ♙d5! 19.♖f4 ♖xe5 20.♖xe5 ♗xe5 21.♙f3 ♙xf3 22.gxf3 bxa4+ with a clearly better endgame for Black) 14...axb5 15.♘a5 (15.♘e3?! this natural-looking move runs into 15...♙xe3 16.♙xb5 (16.fxe3 16...♖eb8= in such a closed position White doesn't have any advantage all of a sudden) 16...♙xf2+ 17.♖xf2 ♙d7 and Black is fine) 15...♘xa5 16.bxa5 ♙c5 17.♙b4 ♙d7 White looks better, but it is not so easy to come up with a good plan.]

14.♙xc4± ♘d8 15.♙c1 h6 16.♘h4 ♘h5?! [16...♖d7 with the threat of Qc6 is more resistful]

17.♘f5 ♖f6 18.g3 ♘e6? loses by force [18...♖g6 19.♙h1 ♘e6 20.f3± With such a nice knight on f5 and two bishops White is

enjoying a clear advantage]

19.♖e2? ± [19.♙e2! the knight has nowhere to go! 19...♙h7 20.♙xh5 g6 21.♙f3 ♘g5 22.♙g4 gxf5 23.♙xf5+- White has an extra pawn and a winning position; 19.♖d1!? is also good enough 19...♘hf4 a desperate counterattack 20.gxf4 exf4 21.♖g4 ♖xc3 22.♙xe6 fxe6 23.♘h6+ ♙h7 24.♖a3 ♖f6 25.♖d1 gxf6 26.♖d7+ ♖e7 27.♖xf4+- and it's pretty much over]

19...♖g6

20.♘h4?? Here comes the blunder! [20.♙h1± Prophylaxis is called for]

20...♘g3! It's hard to miss this move. If only the queen was on d1...The David is using his slingshot in an efficient way.

21. ♔f3? Trying to keep the queens on board and to come up with something clever [21. ♖xg6 21... ♗xe2+ 22. ♕xe2 fxg6=+ I guess that White, who had a winning position just a few moves ago, was disgusted with the prospects of having to defend an endgame down a pawn against someone rated 456 points below himself. But this was the only chance to draw or...maybe even to win! :)]

21... ♔xe4! —+ Black is calmly devouring pawns. The Goliath is going down now.

22. ♔xg3 ♔xc4

23. ♕xh6 Maybe White was hoping to get an attack going this way, although I greatly doubt it.

23... ♖ad8 a good centralizing move

24. ♕xg7? all the other options are losing as well

24... ♖d3 25. ♔g2 ♗f4 26. ♔xb7 ♔xg7 One of the multiple winning moves.

27. ♗f5+ ♔h7 What a turnaround! **0-1**

If you have ever won a game against someone rated 300 points or above yourself, please send it to peter@pogonina.com for publication. Any additional information (a photo, annotations, etc.) is welcomed.

Young & Talented

(4) Wei, Yi (2703)

- Melkumyan, Hrant (2651) [C49]

10th World Teams 2015(4.4),
2015.04.22

GM Etienne Bacrot
Best rating: 2749

In this new column for CEWN I will try to find the most interesting games by strong junior players. Today I decided to comment on one from the 15-year old Chinese Wei Yi who helped his team, the current Olympic champions, to beat Armenia 3,5-0,5!

1.e4 e5 2.♘f3 ♘c6 3.♘c3 ♘f6 4.♙b5 The four knights is often employed by Wei Yi along with the Italian game.

4...♙b4 [4...♘d4 is my favorite move.; 4...♙c5 5.♘xe5 ♘xe5 6.d4 a6!? is an interesting new option, Wei Yi-Eljanov 2014.]

5.O-O O-O 6.d3 d6 7.♘e2 A new, fashionable and very logical move. The big theory is [7.♙g5 7...♙xc3 8.bxc3 ♙e7 9.♙e1 ♘d8 10.d4 ♘e6 with still more than 500 games played.]

7...♘e7 8.c3 ♙a5 9.♘g3 c6 10.♙a4 ♘g6 11.d4 Normal play for the center. Melkumyan will develop his pieces before going for the counterbreak with d5.

11...♙e8 [11...d5 is a very decent try. 12.♘xe5 ♘xe5 (12...♘xe4 13.♘xg6 hxg6 14.♘xe4 dxe4 was played in Lipke-Pillsbury 1898! 15.♙e1 ♙e8 16.♙f4+=) 13.dxe5 ♘xe4 14.♘xe4 dxe4 15.♙f4 I am still not sure that Black can fully equalize here.]

12.♙c2 h6 13.h3 ♙e6 14.♙e1 ♙c7 [14...b5 was played in Rapport-Jakovenko in Gibraltar this year. 15.♙d2 ♙c7 16.♙c1!? ♙h7 17.a4 a6 18.♘f5 and White has nice attacking possibilities.]

15.♙e3 d5 It is funny that we still have a mirror position after fifteen moves! But with the extra tempo and the fight in the center White logically takes the advantage.

16.♘xe5 [16.exd5 16...♙xd5 17.♙xg6 fxg6 18.♘xe5 ♙xe5 19.dxe5 ♙xe5 seems almost equal.]

16...♘xe5 17.dxe5 ♘xe4 [17...♙xe5 18.f4! ♙c7 19.e5 White has a great advantage.]

18.♘xe4 [18.♙d3 was the other way to play for an edge.]

18...dxe4 19.♙d4

19...♙d5!? There was another tricky defensive possibility: [19...♚g5! 20.♙xe4 ♙xh3 21.f4 ♚g3! with an unclear position because the obvious 22.♖e3? is nicely met: 22...♚xf4 23.gxh3 c5! 24.♙xc5 ♖xe5 and White can't defend the king and save the piece at the same time.]

20.♙xe4 c5 [Of course not 20...♙xe5? 21.♙xe5 ♖xe5 22.♙h7+-]

21.♙xc5 ♖xe5 22.♙xd5 ♖xd5 23.♙d4 ♚d6 [23...♙b6 24.♖e4+=]

24.♚g4 Fearless play! [24.g3 is a more conservative move where White still pushes: 24...♙b6 25.♚f3 ♙xd4 26.cxd4 ♖d8 (26...♖b8!? 27.♖ad1 ♖xd4 28.♖xd4 ♚xd4 29.♖e7 ♚xb2 30.♚xf7+ ♙h8 and it seems like Black might hold.) 27.♖ad1 b6 28.♖e4 White is still a pawn up.]

24...♖g5 25.♚f3 ♚h2+ 26.♙f1 ♚h1+?! It is necessary to exchange White's strong bishop: [26...♙b6! 27.♖ad1 ♙xd4 (27...♚h1+ 28.♙e2 ♚h2 29.♙xb6 axb6 30.♖d7+=) 28.♖xd4 ♚h1+ 29.♙e2 ♚h2! was the best practical chance, since both other moves lead to very unpleasant endgames: (29...♖e8+ 30.♖e4 ♖xe4+ 31.♚xe4 ♚xg2 32.♚xg2 ♖xg2 33.♖d1 ♖g6 34.♖d8+ ♙h7 35.♖d7 ♖b6 36.b4 ♙g6 37.♙d3+=; 29...♚xg2 30.♚xg2 ♖xg2 31.♙f1 ♖h2 32.♖e7 ♖xh3 33.♖f4 ♖f8 34.♖xb7±) 30.♖d7 ♖f8 and because of his slightly unsafe king, White will

need many strong moves to prove an advantage.]

27.♙e2 ♚xg2? enters a lost endgame. There were still some chances after [27...♚h2 followed by Bb6.]

28.♚xg2 ♖xg2 29.♙f3

29...♖h2?? Now the rook gets trapped! [29...♖g5 30.♖e7±]

30.♖e7 ♖xh3+ [30...♖c8 31.♖xc7! ♖xc7 32.♙g3 is another nice final.]

31.♙g4 ♙d6 32.♖d7+- ♖d3 33.♖xd6 ♖e8 34.♖g1 g6 35.♖g3 ♖d2 36.♖e3 ♖f8 37.♖e7 A very clean game by Wei Yi. 1-0

(15) Caruana, Fabiano (2802)
- Carlsen, Magnus (2863)

Gashimov memorial,
2015.04.19

GM Csaba Balogh
Best rating: 2672

We are facing another example where the World Champion outplays the other top players of the world from a seemingly nothing position. The material is balanced, but the knight is clearly superior to the locked bishop. However Black has his weaknesses on e6 and c5, which should give White enough counterplay to hold the draw.

29. ♖a3 I like this move. White sends the knight to a worse place, because Black was threatening with Rd2 followed by Nd1, winning the f2 pawn. [Trying to do the same with 29. ♖c1 was less accurate, because Black locks the rook as well with 29... ♗a2 30. ♖a1 ♖d2 depriving White from his counterplay on the a-file.]

29... ♗b1 [Now on 29... ♗d1 30. ♕e2= White takes the knight and holds the rook endgame. Black might try to win the c4

pawn, but White attacks the e6 with Ra6 and after Kf7 Ra7 check he goes back to a6 next.]

30. ♖a1? Caruana tries to repeat moves, but he underestimates Carlsen's subtle plan... [White should have played 30. ♖a5 30... ♖d1 This was what White was afraid of, but he has

31. ♖a1! preventing Nd2 by pinning the knight! (31. ♖g2 loses to 31... ♗d2! 32. ♕e2 ♖e1 demonstrates well how bad the white bishop is! It got trapped!) 31... ♗c3 32. ♖a3 ♖c1 33. ♖a8+ ♔f7 34. ♖a7+ forces a draw. Kg6 can be met by Ra6.]

30... ♗d2! The knight is heading to f3 to collect the e5 pawn.

31. ♕e2 Another mistake which already causes too big problems for White. [White should again have tried 31. ♖g2 31... ♗f3 32. ♖a6 still with good chances for a draw.]

31... ♗f3+! 32. ♕xf3 [32. ♖g2 32... ♗xe5 33. ♖a5 ♖c8 is a healthy extra pawn for Black.]

32... exf3 Caruana probably thought that if he managed to trade his poor bishop for the knight the rook endgame must be an easy draw. However changing the pawn structure in Black's favor creates new problems for White. The new key factor is the king on g1, which is squeezed to the back rank thanks to the f3 pawn! White cannot start his counterplay

against the c5 and e6 pawns because of the penetration of the black rook on the d-file.

33.h3 Trying to give air to the king. White also plans to play g4, followed by going to the f3 pawn with Kh2-g3. Carlsen prevents this idea with the most natural move.

33...h5! [Activating the rook with 33...♖d2 allows White to free his position with 34.g4! fxg4 35.hxg4 ♜c2 36.♙h2 ♜xf2+ 37.♙g3 ♜c2 38.♙xf3 ♜xc4 Black has won a pawn, but White rescued his king from the cage and launches his counterplay with 39.♜a8+ ♙f7 40.♜a7+=]

34.g4 A clever attempt to rescue the king at the cost of a pawn! [Another defensive attempt, 34.♜a6 also seems to fail after 34...♜d1+ 35.♙h2 ♜f1! 36.♜xe6 ♜xf2+ 37.♙g1 ♜g2+ 38.♙f1 ♜xg3 Black collects all the pawns and his passed pawns are going to be more dangerous than the white ones. 39.♜c6 (39.h4 39...♜g4 Black takes on c4 first and then on h4.) 39...♙f7 40.h4 ♜g4 41.♜xc5 ♜xh4 42.♙f2 g5 43.♙xf3 ♜e4 followed by h4 and g4, which seems to be very bad for White. He is also in some kind of zugzwang as he cannot push his pawns and if he moves with the rook, one of the pawns is falling.]

34...fxg4 35.hxg4

35...h4! Excellent play by Carlsen! It is more important to keep the king in a cage by keep controlling the g3 square than gaining a material advantage, but allowing counterplay. [35...hxg4 36.♙h2 ♜d2 37.♙g3 White should hold without difficulties.]

36.♙h2 [White could have tried to avoid getting a protected passed pawn with g5 by playing g5 himself: 36.g5 but it also fails to hold, as the black king joins the game too quickly. 36...♙f7 37.♙h2 ♙g6 38.♙h3 ♙h5! (But not 38...♙xg5 because of 39.♜g1+! getting counterplay again.)]

36...♜d2 I believe that this is the only inaccuracy Carlsen made in this game. [He should have started with 36...g5 and only in a next step activated the rook. 37.♜a6 is met by 37...♜d2 38.♙g1 ♜d1+ 39.♙h2 ♜f1 40.♜xe6 ♜xf2+ 41.♙h3 ♙f7 42.♜f6+ ♙e7 43.♜f5 I tried to hold with active defense, but it is not enough...

43...Rf1! winning an important tempo by threatening with mate on h1! 44.♔h2 ♕c1 45.♖xf3 (45.♖xg5 45...f2→) 45...♖xc4 This is the point. Now the g4 pawn is hanging thanks to the 43...Rf1 move. 46.♔h3 ♕c1 47.♖f5 c4 and the c-pawn runs too fast! 48.♖xg5 c3 49.♖g7+ ♔d8 50.♖g8+ ♔c7 51.♖g7+ ♔c6 52.♖g6+ ♔b5→ White cannot stop the pawn.]

37.♔h3 Missing the opportunity! [The only chance was 37.g5! and compared to the 36.g5 line, the white king is a square closer. 37...♖xf2+ 38.♔h3 ♖g2 39.♔xh4 ♔h7 also looks quite bad for White. Kg6 is coming and the white rook cannot leave the first rank because of f2, but perhaps he can save the game with 40.♖f1! f2 41.e4 ♔g6 42.♔h3 ♖xg5 43.♖xf2 ♖xe5 44.♖f4

Black is a healthy pawn up, but his rook is passive. White wants to bring his king to f3 to free his rook and if Black goes 44...♖h5+ (44...♖g5 45.♖f8) 45.♔g3 ♖h1 46.♖f8 ♕c1 47.♖c8

♖xc4 48.♔f4! White gets very active with Ke5 next! In most of the rook endgames, the active defense is usually the best, even if it sometimes costs a pawn. I would say the draw is the most probable outcome here.]

37...g5! 38.e4 Setting up a deep trick, but of course Carlsen does not fall for it. [38.♖a6 transposes to the 36...g5 line!]

38...♖d4! collecting all the pawns one by one. [We can see the point of 38.e4 after 38...♖xf2? White has gives up all his moves, his king is stalemated, he only needs to sacrifice his rook. 39.♖a8+ ♔g7 40.♖a7+ ♔g6

41.♖g7+!]=]

39.♖a8+ ♔f7 40.♖a3 [40.♖a7+ does not change the outcome. Black wins in a long, but forced line: 40...♔g6 41.♖e7 ♕d1! 42.♔h2 ♖f1 43.♖xe6+ ♔g7 44.♖f6 ♖xf2+ 45.♔h3 ♖f1 This mate threat is always the key! 46.♔h2 f2 47.♖f5 ♖g1 48.♖xf2 ♖xg4→ The connected passed pawns decide the game. Black wants to take on e4 and Re2 allows Kf7-e6. 49.♖f5 ♔g6 50.♖f6+ ♔h5→]

40...♖xc4 41.♖xf3+ ♔e7 42.♖e3 ♖d4 White has finally eliminated the f3 pawn, but his king is still forced to stay behind the h-pawn. Meanwhile, Black got another passed pawn, which decides the game. White also have difficulties to keep his remaining moves protected...

43.f3 c4 44.♖a3 ♜d3 45.♖a7+ ♔d8 46.♕g2 c3 47.♖a4 c2 [It was even easier to go behind the c-pawn with 47...♜d7! and Rc7 next! 48.♖a8+ ♔c7 49.♖a4 ♕b6--+]]

48.♜c4 ♜d2+ 49.♕h3 ♕d7 50.♜c5 ♜f2 51.f4 [51.♜c3 fails to 51...♜xf3+! --+]]

51...♜f3+ 52.♕h2 ♜xf4 [White resigned because of 52...♜xf4 53.♜xc2 ♜xg4--+] The connected passed pawns win automatically. White must stay passive to defend the e-pawns, but it allows driving the black king to h5, from where it will help to promote the pawns. A very instructive and nice endgame by the World Champion.] **0-1**

**(16) Carlsen, Magnus (2863)
- Vachier-Lagrave, Maxime (2765)**

Vugar Gashimov Mem 2015(5.3),
2015.04.21

GM Arkadij Naiditsch
Best rating: 2737

As Carlsen said in the interview, Maxime managed to surprise him already on move 2 with 1.Nf3 Nf6 2.g3 b5!? but usually it is a bad idea to try and play something "not very solid" against Carlsen, who is great in feeling what is needed in an unclear situation. So White quickly got a clear advantage and with a great positional pawn sacrifice he put Black under a lot of pressure. What we will see right now is already an endgame, which is clearly very bad for Black. Material is equal, but the bishop on f8 is very passive. What we are going to see in the next 20 moves is a perfect conversion of an advantage, without giving any chances to the opponent.

31.♜e2 A very safe and good move. White just protects the b2 pawn and leaves the knight on a4 on a passive position.

31...♜c1 32.♜xc1 ♜xc1+ 33.♕g2 In case Black would somehow manage to exchange another pair of rooks the

position would get closer to a draw, but of course this is only a dream...

33...♖c5 34.b3! A very strong move! Black's ideas was maybe to play a4-b3 and threaten to play Rc2.

34...♖c3 What else to do?! Black keeps on waiting...

35.♔h3! Another great positional move! White improves his king's position which can maybe go to h5 now, or maybe sometime in the future to f5.

35...♖d7 36.♗e6 ♖c5 37.♗d5 ♖d7 Maxime continues to wait.

38.♖e3! Using a small tactic, Magnus transfers his knight to c4 where it will attack both the a5 and d6 pawns.

38...♖f6 39.♗e6 The pawn on e4 can't be taken.

39...♖c5 [39...♖xe4? 40.♖d5 and the game is over.]

40.♖c4 ♔g7 Finally the black king feels a bit more free, but the pawns on a5 and d6 are in big danger.

41.f3 Another "small" but very good move. Now that the black rook is not on the 3rd rank anymore, White has all the time in the world to place his pieces perfectly. The easy threat is to play Rd2 next.

41...♖e8 42.♖d2 Now Black needs to be afraid of Bd7 and of

Rd5 after which the pawn on a5 will be lost.

42...♖c7 [A tougher defense was maybe 42...h5 to stop the white king from entering the g4 square for the future.]

43.♗g4

43...a4?! Black is losing his nerves. [It looks very ugly, but Maxime should have continued with passive defense... 43...♖e8]

44.♖xd6 Now the position is falling apart.

44...♗xd6 45.♖xd6 a3 This was Black's idea, to get to the a2 pawn by threatening Nb5 or Rc2, but once again Carlsen just sees more than his opponent.

46.♗d7! Another very strong move! White doesn't let the

knight jump to b5 and at the same time he threatens to play Bc6 and Rd7, against which Black is just helpless!

46...♖c2 47.♗c6 ♜xa2 Black's last try. [47...♘a6 48.♗d5 ♘c7 49.♗c4 and White is totally dominating the position.]

48.♖d7+ ♔f6 49.♖xc7 ♜c2 Black wants to play Rc1 and a2. Of course it is a very "long term" threat and White is going to stop it easily.

50.♖xh7 First of all Carlsen takes the h7 pawn- why not!

50...♔g6 51.♖c7 ♔f6 and now he finds the right mating plan:

52.h5! Suddenly the black king is in a mating net!

52...♖c1 [52...a2 53.♖a7 ♖xc6 54.♖xa2 leads to a totally lost rook endgame for Black.]

53.♖h7 a2 and after the beautiful

54.♗d5 Black can't avoid getting mated in a couple of moves with Rf7-Kg5 and Rf5 mate. What we saw right now looked so simple and easy, but in fact to play the most accurate move is one of the hardest things in chess and the current World Champion does it perfectly! A great game to learn from. **1-0**

Chess and the City. Size matters...?!

WGM Elisabeth Paetz

Best rating: 2493

Just a few days ago the world was "shocked", or rather amused, by an article by the famous and eloquent GM Nigel Short on the topic of why men are superior at chess. There has, of course, been plenty of discussion on this matter, and it is a topic that never seems to die.

Frankly, I feel quite relieved that we now know that the reason is a simple deficiency in our brain constitution. So, basically we can stop here and start demanding that FIDE totally separates men's chess from women's chess, as we cannot change or influence the biology of our birth. However, this may not be convincing enough, and anyway, separating men's and women's chess will end up financially disastrous, as I doubt there would be enough sponsorship to keep women's chess afloat. Having the smaller brain, or, as Nigel puts it, a "different wiring construction", sounds like a perfect reason, or in my case an excuse, for not being ranked in the top 100.

Whenever a journalist asked me, in former times, why men were so much stronger, I tended to point towards our evolution and physical constitution. Evolution-wise women were usually taking care of the household and family,

while men could explore themselves through hunting and collecting. So basically by nature men were more willing to take risks, leading to greater creative development. I must admit that, while this sounds like total rubbish, it is always nice to have such an excuse rather than admit that you are just a very lazy chess worker.

Have you ever heard of a strong woman player who was capable of working on chess by herself, and, and here comes the main point, doing so effectively? I haven't... The problem with women is simply that they have too many things on their minds, they cannot just focus on 64 squares and 32 pieces and neglect all the other crucial things, such as their appearance, chatting, and shopping and so on... These temptations are indeed far too important to allow us to work on chess for a couple of hours without interruption. So, since we always need to think about something, we inevitably work less effectively, and this may also be a very logical explanation for why we are not often found in the top 100 rankings (except Hou and Polgar, of course).

Anyway, Nigel's explanation has become my all time favourite, because it deflects away from, eg, my laziness holding me back, and puts the blame firmly on these deficiencies which can be proven scientifically. So, whenever we face this sort of question, thanks to Nigel, we finally have an answer! Anyway, as my brain is smaller than the rest of the 'Evolution' team, I have to come to an end now, because I have a million other things swirling around in my head! And, by the way, this may also explain why I only do the writing, whereas the others do the annotations.

Clash of the Titans

(17) Botvinnik, Mikhail

Moscow-chT, 1969

GM Kamil Miton
Best rating: 2655

1.c4 ♘f6 **2.♗c3** e6 **3.d4** ♙b4 **4.e3** O-O **5.♙d3** [Another, less popular option is 5.♗e2]

5...d5

6.a3 [6.♗f3 6...c5 (6...b6 7.O-O ♙b7 8.cxd5 exd5 9.a3 ♙d6 10.b4 ♗bd7 11.♖b3 a6 12.a4 The main task for White is to activate the dark-squared bishop after b5-Ba3 or with a plan like Bb2-Ne2-Ng3. Black should try to look for counterplay on the kingside with Qe7-Ne4.) 7.O-O ♗c6 8.a3 ♙xc3 9.bxc3 dxc4 10.♙xc4 ♖c7 with complex strategical play.]

6...♙e7 [6...♙xc3+ 7.bxc3 c5∞]

7.♗f3 dxc4 8.♙xc4 c5 Black is fighting for the center.

9.O-O ♗c6 [9...♗bd7 10.e4! cxd4 11.♗xd4 and White has a typical stable plus thanks to his space advantage and Bxe6!? can also be a threat sometimes now.; 9...a6 leads to Queen's Gambit Accepted positions.]

10.dxc5 [10.♖e2!? ; 10.d5!? 10...exd5 11.♗xd5 ♙e6 (11...♗xd5 12.♙xd5 ♖c7 13.e4 White keeps his strong bishop on d5 and Black needs play accurately to equalize.) 12.♗xf6+ (12.♗xe7+ 12...♖xe7= White needs to lose time to develop the bishop on b2, then Black can limit him after Ne4-f6.) 12...♙xf6 13.♙xe6 fxe6 14.♖c2 ♖d5 Black has the worse structure but thanks to his active pieces he should be able to equalize.]

10...♖xd1 [10...♙xc5]

11.♖xd1 ♙xc5 12.b4 ♙e7 13.♙b2 A symmetrical structure doesn't always mean equal position. Black needs to finish his development first.

13...♙d7 [13...b6 14.e4 A typical move with the idea to get more space. (14.♗b5 14...a5=) 14...♙b7 15.e5 ♗g4 16.♗b5 (16.♖d7 16...♗gxe5! and Black is fine!) 16...♖fd8 17.♗c7 (17.h3 17...♗h6 and the knight will get back into play after Nf5.) 17...♖ac8 18.♗xe6 ♖xd1+ 19.♖xd1 ♗xb4 20.♙b3 ♗d5 21.♗ed4 and White keeps the initiative.]

14.♗e4! White needs to play actively, otherwise after Rd8-Rc8 Black will solve all his problems.

14...♖fd8 [14...♘xe4 15.♖xd7 ♖ad8 (Less accurate is 15...♖fd8 16.♖xb7 ♘d6 17.♙a6!+–) 16.♖xd8 ♖xd8 17.♙b5 ♖c8 18.♖c1 a6 19.♙d3 ♘d6 20.♙f1 with a similar position as in the game.]

15.♘d6 [15.♘xf6+ 15...♙xf6 16.♙xf6 gxf6 and the doubled pawns are not a weakness here. It can only be a weakness in a pawn endgame in case White manages to bring his king to h5. Have a look at the game Cohn-Rubinstein, St Petersburg 1909.]

15...♙c8 [15...♙xd6 16.♖xd6+= and Black will have no time to limit the bishop after f6-e5.]

16.♘xc8 ♖axc8 17.♖xd8+ ♘xd8 18.♖c1 White keeps a stable advantage thanks to the bishop pair.

18...♘d7

19.♙b5! White avoids the bishops' exchange after Bf6.

19...♖xc1+ 20.♙xc1 ♘b6 21.♙f1! In an endgame the king should be an active piece.

21...a6 22.♙d3 ♘c6 23.♙e4 White brings the bishop to an active diagonal.

23...g6 [23...♙f6 24.♘d2! followed by the unpleasant Nb3.]

24.♙e2 ♙f8 25.♙d3 ♙e8 26.♙b2 ♘d5 [26...♙d7!? with the idea f5. 27.♙xc6+ (27.♘e5+ 27...♘xe5+ 28.♙xe5 ♘d5 and

thanks to his strong knight on d5 Black easily holds the position.) 27...♙xc6 28.♘e5+ ♙b5 29.♘xf7 ♙a4! and thanks to his active king Black has counterplay.]

27.♙xd5! exd5

28.e4! It looks very strange to exchange the bishop and isolated pawn but thanks to this operation the white king will become very active.

28...dxe4+ 29.♙xe4 ♙d7 30.♙d5 h5 [30...♙d8 with the idea to get rid of the white king after Ne7.]

31.♙g7! We should know that the bishop endgame is drawish but in the other ones thanks to his active king White has good practical chances.

31...♙d8 [31...♙d6 32.♙f6!]

32. ♖f8 ♜b6 **33.** ♜c5 ♞e7+ [33... ♜d8 34. a4↑]

34. ♞c4 ♜xc5 [34... ♜c7 35. ♜xe7!? ♞xe7 36. ♞c5 with the idea to bring the knight to d5.]

35. ♞xc5 ♞c7 preventing Kb6 but now White plays

36. ♞g5! A strong move which forces Black to make weaknesses.

36...f6 37. ♞h7 **f5 38.** h4! fixing the good structure for White.

38...f4 [38...b6+ 39. ♞d4 ♞d6 40. ♞f8!+- and soon Black will be in zugzwang.]

39. ♞f8 **b6+ 40.** ♞d4 ♞f5+ [40...f3 This trick doesn't help Black. 41. g3 ♞f5+ 42. ♞e4 ♞xg3+ 43. ♞xf3+-]

41. ♞e4 ♞xh4 **42.** ♞e6+ ♞c6 **43.** ♞xf4 ♞b5 Black is looking for counterplay.

Editorial Preface

Two super events and one exceptional match came to an end.

In Shamkir Magnus Carlsen once again showed who the boss is, with an amazing score of 7/9 and a performance of almost 3000 he totally dominated this event. Anand also showed a very good result with 6/9. Caruana and So shared 3-4th place with 5/9.

Let's now come to the Team's World Championship Men: Nothing could stop the Chinese team, who are winning almost any event they are playing. With 15/18 points the Chinese superstars finished 3 points ahead of their main concurrent, the team of Ukraine. The host team of Armenia took 3rd place with 11/18. Russia showed a very disappointing result, with only 10/18. Grischuk could not even win a single game.

In the women's section Georgia scored 17/18 points - an outstanding result! 2nd place went to Russia with a very good score of 15/18 and 3rd place to the ladies from China (who were playing without Hou Yifan) with 11/18.

In the battle of the legends between Kasparov and Short in Saint Louis, it was one-way traffic. Nigel Short was crushed with a score of 8.5-1.5. Well, lately we have been reading a lot of "strange" interviews by the Englishman, but maybe "less talking, more working" should be his on his schedule now.

In the current issue we comment on games from the recent super events in combination with a lot of interesting articles and the usual weekly puzzle section. Enjoy!

Two best games of the past week

(1) Adams, Michael (2745)
- Giri, Anish (2790) [B91]

Vugar Gashimov Mem 2015(8.5),
2015.04.25

GM Arkadij Naiditsch
Best rating: 2737

Both Adams and Giri didn't have a great run in Shamkir and at the end of the event they managed to score "only" 3.5/9, but in the current game Adams- who is usually a very solid player- showed great attacking chess. After the opening it seemed like White's position was a bit better, but by playing a bit "too slow" Adams gave Giri excellent chances to turn the game, but Giri didn't take them and got under a very heavy attack...

1.e4 c5 2.♘f3 d6 I guess this was a little surprise for Adams, since Giri usually plays 2...e6.

3.d4 cxd4 4.♘xd4 ♘f6 5.♘c3 a6 So we have one more Najdorf.

6.g3 This is a move that is becoming more and more fashionable.

6...e6 The main move is 6... e5.

7.♘g2 ♘e7 8.O-O O-O 9.a4 White's whole idea is to play a Sheveningen, where he usually plays Be2-Bf3-g4-Bg2, but now the bishop is already on g2 so he could be a sort of tempo up.

9...♘c6 A rather usual setup for Black.

10.♘e3 Also a usual move for White. [Of course Black should

not be afraid of 10.♘xc6 10...bxc6 11.e5 dxe5 12.♘xc6 ♖b8 and Black has excellent play.]

10...♖b8 I am not sure about this move at all. Black's idea is to take on d4 and to play b5, but it leads to a worse position. [10...♘e5 11.♖e2 ♖c7 looks more normal to me.]

11.f4 Now White is already preparing to take on c6 and play e5 at some point.

11...♖c7 A very usual move for Black.

12.♖h1 This prophylactical move is often played in Sicilian positions, but is it really needed now?! I think White's idea should be to play g4 and for that maybe the position of the white king on g1 is even better. [12.g4 didn't work because after 12...♘xd4 13.♘xd4 e5 the g4 pawn is getting lost.; In my opinion the right move was 12.♘b3 followed by g4.]

12...♘d7 13.♘b3 White is preparing the a5 move and the g4 push.

13...b6 directed against White's a5 push. [13...♘b4 14.a5 e5 15.♘b6 ♖c8 16.f5 and White is very solid in the center.; 13...b5 was also premature. 14.axb5 axb5 and White has the strong 15.♖e2! Black has huge problems to defend the b5 pawn.]

14.g4 Of course! White is starting the action on the kingside.

14...h6 A strong reply. Black can't let White play g5 followed by f5.

15.♔e2 attacking the a6 pawn and maybe preparing to play g5 sometime in the future. Now we can see that maybe playing Rb8 was not the best idea.

15...♞b4 A slightly strange move, as it is hard to understand where the black knight is going... [Why not play 15...♞a5 which is a typical move in this kind of pawn structures. 16.g5 hxg5 17.fxg5 ♞h7 18.h4 ♞c4 and I think the position is very unclear.]

16.♞d4 [I think white should have played more directly with 16.g5 16...hxg5 17.fxg5 ♞h7 18.h4 and because of the passive position of the knight on h7 I believe that White is better.]

16...♖bc8 Black is preparing to play Qc4, as the endgames are usually good for Black.

17.♖ad1?! and this move is already too slow. [It was really time for White to play 17.g5 17...hxg5 18.fxg5 ♞h7 19.h4]

17...♔c4 18.♔f3 Of course White avoids the endgame, but now Black has a sudden resource:

18...e5! A strong reply by Giri. A move like e5 is usually a bad move since it gives away the f5 and d5 squares, but in the current situation it is the right choice.

19.♞f5 ♞xf5 20.exf5 Freeing the bishop from g2.

20...exf4 [Taking the pawn on c2 looks very dangerous: 20...♞xc2 21.g5 and White's attack is just too strong.]

21.♖d4 [After 21.♞xf4 21...d5 the position looks very unclear to me.]

21...♔c7 22.♞xf4

22...♞xc2? A clear mistake, but even from a human point of view it is hard to see the full danger of White's attack. [Black should have tried to play for the d5 push, which is very typical. 22...♔c5 23.♖d2 d5 and the position is very unclear.]

23.♖d2 ♞b4 It seems like Black is a pawn up, but in fact it is White who rules the game.

24.h4! A great move! Black has no decent defense against g5.

24...♞h7 I guess Giri clearly underestimated Adams' next move.

25.g5! The right move since Black can't take the g5 pawn.

25...♔c4 Not a great move, but what else to do?! [In case of 25...hxc5 26.hxc5 ♘xc5 27.♔g3 ♘h7 White has a very simple win: 28.♕f3! activating both rooks and threatening to play Rg1-Rh2 with a deadly mating attack.]

26.f6 Adams is on fire! Black's position is getting destroyed.

26...gxf6 27.gxf6 A logical move but maybe not the simplest one. [White would win very easily after 27.gxh6 27...♔h8 28.♖e1! attacking the e7 bishop. 28...♖fe8 29.♖e4 ♔c5 30.♕e3 ♔a5 31.♕d4 Finishing the game on the spot! White has too many threats like Rxe7 for Black to even have a chance to save the game.]

27...♕xf6 28.♘e4 White's play is simple, he brings all the pieces to the kingside and mates the black king.

28...♕e5 There was already no way for Black to save the game.

29.♖xd6! Another great move by Adams!

29...♕g7 [After 29...♕xd6 30.♘xd6 ♔c2 31.♕xh6 Black's position is also in ruins.]

30.♕xh6 It is time to collect some more material and to get rid of the lonely defender of the black king.

30...♕xh6 31.♖xh6 The game is totally over.

31...♖c6 32.♔g4+ ♔h8

33.♖xh7+ and in case of 33...Kxh7 34.Nf6 Rxf6 35.Qc4 White would be a queen up. A very nice game by Adams where Black basically lost the game in one move by not playing 22...d5! and instead being a bit greedy and going for the c2 pawn. **1-0**

(2) Kasparov, Garry (2812) - Short, Nigel D (2664) [E11]

Legends Rapid Match 2015(1),
2015.04.25

GM Csaba Balogh
Best rating: 2672

Kasparov completely destroyed Short in an exhibition match in Saint Louis. The final score was 8.5-1.5. We examine the first game, where Kasparov was already showing huge domination, but Short could put up tenacious resistance and he survived...

1.d4 e6 2.♘f3 ♘f6 3.c4 ♙b4+ The Bogo Indian defense.

4.♗bd2 This has recently been considered to be the more ambitious answer. White would like to get the bishop pair after a3. The other main line is 4. Bd2.

4...c5 5.a3 ♙xd2+ 6.♚xd2 In the long term, White achieved a positional advantage. The two bishops might guarantee him an edge.

6...cxd4 7.♗xd4 O-O 8.e3 d5 9.cxd5 Kasparov opens the position to make his two bishops more powerful. [Another positionally principled move was played recently by GM Vitiugov: 9.b3 with the idea of developing the bishop to the long diagonal and delaying the movement of the f1 bishop to avoid losing a tempo after dxc4.]

9...♚xd5 10.♗b5 White would happily enter an endgame without queens, but Short rightly keeps them on board and keeps the pressure on the g2 pawn to make the development of the white pieces more difficult.

10...♚c6!

11.f3! A very clever move! White not only closes the pressure on the g2 pawn, but he also prevents the Ne4 tempo in some lines and prepares to push e3-e4, establishing control over the center and the active squares of the f6 knight. He will also be able to develop the c1 bishop ideally to e3 afterwards. Black quickly needs to do something to gain some counterplay.

11...a6 12.♗c3! [It was tempting to retreat the knight with tempo by playing 12.♗d4?! but after 12...♚b6 the knight has no stability on d4. Black attacks it with e5 and it will need to occupy an unfortunate square. 13.♙e2 e5 Nc6 and Rd8 are coming next with tempo.]

12...e5 13.e4 ♗bd7?! This is clearly the mistake which allows White to get an advantage. The idea would be to quickly play Nc5-b3 (and prepare it with Be6 if necessary) or in case of b4-Nb6, Be6 and the c4 square is weak. However Kasparov finds a perfect way to ignore this idea! [Black should have played 13...♙e6! and after the same plan we will see in the game... 14.♚f2 ♙b3! controlling the most valuable open file. 15.♙e2 ♚e6! The black knight should ideally develop to c6 and its final destination is on d4! 16.O-O ♗c6 17.♙e3 ♚fd8= and Black had enough counterplay against the two bishops in the game Gelfand-Andreikin, Moscow 2013.]

14. ♔f2! Kasparov does not weaken his pawn structure with b4 (which also gives up the stability of the c3 knight), but he quickly moves away on the dark squares and ignores the b3 knight.

14... ♘c5 15. ♘e3! ♘b3 16. ♖d1 Very well played! We can see now that the b3 knight is not doing that much and Black had a much better version in the 13. ..Be6 line.

16... ♘e6 17. ♘e2 White has consolidated his position and it is time to finish the development and enjoy the power of the two bishops.

17... ♖fd8 18. O-O+= ♘e8 Black would like to play Nd6-c4, but this maneuver takes some time, which allows White to create different kind of problems...

19. ♔g3! Kasparov provokes a weakness before opening a new battle front. [19.f4! immediately was also very strong. 19...exf4 20. ♔xf4 followed by Bf3 and Nd5 with very active piece play.]

19...f6 20. f4! White has the two bishops and he wants to open the position for them!

20... ♘d4 Short tries to show the drawback of having included the Qg3-f6 move. [20...exf4 21. ♔xf4 would be even better than one move before. Now not only Bf3-Nd5 is threatening,

but also e5 with a very dangerous attack.]

21. ♘h5! White does not give up his bishops and puts more and more pressure on Black's kingside.

21... ♘c4 [According to the computer, the only move to stay in the game was 21... ♔c5! threatening the h5 bishop with an x-ray and stabilizing the very important e5 square. White's advantage is undisputable anyway with the two bishops. He can take twice on e5 followed by Bg5 for instance.]

22. fxe5! Kasparov sacrificed the exchanged without thinking. He feels the domination and the dynamism so well that he knows that the compensation will be more than enough... White gets a pawn for it, all his pieces are standing perfectly, the black king is vulnerable and after the disappearance of the c4 bishop, another great piece comes to the game, as White plays Nd5!

22... ♘xf1 23. ♖xf1 ♔h8 The best defense. Leaving from Nd5-e7 and the pin on the g-file which made the takeback on f6 after Bxe8 and exf6 impossible. [23...fxe5 24. ♔xe5 ♘c2 25. ♘d5+—]

24. ♘d5! A devastating attack is about to break through. Short finds the only way again to avoid immediate resignation and gives back his material advantage...

24...♖xd5! 25.exd5 ♖xd5 26.♖f2? This move looked very tempting, but some miraculous defensive resources by Short allow him to survive. [Kasparov pointed out that he should have played 26.♖h4! 26...♗e6 27.exf6 ♗xf6

28.♖xf6! gxf6 29.♖xf6+ ♗g7 (29...♗g8 30.♗f7+-) 30.♗d4! The two bishops are extremely powerful in such positions. In comparison to the game the dark squared bishop is now standing on the long diagonal from where it controls much more squares than from h6. 30...♖g8 The only move. (30...♖g8 31.♗f7+-; 30...♖d7 31.♗f7 ♖g4 32.h3 ♖g3 33.♗e5! and Black cannot save the g7 knight. 33...♖e1+ 34.♗h2+-) 31.♖e7! Black is totally dominated and in danger of getting into zugzwang. Here are some illustrative lines to feel the power of the white pieces: 31...b5 Saving the b-pawn. (31...♖c8 aiming for counterplay. 32.♗g4 32.Qxb7 is also winning. 32...♖c1+ 33.♗f2 ♖c2+ 34.♗f3+- White ran out of checks and Be6 is coming next, deflecting the queen from the g7 knight.; 31...♖f8 White obviously keeps the queens on the board. 32.♖d7 ♗g8

33.♗d1! Sending the king back to the corner after which the advance of the h-pawn will decide the game. 33...♖f7 loses to the small tactical trick 34.♗b3! ♖xb3 35.♖xg7#) 32.♗g4 ♖f8 33.♖d7 White controls all the squares of the rook since Re8 or Rd8 loses to Bxg7 and the winning plan is the following: 33...a5 34.♗e6 b4 35.♗d5 ♖b8 36.axb4 axb4

37.g4! with the idea of g5-h4-h5-h6! and if Black tries to prevent it with 37...h6 38.g5! hxg5 39.♖h3# is mate!]

26...fxe5! Cold-blooded defense. Kasparov could probably not believe to his eyes, that with such pieces and back rank problems he does not have an instant win.

27.♖f8+ [Black's point is that after 27.♗xd4 27...♗f6!! (27...exd4 28.♗f3± and Bxb7 next or Qxd4 would have been good for White.)]

27...♖g8 28.♗e7 ♘f6! The only move again to avoid Rf8.

29.♖xf6! Kasparov finds this brilliant exchange sacrifice again, but this time it does not have the same efficiency as in the 26.Qh4 line. [29.♗xe5 again runs into an intermediate move: 29...♘c6! and Black takes on h5 next with more or less equality.]

29...gxf6 30.♕h6! The game seems to be over, but Black has an only move yet again... [30.♗xf6+? 30...♗g7 is nothing.]

30...♘f5! 31.♗xf6+ ♘g7 Amazing defense by Black!

32.♗xe5 ♖c8 White's pieces are nice, but it is very difficult to make progress. Black is ready to solve the tension on g7 with Rc6. Qf8-c5 is another idea. White is not in danger to lose the game, but the win looks equally far away. Probably the right evaluation is something like dynamic balance.

33.♕f3 Preventing Rc6 but it allows Black to come out from the big squeeze with

33...♗f7! 34.h3 Opening the back rank.

34...b5 35.♕e4 [It was probably better to transfer the bishop to the long diagonal with 35.♕d2 but Black also gets his counterplay here with 35...♗e6 The trade of the queens would solve the problems forever... 36.♗d4 ♗c4 37.♗f6 ♗e6 38.♗f4 ♗c4=]

35...♖e8! Another very nice resource.

36.♗d4 [36.♕xg7+? is met by 36...♕g8! and only in the next move taking back on g7. Black would have managed to get rid of the bishop pair this way.]

36...♗e7 Further squeezing back the white pieces with Qe5!

37.b4 ♗e5 38.♗d7! White still cannot trade queens, but his compensation is only enough for equality.

38...♗a1+ [38...♖e7 39.♗c8+ ♖e8 also forces the draw.]

39.♕h2 ♖xe4 It is already White who must save the game and he did it by playing [39...♗e5+ also with a draw.]

40.♕xg7+! ♗xg7 41.♗d8+ ♗g8 42.♗f6+ ♗g7 43.♗d8+ ♗g8 Black cannot avoid perpetual check. Draw agreed. An excellent fighting game! **1/2-1/2**

The K-Files. Blumenfeld Gambit - part 3

GM Alexander Khalifman
FIDE World Chess Champion (1999)
Best rating: 2702

(3) Blumenfeld Gambit - part 3 [E10]

1.d4 ♘f6 2.c4 e6 3.♘f3 c5 4.d5 b5!? 5.dxe6 fxe6 6.cxb5
Seems like it's the right time to look at Black's alternatives on move 6.

6...d5 [6...a6!? Benko Gambit - style. As we could see in the previous parts this move is an important resource for Black in different kind of Blumenfeld lines. 7.e3! White doesn't want to exchange this pawns on a6 thus helping the opponent to develop pieces. 7...♙e7 (

a) 7...d5 8.b3 ♙d6 - 6...d5;

b) 7...axb5 8.♙xb5 ♙a5+ Very direct reaction. Black tries to use the hanging bishop on b5 to win back the pawn or at least to spoil White's structure. It doesn't work, however. 9.♘c3 ♙a6 (9...♘d5 Bastos - Encarnacao, Portugal 1992 10.♙b1! It's also typical for various gambits. White doesn't mind to give back the pawn as the opponent will waste time for it and then the lead in development might become the most important factor. 10...♘xc3 11.bxc3 ♙xa2 (11...♙xc3+ 12.♘d2±) 12.♙b2 ♙e7 13.c4! O-O 14.♙a1±) 10.♙xa6 (10.♙b3!?

deserves attention as well (Andre - Reizniece, Germany 2006)) 10...♙xa6 Panjwani - Molner, Los Angeles 2011 11.a4 d5 12.e4! Typical and strong 12...dxe4 13.♘b5 ♙c8 14.♘g5±)

8.♘bd2! ♙b7 9.b3 O-O 10.♙b2 ♙e8 11.a4 ♙g6 (Volke - Firman, Germany 2007) This manoeuvre looks tempting but White has a strong answer 12.♙e2! ♙xg2 13.♙g1 ♙h3 14.♙c1 and Black has serious development problems which makes White's attack very dangerous 14...d5? 15.♘g5 ♙f5 16.♘df3+-; 6...♙b7 7.e3 ♙e7 (7...d5 - 6...d5) 8.♘bd2 White is not in hurry to develop his kingside bishop as after the possible a7-a6xb5, he will be able to capture directly from f1 without losing an important tempo. 8...O-O (8...d5 9.b3! It's very important to control e5 square with the bishop on b2. Another point is preventing c5-c4. 9...♙d6 10.♙b2 ♘bd7 - 6...d5) 9.b3! is possibly even stronger (9.♙c2 9...a6 10.b3 axb5 11.♙xb5 ♘a6?! (11...♙b6 might be slightly preferable as it disturbs White's development. However, after 12.a4 ♙a6 13.♙d3 ♘c6 14.♙a3 the compensation doesn't seem to be enough.) 12.O-O ♘b4 13.♙b1 ♙a5 14.♙e2 ♙a8 15.a3! ♘e4 16.♙b2! and the following forced sequence favours White 16...♘xd2 17.♘xd2 ♙xg2 18.axb4 ♙xf1 19.♘xf1 ♙xa1 20.♙xa1! cxb4 21.♘g3 ♙f6 22.♙xf6 ♙xf6 23.♙d3 White's advantage is close to be decisive (Karpov - Rogers, Cap d'Agde rapid 1998)) 9...♘d5 the only way to exploit White's move order 10.♙b2 ♙f6 11.♙c2 a6 (11...♘b4 12.♙b1±) 12.a3 axb5 13.♙xb5 ♙a5 14.♙d3 ♙xb2 15.♙xb2 ♙a6 16.♘e5 d6 17.♘c4± and once again it's totally unclear where is Black's compensation. These lines prove that all tricks without d7-d5 might be refuted rather easily. So at some point d7-d5 is still necessary to play.]

7.e3 For a long time after the classical game Tarrasch - Alekhine, this move was considered to be secondary. However, White has made his mistakes in the later stage of

the game and 7.e3 in my opinion is White's most promising (or at least one of those) reaction to the Blumenfeld Gambit. However it must be connected with the proper setup (actually Be2 b3 Bb2 O-O Nbd2). If White succeeds do this and Black at the same time couldn't create something substantial then White's chances will be clearly better. Of course, the correct move orders are quite important as we will see.

7...♙d6 [7...♙e7!? an interesting idea. Black's counterplay must be connected to e6-e5 first of all and he plans to support it by playing Qd6. However White has enough resources to meet this plan. 8.b3! Important prophylactical move. Delaying the kingside development might seem risky but it has solid positional basis in this situation. 8...♖d6 9.♙b2 ♗bd7 10.♗bd2 ♙b7 11.♖c2 O-O 12.♙e2 (12.♖d1 is conceptual but not the only way for advantage 12...a6 13.a4! still fighting for a tempo 13...axb5 14.♙xb5 ♙a6 15.♗c4 ♖b8 16.♙xa6 ♖xa6 17.♗cd2±) 12...e5 (12...a6 13.O-O axb5 14.♙xb5 ♙a6 15.a4 ♙xb5 16.axb5 ♖b6 17.♖d3 ♖fb8 18.♖xa8 ♖xa8 19.e4 and White is better) 13.♖f5! An important resource (The typical 13.e4 is not universal as we can see 13...♗xe4 14.♗xe4 dxe4 15.♖d1 ♖c7∞ Rudolph - Migl, Germany 2006; 13.♖d1!?) 13...♗e4 (13...♙d8 14.♗xe5 ♙a5 15.O-O-O±) 14.♖h3 ♗xd2 15.♗xd2±; 7...♙b7 In most of the cases it transposes to the main line, but gives White some additional resources 8.b3! The best move order. (

a) 8.♗g5 Trying to use Black's move order 8...♙d6! N This is very strong response. Black sacrifices another pawn but all his pieces become extremely active. (

a1) 8...♖d6 9.♖f3! Strong manoeuvre. The pressure on e6 is increasing. 9...h6 10.♖h3 e5 11.♙e2 ♗bd7 12.♖e6+ ♖xe6 13.♗xe6+=;

a2) 8...♖d7 it stops Qd1-f3-h3 but still rather slow 9.♙e2 (9.♖f3 9...e5∞) 9...♙d6 10.f4!? O-O 11.O-O ♖e7 12.♗c3 ♗bd7 13.e4 h6 14.e5 hxg5 15.exd6 ♖xd6 16.fxg5+=)

9.♗xe6 ♖e7 10.♗g5 O-O 11.♙e2 ♗bd7 12.O-O ♖ad8∞;

b) 8.♗bd2 8...c4!∞ Another important and typical reaction. As b2-b3 is now successfully met by c4-c3 White's pieces look rather uncomfortable. This is the reason for White to reach his dream setup, first playing b2-b3 and only then developing the knight.)

8...♙d6 9.♗bd2 White must be ready to meet e6-e5 with e3-e4 9...O-O 10.♙e2 a6 - 7...Bd6; 7...a6 8.b3 ♙d6 - 7...Bd6]

8.♙e2 At least the most solid way to play. Delaying the kingside development is not fitting to everybody's taste. [8.♗c3?! Of course, it's at least impolite to criticize the great Dr.Tarrasch but in fact this natural move is just a positional mistake. White's main idea is to meet e6-e5 with e3-e4 but with the knight on c3 it usually runs into d5-d4 and leads to undesirable results. 8...♗bd7 9.♙e2 (9.♙d3 9...♙b7 10.e4 (10.♖e2 10...e5↑ and the initiative is on Black's side (Devereaux - Lalic, Swansea 2006)) 10...d4↗ Ligterink - van der Wiel, Hilversum 1985) 9...♖e7 10.O-O O-O 11.b3 ♙b7 and suddenly there is nothing to be done against the following e6-e5-e4. Black is already at least not worse. 12.♙b2 ♖ad8 following the classical masterpiece (12...e5 is already possible 13.♗h4 (13.e4 13...d4± Rosa - Carrascoso, Spain 2003) 13...g6 14.g3 e4

(14...♖ad8) 15.♗g2 g5! 13.♖c2 e5 14.♗fe1 (14.e4 14...d4 That's the big difference with knight on d2) 14...e4 15.♗d2 ♗e5→

Gambit player's dream. All black pieces are active, pawn center is dynamic. All he needs to do is just to prepare the decisive attack. (Tarrasch - Alekhine, Bad Pistyan 1922); 8.♗bd2 As already mentioned this is quite premature because of c5-c4. Another point is that in some lines a7-a6 is stronger now. 8...O-O (8...a6 9.b3 ♗d7?! rather artificial. The bishop simply doesn't belong here. 10.bxa6 ♗xa6 11.♗b2 O-O 12.a3 ♖e7 13.♗e5 ♗b8 14.♗c4! ♗xe5 15.♗cxe5 ♗c6 16.♗d3+=; 8...c4!?) 9.♗e2 (9.b3 (Graf,F - Brustkern, Budapest 2006) runs into 9...e5! 10.e4 ♖a5∞ 11.exd5 e4 12.b4 ♖xb4 13.♖b1 ♖a5→) 9...a6 10.b3 (10.bxa6 10...♗xa6! ∞ 11.O-O ♗b4 12.a3 Tolk - van der Lijn, Netherlands 1993 12...c4!+= Once again! It works perfectly here.) 10...axb5 11.♗xb5 e5! ∞12.e4 c4→; 8.b3!? This is another interesting attempt to build the perfect setup. 8...a6 (8...O-O 9.♗e2 - 8.Be2; 8...e5 9.e4!+=) 9.♗b2 O-O 10.♗bd2!? (10.♗e2 - 8.Be2) 10...♗bd7 Gruenberg - Knaak, Plauen 1980 11.♗e2 Better later than never! (

a) 11.a4 This is already too much. 11...e5! (11...♖e7 12.♗e2! (12.bxa6?! 12...e5! 13.e4 c4!∞with good compensation) 12...e5 (12...axb5 only helps White 13.♗xb5+= once again the compensation is very doubtful) 13.e4 c4 14.O-O±) 12.e4 c4!

Very direct and strong. Suddenly White is in real danger. 13.♗e2 (13.♖c2? 13...axb5±; 13.bxc4? 13...dxe4 14.♗g5 ♗b4 shows clearly why the kingside development delay can't be the universal way 15.♗e2 e3! 16.fxe3 ♗g4!-+) 13...♗b4! threatening c4-c3 14.♖c2 (14.♗c1?! 14...dxe4 15.♗xc4+ ♖h8 16.♗g5 ♗c5 17.♗c3 ♗d5! 18.♖h5 ♗f5-+ and Black's threats are much more stronger.) 14...♗b7!↑ and it's White who has to play accurately;

b) 11.bxa6 11...e5 (11...♗xa6 natural but wrong. Now White has time to complete the development. 12.♗xa6 ♖xa6 13.O-O+=) 12.e4 c4! 13.♗e2 (13.exd5 13...e4 14.♗g5 e3! 15.fxe3 ♖e7∞White has a lot of extra pawns, but will they help him?!) 13...♖a5! 14.exd5 c3 15.♗c4 cxb2+ 16.♗xa5 bxa1=♖ 17.♖xa1 ♗b4+ 18.♗d2 ♗xa5∞ and Black has good resources in this crazy position.)

11...axb5 (11...e5 12.e4! c4 now it doesn't work properly. White is just in time to evacuate his king to the safe place. 13.O-O!±) 12.♗xb5 ♖a5 13.a4 ♗a6 14.♗xf6 ♗xf6 15.♗xa6 ♖xa6 16.♖e2+= Black has realistic drawish chances in the resulting endgame but surely not more.]

8...O-O 9.O-O [9.b3 One more ambitious try to reach the perfect setup avoiding the critical line 9.O-O Bb7 10. Nbd2 c4!? 9...a6!? N

This move might be the critical test for White's move order. (

a) 9...e5 Papathanasiou - Bazhenova, Herceg Novi 2006
10.e4! d4 11.O-O! and the pawn on e4 is indirectly protected
11...dxe4? 12.xc4+ h8 13.d5+-;

b) 9...bd7 10.O-O! Until the black bishop has not reached
the b7 square, White doesn't need to play Nbd2 to stop e6-e5.
(10.dbd2 is also possible) 10...e5 11.e4!±;

c) 9...b7 10.dbd2 a6! Of course, this move is much more
promising when Black's knight is still on b8 as bxa6 can be met
by Nb8xa6-b4. 11.O-O (11.bxa6 11...dxa6);

d) 9...e4 10.b2 Cherednichenko - Brustkern, Budapest
2007 10...a6 11.O-O (11.bxa6 is rather inaccurate due to
11...a5+ 12.dbd2 c4 13.O-O! (13.bxc4? 13...xf3!±) 13...c3
14.dxe4 cxb2 15.dxd6 bxa1= 16.a1xa6∞)

11...axb5 12.xb5 a6 13.xa6 xa6 14.a3! e7 15.dbd2
xd2 16.dxd2 db8 17.f4 dc6 18.c2+=) 10.b2 axb5 11.xb5
a5+ 12.c3 de4 13.c2 d4 leads to a long and forced line
with extremely unclear consequences. (13...xc3 14.cxc3+=)
14.exd4 xf3! 15.gxf3 xc3 (15...cxd4 16.fxe4 dxc3 17.O-O a6
18.cxc3 cxc3 19.xc3 xb5 20.f1+= and connected passers
must promise White somewhat better chances.) 16.cxc3
xb5 17.dxc5 f8 18.g1 a7∞ White is doing fine materially,
but Black has serious dynamic resources.]

9...b7 [9...a6 10.d3 This is a kind of exception. After
a7-a6 the knight on c3 is OK because in many lines it has
the important square b5. 10...b7 11.a4 lasman - Turov,
Rethymnon 2010 11...bd7 12.bxa6 xa6 13.xa6 xa6
14.b3+= Black doesn't have enough for a pawn. White's
structure is healthy and the only weakness (b3) is difficult to
attack. 14...a8 15.db5 b8 16.d2 Despite the positional
transformation the basic idea (to meet e5 with e4) is still

valid. 16...e5 (16...e5 17.e4!) 17.b1 b8 18.f4 c7 19.b2±;
9...bd7 10.dbd2 b7 - 9...Bb7]

10.dbd2 [10.b3 It's just wrong here. Black can play e6-e5 and
White doesn't have e3-e4. 10...e5! 11.b2 bd7 12.dbd2 e4
13.h4 Marovic - Bobotsov, Belgrade 1961 13...g6 14.g3 e7;
10.d3?! Nothing has changed compared to the notes above.
The knight is just misplaced here. 10...bd7 11.dg5 (11.b3
11...e7 - 8.Nc3) 11...e7 Incutto - Torres, Buenos Aires 1962
12.a4 ad8 13.a5 c4 14.f4 dc5]

10...c4!? N

An interesting new move. White has managed to castle, but he
didn't have time to reach the perfect setup. The alternatives
allowed White to play b3 and Bb2 with clearly better chances.
[10...bd7 11.b3 e7 (11...e8 12.b2 e5 13.e4 dxe4 14.h4!
(14.dg5 14...g6 only justifies Qd8-e8) 14...c7 15.c1 d8
16.b4!± and the Black centre is destroyed (Karpov - Lobron,
Walldorf rapid 1997)) 12.b2 ad8 (

a) 12...a6 - 10...a6;

b) 12...e5 13.e4! dxe4 14.e1 e3 (14...ad8 15.d2) 15.fxe3
e4 16.d4 c7 17.g3 ad8 18.c2 d5 Lindgren - Holving,
Stockholm 2011 19.f1± Black fails to create any threats;

c) 12...h8 13.c2 e5 14.e4 dxe4 15.dxe4 dxe4 16.d2!

(16.♖e1 16...♗f6 17.g3 ♘d5∞Zhu Chen - Pogonina, Krasnoturinsk 2007) 16...e3 17.fxe3±)

13.♞c2 e5 14.e4! ♘xe4 (14...dxe4 15.♘g5±) 15.♘xe4 dxe4 16.♘d2 e3 17.fxe3 ♞g5 18.♙c4+ ♖h8 19.e4 ♞e3+ 20.♖h1 ♜xf1+ 21.♜xf1 ♗f6 22.♞c3 ♞h6 23.♗f3 ♙xe4 (Fedoseev - Zeller, Marianske Lazne 2011) Black has managed to win back the gambit pawn, but his weaknesses must tell after 24.♙c1! ♞h5 25.♘g5 ♙g6 26.♞e1 preventing any counterplay 26...e4 27.h3±; 10...e5 11.e4!±; 10...a6 11.b3 ♘bd7 (

a) 11...♞e7 Schulze - Landa, Senden 2011 12.♙b2 axb5 13.♙xb5 ♘c6 (13...e5 is as usual met by 14.e4! d4 (14...dxe4 15.♘c4! ♜d8 (15...exf3 16.♞xd6+-) 16.♗fd2±) 15.♞e2 Black's centre is successfully blocked. It's hard for him to create any counterplay.) 14.♙xc6 ♙xc6 15.♙e5 In general in gambits exchanges are favorable to the side which has the material advantage. 15...♞c7 16.♙xd6 ♞xd6 17.♞c2+= It is not so easy to convert the extra pawn, but it doesn't make Black's position really attractive. 17...e5?! 18.♜fc1! ♘d7 19.e4±;

b) 11...axb5 12.♙xb5 e5 13.e4! dxe4 14.♘g5+-)

12.♙b2 ♞e7 13.a4 This is a typical position for the whole system. If Black doesn't try to exploit the drawbacks of this or that in White's move order, but just plays natural moves allowing White to reach the perfect setup, his counterplay will be stopped and a pawn is a pawn after all, (13.bxa6!? 13...♙xa6 14.♙xa6 ♜xa6 15.e4!± (15.a4 is not bad either)) 13...♙c7 (

a) 13...axb5 14.♙xb5 ♜ad8 (14...e5 15.e4±) 15.a5 e5 16.a6 ♙a8 17.e4+- d4 (17...dxe4 18.♘g5+-) 18.♞e2+-;

b) 13...e5 14.e4 (14.bxa6!? 14...♙xa6 15.♙xa6 ♜xa6 16.e4 d4 17.♗e1±) 14.♞c2±)

11.♘b1!? Looks artificial but White has to prepare b2-b3. [11.♘d4 looks active but in fact it only helps the opponent to

bring his pieces to the best squares. 11...♞e7 12.♘b1 ♘bd7 13.♘c3 ♘c5= 14.f4 is probably the best way to stop the direct assault, but now Black gets long-term compensation after (14.b3 14...♗fe4 and Black's attack becomes very dangerous as the following lines prove 15.♘xe4 ♘xe4 16.♙g4 (16.bxc4?? is brilliantly refuted by 16...♙xh2+! 17.♖xh2 ♘xf2 18.♜xf2 ♞h4+ 19.♖g1 ♞xf2+ 20.♖h1 dxc4 21.♗f3 ♙xf3 22.♙xf3 ♜ad8 23.♞g1 ♜xf3! 24.gxf3 ♞xf3+ 25.♖h2 ♜d5+-) 16...♜xf2 17.♙xe6+ ♖h8 18.♜xf2 ♙xh2+ 19.♖f1 (19.♖xh2 19...♞h4+ 20.♖g1 ♞xf2+=) 19...♘xf2 20.♖xf2 ♜f8+ 21.♖e2 ♙g3 22.bxc4 dxc4 23.♙xc4 ♙e4 24.♗f3 ♞f6 25.♙d2 ♞h4 26.♗xh4 ♜f2+ 27.♖e1 ♜f8+=) 14...♖h8 15.b3 ♗fe4 16.♘xe4 ♘xe4= 17.♙g4 trying to stop e6-e5 but anyway... (17.bxc4 17...e5→) 17...e5 18.♗f5 ♜xf5 19.♙xf5 exf4 20.exf4 ♜e8=]

11...♞c7!? Black, however, has to fight against b2-b3 somehow. [11...♘bd7 12.b3! cxb3 13.axb3 ♞e7 (13...e5 14.♙a3!) 14.♙a3! exchanging the most dangerous piece 14...e5 15.♙xd6 ♞xd6 16.♘bd2± There is no compensation at all.; 11...♗e4 It also stops b2-b3 but this version of knight exchange is favourable for White. 12.♘c3 ♘xc3 13.bxc3 ♘d7 14.a4 ♗f6 15.♘d4 ♞e7 16.♙f3 g6 17.a5! and White has a certain advantage in all cases 17...a6 (17...e5 18.a6 exd4 19.axb7 ♞xb7 20.♜a6±; 17...♜ab8 18.a6 ♙a8 19.e4 dxe4 20.♙g4 ♙d5 21.♙e3+=) 18.b6 e5 19.♗c2 e4 20.♙e2 ♞e5 21.g3 ♞xc3 22.♙a3 ♙xa3 23.♜xa3+=; 11...e5 is not so dangerous anymore because after e5-e4 the knight has an excellent square on d4 12.b3±]

12.♘c3 [12.b3 is a bit too provocative 12...c3 13.♞c2 ♗e4 14.a4 ♘d7 15.a5 ♜ac8 16.b6 axb6 17.a6 ♙a8=]

12...♘bd7 13.h3 ♜ac8 [13...e5 14.b3 cxb3 15.♞xb3 ♜ac8 16.♙b2 ♘c5 17.♞d1+=]

14.b3! The best reaction. White gives back the extra pawn, but grabs the initiative.

14...cxb3 15.♗b2 bxa2 16.♖xa2 ♔b6 17.♔a1 ♗b8+= This complicated position is preferable for White as his pieces are more active and Black has some sensitive weakness, although it requires practical testing, of course.

GENERAL CONCLUSIONS The Blumenfeld Gambit Accepted is quite playable for Black. Even if I wouldn't dare to call it 100% correct mathematically, it leads to original unbalanced positions and even if White plays the best moves his advantage is far from obvious. Most probably it's not recommended to use as the one and only opening against 1.d4 but as a surprise weapon it might serve you well. The important note: if you would go for it, please remember that this article is not enough. You also have to know what will you do if White doesn't accept the gambit. From White's point of view it's also quite good, because there are still some lines which promise certain advantage. Please pay your attention first of all to 7.e3 and 7.Nc3 (with the idea 7... Nbd7 8.e4 d4 9.Na4!?)

David vs. Goliath

Peter Zhdanov

Chief Editor of Pogonina.com

In this entertaining column we are reviewing the most unexpected results that occurred last week. Players usually face opponents of a similar level. Considerably less frequent are situations when a significantly lower-rated player succeeds in beating a much stronger adversary.

The previous week brought us 19 upsets. Life is getting better again for the Davids!

The number of moves ranges from 19 in Hadjikyriakou (1805) - Fernandez Lopez (2133), 1-0 to 81 in Jouault (1910) - IM Berend (2349), 1-0.

Keep an eye on the 12-year old WFM Turmunkh Munkhzul (1550) from Mongolia. She defeated opponents rated 1934, 1986, 2067 and 2155 in one tournament. Girl power! The good news is that thanks to the K=40 coefficient she should probably quickly obtain an adequate rating. These four games constitute a +147.2 rating points gain.

The winner of the "fatality" nomination is Bramson (1822). He finished off Shaw (2160) in style:

This position is not good enough for a "mate in 3" puzzle, because Qg7 is another solution. The game proceeded 42.f4 b1Q 43.Qh7X. Kudos to Black for allowing this checkmate on board.

Top-10:

Soyolmaa (2067) - Amina (1438), 0-1, [629](#) points
 Munkhzul (1550) - Lkhamsuren (2155), 1-0, [605](#) points
 Munkhzul (1550) - Soyolmaa (2067), 1-0, [517](#) points
 Amina (1438) - Uuriintuya (1934), 1-0, [496](#) points
 Nielsen (2373) - Jouault (1910), 0-1, [463](#) points
 Jouault (1910) - Berend (2349), 1-0, [439](#) points
 Munkhzul (1550) - Sarantungalag (1986), 1-0, [436](#) points
 Ohanov (1879) - Rouffignac (2278), 1-0, [399](#) points

Munkhzul (1550) - Uuriintuya (1934), 1-0, [384](#) points
 Frantz (1920) - Mirimanian (2274), 1-0, [354](#) points

Average gap: 472; White won 8 games, Black won 2 games.

You can view all the games in the accompanying pgn file.

If you have ever won a game against someone rated 300 points or above yourself, please send it to peter@pogonina.com for publication. Any additional information (a photo, annotations, etc.) is welcomed.

(4) Wei, Yi (2703)

- Rodshtein, Maxim (2667) [C48]

10th World Teams 2015(6.4),
2015.04.25

Second column, second game of the Chinese GM Wei Yi! He played a very interesting game to give an important 2,5-1.5 victory for his team against Israel.

1.e4 e5 2.♘f3 ♘c6 3.♙b5 ♗f6 4.♘c3 ♘d4 [4...♙b4 was his opponent's choice in last week's game. Anand said that Wei Yi-Melkumyan inspired him for his opening against Mamedyarov in the Shamkir Gashimov memorial.]

5.♙a4 c6 On impulse of Giri, and now Rodshtein, this move might soon become very popular. [5...♙c5 is Black's long-time favourite move.]

6.♗xe5 [6.d3 6...a5!? A funny move that seems strong for Black. 7.♗xe5 d6 8.♗f3 ♗xf3+ 9.♙xf3 ♙g4 10.♙g3 b5 11.♗xb5 cxb5 12.♙xb5+ ♙d7 13.♙c4 ♗h5 14.♙f3 ♗f6 15.♙g3 ♗h5 with a draw in Vallejo-Giri 2013.]

6...d5 7.d3 [7.exd5 7...♙d6 8.dxc6 O-O Black has great compensation.]

7...♙d6 8.f4

8...♙c5 The bishop moves again but now White can't castle easily. This seemingly strong idea was only used twice in older games.

9.exd5 O-O [9...♗xd5 10.♗e4 ♙h4+ is an additional option.]

10.dxc6 This might look greedy but White needs to take some material to compensate his poor king position.

10...bxc6 11.h3 Losing a tempo for development but controlling the important g4 square. I suspect White's unusual play was part of his opening preparation.

11...♖e8

12.♙d2! A very funny move and the best defense.

12...♗d7 The strong knight should be taken off the board.

13.♔d1 The king somehow finds a safe place. Of course all problems are not solved and now White should find a way to take out his queenside pieces.

13...♟xe5 14.fxe5 ♖xe5 15.♞e1 ♜xe1+ [15...♞e7 looks more natural but 16.♞xe5 ♞xe5 17.♞g5! ♟f5 18.♟f4 ♞e6 19.♟b3 ♟xb3 20.axb3 ♞e8 21.♟d2 followed by Kc1-b1 might be better for White.]

16.♞xe1 ♟f5 17.♞e5 [17.♟e4 17...♟f8=Unnatural and strong. (17...♟b6 18.c3! ♟e6 19.♟c2! White consolidates.) 18.c3?! ♞a5! =+ 19.b3 ♟e6 20.♟xc6 ♜d8+]]

17...♞f8 Black had a much stronger move which only leads to a draw. It is incredible but White's crazy opening is safe! [17...♟b6 18.♟xc6 If it wasn't for this move then Black would simply continue with Qd7 and Re8, with a great attack. 18...♟c7 19.♞c5 (19.♞d5? 19...♞f6 20.♟xa8 ♟g4+ 21.hxg4 ♞f1+ 22.♟d2 ♟f4# would be a dream finish for Black!) 19...♟b6 20.♞d5 (20.♞e5 20...♟c7=) 20...♞f6! This strong idea was probably missed by Rodshtein when he played his 17th move. 21.♟xa8 ♟g4+ 22.hxg4 ♞f1+ 23.♟d2 ♞f2+ 24.♟d1 ♞f1+=]

18.♟xc6! += ♟xc6 19.♞xf5 ♟d4 20.♞f4 [20.♞f1 seems far safer to me.]

20...♞e8 21.♟d2? A logical move, but based on a miscalculation. [21.♟e4 maintains White's clear advantage.]

21...♞e7 Now the evaluation is very unclear, since Black's pieces are working well together.

22.♞g5 [22.♟e4? was Wei Yi's first intention in my opinion but after 22...f5! 23.♟xc5 ♞e2+! 24.♟c1 ♞xg2—+ White can't defend against the fork and back rank mate threats.]

22...♞b7 23.b4 A good try to get out. From here there are many inaccuracies in the game but the players were probably short on time after this opening!

23...♟b6 [23...♟xb4 Taking back some material is also nice.]

24.♞d5 ♞c7

25.♟c1 [25.a4! A great computer move to disturb the bishop's good square on b6. 25...♞d8 26.♞c4 ♞h2 27.♟c1 ♞h1+ 28.♟b2 ♞xg2 29.♟e4+= It's funny that we get the game's position with the useful tempo a4 up for White!]

25...♞d8 [25...♞c8! with the idea Ne2 is strong and leads to an unclear position.]

26.♞c4 ♞g3 27.♟b2 [27.a4! was still a strong move.]

27...♞xg2 28.♟e4 ♞xh3 [28...♟f3 29.♟c3 ♟d4! 30.♞c1 ♞xh3 leads to a wild middlegame.]

29. ♖xf7+ ♔xf7 30. ♘g5+

30... ♔g8? [30... ♔g6 is much more natural.]

31. ♘h3 ♘f3 32. ♕f4 ♕d4+? Now White regroups. [32...h6 with the idea g5 was essential.]

33. c3 ♕f6 34. ♘f2 ♕h4? Too many moves by pieces when the passed pawn should have been pushed forward.

35. ♕e3 ♖e8 36. ♘e4 ♘e1 37. ♖d1 a6 38. a4 ♘xd3+ Black takes back material but he is clearly down in the race.

39. ♖xd3 ♖xe4

40. b5 Not the best way to push. [40. ♔b3 40...h5 41. c4 ♕g3 42. b5 axb5 43. cxb5 is an easy win, for example: 43...h4 44. ♕c5 ♖g4 45. a5 h3 46. a6 h2 47. ♖d1]

40... axb5 [40... ♖xa4 41. b6+—]

41. axb5 h5 42. ♕d4 ♕g5 43. b6 ♕f4 44. ♖f3 [44. ♖h3 slowing down Black's pawns was the last winning possibility.]

44... g5 After four strange moves the endgame is now unclear.

45. ♔c2 h4 An alternative idea was to bring the king to the queenside. [45... ♖e8 46. ♔d3 ♔f7 Black seems fine and the rook endgame after 47. ♕e3 ♔e6 48. ♕xf4 gxf4 49. ♖xf4 ♔d5 is drawish.]

46. ♔d3 ♖e7! 47. c4 ♖h7 A perfect place for the rook, as it stops White's pawn and helps the h-pawn advance.

48. c5 h3 49. ♖xf4!? gxf4 50. c6 h2 51. b7

51... ♖h3+? A bad luck mistake. Now White has a miraculous win because his king finds a safe place. [51...h1=♖ 52. b8=♖+ ♔f7 53. ♖xf4+ ♔e8 54. ♖b8+ ♔f7 was the most obvious draw.; 51... ♖xb7 is also a draw but it is more complicated to be sure about it over the board. 52. cxb7 h1=♖ 53. b8=♖+ ♔f7 54. ♖c7+ ♔e8 55. ♖c8+ ♔e7! 56. ♕c5+ ♔f6 57. ♖f8+ ♔e6 58. ♖e8+ ♔f5 59. ♖f7+ ♔e5 60. ♕d4+ ♔d6]

52. ♔c4 h1=♖ 53. b8=♖++— The win is not so easy to achieve but Wei Yi displays flawless technique.

53... ♔h7 54. ♖h8+ ♔g6 55. ♖f6+ ♔h5 56. ♖f5+ ♔h6 57. ♖f6+ ♔h5 58. ♖f5+ ♔h6 59. ♖xf4+ ♔g6 60. ♖f6+ ♔h5 61. ♖f5+ ♔h6 62. ♖f4+ ♔g6 63. ♖g4+ ♔h6 64. ♖e6+ ♔h5

65.♖f5+ ♔h6 66.♖f6+ ♔h5 67.c7 ♖c1+ 68.♙c3! ♖h4+ [68...♖xc3+ leads to an easy queens endgame. 69.♖xc3 ♖f1+ 70.♔b4 ♖f4+ 71.♔b3 ♖f7+ 72.♖c4 ♖f3+ 73.♔b4 ♖f8+ 74.♖c5+ Check!]

69.♔d5 ♖d1+ 70.♔c5 ♖g1+ 71.♔b5 ♖b1+ 72.♔c5 ♖g1+ 73.♙d4! ♖c1+ 74.♔b6 ♖b1+ 75.♔a7 ♖a2+ 76.♖a6 ♖f7 77.♖b5+ ♔g6 78.♖b6+ ♔f5 79.♔b8 1-0

10th World Teams 2015(9.2),
2015.04.28

GM Arkadij Naiditsch
Best rating: 2737

After a very good game, Yu Yangyi is very close to win the game. It is clear that the black pawns are very dangerous, but still, to win such a position is not an easy task. The Chinese superstar shows us how it is done!

59...f4+ A logical move, but there is much more calculation behind it than it seems!

60.♖xf4+ Of course! [60.♖f2 60...h2 61.♖g2 ♜e1 and White could resign on the spot.]

60...gxf4+ 61.♖xf4 So the white king will go to g3 next, so how to improve Black's position?!

61...♔f6! A good choice! The black king is taking a walk to e2 and White can't do anything against it.

62.♖g3 ♔e5 63.♕c7+ ♔d4 64.♕b6+ ♔d3 Black wants to play Ke2 next.

65.♖f2 The best defense and again asking Black "what's next?".

65...h2! Perfect play by Black. The h-pawn is getting exchanged against the white f-pawn, but the thing is that Black keeps the white king in the corner.

66.♖g2 ♜f1 67.♖xh2 ♜xf3 68.♖g1 [After 68.♖g2 68...♖e2 White would be in zugzwang. 69.♕c7 Other moves lead to the same end. 69...♜f7 70.♕b6 ♜g7+ and Black is able to cut the white king on the g-file.]

68...♖d2! Continuing waiting for Kg2.

69.♖h2

69...♖d1! and again White is in zugzwang. Now after 70.Kg1

comes Ke1! and after 71. Kg2 Ke2 and we are back to the position where White can't avoid being cut off on the g-file.

70. ♖c7 Now that White has moved his bishop, Black is in time to cut the white king on the h-file.

70... ♖f7 71. ♖b6 ♖g7 and the job is done! During the next moves we will see why it was so important to have the white king on the h-file.

72. ♖h3 ♖e2 73. ♖h4 ♖d3 The black king is on his way to b4.

74. ♖h3 ♖c4 75. ♖h2 [The same plan would also happen if White would keep his king on h4: 75. ♖h4 75... ♖b4 76. ♖h5 ♖g2 77. ♖h4 ♖a2 78. ♖g4 ♖xa5 79. ♖xa5+ ♖xa5 80. ♖f3 ♖b4 81. ♖e2 ♖b3 82. ♖d2 ♖b2 and White is just not in time! Now we can see how important it was for Black to cut the white king on the h-file.]

75... ♖b4 76. ♖h3

76... ♖g5 and the a5 pawn is lost.

77. ♖h2 ♖xa5 78. ♖xa5+ ♖xa5 79. ♖g3 ♖b4 White is clearly not in time to get back to c1 with his king. What looked so easy was actually great technique from the Chinese player, who found a great winning concept and made it a reality with perfect play. A great job by Yu! **0-1**

(16) Sargissian, Gabriel (2668) - Karjakin, Sergey (2757)

World Teams 2015,
2015.04.26

GM Csaba Balogh
Best rating: 2672

White has a beautiful position. The black pawns are fixed on light squares, where they are targets of the white bishop and they are restricting the movement of the black pieces. Actually all the black pieces are in a cage and only the knight could be activated by driving it to d5, but that would make things even worse, because after Bxd5, White would get a protected passed pawn either on e5 or on c5 and an excellent outpost for the knight on d4 against the poor bishop. This means that Black cannot do anything better than sit and wait. However everything is protected, the opened files are well controlled and White cannot penetrate with his rook, so converting the advantage still requires some efforts. White has all the time for maneuvering and Sargissian finds a very nice way to win the game.

45. ♖e1! White drives his knight to c2 in order to allow access for his rook to d6 and the knight could also jump to d4.

45...♔b7 [45...♖g1 is just seemingly some kind of activity, but after 46.♕f2 the rook must retreat.]

46.♘c2 ♘c7 47.♕f2 White is not in a hurry.

47...♙e8 48.♖d1! ♙d7 [48...♖d7 is strongly met by 49.♖d6!+- followed by Nd4 and the c6 pawn falls. Taking on d6 is hopeless, since after exd6 White breaks in with his king through e5-f6.]

49.♖d3 One more waiting move before starting the action.

49...♕c8 50.♖d6! ♘e8 Black still seems to be in control! He defends his c6 pawn by attacking the rook and if it retreats he also goes back to Nc7 without any achievements for White.

51.♘d4!! This great sacrifice decides the outcome. White gives up his rook, but he gains a protected and far advanced passed pawns in exchange. The black rook still cannot create any counterplay.

51...♘xd6 52.exd6 ♕d8 [52...♕b7 defends the c6 pawn, but drops b5! 53.♘xb5!+- was the point behind the sacrifice and White returns to d4 followed by pushing b4-b5!]

53.h5! Giving Black no chance! White wants to take on c6 (which does not run away), but it allows the black rook go to g4, attacking both pawns and gaining some counterplay. Therefore Sargissian decides to put it to a protected square.

53...♖g8 Black still cannot do anything better than just waiting.

54.♘xc6+ ♙xc6 55.♙xc6 ♖g4 56.♕e3 Perhaps not the most accurate move, but Sargissian has calculated the line until the end, so there was nothing wrong with it. [56.♕f3 and taking on b5 next would have won automatically without any calculations. 56...♖g1 57.♙xb5 ♖d1 (57...♖b1 58.c6 ♖xb4 59.c7+ ♕c8 60.♙a6+- wins.) 58.♕e3+- controlling the d4 and d2 squares followed by Be2 next, sending the rook away from the d-file and then c6-c7 will already work.]

56...♖g3+ 57.♕d4 ♖b3

58.♕e5! Well played! The only winning move! [58.♙xb5 allows Black to stay between the pawns after 58...♖xb4+ 59.♙c4 ♕d7! 60.♕c3 ♖b1= and White is not better anymore.]

58...♖xb4 [A tricky defensive attempt would have been 58...♖e3+!? 59.♕f6 ♖e4! but it also loses after 60.♙xe4! (But not 60.♙xb5? because of 60...♖xb4 61.♙a6 ♖a4 and it is not easy to advance the c-pawn, because the bishop always gets attacked. 62.♙b7 allows 62...♕d7! using the unfortunate placement of the bishop, which cannot give an essential check.) 60...fxe4 61.c6 e3 62.c7+ ♕d7 63.c8=♖+! ♕xc8 64.♕e7 e2 65.d7+ ♕b7 66.d8=♖ e1=♖ The queen endgame is hopeless. White eliminates all the pawns. The b5 even falls

with check after 67. ♖d7+ ♔a8 68. ♖c6+ ♔a7 69. ♖c7+ ♔a6
70. ♖a5+ ♔b7 71. ♖xb5+-]

59. ♗b7! ♖c4 60. c6 b4

61. ♔xe6! The last accuracy, which had to be calculated long ago. White promotes his pawn and the bishop is just in time to catch the b-pawn. [Black resigned in view of 61. ♔xe6 61...b3 (61... ♖e4+ 62. ♔d5+-) 62. c7+ ♖xc7 63. dxc7+ ♔xc7 64. ♗d5 b2 65. ♗a2+-] **1-0**

Chess and the City. Trudno skazat...

WGM Elisabeth Pahtz

Best rating: 2493

Whenever you ask a Russian top player a difficult question, he looks at the sky, touches his unshaved skin, looks very smart and comes up with the answer: "hard to say" (trudno skazat)...

There is one question to which any top Russian player may not have a suitable answer: "Why did the Russian men's team lately always fail at any national team competition?!". In the last century they won everything they possibly could have, until 2002 basically. After that the Russian team kept failing although rating-wise they were more than superior every time.

But why?

Some may say that team spirit is more important than individual strength. Some others may claim that the pressure is simply too high for the Russians to succeed... There is a rumor that they only get paid if they win...

If we skip their success in the last team world championship in 2013 it is obvious to say that the performance of the most dominating team (at least by rating) was rather disappointing in every event in the past decades....

When it comes to the question about how important team

spirit is we could come up with a team like Armenia, which managed to win two Olympiads in a row in 2008 and 2010 and remains a unique case....

However you may put this "team spirit performance" in question when you look back at the success of the Hungarian team in 1978, when none of their members would even talk to each other no matter what.... As a German I can also look at the German national men team, which managed to win the European team competition in 2011 although most of their members were not on speaking terms...

In any other sports I would say that team spirit or home advantage plays a decisive role, whereas in chess it doesn't show any constant flow at all....

Taking team spirit and individual strength into account it is hard to say which recipe is the one to succeed... In chess it seems like chance has a lot to do with it.

In this year's team competition China managed to repeat their success from the Olympiad in Tromsø in winning the World team competition as well! Russia however proved to fail again, repeating their disgrace from Tromsø 2014...

That leads me to the conclusion that team spirit or individual strength may certainly play a role, however not a decisive one.

China remains a mystery for us. In former times we thought everything was managed by the officials but now it's allowed to give away even world championship titles- just look at Hou Yifan. So, do THEY have any team spirit? Who knows...

Chess still looks like an individual sport to me, as unsurprisingly everybody is responsible for their own positions...

Editorial Preface

In the very strong Russian Team Championship which was held in Sochi and had only 7 rounds, 1st place was clearly taken by to the team of Sibir (Aronian, Kramnik, Jakovenko, Wang Yue, Korobov, Kokarev, Bocharov, Maletin) with a perfect score of 14 points. In 2nd place followed the team of St.Petersburg with Svidler, Vitiugov, Dominguez, Matlakov, Rodshtein, Khairulin, Fedoseev and Saric.

In the Italian Team Championship first place went to the team of "Obiettivo Risarcimento Padova" with Nakamura, Vachier Lagrave, Bacrot, Fressinet and many more strong GMs.

In the Nakhchivan Open 2015, none of the tops seeds like Kasimdzhanov, Bacrot or Hou Yifan are even close to be in the leading position. After a great start of 5/5, Pantsulaia lost a very promising position to Safarli in round 6, who thus joined him on 5/6.

Kasimdzhanov is just on 4 points and Bacrot and Hou Yifan are both having a very disappointing event with only 3.5/6.

We can expect a very exciting finish for the first price of 10.000\$.

As usual, we wish you a lot of chess fun in the upcoming week!

Best wishes,

Arkadij Naiditsch & Csaba Balogh

Two best games of the past week

**(1) Kramnik, Vladimir (2783)
- Svidler, Peter (2729) [A05]**

TCh-RUS Men 2015(2.1),
2015.05.02

GM Arkadij Naiditsch
Best rating: 2737

Vladimir Kramnik is clearly one of the best chess players of all times, but lately he started to have some slips in his play. Sometimes he shows amazing results in combination with some blunders in tactical phases. His opening repertoire has also changed and he is playing more aggressively than before, as well as often staying away from very main theoretical lines. One of his main openings nowadays is the Reti, which is not very often played on the top level. Anyhow, in our game, after a somewhat modest opening Kramnik outplays his "team colleague" easily and finishes the game in a little tactical battle. It is great to see Vladimir back in shape!

1. ♘f3 ♘f6 2. g3 Maybe by playing the Reti Kramnik wanted to avoid the main lines of the Gruenfeld, of which Svidler is famously an expert.

2...d5 3. ♕g2 g6 Svidler loves to have his bishop on g7.

4.b3 A very modest approach, but actually this double-fianchetto is trickier than it looks.

4...♕g7 5. ♕b2 c5!? I personally like what Svidler is doing-covering the center. [5...O-O 6.c4 leads to a more calm game.]

6.c4 d4 This is Black's point.

7.b4 White doesn't wait for Black to play Nc6 and immediately launches his play on the queenside.

7...♘fd7 A very solid move. Now it is all about whether Black can keep the pawn on d4 alive or not.

8.O-O

8...♘c6! A strong move which forces White to decide what to do with the pawn on b4.

9.bxc5 Of course White should not play b5 after which Black would get an excellent center. For those who play the Benoni with Black, we have sort of the same thing, just with opposite colors and an extra tempo for White.

9...O-O The pawn on c5 will not run away...

10.d3 ♘xc5 11. ♘bd2 I guess this is the first moment where Black needs to have a deep thought, as there are a lot of options... From a general point of view it would be great to play e5 at some point, but on the other hand White wants to start his action on the queenside by playing Ba3 and Rb1. The bishop on g2 could then become a very dangerous piece.

11...♖b8 Both a very solid and good move. Black is maybe intending to play b6-Bb7 next. We should not forget that the pressure is on White now, as in case Black can develop his pieces nicely, White's position would just be worse.

12. ♘a3 A very normal move. [White should not try to win a pawn after 12. ♘b3?! 12... ♖a4! Of course everything else is good for White. 13. ♘xd4 ♘xd4 14. ♖bxd4 and now Black has a couple of moves, but the most solid seems to be 14... ♖c5 A calm and strong move. Now White needs to give some material back. 15. ♖b3 (15.e3 15...e5 16. ♖b5 ♘xd3 and Black is clearly better.) 15... ♘xa1 16. ♔xa1 ♔c7 The position is still very unclear, but I can hardly believe that being an exchange down White has chances for any advantage.]

12... ♔a5 An interesting move. Black's plan is to play Na4-Nc3. [Black could also have played 12...b6 13. ♖b1 and maybe some solid move like 13... ♔c7 with an unclear position.]

13. ♔c1 White wants to play Nb3 next, so the next moves are sort of forced.

13... ♖a4 14. ♖b3 Now Black needs to decide where to put the queen.

14... ♔c7 looks too passive to me. [Why not put the queen on 14... ♔h5 with the idea of playing Bh3. I think Black is more than fine here.]

15. ♔c2 A solid move.

15... ♘d7 Black is almost fully developed, but Kramnik has a great idea in mind. [15... ♘c3 16.e3]

16. ♖ae1! A fantastic move! White is totally switching the strategy from playing on the queenside to playing on the kingside. The plan is of course to play e3 next and now we can see that from a great knight on a4, Black will find himself with a terrible knight on a4 when the d4 pawn will disappear.

16... ♖fd8?! This move is hard to understand... [Black could have tried to prepare counterplay against White's e3 plan by playing 16... ♖fc8 17.e3 dxe3 18.fxe3 and here comes the point as to why it is so good to have rook on c8: 18...b5! and the game is really messy.]

17.e3 Following the plan.

17... dxe3 [Black can't keep the d4 pawn alive: 17...e5 18. ♖bxd4 with a clearly better position for White.]

18.fxe3 Now White has the big positional threat of playing d4 and basically winning the fight over the center. A move like Ng5 could also be very unpleasant as the black rook on d8 is clearly misplaced.

18... h6 It seems like it is not possible to avoid d4, so at least Black prevents Ng5.

19.d4 ♘f5 As in a Gruenfeld, Svidler is trying to get some play against White's center.

20.e4 ♘g4 Now things are pretty clear: in case White can survive the next few moves, Black will be in big trouble.

21.e5 Perfect play! Kramnik shuts down the g7 bishop and keeps his center alive.

21...♖b6 The right idea but Black missed White's next move... [Of course Black can't win the d4 pawn because after 21...♙xf3 22.♙xf3 ♖xd4 23.♖xd4 ♙xd4 the knight on a4 is hanging. 24.♙xa4; Svidler should have continued with 21...♙f5 22.♙d2 (In case of 22.♙f2 22...♙d3 Black should be fearless with 23.d5 ♙xf1 24.♙xf1 ♖xe5 25.♖xe5 ♙xe5 26.♙xf7+ ♔h7 with a very unclear position.) 22...♖b6 Now this move is much stronger! 23.♙c3 and White should still be better, but the position is very sharp.]

22.♖h4! Another great move by Kramnik! White is targeting the g6 pawn.

22...♖xd4 Black has no choice but to take on d4.

23.♙f2 White takes no prisoners. [23.♖xd4 would lead to a better endgame. 23...♙xc4 is Black's only chance. 24.♙xc4 ♖xc4 25.♙e4! protecting the d4 knight and attacking the bishop on g4. 25...♖xa3 26.♙xg4 ♙xe5 Black has 3 pawns, but White is doing very well on the kingside. 27.♖df5! and White has a crushing attack, although it is an endgame!]

23...♙xc4? Clearly not the best move. [Black should have tried 23...♖f5 even if the position looks very scary. 24.e6 A powerful move. (24.♙e4 was less clear. 24...h5 25.h3 ♙xe5! 26.♙xe5 ♙xe5 27.hxg4 hxg4 28.♖xf5 ♙xf5 29.♙xf5 gxf5 30.♙xe7 and of course White is clearly better, but Black keeps drawing chances.) 24...fxe6 25.♙xe6 and White's attack is scary!]

24.♙e4! Simple and strong! White is winning a piece.

24...♙e6 [24...♙e2 also loses a piece. 25.♙e1 ♙c3 26.♖xd4 ♙xa3 27.♙4xe2 and White is winning.]

25.♖xd4 ♙d5 Svidler is trying to be tricky, but Kramnik keeps a cool head.

26.♖e6! Another beautiful move by White. The queen on c4 is hanging and Qxf7 is a deadly threat. The game is over.

26...♙xe6 Black doesn't have anything better.

27.♖xc4 ♜xc4 28.♙xe7 White has a queen for a rook, which is too big a material advantage to even give Black any practical chances.

28...♖d2 29.♚xa7 Black's material is disappearing.

29...♙xe5 30.♜f3

30...♙c7 and White can even play the simple 31.Kh1 to be totally winning. A very nice game by Kramnik, who showed a great positional idea with Rae1! and mastered the tactical complications with the precision of a swiss watchmaker! **1-0**

GM Csaba Balogh
Best rating: 2672

Many club players love playing the following very passive opening as Black. However employing it against a top GM is not necessarily a clever idea. Aronian shows a classic example of how to punish your opponent for such play...

1.d4 g6 2.c4 ♙g7 3.e4 White occupies the center with all his pawns to gain a space advantage, while Black just aims at developing his pieces and later tries to bounce back.

3...d6 4.♜c3 e6 [4...♜f6 would be a transposition to the King's Indian defense.]

5.♙e3 ♜e7

6.♚d2 White already shows his intentions. If Black castles kingside, he must face an enormous attack after Bh6 followed by h4-h5!

6...h6 This is the standard reaction. Black would like to preserve his dark squared bishop. Now the h4-h5 plan can be

met by g5, keeping the files closed. The big drawback of this move is the weakness of the h6 pawn, which deprives Black from castling. He usually tries to deal with this problem by executing an artificial castling with Kf8-g8-h7 at a later stage of the game.

7. ♖d3 White completes his development.

7... ♘d7 8. ♗ge2! Aronian already thinks about the further course of the game and he develops his knight to e2 to keep the option of f2-f4-f5, destroying the pawn formation in front of the black king.

8...b6 9.O-O a6 This symmetrical setup is the way how Black likes to organize his development. The last move also prepares the first active move to push c5, which was impossible right away because of Nb5!

10. ♗c2! A clever prophylactic move against c5. White prepares for the opening of the d-file in that case and he removes his d3 bishop from the way. Sometimes he also wants to annoy Black with Ba4, using the fact that he cannot castle kingside since the h6 pawn is still hanging.

10... ♖b8 Well, yes, Black is suffering of a lack of space. He tries to get some activity on the queenside with b5, but Aronian simply prevents this plan...

[10...c5 is premature, because White is better prepared for the opening of the files. 11. ♖ad1 ♗b7 12. ♗a4±]

11.a4 ♗c6 Black wants to enjoy the benefits of provoking a4 and he is heading towards the b4 square with his knight. However, White can simply ignore this fact...

12. ♖ae1! Aronian wants to keep the harmony between his pieces and he is ready to meet Nb4 by Bb1. He could have put his rook to d1 as well, but he believes that from e1 it supports more the f4-f5 plan, as if Black takes on f5 exf5 opens the e-file for the rook.

12... ♗b4 13. ♗b1 c5 Black must do something, he cannot just sit and wait. He still could not castle because of the h6 pawn and the Kf8-g8-h7 plan was too slow, as White would already swipe him off the board with f4-f5.

14.f4 White launches his decisive attack. A small happiness for Black is that the h6 pawn is finally not hanging after castling.

14... ♖c7 [14...cxd4 15. ♗xd4 O-O White wins material with 16. ♗a2! deflecting the knight from the c6 square. 16... ♗xa2 17. ♗c6! ♖c7 18. ♗xb8+- wins an exchange.; 14...O-O 15.f5 also looks terribly strong. The h6 pawn is hanging again. 15... ♗h7 (15...g5 16.h4!± destroys Black's defense.) 16.fxg6+ fxg6 17. ♖xf8 ♗xf8 (17... ♖xf8 18. ♗f4! looking at the g6 and e6 weaknesses. White is ready to open the diagonal with e5! 18...cxd4 19. ♗xe6! This intermediate move wins a pawn as dxe3 does not work because the queen is hanging with check.) 18.dxc5 bxc5

19.e5! Opening the b1-h7 diagonal. All the white pieces are dangerously looking at the h7 king. 19...♙xe5 20.♙xh6±]

15.f5! Obviously the c4 pawn does not count when the king is under such attack.

15...cxd4 16.♙xd4 O-O [16...♙xc4 17.fxe6 fxe6 18.b3 ♔c7 White can choose between dozens of win. One of them is 19.♙cb5 axb5 20.♙xb5 ♔c6 21.♙xd6+ ♔d8 22.♙c1+- and everything is hanging in the black camp.]

17.♙xh6 [17.fxe6 was also winning.]

17...♙xc4 At least the material balance is restored, but there is nothing that could save the black king.

18.♙xg7 ♙xg7

19.♙c1! White had other winning moves, but such ones are

the most demoralizing. Black cannot leave from the pin on the c-file.

19...♙c5 20.♙a2+- White wins decisive material. The game is over. Black continues resisting for few more moves, but there is no hope...

20...♙xa2 21.♙xc5 bxc5 22.fxe6 ♙e5 23.♙f5+ gxf5 24.♙xd6 A convincing crush! **1-0**

David vs. Goliath

Peter Zhdanov
Chief Editor of Pogonina.com

In this entertaining column we are reviewing the most unexpected results that occurred last week. Players usually face opponents of a similar level. Considerably less frequent are situations when a significantly lower-rated player succeeds in beating a much stronger adversary.

The previous week brought us 16 upsets.

The number of moves ranges from 13 in Toncheva (1299) - Mladenov (1751), 1-0 to 76 in Roman (2006) - IM Pichot (2482), 1-0.

Most of us are particularly interested in seeing super GMs succumb to amateur players. Such upsets are extremely rare, but this time we have two of them to check out. Ex-FIDE World Champion Kasimdzhanov (2712) was dominating the rapid game against Jagodzinski (2273) only to hang a rook in one move and to resign. More instructive is the victory of IM Altini (2410) over GM Vachier-Lagrave (2765). White managed to outplay his formidable adversary and to eventually squeeze the full point out of the game.

A tragicomedy occurred in Beben (2132) vs GM Mista (2597). This is rapid chess, of course, yet still rather unbelievable:

Black to move. After a continuation like 35...Rf8 the game should be level. Instead Black blundered with the pseudo-active 35...Rde8? In reply to 36.Ng4 the GM decided not to give up the exchange by playing 36...Nh5. Is there a problem with this plan? 37.Nh6X happened! This is a mating pattern often seen in tactics books.

Top-10:

Benitez Galeano (1740) - Latorre (2297), 1-0, [557](#) points
Georgiev (1530) - Metev (2066), 1-0, [536](#) points
Abreu (1449) - Belsley (1978), 1-0, [529](#) points
Nelson (2231) - Varney (1746), 0-1, [485](#) points
Roman (2006) - Pichot (2482), 1-0, [476](#) points
Beben (2132) - Mista (2597), 1-0, [465](#) points
Toncheva (1299) - Mladenov (1751), 1-0, [452](#) points
Kasimdzhanov (2712) - Jagodzinski (2273), 0-1, [439](#) points
Repreza Perez (1867) - Diogo (2270), 1-0, [403](#) points
Mustedjeb (1671) - Tonchova (1299), 0-1, [372](#) points

Average gap: 471; White won 7 games, Black won 3 games.

You can view all the games in the accompanying pgn file.

If you have ever won a game against someone rated 300 points or above yourself, please send it to peter@pogonina.com for publication. Any additional information (a photo, annotations, etc.) is welcomed.

(3) Troff, Kayden W (2532)
- Sevian, Samuel (2531) [A34]

ch-USA 2015(6.4),
2015.04.07

Since I am currently playing a tournament, I prepared an interesting strategical game played in the recent US Championship by two young players, 16-years old and only 14-years old for the eventual winner of the game.

1.c4 Going for the English is not in Troff opening repertoire.

1...♟f6 2.♞c3 c5 Another surprise, as Sevian usually goes for an e5 setup.

3.g3 g6 4.♞g2 ♞g7 5.e3 An interesting small move aimed at playing for the center without letting Black play d5. [5.♟f3 5...d5]

5...O-O 6.♞ge2 e6 A strange but usual move. Black needs be ready to react on an eventual d4 by a later d5.

7.♟f4 White continues playing against d5. [7.d4 7...cxd4 8.exd4 d5 is considered to be equal.]

7...♞c6 8.O-O

8...d6 Not bad but also not the most natural way of playing. I think the best is [8...b6 and some unclear line might continue with 9.d4!? (9.b3 9...♞b7 10.♞b2 d5=) 9...♞b7 10.d5 (10.b3 10...cxd4 11.exd4 d5=) 10...♞a5 11.♞d3 g5! 12.♞fe2 ♞a6 13.b3 (13.e4 13...♞xc4 14.♞c2 ♞g4∞) 13...♞xd5 14.♞d1∞]

9.a3 I would have played the most principled 9.d4 but it is not clear if White has the advantage.

9...♞d7 10.♞b1 [10.b4 is also an option. 10...cxb4 11.axb4 ♞xb4 12.♞a3 a5 13.♞b3∞]

10...a5 11.d3 To continue the development by playing [11.b3 followed by Bb2 and probably d2-d4 in one move looks more logical to me.]

11...♞b8 12.♞b5 An interesting move but White was not forced to give the center. 12.b3 was still good.

12...d5! Black starts a series of strong positional moves.

13.b3 Taking the pawn was of course quite dangerous: [13.cxd5 13...♞xd5 14.♞xd5 exd5 15.♞xd5 ♞e5∞]

13...d4 14.exd4 ♞xd4 15.♞xd4 cxd4 16.b4 axb4 17.axb4

17...b5?! A standard move in this Benoni-like pawn structure but a bad move in this given position. It was much better to first exchange the light-squared bishops with complicated play. [17...♗c6! 18.♖e1 ♗xg2 19.♘xg2 ♘d7= (19...b5 20.♗g5!?)]

18.c5 ♖c7 19.♘e2 I like this move, played against the Bc6 threat. 19.Qf3 was also an option.

19...♘e8? I cannot understand this move, as now the black pieces are extremely uncoordinated. [19...e5 was of course a normal follow-up move. 20.♗g5 (20.f4!?) 20...♗c6 21.♗xf6 ♗xf6 22.♘c1!? ♖b7 23.♗xc6 ♖xc6 24.♘b3 ♖fe8 with a fighting position.]

20.♗b2 e5

21.f4± Logical and strong.

21...♖d8 22.fxe5 ♗g4 Searching for counterplay in a difficult position.

23.♖f4 h5 24.♗xd4!? Another way of playing was [24.♖c2 24...♗xe2 25.♖xe2 ♗xe5 26.♖e4 with no material up but strong pieces.]

24...♗h6 25.♗f2 [25.♖xg4! seems to be a better exchange sacrifice. For example: 25...hxg4 26.♗f2 ♖xe5 27.d4 ♖e7 28.♖d3 ♘c7 29.♘c3 and Black can't avoid the d-pawn push.]

25...♗xf4 26.gxf4 ♖d7 It is already not easy for White to prove a huge advantage.

27.c6 ♖xd3 28.♖xd3 ♖xd3

29.♘g3? Now White loses his whole advantage. It was necessary to play [29.♘d4! 29...♘c7 30.♗f1 ♖c3 31.♗e1 ♖a3 32.♘xb5 ♘xb5 33.♗xb5 ♖fa8 and visually White has all chances but with the best computer moves Black holds.]

29...♘c7 30.♘e4 ♗f3! An important exchange!

31.♘c5 ♖a3 32.♘d7 ♖c8 Black improved all his pieces during the 4-move journey of White's knight and has now taken the advantage.

33.♖c1 ♗xg2 34.♖xg2 ♘d5 35.f5 ♘f4+? Surely missing White's 37th move, as simply taking the pawn would have given Black a big advantage. [35...♘xb4+]]

36. ♖f1 ♘d3?!

37. ♘b6! Counterattacking!

37... ♖e8 38. ♖d1? [38. ♘d5! would pose Black in front of very big problems. 38... ♖f8! (38... ♘xc1 just loses to 39. ♘f6+ ♖f8 40. ♘c5+ ♖e7 41. c7 ♖a8 42. ♘d5+—) 39. ♖c2!? ♘xf2! 40. ♖xf2 ♖xe5! 41. c7 ♖xf5+ and Black saves himself because White's king cannot escape the checks. 42. ♖e2 ♖e5+=]

38... ♘xf2 39. ♖xf2 ♖c3 40. ♖d6 ♖xe5 Time control has been passed and a tough defensive job awaits White.

41. fxg6 ♖c2+ 42. ♖f3 ♖e6 43. gxf7+ ♖xf7 44. ♖d7+ ♖f6 45. ♘d5+ ♖e5 46. c7 ♖a6 Both players played the best moves so far but now White blunders.

47. ♖g3?? [47. h4 is a very tricky attempt. 47... ♖a8 48. ♖d8

♖a3+ 49. ♘e3 ♖xc7 50. ♖d5+ ♖f6 (50... ♖e6 seems to win but after 51. ♖xb5! ♖cc3 52. ♖b6+! it is difficult to hide from checks! 52... ♖e5 53. ♖b5+ ♖d6 (53... ♖d4 54. ♖d5#) 54. ♖b6+ ♖c7 55. ♖e6=) 51. ♖f5+ ♖g6 52. ♖g5+ ♖f7 53. ♖f4 and the fight continues!]

47... ♖d6 48. ♖d8 ♖xc7! 49. ♘xc7 [49. ♖xd6 49... ♖g7+! With White's king on f3 this important check didn't exist (Rf7+ Rf6!).]

49... ♖xd8—+ Now it is all over even if it took some time for Black to convert his advantage.

50. ♘xb5 ♖f5 51. ♘c7 ♖d3+ 52. ♖f2 ♖b3 53. ♘d5 ♖e5 54. ♘e7 ♖e6 55. ♘c6 ♖d6 56. ♘d4 ♖xb4 57. ♘f3 ♖e6 58. ♖g3 ♖f6 59. ♘h4 ♖g4+ 60. ♖h3 ♖f4 61. ♖g3 ♖g5 62. ♘f3+ ♖f5 63. ♘h4+ ♖e4 64. ♖h3 ♖g4 65. ♘f5 This stalemate trick is not enough!

65... ♖f4! 66. ♘d4 ♖g5 67. ♘f3+ ♖f6 68. ♘h4 ♖a4 69. ♖g3 ♖g5 70. ♘f3+ ♖f5 71. ♘h4+ ♖e4 72. ♘g2 ♖a3+ 73. ♖h4 ♖f3 74. ♘e1+ ♖f2 75. ♖xh5 ♖xe1 76. h4 ♖f2 77. ♖g6 ♖g3 78. h5 ♖g4 79. h6 ♖a6+ 80. ♖g7 ♖g5 81. h7 ♖a7+ 82. ♖g8 ♖g6 83. h8=♘+ ♖f6 0-1

Endgame section

(14) Korobov, Anton (2694)
- Khairullin, Ildar (2630)

Russian league,
2015.05.02

GM Csaba Balogh
Best rating: 2672

This time I have chosen a slightly different game for the endgame section. Although we reach an endgame a few moves later, we should rather consider this example like a tactical clash with unusual resources for both sides which ends in a draw after a dozen of only moves. White seems to be in huge trouble, because he is already 2 pawns down and he is pinned on the d-file. His only triumph, the c6 pawn, is well blockaded. However White survives after

34. ♖xe6! ♜xd1+ 35. ♖xd1 ♜xc4 36. ♖d8+! [36. ♖xc7? simply loses to 36... ♜xc6—+]

36... ♜h7

37. ♘f8+! This intermediate check serves to save the c6 pawn as well as the knight temporarily! [37. ♜xc7? is not enough, because the c-pawn can easily be stopped after 37... ♜xe6 38. ♜b7 ♘d5—+]

37... ♜h6 38. ♜xc7 Black is a pawn up, but the c-pawn is far advanced, which gives White enough compensation. His only chance to win the game is to win the knight!

38... ♜c5+! It is very important now to choose the right square for the king.

39. ♜h1! [The following line shows why the king has to stay on h1! 39. ♜h2? loses to 39... ♜xf8 40. ♜f4+ and now Black can hide his king with 40... ♜h7 because after 41. ♜f5+ ♜g8 42. c7 ♜d6+!—+ wins!]

39... ♜xf8 [39... ♘d5 is the alternative, but Black can hardly be better after 40. ♜xf7 ♜xc6 41. ♘e6 The white pieces are dominating, which gives enough compensation to secure the half point.]

40. ♜f4+ ♜g6! It was again Black's turn to find the only move! [40... ♜h7? loses to 41. ♜f5+! ♜g6 (41... ♜g8 42. c7+— there is no check on d6 now.) 42. ♜xf6 The general rule in queen endgames is that the quality of the pawns is more important than the quantity. Black is a pawn up, but the c6 pawn is the

main factor here. 42...♔c5 43.♚xf7+ ♔h6 44.c7 Black does not even have a perpetual check. 44...h4

45.♚d7! An ideal square for the queen. It supports the c7 pawn and protects the white king from the most important checks... 45...♚c1+ 46.♔h2 ♚f4+ 47.♔g1 ♚c1+ 48.♔f2 ♚c2+ 49.♔e3! ♚c1+ 50.♔e4!+- The king runs through the board and hides somewhere on b7-b8 or d8.]

41.g4! Another great and cold-blooded move! White is a piece and a pawn down and he simply plays g4! He creates the threat of Qf5 followed by g5 against which it is not easy to defend... And the c6 pawn is still there as a huge potential threat!

41...hxc4 42.fxg4 ♚d8 Black did not have anything better. [42...♚c5? loses to 43.♚f5+! An unexpected trade! 43...♚xf5 44.gxf5+ ♔xf5 45.c7+-]

43.♚f5+ ♔h6 44.g5+ ♔h5 45.gxf6+ White has won the piece back, but his king got exposed, which allows Black to give a perpetual.

45...g5! Yet another only move! [45...♔h6 loses to 46.♚d7! ♚xf6 47.♚h3+! ♔g6 48.c7! and Black loses because of the misplacement of his g6 king. It always stands in counterchecks. For instance 48...Qc6 moves into 49.Qg2! Or 48...♚a1+ 49.♔h2!+- and there are no more checks because Qa2, Qb2 or Qe5 are all met by counterchecks.]

46.♚d7 ♚xf6 47.c7 [A draw was agreed in view of 47.c7 47...♚f1+ with perpetual check.; The difference to the 45..Kh6 line is that after 47.♚h3+ 47...♔g6 the g5 pawn gives a shelter to the king and there is no countercheck on g2... 48.c7 ♚c6+ wins the c7 pawn.] **1/2-1/2**

**(15) Shirov, Alexei (2691)
- Kramnik, Vladimir (2783)**TCh-RUS Men 2015(1.1),
2015.05.01GM Arkadij Naiditsch
Best rating: 2737

Shirov is back! After an unlucky year in 2014, getting under 2700 ELO, with this nice win over Kramnik the former world Nr3 is once again in the live +2700 rating list. The game started very calmly with a Berlin with 5.Re1, which is usually a pretty drawish line, but strangely enough, Kramnik misplayed his equal position terribly and found himself in this very bad endgame. White is a clear pawn up and the black king on h8 has no squares, but in case Black manages to exchange the knights, the position might be a draw.

50.a3 A very safe move, as it is good to put the own pawns on the opposite colored squares of the enemy bishop.

50...♔g8 Black keeps on waiting.

51.♔f4 ♕b3 Now White needs to decide what to do next. It would be great to get the king to d8- it would finish the game in fact- but it seems to be impossible to cross the 5th rank

because the black bishop on b3 controls the a2-g8 diagonal.

52.♔g5 ♕d1 Of course the h5 pawn has to be protected.

53.♖c4 White is immediately going for the b6 pawn, but why be in such a hurry?! [White could have tried to first put his pieces perfectly: 53.h4 fixing the pawn on h5 which could be good for the future. 53...♕e2 54.♔g6 fixing the position of the black king even further. 54...b5 Black has nothing better, as 44...Bd1 45.Nc4 would lead to a similar position as in the game, just in a slightly better version for White. 55.♖c6 a4 56.♖d4 and White is winning a second pawn.]

53...♔f7

54.♖xb6 Black is 2 pawns down, but now the black pieces are more active and the bishop on f8 is very passive. The opposite color bishop endgame might still be a draw though.

54...♖d6 55.♖d5 ♖e4+ 56.♔h4 a4 Black is trying to be as solid as possible and asking White what's next. [If Kramnik only knew that the bishop endgame is lost, he would have played 56...♕f3 but of course his position would still be lost.]

57.♖c3 ♖xc3 Black has no choice.

58.bxc3 ♕e2 Not letting White play c4 immediately.

59. ♖g5 ♜e8 The black king has to be placed on d7, which is its perfect position.

60. h4 ♖d7 [An attempt to keep the bishop on f8 would lead nowhere: 60... ♜f7 61. ♖f5 and the white king moves to d6, after which Bh6-Bg5 will be possible.]

61. ♖f6 ♜c4 62. ♜h6 ♜e8 63. ♜f4 ♜f7

64. ♜g5 ♜b3 65. ♜e5 White is going to play c4.

65... ♜d7 66. ♜d4 ♜f7 67. ♜c5 Before playing c4, why not improve the position of the king?

67... ♜c7 68. c4 ♜e8 69. ♜d5 In case Black could somehow get the position with Bc6 and Kd7 and at the same time not allow White to put his king to b6 and pawn on c5, the position would be a draw, but it is too much to ask for...

69... ♜d7 [Black is also losing after 69... ♜c6+ 70. ♜e6! The white king gets to f8 and the black king is not in time to get to e8. 70... ♜e8 71. ♜f6 followed by Kg7-Kf8 and the game is over.]

70. c5

70... ♜g6 [Now after 70... ♜c7 71. ♜e6 is the right winning plan. 71... ♜c6 72. ♜e3 and once again Black can't do anything against the idea of Kf6-Kg7-Kf8.]

71. c6+ ♜c7 72. ♜f4+ Now White puts a second pawn on the 7th rank.

72... ♜c8 73. ♜e6

73... ♜f7+ The last check!

74. ♜f6 It is better not to take the poisoned bishop...

74... ♜e8 75. c7 ♜d7 76. ♜g7 A beautifully played endgame by Shirov, with the right evaluation of the opposite colored bishop endgame! **1-0**

Chess and the City. Manger comme un Dieu...

WGM Elisabeth Paetz
Best rating: 2493

France is not only well known for its excellent cuisine but also for its fantastic wines.

However, going to France as a chess player is usually connected to chess and not to abuse of wine and food. But doing both could sometimes be an option too....

Today the Top 12 is going to start in Montpellier. It is a women competition of 12 teams divided into 2 pools - A and B. The two top finishers of both pools will meet for the semi-final and final in the end of June for the French championship title.

The rules in France are very different compared to the German ones and in my opinion they are much more "nationalistic". Whereas a German women team could basically compete with 6 non-Germans, in the French league only one foreigner is allowed. This indicates that the championship itself is weaker, but the support of French players is more important.

My team is the team of Phillidor Mulhouse from Alsace, which managed to finish second last year, mainly blaming me for skipping the two final games. The team consists of me and 3 French girls: Mathilde Choisy, Emma Richard and Salomé Neuhauser. In the first round we will play against Monaco,

with the legend Pia Cramling on top board. When it comes to Pia, I already mentioned that she was my hero in the last world Championship and I am very excited to play against her again.

I will update you about all final results in my next newsletter.

Here are some pictorial impressions of the championship!

My team from left to right: Emma Richard, Mathilde Choisy, myself and Salomé Neuhauser

"Our team captain is not only a GM but also a quite talented chef" Jean Noel Riff alias Jiji

Clash of the Titans

(16) Smyslov, Vassily
- Geller, Efim P[E89]

URS-ch22 playoff-1pl(7), 1955

GM Kamil Miton
Best rating: 2655

1.d4 ♖f6 **2.c4** g6 **3.♗c3** ♕g7 **4.e4** d6 **5.f3** O-O **6.♘e3** e5 A typical fight for the center. Nowadays 6...c5 is also popular, which leads to the Benoni structures.

7.♗ge2 [7.d5]

7...c6 A tricky move which forces White to close the center.

8.d5 [8.♖d2 gives Black the opportunity to get counterplay after 8...exd4 9.♗xd4 d5! The white king is in the center, which is why this action is possible. 10.cxd5 cxd5 11.e5 ♗e8 12.f4 f6! 13.exf6 ♗xf6 14.♘e2 ♗c6 15.O-O ♖e8∞ and the pawn on f4 is badly placed, so Black has counterplay over the e-file.]

8...cxd5 **9.cxd5** ♗e8 Black is preparing the thematic plan

with f7-f5. [9...♗h5?! 10.g4 ♗f4 11.♗xf4 exf4 12.♘xf4 ♖b6 13.♖d2±]

10.♖d2 [10.g4 10...f5 (10...♘h6! A typical trick which helps Black solve the problems with his limited bishop.)]

10...f5

11.h3?! I don't like this move, which looks too slow. [11.O-O-O 11...♗f6 (11...fxe4 12.fxe4 ♘g4?! is not dangerous. 13.h3 ♘xe2 14.♘xe2± and the bishop will be activated over the h3-c8 diagonal.) 12.h3 fxe4 13.fxe4 ♗h5 (13...b5!? Because the e4 pawn is hanging Black can immediately get the initiative on the queenside.) 14.g3! limiting the black pieces. Less accurate is (14.g4 14...♗f4! 15.♗xf4 exf4 16.♘xf4 ♖b6↑ and thanks to this pawn sacrifice Black gets a strong bishop and the useful e5 square for the knight.) 14...♗d7 15.♖b1 ♗c5 16.♘g2 ♘d7 17.♖hf1 with complex play.]

11...♗d7 An interesting alternative for Black was [11...f4 12.♘f2 ♘f6! It is very important for Black to activate the bishop. 13.h4 (13.O-O-O 13...♘h4∞ 14.♘g1?! and the rook on h1 is dead.) 13...♗g7 14.O-O-O ♗h5 In case White plays Kb1-Nc1 Black will answer Ng3.]

12.g3 A rather strange move. Maybe White wanted to play Bg2 but it looks very artificial. More active was [12.O-O-O 12...fxe4 (12...♗df6 13.g4 ♘d7 (13...f4 14.♘f2 ♖f7 15.♖b1 ♘f8 16.♗c1

and White is clearly better thanks to his space advantage.)
 14.exf5 (14.♔b1 14...b5±) 14...gxf5 15.gxf5 ♖xf5 16.♘g3 ♗g6
 17.♗d3 White gets control of the light squares.) 13.fxe4 ♘ef6
 14.g4 b5 (14...♘c5 15.♘g3+=) 15.♘g3 (15.g5 15...b4 16.gxf6 bxc3
 17.♘xc3 ♘xf6∞) 15...a6 16.g5 ♘e8 17.♗e2

and again White has a stable advantage thanks to his space advantage. 17...♖f4!? This kind of idea can be interesting.
 18.♗xf4 exf4 19.♖xf4 ♘e5 with compensation!]

12...♘b6! Usually this is not a good place for the knight but in this case Black has a concrete idea.

13.b3 [13.♗f2!? deserves attention too. 13...♘c4 (13...♗f6 14.h4) 14.♖c1 (14.♖c2 14...♗h6 Xe3) 14...f4 15.g4 (15.b3 15...fxg3! and the f-file is weak now.) 15...♗d7 (15...♘e3

16.h4! (16.♗xe3 16...fxe3 17.♖xe3 ♗f6!±)) 16.h4 ♖c8 17.b3
 ♘e3 18.♗xe3 fxe3 19.♖xe3 ♖a5 with the idea Bf6-Bd8-Bb6
 and Black has full compensation.]

13...f4 Because after 13.b3 the a1-h8 diagonal is weaker Black is able to play this move.

14.gxf4 exf4 15.♗d4 [15.♘xf4 15...♖h4+ 16.♔d1 ♖xf4 17.♗xf4
 ♗xc3—+ This is the point of the 12...Nb6 idea.]

15...♘d7! A strong move, stopping the knight from coming to the useful e5 square.

16.h4 [16.♗xg7 16...♖h4+±]

16...♘e5 17.♗g2 ♗d7 18.♗f2 ♖c8 [18...♘f6?! 19.♘xf4 ♗h6
 20.♗e3]

19.♘d4 White managed to regroup his pieces and is preparing

Bh3, with the idea of exchanging bishops and getting the important e6 square.

19...♖a5 20.♞c1

20...♞c7! A good move. Black improved the last piece which was not placed perfectly, all the while setting a trap! [20...♞f6 21.♞h3!]

21.♞c2 [21.♞h3 doesn't work now because of 21...♞b5!! and Black is winning! 22.♞xd7 ♞xd4+]

21...♞a6 22.O-O ♞c5 [22...♞b4 also looks good. 23.♞ce2 ♞xc2 24.♞xc2 ♞xa2!]

23.♞ce2 [23.♞h1 23...♞cd3 24.♞g1 ♞d8!+]

23...♞xd2 24.♞xd2 It is typical that in case your pieces are placed perfectly then some concrete action comes automatically.

24...♞xe4! [24...♞cd3 25.♞e6+]

25.fxe4 f3 26.♞xf3 ♞xf3+ [Black could keep more pieces on the board after 26...♞xf3!+]

27.♞xf3 ♞xf3 28.♞xa7 The last practical chance is to grab the pawn. [28.♞d4 28...♞xf1+ 29.♞xf1 ♞h6!+ Of course Black keeps the bishop pair!]

28...♞h3 29.♞f2 White could try to defend the position actively. [29.♞f4 29...♞xh4 30.♞e6 ♞xe4 (30...♞xe6 31.dxe6 ♞g4+ 32.♞h1 ♞e5 33.♞d4+; 30...♞e5 31.♞df2 ♞xe6 32.dxe6 ♞xe4 33.♞f7; 30...♞h6!?) 31.♞xg7 ♞xg7 32.♞d4+ ♞g8 33.♞f6+]

29...♞e5 [29...♞h6!? forcing White to put the rook on b2.]

30.♞d4 [30.♞c1!? might have given White better chances. 30...♞f8 31.♞c7 ♞h2!+]

30...♞g4! A very strong move which allows Black to keep his active bishop, as otherwise White would have played Ne6!

31.♞e1 [31.♞e1 31...♞f4 32.♞b2 ♞h2+]

31...♞e3 32.♞f2 ♞xe4 33.♞e1?! ♞xe1+ 34.♞xe1 ♞c1 Black is winning very easily now after 35.Kf2 Bf6! **0-1**

Editorial Preface

The strong open in Nakhchivan had 2 winners and both are from Azerbaijan: Eltaj Safarli and Gadir Guseinov scored 7/9, but Safarli was declared the tournament winner on tiebreak.

The last stage of the FIDE Grand Prix - from where 2 players will qualify for the Candidates tournament that will determine the player who can challenge the current World Champion Magnus Carlsen - has begun in Khanty-Mansiysk. Currently Tomashevsky is leading the Grand Prix standings, which is a bit surprising, followed by Caruana and Nakamura, so this last stage promises to be very exciting. Tomashevsky had the best start with 1.5/2, and it could even have been 2/2 if he had converted a totally winning position against Grischuk. Both Caruana and Nakamura had a slow start with 2 draws.

One of the biggest chess news of the week is clearly the change of Caruana to the US chess federation, for which he is going to play in the next Olympiad in Baku 2016. The US team now has 3 players from the Top 10: Caruana, Nakamura and So, which makes them clear pretenders for the gold medal.

More good news is the fact that our good friend Natalia Pogonina has signed a contract with an application developer from Japan for Chess Heroz. For those of you who like to have chess fun on portable devices, you can find more details on this on the last pages of this newsletter.

This week Alexander Khalifman is taking a break because of his recent playing schedule, but he is already going to be back in the next issue with his usual outstanding opening article!

We hope enjoy your weekly issue of "Top GMs Secrets"!

Two best games of the past week

(1) Vachier Lagrave, Maxime (2754)
- Gelfand, Boris (2744) [B30]

KM FIDE GP 2015(1),
2015.05.14

GM Csaba Balogh
Best rating: 2672

The final stage of the Grand Prix series. We expect big fight for the two qualification places to the Candidates tournament. The main contenders are Tomashevsky, Caruana and Nakamura, but Gelfand and Jakovenko also have their chances.

1.e4 c5 2.Nf3 Nc6 Gelfand is heading towards his favorite Sicilian Sveshnikov defense, but Vachier Lagrave prefers to play the Rossolimo, the main alternative to avoid the main lines...

3.Nb5 e6 4.O-O Nge7 5.d4 This side line became popular since Caruana beat Gelfand in 2013. The most common moves are 5.Re1, 5.c3, 5.Nc3 or 5.b3.

5...cxd4 6.Nxd4 The character of the game has changed and now it is like an opened Sicilian. However both sides have a misplaced piece, the bishop on b5 is unnatural, since White does not want to take on c6, but the knight on e7 might also look a bit strange, since in most of the Sicilians it belongs to f6.

6...Ng6 7.Ne3 Ne7

8.Ne2! Regrouping of the misplaced bishop! White loses a tempo, but we can say, that the Ne7-g6 manoeuvre also drops a tempo compared to developing it simple to f6. White usually continues with c4, Nc3 aiming for space advantage and he did not want to exclude his bishop from the game by keeping it on b5.

8...O-O 9.Nc3 This is the prepared novelty of Vachier Lagrave. He wants to play a standard Sicilian (not a hedgehog type after 9.c4) and he hopes, that the knight on g6 is going to be misplaced in the future and he could make use of it with the f4-f5 attacking plan.

9...a6 Typical Sicilian move. Black takes control of the b5 square and intends to develop his bishop to the long diagonal with Nxd4 followed by b5-Bb7.

10.a4 Preventing the mentioned plan of Nxd4 and b5.

10...Kc7 11.Nb3 White wanted to play f4, but it did not work tactically. [11.f4 was strongly met by 11...Nc5! Suddenly White cannot really deal with the pin on the a7-g1 diagonal. Black is threatening to take on d4 and then on f4! 12.f5

12...♔e5! is a very nice motif! Black wins a pawn after all. 13.fxg6 hxg6! and Black wins back the sacrificed piece next move.]

11...b6 Another standard Sicilian move. White had the positional threat of pushing a5, squeezing Black on the queenside, therefore he prevents it and intends to develop his bishop to b7.

12.f4 ♘b7 This is the difference between having the knight on g6 and not on f6. With the knight on f6, Black must always count with e5, usually it is better to prevent it with d6, but with the knight on g6, e5 makes no sense because it can be effectively undermined by d6 or f6 and White's center falls apart. The only existing attacking idea is to push f5, but White must prepare for this break, otherwise Black simply installs his knight on e5 and he is doing completely fine.

13.♔d2 [13.f5 is premature because of 13...♞ge5; When I was following this game, I expected 13.♔e1 with the idea of f5 and on Nge5 Qg3, or the other point could be to attack the b6 pawn with Qf2. However this move has a drawback as well, that it leaves the c2 pawn unprotected 13...♞b4! 14.♔d2

14...f5! This is another big difference of having the knight on g6. Black suddenly launches strong counterplay on the long diagonal 15.exf5 ♞h4! and Black overtakes the initiative.]

13...♖ad8! I like this move a lot! The standard placement of this rook in this kind of opened Sicilians is on c8, but Gelfand must adopt his play to the new circumstances with the knight on g6 and he places his rooks to support different kind of central breaks with d5 or f5.

14.♞d3 Creating the hidden threat of Qf2, winning the b6 pawn. Black must react actively.

14...d5! Very well played by Gelfand! Black creates an isolated pawn and also closes his bishop on the long diagonal, but he gets very active pieceplay in exchange.

15.exd5 exd5 16.f5 Vachier Lagrave tries to refute Black's idea tactically. [Blockading the pawn with 16.♘d4 is met by 16...♙c5! followed by Rfe8 with strong pressure on the white pieces.; The most principled move was 16.♞e2

Trying to establish a blockade on the d4 square, keeping the b7 bishop locked. However Black has the very strong reply of 16...d4! a tempting pawn sacrifice with the idea of opening the long diagonal and creating threats against the g2 square. 17.♞bxd4 ♞h4! 18.♞f2 ♙c5 It is clear, that Black has huge compensation for the sacrificed pawn. 19.c3 ♞fe8 All the black pieces are standing perfectly. An illustrative line to demonstrate their power is 20.b4 ♙xd4 21.♙xd4 ♞xd4 22.♞xd4

22...♙xg2! 23.♞xg2 ♞xd4! and Nf3 forks the queen. It does

the job even if White takes on h7 and captures the rook with the queen.]

16...♞ge5

17.f6! ♙xf6 18.♞xf6! This exchange sacrifice was the point behind the last 2 moves. Otherwise White would have weakened his own squares, but now he wants to destroy Black's pawn structure in front of his king.

18...d4!? A very clever practical decision. Instead of accepting the sacrifice and entering into a very shaky position with unclear outcome, Gelfand prefers to simplify the position. After a forced line he ends up with a pawn down, but he gets excellent compensation (and a safe king's position), which will secure the draw. [Let's see, where the complications lead after 18...gxf6 19.♞f2! ♞xd3! (19...♞g4 seems to be strong at first sight, however White has an unpleasant intermediate move after 20.♞h4 ♞xh2+! 21.♞xh2 ♞xh2 this would be the point and Black forks with d4 next move, but White comes first with 22.♙xb6! and two pieces are hanging.) 20.cxd3 d4! White's main threats are on the kingside, but Black must also deal with the Bxb6 threat. (20...♞e5 21.♙xb6) 21.♞e4! (21.♞xd4 21...♞e5 is probably good for Black.) 21...dxe3 22.♞xf6+ ♙g7 (22...♙h8? loses to 23.♞f5 ♙g7 24.♞g5+ ♙h8 25.♞h6+—)

23. ♖h5+! leads to perpetual check. (23. ♕f5? is bad now in view of 23... ♕e5! White has only one check.) 23... ♔g8 (23... ♔g6 also leads to draw after 24. ♕f6+! ♔xh5 25. ♕f5+ ♔h6 26. ♕f6+=) 24. ♖f6+ (24. ♕f6? 24... ♕e5)]

19. ♖xc6! This desperado rook eliminates all the minor pieces. [19. ♖ff1? leads to very bad position after 19... dxe3 20. ♕xe3 ♖xd3 21. cxd3 ♖fe8± The material is balanced, but the black pieces are much better, d3 pawn is isolated and weak and the bishop is going to rule on the long diagonal.]

19... ♖xc6 White seems to end up and exchange down, but he had another tactical idea in mind, which actually gives him the material advantage...

20. ♖xd4! ♖xd4 21. ♕xd4 ♖xd4 22. ♕xh7+! ♔xh7 23. ♕xd4
This is the position which was foreseen long ago by both

players. White is a pawn up, but the bishop on b7 is a monster, clearly dominates the knight on c3.

23... ♖e8 [23... ♖d8 was also possible to occupy the opened file with tempo. Gelfand was probably afraid of losing the e-file, but it is not dangerous at all 24. ♕h4+ ♔g8 25. ♖e1 ♕c5+ 26. ♕f2 ♕b4= with full compensation for the pawn.]

24. ♖d1

24... ♖e6! Very important to treat the position actively, otherwise White might consolidate, trade queens and end up with a healthy extra pawn. It is important for Black to keep all 3 pieces on board to create his threats, he should only trade something if he gets some concrete benefits.

25. ♖d3 ♖g6 26. ♖g3 White eases the pressure on the g2 square. [The alternative was 26. ♖h3+ 26... ♔g8 27. ♖d5 ♕xd5! (27... ♕d6 28. c4! would be fine for White!) 28. ♕xd5 ♖d6! Qa8 is simple met by Rd8. Black gets enough compensation on the opponent's backrank and the c2 pawn. The key line goes with 29. ♕e4 ♕c5+ 30. ♔f1 ♖f6+ 31. ♖f3 ♕g5!= and Black cannot deal with the Qc1 threat, Rxf6 drops the b2 pawn after Qxf6. White does not have a good option to preserve his extra pawn.]

26... ♖xg3 27. ♕h4+ ♔g8 28. hxg3 [The problem of 28. ♕xg3 was 28... ♕c5+! King moves are met by Qf5! and 29. ♕f2 ♕b4!

leads to draw again. 30. ♖d1 ♙xa4 31. ♙xb6 ♙xc2=]

28... ♙c6 29. ♙d8+ ♔h7 30. ♙h4+ ♔g8 31. ♙d8+ ♔h7 32. ♙d3+ ♔g8 33. ♙d8+ Draw agreed! [It was possible to play on with 33. ♙e2 but there was no realistic hopes for an advantage. Black is too active, the bishop is much better than the knight and White cannot focus on making progress on the kingside, because his king and queen are tied to defend the kingside pawns. 33... ♙c5+ 34. ♔h2 g6= with an equal position.] **1/2-1/2**

(2) Dominguez Perez, Leinier (2734) - Jakovenko, Dmitry (2738) [D43]

KM FIDE GP 2015(2),
2015.05.15

GM Arkadij Naiditsch
Best rating: 2737

We are going to see a very fighting and interesting game. Right from the beginning the position got very sharp and it was hard to evaluate who was actually better. Just when it seemed like Black was taking over, Jakovenko made a clear miscalculation and was mercilessly punished in the tactical battle.

1.d4 ♘f6 2.c4 e6 3. ♘f3 d5 4. ♘c3 This is one of the most popular positions in high level chess at the moment and now Black has a lot of moves to choose from.

4...c6 Jakovenko chooses to go back to a Slav. He could also have played a Queen's gambit after 4...Be7, or a Ragozin after 4...Bb4.

5.g3 A very sharp line.

5...dxc4 The most critical move. Now the ideas are simple, Black is trying to hold on to the extra pawn on c4 and White is trying to get good play in the center.

6. ♗g2 ♘bd7 Black is preparing to play b5.

7.a4 This is a very usual way of avoiding b5.

7... ♗b4 This move is played to avoid White's e4 push, because now Black will have Bxc4 and Nxe4.

8.0-0 0-0 9. ♙c2 A very logical move, White is preparing to play e4.

9...♔e7 and black is preparing to answer e4 with e5. Another idea could be to play c5 somewhere, but then the white bishop on g2 would become very strong.

10.a5 White is not only trying to play a6 somewhere to destroy Black's pawn structure, but Ra4 could also be good at some point in the future.

10...e5 [10...a6 was possible too and now White would have to choose between Ra4 and maybe Rd1 e5, and we would be back to the position in the game.]

11.♖d1 A good move! White keeps the pressure in the center. [Another interesting try for White could have been 11.a6!? 11...bxa6 Of course Black has other options, but to let the a6 pawn alive is a dangerous choice. 12.dxe5 ♞xe5 13.♞xe5 ♔xe5 14.♟xc6 but maybe Black is just fine after 14...♟f5! and the position is probably close to equal.]

11...a6 A solid move, but maybe Black could have played a bit more directly. [11...exd4 doesn't look too bad. 12.♞xd4 ♞e5 13.a6 ♖d8 and Black's position is probably a bit worse, but nothing too dramatic.]

12.d5 Let the action begin!

12...♞c5 A very logical move, the black knight is going to b3. [Of course White would be much better after 12...♟xc3?

13.d6! ♔e8 14.bxc3 and the d6 pawn is a beast!; It also didn't make sense for Black to continue with 12...cxd5 13.♞xd5 ♞xd5 14.♖xd5 and White is simply better because the c4 pawn is going to fall very soon.]

13.♟e3 A solid move, but maybe White had a better choice. [Dominguez could have tried to first play d6 in order to avoid Qe8. 13.d6 13...♔e6 (13...♔e8 14.♞a4 and White's advantage seems to be clear.) 14.♟e3 and White's position is very active.]

13...♞b3

14.♖a4 Now we can see how useful the a5 move was.

14...c5 Probably the best move to get an open game! Of course it looks dangerous to have the Bb4 totally out of the game, but the rook on a4 is now passive too.

15.d6 The d-pawn is rolling.

15...♔e8 All Black needs is one move to play Nd4 next.

16.♖xb4! An excellent move! The d6 pawn will compensate the loss of the exchange.

16...cxb4 17.♞d5 ♞xd5 18.♖xd5 What a complicated position. White is a full exchange and a pawn down, but the d6 pawn is extremely strong and White also has the threat of just taking the e5 or c4 pawn, as well as to play Ng5 with some attack on the king.

18...♘d4?! A logical move, but probably not the best. [18...♙a4 19.♘g5 (19.♘xe5 19...♙e6 and of course the position remains very unclear, but Black's chances don't seem to be worse.) 19...g6 20.♙e4 and it is really hard to tell who is in charge here, as it is a material advantage against White's domination!]

19.♙xd4 Yet again I'm not sure this was the best move. [19.♘xd4 looks very logical. 19...exd4 20.♖xd4 Now the c4 pawn is hanging and in case White can take it, it is clear that he will have more than just compensation. 20...♙e6 21.♙xb7 ♙b5 (Black can't save the exchange with 21...♖a7

22.♖h4! with a double attack on a7 and h7.) 22.♙xa8 ♖xa8 and in my opinion White's position is clearly better, although of course Black keeps drawing chances.]

19...exd4 20.♖xd4 Another strange move in my opinion. [Why not take the pawn with the knight and open the g2 bishop?! 20.♘xd4]

20...b3! A good choice. Black is willing to give away both pawns, c4 and b4.

21.♙xc4 ♙e6 Now the b3 pawn could become very dangerous in the future.

22.♙d3 ♙c6 The position remains very complex, but now Black already has the more simple plan of playing Qc2 at some point.

23.♙d2 White continues playing very solid chess.

23...♖ac8?! [Better was 23...♙c2 24.♘g5 ♙b1+ 25.♙f1 ♙d7 with very unclear play.]

24.♘e1?! Both players seem to have missed the d7 move... [24.d7! was the right move. 24...♖cd8 (I guess both players missed the following line: 24...♙c1+ 25.♙f1 ♙xd2 and now White wins with the amazing 26.dxc8=♙!) 25.♘g5 and it is already White who is pushing for a win.]

24...♙c1 Of course! Entering an endgame is a good idea for Black.

25.f4 White's best chance.

25...Kb1?! This move is hard to understand... [After the simple 25...Kxd2 26.Rxd2 Rxc5 Black is better.]

26.Bf2 The white pieces are very safely placed.

26...Rc2? This is already a blunder. [26...Rfd8 leads to a worse, but playable position.]

27.Kb4! A strong move! White wants to play d7 and at the same time Be4.

27...Re8 [27...Kxb2 28.Nxc2 Kxc2 29.d7 and White is easily winning.]

28.Qe4 Black is lost!

28...Qg4 Jakovenko tries his last chance and creates some complications. **29.Nxc2** Perfect play by White.

29...bxc2

30.Qa4! and this move wins the game. The rook e8 and the pawn on c2 are hanging. The game is over.

30...Kf8 31.d7 Qxd7 [31...Rd8 32.Qb4+ Kg8 33.Qe7+-]

32.Rxd7 c1=Q All the moves were losing anyway...

33.Qa3+ Kg8 34.Qxb1 White is more than just a pawn up since the bishop on b1 is untouchable.

34...g6 [34...Kxb1 35.Qe7 and the game is over.]

35.Qb3 Qc5+ 36.e3 From being an exchange and a pawn down, White finds himself a full piece and a pawn up! All in all a very interesting game with some mistakes, but Jakovenko's 25...Qb1 is really hard to understand... **1-0**

David vs. Goliath

Peter Zhdanov

Chief Editor of Pogonina.com

In this entertaining column we are reviewing the most unexpected results that occurred last week. Players usually face opponents of a similar level. Considerably less frequent are situations when a significantly lower-rated player succeeds in beating a much stronger adversary.

The previous week brought us 23 upsets.

The number of moves ranges from 24 in Lakat (1802) - Darazs (2197), 1-0 to 103 in GM Khismatullin (2666) - Palchun (2288), 0-1.

The high-profile upsets this week are GM Khismatullin (2666) - Palchun (2288), 0-1, rapid chess; GM Alekseev (2653) - FM Gerasimov (2329), 0-1, blitz; GM Khismatullin (2650) - FM Murtazin (2342), 0-1; GM Romanov (2613) - Beradze (2310), 0-1.

In the "girl power" section Mari Muller (1887) deserves an honorary mention for beating WGM Sabrina Vega Gutierrez (2395) as Black. That's a 508 rating points difference!

A tragicomedy occurred in Normand (1721) - Dandin (2059):

Black to move. White has just played g4. Instead of the normal 36...Qg6 with mutual chances the Goliath went 36...d3?? (I wish more question marks were available) and received a neat checkmate -37.Qh5X.

Top-10:

Benitez Galeano (1740) - Latorre (2297), 1-0, [557](#) points
 Vega Gutierrez (2395) - Muller (1887), 0-1, [508](#) points
 Nelson (2231) - Varney (1746), 0-1, [485](#) points
 Roman (2006) - Pichot (2482), 1-0, [476](#) points
 Nicolas-Manceau (1611) - Richard (2083), 1-0, [472](#) points
 Nikolovski (2356) - Radenkovic (1908), 0-1, [448](#) points
 Radonjic (1928) - Vlatkovic (2361), 1-0, [433](#) points
 Lakat (1802) - Daracz (2197), 1-0, [395](#) points
 Sukovic (1775) - Anicic (2155), 1-0, [380](#) points
 Julien (2101) - Normand (1721), 0-1, [380](#) points

Average gap: 453; White won 6 games, Black won 4 games.

You can view all the games in the accompanying pgn file.

If you have ever won a game against someone rated 300 points or above yourself, please send it to peter@pogonina.com for publication. Any additional information (a photo, annotations, etc.) is welcomed.

(3) Tari, Aryan (2520)

- Agdestein, Simen (2620) [B04]

Scandinavian Masters 2015(2.3),
2015.05.11

After a first round loss, the 15-year old Norwegian player Aryan Tari needed a win to stay in contention for the only qualifying spot for Stavanger. Simen Agdestein was the country's long-time leader (before the Carlsen era obviously!) and became more and more active again lately.

1.e4 ♖f6 **2.e5** ♘d5 **3.d4** d6 **4.♗f3** c6 Not the most sound move. It seems like Black is trying to avoid his opponent's opening preparation. I think that in Alekhine's defence, Black should fight White's advanced center, so the main moves are 4...Bg4, 4... g6 or 4...dxe5.

5.c4 ♗c7

6.h3 Very safe and positional play but Black's strange start deserves to be refuted. [6.♗c3! is of course the critical move. 6...♗g4 White has two options to take the advantage now. (6...dxe5 7.♗xe5 g6 8.♗e2 ♗g7 9.♗e3 O-O 10.O-O+= White has a great game.) 7.♗e2 A logical development of the pieces. Both black moves now involve a pawn sacrifice but White gets great play. (7.exd6!? 7...exd6 8.h3 ♗h5 9.g4 ♗g6 10.♖b3 b6 (10...♖c8 11.♗h4! simply taking the bishop.) 11.♗g2+=) 7...♗xf3 (7...dxe5 8.♗xe5 ♗xe2 9.♖xe2 ♖xd4 This move should be tried but is refuted. 10.O-O± ♗d7 11.♗xf7! An important blow. 11...♗xf7 12.♖d1 ♖e5 13.♖xd7 ♖xe2 14.♗xe2 White wins a pawn. 14...♖c8 15.♗f4) 8.♗xf3 dxe5 9.d5 e6 10.♖b3 White crushes on the light squares.]

6...dxe5 7.♗xe5 g6 8.♗c3 ♗g7 9.♗f3 White has to retreat, so the position is around equal. [9.♗e3 9...O-O 10.♗e2 is now met by the strong 10...c5!]

9...O-O 10.♗e3

10...b5 Interesting play, but 10... Nd7 and then the central e5 break is still more to my taste.

11.♖d2 ♗a6 [11...bxc4 12.♗xc4 would be slightly better for White.]

12. ♖h6 The right idea. After Black's two queenside moves White logically plays on the kingside, but the best move was [12.h4!! 12...h5 (12...bxc4 13.h5 seems very dangerous.) 13. ♖h6 bxc4

14.g4!! Very nice. It is easy to find this at home with the fast confirmation of the engine but much more difficult to play it over the board. 14...hxc4 15.h5 gxf3 16. ♖xg7 ♖xg7 17.hxc6 ♖h8 18. ♖xh8 ♖xh8 19. ♖f4 White wins back the pawn and continues attacking the opponent's king.]

12...bxc4 13. ♖xg7 [13.h4 is already not that strong here. 13... ♖xh6 14. ♖xh6 f6! is safe.]

13... ♖xg7 14. ♖e5 ♖b5 Black's knight continues its long journey, but a central break was also possible. [14...c5! 15.dxc5 (15.d5 15... ♖d7! 16. ♖c6 ♖e8! and Black is even better.) 15... ♖xd2+ 16. ♖xd2 ♖e6 with a pretty equal endgame.]

15. ♖d1 ♖d6 16. ♖e2 f6 White's strong knight needs to be removed.

17. ♖g4 ♖d7

18. 0-0 The last moves were very logical and now the position is very unclear.

18... ♖b8 Black should have chosen a more central regrouping now with [18... ♖b6 followed by Qc7 and Rad8.]

19. ♖fe1 c5? Improving the structure but opening the center files for White's heavy pieces was not Black's wisest decision.

20. dxc5 ♖xc5 21. ♖e3+= ♖c8 22. ♖d5!? [22. ♖f1 Attacking e7 forces 22... ♖d3 23. ♖xd3 cxd3 24. ♖xa7 ♖a8 and any take on e7 would give Black some compensation, but not enough for equality.]

22...e5 [22... ♖f5 23. ♖a3 ♖d6 is maybe better but frankly very difficult to play. 24. ♖f1 e5 25.f4 with a position that only computers might save.]

23. ♖b4!? [23. ♖dxf6! The first miss of this strong move by

White. 23...♖xf6 24.♔d5! ♘d3 25.♙xd3 cxd3 26.♙xe5 ♘f7 27.♖xd8 ♘xe5 28.♖xc8 ♙xc8 29.♘e5 Black has a very nasty endgame to defend.]

23...cxb3 [23...♘f5 gives a defendable but not very enjoyable position. 24.♙a3 ♘d3 25.♙xd3 cxd3 26.♙xa6 ♙xd5 27.♘xf6! ♙d4 28.♘e4 ♙xb4 29.♙xd3 with a slight advantage for White.]

24.♙xa6 ♘xa6 25.♙xa7+ ♘c7 26.♘b6?! Now Black has only moves but equalizes comfortably. Maybe White missed that the exchange on f6 gives him some winning chances. [26.axb3 26...♘b5 27.♙a5 ♘d4 28.♘dxf6+=; 26.♘dxf6 26...♖xf6 27.♘xf6 ♙xf6 28.axb3+= Black has some trouble organizing his pieces and will surely lose his e-pawn.]

26...♖b8 27.♘c4 ♘b5! 28.♙c5 ♘e6! 29.♙e3 ♘bd4 [29...♙c7 30.♘cxe5! The same only move as in the game. 30...fxe5? (30...♘bd4! and we are back to the game.) 31.♔d7+! ♙xd7 32.♙xe5+ and White wins after 32...♙f7 33.♙f6+ ♙g8 34.♘h6#]

30.♘cxe5! The only move. In mutual time pressure, the rest of the game is pretty good.

30...♙c7 31.♖c1 ♙b7 [31...♙d6 32.♘xg6 hxg6 33.♙h6+ ♙g8 34.♙xg6+ ♘g7 35.♘h6+ ♙h8 36.axb3 can be dangerous only for Black.]

32.axb3 ♘f5 33.♙c3 ♖bc8 34.♙f3 ♙xf3 35.♘xf3 Only next two moves might be criticized but probably wouldn't have changed the result.

35...♘f4 [35...♖xc1 36.♖xc1 ♖b8 37.♖c3 ♖b7 followed by Nfd4 is almost a draw.]

36.♖xc8 Agreeing to a draw. White could still have pushed with a rook move like 36.Rcd1.

36...♖xc8 37.g3 ♘xh3+ 38.♙g2 ♘g5 39.♘xg5 fxg5 40.♘e3 ♘xe3+ 41.♖xe3 ♖b8 1/2-1/2

KM FIDE GP 2015(2),
2015.05.15

GM Arkadij Naiditsch
Best rating: 2737

After a very interesting game where both sides had their chances, we finally ended up in an endgame which at first sight looks like it might be winning for Black, but as usual, rook endgames are much more tricky than they seem to be!

48...d1=♔+ [Of course not 48...♖xd6?? 49.♗h8+! ♔xh8 50.e8=♔+ and White is winning.]

49.♔xd1 ♖xd6+ To go to the c-file or e-file is an easy decision...

50.♔e2 Of course! When the black kingside pawns will start to run, White will need his king to stop them.

50...♖e6+ 51.♔f3 and of course the white king is getting as close as possible to the middle of the board to prevent Black from pushing his pawns.

51...g5 A very difficult decision as now the black king will be cut from the pawns. Black had another interesting option: [51...♔g6! avoiding being cut off on the 6th rank. 52.♖b8 White needs to take the b6 pawn anyway, so why not to it right away?! 52...♖xe7 53.♖xb6+ and again Black has to choose where to go. 53...♔h5 (After 53...♔f5 54.♖b5 ♖e5 55.♖xa5 g5 White holds the position as well. 56.♖a8 g4+ 57.♔f2 h5 and White is in time to get good counterplay by pushing the a-pawn. 58.a5 h4 59.a6 and the game should end up in a draw.) 54.♖b5 g5 Black is trying to move as quickly as possible in direction of queening. 55.♖xc5 ♔h4 56.♖xa5 Now White is a pawn up, but the black pawns are much more advanced, which gives him a clear advantage. 56...g4+ 57.♔f2 h5 and now it is important for White to be extremely accurate to hold the position. 58.♖d5 The white rook is trying to come back to the first rank to help the white king in the defence. 58...g3+ Now there are a lot of different moves for White, but what is clear is that his position is very dangerous. 59.♔g1 ♖e1+ 60.♔g2 ♖e2+

61.♔g1 and actually here Black was winning if he played the logical 61...♔g4 with the idea of playing h4-h3. 62.♖d4+ ♔h3 63.♖d1 h4 64.c5 ♔g4 and White can't stop Black from playing h3-h2-Kh3. What this variation shows us is that in rook endgames it is usually to even give up a pawn in order to maximize the activity of your king.]

52.♖b8 Of course!

52...♖xe7 53.♖xb6 Now Black's only chance is to push the pawns as far as possible.

53...h5 54.♖c6 ♖f7+ [54...g4+ was not winning either. 55.♔f4 ♖f7+ 56.♔g3 and White is not afraid of Rf3. 56...♖f3+ 57.♔h4 ♖h3+ 58.♔g5 and the saving idea is yet again in having an active king. 58...g3 59.♖c7+ ♔g8 60.♔f6! and Black has nothing more than a draw here.]

55.♔g2 h4 The pawns are running, but White is in time to "clean" the board on the queenside.

56.♖xc5 ♔g6 57.♖xa5 g4 It is already too late for Black to try the Kh5-Kg4 idea.

58.♖a8! A strong move which combines 2 ideas: to check the black king from behind and at the same time support the advance of the a-pawn.

58...♖f3 This move leads to a draw, but Black already didn't have anything better.

59.♖g8+ ♔f5 60.♖f8+ ♔e4 61.♖e8+ Chasing the black king away from the pawns.

61...♔f4 62.♖f8+ ♔e3 63.♖e8+ ♔d2 and now that the black king is 3 squares away, White starts the attack on the pawns.

64.♖g8 Of course other moves would be a draw as well, but this is the most simple one.

64...h3+ 65.♔h2 The black pawns are stopped so the position is just a draw. **65...♖f2+**

66.♔h1 Not falling for Black's last trap... [White could still

have lost after 66.♔g1? 66...♖g2+ 67.♔h1 g3 68.a5 and the black king is just moving to f1. 68...♔e2 White can't do anything against the Kf1 and Rh2 mate threat.]

66...♖f1+ 67.♔h2 ♜f2+ 68.♔h1 An interesting draw after a great fighting game and of course a pity for Jobava that he missed quite good winning chances by playing the premature g5 and not Kg6. It would have been very interesting to watch whether Maxime would find a way to hold this difficult rook endgame. **1/2-1/2**

(15) Andreikin, Dmitry (2723) - Potapov, Pavel (2471)

Russian league,
2015.05.06

GM Csaba Balogh
Best rating: 2672

White has a perfect Stonewall. Black is missing his dark squared bishop and he fails to control the h2-b8 diagonal. He is left instead with the typically poor c8 bishop, which has no mobility because of his own pawns. Another very important factor is the rooks on board. White controls the only opened file and invading to the seventh rank is always hanging in the air. All these facts guarantee a huge advantage for White, but the win still requires some technique. Please note how Andreikin improves his position with each move by simple advancing one of his pawns.

27.b3! White restricts the movement of the knight by taking control over the c4 and a4 squares. [White does not achieve anything by the immediate 27.♖c7 because after 27...♘a8! he is forced to retreat on the c-file, since 28.♖e7 is met by 28...♖f7! 29.♖e8+ ♜f8 forcing the trade of the rooks, which seriously increases Black's defensive chances.]

27...♞a8 Black tries to control the c7 square, but of course it is quite a poor place for the knight. [27...♞d7 is already met by 28.♞c7 preventing the trade of rooks with Rc8 by attacking the b7 pawn. 28...♞c6 drops a pawn after 29.♞xa6!]

28.a4! Gaining space and further squeezing the knight. White is threatening with a5-b4, locking the knight forever to the corner.

28...b6 Black temporarily prevents a5, but it does not solve the problems.

29.b4! ♞b7 Black controls all the invading squares on the c-file and he wants to trade off the rooks. However, the a8 knight remains trapped, the only question is if White able to break through on the kingside or not.

30.b5! a5 White has achieved the maximum on the queenside. Black successfully controls all the important squares, but it ties up all his pieces. Therefore it is logical, that White must make progress on the kingside. [30...axb5 31.♞xb5 is even worse, because White is threatening with Bd7 and (31.axb5 is also possible, because White have the option of playing Ra2-a7.) 31...♞c8 loses to 32.♞xc8+ ♞xc8 33.♞c6+- The destiny of the knight comes true.]

31.g4! g6 The only chance is the keep the position locked. The capture outward the center on g4 seriously improves White's

structure and also opens the position for the two bishops.

32.♞g2! It is time to bring the king into the game. It has a beautiful entrance to the Black's camp along the dark squares.

32...♞f7 [Here was a chance for Black to trade rooks, however as we will see the endgame is completely hopeless after 32...♞c8 33.♞g3 ♞xc2 34.♞xc2 ♞f7]

35.♞h4! There is a clear path for the white king towards the h6 square. Black could only block it with his king, but a bishop check on e5 sends it to wrong square again... 35...♞g7 36.♞e5+ ♞f7 (36...♞h6 37.g5#) 37.♞g5 ♞c8 Black ran out of moves. He can only wait with bishop moves. One of the winning plans for White is 38.♞d1 ♞d7 39.♞f3 Keeping an eye on the d5 pawn in order to threat with gxf5. Black can only take back with the g-pawn then, but it creates new problems... 39...♞c8 40.gxf5 gxf5 41.♞h6 ♞g8 42.♞h5! A new diagonal has opened where White is going to penetrate. 42...♞d7 43.h4 Black is in zugzwang! He is forced to allow the bishop to e8. 43...♞c8 44.♞e8+-]

33.♞g3 ♞h8 Black probably wanted to meet the Kh4-g5-h6 plan by h6, but White sends the rook away.

34.♞e5 ♞g8 35.h4! White continues making progress on the kingside. He is ready to play Kf4-g5-h6, which will force Black

create another weakening with h6. He still does not have anything better than waiting. ..

35...♘c8 36.f3 Another small improvement. White sometimes wants to drop his rook to the h-file, let's say with Kf4, h5-hxg6 and Rh2-h7 is decisive.

36...♘b7 37.♔f4!

37...h6 Otherwise Kg5-h6 wins, but now the black pawn chain has been damaged. White immediately makes use of it.

38.h5! White critically weakens the f5 pawn!

38...g5+ 39.♔g3 ♘c8 [Opening the f-file with 39...fxg4 40.fxg4+- followed by Rf2-f6 is over!]

40.♖c6! After the black structure has lost its stability, White is ready to penetrate along the 6th rank. 41. gxf5 is the direct threat.

40...♘d7 This loses material on the spot, but other moves were equally hopeless. [40...fxg4 41.fxg4 ♘d7 42.♖c2! White has provoked the capture on g4, therefore he retreats with his rook. 42...♖c8 White has many good moves here, one of the wins is 43.♘g6+ ♔g8 (Or 43...♔e7 44.♖xc8 ♘xc8 45.♘g7+- wins.) 44.♖xc8+ ♘xc8 45.♘e8 Black cannot prevent Bc6, trapping the knight. Even after 45...♘b7 46.♘c6! ♘xc6 47.bxc6+- and c7 next wins.]

41.♖d6! ♔e7 42.gxf5 Black resigned! A nice squeezing by Andreikin. **1-0**

Chess and the City. From hell to heaven...

The French qualification tournament eventually came to an end and I am happy to announce that my team managed to win it with 8-1 match points. As I mentioned previously, the team competition consisted of 2 pools and the other pool was won by the team of Bischwiller deploying Lela Javakhishvili on the top board. In the upcoming final we initially face the team of Clichy, likely playing with Kosteniuk or Skripchenko on the top board. These developments sound pretty nice, however, I cannot claim to have contributed too much to the overall team result, given that my individual performance was nothing short of disappointing, to put it politely...

It is a common experience for every professional player to have a very unlucky period, and personally I can say that every event after the World Championship held in Sochi was characterized by rather frustrating performances.

Clearly, it is very important to find a way out of this loop, and thus recover from the "bad shape", but unfortunately there is no common recipe which can guarantee success on these matters. My attempt was maybe predictable, in that I went back to Italy...well I must say that I did not do that because I was eager to face again the cultural clash that I

described in a previous article, but more plainly to enjoy the benefits of its wonderful attractions. In particular my latest Italian experience brought me to the beautiful city of Gaeta, in the Lazio region (that is the region of Rome). My mood was immediately boosted by the warm weather, the sunny beaches, the endless sea, some nice wine and unforgettably tasty seafood. In one word, it was paradise. However, whether this state of beatitude will persist and help me achieve a good result in the upcoming European Women's Championship is still to be seen...

What can be said for sure is that chess can be a very cruel, albeit alluring, game, and to face the hardships that it can bring is fundamental to achieve any long-term success.

Below are some pictures of my personal attempt to solve this problem. You are warmly encouraged to seek (and find) your own solutions to this common problem....

The view from our room was breathtaking...

Seawater can wash tears away...

...and bring back a smile :)

1.c4 e6 2.g3 d5 3.♘g2 dxc4 4.♚a4+

4...♚d7!? A very rare move. The main moves are [4...c6 5.♚xc4 b5 6.♚c2 ♘b7 and the evaluation of this setup depends on whether Black manages to push c5 and activate the bishop on b7.; 4...♘d7 5.♚xc4 c5 6.♘f3 ♘gf6 7.♚b3 (7.O-O is less accurate because of 7...b6! and Black is on time with developing the bishop on the most important diagonal in this structure. In case 8.Ne5 there is Nxe5! and the queen is hanging.) 7...♚b8 preparing b6-Bb7. 8.d3 ♘d6 Otherwise White would play Bf4. 9.a4 with Na3-Nc4 next and White has a chance to keep a small advantage.; 4...♘d7 5.♚xc4 ♘c6 6.♘f3+]=]

5.♚xc4 c5 6.♘a3 This way of development is not new. The knight goes to c4 but in case the queen is placed on d7 it deserves attention to launch quick play in the center, for example: [6.♘f3 6...♘c6 (6...b5 7.♘e5! Otherwise Black has Bb7 and is fine.) 7.O-O b6 (7...♘f6 8.♘c3 ♘e7 9.♚d1

9...e5 (9...♘d4 10.♘xd4 cxd4 11.♘b5+—; 9...O-O 10.d4!) 10.e3! White follows the plan! 10...O-O 11.d4 and after the exchanges in the center the white pieces become more active.) 8.d4 ♘b7 9.dxc5 ♘xc5 10.♘c3 ♘f6 11.♚d1 ♚e7 (11...♚c7 12.♘f4 e5 13.♘xe5 ♘xe5 14.♚a4+!) 12.♘g5 with the unpleasant threat Ne4. White keeps the initiative.]

6...♘c6 7.♚b5 a6 Black could have played the interesting [7...♘d4!? 8.♚xd7+ ♘xd7 9.♘xb7 ♚b8 10.♘g2 c4! ♚11.♘f3 ♘xf3+ 12.♘xf3 ♘xa3 13.bxa3 ♘f6 and because he has the control over the b-file Black's position is very good.]

8.♘xc6!? This exchange changes the character of position a bit. White creates weaknesses but at the cost of his strong bishop. [8.♚a4 8...♚b8 preparing b5-Bb7.]

8...bxc6 [8...axb5 9.♘xb5!]

9.♚a4 ♚b8 10.♘f3 [10.♘c4 10...♚b4 11.♚c2 ♚d5—+]

10...f6 A typical move. Black is going to take more space in the center and activate his light squared bishop.

11.d3 [11.♔c2 This move doesn't stop Ne7-Nd5. 11...♘e7! 12.♙xc5 ♘d5 with c5-Bb7 next and Black gets a strong initiative.]

11...♘e7 12.♘c4 e5

13.♙d2! ♘d5 14.♙a5 A good place for the bishop. White can control the b4-d8 squares now and prevents the possible maneuver Nc7-Ne6!

14...♙e7

15.e4! Usually this move can be risky because of the weak pawn on d3 but in this case White's idea is very concrete.

15...♘b4 [15...♘c7 16.♙xc7! ♙xc7 17.♘fd2 and without the knight black is not able to exploit the weaknesses on the d-file. White's strategical advantage is clear.]

16.O-O-O and now the knight on b4 is riskily placed.

16...♙g4 [16...O-O 17.a3 (17.♘b6 17...♙g4 18.♘xc8 ♙xc8 19.♘e1 c4! gives Black counterplay.) 17...♘xd3+ (17...♘d5!? 18.exd5 cxd5 19.♙xd7 ♙xd7 20.♘e3 ♙e6 Black only has a pawn for the piece but from a practical point of view thanks to his strong center, the bishop pair and the pressure over the b-file Black has some compensation.) 18.♙c2 ♙g4 19.♙xd3 ♙xe4 20.♙e1 ♙g6 and Black keeps some initiative over the light squares.]

17.♘e1 ♙d7 18.a3 ♘d5 Black manages to save the knight.

19.♙c2 ♙b5

20.f3 [20.exd5 20...cxd5 21.♘e3 ♙e6 22.♙d2 O-O 23.♙b1 ♙fb8 24.♙c1 ♙b3 25.♙a1 ♙a4 with strong pressure.]

20...♙e6? More accurate was [20...♙h5! and now White is not able to play Ng2 because the pawn is hanging. 21.exd5 (21.g4 doesn't look good because it weakens the f4 square.) 21...cxd5 22.a4 ♙b7 23.♘b6 ♙e6=24.b4 ♙f7! with the idea that after 25.bxc5 Black plays Bxc5! 25.♙b2 c4 with complex play]

21. ♖g2 0-0

22. ♖he1! White nicely improved his pieces and will soon be ready to take on d5!

22... ♖fb8 [22... ♖f7 23.f4 exf4 24.exd5 cxd5 25. ♖xe7 ♖xe7 26. ♖e1 ♕e6 27. ♖xf4 dxc4 28. ♖xe6 ♖f7 29. ♕c3 cxd3 30. ♖xd3 The white pieces are very well coordinated, which is why Black's position is worse.]

23.f4! ♕f8? [23... ♕d6 Maybe it was the last chance to support the e5 pawn. 24.fxe5 fxe5 25.exd5 cxd5 26. ♖f4 (26. ♕c3 26... dxc4 27.dxc4 ♖5b6 28. ♖e3 with a clear advantage for White because of the weaknesses on d5 and e5.) 26... ♖h6 27. ♕c3 exf4 28. ♖xd6 f3+ 29. ♖b1 ♖xd6 30. ♕e5 ♖c6 31. ♕xb8 ♖xb8 and thanks to the pawn on f3 Black is still in the game.]

24.fxe5 fxe5 25.exd5 cxd5 26. ♖f4 White is winning very easily now since all of his pieces are very active. [26. ♖xe5 26... ♖c6 27. ♖f4 dxc4 28. ♖xc4+ ♖h8 29. ♕c3 and now the black king is in trouble.]

26... ♖h6 27. ♖xe5 dxc4 [27... ♕g4 28. ♖xd5 ♕xd1 29. ♖xd1 ♖xh2 30. ♖e2 ♖xg3 31. ♕c7+—]

28. ♖h5 ♖f6 29. ♕c3 The most human move. White could also win after [29.dxc4 29... ♖xb2+ (29... ♖xb2 30. ♖xh7+ ♖f7 31. ♖xd7+ ♖e8 32. ♖dd5 ♖b1+ 33. ♖xb1 ♖xb1+ 34. ♖xb1+—)]

30. ♖xb2 ♖xb2 31. ♖xd7 ♖b1+ 32. ♖c2 ♖8b2+ 33. ♖d3 ♖d1+ 34. ♖c3!+—]

29... ♖f7 30.dxc4 g6

31. ♖xd7! A practical move because this bishop can be activated over f5.

31... ♖xd7 32. ♖xg6 ♖5b6 33. ♖xf8 ♖xf8 34. ♖xh7 ♖g4 1-0

HEROZ AI x mobile
JAPAN

Natalia Pogonina,
the Vice Women's World Chess Champion, becomes
the official ambassador of "CHESS HEROZ".

Tokyo (HEROZ, Inc.) - HEROZ, Inc. ("HEROZ"), providing mobile applications with Artificial Intelligence (AI), and Natalia Pogonina ("Natalia"), who is the Vice Women's World Chess Champion, have mutually agreed to popularize Chess through a mobile app, "CHESS HEROZ". From here on, Natalia Pogonina will be the official partner of HEROZ.

Natalia is a chess grandmaster and one of the best female chess players in the world. Since 2004 she has been a member of Team Russia and is the reigning Olympic Women's Chess Champion.

AI x mobile as the key concept, HEROZ takes on the challenge in the world stage, providing mobile applications with AI function such as Shogi Wars (Japanese Chess app) and other new apps in various fields. CHESS HEROZ is one new app released in 2014 with the world-class AI function, allowing online match-ups all around the world. Thanks to all chess players, fans and users, CHESS HEROZ has been featured in more than 50 countries, including Russia, US, UK, Germany and India etc, at the Google Play Store and at the App Store.

HEROZ has been impressed by Natalia's charm, wisdom and fighting spirit. She does her best to excel in every chess tournament and to share with people all over the world the joy of playing the game. Natalia, at the same time, also appreciates HEROZ's concept and way of thinking, which is how the agreement has come into effect.

From here on, Natalia will support CHESS HEROZ activities as the official ambassador. She will be online in CHESS HEROZ and look forward to playing with you. Some activities featuring Natalia will be announced in advance so that you can actually challenge her or see her in the app.

■ Natalia's comment

I am thrilled to become the official ambassador of CHESS HEROZ. I really love this app, which enables one to enjoy playing chess against people all over the world. Together we are planning some events, such as BLITZ marathon, so that chess

fans could challenge me to a game during a predetermined period.

■ About Natalia Pogonina

Born on March 9, 1985. A chess grandmaster and one of the best female chess players in the world. Since 2004 she has been a member of Team Russia.

Some of Natalia's main tournament results:

World Women's Chess Championship: silver (2015)

European Women's Chess Championship: bronze (2009)

Russian Women's Chess Superfinal: gold (2012), silver (2010), bronze (2013)

International Women's Chess Olympiad: gold (2014, 2012)

World Women's Team Chess Championship: silver (2015, 2011), bronze (2013)

European Women's Team Chess Championship: gold (2011), silver (2013)

European Women's Chess Club Cup: gold (2011), silver (2013, 2007)

Winner of Moscow Open (2009), Rudenko Memorial (2007), Bykova Memorial (2005), Lvov Young Hopes (2002) and other international chess tournaments.

■ About CHESS HEROZ

CHESS HEROZ is a chess app that provides comfortable, speedy and free online match-ups with the use of world-class AI. With fantastic graphics and clean user interface, it allows players to play with anyone anywhere around the world. It has been featured globally at the Google Play Store and the App Store.

App Name: CHESS HEROZ

Price: free (optional item charging)

Compatibility: iOS 7.0 or after (iPhone or iPad), Android 2.3 or after

Apple AppStore:

◇ Solutions	32

Editorial Preface

Clearly the main event of the week is the last stage of the FIDE Grand Prix in Khanty-Mansisk, from where 2 players will qualify to the Candidates, but there are also two other big events under way.

The very strong Chinese league is currently being played, with all the top Chinese players participating in it. There are a lot of interesting games and a lot of new and very talented players who are more or less unknown to the rest of the world.

In Batumi, the Women's European Championship is under way. After 3 rounds, there are 4 players on 3/3, but what is a bit strange is that none of the big favorites had a 100% start. But anyway, it is just the beginning of the event and things will heat up towards the end.

FIDE GRAND PRIX:

Tomashevsky started as a big favorite to qualify for the Candidates, and actually for him it would probably even have been enough to just finish 50% to qualify, but currently things are running badly for him with, as he is on 2.5/7.

Caruana is stealing the show. He is playing great fighting chess and is the deserved leader with 5/7, which guarantees him a position in the Candidates. The fight for 2nd place is very tough. Maybe it will be Nakamura, who is on 4/7, but Karjakin is also on a very good 4.5/7. Jakovenko also still has his chances in case of a good finish, as he is now on 3.5/7.

And Grischuk also remains in the game, but he needs to start winning, as he is currently on 3/7. Four extremely exciting final rounds await us here!

Until then, enjoy the best moments of the last week!

Two best games of the past week

(1) **Karjakin, Sergey (2753)**
- **Jobava, Baadur (2699) [C10]**

KM FIDE GP 2015(7.3),
2015.05.21

GM Arkadij Naiditsch
Best rating: 2737

And as usual in Jobava's games the craziness is guaranteed! This time the Georgian Nr 1 chooses the French defense, but a very rare line. The game quickly gets out of control as Jobava sacrifices an exchange. The position is very sharp, but it should be better for White. Not too at ease in the complications, Karjakin goes for an endgame with more or less equal material and this wonderful fighting game ends in a draw. A fun game is awaiting us!

1.e4 Usually Jobava is playing the Caro Cann

1...e6 2.d4 d5 3.♘c3 ♘c6 A rare continuation. Of course 3...Bb4, 3...Nf6 or 3...dxe4 are the 3 main moves.

4.e5 Karjakin closes the center in order to make the knight on c6 look a bit stupid. Black's idea should of course be to play c5 somewhere and now it is just impossible.

4...♞ge7 This move is not that easy to understand. Black does not really want to play Nf5 and now the typical f6 push is not that efficient any longer.

5.♞f3 ♟d7 Black still keeps on waiting.

6.♞e2 A natural move, but a bit slow. [White had the interesting idea 6.h4!? preparing to react with g4 after Black's Nf5.]

6...♞f5 Black sees the moment and wants to exchange his own knight, which is a very natural decision. In a passive position it is usually a good idea to exchange some pieces.

7.♞g3 ♞h4 Of course not 7...Nxg3 because after 8.hxg3 the white rook would come into the game.

8.c3 This move has to be played anyway since the d4 pawn has to be protected.

8...g6!? A very smart move! Black is not letting White play Nh5, where it would fix the black pawn structure.

9.♟f4 Clearly missing Black's next move... [9.♟d2 looks better.]

9...f6! A very inventive and strong move, which only works because the white bishop is on f4.

10.♞xh4 [Of course after 10.exf6 10...♞xf6 Black is just better.; White had the funny try 10.♞h5 but now after 10...fxe5 (10...gxh5 11.♞xh4 and White is winning because Qxh5 is coming.) 11.♞xe5 ♟d6 the position is very unclear.]

10...fxe5 11.♞xg6 What a sharp position!

11...hxg6 12.dxe5 White is a pawn up, but suddenly all the black pieces are in the game.

12...♔h4 Another good move. Black is preparing to castle queenside.

13.♘e2 Another strange decision by Karjakin. [Why not first play 13.♔d2 preventing 0-0-0 and threatening to play Bg5.]

13...0-0-0 A logical move, but maybe Black had an even better continuation. [Black could have put White in front of direct problems after 13...♘g7 14.♘g3 It seems like it is difficult to find another way to defend the e5 pawn. 14...♔e7 15.f4 and now Black continues with the active play with 15...g5! and White's position is very close to falling apart.]

14.♔d2 ♖h5 Jobava continues playing "crazy chess" when it is not really needed. [14...♘e7 looks much more solid, with the idea of playing Rf8 next or maybe now Rh5.]

15.♘g3 White needs to go for it.

15...♔xe5+ This move is already a must after Rh5 was played.

16.♘xe5 ♘xe5 So, what can we say about this position? White is a full exchange up, but the white king is still in the center and the black bishop from f8 will soon come to h6. It is a very hard position to evaluate, but usually having some extra material is a good thing...

17.♔e3! A very strong move! White is not only attacking the e5 knight but also the a7 pawn, so the black knight has to leave its perfect position on e5.

17...♘c6 18.♘b5 Of course! The exchange of any piece is good for White.

18...♘h6 19.♔e2 So, what to do next for Black?! Jobava shows us!

19...e5! A very strong move! There is no time to waste, Black needs to push all he can into the direction of the white king.

20.♖d1 Once again Karjakin plays the most logical move and it seems like it is very difficult for Black to find a good way of defending the d5 pawn, but again Jobava shows us how creative chess can be...

20...a6! A wonderful move! Black gives another pawn just to keep his center alive!

21.♘xa6 [After 21.♘xc6 21...♘xc6 the position would remain very unclear, since the black bishop pair compensates for being an exchange down.]

21...♘e7 Wonderful play by black. Now the bishop on a6 is already hanging and the d5 pawn is protected. [Of course Black is just losing after 21...bxa6? 22.♔xa6+ ♔b8 23.♖xd5 and White is winning because of the Rb5 threat.]

22.♘b5 Karjakin is trying to choose the safest moves. [Of course the critical line is 22.♘d3 22...e4 23.♘c2 ♘g4!? Black is opening the position of the white king. 24.f3 ♘f4! Another very strong move! The position is very complicated!]

22...c6

23.♙xe5?! Karjakin prefers entering a slightly worse endgame than to remain in the complications.

23...♘f4 [Black could have played 23...cxb5 24.♖d4 ♙g5 25.♙xg5 ♘xg5 and I believe that only Black can be a bit better here.]

24.♖d4 ♘xe5 25.♖xh4 cxb5 So we are in an endgame. Black has 2 pieces for a rook and 2 pawns, so the material is about even, but Black still has the bishop pair, so in case the position remained open, the bishops might dominate the game.

26.O-O Well, it's a bit late for castling... :)

26...♙c7 Black brings his king to the center.

27.♖e1 ♙d6 It is not easy at all for White to find the right move here.

28.♖h7 Maybe a good practical choice! At least the rook on h7 is nicely placed.

28...♘c6 [Black could also have continued with 28...♖e8]

29.♖d1 preparing Ne4.

29...♙e6 30.♖e1 White is trying to repeat the moves and of course this is very logical, especially since Karjakin was not too ambitious during the game.

30...♙d6 and Jobava is also happy with a draw- but why?! [Why not play 30...♙f6 I really cannot imagine Black having any problems here. White needs to be very careful not to let Black play b4, or maybe Bb8 followed by Ne5 and Nc4. I think that Black's position here might be slightly better.]

31.♖d1 ♙e6 32.♖e1 A slightly disappointing draw after such a great fighting game, and of course a lot of credit goes to Jobava for his amazingly creative play! **1/2-1/2**

(2) Nakamura, Hikaru (2799) - Vachier Lagrave, Maxime (2754) [A45]

KM FIDE GP 2015(7),
2015.05.21

GM Csaba Balogh
Best rating: 2672

Vachier Lagrave is in a terrible shape in the last stage of the Grand Prix series, but still it does not take anything away from the following very convincing win of Nakamura.

1.d4 ♘f6 **2.♙f4** A rare attempt by White to avoid the Gruenfeld defense. To be honest, I am not exactly sure how White wanted to react if Vachier continued playing in Gruenfeld style and fianchettoes his bishop to g7. Nakamura will hopefully show us in the near future in another game...

2...b6 3.c4 ♗b7 4.♘c3 e6 We have reached a Queen's Indian type of structure. A small psychological victory for Nakamura, that he managed to avoid the Gruenfeld.

5.a3 A very useful move. White prevents the most natural developing move Bb4, which would transpose to a kind of Nimzo Indian defense.

5...d5 6.e3 ♗d6

7.♙g5! White pins the knight, but the main idea is to keep the healthy pawn structure. [7.♙xd6 is a positional mistake, because after 7...cxd6 followed by the exchange of the d5 for the c4 pawn, we reach a more or less symmetrical position with completely even chances.; 7.♙g3 was the alternative with the idea to improve the pawn structure with hxg3 in case of the exchange, but the text move looks much more threatening.]

7...h6 [If Black tries to unpin himself with 7...♙e7 8.♙a4+! ♘bd7

White has a typical way to achieve a solid structural advantage with 9.♙xf6! It is important to take on f6 before cxd5 to avoid the knight's recapture... 9...♙xf6 10.cxd5 exd5 11.♙a6!+= This is the key! Without the light squared bishops, the d5 pawn and queenside becomes vulnerable!]

8.♙xf6 White gives up the bishop pair, but he gets big positional benefits in exchange.

8...♙xf6 9.cxd5 A very important follow-up to the previous move! White fixes the structure to limit the movement of the black bishops! Otherwise Black would have taken on c4 and later pushed c5, opening up the position.

9...exd5

10. ♔a4+! A very unpleasant check to deal with! Black has 4 moves, but all of them have a big drawback.

10... ♖f8 A sad response, but it is difficult to suggest something clever...Black does not want to commit any positional mistake on the queenside and he intends to castle kingside artificially with g6-Kg7. [10... ♘d7 allows the trade of the light squared bishops: 11. ♗b5 11.Ba6 is also good, but this is an even better version. 11... ♔e6 12. ♗c6+; 10... ♗c6 11. ♗b5+; 10...c6 This should be the right move positionally. Black strengthens his center and saves his light squared bishop. However it does not work tactically because 11. ♘xd5! wins a pawn!]

11.g3! Another great positional move! Nakamura fianchettoes his bishop and provokes the c6 move, which closes the b7 bishop and allows White to open the game effectively with e4 afterwards... White's plans are clear, but Black cannot really fight against them.

11...c6 12. ♗g2 g6 13. ♘ge2 White finishes the development before executing the break with e4.

13... ♔g7 14.O-O ♔d8 Vachier Lagrave leaves from the e4 dxe4 Nxe4 tempo, but of course it is coming anyway.

15.e4! This is another standard break in various different openings with the same structure. White explodes the center and opens his own bishop, which makes the c6 pawn more vulnerable. Before this move both light squared bishops were locked, but now only the one on b7 remains out of the game.

15...dxe4 16. ♘xe4 I have seen this structure in many games, but with the white bishop on a2 and the e2 knight on f3. That one is also very dangerous for Black, because White is launching a strong attack with Ne5!

16... ♖e8

17. ♖ad1! The start of the next plan! The black queenside is completely undeveloped, while on the other side of the board, all white pieces are ready for the action. In such cases, the further opening of the position with an eventual d5 could be

decisive. As we will see, Nakamura had another tricky move in his mind.

17...♖a6 Black tries to establish a blockade on the d5 square with the Nc7-d5 manoeuvre.

18.♘2c3! Supporting the d5 break!

18...♘c7 [18...♙f8 leaves from the trap which happened in the game, but it has different problems: 19.d5! cxd5 20.♘xd5! ♙xd5 21.♘c3!± White wins back the material with excellent circumstances.]

19.♘c5!! The hidden point of the 17.Rad1 move! The pin on the d-file creates serious problems for Black. Black has no choice, he must accept the sacrifice, but White gains back the material right away.

19...bxc5 [19...♙xc5 is even worse in view of 20.dxc5 ♔e7 21.cxb6 axb6 22.♔d4+- winning the b6 pawn.]

20.dxc5 ♘d5 The only move to at least keep the material balance!

21.cxd6 ♔xd6

22.♘e4! Perfect play by Nakamura! The new target is the extremely poor bishop on b7. White is going to install his knight on c5. [22.♘xd5 22...cxd5 is also better for White. He could double his rooks on the d-file to put pressure on the d5 weakness and also the distant passer on the queenside is a plus. However, the text move is even stronger.]

22...♔e5 23.♔c1! Yet another subtle positional move! White really wants to get his knight to c5 and he avoids any kind of tactical ideas. [On the direct 23.♘c5 Black wanted to easeen his position with 23...♘c3! 24.bxc3 ♔xc5 25.♔d7 White keeps a clear advantage, but there is no reason to easeen Black's defensive task with exchanges.]

23...♘b6 Black wanted to free his a8 rook by sending away the queen from the attack of the a7 square.

24.♔b4 ♔ad8 25.♘c5 The only inaccuracy by White in the entire game. [25.♔ce1! was actual ly even stronger. Black has problems with the pin. If he moves away with the queen, Qc3 could be decisive and after 25...♔d4

26. ♖d6!! is a very nice win! 26... ♖xb4 (26... ♗xd6 27. ♗xd6 ♖xd6 28. ♖xe8+-) 27. ♖xe8+!+- This intermediate check wins decisive material.]

25... ♖d4? A blunder, but Black was much worse anyway. [The only move was 25... ♗a8 but of course White's advantage is undisputable with such a piece on a8.]

26. ♗c3 ♗c8 27. ♖ce1 Black resigned as he loses big material. A great game by Nakamura! **1-0**

The K-Files. Anti-Dutch 2.d3

GM Alexander Khalifman
FIDE World Chess Champion (1999)
Best rating: 2702

(3) Anti-Dutch 2.d3 [A04]

In the last few years we can see the renaissance of the Leningrad Dutch. The list of players who use it on a more or less regular basis is headed by Caruana, Nakamura,, Mamedyarov, Ivanchuk, Svidler, Ponomarev... - enough I guess. So it's no surprise that it quickly comes into fashion on practically all levels. The reasons in my opinion (except the above-mentioned list) are quite clear:

- 1) In most cases it leads to sharp asymmetrical positions
 - 2) Black's play is almost always strategically clear and easy to understand
 - 3) The theory is still not very much developed. This is hard to believe in the 21st century but it is true - just compare it to the Gruenfeld or King's Indian for example
 - 4) The computers quite often clearly misevaluate the resulting positions assuming that f7-f5 is a clear weakening and give White a massive plus without any real reason for it.
- And so on...

It must be added that top players nowadays not only play 1 or 2 main lines with White against the Leningrad Dutch but try almost everything including some obscure sidelines. It's actually exactly what they do against "normal" openings like QGD, Slav, Gruenfeld etc. In my opinion this is clear proof that the status of this opening system has totally changed. But - enough advertising the Leningrad Dutch for Black, especially because it's not the subject of this article. But if someone is quite impressed by what is written above and would like to think about including the Leningrad Dutch in their opening repertoire I can only recommend the new and excellent book by Malaniuk and Marusenko. Kindermann's book on this subject is also a good one but already a bit outdated. This is no surprise - it happens to all good opening books. For some strange reason only bad opening books never get outdated. =)

1. ♘f3 And the subject of this article is some poisonous move order to avoid the Leningrad Dutch. Not something new but still quite unexplored.

1...f5 I have to admit that the move order I would like to offer is not really an universal way to avoid the Leningrad Dutch. Black can also try to play it starting with 1...g6 or 1...d6 (or even 1...c6 - which looks pretty exotic but was still regularly used by GM Anic). In all these cases Black should consider 2.e4 (e2-e4 to avoid the Dutch is possible also on move 1 but that's another story, of course). One more important detail is that after 1.Nf3 f5 2. d4 all these pawn moves are not the main move order (which is certainly 2... Nf6) and thus have some drawbacks. They are not deadly but Black must know exactly what he would do, for instance, in case of

[1...g6 2.d4 f5 3.h4!? (3...c3 3...f6 4.g5 g7 is not so dangerous for Black.) 3...c3!? 4.h5; 1...d6 2.d4 f5 3.c3!? 4.g5 4...bd7 (4...d5!?) 5.♖d3; 1...c6 2.d4 f5 3.f4 In this case Aronian's setup might be quite annoying. 3...f6 4.e3 g6 5.b2 g7 6.d3 d6 7.h3+= Dorfman - Anic, Cannes 1995]

2.d3!? This is the delayed Lisitsin Gambit (also invented by maestro Lisitsin, by the way). The idea is very simple and radical: White prepares e2-e4 to disturb Black's development immediately. [The "normal" Lisitsin gambit is 2.e4 2...fxe4 3.g5 It can also be a good surprise weapon, especially in quick time controls. But beware: now almost everyone who plays Dutch knows how to meet it properly. In fact Black has several ways to good play. The simplest one in my opinion is 3...e5 (The greedy 3...f6 4.d3 exd3? is White's main hope. 5.fxd3 with a huge advantage already. We'll look at this position later as it can also be reached with the move order 2.d3 Nf6 3.e4 fxe4 4.dxe4 Nxe4 5.Bd3 Nf6 6. Ng5.) 4.d3 (4.d4 4...exd4 5.fxe4 4...c6 6.fxc4 Rohde - Castro, Philadelphia 1990 6...d5! 7.♖h5+ g6 8.♖xd5 ♖xd5 9.fxd5 f5= and it's already White who has to play accurately.; 4.fxe4 4...c6 5.f5 f6+= leads to some weird version of the Schliemann Gambit in the Ruy Lopez (with the white knight on b1 instead of f3) where Black is perfectly fine. (Bjarnason - Hjartarson, Reykjavik 1979)) 4...e3 5.fxe3 d5 6.d4 (6.f4 6...exf4 7.fxf4

5.f6 8.fxd6 ♖xd6+= Tolonen - Kiltti, Vasa 1996) 6...exd4 7.♖xd4 4...c6 8.♖h4 Rohde - Palatnik, Philadelphia 1992 (8.f5 8...f6 9.c3 Schmitz - Stock corr 1989 9...d6 10.fxc6+ bxc6=) 8...h6 9.c3 f5 10.♖h5+ g6 11.♖e2 4...xe3 12.♖xe3+ f7=]

2...c6 is one of two critical answers. Black prepares e7-e5.

[2...f6 Quite surprisingly this is the most popular answer even in the 21st century. Not on the high level, of course (but as a matter of fact it was played by Nakamura and Beliavsky). However, in my opinion this move is clearly second-rate. White easily reaches a comfortable advantage in all the lines. 3.e4 Of course Black didn't prevent this move. 3...d6 This is the way to get a Leningrad type position but in fact this is a very dubious version of it. (

a) 3...e5 leads to a rather dubious version of the Latvian Gambit (even when the Latvian Gambit itself is not the most sound opening). 4.fxe5 ♖e7 (4...f5 5.d4± Paavilainen - Pyhala, Helsinki 1988) 5.f3 fxe4 6.dxe4 ♖xe4+ (6...f6 7.f2 c6 8.O-O ♖f7 9.fbd2±) 7.f2 f6+ 8.fbd2 ♖e7 9.O-O O-O 10.a3 f5 11.b4 f6 Rothen - Aaberg, Sweden 1996 12.f2± White is clearly ahead in development and has good attacking chances.;

b) 3...fxe4 4.dxe4 fxe4 (4...e5 5.fxe5 (5.fxc4!?) 5...♖e7

6.♘f3 - 3...e5) 5.♙d3 ♘f6 (5...d5 is relatively the best but the endgame after 6.♙xe4 dxe4 7.♖xd8+ ♔xd8 8.♘g5 ♙e8 9.♘c3+= is very pleasant for White. (Keene - Keogh. Ybbs 1968); 5...♘c5? (Franke - Lange, Germany 1978) just loses instantly due to 6.♘e5! ♘xd3+ 7.cxd3+-) 6.♘g5 This is the dream position of the Lisitsin Gambit. Black has to play precisely to avoid immediate trouble.

6...g6 (6...e5 7.♙xh7+- Geveke - Storm, Germany 1983; 6...c6 7.O-O d6 8.♙xh7 ♘xh7 9.♖h5+ ♔d7 10.♘f7 ♖e8 11.♖g6!± Barle - Titova, Pula 1999; 6...d6 7.♙xh7 ♘xh7 8.♖h5+ ♔d7 9.♘f7 ♖e8 10.♖g4+ e6 11.♘xh8+- Nikolaou - Matakoudis, Greece 1998) 7.h4 d5 (7...d6 8.h5 gxh5 9.♙xh7± Lisitsin - Krogus, Leningrad 1949) 8.h5 ♙g4 9.f3 ♙xh5 10.g4 (10.♘c3!? might be even stronger.) 10...♖d6 11.gxh5 ♙h6 Salgado - Gonzalez, Spain 1999 12.♖d2! ♘xh5 13.♘c3± and the piece must be stronger than 3 pawns here.)

4.exf5 ♙xf5 5.d4 This loss of a tempo doesn't matter as the pawn structure is favorable for White. 5...g6 (5...♘c6 6.d5 ♘b4 7.♘d4 ♖d7 8.c4 c5 9.dxc6 bxc6 10.a3 ♘a6 11.♘xf5 ♖xf5 Dudukin - Korobov, I Russia 2007 12.♙e2±) 6.♙d3 This exchange is always good for White in this structure since e6 is a chronic weakness. 6...♖d7 7.O-O ♙g7 8.♙xf5 ♖xf5 9.c4 O-O 10.♘c3+= This is most probably the best Black can reach after 2...Nf6 but still no dream at all. White has a

nice positional advantage and it's hard to organise adequate counterplay. (Mertanen - Koskinen, Finland 2000); 2...d5 prevents an immediate e2-e4 but that's the only merit of this move. White just gets a very pleasant anti-Stonewall structure and still wants to organise e2-e4 after completing the development. 3.c4!? e6 (

a) After 3...dxc4 4.d4!?± this QGA with the extra move f7-f5 looks really disgusting for Black.;

b) 3...d4 Playing a 4 pawns attack versus the King's Indian with one tempo down is also more than risky. 4.e3 c5 (4...♘c6 5.exd4 ♘xd4 6.♘xd4 ♖xd4 7.♘c3±) 5.exd4 cxd4 6.g3 ♘c6 7.♙g2 e5 8.O-O ♙d6 9.♖e1 and Black just doesn't have time to complete his development. The e5 pawn is very weak. 9...♘f6 (9...♘ge7 10.c5 ♙c7 11.♖b3 ♘a5 12.♖a3±) 10.♘xe5± Rorato - Reginato, Italy 2009;

c) 3...c6 4.♘bd2+=)

4.g3 ♘f6 5.♙g2 c6 6.O-O ♙e7 with the bishop on e7 the plan of playing Nc3-e4 doesn't work properly but White also has another way to prepare e2-e4. (6...♙d6 7.♘c3 O-O 8.e4 dxe4 9.dxe4 e5 (9...♙b4 10.exf5 ♖xd1 exf5 12.♙d2± Vayser - Savchur, corr 2010) 10.♖b3 ♖b6 11.♖c2 fxe4 12.♘g5 ♘a6 13.a3± Me - Ivanov, corr 2009) 7.b3 O-O 8.♙b2 a5 9.a3 ♘a6 10.♘bd2 ♘g4 11.♖c2 ♙f6 12.♙xf6 (12.e4!?) 12...♖xf6 13.d4+= Damljanovic - Moskalenko, Barcelona 2005; 2...g6 Black simply ignores the opponent's intentions. It doesn't seem to be a good idea. 3.e4 fxe4 (3...d6 - 2...d6) 4.dxe4 ♙g7 5.♙c4 e6 6.O-O± Space advantage, development lead and good chances to attack the opponent's weakened king's position - White has almost everything one can dream of. (Bayat - Bourigault, Budapest 2003); 2...d6 is another critical line which will be analyzed in part 2.]

3.d4!? In my opinion only this unusual move first played in

the game Roiz - Wojtaszek, Warsaw 2005, can create certain problems for Black. It looks like White just lost a tempo, which contradicts the basic opening principles. However, now the black knight is quite misplaced on c6 and White intends to win the lost tempo back with d4-d5, gaining some space at the same time. So Black has to do something against this positional threat. [3.e4 is now possible but doesn't bring the desired result after the natural answer 3...e5 4.♘c3 (

a) 4.d4 leads to the well-known Vienna Game position with reversed colors (it's exactly the same as 1.e4 e5 2.Nc3 Nf6 3. f4 d5). This is good enough for equal chances but not more. The main line goes now 4...fxe4 5.♗xe5 ♗f6 and here White has a choice between 6.♙c4 (6.♗c3; 6.♙e2);

b) 4.♙e2 promises nothing after 4...♗f6 5.exf5 d6 is more accurate than (5...d5 6.♗h4 Liemann - Cooke, Dortmund 1993 6...♗d4 7.♙h5+ ♗xh5 8.♙xh5+ ♗d7 9.♙g5 ♙e8 10.♙d1 ♗c6 11.♗d2) 6.♗h4 (6.d4 6...♙xf5=) 6...♙e7 7.♙h5+ ♗xh5 8.♙xh5+ ♗d7 9.♗f3 ♙e8 10.♙g4 ♗d8 and despite the rather strange position of his king and queen, Black is not worse here.;

c) 4.g3 is not dangerous at all after the natural moves 4...fxe4 5.dxe4 ♗f6 6.♙g2 ♙c5 7.O-O O-O 8.♗c3 d6= Demidov - Hauge. Prague 2015)

4...♗f6 5.exf5 (5.♙g5 5...♙b4 6.♙e2 fxe4 7.dxe4 ♙xc3+ 8.bxc3 h6=) 5...d5 6.d4 (6.♗h4 (Hecht - Hollig, Germany 1975) now gives nothing because of 6...d4!? 7.♗e2 ♗d5!) 6...exd4 7.♗xd4 ♗xd4 8.♙xd4 ♙xf5 This position is quite similar to one we will see later in the 2...d6 line, but here the black pawn is on d5 (not d6) and this makes a big difference. 9.♙f4 indirectly defending the c2 pawn. (Ferretti - Cherin, Italy 2006) (9.♙g5 Ambitious but risky. 9...♙xc2 10.♙c1 ♙g6 11.♙xf6 ♙xf6 12.♙e3+ (12.♙xf6 12...gxf6 13.♗xd5 O-O-O) 12...♙e7!

A cold shower... (After 12...♙f7? the nice combination 13.♗xd5! ♙b4+ 14.♗xb4 ♙he8 15.♙c4+ ♙f8 16.O-O! ♙xe3 17.fxe3± brought White a decisive advantage in Taimaniv - Zaichik, Leningrad 1989.) 13.♙xe7+ ♙xe7 14.♗xd5+ ♙d7=+ and White has to defend a very unpleasant endgame.) 9...♙e7 (9...♙xc2? 10.♙c1 ♙f5 11.♗b5±) 10.O-O-O O-O 11.♗xd5 ♗xd5 12.♙xd5+ ♙xd5 13.♙xd5 ♙e6 14.♙e5 ♙xf4 15.♙xe6 ♙g5= and the drawish outcome is very close.]

3...d6 This move was not played often before but in my opinion it is still quite critical for the whole line, especially if Black plans to play the Leningrad Dutch. Now he's always ready to meet d4-d5 with Nc6-e5, and if White chooses a quiet development he will get a Leningrad with Nc6 (not the most solid subvariation, of course), but with an extra tempo for Black, which makes it perfectly playable. Also e7-e5 must be considered at any moment. So in order to reach something tangible White has to find some concrete reaction. [3...e6 This is the most popular answer. Now the game usually transforms into a Stonewall with the extra move Nb8-c6 for Black. Good or...? In fact, I'm not so sure that this extra move is really useful. Of course I know that Botvinnik, Smyslov and Spassky played Nb8-c6 in a normal Stonewall, but still. Now this setup doesn't look flexible enough. One important thing about the resulting positions is that in most cases White would avoid developing his queenside knight to d2. Now d5 is not defended as solidly as it is when Black has a pawn on c6, so in most cases the white knight is good on c3. 4.g3 ♗f6 (4...d5 5.c4 It's necessary to meet d7-d5 with the immediate c2-c4 because otherwise White can have some difficulties preparing this move. (5.♙g2 5...♙b8 6.O-O ♗f6∞) 5...dxc4 6.♙a4 ♙d5 7.♗c3 ♙b4 8.♙d2 ♙xc3 9.bxc3) 5.♙g2 (5.c4 makes Black's life a bit easier. 5...♙b4+ By exchanging his dark-squared bishop Black gains time to castle and prepare e6-e5. 6.♗bd2 (6.♙d2

6...♙xd2+ 7.♚xd2 O-O 8.♙g2 d6 9.O-O e5=) 6...O-O 7.♙g2 d6 8.O-O ♙xd2 9.♙xd2 e5∞) 5...♙e7 (

a) 5...g6 The last attempt to reach a Leningrad type of position which was not tried before. White must react precisely. 6.c4 ♙g7 (6...d6 7.d5 ♘e5 8.♘d4 ♙g7 9.♘c3 O-O 10.♚b3+=) 7.d5! (After the normal 7.♘c3 7...O-O 8.O-O d6 9.d5 ♘e5= Black has good counterplay due to the extra move e7-e6 compared to the usual positions from the Leningrad with 7...Nc6.) 7...♘a5 8.♘a3 seems to be a strange square for the knight but Black's problem is that the knight on a5 is even more misplaced and always in danger. 8...b6 9.O-O O-O 10.♙f4+=;

b) 5...d5 6.c4 is necessary once again - see note to 4...d5. (6.O-O 6...♚b8!? Fressinet - Christiansen, Tromso 2013 (6...b5!? 7.a4 b4 8.c4 bxc3 9.♘xc3 ♚b8) 7.♚d3 (7.b3 7...b5 8.c4 bxc4 9.bxc4 dxc4∞) 7...b5=) 6...dxc4 (6...♚b8 7.b3+=) 7.♚a4+=)

6.O-O O-O 7.c4 d5 (7...d6 8.d5 ♘e5 de Schampheleire - Froeyman, Belgium 2013 9.♚b3+=) 8.b3 (8.cxd5!? This is not the most usual exchange in a normal Stonewall but here it looks interesting as the d5 pawn is not protected enough due to the c6 knight. 8...exd5 9.♘c3+=) 8...♙d7 9.♙b2+=; 3...d5 Now if White plays g3 and Bg2 the game will most probably switch back to the 3...e6 line but he also has a very promising plan which clearly underlines that the advantage of the extra moves Nb8-c6 is very questionable. 4.♙f4 e6 5.e3 ♙d6 6.c4 ♘f6 7.♘c3+= Krasenkov - Moskalenko, Hoogeveen 2013]

4.d5 [4.c4 4...e5 5.d5 ♘ce7∞]

4...♘e5 5.♘c3 White prepares e2-e4 to open the center and make use of his development lead. [5.♘xe5 5...dxe5 6.e4 e6∞ Zaragatski - Nijboer, Holland 2014; 5.c4 5...♘f6 6.♘c3 g6 7.♘xe5 dxe5 8.g3 ♙g7=; 5.♙f4 5...♘g6 6.e3 c6 7.c4 ♘f6 8.♘c3

♘xf4 9.exf4 g6 10.♙d3 ♙g7 11.O-O O-O 12.♚e1 ♚e8 13.♘g5 ♙d7 14.♚c1 cxd5 15.cxd5 ♚a5∞]

5...♘f6 [5...e6 6.e4 exd5 7.exd5 ♚e7 8.♙b5+ c6 9.♙e2 ♘xf3+ 10.gxf3!; 5...♘xf3+ 6.exf3 e5 7.dxe6 ♙xe6 8.♙d3±]

6.e4!? Still! In my opinion it's the only way to prove that 3...d6 doesn't solve the opening problems.

6...fxe4 7.♘xe5 dxe5 8.♙b5+ An important detail. The point of this check is that the black bishop is better on c8 than on d7. [8.♙c4 8...a6 (8...c6!? 9.dxc6 ♚xd1+ 10.♘xd1 bxc6) 9.♙e3 (9.h3 9...b5 10.♙b3 b4) 9...♚d6 10.h3 b5 11.♙b3 ♙b7=]

8...♙d7 9.♙c4 A very interesting new position. Black has an extra pawn and one can't say that his triple pawns are very weak (at least for now). But at the same time he has certain development problems and the white key pawn on d5 seriously limits the opponent's options. I believe that White's compensation is at least enough but certainly practical tests are required.

9...a6 [9...♙f5 10.♙e3 a6 - 9...a6; 9...c6 10.dxc6 ♙xc6 11.♚e2!]

10.♙e3 [It's not the best moment for the prophylactical 10.h3 10...b5 11.♙b3 c5 12.dxc6 ♙xc6=]

10...♙f5 [10...g6 looks more in the spirit of the Leningrad Dutch, but still after 11.h3 ♙g7 12.O-O O-O 13.a4 ♚h8 14.♚e2

h6 15.a5☞White has good compensation and many ways to increase his queenside pressure.; 10...♗g4 11.♔d2 e6 trying to get read of the annoying d5 pawn. But White has the strong answer 12.h3 exd5 13.♘xd5 ♗h5 14.♗g5 ♗e7 15.♗xf6 ♗xf6 16.♔b4↑and suddenly Black's king is very vulnerable.]

11.h3 ♔d6 [11...h5 stopping g4 but White has another resource: 12.♔d2 ♔d6 13.O-O-O O-O-O 14.♘a4☞]

12.g4 ♗g6 13.♔e2☞ and White has fantastic compensation for the pawn.

David vs. Goliath

Peter Zhdanov

Chief Editor of Pogonina.com

In this entertaining column we are reviewing the most unexpected results that occurred last week. Players usually face opponents of a similar level. Considerably less frequent are situations when a significantly lower-rated player succeeds in beating a much stronger adversary.

The previous week brought us 15 upsets.

The number of moves ranges from 22 in Abrahamsson (1887) - FM Sagit (2360), 1-0 to 62 in Becuwe (2083) - FM Di Nicolantonio (2414), 1-0 and Duessler (2063) - WGM Foisor (2398), 1-0.

The high-profile encounters that deserve a mention are GM Vovk (2629) - FM Schulz (2300), 0-1 and a blitz game Choukri (2231) - GM Van Wely (2653), 1-0.

A very dramatic and spectacular ending occurred in Persson (1984) - FM Dragicevic (2304), 1-0:

Black to move. 33...♘f4 is simply winning: White has to play 35.♔xc4, but after the multi-purpose move 35...♔xf5 White is toast. What did Dragicevic overlook? Was it some sort of optical blunder, for example, forgetting that after 33...♘f4 34.exf6? ♘xe2 35.f7+ doesn't lead to mate because of the capture on d4? Anyway, the game continued cooperatively with **33...♖b2?? 34.exf6! h6 35.f7+ ♔h7 36.f8♘X**

The final position deserves another diagram:

Top-10:

Abrahamsson (1887) - Sagit (2360), 1-0, [473](#) points
 Declercq (1763) - Frederic (2231), 1-0, [468](#) points
 Mahji (2178) - Billot (1745), 0-1, [433](#) points
 Choukri (2231) - Van Wely (2653), 1-0, [422](#) points
 Troyke (2058) - Meister (2464), 1-0, [406](#) points

Ronneland (2213) - Nilsen (1851), 0-1, [362](#) points
 Leclerq (1545) - Griffon (1907), 1-0, [362](#) points
 Kirst (1781) - Steinbacher (2119), 1-0, [338](#) points
 Lui (1947) - Desbois (1609), 0-1, [338](#) points
 Duessler (2063) - Foisor (2398), 1-0, [335](#) points

Average gap: 394; White won 7 games, Black won 3 games.

You can view all the games in the accompanying pgn file.

The featured player of the week is Niclas Emrich. Here is the message I have received from his friend Karlheinz Vogel:

Dear Peter,

first of all I do have to admit that this game was played by a teammate and not by me.

Second to be honest I replaced ELO by the national ranking system DWZ. The difference is 302 DWZ rating points and thus Niclas should have passed the formal qualification.

Although the game is rather short it is definitely not a fake, here are the tournament details:

<http://www.svw.info/referate/dwz/2015/B519-C06-BEM>

it was a precandidate tournament for the local state mastership (the top 3 qualify for the candidate match and from there you may qualify for the master tournament (amateur level).

In order to prove that I do have Niclas' okay in forwarding his game to you I simply copied him cc into this mail as well.

Best regards,

Karlheinz

In the game White succumbed to a cheapo in the Budapest gambit in just 8 moves!

Ottmar Seidler (1608) - Niclas Emrich (1306) [A52]

Bezirkseinzelschach 2015 Steinheim, Bahnhof (5.8),
 10.05.2015

1.d4 ♘f6 2.c4 e5 3.dxe5 ♘g4 4.♘f3 ♘c6 5.♙f4 ♙b4+
 6.♘bd2 ♚e7 7.a3 ♘xe5 8.axb4?? ♘d3 0-1

What does this miniature teach us? First of all, never underestimate your lower-rated opponents. Secondly, club players should be acquainted with such a standard mating finale. For example, there is a well-known trap in the Caro-Kann that goes like this: 1. e4 c6 2. d4 d5 3. ♘c3 dxe4 4. ♘xe4 ♘d7 5. ♚e2 ♘gf6?? (wrong knight) 6. ♘d6X. White was probably not aware of it, or simply too careless to check why Black left the bishop en prise. The main move, of course, is 8. ♘xe5 instead of the greedy capture on b4.

If you have ever won a game against someone rated 300 points or above yourself, please send it to peter@pogonina.com for publication. Any additional information (a photo, annotations, etc.) is welcomed.

(4) Artemiev, Vladislav (2671) - Fedoseev, Vladimir (2683) [A07]

ch-RUS Rapid 2015(9.4),
2015.05.14

Here is a very interesting rapid chess game between young Russian players. Artemiev is 17 and world n4 under 20 and his opponent Fedoseev is more experienced. He is 20 years old, second in the world junior list and his best achievement is third place in the European Championship in 2014.

1. ♖f3 ♜f6 2. g3 The Reti opening is very popular now and Karjakin even had this position on the board four times in a row in the current FIDE Grand-Prix. It is far more complicated than it seems.

2...d5 3. ♗g2 c6 It is very logical to restrict the Bg2. 3...c5 3...g6 and 3...e6 are other usual moves.

4. O-O [4.c4 is the alternative, and the latest game on this theme was just played in the FIDE Grand Prix in Khanty-Mansiysk. 4...♗f5 (4...dxc4 is also possible.) 5.O-O e6 6.cxd5 exd5 7.d3 ♗c5 8.♖b3 ♗b6 9.♜c3 O-O 10.♜a4 White gets the two bishops but the pawn structure is slightly

favorable for Black. Karjakin-Tomashevsky.]

4...♗g4 Since my childhood I preferred this move over 4...Bf5, since if White manages the e4 break they will win a tempo over the bishop.

5.d3 The most principled line. Other possibilities are [5.c4 5...e6 6.♖b3 ♖b6 7.d3; 5.d4 5...e6 6.c4 ♜bd7 7.♜c3 ♗e7 8.♖b3 ♖b6 9.♗e1]

5...♜bd7 6.♖e1 It became fashionable to delay the knight's development of Nd2 thanks to Kramnik's efforts. [6.h3 avoids the maneuver which happened in the game (Be6) but gives Black another option. 6...♗xf3!? (6...♗h5 7.♖e1 e5 8.e4 is an unclear position that White is currently aiming for.) 7.♗xf3 e6 8.♜d2 (8.♗g2 I faced this move and came up with an interesting idea: 8...♗d6 9.e4 ♖c7 10.♖e2 dxe4!? 11.dxe4 h5!?∞ fighting for the black squares. Bricard-Bacrot 2011) 8...♗d6 9.♗g2 ♖c7 10.e4 O-O (10...dxe4 11.♜xe4!?) 11.♖e2 ♗fe8 12.f4 e5∞Artemiev-Bukavshin 1 May 2015. Maybe Artemiev couldn't find an improvement on his recent game.]

6...e5 7.e4 [7.h3 is still not great: 7...♗xf3 8.♗xf3 e4!]

7...dxe4 8.dxe4

8...♗e7!? Quite a rare move. [8...♗c5 9.h3 ♗h5 10.a4 O-O 11.♜bd2 (11.♜h4!?) Kramnik- Vachier-Lagrave April 2015.)

11...♖e8 12.♘c4 (12.♘b3!? 12...♙f8 13.♘h4) 12...♚c7 13.♙d2?! ♘b6 14.♙a5 ♙xf3 15.♙xf3 ♚c8 Black has no problem. Artemiev-Wang Yue 6 may 2015. There is quite a lot of room for improvement over this game.]

9.h3 [9.♘bd2 9...h6!? 10.b3!? might be critical.]

9...♙e6! N The bishop cannot dream about a better square.

10.♘bd2 [10.♘g5? 10...♙c4 just wins an exchange.]

10...h6 11.♚e2 ♚c7 12.b3 ♘h7!? Black uses the fact that he can choose where to castle to start the action on kingside. [12...O-O 13.♙b2 b5 is also perfectly safe.]

13.♘h2 Too ambitious. White should have continued with normal development. [13.♙b2 13...♘g5 14.♙h2 ♘xf3+ 15.♘xf3 O-O= with an equal position.]

13...h5! A great attacking move with the positional threat h4, which would take over the black squares.

14.f4 [14.♚xh5 It is dangerous to take this pawn: 14...O-O-O! 15.♚e2 ♘g5 16.h4 ♘h3+ and soon g5 will be devastating; 14.h4 14...g5!]]

14...g6 Necessary prophylaxis against f5.

15.♙b2 [15.f5 15...gxf5 16.exf5 ♙d5 17.♘e4 ♖g8± even with the e4 square, White has too many problems on the g-file.]

15...O-O-O The king is of course going to the queenside now.

16.♘hf3 ♙f6 The first non-perfect move by Black. He had a great exchange sacrifice possibility: [16...h4! 17.g4 (17.f5 17...gxf5 18.exf5 ♙d5 19.g4 ♖he8 with the strong "e4" threat. 20.♘e4 ♙xe4 21.♚xe4 ♘hf6± followed by e4.) 17...exf4 18.♙xh8 ♖xh8=+ and the small material deficit is more than compensated by the dark squares.]

17.fxe5?! [17.♖ad1 This solid developing move is essential. 17...h4 18.fxe5 ♘xe5 19.♙xe5 ♙xe5 20.♘xe5 ♚xe5 21.gxh4 and White is able to equalize.]

17...♘xe5 18.♘xe5 ♙xe5 19.♙xe5 ♚xe5 20.♚f2

20...♘g5! Fast and strong play by Black, as protecting the a7 pawn would give the opponent time to consolidate. [20...♙b8 21.♖ad1 ♘g5 22.h4 ♘h3+ 23.♙xh3 ♙xh3 24.♖fe1=+]]

21.h4 [21.♘c4 leads to a difficult positional position. 21...♙xc4 22.bxc4 ♖d4!? 23.♞ae1 ♜h7!? and when Black reorganizes his forces he will exploit White's many weaknesses.]

21...♞c3!

22.♘c4! ♙xc4? This move unexpectedly leads to a draw. [22...♘h3+ 23.♙xh3 ♙xh3 24.♞fd1 ♙g4! ♢ An important move to take the d-file. 25.♞f1 ♙e6 26.♞e3 ♞xe3+ 27.♘xe3 ♞d4 28.♞f4 ♞hd8 with a technically winning endgame.]

23.bxc4 ♞d2 24.♞xa7 Black definitely thought this position was winning, and it was indeed not easy to see how White would defend everything with little time in rapid chess.

24...♞xg3 [24...♘xe4 25.♞xf7 There is no direct mate and White has counterplay. 25...♞xg2+ (25...♞xa1+ 26.♙h2+=)]

26.♙xg2 ♞xg3+ 27.♙h1 ♞xh4+ 28.♙g2 ♞g3+ 29.♙h1=; 24...♞xc2 25.♞a8+ ♙c7 26.♞a5+= It looks like Black missed this defense. 26...♙d7 (26...♙b8 27.♞e5+ ♙a7 28.♞a5+=) 27.♞xd2+!]

25.♞a8+ ♙d7 26.♞xb7+ ♙e8 27.♞a8+ ♙e7 28.♞b7+ ♙e8 [28...♙f8? 29.♞b4+]

29.♞c8+ ♙e7 30.♞b7+ ♙e8 31.♞c8+ ♙e7 A great game! In the tournament they both finished in the top ten, with Fedoseev sharing second-fourth place. **1/2-1/2**

Endgame section

(15) Horvath, Adam (2528)
- Korpa, Bence (2435)

Zalakaros Open,
2015.05.18

GM Csaba Balogh
Best rating: 2672

My friend GM Adam Horvath just showed me the following very instructive endgame with opposite colored bishops. White is two pawns up, but Black has created an excellent blockade and he seems to hold the draw. In such situations, the only chance is to create a passed pawn on both sides. It seems to me after all, that with precise play White is able to achieve this goal and his position is objectively winning.

43. ♖c2! This very subtle waiting move sets Black into zugzwang. The point is that to execute the breakthrough on the queenside, White must wait until the d2 bishop leaves its square. [The direct 43.a4 is met by 43... ♖g7 44.g5 hxg5 45.hxg5 ♖b4= and Black just waits with his bishop or king and White cannot make progress.]

43... ♜e3 [If Black wants to keep his bishop on d2 and decides to wait with his king, this causes another kind of problem... 43... ♖g7 White wins now after 44.g5! hxg5 45.hxg5

White has successfully created his passed pawn on the kingside and the next step towards the win is to drive his king over the board to help create the second passer on the queenside... 45... ♜c1 46. ♖g4 ♜d2 47. ♖f5 ♜c1 48.g6 ♜b2 49. ♖e6 ♜a3 50. ♖d5 ♖f6 51. ♖c6 ♖g7 52. ♖b5 ♜b4

53. ♖a4! This is a very important detail! White had no other way to make progress. 54.a3 is coming in the next move! 53... ♜c3 54.a3 The threat is Kb5, because the bishop cannot occupy the b4 square anymore. 54... ♜b2 55.b4! (Obviously not 55. ♖xa5? because after 55... ♜xa3 there is no way to create a passer.) 55... axb4 56.axb4 cxb4 57. ♖xb4+- The g-pawn

immobilizes the black king and White simply promotes his c-pawn with the help of his king.]

44.a4!! A very strange move at first sight, because it just seems like White fixes the pawn structure on the queenside. However the point is to push b4 next and no matter how Black captures it, White successfully gets his passed pawn.

44...♔g7 [44...♙d2 does not prevent the threat, White anyway plays 45.b4!! This brilliant move uses the fact that the bishop cannot take since the pawn is hanging on h6. 45...cxb4 Other captures are even worse. 46.c5 White lures the king or the bishop to stop the c-pawn, but this will allow him to push g5 at some point. 46...♙e6 47.♙b3+! It is important to not allow the king too close to the pawn. 47...♔d7 48.♙d5! The pawn is temporarily safe from the king. 48...♙e3 (48...b3 loses to 49.♙xb3 ♔c6 50.g5 hxg5 51.hxg5 ♔xc5 52.g6 ♙c3 53.♔h6+- Black cannot stop the g-pawn and the a8 promoting square fits the white bishop.) 49.c6+ ♔d6 50.g5! A small trick, since the bishop is not really hanging. 50...hxg5 51.hxg5 ♙d4

It is very important now, how White makes progress. 52.♔h6!! White is ready to push g6-g7. (The hasty 52.g6 allows Black to stop the pawn with 52...♙g7!= Black exchanges his b-pawn for the c6 with b3 next and holds the draw easily.) 52...♙e3 53.♔g6! This is psychologically the hardest part of the plan. White should win the game by advancing his g-pawn and he temporarily blocks its way with his own king. However the idea is to play Kf6 and push the pawn. White wins by only one tempo in the following line: 53...b3 54.♙xb3 ♔xc6 55.♔f6! ♔d7 56.g6 ♙e8 and if it was Black's move, Bd4 would successfully block the pawn and secure the draw, however after (56...♙d4+ 57.♔f7+- wins.) 57.g7 ♙d4+ 58.♔g6+- White wins.]

45.b4!! The right timing for creating the passed pawn! [45.g5? is met by 45...hxg5 46.hxg5 ♙d2= and Black holds.]

45...cxb4 46.g5! White has successfully created his passed pawns on both sides, but the win still requires some technique...

46...hgx5 47.hgx5 ♖f7

48.♟b3!! Another great move! White is ready to advance his pawn with discovery check. This prevents Black from playing Ke6. [48.♟g4 would have been met by 48...♟e6 and it is much harder to make progress.]

48...♟e7 [48...♟e6 49.c5+!+- transposes to the 44...Bd2 line.]

49.♟a2 A waiting move. [49.♟g4 The winning plan is to take the king to the queenside. White could also have done it immediately, but it will later transpose to the game.]

49...♟f8 [49...♟d4 50.♟g6+- followed by Kf5 will again transpose to the game.; 49...♟e6 allows 50.c5++- and again transposes to the 44...Bd2 line.]

50.♟g6! ♟e7 51.♟f5 The plan is to push g6, followed by Ke5-d5, supporting the c-pawn.

51...♟d2 This allows the advance of the c-pawn, but the game was over anyway. [If Black plays for instance 51...♟d4 White wins after 52.♟e4 ♟g7 53.♟d5 ♟d7 54.♟c5+- and Kb5-a5 next.]

52.c5 ♟c3 53.♟e4 ♟d7 54.♟d5 ♟c7 55.♟b3 ♟g7 56.♟c2 ♟f8 57.g6 ♟g7 The rest is already very easy. White simply collects the a5 pawn.

58.♟c4 ♟f6 [Black cannot prevent Kb5 with 58...♟c6 because of 59.♟e4+ ♟c7 60.♟d5!+- A great place for the bishop. It controls both the c6 and b3 squares, therefore White is ready to play Kb5 next.]

59.♟b5 ♟c3 The last trick by Black, but of course, White can delay the capture of the a5 pawn by a move.

60.♟b3! Black resigned! A third passer after losing the a5 pawn would be already too much to hold! This very instructive endgame shows us how tricky these opposite colored bishops can be. **1-0**

(16) Grischuk, Alexander(2780) - Caruana, Fabiano(2803)

KM FIDE GP 2015(6.6),
2015.05.20

GM Arkadij Naiditsch
Best rating: 2737

Caruana had been dominating the game for a very long time, but Grischuk was fighting very well and made it difficult for Caruana to score the full point. Currently, Black has passed b- and h-pawns, which gives him excellent winning chances, especially since the white king is also cut off on the 1st rank.

60...♖g5 Caruana is playing in a very practical way. [Black could have transposed into a rook endgame after 60...♗d3+ 61.♔e1 ♖e2+ 62.♔d1 ♖xe5 but now White is in time with 63.♖xb3 and Black can't save the d3 bishop. 63...♖f5 64.♖xd3+ ♔g4 But it is still not that easy to see that it is actually a draw! (64...♔g2 65.♖d2+ ♔g1 66.♖d4 h3 67.♔e2 ♖xf6 68.♖g4+

68...♔h2 and the position is a theoretical draw.) 65.♖d4+! An important move, chasing away the black king as far as possible. 65...♔g5 66.♖d8 ♖xf6 67.♖g8+ Now the white rook starts to check from behind. 67...♔h5 68.♖h8+ ♔g4 69.♖g8+ ♔h3 Now that the black king is cut off on the g-file, we again have an easy theoretical draw. 70.♔e2]

61.♗d4 White keeps on waiting on the a1-h8 diagonal.

61...♔h2 Black of course tries to bring his pawn as close as possible to the h1 square.

62.♗b6 It is not the best idea to move the bishop away from the a1-h8 diagonal. [62.♖b7 62...♖f5+ 63.♔e2 and White keeps on waiting.]

62...h3 A normal move, but maybe Black had a sudden better chance. [62...♖f5+ 63.♔e2 ♔g2! using the fact that White can't take the h4 pawn because of the b2 move. 64.♖g4+ White doesn't have anything better. 64...♔h3 65.♖b4 ♖xf6 66.♗d8 ♖h6 and Black is already 2 pawns up.]

63.♗c7+ ♔h1 It is very hard for White to defend such a position. Maybe it is a draw, but practically it is very hard to hold. Black has a lot of tactical ideas.

64.♖h4 [64.♔e2 Maybe White should have tried and go to b2 with his king.]

64...♙d3+! A very strong move, since now Black will be in time to play b2!

65.♖f2 ♜g2+ 66.♙e3 b2 67.♜b4! Grischuk refuses to give up and pins his hope on the f6 pawn.

67...♙g6 Black needs to stop White from playing f7.

68.♙e5 The b2 pawn is falling, but the h-pawn is almost there.

68...h2 69.f7! and again White finds the only way to continue. [69.♙xb2 was losing on the spot after 69...♙g1 and h1Q next.]

69...♙xf7 70.♙xb2 ♜g5! Perfect play! [70...♙g1 already leads to a draw now. 71.♙e5 and with the f7 move White secured the threat of playing Rb1, so the position is a draw.]

71.♙f2 White cannot let Black play Kg2.

71...♙d5? What a mistake when the victory was so close!

[71...♙g6! was the right move, controlling the b1 square. Black is threatening to play Rg2 next and free his king from h1. White is lost here!]

72.♙d4? After such a tough defense, Grischuk hands back the present! [White could have used the little tactical trick that after 72.♙e5! attacking the h2 pawn and threatening to play Rb1. The position is a draw!]

72...♜g2+ Now Black is back on the winning track.

73.♙f1 ♜c2 White can't keep the black king on h1 any longer.

74.♜b6 ♙c4+ 75.♙e1 and now Black can even choose with which move to finish the game.

75...♜g2 Clearly a safe winning move. Black wants to remove the rook from g2 all the while attacking the white bishop, and then play Kg2. White is hopeless. [Of course a move like 75...♙g2 was winning too. We saw very high level play in an interesting endgame, where both players used their chances very well, and then blundered at the same time...] **0-1**

Chess and the City. Good, better, Georgia!

WGM Elisabeth Paehltz

Best rating: 2493

This year's European Women's Championship is taking place in Chakvi, a small city in Georgia. Georgia has always been well known for its rich chess tradition, boasting famous former stars such as Nona Gaprindashvili, Nana Alexandria and Maia Chiburdanidze. Even nowadays the Georgian women's team is one of the strongest in the world, and they duly took the World Team title just a month ago.

For me personally, however, Georgia is more than just a famous chess country. It is my all-time favorite place when it comes to food and wine. Georgian cuisine is popular for its unique cheese breads, called "Khachapuri", and its meat-filled dumpling "Khinkali". For me these are, of themselves, more than enough reason to stay here for a very very long time.

*Khachapuri Adjaruli and Khachapuri Imeriti**Khinkali**Chicken in walnut sauce*

As a true wine lover, Georgia is definitively not a place to miss, and their Saperavi and Kindsmataruli grapes are certainly worth a try! For me the tournament itself has started quite badly, with 1,5 out of 3. It seems that my 'out of sorts' patch is still lingering on, and I am wondering how long I must wait before I snap out of it.... However, I will stay motivated as there are still 8 rounds to go, and nothing is lost yet in respect of a chance to qualify for the upcoming Women's World Championship. All together there are 14 qualifying places available, so that gives me a fair chance of eventually succeeding.

Editorial Preface

The last stage of the FIDE Grand Prix in Khanty-Mansisk decided of the first 2 qualifiers for the next Candidates Tournament - which in turn qualifies to the World Championship match - and these are Caruana and Nakamura. The fight for the 2 places was very tough. Before the tournament Tomashevsky was the clear leader and he only needed to score around +1 to qualify, but after a good start things went badly for him.

Jakovenko also just missed the golden place by half a point, but all in all, Caruana and Nakamura both clearly deserved the qualification spots.

So in the final standings Caruana, Nakamura and Jakovenko all shared the first place with 6.5/11.

In the Chinese Championship, nothing and nobody can stop Wei Yi, who is now leading by a full point as he is on 7.5/10 (out of 11 rounds). Yu Yangui is in second position with 6.5/10 and 3rd is Ding Liren with 6/10. Clearly, the only 15-year old Wei Yi will have a great future and maybe he could even be a real threat to Carlsen, as the young Chinese player is already very close to 2730 ELO.

In the 10th American Continental in Montovideo, Mareco Sandro and Quesada Perez both scored 8.5/11. The 3rd place was shared by a lot of players, but best on tiebreak was Cori Jorge with 8/11.

In the European Women's Championship in Batumi, the leader is Nino Batsiashvili with a fantastic score of 8/9. Zhukova is in second position with 7.5/9, but there are still 2 rounds to go and a surprise might still happen.

The main event of the next week will be the French league, with a lot of 2700+ players participating. The first round is already tomorrow.

As usual, we hope you will enjoy our weekly issue of Top GM secrets!

Two best games of the past week

(1) **Grischuk, Alexander (2780)**
- **Giri, Anish (2776) [D45]**

KM FIDE GP 2015(10.4),
2015.05.25

GM Arkadij Naiditsch
Best rating: 2737

We are going to see a very interesting game with a disappointing end, as a draw was agreed in a very unclear position. Both Grischuk and Giri clearly had a disappointing event, but the great fighting spirit never dies!

1.d4 ♘f6 2.c4 e6 3.♘f3 d5 4.♘c3 A lot of games on the top level start with this move order.

4...c6 We are back in the Slav.

5.e3 ♘bd7 6.♙e2 There are small differences between 6.Bd3 and 6. Be2, but these are nuances.

6...♙d6 7.O-O O-O

8.a4!? Very original play. Knowing that Black's main idea is usually to play e5, Grischuk wants to gain some space on the

queenside first.

8...♙e7 A typical move, but I don't think that it is the best for Black now. [8...b6 with the idea of playing Bb7 next and then c5.; Or maybe even 8...a5 taking the b4 square under control and with the idea to play b6 later on looks like safer moves to me.]

9.a5 Now White often wants to play a6.

9...a6 [Maybe Black should have tried immediately 9...♘e4]

10.♙b3! A strong move! White stops Black from playing e5 too easily, which means that the bishop on c8 will remain very passive.

10...♘e4 [Black could have tried to anyway force things with 10...e5 11.cxd5 cxd5 12.♘xd5 (After 12.♙d2 12...e4 13.♘e1 ♖d8 followed by Nf8-Ng6, the position is unclear.) 12...♘xd5 13.♙xd5 White is a clear pawn up, but Black is winning 2 tempi for development now. 13...♘f6 14.♙a2 ♙e6 but even here White seems to be better after 15.b3 and pawn is a pawn.]

11.♘d2 A very logical move. In case White can get rid of the knight on e4 he is going to be clearly better.

11...f5 This move has to be played. [11...♘xc3 12.bxc3 This kind of position is always better for White.]

12.f4! A very strong move in my opinion. White could have tried many other ideas like Ndx e4 and then f3, but I think Grischuk's play against the bishop on c8 is very smart.

12...♖b8 A prophylactical move, but maybe the direct 12...Ndf6 was a simpler solution.

13.♘dx e4 dx e4 [After 13...fxe4 14.♙d2 gives White a big positional advantage. Black has no play and White can think about playing on both flanks.]

14. ♖d2 Developing before the action starts.

14...g5?! A very aggressive move, but Black is just damaging his own position. [Much more natural was 14...c5 15. ♖a4 cxd4 16. exd4 ♗f6 17. ♗b6 ♕d7 and the position is better for White, but things are far from clear.]

15.g3 A solid move. [White could have won a pawn after 15. fxg5 15... ♖xg5 16. c5 ♕c7 17. ♖xe6+ ♗h8 but Black is going to be fast now with Nf6 and some play on the kingside, which might compensate being a pawn down.]

15...h6 Black is trying to keep his structure together.

16. ♗a4 ♗h7 Preparing to play on the kingside.

17. ♗b6 [Maybe White could even avoid the exchange of knights and first play 17. ♗h1 but probably Black doesn't have anything better than to play Nf6 anyway and we would be back to the position of the game.]

17...♗f6 [Now Black had another opportunity: 17... ♗xb6 18. axb6 c5 but White is probably still better after 19. d5 but again, things are far from clear to me.]

18. ♗h1 ♕d7 19. ♕c3 White's idea is clearly to push d5 at some point, after which Black's position could fall apart.

19...♕e8 Typical play from Black. Bd7-Be8-Bh5 ideas can

often be found in such structures.

20.d5!? Of course, White should not wait any longer with the action!

20...gxf4 [I think the main move should have been 20...cxd5 and White has a lot of different options here: 21. ♖ad1!? preparing to play cxd5. (In case of the immediate 21. cxd5 21... ♗xd5 22. ♗xd5 exd5 23. ♖xd5 Black has the very strong 23... ♖d8! and the position is very unclear.; 21. ♕xf6 It is clearly a hard decision to give up the dark squared bishop. 21... ♖xf6 22. cxd5 gxf4 23. gxf4 e5 and again the position is far from clear.) 21... ♖d8 22. cxd5 and White has some initiative.]

21.gxf4 ♗g4 A slightly strange decision, since Black is closing his own play! [21... ♖g8 looks more natural.]

22. ♕xg4 fxg4 Black's king's position is very open now.

23. ♖c2? A very strange move. [Why not play 23.c5 23... ♗xc5 24.dxe6 ♖f5 25. ♗e5 and I think it is very clear that White is much better.]

23... ♗g6 Black is back into the game.

24. ♖ad1 ♖bd8 The black king is more or less safe now and the black pieces went around the white knight on b6, which went from being a fantastic knight to a rather useless one.

25. b4 Grischuk keeps on trying to create something.

25... c5 Again I am not sure at all what Giri is doing. [25... cxd5 looks much more natural. 26.cxd5 ♗f5 and Black's position looks very safe.]

26. bxc5 ♗xc5 27. ♖e2 Now White is left with a strong d-pawn.

27... ♗f5 28. ♗e5 ♖g8 Black is preparing to play g3 at some point.

29. ♖g1 and of course White avoids it.

29... ♖f7 30. dxe6 It is a good choice to open the position, although it is a bit of a pity to lose the passed pawn on the d-file.

30... ♗xe6

31. ♗d5! An excellent move, using the fact that Black can't win the pawn on d5.

31... ♗e7 [In case of 31... ♗xd5 32.cxd5 ♖xd5? White is almost winning after 33. ♖c4!]

32. ♖c2 What a strange draw offer! White is clearly better here and it is hard to see where the risk is if he continued playing... This draw offer is also very untypical of Grischuk, who is usually a great fighter. A slightly sad end of the game, but on the other hand we just saw 30 very interesting moves with a lot of different ideas. **1/2-1/2**

(2) Yu Yangyi (2723) - Ding Liren (2757) [C65]

ch-CHN 2015(3.6),
2015.05.20

GM Csaba Balogh
Best rating: 2672

The Chinese players are improving very fast! They are getting stronger and stronger and it is very interesting to follow their National Championship. Let's take a look at two of their highest rated players.

1.e4 e5 2.♘f3 ♘c6 3.♙b5 ♘f6 Ding Liren is considered to be Caro-Kann expert, but it looks like even he is switching to the rock solid Berlin Wall.

4.d3 No Berlin endgame today...

4...♙c5 5.c3 O-O 6.O-O ♖e8 My favorite move as well with both colors, although 6...d6 is more frequently seen.

7.b4 I have seen this tricky move first time by Harikrishna and then I played it myself also as White. The idea is to grab some space on the queenside and to ask the black bishop, which diagonal he wants to choose.

7...♙b6! The correct retreat. Black is sometimes afraid of the pin after Bg5, which would not be so dangerous with the bishop on f8. [7...♙f8 is wrong because of 8.♙c4! and suddenly Black faces some unpleasant problems around the f7 square. Ng5 and Qb3 are threatening. With the bishop on b6, Black could more easily defend with Rf8.]

8.♙c4 Black was threatening with a5, destroying the healthy pawnchain on the queenside. Now he is ready to meet it with b5.

8...d6 [8...h6 is another option, preventing Bg5 and Ng5.]

9.a4 a5 [I had two games, one with both colors on 9...a6 where the idea would be to keep the pawn structure more flexible.]

10.b5 ♘e7 The knight's maneuver to g6 is a typical plan in this opening. That could be followed by Be6, trading the bishops and solving all the problems.

11.♙b3 ♖f8! looks a bit passive, but Black must solve the direct problems. We should check what happens if White tries to get some direct benefits with concrete moves: [11...d5 weakens the squares too much.. . 12.exd5 ♘exd5 13.♖e1 putting pressure on the e5 pawn. Bg5 is another unpleasant threat, pinning both knights. Black is not well prepared to deal with all these ideas.]

12.♘bd2 The standard development. [12.♙g5 is simply met by 12...♘g6 followed by h6, unpinning the knight. 13.♘h4 is the standard move to avoid h6, but Black is completely fine after 13...♘f4; 12.♘g5 is met by

12...♕e8! temporarily running into passivity, but Black sends back the knight with h6, followed by Ng6 and Be6. These Ng5 ideas should be connected with f2-f4, quickly opening the f-file, but now the bishop on b6 prevents this plan.]

12...♖g6 13.d4 White should challenge Black in the center if he wants to fight for an advantage. An even slower plan could be to play Re1, followed by Bf1 and Nc4 or a direct one is to take on e5 followed by Ba3, sending the rook away from the guarding of the f7 pawn.

13...♞h5! Another known plan from many Ruy Lopez lines and Italian openings. Black organizes his counterplay on the kingside with Qf6 and Nf4, which could be even more powerful now because the white pieces are slightly driven to the queenside.

14.dxe5 ♞xe5! A necessary recapture because of concrete

reasons... [14...dxe5 does not work, since after 15.♞a3! the d2 knight is protected.]

15.♞xe5 dxe5 16.♞f3 [White cannot make use of the undeveloped queenside pieces with 16.♞a3? 16...♔xd2 17.♞xf8 ♔xf8 18.♞xf7 The idea could be some quick penetration with Rad1, but Black quickly consolidates with 18...♔g5+]]

16...♔f6! An obvious move! Black protects both the f7 and the e5 pawns and brings his queen into the game, but it required some calculation...

17.♞g5 [17.♞a3 does not make much sense anymore, because the f7 square is well protected. This bishop should rather guard the f4 square. 17...♔e8]

17...♔g6 18.♞e7 This was the whole point behind White's setup. The rook and the e5 pawn are hanging, Black seems to be in deep trouble, however the counterplay is coming veryfast!

18...♞f4! 19.♞h4 [19.g3 is even worse 19...♔xe4! 20.gxf4 ♔xf3 21.♞xf8 ♞h3! and White collapses. 22.♞d5 e4-+]]

19...♔g4 A difficult decision. Black wanted to keep an eye on the g2 square, he is threatening with g5. [However it was even stronger to play 19...♔h5 The point is to overprotect the

f7 pawn in order to save the rook with Re8. 20. ♖xf8 (20.g3 now can be met by 20... ♖e8! 21. ♖a3 ♖h3 It is clear that Black has a crushing attack here. 22. ♖fe1 g5!—+ is game over. Black eliminates the last defender of the white king and is going to mate with Qf3.) 20... ♖xh4 Black simply wants to take on f8 and White has no time to save the bishop because the consequences after 21. ♖a3 are even worse: 21... ♖g4 22.g3 ♖f3 23.gxf4 ♖h3—+]

20.g3 [20. ♖xf8 20... ♖xh4 transposes to the 19... Qh5 line.]

20...g5!? Another very hard moment! Black continues playing on mate with the Qf3-Bh3 plan, but first he needs to capture the knight. [However it was objectively better again to play 20... ♖h3+! 21. ♖g2 (21. ♖h1 21... ♖xf2+ 22. ♖xf2 ♖xf2 23. ♖xf8 ♖xe4+ 24. ♖g2 ♖h3—+) 21... ♖xf2! Qh3 and Qxe4 are decisive threats, therefore White is forced to play 22. ♖xf2 ♖h3+ 23. ♖g1 ♖xf2+ 24. ♖xf2 ♖xh2+ 25. ♖g2 ♖h3 26. ♖g1

And the key move of the line is 26... ♖fd8!! 27. ♖xd8 ♖xd8 The rook joins the attack along the d-file. White does not have adequate defense. An attempt to close the d-file with 28. ♖d5 loses to 28... ♖d6!—+ and Rf6 next wins.]

21. ♖g2 ♖h3+! 22. ♖h1

22...♖f3! Completely squeezing White into the corner at the cost of an exchange. This is something that a human does not start to calculate, but he feels that the compensation will be more than enough.

23. ♖xf8 ♖xf8 24. ♖a2 [Getting rid of the queens with 24. ♖d1 does not solve the problems. White remains busted after 24... ♖g4! 25. ♖xf3 ♖xf3—+ followed by Rd8-d2 with complete domination of the pieces. White is tied up and he has no counterplay at all despite the extra exchange.]

24...♖g4! Developing and keeping the queen on f3 against the Be2 threat.

25. ♖ae1? White does not pay enough attention to the importance of the d-file. [The only move was 25. ♖d2 although the position remains extremely unpleasant to play with White, but at least the game goes on. 25... ♖e8± looks strong with the plan of Kg7 followed by Re7-d7.]

25...♖d8! [The direct 25... ♖xf2+ is premature. 26. ♖xf2 ♖xf2 27. ♖xf2 ♖xf2 28. ♖f1 White gets counterplay on f7. However with the rook on d8, this line does not save White because of Rd2 or Rd1.]

26. ♖e2 [After 26. ♖c2 26... ♜xf2+ works already: 27. ♖xf2 ♖xf2 28. ♖xf2 ♖xf2 29. ♖f1 ♖d2—+ (29... ♖d1—+)]

26... ♜xf2+ 27. ♖g1 [27. ♖xf2 27... ♖xf2 28. ♖f1

Black has two very nice wins here: (28. ♖xg4 28... ♖xa2—+) 28... ♖xe2! The human win. (28... ♖d1! is actually even stronger! 29. ♖xd1 ♖h3—+) 29. ♖xf2 ♖d1+ 30. ♜e1 ♖xf2 White stands in too many motifs. 31. ♖g2 (31. ♖xe2 31... ♖xe1+ 32. ♖xe1 ♖xe1—+) 31... ♖xe1 32. ♖xe2 ♖d2—+]

27... ♖xc3! The last precision! It serves the invasion of the rook to d2!

28. ♖xf2 ♖xf2+ 29. ♖xf2 ♖d2 [White resigned in view of 29... ♖d2 30. ♖b1 ♖f3+ 31. ♖g1 ♖xe2 32. ♖xe2 ♖xe2—+ with 3 extra pawns and a superior bishop.] **0-1**

David vs. Goliath

Peter Zhdanov
Chief Editor of Pogonina.com

In this entertaining column we are reviewing the most unexpected results that occurred last week. Players usually face opponents of a similar level. Considerably less frequent are situations when a significantly lower-rated player succeeds in beating a much stronger adversary.

The previous week brought us 15 upsets.

The number of moves ranges from 24 in Perez (1543) - Campora (1847), 1-0 to 60 in WGM Daulyte (2402) - WFM Sviridova (2087).

The highest-profile upset of the week was FM Decoster (2303) - GM Fedorchuk (2657), 1-0.

The "fatality" nomination goes to Chamlian (1714) - Garcia la Rosa (2017) for this dramatic finale:

In this double-edged position Black erred with 24...Qg5? and got mated after 25.h4! Nxf1 26.Rxf1 Qh5 27.Qc7+ Kg8 28.Qf7X

Black scored on par with White this week largely due to Mariam Tevzadze (1834)'s feats. She defeated WGM Inga Khurtsilava (2212) and WIM Marina Baraeva (2204) at the European Women's Chess Championship.

In other news: how much time does one need to improve from a 2114 to a 2540 rating? Obviously, most players never make it. GM Mohamad Al-Modiakhi pointed out that it took him 13 years. Meanwhile, 14-year old Jergus Pechac from Slovakia managed to achieve this breakthrough in...one month! Obviously, quite a few upsets happened along the way: [Individual Calculations April 2015 - Pechac, Jergus](#)

Top-10:

Zabystrzan (2321) - Havelka (1805), 0-1, [516](#) points
 Masrhi (1865) - Ahmed (2346), 1-0, [481](#) points
 Bekentayev (1926) - Amanov (2380), 1-0, [454](#) points
 Paveto (2400) - Pereira (1955), 0-1, [445](#) points
 Khurtsilava (2212) - Tevzadze (1834), 0-1, [378](#) points
 Baraeva (2204) - Tevzadze (1834), 0-1, [370](#) points
 Decoster (2303) - Fedorchuk (2657), 1-0, [354](#) points
 Mammadova (1862) - Unuk (2213), 1-0, [351](#) points
 Casas (1834) - Andrade (2177), 1-0, [343](#) points
 Henriquez Villagra (2478) - Michailov (2137), 0-1, [341](#) points

Average gap: 403; White won 5 games, Black won 5 games.

You can view all the games in the accompanying pgn file.

If you have ever won a game against someone rated 300 points or above yourself, please send it to peter@pogonina.com for publication. Any additional information (a photo, annotations, etc.) is welcomed.

(3) Xiong, Jeffery (2497) - Batista, Lazaro (2684) [C67]

24th Chicago Open(9.1),
2015.05.25

Whatever the quality of the game, I have to show you the win which made Jeffery Xiong a Grandmaster at 14 years old! His triumph in the Chicago open, ahead of 24 GM, also brought him a nice paycheck of 10.000\$!

1.e4 e5 2.♘f3 ♘c6 3.♙b5 ♘f6 The Berlin is a very safe opening but the strong Cuban, who - like his opponent - was in a must-win situation (since it would bring 5 times more cash than a draw), knew that he would get his chances anyway.

4.O-O ♘xe4 5.d4 ♘d6 6.♙xc6 dxc6 7.dxe5 ♘f5 8.♙xd8+ ♙xd8 9.♖d1+ Not the most played move in this theoretical endgame. White should prefer to put the a1 rook on d1, but at least it forces Black's king to go to the kingside. This week Wei Yi won a very nice game against Ding Liren and later also clinched the Chinese title after [9.h3 9...♙d7 (9...♙e8 10.♘c3 h5 is the most popular and solid line.) 10.♖d1 ♙e7 11.g4 ♘h4 12.♘xh4 ♙xh4 13.♘d2 ♙c8 14.♘f3 ♙e7 15.♖d3 h6 16.♘d4 b6 17.♖f3!? ♙e8 18.♘f5 ♙f8 19.b3 with pressure.]

9...♙e8 10.♘c3 ♘e7 11.h3 ♘g6 A typical knight maneuver to avoid some g4 with the gain of a tempo sometimes.

12.b3 ♙d7 13.♙b2

13...♘f4 An interesting concept to go to e6 with the knight. Bruzon's compatriot, Dominguez, also used it during the last FIDE Grand Prix against Caruana.

14.♖d4 [14.♙h2!? 14...♙e7 15.g3 ♘e6 16.♖d3 It is maybe a slight improvement to have the pawn on g3 but the position remains unclear.]

14...♘e6 15.♖d2 ♖d8 16.♖ad1 ♙e7 17.♘e2 c5 Black wants to keep the pieces and avoids Nfd4.

18.♘c3 ♙c6 19.♘d5 White needs his knight on this strong square but it doesn't bring any advantage.

19...h5

20.c4 I think White needs to put his pawn on h4 and later find a way to push his f-pawn. [20.h4]

20...♖d7 [20...h4 is a more precise move order.]

21.♖d3 ♘d8 I would prefer to play h4 and then Kd8-c8.

22.♘d2 h4 23.♘f1 This knight maneuver shows that White doesn't find a plan.

23...♙g5 24.♘h2 ♖h5 25.♘g4 ♔d8 26.♙c3 ♔c8 Black's pieces are all on their best positions and his position is preferable. Now White understands that he can't wait and seeks some pieces exchange.

27.♙d2 The problem of this move is that Black's strong knight gets easy access to the d4 square.

27...b6 28.♙xg5 ♖xg5 29.♔h2 A strange move. It was better to start with f3, followed by Kf2.

29...♖h5 30.f3 a5! It is typical to provoke weaknesses on White's queenside.

31.♔g1 a4 32.♔f2 axb3 It was not necessary to hurry with this exchange.

33.axb3 ♔b7 34.♘de3

34...♖e7?! To exchange one rook would make life more difficult for White. [34...♖xd3! 35.♖xd3 ♖h8 gives Black a clear edge. The b3 pawn is difficult to defend and White cannot take the h4 pawn: 36.♘f5 ♖a8! 37.♘xh4 ♖a2+ 38.♔g3 (38.♔f1 38...♘f4 39.♖e3 ♙d7+) 38...g5! 39.♘f5 ♘f4 and Black wins the rook or mates.]

35.♘d5 ♖e8 36.b4! White gets rid of his main weakness.

36...cxb4 [36...♙xd5 37.cxd5 ♘f4 38.♖c3 (38.♖d2!?) 38...cxb4 39.♖c4 ♘g6 40.♖dc1 ♖c8 41.f4 seems ok for White.]

37.♘xb4 ♖hh8 Now that the files are open this rook should also be brought back to the game.

38.♘e3 ♙a4?! Once again, Black should exchange one pair of rooks to keep real winning chances. [38...♘c5 39.♖a3 ♖a8=+ (39...♖xe5?? loses to the nice tactical motif 40.♖a7+!)]

39.♖a1 ♖a8 40.♖da3 Exchanging all rooks would be fine for White.

40...♘c5 41.♘bd5 ♖he8 [41...♖a5 was the last chance for Black to push. 42.♘c3 ♖ha8 43.♘xa4 ♘xa4 44.f4 ♘c5]

42.f4

42...g5? This mistake is probably based on a tactical oversight. The idea behind it is very strange because Black just destroys his kingside when he should play on the other wing. [42...a5 is still a normal move.]

43.fxg5 ♖xe5 44.♘c3 Now it is already Black that should seek equality.

44...♗d3+!? The beginning of tactical lines which lead to a drawn rook ending where Black should be very precise.

45.♙e2 ♜ae8 46.♗xa4 ♜xe3+ 47.♙d2 ♜e2+ 48.♙xd3 ♜8e3+ 49.♙d4 c5+ 50.♗xc5+ bxc5+ 51.♙xc5 ♜xa3 52.♜xa3 ♜xg2 53.♙d6 A very normal move, but another way to pose some defensive problems is [53.♜f3!? 53...♜xg5+ 54.♙d4+=]

53...♜g3 54.♜a5 [54.♜a4 doesn't pose much problems. 54...♜xh3 55.♜b4+ ♙c8 56.c5 ♜e3 57.♜xh4 ♜e6+ 58.♙d5 ♜g6 59.♜h5 ♙d7 60.♙e5 ♙e7=]

54...♜xh3 55.♜f5

55...♜d3+?? A terrible blunder. It was quite easy to achieve a draw with the forced move [55...♜g3! 56.c5 (56.♜xf7+ 56...♙a6 The h- and g-pawns will soon be exchanged and a draw agreed.) 56...h3 57.c6+ ♙b6 58.c7 ♜d3+ 59.♙e7 (59.♙e5 59...♙xc7 60.♜xf7+ ♙d8 61.♜h7 ♙e8=) 59...♙xc7 60.♙xf7 h2=]

56.♙e7 h3 [56...♜g3 57.♙xf7 h3 58.g6 h2 59.♜h5+-]

57.♜xf7! h2 58.♜h7 ♜d2 59.g6 ♜f2 60.g7 ♜e2+ 61.♙d6 ♜d2+ 1-0

Endgame section

(14) **Tomashevsky, Evgeny (2749)**
- **Dominguez Perez, Leinier (2734)**

KM FIDE GP 2015(8.2),
2015.05.22

GM Arkadij Naiditsch
Best rating: 2737

During the next 50 moves, we will see a great defense of a difficult endgame by Dominguez, who does everything perfectly and gives us a good example on how to play such opposite colored bishop endgames!

47...h4! A great move according to an old rule which says that when you are worse in an endgame, you should try to exchange as many pawns as possible.

48.♟xg6 [After 48.g4 Black reaches a draw by playing 48...g5! 49.fxg5 ♖e7 and all Black needs to do is to keep on moving with his bishop on the diagonal a1-h8. The position is a draw.]

48...h4 49.h4 White is 2 pawns up, but the opposite colored bishop endgame gives Black excellent drawing

chances. Let's say in case we would exchange the e-pawns, the position would be a theoretical draw.

49...♟b2 Another very good move by Dominguez. The black bishop will take a perfect position on c1 and soon we are going to see why.

50.♖e4 ♖e7 Black is placing his king to f6, even closer to the place of action.

51.♟h5 ♖f6 52.g4 White needs to start pushing the pawns.

52...♖e7 53.♖f3

53...♟c1! Another very good move. Now whenever White is going to put g5 and try to play e4 and Kg4, Black is going to answer with e5.

54.♟g6 ♟d2 55.♟c2 ♖f6 56.♟d3 ♟c1 Black keeps on waiting and White doesn't seem to have a winning plan.

57.♟b1 ♟d2 58.♟e4 ♟c1 59.♟c2 ♟d2 60.♟d3 ♟c1 61.♟b5 ♟d2 62.♟d7 ♖e7 63.♟c8 ♖f6 64.♟a6 ♟c1 65.♟c4 ♟d2 66.♟b3 ♟c1 67.♟a2 ♟d2 68.♟c4 ♟c1 69.g5+ Finally Tomashevsky decides to do something.

69...♖e7 But it is still unclear what is next?!

70.♖e2 ♟a3 71.♟b3 ♟c1 72.♖d3 ♟a3 73.♖d2 ♟b4+ 74.♖e2 ♟a3 75.♖d3 ♟c1 76.♟d1 ♖f7 77.♟h5+ ♖e7 78.♖e2

♔f8 79.♔f3 ♕d2 80.♔e4 ♕c1 81.♔d4 ♕b2+ 82.♔d3 ♕c1 83.♔e2 ♔g7 84.♔f3 ♕d2 85.♕g4 ♔f7 86.♕h3 ♕c1 After moving around for a long time and not being able to find any winning plan, White tries his last chance.

87.♕xe6+ [87.e4 leads to an immediate draw since after 87...e5! the g5 pawn is falling.]

87...♔xe6 88.e4 3 pawns against the bishop looks interesting, but in fact it is nothing but a draw.

88...♕d2 Black correctly keeps on waiting.

89.♔g4 ♕c1 90.♔g3 [In case of 90.f5+ 90...♔e5 is the right way to defend.]

90...♕d2 91.♔f3 ♕c1 92.♔g4 ♕d2 93.f5+ The last chance.

93...♔e5 94.♔h5 [Another try for White could be 94.f6 94...♔e6 95.♔h5 but now Black goes to the other diagonal to keep on waiting. 95...♕c3! 96.♔g6 ♕b2 and White has no further plan to improve the position. 97.♔g7 ♕c3 The only chance is 98.♔g8 but Black still holds easily with 98...♕xf6! 99.gxf6 ♔xf6 followed by Ke5 with a draw.]

94...♔xe4 Black is in time to hold the white pawns.

95.g6 ♕c3 96.♔g5 f6 is a threat, so Black needs to hurry back with his king.

96...♔d5 97.♔h6 [97.f6 97...♔e6 with a draw.]

97...♔e4 The right move as White was threatening to play g7.

98.♔g5 ♔d5 99.f6 There is no more hope.
